Q. Now Governor, this neutral zone was established by this commission in 1902, September 27th, 1902. Governor Longino recognizing that action requested a modification—how many meetings of your legislature, that is of the legislature of Mississippi have been held since 1902, September 27th, 1902?

A. Only one since 1902.

Q. Was there any step taken in that legislature, or any action whatsoever repudiating this action of the Mississippi Oyster Commission or the boundary commission?

A. I don't remember any thing that was done, but I have never seen yet any man, woman or child who regarded the action of this commission in fixing the line as having any legal, binding force upon any thing or any body whatever. I don't think there is any body; I don't think there is a man in the State of Mississippi that thinks so.

Q. Did not Governor Longino so regard it when he asked for a modification of it?

A. I have no idea what he regarded.

Q. Would it not strike you that way, under that statement of fact, if he asked for a modification of the agreement?

A. Evidently he thought it was hardly just to the people of Mississippi, in the agreement that was made, and probably Governor Longino thought it would be better if he could get—if any body was to observe this agreement—it would be better if he could get a more just distribution of the privileges and opportunities in this disputed territory by a modification. I have no doubt but that is
1937 what he thought.

Q. Does not it strike you that asking for a modification of the existing agreement was an acknowledgement of the binding force of the agreement?

A. As a matter of course you know very well as a lawyer that the governor of Mississippi with the authority of law bind the people of Mississippi.

By Gen. McCLURG: The counsel for Mississippi must object that the question only calls for the opinion and surmise of the present governor as to what induced the former governor to act, and to give his opinion as to what the former governor did, which is a very difficult thing for the present governor to do.

By Col. ZACHARIE:

Q. I only asked that question because you said that you supposed that there was not a man, woman or child in the State of Mississippi who regarded that agreement as having any binding effect?

A. I said legal binding effect. I will state in this connection that that has been my observation.

Q. Now Governor in regard to the instance you cited in regard to the corn field. Suppose a man brings a suit claiming that he is in

ession of certain property, and that other persons are trespassing
n that property. Would not the person bringing the suit and
ning the possession be upheld in the possession of this property
ng the pendency of the suit subject to the return of rents and
nues in case that his opponent the defendant, should succeed
ld not the plaintiff remain on the premises and draw from it
rents and revenues until the adverse decision was made against
?

Well that is true, but if he were permitted to do that he
ld be required to give some surety to the other party to the
controversy, that in the event he should lose his case he
could return to this person, the other party to the suit, his
interest in the matter. He would therefore have some pro-
on. In this case if I am correctly informed, Louisiana is en-
ng the exclusive privilege of fishing upon a certain part of this
tory. She is reaping the revenues from it and in the event
issippi should win the case, I know of no recourse that Missis-
would have upon Louisiana to recover that, and in the mean-
Mississippians with equal rights because we must presume that
the court determines the question, are deprived of the privilege
hing upon that disputed territory.

Could not Mississippi if she won this suit, immediately insti-
a suit in the Supreme Court of the United States to recover the
ages which she has sustained by the wrongful act?

I don't know about that, but she ought not to be put to that
ble.

The damages she has sustained by the wrongful action of
siana being Mississippi's contention? If that is sustained, I

Well unless Mississippi should make every effort to protect her
interests in this I don't know that she could.

Redirect examination.

By Mr. McCLURG:

Governor, you stated in your cross examination that you were
ctly willing to admit that there were facts on both sides of this
which justified this controversy, otherwise it would not now be
ing in the court. We are not to understand by that as I take
What you are perfectly familiar with all of the facts of this case
ou?

By Mr. DYMOND: Objected to on the part of the State of Louisiana as leading and suggestive of the answer desired.

I think if you will refer to the question asked there you will
at I used the word "presume." I intended to. The fact is, as
ed in my original examination, that I am not familiar with all
e facts in the case. What I intended to say was I presume there

are facts on both sides which justified this controversy or it would not be in the courts.

Q. The point that I want to call your attention to is, it is denied on the part of Mississippi that there is any such controversy between these two States within the contemplation of the Constitution of the United States, giving to the Supreme Court of the United States jurisdiction. I wanted to ask you whether you were sufficiently acquainted with the facts in the case to say that there is such controversy as the Constitution of the United States contemplated or not?

By Mr. DYMOND: To the question the counsel for the State of Louisiana specifically objects and excepts and protests, as being especially suggestive of the answer desired, and being put with the purpose of trying to correct an admission made by the governor of the State of Mississippi.

A. That is a question of law. What I said in answer to the question above was, that the facts on both sides of this question between the parties to the controversy justified it, I presume they thought so, or the suit would not be prosecuted.

Q. Counsel for Louisiana asked you whether you knew of any act of legislature of the State of Mississippi repudiating what Governor Longino had done in appointing this boundary commission. I will ask you whether you know of any act of legislature, a joint or concurrent resolution of that body ratifying what Governor Longino had done in this matter?

1940 A. I do not.

Q. Do you know of any act or resolution of the legislature of the State passed and adopted respecting this matter whatever?

A. I don't recollect one at this time. I don't think there was any such act or resolution passed by the legislature.

Mr. E. M. BARBER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Mr. Barber where do you reside?

A. In Biloxi, Mississippi.

Q. How long have you lived in Mississippi?

A. Since 1868.

Q. When were you born?

A. In 1858.

Q. So you have lived there all your life except the first ten years?

A. Yes sir.

Q. Have you ever held any office in the State of Mississippi and if so what?

A. I represented Claiborne county in the legislature in 1890. I was presidential elector on the Democratic ticket for the then ser-

enth district in Mississippi in 1900. I now represent the county of Harrison in the legislature of Mississippi.

Q. Where is your present place of residence?

A. Biloxi, Harrison county, Mississippi.

Q. How long have you lived there?

A. Nine years.

Q. I believe you have taken some interest in this suit between Louisiana and Mississippi since its institution Mr. Barber haven't you?

1941 A. I think a little.

Q. You have some information of the neutral line being adopted by the Oyster Commission of Mississippi and the Oyster Commission of Louisiana in September 1902?

A. I have no knowledge as to where that line is located, but I have some knowledge of there having been a line adopted by the joint commissions of Mississippi and Louisiana. The oyster commissions as I understand it.

Q. In September 1902?

A. I think it was in September 1902.

Q. Can you state what effect that had upon the people of your State interested in the oyster industry?

A. Well do you mean financially?

Q. Yes sir.

A. I think it had considerable effect upon the coast of Mississippi. The people living along the coast. As to their financial interests their sources of living etc.

Q. Do you know of any action taken by the people of Harrison county on that subject?

A. I remember that shortly after the boundary commission as it was termed, that was appointed by the governor of Mississippi, and that of Louisiana having failed to agree as to where the line between the two States was, that the oyster commissions of the States, assuming I suppose, that they had the authority to do what they afterwards did, agreed upon what has been considered as the neutral territory. As I have said before I don't know where that neutral ground is. I know nothing about that, but I think that that agreement was made by this oyster commission some time in September 1902. I know a few days afterwards that the feeling run so high along the coast of Mississippi as to what the oyster commissions had done that there was a mass meeting held in the Fireman's hall in the city of Biloxi to protest against this action on

1942 the part of the commissions, at which meeting there was a committee appointed to confer with the board of mayor and aldermen of the city of Biloxi and enlist their assistance, or their aid, in trying to get the governor to take a hand in the controversy and if possible to get a modification or entire repeal or disregard of that agreement made by the oyster commission. At that meeting I was appointed along with two other gentlemen, Mr. E. C. Joullian and Mr. J. D. McKie to go before the board of mayor and aldermen

at their meeting, the following night, I think a regular meeting, and present this matter to the board. Mr. Joullian and myself went before the board of mayor and aldermen. Mr. McKie had to leave the next morning I believe for New Orleans and Jackson and could not be with us that night. Mr. Joullian and myself went before the board and stated to them the object of our visit. The board then took the matter up and appointed a committee of three from the board to confer with this committee composed of Messrs. Joullian, McKie and myself to prepare a letter to the governor and lay the matter before him, and to do what these two committees thought ought to be done in the premises. We held a meeting I think the next day, and prepared a letter to the governor, and transmitted to him a copy of the resolutions passed by the mayor and board of aldermen, with such comments as we thought were proper to make thereon. That letter was very promptly replied to by Governor Longino, and there was then a meeting held shortly afterwards in the rooms of the Commercial club, and Governor Longino was there,
and was apparently doing what he could to bring about a
1943 better state of affairs than then existed, and after that I believe there was a meeting held in New Orleans, a joint meeting.

Q. You were present were you not?

A. Yes sir I was present at that meeting. Only one man I remember to have seen since was at that meeting, that is, I mean for Louisiana, and that was Mr. Dymond. I had the pleasure of meeting him again today. I remember him for his work that day. However I don't think there was any thing come of that meeting would assist Mississippi in righting what she conceived to be wrongs perpetrated on her.

Q. What State officers were here if any on that day?

A. Governor Longino was here, and Gen. McClurg. Gen. McClurg was then attorney general. I don't remember any of the other State officers of Mississippi.

Q. Any State officers of the State of Louisiana?

A. All I remember is Governor Heard. He was there.

Q. Do you remember whether the attorney general, General Guion was there?

A. I don't remember to have seen him. If he was there I did not locate him.

Q. I have here Mr. Barber, a document dated Biloxi, Mississippi November 5th, 1902. By his excellency A. H. Longino, governor of Mississippi, signed by E. M. Barber, E. C. Joullian, committee on the part of the citizens' meeting, T. J. Rossell, J. B. Charin, E. Glennon, committee on the part of the mayor and board of aldermen and also thereto attached copy from pages 130, 131, 132, Minute Book No. 5, of the mayor and board of aldermen of the city of Biloxi, certified to by A. G. Sweatman, clerk of the mayor and board of aldermen of the city of Biloxi on the 24th, day of August
1904, and which document is now in connection with your
1944 testimony produced for identification and offered in evidence as Mississippi Document No. —, copies of which will be

led to the counsel for Louisiana. I wish you would say if
resolutions have reference to the meeting of which you have
en?

They do. The letter, of which a copy you have just given the
sel for Louisiana, is the letter written by this committee, which
ve just mentioned as being appointed by the citizens' meeting,
the mayor and board of aldermen, to the governor of Missis-
, bearing upon this question of the boundary dispute. I think
s written on the fifth of November 1902. That is a copy of
etter press copy which is in my letter book. I have forgotten
umber of the page. I think it is No. 7 or 8, and page 450.

You mean of the letter addressed to Governor Longino?

Yes sir, and that the communication addressed by this com-
e appointed by the citizens' meeting to the mayor and board of
men of the city of Biloxi, and their resolutions authorizing and
inting a committee to confer with the citizens' committee and
ss a letter to the governor of Mississippi. I believe that is all
e documents there.

What have you to say Mr. Barber as to the effect that this
al line adopted by the oyster commissions of the two States
the citizens of Mississippi and especially those on this Gulf
?

Well I only know from hearsay of course. I am not an oyster
r either raw or canned.

I mean from the men affected by it. What is the effect on
?

I understand from the packers as well as the oyster dealers
that it has been very detrimental to their interests.

Q. How about the raw oyster dealers?

A. They have been badly hurt from what they have told
Numbers of times they have not gotten sufficient numbers of
s, and they all think that that territory from which Louisiana
riven them is territory belonging to the State of Mississippi
hey ought to be allowed to go on there.

You are an attorney, practicing I believe at Biloxi, Mr.
r?

Yes sir, and I for one think very strongly that they ought to
owed to go there. I think it very strongly, and I thought it
ongly in the meeting that was held over there, after this, what
ceived to be an arbitrary ruling by these two commissions. I
never been drawn to a soldier's life, but I was willing to go
there with them then and see the boys had their rights.

That is after they drew this line?

Yes sir, Governor Longino and cooler heads prevailed, but I
ht that they ought to go down there.

That is after the filing of the suit in this case?

Yes sir.

The suit was filed on October 27th, 1902?

Yes, sir.

Q. And your resolutions were in November?
A. Yes sir, it was immediately after that.
Q. Then do you know of any threat of violence, or threa
armed conflict between the officers of the parish of St. Bernard
the officers of Harrison county prior to the institution of this
A. No sir, I don't know of my own knowledge of any armed
flict at all.
1946 Q. Do you know of any serious trouble between the
States before this suit was filed?
A. No sir.

Gen. MONROE MCCLURG, a witness on behalf of the State of
sissippi, being duly sworn, testified as follows:

By Gen. WILLIAMS:

Q. Mr. McClurg, you were once attorney general of the St
Mississippi were you?
A. Yes sir.
Q. You were attorney general at the time the suit betwee
State of Louisiana and the State of Mississippi was instituted
not you?
A. Yes sir.
Q. You were attorney general of the State of Mississippi a
time there were some meetings held between the governor o
State of Mississippi and the governor of the State of Louisiana
the attorney generals of the two States, and the oyster commis
of the two States, relative to settling the controversy at the tim
isting between the State of Mississippi and of Louisiana?
A. Yes sir.
Q. Please state to the commission every thing you know rel
to that controversy?
A. To the best of my recollection the first time my attention
called to this while attorney general of the State of Mississippi—
time in October 1902. The process was mailed to Governor Lo
and myself by the clerk of the Supreme Court of the U
States, asking us to accept service which we did. That
1947 my first official act in the matter. The next action take
me as attorney general was to accept the invitation or req
of the governor of Mississippi to go with him to New Orleans
meet the governor of Louisiana, W. W. Heard, the attorney ge
Judge Walter Guion, and the Oyster Commission of Mississippi
the Oyster Commission of Louisiana, to deal in some way with
neutral zone line which had been previously agreed to by the o
commissions of the two States. We met those officials here
went into a discussion of the matter in an informal and general
Mr. Breaux who has testified in this case twice, presided. Gove
Longino insisted that the people of Mississippi were not sati
with the arrangements made by the oyster commission, and so

to have it materially modified, if not to have it abolished. I am not sure, I am rather inclined to think the object was to modify it. My own views then as the official representative of the State, as expressed by me in the meeting was that there was no controversy within the contemplation of the constitution between the two States, and that there was no authority for this neutral zone, and while it was expedient to have the line fixed, I felt precisely as the Boundary Commission of Louisiana felt, and expressed itself to the Boundary Commission of Mississippi, that it was a matter with which the legislatures of the two States should deal. The officers, governors, attorney generals of the two States were requested by some body to retire and leave it to the commissions to further discuss. My opinion is that later we did nothing. My opinion was, as long as I was attorney general, and since, was to the effect that the neutral line worked harmfully to the people of Mississippi interested in
1948 the oyster business, and especially so those interested in the raw oyster business because the lines agreed upon by the two commissions in September 1902 delivered over the marsh territory to Louisiana, and in that territory was found the best oysters for the raw trade. It must be that I had heard some thing of the meeting in January 1901, but I have no recollection of any official action taken by the attorney general until the service of the process upon him some time after the 27th, of October 1902.

Q. General McClurg when were you elected attorney general of the State of Mississippi?

A. I was elected in 1899, and inducted into office January 15th, 1900.

Q. How long had you been in office before you were informed about the controversy between the State of Mississippi and the State of Louisiana relative to the boundary line between the two States?

A. As I stated a moment ago, I must have had some information about the meeting held here in January 1901, but I have no distinct recollection of any action taken by me until November 1902.

Q. By you as what?

A. Attorney general of the State of Mississippi.

Q. You have been engaged with this case on the part of Mississippi since it was instituted on the part of Louisiana?

A. Up to the 4th of February 1903 I looked after it as an official duty, but after I had resigned the office of attorney general and went to Greenwood, some time, I don't remember how long after Governor Longino wrote to me in substance that the duties of the office of the attorney general were so great, and the interests of the State involved in this suit were of such magnitude as to require assistance for the attorney general, and because of my familiarity with it he de-
1949 sired to retain me to aid the attorney general in this suit with the understanding that I look to the legislature for compensation, and I accepted the employment.

Q. Since which time as I understand it you have been regarded as the leading counsel in the case?

A. Well I have followed the case more closely in taking the testimony than any other attorneys in it on our side.

Cross-examination.

By Col. ZACHARIE:

Q. General, you had resigned the office of attorney general before any sort of intimation of your connection in this case as assistant counsel with the attorney general had you not?

A. Why Judge, I would have resigned the attorney general's office a year before I did except for a little pride, and the fact that I would have necessitated under our laws an election to fill the office. I notified the governor and several of my intimate friends that when he got within the time that he could appoint I would quit the office and this case had no more reference to my quitting the office; this case had no reference at all to my quitting the attorney general's office, or any other business consideration outside of the desire to return to a better paying private practice.

Q. Well you say General that the first connection that you had with any of these matters here was an acceptance of the service of the bill of complaint of Louisiana?

A. That is my recollection.

Q. Then when you came to New Orleans with Governor Longino and you found that the Louisiana Oyster Commission was
1950 not willing to modify the pre-existing agreement, was not the concensus on both sides that that should remain as a sort of *modus-vivendi* temporarily, that is to prevent any trouble between the people of the two States?

A. I could not tell you. I don't feel so. I suppose it must have been between the two commissions, but I want to say in this connection that I as an official of the State of Mississippi, and as a citizen of that State, I have been absolutely opposed to that ever since I found out that that agreement had been made. I think it was not only without authority of law, but detrimental to our side of the question.

Q. Was not Governor Longino of the impression that it had better remain as a *modus vivendi* between the two States rather than to risk bringing on some sort of trouble. There was no further effort was there to declare the agreement null and void?

A. My recollection is that I made this suggestion in that meeting Mr. Dymond was there, and perhaps he will remember it as I do. That we have here the governor of Mississippi, and the attorney general of the State of Mississippi, and we have the Oyster Commission of Mississippi. We have here the governor of Louisiana and the attorney general of Louisiana and the Oyster Commission of Louisiana. Let these officials recommend to the legislature of the two States to take this matter up and provide for its adjustment. That it has got to be settled by commissioners after all, whether they are appointed by the Federal court or the United States Se-

se Court, or by the legislature. I thought it would be cheaper
more satisfactory, and I remember Governor Heard stating that
they were not willing to withdraw it from the court. To let
it go along, and so whether Governor Longino and the others
thought it was better to leave it alone, there was no other
rnative left them than to make the fight.
Q. Governor Longino sent in a message, did not he to the legis-
re of 1904 before he went out of office?
A. Yes sir, I introduced it in evidence here today.
Q. Does he mention in there anything about this oyster business?
A. Well the message speaks for itself, but my recollection is that
informed the legislature that at the request of the governor of
isiana he had appointed these boundary commissioners to take
e consideration the determination and the easy method of settling
e question, and recommended the legislature to take such action
t saw proper, but there was no action taken by the legislature of
2 at all.
Q. Did you furnish the Louisiana counsel with a copy of that
sage?
A. Yes sir.
Q. Will did he deliver a message in 1904?
A. Yes sir.
Q. Have you got a copy of this message?
A. Not with me, no sir. We can furnish you a copy and we will
glad to do so.

It is agreed between the counsel for the State of Louisiana and for
State of Mississippi that this session is now adjourned until
nday September 5th, at 11 a. m. at the office of the United States
trict court, at this place, at which time Commissioner William D.
llard will be requested to preside unless there be some agreement
to the contrary, at which time the testimony of Louisiana in
2 rebuttal will be resumed, and should anything in the mean-
time prevent the meeting on that date, another date shall be
ed by counsel for meeting, by agreement both counsel waiving
ten days in this record by previous agreement, at which time the
nsel for the State of Mississippi will be permitted to introduce in
idence any maps or any documentary evidence which may be at
t time in his possession.
The commission here adjourned until Sept. 5th, 1904.

STATE OF LOUISIANA } October Term, 1904. Original
vs. } Bill Number 11.
STATE OF MISSISSIPPI. }

I, Frank H. Mortimer, commissioner, appointed by the honorable
Supreme Court of the United States in the above entitled and
mbered proceeding, do hereby certify that, under agreement be-

tween counsel for the respective parties therein, of record testimony on behalf of the State of Mississippi was taken before me, at the city of New Orleans, State of Louisiana, on the 27th day of August, A. D. 1904, and that a transcript thereof is contained in the record of testimony for the State of Mississippi, in volume No. 5, beginning at page # 1297 and ending at page # 1387, both inclusive; said testimony being transmitted herewith;

I further certify that the several exhibits offered in connection with said testimony so taken before me, and enumerated and set out therein, each identified by my signature, are also transmitted herewith.

In witness whereof, I have signed these presents at the city of New Orleans, State of Louisiana, this ninth day of February, A. D. 1905.

FRANK H. MORTIMER,
Commissioner.

1954 In the Supreme Court of the United States.

THE STATE OF LOUISIANA
v.
THE STATE OF MISSISSIPPI. } Original Cause No. 11.

I, Frank M. Peyton, certify that in the above styled cause I was appointed and sworn as official stenographer on the part of the State of Mississippi; that the oral testimony on the part of said State was taken down by me in short hand before Hon. William D. Bullard, commissioner for said State, and Hon. Frank H. Mortimer, commissioner for the State of Louisiana, and by me extended in typewriting as shown by the accompanying volumes, to-wit:

Vol. 1 from page 1 to page 303 inclusive.
Vol. 2 from page 303 to page 610 inclusive.
Vol. 3 from page 610 to page 923 inclusive.
Vol. 4 from page 923 to page 1144 inclusive.
Vol. 5 from page 1144 to page 1387 inclusive.
Vol. 6 from page 1387 to page 1496 inclusive.

I certify that said six volumes, in triplicate, the original and one for each State, contains a true and correct report of all the testimony and of the proceedings had in said cause before said commissioners taken down by me and by me extended in typewriting as aforesaid, on the part of the State of Mississippi in said cause.

Witness my signature this November 1, 1904.

FRANK M. PEYTON,
Official Stenographer.

1957 JACKSON, MISSISSIPPI, September 22nd, 1904.

Pursuant to adjournment at New Orleans, September 16th, the commission met at Jackson Mississippi this 22nd day of September 1904, the notice being waived and this meeting being held by consent of counsel.

Present: Hon. William D. Bullard, commissioner for the State of Mississippi. William Williams, attorney general, and J. N. Flowers,

assistant attorney general, and Gen. Monroe McClurg, associate counsel for the State of Mississippi. Col. F. C. Zacharie and Mr. John Dymond Jr., associate counsel representing the State of Louisiana.

In accordance with the agreement of counsel entered into by counsel at New Orleans September 16th, 1904, the State of Louisiana now offers, produces and files in evidence the following documents.

Document No. 103 being a copy of act 65 of 1884 of the legislature of the State of Louisiana authorizing and empowering the attorney general to institute and prosecute suits on the part of said State, a copy of which said document is now tendered to counsel for the State of Mississippi.

And also Document No. 104 being a chronological compilation of the acts of Congress, constitutions, codes and laws and extracts therefrom concerning the State of Mississippi, and boundaries thereof and of certain counties forming the southern coast of said State, a copy of which is furnished counsel for the State of Mississippi.

1958 And also Document No. 105, being a chronological presentation of extracts of acts of Congress, the constitution of Louisiana, laws of the State and boundaries of St. Bernard and Plaquemines parishes in said State, a copy of which is to be furnished to the counsel for the State of Mississippi.

And also the official map of the State of Mississippi compiled by T. S. Hardee and published in 1869 to be known as map No. —.

A photographic copy thereof to be furnished to counsel for the State of Mississippi, if counsel for the State of Louisiana are able to photograph it.

By Gen. McCLURG: Counsel for the State of Mississippi now offer and introduce in evidence on the part of said State the following documents. Mississippi Document No. 81, being that part of the biennial message in pamphlet form of Gov. A. H. Longino to the legislature of the State of Mississippi Wednesday, January 6th, 1904, under the heading "State boundary controversy," being on pages 17 and 18 of said message. A copy of which is now handed to the counsel for the State of Louisiana.

Counsel for Mississippi now offers in evidence Mississippi Document No. 82, being that portion of the report of the U. S. Commission of Fish and Fisheries on the oyster beds of Louisiana by H. F. Moore, dated Washington, Government Printing Office 1899, from page 47 inclusive down to the heading "The natural oyster beds of Plaquemines parish on page 68, and to include the map made of the recognizance of the U. S. Fish Commission steamer Fish Hawk, Lieutenant Franklin Swift U. S. N. commander, February

1959 18th, 1898, a copy of which counsel for Louisiana waives.

Counsel for the State of Mississippi introduces in evidence Mississippi Document No. 83, being portions of the first annual report of the oyster commission of Louisiana, to the governor and General Assembly of that State from August 11th, 1902, to January 31st,

04, dated New Orleans, La. Made 1904, and being those portions said report from pages 5 to 18 inclusive of both, and from pages to 29 inclusive of both. And the communication of Mr. J. B. aylor from pages 73 to 81 inclusive of both, and "The oyster in ouisiana, by John Dymond Jr., attorney Oyster Commission of ouisiana," from pages 83 to 107 inclusive of both, a copy of which cument in all of its parts is waived by the State of Louisiana.

And counsel for the State of Mississippi introduces in evidence as ississippi Document No. 84, which is short and will here be read to the record, as follows:

"Chapter 20 of the Laws of the State of Mississippi of 1842."

An Act Giving Consent of This State to the United States to Purchase a Site on St. Josephs or Half Moon Island for the Purpose of Erecting a Light House Thereon."

"SECTION 1. Be it enacted by the legislature of the State of Mississippi, That the consent of this State be, and the same is hereby ven to the United States, to purchase a site on St. Josephs or Half oon island for the purpose of erecting a light house thereon. Approved February 17th, A. D. 1842."

60 Judge J. A. P. CAMPBELL, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as fol-ws:—

By Gen. MCCLURG:

Q. We have had in this case Judge a good deal of testimony of a cumentary nature, and one of the purposes for calling you on the nd is knowing that you are one of the oldest citizens in the State d perhaps one of its best informed as to her history, we want to k you what you may remember of Eugene W. Hilgard, who was one time State geologist, and who made a geological survey of e State, and also what recollection you may have of Professor L. arper, who made a geological report and map in 1857, and also at you may know of B. L. C. Wailes, who was State geologist, d made a survey, report and map and also what you may know Col. T. S Hardee, who was State engineer. Extracts from the orts of these officials and maps made by them have been introced, and will be introduced in evidence in this case, and we would e to hear from you what you may know of Wailes, Harper, and lgard and Hardee. Please give us such statements about the aracter, qualifications of these men as you may have in memory?

A. I have no recollection of Harper at all. I don't recollect him. an recollect nothing about Harper. I knew Hilgard. I knew him, and I knew of Wailes. I knew very little of Wailes. lgard was a professor in the university and was a man of learn-g. Reputed to be. He went to California, and I am not certain t what he is living in California now. I think he was in the

university in California afterwards, but I don't recollect Harper at all. I do recollect Hilgard and Wailes, but if I knew Harper or any thing of him it has slipped my memory entirely. I think
1961 Wailes and Hilgard were men of reputation; men of character and learning. I knew Hardee. Captain Hardee. I knew him in the army. He was a nephew of General Hardee I think, and he was on his staff I think. I used to see him in Jackson, and he made a map of the State. That is all that I knew about it. I recollect Hardee's map, but nothing more do I recollect about it whatever.

Q. Please examine this book which I now hand you entitled "A Preliminary Report of the Geology and Agriculture of the State of Mississippi by L. Harper L. L. D." ?

A. I have totally forgotten Harper if I ever knew anything about him at all.

Q. And see whether your memory will be refreshed by that book?

A. I don't remember any thing about it. I had been a member of the legislature prior to that, and was after that, but I was not a member of the legislature in 1857. I don't recollect any thing about Harper. I suppose at that time I knew something about him, but he has totally escaped my memory. I recollect nothing whatever about Harper or about his report. I was not a member of the legislature then.

Q. I want you to tell the commission Judge how old you are and what positions you have held in this State. How long have you lived here. A little short biography that the court may know who is talking to them?

A. I was born on the second of March 1830. Admitted to the bar on the 12th of June 1847, when I was seventeen years and two months old, or three months; elected to the legislature at the first election at which I *cloud* vote. I was subsequently elected to the legislature in 1859 when I was absent from home, and was speaker of the house of representatives during two years. Then I was elected one of the seven delegates to represent the Commonwealth of Mississippi to form a southern confederacy, and served in that until the expiration of the provisional government, and after that I was a soldier. I do not suppose you want me to give my military career.

1962 Q. Yes sir, we want it all.

A. Well I was a captain in the army. Lieutenant colonel and colonel, and then after the war I was elected circuit judge of the fifth judicial district and then I was re-elected circuit judge, and then I retired and went to the bar, and on the people of Mississippi coming to the possession of their own I was made supreme judge by Governor Stone and the senate, and at the expiration of my nine years' term I was again made judge by the appointment of Governor Lowry and the confirmation of the senate, and each time I might add without solicitation on my part at all. I did not seek the place either time. I served 18 years and then quit. Governor Stone

wanted to continue me, but I told him that I was tired and wanted to quit.

Q. You codified the laws of this State?

A. Yes sir, I was a code commissioner in 1870 and 1871, one of the commission, and then I was a single codifier by virtue of invitation of the legislature of 1878, and prepared the Code of 1880, and submitted it to the legislature of 1880. I was elected law professor of the university but declined it.

Q. In the answer which has been filed on the part of the State of Mississippi in this case we have referred to the codification of 1880 with reference to the boundaries of Hancock, Harrison, and Jackson counties?

A. Yes sir.

Q. Those sections that we refer to in this answer were prepared by you and adopted by the legislature of the State?

A. Yes sir.

Q. I wish you would please tell the commission Judge, in preparing that codification what you mean by the southern boundaries of these coast counties?

By Mr. DYMOND: To which counsel for the State of Louisi-
1963 ana objects and excepts on the ground that the code is itself the best evidence, and it is not proper to explain it by any verbal testimony.

A. I just followed the Code of 1857. The Code of 1857 was prepared by Sharkey, Ellett and William L. Harris, three very learned and distinguished men, who gave considerable attention to the subject and made considerable report to the legislature. It is set forth in full in the Code of 1857. I adopted that assuming it to be correct and followed it. I knew nothing in the world about the coast country at all. I never paid any attention to it. I supposed then, as I suppose now, that the southern boundary of Mississippi would be determined by the ascertainment of what is 18 miles from the shore. The act of Congress gives the boundaries of the State, and runs from the southeastern point westwardly. That is I suppose intended to vary from the line as the shore varies. I suppose that the southern boundary was 18 miles or six leagues from the Mississippi shore, and that is determinable I suppose as a matter of fact, but I followed in the codification of 1880 on that subject the Code of 1857.

Q. If you have read the act of Congress admitting the State of Louisiana you will notice that she is given three leagues from her coast?

A. Yes sir, I have noticed that.

Q. There is apparent conflict according to the contention of Louisiana between the three leagues of Louisiana to her eastward in Lake Borgne or Mississippi sound and the six league limit to Mississippi's south. What do you think of that proposition?

A. I can not say that I have any opinion on that subject at all.

I am not familiar enough with it to form an opinion that would be worth any thing or that would be satisfactory to me even. It is a subject to which I have never given any attention at all, as to the conflict between the two States.

1964 Q. It is insisted in our answer that Congress had in view a frontage for each State, and that it was not intended Louisiana should reach out in front of Mississippi's territory which was to her east after 1812 when she was admitted into the Union?

A. Well I would think the Supreme Court of the United States would not have the slightest regard to my opinion or any one else's in an investigation of that question. They would determine it from a consideration of the various acts of Congress, and reconcile the real or apparent conflicts between them. I really have no opinion on that subject, but if I had I should not think it would be of any value.

Q. I will ask you to please look at map No. 7. introduced on the part of Louisiana and notice the blue lines indicating the three league limit of Louisiana from different points, and the red line indicating the six league limit of Mississippi from her shore, showing the apparent conflict contended for by Louisiana, and tell us what you have to say about the solution of this question?

A. Nothing. I would not attempt to solve it.

Cross-examination.

By Mr. DYMOND:

Q. Judge Campbell, it has been pointed out to you according to map No. 7. by Mr. McClurg that if Louisiana was given all of the water territory and islands within nine miles of her coast by the act of Congress, and Mississippi was given all islands and water within 18 miles of her coast by the act of Congress, and that brought about an over-lapping of the two as is shown by map No. 7. which act of Congress would be given force and effect in your opinion in the event that there was no possibility of reconciling the two?

1965 A. I should suppose that the earlier act would be operative. It is a subject that Congress had the power to deal with, and I suppose that it could not take back after it made a gift or grant.

Q. Without the consent of the State to whom the land had been given?

A. Well of course. I am assuming that there was no consent about it. I suppose that a grant by Congress is like a grant by any one else. Irrevocable.

Q. You don't pretend to be familiar with the acts of Congress creating the two States in their relation to this disputed territory of it?

A. No sir.

By Col. ZACHARIE:

). You have been examined in regard to Prof. Hilgard. Was he a professor of geology, and had he any reputation as a geogra-r or cartographer?

. I don't know about that. I am not prepared to say. He was rofessor in the university and regarded as a man of learning and lity and good character, but as to his particular specialty and t he was expert in I don't know about that. It has been a long e since I knew him.

). Have you ever heard the correctness of Hardee's map called uestion at all until the inception of this litigation?

.. I don't remember to have heard anything about it good or . Favorable or unfavorable.

). You have stated that in preparing the Code of 1880 you fol-ed the Code of 1857. Do you know or not whether that Code of 7 was the first act of law of the State of Mississippi which claimed sdiction over the islands south of Hancock and Harrison nties?

.. I never examined that subject. I never went behind the Code 857. I accepted that as correct and followed it in the codifica-tion of 1880 without question.

6 Q. The Code of 1857 which I can read to you here was the first code that spoke of the islands south of Harrison and Han-k counties being within the jurisdiction of Mississippi. Now there another code adopted in 1871?

. Yes sir, I was one of the commissioners.

. That code mentioned—, I will read you what that code says: ancock county (established December 14th, 1812,) is bounded by beginning at that point on Pearl river where the line between nships two and three, south intersect said river; thence east on township lines, to the line between ranges 13 and 14 west; nce south on said range line, to the boundary of the State, on the f of Mexico; thence westwardly, on said boundary to the eastern ction of Pearl river with Lake Borgne; thence up Pearl river to beginning." So this mentions nothing about the islands, but s to the southern boundary of the State on the gulf of Mexico. t was the existing law at the time when you prepared the Code 880 was it not?

. Yes sir.

. And the Code of 1871?

. Yes sir.

. It does not mention anything about these islands. Now do remember this section of the acts adopting your Code of 1880, on 98. "The foregoing sections are intended to define the bound-s of counties as heretofore established by law; and if the bound-s, as defined in said sections, are not the same as heretofore es-ished by law, the former law on that subject shall not be held to epealed or affected thereby, but shall remain in force as to said ndaries, notwithstanding the passage of this act."

1967 A. I remember that section very well. I wrote it as a safeguard against possible error that might have been committed in description.

Q. Therefore the act of 1871 being in force prior to the Code of 1880, and the Code of 1871 not saying or mentioning anything about these islands, the Code of 1880 did not repeal the section or those sections of the Code of 1871 which was the then existing law?

A. I suppose not. That section was put in there simply to guard against possible errors in the details of boundaries and things of that sort.

Q. Then in preparing the Code of 1880 you skipped over the Code of 1871, and went back to the Code of 1857?

A. Yes sir, I took that as my guide and model.

Q. And the Code of 1880 differed from the Code of 1857 in fixing the boundaries of these two counties?

A. I don't remember about that.

Q. I just read to you the provisions of the Code of 1871 showing that that did not provide any jurisdiction over these islands?

A. That might not have mentioned these islands, but these islands might have been embraced in that distance. I don't remember about that. I don't suppose it would be necessary to mention the islands. They might cover it by space or distance. So many miles. 18 miles.

Q. Judge, which army of the Confederacy did you serve in?

A. In the western army.

Redirect examination.

By Mr. McCLURG:

Q. You have been questioned Judge about the saving clause that you put in the Code of 1880 respecting the detail of the bound-
1968 aries of all counties. According to the Code of 1880, and the Code of 1871, and the Code of 1857, and the act of Congress admitting Mississippi as a State into the Union, and saying that the southern boundary shall be the shore, including all islands within 18 miles. What was the lawful exercise of sovereignty and jurisdiction of the State of Mississippi in that 18 mile limit, or six league limit under either of these laws?

A. I don't know that I comprehend the full force of that question. The purpose of the provision was to guard against possible error in running the boundary lines of the counties. It was a matter of very great nicety and that was done to avoid error—giving the ranges and townships and sections and subdivisions of a section; it was a very difficult matter and that was done to avoid error, and the purpose of that was to guard against any possible error in the description of the counties in these details, and it was most unfortunate that the codifiers of 1882 did not embrace it, and Governor Stone expressed regret that they had not done so, because it was found that there were various errors in the details of the boundaries. Now that pro-

ision of mine in 1880 was simply intended to guard against possi-
le errors. There were matters that were very prolix of detail, and
iat was the whole purpose of it. Now as to what its effect was——
Q. That is what I wanted to ask you?
A. That is a legal question. I would like to have a concrete
ase; as to its legal effect—I can only state the purpose that I had.
Q. I mean to ask you this. Whether the different statements in
those laws had effect upon the jurisdiction of the State of
969 Mississippi over her six league limit in the waters of the
Gulf?
A. Unless there was some inconsistency between the latter law and
he former law which would operate as a repeal it would have no
ffect. Some times you know repeals take place without any actual
ntent on the part of the legislature, as a necessary effect of the lan-
uage employed. There was no purpose of that sort in the framer
f it, in the writer of it who was myself, but as to what the legal
ffect has been I would have to have a concrete case.
Q. Let's take the act of Congress admitting Mississippi into the
Inion. I will refer you to it as copied in the bill of complaint?
A. The purpose was to preserve the *status quo*.
Q. I understand the purpose, but here is what I want to know.
Whether any of these laws robbed the State of her jurisdiction six
eagues from her shore line in the Mississippi sound or the gulf of
Iexico?
A. I would not think so. I should not think it affected the sov-
reignty of the State where-ever it extended rightfully by law.
Q. In the act of Congress admitting Mississippi into the Union do
ou think she had sovereignty and jurisdiction six leagues from her
iore?
A. I should think so. My idea of the act of Congress as I under-
and it is just this. In using the term westerly it was intended to
ake all the variation from the due western line so as to meet the
tting of the shore, and give the State of Mississippi 18 miles from
hereever should be its shore in a general westerly direction. Tak-
ing all the variation from the true western line. I suppose
970 that is the reason that the word westerly was employed. That
is what I suppose, and then the question I learn is w-ether or
ot Louisiana had not on its eastern shore by virtue of the grant of
ongress a boundary that extended much further east than Missis-
ppi was willing to concede. That is the question as I under-
and it.
Apart from the conflict real or supposed between the acts of Con-
ress I should think there would not be the slightest difficulty in
ttling the matter. Ascertain where the shore line is at any point
nd reach 18 miles south, embracing everything within that I sup-
ose. That is what I would suppose to be the meaning of it, but
hen the question arises as to the prior act of Congress conferring
ghts on Louisiana, that raises a question to be settled by the court

as to which was prevailing. That produces difficulty I should suppose.

Recross-examination.

By Col. ZACHARIE:

Q. Counsel for the State of Mississippi seems to misunderstand the effect of the testimony that we are seeking to bring out. We are now on this point. Laying aside the question of the construction of the act admitting Louisiana in 1812, and the act admitting Mississippi in 1817, and as if the reconciling of whether one act shall prevail over the other or not. We are now on this principle that has been decided by the Supreme Court of the United States. Where there has been a continuous claim and control over territory, whether there would be a species of prescription attached to that which is claiming and exercising jurisdiction over it, no
1971 certain number of years. But in the Long Island case they decided as Connecticut had exercised jurisdiction for a number of years over Goose island. They thought that feature was of great importance in that case. Now we are seeking to prove by the changes in these codes that there was but one period during the whole existence of the State of Mississippi, or Territory of Mississippi in which she claimed any jurisdiction over these islands say from 1857 to 1871, and that in 1871 she abandoned that claim in following the Code of 1857 about these islands. And that when you prepared the Code of 1880, you stated that the boundaries as then existing in the Code of 1871 should still remain as they were. The point in question upon which our examination or cross examination is to show the relinquishment from 1871 up to 1884, because in 1880 you state that you did not then disturb the existing boundaries. Now in your opinion, and we are only asking opinions here would not that be considered as a relinquishment of Mississippi's claim to these islands when it was stricken out in the Code of 1871, which had appeared in 1857 so prominently as claiming for these particular counties?

A. I have no idea that there was any purpose to relinquish anything at all. Whatever might have been done was done ignorantly or stupidly or carelessly I suppose. I don't remember the exact provisions of the Code of 1857 on the subject.

Q. It mentions these two particular counties and says the islands lying south of the shore?

A. What does the Code of 1871 say?

Q. The Code of 1871 left out all about the islands, and went on defining the boundaries just as it existed up to 1857?

A. What was the necessity of mentioning the islands if they are embraced in the limits of the 18 miles?

1972 Q. The question is whether she continued her claim?

A. The acts speak for themselves. I suppose there was no intention of relinquishing any thing. Whatever was done on this

ject was done ignorantly or stupidly or carelessly or some thing that sort, but I suppose you have to make what you can out of phraseology of the text. I have no idea that there was any intion of relinquishing any thing. Of course you are entitled to im what you can from the phraseology of the text, the language the sections. The omission in the Code of 1871 to specify the ls might have been in the idea there was no necessity for it if y were embraced in the limits. It was not necessary to specify mention the islands as to the subject of jurisdiction.

By Mr. DYMOND:

. Might not it also have been due to the fact that the people n compiling the code knew that they were within the area; that se islands were within the area belonging to Louisiana?

. Well I was one of the commission and I did not know any ng about it I am sure. I do not think any of the others did.

. You were not one of the commissioners in 1871?

. Yes sir, I was. Yes sir, I was appointed by Alcorn while I at a distant point, arguing a case. Alcorn wanted to compose commission of one Democrat, one Whig and a carpet bagger. as the favorite among the Democrats, and Judge Johnston among Whigs.

By Gen. MCCLURG:

Q. You did not mention the other one?

A. Judge Lovering was the carpet bagger.

Q. He did not stay long?

. He was a Massachusetts man and he did not know any thing ut Mississippi and its boundaries. Neither Johnston or I knew thing about the boundaries down there I am sure. and whatever done in that respect was a mere inadvertence and not done with purpose to rob Louisiana or to relinquish any claim of Mississi. Of course the thing has to stand as it is written.

. You knew nothing about the character of this country down re?

. Oh no sir, nothing at all. Nothing at all.

he commission here took an adjournment until nine o'clock torrow morning, to meet in the attorney general's office in the cap- at Jackson Mississippi.

JACKSON, MISSISSIPPI, September 23rd, 1904.

ursuant to the adjournment of yesterday afternoon the commis- met this morning in the attorney general's office at Jackson issippi.

here were present Hon. William D. Bullard, commissioner on part of the State of Mississippi. William Williams attorney eral, and J. N. Flowers assistant attorney general, and Hon.

Monroe McClurg, counsel on the part of the State of Mississippi Hon. F. C. Zacharie, and Hon. John Dymond, Jr. associate counsel on the part of the State of Louisiana.

Col. CHARLES C. HOOKER, being recalled on the part of the State of Mississippi, testified as follows:—

By Gen. McCLURG:

Q. In this suit Colonel, extracts from the reports made by State geologists B. L. C. Wailes, printed in 1854, and by L. Harper, printed in 1857, and by Eugene Hilgard about the year 1855, and maps taken from those reports will also be introduced in evidence. I want you to tell the commission what you may know of the competency of these distinguished gentlemen and what their reputation was with reference to their professions?

A. I knew Mr. Wailes very well. He was one of the earliest of our officials in the capacity of geologist. A very able man and very capable. Quite so. A man of high character both professionally and personally. I knew Mr. Harper not so well. It so happened that I did not come in contact much with him, but I think his reputation was good in this capacity as geologist. But Professor Hilgard I was intimately acquainted with. He was always my guest at my house when he came here, and I was his guest at Oxford when I went there. I remember spending a week with him once at one of the commencements. He was a man of the highest character both personally and professionally. His report was a very able one. About the maps I could not say, but anything that either of these gentlemen would append to their reports in the way of a map verifying the report I would say was entitled to entire credit anywhere and everywhere.

1975

Cross-examination.

By Col. ZACHARIE:

Q. Professor Hilgard was a professor in the University of Mississippi was not he?

A. Yes sir, he was.

Q. His peculiar profession was geologist was it not?

A. He was a geological professor when I was there and spent a week in company with my wife. He had just married a very accomplished Spanish lady, and we had some delightful music, and Hilgard was regarded as a scientific man upon any topic that he took any interest in.

Q. Did he ever make any special profession of geography or as a cartographer, or was not it confined to the science of geology?

A. Well I would say Col. Zacharie, that he was a man of very universal information, and I would say further that if there was a man in the State that understood geography of the State of Mississippi it was Hilgard.

1976

Q. How was it with Mr. Wailes?
A. I think that Mr. Wailes was also capable in that regard, though do not know him as well as I did Hilgard.
Q. And Mr. Harper?
A. I can not speak about Mr. Harper so well.
Q. Is it not a fact that as far as these books are concerned. Is it ot a fact for instance that this report of Harper was simply one nade as State geologist of Mississippi. I see the title in preliminary report on geology and agriculture of the State of Mississippi y L. Harper L. L. D., correspondent to the Imperial Museum for he Natural Science, France, etc., State geologist of Mississippi. light not it appear from that work this was simply a report of he geology of the State and agriculture?
A. I would take it so yes sir.
Q. Mr. Harper was not a lawyer was he?
A. I am not aware whether he was or not.
Q. There is nothing in this report which would show that he rer entered into any scientific investigation of the boundaries of he State?
A. I am not aware except that he would not have been appointed o the State geologist's position unless he was a man that had a very ood knowledge of the State of Mississippi, both as to its geology nd as to its geography.
Q. Well now with regard to the report of Mr. Wailes. This reort is a report of the agriculture and geology of Mississippi, embracing a sketch of the social and natural history of the State, by . L. C. Wailes, geologist of Mississippi. Would that report cover ny thing else than the geology and agriculture of the State?
A. I take it not. The report itself covers those grounds 977 as stated in the preface to it.
Q. Then in so far as the question, the legal question in gard to the boundaries of the State, would you consider either one f these gentlemen as an authority on the subject?
A. I would think they would be sir.
Q. You think they would be?
A. Yes sir.

By Mr. DYMOND:

Q. Colonel, do you remember who was the first geologist of these hree gentlemen?
A. I think Mr. Wailes sir. That is my remembrance.
Q. Do you remember when his report was published?
A. I do not sir.
Q. It would appear that Mr. Wailes has attached to his report no nap of Mississippi showing its geology, and no map at all other han the map of the country comprised in the State of Mississippi known in the years 1704 by Eman Bowem, geographer. The State f Mississippi was not a State in 1704 was it?
A. No sir, it was not admitted until 1817.

Q. Now I direct your attention Colonel, to the map entitled Geological Chart of Mississippi of L. Harper, State geologist attached to his report dated 1857, and also to the map entitled Geological Map of Mississippi, by Eugene W. Hilgard, State geologist, entered according to the act of Congress by J. H. Colton & Co. in the clerk's office of the district — of the United States for the southern district of New York in the year 1855, and I direct your attention to the territory lying west of the eastern mouth or branch of Pearl river which on the map of Harper is distinct in the same color as the
1978 territory of Louisiana lying to the westward And on the map of Hilgard as distinct by the same color as the State of Mississippi lying to the eastward, and I ask you which of these two maps correctly delineat-s by color of that territory?

A. Well I don't know. I don't know that I could tell you who is entitled to it.

Q. Do you know what branch of Pearl river it is that determines the boundary between the States of Louisiana and Mississippi?

A. I would say that it is the main branch.

Q. Do you know what the law says?

A. No sir, I don't know.

Q. Could you tell which is the most eastern branch of Pearl river?

A. Do you mean the mouth?

Q. Yes sir?

A. Well this is it right here (witness shows).

Q. That is to the right hand?

A. Yes sir, to the right hand.

Q. Immediately close to the yellow color?

A. Yes sir, right here.

Q. You are now looking at the map of Mr. Harper?

A. Yes sir.

Q. Well now please look at the other map of Mr. Hilgard and state whether that same territory is given to Louisiana on the Hilgard map as it is on the Harper map by color?

A. Yes sir.

Q. Does not the Hilgard map give that territory to Mississippi. That is the territory that is lying east of Pearl river and south of that branch that goes into the Rigolets?

A. You mean that color?

Q. Yes sir?

A. I would say yes sir, I think it does.

1979 Q. The Hilgard map gives it to Mississippi and the Harper map gives it to Louisiana so far as the color is concerned?

A. Yes sir. I think that Hilgard was a man very superior on scientific subjects to either Harper or Wailes?

Q. And if we could show by the organic law creating the States of Mississippi and Louisiana, that is the acts of the United States Congress, that the eastern branch of Pearl river was the boundary

between the States would it then affect your opinion of Mr. Hilgard when it was shown that he had made a mistake?

A. Well I would doubt very much whether Hilgard could make a mistake.

Q. Even though it appeared to your eyes right there?

A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. Counsel for the State of Louisiana have attempted to have you say because of this coloring that Hilgard has given to Mississippi a part of the land that belongs to Louisiana. I call your attention to the reference on this map which will show that Hilgard intended this coloring to represent the geological formation along the Gulf coast?

A. Yes sir.

Q. And not to mark the boundaries of the State?

A. Yes sir.

Q. You will notice that coloring which shows that that line was colored whether in that point of Louisiana or Mississippi as eliocene?

A. That is the color mark.

Q. That is the geological color and not the boundary color?

1980 A. Yes sir.

Recross-examination.

By Mr. DYMOND:

Q. Do you not find the same index of colors on the Harper map at its left hand corner?

A. Yes sir.

Q. A similar index?

A. Yes sir. Now gentlemen, I wish to make a statement of my own motion if you will allow me. I don't know that I can refer to any thing to enlighten you gentlemen in your investigation and to reach a correct conclusion about this matter as to the true boundary between the State of Louisiana and the State of Mississippi, under the respective acts of Congress of 1812 and 1817, and which admitted Louisiana and Mississippi, except to say to you that the first speeches made in the Congress of the United States on the subject of the surveys of the coast, the coast surveys, as it is generally termed; the first speeches that were made of note on the Coast and Geodetic Surveys in the Congress of the United States were made by Jefferson Davis of Mississippi; that was while he was a member of the House and a member of the Senate, and before he became so distinguished in the subsequent history of the country. He had made a great reputation as a scientific man and was no doubt the father, in

my judgment of the establishment of the Coast Survey of the United States, throughout its whole limits from New England to Galveston, and even down to the last portion of the United States. I say that because I am aware of the fact that he has made these speeches. They are now quoted whenever speeches are made on this subject by virtue of their being the true origin of our Coast Survey system, and I think the commission will find from the reports in Miles' register the reports of Congress, in reading these speeches much information on the subject of the true boundary. As I said, when I had the honor to be summoned before the commission in Louisiana, as I said in the remarks that I submitted in New Orleans, that is a question that must depend largely upon the terms of the act in admitting Louisiana in 1812, and the act admitting Mississippi in 1817. It must depend largely upon that. I said in the remarks that I made in New Orleans that I had been of the impression that the line between the two States, the eastern boundary to the end of the main land should project into the ocean and constitute the boundary between the two States on the water. I want to correct that statement to this extent and say, that when the boundary between the two States reaches the terminus of the main land between the States and enters upon the waters of the gulf of Mexico, or Mississippi sound, it must be governed largely by the maps which have been made by scientific engineers who made the Coast and Geodetic Surveys of Louisiana and Mississippi. I say this in explanation of the remarks that I made there.

1981

I remember that Mr. Jefferson Davis resigned his position in the House of Representatives and accepted a position as colonel of the First Mississippi Rifles in the Mexican war. That would put it in 1846 because the Mexican war began in 1846. Subsequent to that time when Mr. Davis came back he was elected to the Senate, and these speeches were made during his incumbency as Representative of Mississippi. There were two representatives at large, Mr. Davis being the one from the South. He being the delegate from the South.

Q. You use the word delegate?

A. I mean Representative. Because the representation in Congress was then two men, Davis being one of them. These speeches on the Coast Survey question were made while he was in the House and possibly continued while he was in the Senate after he returned from Mexico.

1982

Governor A. H. LONGINO, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows to-wit:—

By Gen. MCCLURG:

Q. You are a native of Mississippi and reside in the city of Jackson?

A. Yes sir.

Q. I wish you would please tell the commission your age, and

our profession is and what position you have held in the
Mississippi?
am fifty years old. I am a lawyer by profession and was the
ernor of the State, holding that position from January 1900
ary 1904.
ou have held other positions have you not?
ou mean official positions.
es?
es sir.
lease state what they were?
the outset of my young manhood I was the clerk of the
in Lawrence county, where I — then living. I was elected
at office to the State senate. Afterwards became United
district attorney by the appointment of President Cleveland,
ently chancellor of the Delta district, first by appointment
rnor McLauren, and resigned the chancellorship in the early
1889, and was that year elected governor of the State for the
ginning in January 1900. Since that time I have held no
ficial place.
his suit, you know Governor, is a suit by the State of Lou-
siana against the State of Mississippi respecting the bounda-
ies in the waters of the Gulf, and as much of the matter
nder investigation transpired during your administration
rnor of the State, for the purpose of refreshing your memory
me dates and transactions respecting it, that you may get the
d trend of the present inquiry I will make a cursory review
pertinent facts about which I propose to question you, and
e substantially as follows:—
nuary 1901, it appears there was a kind of mass meeting in
of New Orleans over which Governor Heard of that State
l, and among other actions of that meeting was a request
e governor of Louisiana appoint five gentlemen, and that he
the governor of Mississippi to appoint a like number to ar-
ne easy location of the water boundary between these States.
t Governor Heard acting upon that resolution appointed
d requested you to do likewise, and I have no doubt that
initely remember that you appointed these gentlemen some
February 1901, and on the 26th of March 1901 the ten gen-
met in the city of New Orleans, and entered upon a consid-
of the matters entrusted to them and failed to come to an
ent. It appears that our friends in Louisiana were prepared
ed with their briefs and maps, while the Mississippians had
en the matter so much attention, and asked time for further
ration. About the 20th of July 1901, the Mississippians ap-
by you addressed a letter to the chairman of the joint meet-
March 26th, stating that they could not agree to the lines
by the five gentlemen from Louisiana and suggested a
riendly lawsuit in the Supreme Court of the United States,
nd about that date those gentlemen whom you appointed
nade a similar report to you. So far as the written history

of the transaction shows nothing more was done until the mee
of the legislature on the 1st Monday of January 1902, to which l
lature in your message you reported the transaction that I
mentioned and recommended such action as the legislature m
deem proper to take, and it appears that that legislature too
action in the matter at all.

The next fact is that on the 27th of October 1902 the State
Louisiana files her bill of complaint in this case in the Supre
Court of the United States and as you will remember Mr. McK
ney, clerk of the court, forwarded the process directly to you
the attorney general, requesting that we acknowledge service
return it, as that was the custom in cases of such dignity, and
cess was accordingly acknowledged and process thereof waived.

There was another transaction in the mean time to which
opinion is that you were not a party, and about which I want
ask you during this inquiry, and that is about the 27th, Septem
1892, which is a month before the complaint was filed, it seems t
the Oyster Commission of Mississippi met the Oyster Commiss
of Louisiana and entered into an agreement that a neutral
should be drawn to govern the fishermen during what must h
been then the contemplated litigation between the two States
specting the boundaries.

That line was drawn by the two commissions out of the mo
of Pearl river, following what is known on the Coast and Geode
Survey maps as the deep water sailing line between St. Josep
island, Grand island, as it was formerly known, lat-erly called H

Moon island, thence eastward and southward between Cat isla
1985 and the northeastern point of Isle à Pitre out into the G
proper. North and east of the deep water sailing line
agreed to be exclusively Mississippi territory. From the mouth
Pearl river directly to the northern point of Malheureux point
lowing the coast line of the marshes to Grand pass and then turni
southward from the western boundary of Grand pass to Sun Do
island, thence northeasterly to the deep water sailing channel abo
mentioned, constituted according to that agreement the neutral zon
which both States were to have equal and unrestricted privileges.
south of these lines it was agree- to be exclusively Louisiana territo
and as to this agreement as I will mention further along it appea
and I have no doubt that you well remember, the fishermen of M
sissippi, and those engaged in the raw oyster trade especially, w
very much dissatisfied because they claimed that the best oysters
their trade came from that territory which the Mississippi comm
sion had ceded to Louisiana.

The last record to which I call your attention, and to which y
are a party, had reference to the acknowledgment of process, so
where we will say about the 1st, of November 1902. The transa
tions about which I have just called your attention transpired
September before. The next matter was about the 5th of Nove
ber 1902, a mass meeting of some kind was held in the city

Biloxi, and strong resolutions adopted condemning the agreement made by the oyster commission above referred to, and my recollection is that you were invited to come to Biloxi, and that you did so when another meeting was held, and pursuant to resolutions passed there at the time of your visit, you requested the
1986 governor of Louisiana to name a day, when he and his attorney general and the oyster commission of that State could meet you and your attorney general and the oyster commission of your State in New Orleans to take some action with reference to this line, which the oyster commissions of the two States had agreed to, and that about the 17th, of November 1902, you and the attorney general of Mississippi and the Oyster Commission of Mississippi met Governor Heard and the attorney general of Louisiana and the Oyster Commission of Louisiana in New Orleans. That you insisted on a modification or an abolishing entirely of this agreement which had been entered into and as I remember wholly without effect. Thereupon under your direction the attorney general of Mississippi proceeded with the defense of your State against the bill filed by the State of Louisiana seeking to establish this deep water sailing line which I have mentioned as the true boundary between the two States, and by answer and cross bill finally setting up on the part of the State of Mississippi that the true boundary between the two States was as stated in our answer and cross bill; a line running due south out of the mouth of Pearl river to the main land of Louisiana, on the southeastern shore of Lake Borgne, and thence following said main land eastward and southward and southwestward to a point six leagues or 18 miles from the Mississippi shore; thence to run eastward parallel with the meanderings of the shore line to the Alabama line. Upon these pleadings all issues have been joined and we have been some time taking testimony in this case.

I wish you would state to the commissioner Governor what connection if any you had with the agreement which I have
1987 mentioned and that was entered into between the oyster commissions of the two States respecting this temporary line made in anticipation of the suit, and which the two States were expected to recognize until the final decree had been rendered by the Supreme Court of the United States in this matter?

A. I suppose I could answer that statement of the case as presented by you affirmatively throughout, though much of it is of record and contained in reports. There are many details and particulars of which I would not now undertake to state from memory to be just as has been stated by you, though I assume that in as much as they are of record that you have properly stated them. I had nothing whatever to do with the agreement entered into between the oyster commissions of the two States in agreeing upon the boundary which is termed the neutral territory, and knew nothing of it until after such agreement had been entered into. After this reputed agreement as to the neutral territory complaints came to me as governor from interested citizens of Mississippi living on the

Gulf that the agreement as entered into was interfering and working a great injustice to those engaged in the oyster enterprise in Mississippi and I was called on to do something to change the then status as agreed upon by the commission. My recollection is that I was furnished with copies of resolutions passed by certain parties at a meeting held in Biloxi wherein vigorous protest was made against the authorities of the State of Louisiana who were seeking to restrain parties in Mississippi from taking oysters in the disputed territory. In my desire to bring about any amicable and just arrangement that would secure to the citizens of Mississippi use of the territory in question, and at the same time
1988 be amicable and fair to both sides, I appointed a time when I would go to Biloxi in person, and desired a conference with representative parties there on the subject. I accordingly went to Biloxi, conferred with numerous representative citizens' of that city including the members *if* the city council. A citizens' meeting was called and largely attended at which maps were exhibited and a general discussion of the disputed territory was entered into. There was insistence on the part of some, that as the chief executive of the State of Mississippi that I should defend the territory *vi et armis* if need be so as to give to the interested parties their fishing rights in the disputed territory. I explained to them personally the full situation as I understood it. That it was a legal question about which there was an honest difference of opinion between the people and authorities of the respective States, and which presented a controversy which could only be settled in the courts of the country where both had a right to go, and that such a proposition as getting up a hostile or a military controversy between the friendly States was not for one moment to be considered. That a suit had been filed in pursuance of the recommendation of the committees appointed by the governors of the respective States, which suit would be carried to as speedy a determination as possible in the Supreme Court of the United States, and until such determination could be had, nothing could be done except through operation of the laws of the respective States and by means of friendly agreements between the officials of the two States whereby possibly all action might be stayed and all the territory left as neutral until the case could be settled by the Supreme Court of the United
1989 States. Looking to that end I promised those at that meeting to take the subject up with Governor Heard, and see if we could not agree to some amicable arrangement and have the two oyster commissions, the respective oyster commissions of the States concur therein, so as to have no further friction at all until the case was duly disposed of by the United States Supreme Court. In furtherance of that promise I took the subject up with Governor Heard, and as a result such meeting was held in the city of New Orleans between the governor and Oyster Commission of Louisiana and the same officials of Mississippi, and at which the two law officers of the States, to wit; the attorney generals, the respective attorney generals

present. At that meeting I proposed for Mississippi with the urrence of the oyster commission and the attorney general of State to abrogate all of the agreements made by the oyster com- ions theretofore, defining the neutral territory, and to allow States the free use of the territory until the decision of the case pending, which proposition was declined by the Louisiana ials. I want to say in this connection that as a result of the con- nce which I had with the citizens of Biloxi at the time above ed the plan proposed seemed to be entirely satisfactory, and lutions were adopted by that meeting fully endorsing the plan osed by me, and the part which I had taken to protect the Mis- ppi oyster interests in this controversy. When this meeting— last named meeting between the governors and officials of the States failed to materialize in the results which I had hoped to mplish, the bill filed by the State of Louisiana was duly an- swered and the case is now brought to an issue.

Q. I have in my hand Governor Longino, a document fur- nished me on the 5th, of September 1904 while taking the mony of Mr. E. M. Barber in the city of New Orleans, and I k it has been made a part of the record already, but lest I should istaken about it I desire you to look at it and file it now as ument No. 85. It is dated Biloxi, Mississippi November 5th, 2, and purports to be a letter addressed to you as governor and ed by E. M. Barber, E. C. Joullian, committee on the part of the ens' meeting and T. J. Rossell, J. B. Chinn and E. Glennan, mittee on the part of the mayor and board of aldermen, and ac- panying this copy which I have just mentioned is a document ch purports to be a copy from pages 130 to 131, Minute Book 5 of the mayor and board of aldermen of the city of Biloxi, and esume represents the resolutions of the meeting which called to Biloxi. Please examine it and let it be filed now, or again has been already filed as a part of the record in this case.

he resolutions and the letter referred to above are here offered iatroduced in evidence by counsel for the State of Mississippi, marked Mississippi Document No. 85.

. At your request let it be filed as such exhibit. And I may say his connection that it was in response to said communications that ent to Biloxi at the time above mentioned and had the conversa- tions, and took action with reference to calling the Louisiana l and Mississippi officials together as enumerated. At said Biloxi meeting it was insisted as I have above stated that e thing should be done to protect the rights of Mississippians to e oysters from the disputed territory, and it was insisted that the itory in dispute belonged to Mississippi and that Louisiana was passing there on. They were advised by me that if the Louisi- ns were violating the law as was insisted that the courts of the ntry were open and that the people there should take such legal s as necessary to prevent trespassing by the Louisiana people,

and that if the Louisiana officials were exceeding the law in forbidding our people, or Mississippians, from using the disputed territory, that matter could only be prevented by appealing to the courts of the country, and that the governor of the State was powerless to do more than to suggest to them the employment of the rights which the law gave them and to interpose his friendly offices with the authorities of Louisiana to bring about an agreement by which all the territory should become neutral and remain so until the rights of the respective sides should be fully determined by the Supreme Court of the United States.

Q. In the brief review that I made Governor to refresh your memory as to the history of this matter I made mention of an advisory commission appointed by yourself and Governor Heard upon the request of the mass meeting held in New Orleans in January 1901, to take into consideration the easy determination and location of the boundary between these States. I wish you would state to the commission whether in the appointment of the commission on the part of this State you had any idea that these commis-
1992 sioners had any power or authority to fix and settle a binding boundary between the two States?

A. I knew that such committees had no such authority as indicated by you. They were simply appointed by me upon the request of Governor Heard and their duties were to meet with a like committee of Louisiana and if possible agree upon a correct boundary between the two States; collecting such proof as was necessary, and applying that proof to the law governing the boundary question, and after agreement to so mark the boundary by buoys and other means so that the citizens of the respective States might know their limits. At that time I did not know or comprehend the extent and difficulty of the controversy, but presumed that the facts might be obtained as above stated by this committee of intelligent citizens of the two States who might agree upon it with such certainty as that the two States would ratify their position, and the boundary as established by them might thereafter by proper legislation if need be become an established one between the States.

In selecting a committee I took men whom I believed to be disinterested, men of probity, and fairness and of ability whose decision would carry weight and give confidence to all concerned in the proceedings. Said commissioners were E. J. Bowers and J. H. Kellar of Bay St. Louis. W. A. White and Harry Howard of Biloxi, and J. I. Ford of Scranton, all living on the gulf of Mexico, three of whom are lawyers. After the meeting held in New Orleans with the governor and oyster commission and attorney general, with similar officials from this State, when it was apparent that nothing could be done other than to allow the suit to come to a final determination, that the interests of the State of Mississippi might be properly represented in the suit, upon the advice of
1993 the attorney general, I employed additional counsel to assist him, offering the employment first to W. A. White

and J. I. Ford, who declined it. It was then offered to Bowers and McDonald, who also declined it, and I finally employed a firm at Biloxi, to wit: Messrs. Dodds and Griffith, and when the Hon. Monroe McClurg, then attorney general, resigned such office in Mississippi, owing to his great familiarity with the case and his known ability as a lawyer I retained him also as special counsel to assist in said cause.

Q. The commissioners, or the committee men, which you appointed to undertake the settlement of this matter with the like commissioners or committee men from Louisiana, made a report to you which has already been incorporated in this record?

A. Said committee made written report wherein it was stated that no agreement could be reached, and a friendly suit to determine the matter was recommended by it. Said report was by me transmitted to the legislature of Mississippi at its sitting in 1902, with the request that such action as the wisdom of the legislature approved be taken, and as stated by the counsel for the defense, said body took no action.

Q. I will ask you to state to the commissioner Governor whether prior to the meeting held in New Orleans in January 1901, supposing you had some information of that meeting, you had any information of any kind of any controversy between the people of Louisiana and the people of Mississippi respecting the boundaries between the two States in the waters of the Gulf?

A. I could not state positively as to that, but presume that I had heard rumors of such disagreement. I refer of course to the meeting composed exclusively of Louisiana people.

1904 Q. It is alleged in the bill of complaint in this case that the condition of affairs with reference to the location of the boundary at the time of the filing of the bill had reached a crisis in that there was a threatened armed conflict between the sheriff and other officers of the parish of St. Bernard Louisiana and the sheriff and other officers of the county of Harrison in the State of Mississippi. If you had any information sustaining that charge previous to the filing of this bill on the 27th of October 1902 I would be glad to have you to state to the commission what it was?

A. I had no such information.

Cross-examination.

By Mr. DYMOND:

Q. You were governor in January 1901 when you received from Governor W. W. Heard of Louisiana his letter requesting the appointment by you of this commission, or committee on boundary were you not?

A. Yes sir.

Q. At that time as the governor of the State of Mississippi did you not consider you had the authority to appoint such a commis-

sion in order to gather such evidence, data, and information as you in your position as chief executive of the State of Mississippi thought it would be well to gather on that particular subject?

A. I knew that there was no such commission authorized by law, but as above stated I acted in the matter simply in the effort to bring about an amicable agreement, which the officials and citizens of the two States would accept and which might be ratified by law thereafter if necessary.

1995 Q. Suppose it had been on any other subject Governor, would you not have had the power as the chief executive of this State to have gathered the information necessary through the appointment of a commission, on any subject that would come up of moment to the welfare of the State?

A. I will say that while there was no law that I know of on the subject, I take it that it would be an unwritten law that the chief executive of the State would have authority to gather testimony and to do it in such manner as would most expedite the work, and would give the most confidence in the results, and which might bring about the best results.

Q. Would not it have been necessary for such a committee to have filed data in order that the legislatures of the respective States to have been able subsequently to take intelligent action on such recommendation as that committee might unanimously agree to make in the event it was able to reach an unanimous conclusion?

A. If the legislature accepted the work of the commission as the proper solution of the situation doubtless that body would have required the presentation of the facts which proved the expediency and the justness of their finding.

Q. That would presumably include such a report as the committee would make, in the event that they reached an amicable agreement?

A. Presumably, yes sir.

Q. Would not then such action by the legislature of necessity have to be approved by the act of Congress before any agreement between the two States as to the boundaries would have become effective?

By Mr. McCLURG: I presume that you have reference to
1996 the law which requires that the legislature of both States with the act of Congress, before any part of one State can be eliminated or added to the other.

By Mr. DYMOND: No sir, I refer to that provision of the Constitution which says that no agreement between two States shall be effective until it has the consent of Congress.

A. I did not consider at the time that legislation by either State would be absolutely necessary. On the contrary I had the idea that the facts might be gleaned by this committee by which the boundaries between the States could be marked, and buoyed by them as fixed by the acts of Congress already. The acts of Congress fix the

boundary between the two States, and I suppose that these boundaries simply needed to be marked and the law properly understood by this commission and the facts applied to the law which fixes the boundary, and that this commission might thus buoy the boundary; then if the legislatures of the two States were prepared to accept that as the boundary as fixed by the Congress so as to eliminate controversies between the citizens of the respective States it might do so.

Q. That answer Governor is not responsive to the questions as asked. I will ask the stenographer to read over the question to you so that you may understand it? "Would not then such action of the legislature of necessity have to be approved by the act of Congress before any agreement between the two States as to the boundaries would have become effective?"

A. I understand that before the two States could by any agreement or legislation of said States change the boundary fixed by the Federal law, that the Federal Congress would have to assent thereto, but where the boundary has already been defined by the Federal law I did not understand that the Federal Congress would have to give its assent to the States to mark or buoy the boundary. And in my report to the legislature on the subject I stated as follows: "On February 9th, 1901, I appointed the following named gentlemen as commissioners to confer with a like committee appointed by the governor of Louisiana to consider the water boundary line between the two States, and to arrange for the easy location and identification of the same by a proper buoy system. My idea was that the commission would simply search out the mark of the real boundary between the States as fixed by the acts of Congress.

Q. Now in the appointment of that committee as I understand it you endeavored to get men who were more or less familiar with the locality in question?

A. Yes sir, that was one of the objects.

Q. Did you have any conference with these gentlemen or get any reports from them prior to the final report which was signed by all the committee on the part of the State of Mississippi?

A. As a committee I did not. It is not improbable that I had conversations with some individual members thereof, and about which I do not now recollect.

Q. Do you know a gentlemen by the name of I. Heidenheim?

A. Yes sir, I do.

Q. Do you know a gentleman by the name of F. A. McLean, a member of Congress from the State of Mississippi?

A. I do.

Q. Do you know what became of a report which was made by C. S. Hodgkins, assistant of the United States Coast and Geodetic Survey, made at the request of Mr. Heidenheim through Mr. McLean, a member of Congress from Mississippi?

A. I do not.

1908 Q. Do you know whether that report ever came to the knowledge of this amicable boundary committee appointed by you prior to their making of their report in the month of July, 1901, or to the knowledge of any individual members of it?

A. I do not now remember that I ever heard of such a report prior to this time.

Q. Are you aware of the contents of that report?

A. I am not.

Q. Do you remember, or are you prepared to state what the attitude of the various members of this Mississippi Boundary Committee was on this proposition individually?

By Mr. McCLURG: The question is objected to on the part of the State of Mississippi as irrelevant, and because it is immaterial to the issue joined in this case as to what the individual opinion of these committeemen or commissioners might have been as to the location of the boundary.

A. I have no recollection now of ever having heard any member of the commission express his individual views with reference to the rights of either State in the controversy.

Q. Were you aware that the committee appointed by Governor Heard on this boundary matter had submitted to the Mississippi commission a map composed of the United States Coast and Geodetic Survey charts on which they had delineated Louisiana's claim which map is known in this record as Exhibit E, and is now hanging on the wall there in front of you?

A. I never had any information at all as to what the facts were before those committees, or upon what facts the Mississippi committee predicated its report which was referred by me to the legislature as aforesaid.

Q. Do you not know Governor that there was a disagreement amongst themselves on the part of the Mississippi Boundary Commission and it was only at the last moment that they got together and sent a report declining to negotiate further with Louis-
1909 iana and suggested a suit in the Supreme Court of the United States?

A. I think I had knowledge of that; that there was a disagreement and their report shows such disagreement.

Q. I mean to say, if you understand me, I mean if there was not a disagreement amongst the five members of the Mississippi committee?

A. Yes sir.

Q. Do you know what was the cause of this disagreement?

A. Of my own knowledge, nor from anything I have heard from any members of the committee I do not.

Q. Did not you understand that some of the Mississippi committee were of the opinion that the claim of Louisiana was correct?

By Gen. McCLURG: The counsel for the State of Mississippi re-

now the objection of the said State to this inquiry as to the personal belief, opinion and inclinations of individual members of the committee, for the reasons that it is irrelevant and incompetent, and impertinent to the issue of this case, and for the further reason that the records not only of the appointments of that commission, but also the action of the commission embodied into the original bill of complaint in this case, and the reports of the governor of the State of Mississippi have also been made a matter of record. These official records speak for themselves, and it must be that inquiry into the bias, prejudice, and opinions of individual commissioners in arriving at the conclusions which they did, and which they officially reported is not pertinent to this inquiry.

Q. Did you not understand that some of the Mississippi committee were of the opinion that the claim of Louisiana was correct?

A. I did not understand that from any member of said committee but I did hear it charged by outside parties in Biloxi that notably one member of the committee, to-wit Mr. Harry Howard, was more interested in Louisiana than he was in Mississippi, having larger interests in that State than in this, and it was insisted by some of those who were displeased that Mr. Howard was an improper person to appoint on said committee, and it may be that I heard from such party that his opinion on the committee was biased. These are matters of hearsay and about which I did not charge my memory closely and can not be positive as to the general details with reference thereto.

Q. Personally you knew Mr. Howard to be a multi-millionaire did you not?

A. I knew Mr. Howard was reputed to be a rich man.

Q. You knew that he owned a yacht on the Gulf coast? A steam yacht?

A. I did not know that. I knew that he owned a nap-tha launch and I know that he has a house boat.

Q. Was not he really more familiar with the whole territory by reason of his more frequently going through it than any other member appointed by you on that committee?

A. I could not say of course definitely as to that, but when I appointed Mr. Howard it was with the belief that he was quite familiar with the territory in question, but I did not know how his acquaintance there compared with the other members of the commission.

Q. This committee reported in July 1901. The legislature of Mississippi of 1902 passed an oyster law providing for the first time in the history of Mississippi's control of the oyster industries, for the appointment by the governor of an oyster commission. Is that not correct?

A. That is.

Q. Did you not as governor of Mississippi exercising the powers given in that oyster law appoint an oyster commission?

A. I did.

Q. Was not the oyster commission empowered to take such
2001 action as was necessary to conserve the best intereste of the State of Mississippi in relation to the oyster industry?

A. I so understood it and so understand it now, but I would rather the law would speak for itself on that point.

By Gen. McCLURG:

Q. The law required did it not Governor that you should appoint on that commission men that were not interested in the oyster industry, or oyster business in any way?

A. Well yes sir, that is my recollection.

Q. And you observed the law in making the appointment of the commission?

A. Yes sir, but as I say again, the law speaks for itself. I would not want to put my memory up to speak for all that was in any long oyster law.

By Mr. DYMOND:

Q. How did you become aware that the State of Louisiana following the example of the State of Mississippi, had in the month of July 1902 itself adopted a new oyster law, which for the first time in the history of that State provided for the formation of an oyster commission?

A. I learned that from you Mr. Dymond in a conversation this morning, but I do not now recollect that at the time of the passage of the Mississippi Oyster Commission law that I was aware that Louisiana did or did not have such a law.

Q. Now Governor, when you appointed your oyster commission under the Mississippi law of 1902, the gentlemen whom you appointed had your full confidence and approval did not they as evidenced by your appointment?

A. Yes sir, else I would not have appointed them.

Q. Have you any reason to believe that they did not have at heart the best interests of the State of Mississippi in any arrangements they were making concerning her oyster industry?

2002 A. None whatever.

Q. Well you became aware that in the month of September 1902 that the Oyster Commission of Mississippi and Louisiana met in joint conference to consider the adoption of a *modus vivendi* that would obviate any difficulty resulting from this confusion as to boundary. You were aware of this fact were you not?

A. I became aware subsequent to their making the agreement that such had been done.

Q. Have you any reason to believe that in any negotiations that your committee would have had with the Louisiana committee, your committee would not have done its very best under all of the facts and circumstances as presented to it to have obtained the best conditions for Mississippi that it could?

A. I have no reason to believe to the contrary.

Q. Now do not you as a matter of fact know Governor that after
ou made most earnest effort on the part of your State to get the
eutral ground agreement abrogated, that the two commissions
gain met in joint session and that the Oyster Commission of Missis-
ppi refused to recede from the original agreement that it had made
ith the State of Louisiana through its oyster commission, main-
ining that it had done the best that could be done under the cir-
mstances?

A. I have heard, however, not from the oyster commission or any
ember thereof as I now recollect, that such a meeting was held as is
ferred to in your interrogatory, and that the Oyster Commission of
ississippi then refused to recede from the agreement because the
ster Commission of Louisiana wanted it abrogated to claim other
ritory in dispute, and the Mississippi commission proposed to
ld what it had under the neutral agreement until the suit could
disposed of. Now then I want to say that was a mere matter of
nor which came to me as I now recollect it, and I could not state
m whom I got such information, but I assume that the Missis-
sippi commission, acting for the best interests of Mississippi
3 as indicated by you above thought it was better to take a
part of a loaf than no loaf at all, and so insisted on holding
he former agreement whether right or wrong.

. Now as I understand it Governor, you indicated in your testi-
ny a moment ago that immediately upon finding that no alteration
brogation could be secured in the agreement between the two
er commissions, that the bill of complaint was promptly an-
ed. Are you correct so far as your memory serves you in that
ment?

It may be that the bill was answered anterior to this meeting
een the officials of the two States in New Orleans, where it was
l at my instance to try and get the agreement abrogated and to
of the territory in dispute to become neutral. I am not sure
the bill was answered, but it is my recollection that it was
vard.

Don't you know that the State of Mississippi was allowed sixty
to demur or answer, and that the bill was only filed in the
of October, and the meeting that you refer to was held in the
of November?

Gen. McCLURG: Counsel for Mississippi calls the attention of
unsel for Louisiana to the fact that the pleadings and the rec-
eak for themselves.

Those matters are of record and speak for themselves, but my
ction is that the facts inquired about by you are as indicated
r inquiry.

ow Governor is it not a fact then that in place of meeting our
th an answer, the suit invited by the State of Mississippi, that
matter of fact that it was met with a demurrer, alleging

that there was no dispute between the two States as to the bound
or any thing else that justified the suit?

A. There was a demurrer first interposed.

2004 Q. Was not the demurrer of the character that I h
just stated so far as you are able to recollect?

A. Yes sir, as I recollect it.

Q. Now is it not a fact Governor that this agreement made by t
two oyster commissions, after your futile efforts to have it abrogat
and amended, was recognized and enforced by the oyster comm
sion of the respective States since it has been entered into?

A. I have heard nothing to the contrary.

Q. Now Governor, as I understand it as executive of this Sta
you necessarily acquainted your legislature from time to time whe
it was in session with whatever you did in connection with thi
matter?

A. I did not acquaint the legislature with this meeting held i
New Orleans from which nothing came.

Q. Well did not your legislature know that there was this dis
pute on between the two States as to the boundary?

A. When?

Q. Since this session of 1902?

A. Why doubtless it did.

Q. As I understand it it took no action on the report that you
made at its session of 1902 in which the question of the suit was
suggested by the Mississippi Boundary Commission?

A. Yes sir, no action was taken.

Q. Was not that on the supposition that suit would be filed, and
the matter would have to be met in the ordinary course in the courts
as suggested by yourself?

A. I could not say really what was the motive or idea that moved
the legislature in the premises. I know that there was a report
made and that there was no action taken by the legislature, but I
never heard any legislative opinion about it.

Q. Was it not accepted by you as chief executive of this State
that the invitation of your boundary commission would be complied
with and the suit would be filed to determine this dispute?

2005 A. I hoped that result would follow, and this report was
made with a view to that being done if it met the legislative
approval.

Q. Was it not known to the legislature of 1904 that this suit had
been filed by the State of Louisiana and that there had been an
agreement made between the oyster commissions of the two States
establishing a *modus vivendi*?

A. It was known to the legislature of 1904, in the message which
I had the honor of communicating to that body that such suit was
pending, which message thereon made by me is as follows: "I had
the honor to bring to the attention of the legislature at its session of
1902 the question of disputed boundary between Mississippi and
Louisiana, wherein each State is claiming ownership of and jurisdic-

tion over certain islands in the gulf of Mexico. The legislature having taken no action looking to a settlement thereof, I took the matter up in person and tried in vain to affect an adjustment of said controversy, with my ideas of the rights and merits of Mississippi's claim, and interests in the premises, and I have now to say that since then the State of Louisiana acting through its governor and attorney general have filed a bill against this State in the Supreme Court of the United States, styled The State of Louisiana, complainant, *vs.* The State of Mississippi defendant, wherein the complainant seeks to have the disputed territory adjudged to be the property of that State, and under the executive jurisdiction of its laws. The effect of such decree in favor of complainant would under the operation of the laws of Louisiana prohibit the citizens of Mississippi from taking fish and oysters from the waters in dispute. And said oyster reefs are to a very large extent the dependence for the supply of fish and oysters to the people of Mississippi living on the southern border of the State who are engaged in that particular line of industry. The property in controversy is of great value extending perhaps
2006 into the millions of dollars." Reference is also made to the records of the attorney general's office.

Q. Is it not a fact to your personal knowledge as a citizen of the State of Mississippi that the house of representatives of your legislature appointed a special committee in its session of 1904 to investigate this whole subject matter. That this committee reported to the house of representatives and that notwithstanding that fact no action was had in this whole subject matter by the legislature of Mississippi of the year 1904, although the suit was pending?

By Gen. McCLURG: Counsel for the State of Mississippi objects and excepts to this question because it has reference to matters of official record.

A. No action was taken on the subject prior to my retirement from the office of governor on January 19th, 1904. As to what was subsequently done by that body I am not fully advised and must therefore refer you to the proceedings of the legislature on that subject.

Q. Are you prepared from your general knowledge of the current comment in the community to state whether or not the existence of this *modus vivendi* was or was not known to the legislature of 1904?

A. I presume it was. I think it was. I don't know from any definit- action taken by the legislature or any legislative pronunciament- on the subject that this *modus vivendi* was known to that body, but there were members of the legislature from the counties most interested in the controversy and who were familiar with the proceedings up to this time, and I naturally assume that the matter was discussed and became known to many members of the legislature, but of this I can not speak of my own knowledge.

Q. Are you prepared to state from your knowledge as a
2007 citizen of Mississippi whether there was or was not any action taken by the legislature of 1904 in the line of repudiating the

action of the Oyster Commissions of Mississippi and Louisiana in pr
viding for this neutral territory and *modus vivendi* pending the se
tlement of the controversy by a decree of the Supreme Court of th
United States?

A. I have no knowledge that any such action was taken by the legislature, and am advised and believed that no such action was taken.

Q. Now Governor, you were the executive of this State at the time that this matter was in its initial stages between the States of Louisiana and Mississippi. Are you the same A. H. Longino, who was appointed a commissioner on the part of the State of Mississippi to take the testimony and evidence of Mississippi in this case?

A. I am.

Q. How is it then that you are not acting in that capacity as commissioner now for the State of Mississippi?

By Gen. McCLURG: The question is objected to because it is irrelevant to the issue.

A. I was not an applicant for the appointment and had nothing to do with it, and when appointed by the Supreme Court of the United States to take the testimony I declined to accept the appointment by letter to the Chief Justice of the Supreme Court of the United States.

2008 Redirect examination.

By Gen. McCLURG:

Q. I believe you stated Governor, in answer to the counsel for Louisiana and in answer to the question interjected by me, that the laws of our State require that in appointing an oyster commission of this State, that persons should be appointed who are familiar with the oyster industry and all of its branches, but no person should be appointed who was interested in the business, oyster business, and you said that in making appointments of oyster commissions for this State you respected that statute. That is true is it not?

A. Yes sir.

Q. And you have been interrogated by counsel for Louisiana in this case with reference to the appointment of Mr. Howard and others largely interested in the State of Louisiana. I want to ask you whether or not in making the appointment of these five commissioners, which you were requested by Governor Heard to appoint, whether or not you undertook to appoint and did knowingly appoint gentlemen who are prejudiced and interested in favor of Mississippi?

A. I undertook to appoint men of known probity and competency for the place, and who I then believed and still believe would do, and did do their full duty in the premises as they saw it. I appointed them simply with reference to what I conceived to be their

general fitness for the position, looking only to a right adjustment of the points of difference between the two States.

Q. And as I understood you with a view to ascertain and find the fixed boundary rather than establish a new boundary?

A. Yes sir, and as my report to the legislature shows it was
2009 for the purpose of establishing the real boundary as fixed by the laws of the United States, and when that boundary was found by them to so mark it with buoys so that the citizens in interest in the respective States would know their limits.

Q. You were also questioned about a letter written by Mr. I. Heidenham of Biloxi to Congressman F. A. McLean, and as the record in this case shows it was referred by Mr. McLean to the Coast and Geodetic Survey, and to inform you what has already been disclosed in the progress of this trial by that letter of Mr. Heidenheim, he asked Mr. McLean to have the proper authorities to forward him records pertaining to the boundary in controversy. The Coast and Geodetic Survey it seems had a high subaltern in that department, one Mr. Hodgkins, to take the matter up, and instead of furnishing Mr. McLean, and Mr. Heidenheim through Mr. McLean the records pertaining to this, Mr. Hodgkins turned lawyer and gave a very elaborate opinion as to his views of the boundaries and the possessions of the respective States. That is the letter that counsel have asked you about, and the one that Heidenheim says he had never seen and never heard of until this Mr. Hodgkins took the stand and testified about this matter. You say that that letter was never made a part of the official records of this State and of your office?

A. Not that I have any recollection of whatever. None whatever. If I ever saw it I don't recollect it now, and I don't think I ever saw it. I can say, however that I got numerous letters from Mr. Heidenheim, and if he received it it is not improbable that he sent it to me, and if he did I sent it back to him and don't recollect any thing about it.

Q. Counsel for Louisiana also asked you as to what action
2010 the legislature took with reference to your message to that body during the session of 1904. I hand you a document which I will ask the commissioner to file as Document No. 86, in this case, a copy of which I now hand to the counsel for the State of Louisiana it being a report of special committee appointed to investigate the subject matter of a bill to provide for defraying the expenses of the State of Mississippi in the case of The State of Louisiana *vs.* The State of Mississippi, now pending in the Supreme Court of the United States, wherein the boundary lines of said State are in dispute." Please look at this document and hand it to the commissioner that he may file it as I have requested?

A. I accordingly hand it to the commissioner to be filed.

The report above referred to is here introduced in evidence by the counsel for the State of Mississippi, filed with the commissioner and marked Mississippi Document No. 86.

Q. As to the causes and reasons that led the legislature of 1
to decline to make the appropriation to which the docu ment I ha
just handed you refers, I understand that you are not informed?
A. I am not informed.
Q. If there is anything else that you desire to state about th
matter Governor, I would be glad for you to do so now?
A. As above stated I know personally very little of the facts i
volved, other than those contained in the law and in the record
that have been introduced.

2011 Recross-examination.

By Col. ZACHARIE:

Q. Governor after the knowledge came to you of this agreement
between the oyster commissions of these two States in regard to the
establishment of a neutral zone, did you as executive of the Stat
take any steps to repudiate that agreement?
A. I did not.
Q. Do you know whether the legislature of the State of Missi
sippi ever took any steps?
A. I don't think it did.
Q. The only thing as I understand it is at a subsequent meeting
between Governor Heard and yourself and the oyster commissions
you endeavored to have that zone which had been established en
larged?
A. Yes sir, that is I endeavored to have all of the lines wiped out
and leave the territory as it had been enjoyed by the two States for
many years prior to that time pending the litigation.
Q. Further than that there was no attempt on the part of the ex
ecutive of Mississippi or of the legislature of Mississippi to disturb
or destroy this agreement in regard to the neutral zone which had
been formerly entered into.
A. There was no such attempted disturbance so far as I was con
cerned acting as governor. I understood that that agreement was
to be only temporary and to hold until the real boundary could be
settled by the court, and that this agreement was only to avert any
further friction and to prevent possible hardships to the citizens of
either State.

Q. Was it not also for the purpose of preventing any vio-
2012 lence or armed clash whether between the citizens of the two
States or of the authorities of the two States?
A. Well as above stated I heard random talk about armed inter
vention, and the request or inquiry was made of me if I did not have
the authority to intervene with the militia and patrol these waters
and if it was not my duty. To that I very promptly replied in the
negative. That it was a legal question that must be settled in a
legal and decorous way in the courts of the country but I hoped
that an arrangement might be entered into in the mean time that

would give satisfaction to the people and preserve substantially their business interests during the period of the pendency of the suit.

Q. Then as I understand it you understood that this agreement as to the neutral zone was a sort of *modus vivendi* during the pendency of the suit?

A. Yes sir.

Q. In order to prevent any clash or trouble between the States?

A. Not only to prevent any clash. I do not think I had in my mind any clash, Colonel, in the sense of violence, but there was conflict of interests and bad feeling, and perhaps legal controversies would intervene. Certainly as the executive of the State I never contemplated any clash of arms between the authorities of the two States on the subject. I knew in fact that nothing of this sort would come. I had confidence in the official force of these counties bordering on the coast to believe that the officers would not do anything of a revolutionary nature. But whatever clash might come would be in the courts in the way of injunctions and arrests for trespass on one side of the other.

Q. And resistence to arrest and so on?

A. Possibly. I don't know that I had that in contemplation at that time. I will say that as governor I never contemplated any clash, any violence. As to what might have been in the minds of individuals I don't know.

2013

Redirect examination.

By Mr. McCLURG:

Q. Counsel has asked you about the reasons and purposes of this *modus vivendi* line, and since you have stated that you were no party to the making of it What you have to say as to the reasons for making it are hearsay from what you have gathered since?

A. That is all.

Q. And this confusion and conflict; a knowledge of all of that came to you after a filing of this bill?

A. Well to what conflict do you refer?

Q. To which you have just testified a moment ago. Following that agreement as to this neutral zone territory. You went to Biloxi some time in the early part of November 1902?

A. Yes sir.

Q. Is that the beginning?

A. It was early in November. It was soon after the receipt of a letter marked Document 85, that I went to Biloxi.

Q. That letter is November 5th, 1902. Prior to that time you had heard of no serious disturbance over the State line between the two States?

By Mr. DYMOND: Objected to by the counsel for the State of Louisiana as leading.

Q. State to the commission whether or not prior to that meeti
at Biloxi that we have just mentioned, whether you h
2014 ever heard of any serious disturbance between the officials
the two States over the boundaries in the waters of the Gul

A. I don't think I ever heard of any serious disturbance betwe
the officials of the two States at all. There was considerable di
satisfaction and excitement on the part of individuals in Mississip
living on the coast.

Q. When?

A. In November and possibly before. I could not state exactl
which or when. Doubtless I had heard of complaints before thi
meeting which I had with the citizens in November. But I heard i
emphasized when I went there as it was in these resolutions that were
passed by the mayor and board of aldermen, and citizens of Biloxi,
but I never heard any violence contemplated between the citizens
of the respective States at all, only as suggested by some parties as
enumerated here in my testimony before, and that I regarded as
mere idle rumor.

Governor A. J. McLAURIN, being duly sworn, testified as follows
on behalf of the State of Mississippi.

By Gen. McCLURG:

Q. Governor, you are a native Mississippian and live at Brandon?

A. Yes sir.

Q. I wish you would tell the commissioner how old you are and
what official political positions you have held in the State of Mis-
sissippi?

A. I was 56 years old on the 26th of last March. I have held
several official positions. I have been district attorney for four
years. I was a member of the house of representatives in the
legislature of the State of Mississippi one term. I was presidential
elector for the State at large in 1888.
2015 I was elected to the United States Senate in February 1894.
I was elected governor in 1895, and served as governor from
the 21st of January 1896 to the 16th, of January 1900 was again
elected to the United States Senate, again elected to the United
States Senate in 1904. I believe that covers the official positions
that I held.

Q. And above all of this you helped to write the constitution of
Mississippi?

A. Yes sir, I was a member of the constitutional convention. I
had forgotten that, and I was once alderman of the town of Brandon,
and mayor *pro-tem.* for about ten days.

Q. It is alleged in this bill of complaint Governor, which is an
alleged controversy over the boundary between Louisiana and Mis-
sissippi in the waters of the gulf of Mexico, that at the time of the
filing of the bill on the 27th, of October 1902, the dispute over the

boundary which I have mentioned had become a crisis, so much so that there was a threatened armed conflict between the sheriff and other officers of St. Bernard parish in the State of Louisiana and the sheriff and other officers in the county of Harrison and State of Mississippi, and I have concluded to ask you if at any time during your administration of the governor's office, or any of the other offices which you have mentioned or as a citizen of the State you have had any information of such a condition of affairs?

A. I never had any information of any controversy or dispute between the State of Louisiana and the State of Mississippi or either of the States as to the boundary line between the States during the time I was governor. I never heard of any controversy until after my term of office had expired as governor, and I don't know what I did hear now.

Q. After the expiration of my term of office as governor, I never heard of any alarming conditions there that I recollect.

Q. Did you have any information of any kind, whether you obtained it as an officer or as a private citizen with reference to any serious disturbance between these two States respecting that boundary prior to the institution of this suit on the 27th, of October 1902, and if so I will be pleased to have you state it to the commission?

2016

A. I have had no such information.

It is admitted and agreed by counsel for the State of Mississippi and for the State of Louisiana that if WILEY N. NASH were present he would testify as follows:—

That he was attorney general of the State of Mississippi from about the 1st, of January 1896 to the 15th of January 1900, and that he had no official knowledge and had no personal knowledge or information of any sort of a controversy or dispute between any officer of Louisiana and any officers of Mississippi, or any of the citizens of the two States over the boundary in the waters of the Gulf in dispute in this suit.

It is also admitted that if present, the Hon. FRANK JOHNSTON would state as follows:—

I was attorney general of Mississippi from January 21st, or 23rd, 1893 until the termination of Governor John M. Stone's second administration. During that period I heard nothing of any controversy between the respective authorities of the States of Louisiana and Mississippi in respect to the boundary lines of the two States in the gulf of Mexico. In fact during that period there was no such controversy.

Until the present controversy arose I supposed that the entire boundary lines between the two States were all ascertained and acquiesced in by all concerned.

I have never investigated the question as to how far out in the Gulf the territorial jurisdiction of the State of Mississippi extended,

but I always supposed that it extended about 16 or 18 miles out, so as to embrace all the outlying islands.

I will state further that I am not familiar with the details and particulars of the present boundary controversy between the
2017 two States.

N. L. WINGO, a witness introduced in behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLUNG:

Q. Mr. Wingo, please tell the commission your age, place of residence and occupation?

A. I am forty years old and live in Jackson Mississippi, and I am a professional photographer.

Q. I show you Mr. Wingo, an orignal copy of Carey's General Atlas, perfected and enlarged, being a collection of the maps of the world and quarters, their principal empires, kingdoms, etc., and on page 23 of this atlas I will ask you to look, and ask you if you have seen this book before and the map marked Mississippi territory, Miles, on page 23 of this collection of atlases, and tell the commission if you have ever seen this Mississippi Territory map before, and if so where you got it, what you were requested to do and by whom you were requested and what you did do?

A. Yes sir, I have seen this map before. It was brought to me by Mr. J. N. Flowers, assistant attorney general of the State of Mississippi with the request to make a photographic copy of the same, which I did of map on page 23.

Q. I show you now what purports to be a photographic copy of Mississippi territory by Miles and ask you whether this is the photograph you made of this map at which you have just looked?

A. Yes sir, this is a photographic reproduction of the same map.

Q. I will ask you to compare this photographic copy with the map on page 23 and tell the commission whether that is a true, correct and exact copy?

A. Yes, sir, that is a true and correct copy.

2018 Counsel for the State of Mississippi here introduces and offers in evidence in this case the photographic copy of said map made by Mr. Wingo, marked as Mississippi Map Document No. 87, and here tenders to the counsel for the State of Louisiana a true copy of the same.

Q. Mr. Wingo, I now show you a map which is marked "Geographical map of Mississippi" by Eug. W. Hilgard, State geologist, prepared by J. H. Colton No. 172 William street New York. I will ask you to say whether you ever saw this map before, and if so when and where, and if you were requested to do any thing with it so state as well as what you did?

A. This map I have seen before and it was brought to me by Mr.

James N. Flowers, assistant attorney general of the State of Mississippi, with the request to make a photographic copy of the same which I did.

Q. I will ask you to look at what purports to be a photographic copy of this map, and request you to compare it with the original now before you, and to say whether it is a true accurate and correct representation of that map?

A. Yes sir, it is. It is a true and correct photographic representation.

The Hon. MONROE MCCLUNG, who has been sworn as a witness in this case now states that the map by Hilgard to which the witness has just testified was by him taken from the Hilgard report of his geological report, and handed to the assistant attorney general for the purpose of having it photographed by Mr. Wingo.

The said original map made by Hilgard is now offered and introduced in evidence on the part of the State of Mississippi as Mississippi Document No. 88 and a copy thereof photographed by Mr. Wingo as above stated is now handed to the counsel for the State of Louisiana.

2019 Q. Mr. Wingo, I will ask you to look at the map which I now take from the Report of agriculture and geology of Mississippi, ubracing a sketch of social and natural history of the State by B. . C. Wailes, member of the American Association for the Promoion of Science, corresponding member of the National Instiute, and of the Boston Society of Natural History etc., published y order of the legislature, E. Barksdale, State printer 1854, and ask ou to examine this map and state to the commission whether you ave ever seen it before, and if so how it came to your observation d what if any thing you were requested to do with it?

A. This map was handed to me by Mr. James N. Flowers, assistt attorney general of the State of Mississippi, with the request o to make a photographic copy of the same which I proceeded slo.

Q. Please examine said map and compare it with the photoaphic copy, which I now hand you and say whether your photoaphic copy is a true, correct and accurate reproduction of said p?

A. It is.

said map is now introduced and offered in evidence on the part he State of Mississippi as Mississippi Map Document No. 89, a y of which is now handed to the counsel for the State of Lou-na.

Mr. Wingo, I will now ask you to look at the map here shown which has upon its face, "Geological chart of Mississippi, by arper, State geologist, 1857" and ask you to say whether you ever seen this map before, and which you now see me take

from "A preliminary report on the geology and agriculture of the State of Mississippi by L. Harper, L. L. D., correspondent of the Imperial Museum and Natural Science for France etc., State geologist of Mississippi by order of the legislature, E. Barksdale, State printer, Jackson, 1857, and tell the commission whether you have seen this map before, if so the circumstances and what you were requested if any thing to do with it, and what you did do with it?

2020

A. This map was also brought to me by Mr. James N. Flowers assistant attorney general of the State of Mississippi with the request to make a correct photographic copy of the same which I did.

Q. Please compare your photographic copy which I now hand you with this map and say whether it is a correct, true and exact reproduction of that map.

A. It is a correct copy of that map.

Counsel for the State of Mississippi now introduces and offers in evidence the original of said map as Mississippi Map Document No. 90, and now hands to the counsel for the State of Louisiana a true copy of the same.

Q. In taking photographic copies of these maps Mr. Wingo, which purport to show the geological surveys of the State and reports thereon by these officials, you could not take the coloring of the maps on the photographic copies that you made of them could you?

A. No sir, that would be an impossibility under our present methods.

Q. Have you been able to show by your photographic copies the boundaries and outlines of the State clear and distinct the same as upon the maps from which your photographic copies were made?

A. Yes sir, I have.

2021 Cross-examination.

By Mr. DYMOND:

Q. Now Mr. Wingo, I understand that you are a photographer by profession and that you recognize the inability of photography to reproduce colors except in shades?

A. Yes sir.

Q. You will please notice this map, Mississippi Map Document No. 87 appearing on page 23 of the atlas of N. Carey published in 1816, and I direct your attention to the extreme southwestern point on this map and ask you to indicate that with a red ink cross on this original photograph offered in evidence?

A. (The witness here places the red ink cross mark as requested.)

Q. Now I will next direct your attention to page 26 of this same atlas, giving a map of the State of Louisiana, and I would ask you to notice whether the State of Mississippi does not join the State of Louisiana at or near the neighborhood — the point as designated by the red ink mark?

A. It does.

Q. Now is there any similarity in the topography of these two maps in that particular locality, and I direct your attention first now to the Mississippi map, to the islands designated, and then direct your attention to the Louisiana map showing the same locality, and ask you if there is any similarity in the topography of the two maps?

A. I find that there is a difference.

Q. What difference do you find?

A. I find that the islands marked on the Mississippi map are some different from the islands marked on the Louisiana map.

Q. On the Mississippi Map Document 87 now in your hand as designated by colors to whom would they be shown to belong. To what State?

A. To Mississippi.

3922 Q. Is there anything on the map of Louisiana to show that they belong to Mississippi?

A. Well I would take it that the islands in both maps are intended to belong to Mississippi.

Q. What makes you think so and where are the same islands?

A. The same islands appear to be near the mouth of Pearl river in both maps.

Q. You will notice that according to the map of Mississippi Lake Pontchartrain opens into the gulf of Mexico, except for the islands in the mouth of Lake Pontchartrain. Do you notice that to be a fact?

A. I do. I notice also that Lake Pontchartrain seems to join with the mouth of the Pearl.

Q. The mouth of Pearl river?

A. Yes sir, according to the map.

Q. Now you will please look at this map of Louisiana and you will find a lake called Lake Borgne, in addition to the lake called Lake Pontchartrain. Is there any such lake as Lake Borgne shown on the Mississippi map No. 87?

A. There is not. It is marked gulf of Mexico.

Q. Now directing your attention to Mississippi Map Document No. 88, being a geological map of Mississippi by Eugene W. Hilgard, and I will call your attention to a small portion of territory forming the extreme southwestern portion of the State of Mississippi which lies between the east mouth of Pearl river, and the water which is south of it, and I wish you would designate the spot by putting a red ink cross at the point designated?

A. (The witness marks the cross on the map as requested.)

Q. Now will you please tell me according to the color scheme of the map marked Mississippi Document No. 88 to what State that territory south of the eastern mouth of Pearl river is given?

A. To Mississippi.

3923 Q. I now ask you to look at the Mississippi map, marked Mississippi Document No. 90, being a geological chart of

Mississippi by L. Harper State geologist, and ask you to designate by a red ink cross the locality which you have just designated on map No. 88, which territory lies south of the eastern branch of Pearl river, after you have designated that point with the red ink cross to state to what State according to the color scheme of this chart the territory in question is given?

A. To Louisiana.

Q. Therefore according to the geological map of Hilgard that particular spot that you have marked is given to Mississippi and by the geological map of Harper that same identical territory is given to Louisiana?

A. According to the color scheme yes sir.

Q. Now your photograph of map No. 87 is not on the same scale as the original is it?

A. No sir, it is reduced.

Q. And the color that appears on the original is lacking from the copy?

A. Yes sir, the coloring is lacking.

Redirect examination.

By Gen. McCLURG:

Q. Counsel for the State of Louisiana have asked you, and had you to make some red cross marks on these original maps, taken from the reports to the legislature of the State of Mississippi by Hilgard and Harper, Mississippi Map Documents No. 88, and 90, and counsel for Louisiana has called your attention to certain colorings. Counsel for Mississippi thinks that your opinion as to whether the coloring gives the territory to one State or the other is incompetent and irrelevant, for the reason that the maps speak for themselves and the Supreme Court will judge for themselves regardless
2024 of what you or other witnesses may say about this matter. I nevertheless, in view of this cross examination ask you to say whether colors given at the points which you have marked with red ink are not shown to be, by the legendary on the maps to have reference to the geology, rather than to the geography of the country and regardless of State boundaries?

A. As I understand these maps the coloring is to designate certain geological formations, but in testifying as to which I think the outline plain and I was going by the colors to designate the State line.

Recross-examination.

By Mr. DYMOND:

Q. What right would a map of Mississippi have to show geology in the State of Louisiana?

By Gen. McCLURG: Objected to on the part of the State of Mississippi as irrelevant and incompetent.

A. I don't know that I could answer that question.
Q. What does this map No. 88 purport to be?
A. A geological map of Mississippi.
Q. Does it color any other part of the State of Louisiana except that designated in the neighborhood of the red cross?
A. It does not.

The oral testimony in this case on both sides is now closed. The right being reserved by agreement of both sides that any other documentary evidence may be filed, that either State desires to introduce on the 1st day of October 1904 when the commission will meet in the attorney general's office in the city of Jackson
2025 Mississippi for the purpose of filing said documents and concluding the evidence in this case.

It is further agreed in making up the record in this case for transmittal to Washington that all evidence, including documentary and maps offered by one side and in the possession of the commissions of the other State, shall be transmitted by such commissioner to the commissioner of the State making the offer, so that the evidence of each State may be made up together, in separate reports and without confusion in the evidence offered by the respective States.

The commission is now accordingly adjourned until the 1st day of October 1904.

2026 JACKSON, MISSISSIPPI, October 1st, 1904.

Pursuant to the adjournment had on Friday September 23rd, 1904, the commission met this 1st day of October 1904 at Jackson Mississippi.

Present: Hon. William D. Bullard, commissioner. Hon. J. N. Flowers, assistant attorney general, and Hon. Monroe McClurg, associate counsel for the State of Mississippi.

Hon. Walter Guion, attorney general for the State of Louisiana, Col. F. C. Zacharie, and Hon. John Dymond Jr., associate counsel for the State of Louisiana.

In pursuance of the agreement of counsel previously made in this case, counsel for the State of Louisiana now offers, produces, and filed in evidence a photographic copy of the map of Louisiana and Mississippi by H. S. Tanner, 1819, marked map No. 66, and a photographic copy of the area of said map, representing the disputed territory in this case marked map 66 A.

It is admitted by counsel in this case that the photographic copy Exhibit 66 A has been compared in its coloring with the original and is found correct.

A copy of said map 66 A is herewith tendered to the counsel for the State of Mississippi, and a copy of the map No. 66 is to be furnished counsel for the State of Mississippi, and both of said
2027 maps are tendered to the commissioner for filing.

Counsel for Mississippi now introduces and offers in evidence the following documents to-wit:

Mississippi Document No. 91, being an extract from a report on agriculture and geology of Mississippi embraced in a sketch of the social and natural history of the State by B. L. C. Wailes, geologist of Mississippi, member of the American Association for the Promotion of Science, corresponding member of the Natural Institute, and of the Boston Society of Natural History, etc., etc., published by order of the legislature. E. Barksdale, State printer 1854, a copy of which is now handed to counsel for the State of Louisiana.

Mississippi Document No. 92, being an extract from the preliminary report on the geology and agriculture of the State of Mississippi by L. Harper L. L. D., correspondent for the Imperial Museum for Natural Science of France etc., State geologist of Mississippi. By order of the legislature of Mississippi. E. Barksdale, State printer, Jackson. 1857. Geographical description of the State of Mississippi.

A copy of which is now tendered to the counsel for the State of Louisiana.

Mississippi Document No. 93, being an act of the legislature of the State of Mississippi of 1857 directing a distribution of Harper's report, etc. A copy of which is now given to counsel for the State of Louisiana.

2028 Mississippi Document No. 94, being an act of the legislature of the State of Mississippi of 1857 defining the duties of the harbor master, and giving jurisdiction to justices of the peace along the coast etc., a copy of which is now given to the counsel for the State of Louisiana.

Mississippi Document No. 95, being a copy of sundry acts of Mississippi Territory relating to coast counties. A copy of which is now given to counsel for the State of Louisiana.

Mississippi Document No. 96, being an act of the legislature of the State of Mississippi of 1830 relating to Hancock and Jackson counties. A copy of which is now handed to counsel for the State of Louisiana.

Mississippi Document No. 97, being a part of an act of the legislature of Mississippi of 1842 relating to the county of Harrison, a copy of which is now handed to counsel for the State of Louisiana.

Mississippi Document No. 98, being a memorial of the legislature of the State of Mississippi to the Congress of the United States, January 26th, 1830. A copy of which is here given to counsel for the State of Louisiana.

Mississippi Document No. 99, being an act of the legislature of the State of Mississippi providing for a survey of the Mississippi coast. Approved February 14th, 1839, a copy of which is now

2029 handed to the counsel for the State of Louisiana.

Mississippi Document No. 100, being a joint resolution of the two houses of the Mississippi legislature to Congress for a light

ouse. Approved February 7th, 1840, a copy of which is now nded to counsel for the State of Louisiana.

Mississippi Document No. 101, being a memorial by the legisla- re of the State of Missis ippi to Congress, of February 22nd, 40.

A copy of which is now handed to counsel for the State of Lou- ana.

Mississippi Document No. 102, being a resolution to Congress con- ning the er-ction of a light house on St. Joseph's island. Feb- ry 22nd 1842. A copy of which is now handed to the counsel the State of Louisiana.

lississippi Document No. 103, being the resolutions requesting Congress of the United States to remove the custom house from rlington to Shieldsborough, October 24th, 1844.

copy of which is now handed to the counsel for the State of isiana.

lississippi Document No. 104, being preamble and resolutions ng Congress to erect a light house, establish a mail route on the t of Mississippi etc., February 5th, 1846.

copy of which is now handed to counsel for the State of Mis- sissippi.

Mississippi Document No. 105, being a copy of an act of the legislature of the State of Mississippi to authorize the ing of the first annual report on the agriculture and geological ey of the State, March 1st, 1854.

copy of which is now handed to counsel for the State of Lou- a.

ssissippi Document No. 106, being an act of the legislature of State of Mississippi to enable the United States of America to t the title to St. Joseph's island. November 19th, 1857.

copy of which is now handed to counsel for the State of Lou- .

sissippi Document No. 107, being a copy of a part of an act of ess to establish a separate territorial government for the east- art of Mississippi Territory. Approved March 3rd, 1817 U. S. es at Large, volume 3. page 371.

opy of which is now handed to counsel for the State of Lou-

A copy of which will be furnished to counsel for the State of Louisiana.

Mississippi Document No. 112, being copies of the laws and documents, and extracts from the laws and documents taken from the journals of William C. C. Claiborne, and David Holmes, certified by Dunbar Roland director of the department of archives and history of the State of Mississippi.

A copy of which is now given to counsel for the State of Louisiana.

2032 The taking of testimony in this case is now finally concluded by both sides, this being the day fixed by the Supreme Court for the concluding of the testimony on both sides.

The definitive treaty of friendship and peace between His Britannic Majesty, the Most Christian King, and the King of Spain, concluded at Paris, the 10th day of February, 1763; to which the King of Portugal acceded the same day.

In the name of the most holy and undivided Trinity, Father Son and Holy Ghost. So be it.

Be it known to all those to whom it shall, or may, in any manner belong.

It has pleased the Most High to diffuse the spirit of union and concord among the princes, whose divisions had spread troubles in the four parts of the world, and to inspire them with the inclination to cause the comforts of peace to succeed to the misfortunes of a long and bloody war, which, having arisen between England and France, during the reign of the most serene and most potent prince, George the Second, by the grace of God, King of Great Britain, of glorious memory, continued under the most serene and most potent prinse, George the Third, his successor, and, in its progress, communicated itself to Spain and Portugal, consequently, the most serene and most potent prince, George the Third, by the grace of God, King of Great Britain, France, and Ireland, Duke of Brunswick and Lunenbourg, arch-treasurer and elector of the holy Roman Empire; the most serene and most potent prince, Louis the Fifteenth, by the grace of God, Most Christian King; and the most serene and most potent prince, Charles the Third, by the grace of God, King of Spain, and of the Indies; after having laid the foundation of peace in the preliminaries, signed at Fontain-bleau the 3d of November last; and the most serene and most potent prince, Don Joseph the Fifth, by the grace of God, King of Portugal and the Algarves, after having acceded thereto; determined to complete, without delay, this great and important work. For this purpose, the high contracting parties have named and appointed their respective ambassadors extraordinary, and ministers plenipotentiary, viz. His Sacred Majesty, the King of Great Britain, the most illustrious and most excellent lord, John, Duke and Earl of Bedford, Marquis of Tavistock, &c. his minister of state, lieutenant-general of his armies, keeper of his privy seal, knight of the most noble Order of the Garter, and his ambassador extraordinary and minister plenipotentiary to His Most Christian Majesty; His Sacred Majesty the Most Christian King, the most illustrious and most excellent Lord Cæsar Gabriel de Choiseu Duke of Praflin, peer of France, knight of his order, lieutenant general of his armies, and the province of Brittany, counsellor in all his councils, and minister and secretary of state, and of his commands and finance; His Sacred Majesty the Catholic King, the most illustrious and most excellent lord, Don Jerome Grimaldi, Marquis de Grimaldi, knight of the Most Christian King's orders, gentleman of His Catholic

Majesty's bed chamber in employment, and his ambassador extraordinary to His Most Christian Majesty; His Sacred Majesty the Most Faithful King, the most illustrious and most excellent lord, Martin de Mello and Castro, knight professed of the Order of Christ, of His Most Faithful Majesty's council, and his ambassador and minister plenipotentiary to His Most Christian Majesty.

Who after having duly communicated to each other their full powers, in good form, copies whereof are transferred at the end of the present treaty of peace have agreed upon the articles, the tenor of which is as follows: * * *

VII. In order to re-establish peace on solid and durable foundations, and to remove forever all subjects of dispute with regard to the limits of the British and French territories on the continent of America, that for the future, the confines between the dominions of His Britannic Majesty, in that part of the world, shall be fixed irrevocably by a line drawn along the middle of the River Mississippi, from its source to the River Iberville, and from thence by a line drawn along the middle of this river, and the Lake
2034 Maurepas and Pontchartrain, to the sea; and for this purpose the Most Christian King cedes, in full right, and guaranties to His Britannic Majesty, the river and port of the Mobile, and every thing which he possesses, or ought to possess, on the left side of the River Mississippi, except the town of New Orleans, and the island in which it is situated, which shall remain to France; provided that the River Mississippi shall be equally free, as well as the subjects of Great Britain, as to those of France, in its whole breadth or length from its source to the sea, and expressly that part which is between the said island of New Orleans, and the right bank of that river, as well as the passage both in and out of its mouth. It is further stipulated, that the vessels belonging to the subjects of either nation, shall not be stopped, visited, or subjected to the payment of any duty whatsoever. The stipulations, inserted in the IVth article in favor of the inhabitants of Canada, shall also take place with regard to the inhabitants of the countries ceded by this article. * * *

XX. In consequence of the restitution stipulated in the preceding article, His Catholic Majesty cedes and guarantees, in full right, to His Britannic Majesty, Florida, with Fort St. Augustine, and the bay of Pensacola, as well as all that Spain possesses on the continent of North America, to the east or to the south-east of the River Mississippi; and, in general, everything that depends on the said countries and lands, with the sovereignty, property, possession, and all rights acquired by treaties or otherwise, which the Catholic king, and the Crown of Spain have had, till now, over the said countries, lands, places, and other inhabitants; so that the Catholic king cedes and makes over the whole to the said king, and to the Crown of Great Britain, and that in the most ample manner and form. His Britannic Majesty agrees, on his side, to grant to the inhabitants of the countries, above ceded the liberty of the Catholic

ligion; he will consequently give the most express and the most ffectual orders, that his new Roman Catholic subjects may profess e worship of their religion, according to the rites of the Roman urch, as far as the laws of Great Britain permit; His Britannic ajesty further agrees that the Spanish inhabitants, or others, who ve been subjects of the Catholic king in the said countries, may tire with all safety and freedom wherever they think proper; and y sell their estates, provided it be to His Britannic Majesty's bjects, and bring away their effects, as well as their persons, with- t being restrained in their emigrations, under any pretense what- ver, except that of debts, or criminal prosecutions; the term, ited for this emigration being fixed to the space of eighteen nths, to be computed from the day of the exchange of the ratifi- ion of the present treaty. It is moreover stipulated that His tholic Majesty shall have power to cause all the effects, that may ong to him, to be brought away, whether it be artillery or other ngs.

e it known to all those whom it shall or may in any manner cern. The most serence and most potent prince George the rd, by the grace of God, King of Great Britain, France and Ire- d, Duke of Brunswick and Lunenbourg, arch-treasurer and tor of the Holy Roman Empire, &c. and the most serene and t potent prince Charles the Third, by the grace of God, King of in, and of the Indies &c. being equally desirous to put an end to war, which for several years past afflicted their respective domin- , accepted the offer which Their Majesties the Emperor of the ans, and the Empress of all the Russias, made to them, of their position, and of their mediation: * * *, have agreed upon following articles.

* * * * * * *

rt. V. His Britannic Majesty likewise cedes and guarantees, in right to His Catholic Majesty, East Florida as also West Florida. Catholic Majesty agrees that the British inhabitants, or others

who may have been subjects of the King of Great Britain in the said countries, may retire in full security and liberty, where they shall think proper, and may sell their estates and remove their effects, as well as their persons, without being restrained in their emigration, under any pretence whatsoever, except on account of debts or criminal prosecutions; the term limited for their emigration being fixed to the space of eighteen months, to be computed from the day of the exchange of the ratifications of the present treaty: but if, from the value of the possessions of the English proprietors, they should not be able to dispose of them within the said term, then His Catholic Majesty shall grant them a prolongation proportionate to that end. It is further stipulated, that His Britannic Majesty shall have the power of removing from East Florida all the effects which may belong to him, whether artillery or other matters.

2036 MISS. DOCUMENT No. 3.

Chapter 22, Volume 2, United States Statutes at Large.

Chap. XXII.—An act for the disposal of certain tracts of land in the Mississippi territory, claimed under Spanish grants, reported by the land commissioners as antedated, and to confirm the claims of Abraham Ellis and Daniel Harregal.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the several tracts of land, in the Mississippi territory, the titles to which have been derived under Spanish claims and which have been disallowed by the boards of commissioners east and west of Pearl river, on suspicion of the grants, warrants or orders of survey, on which the claims are grounded, being antedated or otherwise fraudulent, and which are embraced in the report of the said boards of commissioners, laid before Congress, agreeable to the third section of an act, *intitu*led, "An act supplementary to the act *intitled* An act regulating the grants of land, and providing for the disposal of the lands of the United States, south of the State of Tennessee," shall be, and the same are hereby directed to be sold, in the same manner, at the same price, and on the same terms and conditions, as have been, or may be by law provided for the sale of the other public lands in the said territory; and any person or persons claiming under a Spanish grant, warrant, or order of survey as aforesaid, shall be entitled to institute, in the highest court of law and equity in

e said territory, his or their suit or action for the recovery of the act or tracts so claimed as aforesaid: Provided: such claimant or aimants shall institute his or their suit or action within the term one year from and after the tract or tracts so claimed shall have en sold by the United States, or in case the same is now inhabited d cultivated, in virtue of a pre-emption right within one year om and after the passing of this act; and if any person or persons, aiming lands as aforesaid, shall fail or neglect to commence or in-tute his or their suit or action, in the manner and within the time scribed by this section, or shall be non-suit or discontinue the ne, his or their right to commence such suit or action, in any art whatsoever, shall be forever barred and foreclosed.

SEC. 2. And be it further enacted, That if the person or persons aiming under such grant, warrant or order of survey, shall make ppear to the satisfaction of the court, before whom such suit or ion shall be pending, that the tract of land therein specified, was ually surveyed prior to the twenty-seventh day of October, one ousand seven hundred and ninety-five, then, and in that case, the e shall be deemed and held to be good and valid, to all intents l purposes, anything in this act to the contrary notwithstanding: t in no case the claimant or claimants shall fail to prove the tract tracts of land so claimed, to have been actually surveyed prior to twenty-seventh day of October, one thousand seven hundred and ety-five, or in case the same shall appear to be otherwise fraud-nt or illegal in the grant, warrant or order of survey, granted by Spanish government, as aforesaid, by virtue of which such tract racts of land may be claimed, shall be, and the same is hereby lared null and void, to all intents and purposes, and shall not be l in evidence against any claim or certificate of preëmption, de-d from the United States.

ECTION 3. And be it further enacted, That it shall be lawful, in trial of such suit or action, for either party to introduce parole dence for the purpose of supporting or invalidating the grant, rant or order of survey as aforesaid; and the judgment, sen-e or decree of the said highest court of law or equity, in the ase aforesaid, shall be final and conclusive between the parties, and may be plead in bar to any subsequent suit or action brought in the same or any other court, for the recov-of the same land or any part thereof.

EC. 4. And be it further enacted, That Abraham Ellis, be and s hereby confirmed in a tract of land granted by the British gov-nent of West Florida to Stephen Jordan, containing the quan-of two hundred acres, lying and being on the waters of Boyd's k, according to the metes and bounds of said tract of land set in the plat thereof made by the surveyor-general of said prov-of West Florida; and that the amount of money which the Ellis may have been compelled to pay to the receiver of public ies west of Pearl river, in the Mississippi territory, for said of land, be refunded to him by the receiver aforesaid.

SEC. 5. And be it further enacted, That Daniel Harregal be and he is hereby confirmed in his title in fee simple to the tract of land whereon he resides, containing the quantity of five hundred and fifty acres, agreeably to a plat thereof filed with the register of the land-office, west of Pearl river, in the Mississippi territory. Approved, February 28, 1809.

Sections 1 and 2 of Chapter 100, Vol. 3, United States Statutes at Large.

Chap. C.—An Act for Adjusting the Claims to Land and Establishing Land Offices in the Districts East of the Island of New Orleans (*a*).

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That all the claims to land, founded on complete grants from the Spanish government, reported to the Secretary of the Treasury, by the commissioners from the districts east and west of Pearl river, appointed under the authority of an act, entitled, "An act for ascertaining the titles and claims to lands in that part of Louisiana which lies east of the River Mississippi and island of New Orleans," which are contained in the several reports of the commissioners, and which are, in the opinion of the commissioners, valid, agreeably to the laws, usages, and customs, of the said government, be, and the same are hereby, recognized as valid and complete titles against any claim on the part of the United States, or right derived from the United States: And that all claims founded on British grants, contained in the said reports, which have been sold and conveyed, according to the provisions of the treaty of peace, between Great Britain and Spain, of the third of September, one thousand seven hundred and eighty-three, by which that part of Louisiana, lying east of the island of Orleans, was ceded to Spain, under the denomination of West Florida, or which were settled and cultivated by the person having the legal title therein, at the date of said treaty, are recognized as valid and complete titles, against any claim on the part of the United States, or right derived from the United States.

SEC. 2. And be it further enacted, That all claims reported as aforesaid, and contained in the several reports of the said commissioners, founded on any order of survey, requette, permission to settle, or any written evidence of claim, derived from the Spanish au-

rities, which ought, in the opinion of the commissioners, to be firmed, and which by the said reports appear to be derived from Spanish government, before the twentieth day of December, one usand eight hundred and three, and the land claimed to have n cultivated and inhabited, on or before that day, shall be con-ed in the same manner as if the title had been completed: Pro-d, That in all such claims, where the plat and certificate of sur-, made prior to the fifteenth day of April, one thousand eight dred and thirteen, under the authority of the Spanish govern-t, in pursuance of such claim, has not been filed with the said missioners, such claim shall not be confirmed to any person for e than twelve hundred and eighty acres; and that for all the r claims to land comprised in the reports aforesaid, and which ht, in the opinion of the commissioners, to be confirmed; the mant to such lands shall be entitled to a grant therefor as a do-on: Provided, That such grant, as a donation, shall not be made ny one person for more than twelve hundred and eighty acres; ch confirmation of the said incomplete titles and grants of dona-s, hereby provided to be made, shall amount only to a relin-hment forever, on the part of the United States, of any claim tever to the tract of land so confirmed or granted:

nd provided, also, That no such claim shall be confirmed to any on to whom the title to any tract of land shall have been recog-d under the preceding provisions.

2040 MISS. DOCUMENT NO. 6.

An act to enable the President of the United States, under certain contingencies, to take possession of the country lying east of the River Perdido and south of the State of Georgia and the Mississippi Territory, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That the President of the United States, be and he is hereby, authorized to take possession of, and occupy, all or any part of the territory lying east of the River Perdido, and south of the State of Georgia and the Mississippi Territory, in case an arrangement has been, or shall be, made with the local authority of the said Territory, for delivering up the possession of the same, or any part thereof, to the United States, or in the event of an attempt to occupy the said Territory, or any part thereof, by any foreign government; and he may, for the purpose of taking possession, and occupying the Territory aforesaid, and in order to maintain therein the authority of the United States, employ any part of the Army and Navy of the United States which he may deem necessary.

SEC. 2. And be it further enacted, That one hundred thousand dollars be appropriated for defraying such expenses as the President may deem necessary for obtaining possession as aforesaid, and the security of the said territory, to be applied under the direction of the President, out of any moneys in the Treasury not otherwise appropriated.

SEC. 3. And be it further enacted, That in case possession of the Territory aforesaid shall be obtained by the United States, as aforesaid, that until other provision be made by Congress, the President be, and he is hereby authorized to establish, within the Territory aforesaid, a temporary government, and the military, civil and judicial, powers thereof shall be vested in such person and persons, and be exercised in such manner as he may direct, for the protection and maintenance of the inhabitants of the said Territory in the full enjoyment of their liberty, property, and religion. Approved January 15, 1811.

1 MISS. DOCUMENT NO. 7.

olution of the Congress of the United States, Approved January 5, 1811, Relative to the Occupation of the Floridas by the United tates of America.

Resolution.

aking into view the peculiar situation of Spain, and of her Ameri- provinces; and considering the influence which the destiny of territory adjoining the southern border of the United States may e upon their security, tranquil-ity, and commerce:

herefore, resolved by the Senate and House of Representatives he United States of America, in Congress assembled, That the ted States, under the peculiar circumstances of the existing crisis, ot without serious inquietude, see any part of the said territory, into the hands of any foreign power; and that a due regard to r own safety compels them to provide, under certain contingen-, for the temporary occupation of the said territory; they at the e time, declare that the said territory shall, in their hands, remain ject to future negotiation.

2048 MISS. DOCUMENT NO. 14.

Copy of One of the Spanish Grants Annulled by the Treaty Between the United States and Spain of February, 1819.

Don Antonio Porcel, Knight Pensioner of the Royal and Distinguished Order of Charles 3rd, of the Council of State, and Secretary of State of Dispatch of the Ultramarine Government, &c.

I certify that, under date of the sixth of February, one thousand eight hundred and eighteen, royal letters patent of the same tenor were sent by the late council of the Indies to the governor captain

general of the island of Cuba and its dependencies, to the intendent of the army and royal business of the Havana and its district, and to the governor of the Floridas, that each should do his utmost in his particular department to give effect to the grant made to Brigadier the Count Punonrostro, of various lands situated in West Florida, of the following tenor:

The King.

My governor and captain general of the island of Cuba and its dependencies: The Brigadier Count of Punonrostro submitted to me, on the third of November last what follows: "Sire: The Brigadier Count of Punonrostro, grandee of Spain of the first class, and your gentleman of the bed chamber in actual attendance, &c., &c., throws himself at Your Majesty's royal feet with the most profound respect, and submits to Your Majesty: That, prompted by the desire of promoting, by all possible means, the improvement of the extensive waste and unsettled lands possessed by Your Majesty in the America, which, by their fertility, offer the greatest advantages, not only to your memorialist, but to the State, provided due effect, as is hoped, be given to the noble project formed by Your Majesty's memorialist, of converting a small portion of those deserts into the abode of peaceable Christians and industrious inhabitants, who will increase the population of your kingdoms, promote agriculture and commerce, and thereby add immensely to your royal revenues. This enterprise should be conducted by a person who, with a knowledge of the country, would combine the intelligence necessary for comparing the progress made by other nations in similar situations, and particularly by the United States, which, within a very recent period, have advanced their power to an extraordinary height, and especially in the instance of the Mobile country, adjoining Florida, which, in the last six years, has received such an influx of emigrants, as to be converted from a desert waste into a rich commercial province, highly improved and peopled with more than three hundred thousand souls. A similar change would be effected in Florida within eighteen or twenty years, by the adoption of judicious arrangements, and by those exertions which Your Majesty's memorialist proposes to employ for the promotion of his personal interest, and consequently that of the State. Relying on the merits of the case, and the lively interest felt by Your Majesty in the national prosperity, and in the services and sacrifices of Your Majesty's memorialist, he humbly requests Your Majesty that, taking them into consideration, you would be graciously pleased to grant and cede to him, in full right and property, and the mode and manner required by law, all the waste lands, not heretofore ceded in Florida, lying between the River Periddo, westward of the gulf of Mexico, and the Rivers Amaruja and Saint Johns, from Popa to the point where it empties into the ocean, for the eastern limit; and, for the northern, the boundary line of the United States; and, to the south, by the

alf of Mexico, including the desert islands on the coast. He therere humbly prays, in consideration of the premises, and the unquestionable advantages to be derived by the nation, Your 949 Majesty will be pleased to grant this his petition; and, thereupon, direct the necessary orders to be given to the local aucorities to afford him all due aid and protection, as well in designating the territory referred to, as in giving full effect to the whole nterprise. All which he hopes from the munificence of Your ajesty."

Having taken the premises into consideration, and bearing in ind the distinguished merits of the memorialist, and his signal al for my royal services, as well as the benefits to be derived by e State from an increase of population in the countries, the cession hereof he has solicited, I have judged fit to grant him the same, so far as is conformable to the laws of these my kingdoms, and make it known to my council of the Indies, for its due execution, a royal order of the seventeenth of December, in the year aforeentioned; wherefore, I charge and command you, by this, my yal cedula, with due observance of the laws to such cases pertaing, to give full and due effect to the said cession, taking all requie measures for its accomplishment, without injury to any third rty, and, to the end, that the said Count Punonrostro may forthth carry his plans into execution, in conformity with my benefint desires in favor of the agricultural and commerce of the said rritories, which require a population proportionate to the fertility the soil, and the defence and security of the coasts, he giving gular accounts of his proceedings, for such is my will; and that e note be taken of the present cedula in the office of the acuntant general of the Indies. Dated at the palace, the sixth of bruary, one thousand eight hundred and eighteen.

I, THE KING.

By command of the king our lord:

ESTEVAN VAREA.

And I confirm this exemplification, at Madrid, the fifteenth of tober, one thousand eight hundred and twenty.

(Signed) ANTONIO PORCEL.

52 MISS. DOCUMENT No. 17.

FOSTER AND ELAM
vs.
DAVID NEILSON.

2nd. Peters, United States Report, Beginning at Page 300.

53 FOSTER AND ELAM
vs.
DAVID NEILSON.

2nd. Peters, United States Report, Beginning at Page 300.

This case presents this very intricate, and at one time very intering question: To whom did the country between Iberville and Perdido rightfully belong, when the title now asserted by the intiffs was acquired.

This question has been repeatedly discussed with great talent and research, by the Government of the United States and that of Spain. The United States have perseveringly and earnestly insisted, that by the treaty of St. Ildefonso, made on the 1st of October in the year 1800, Spain ceded the disputed territory as part of Louisiana to France; and that France, by the treaty of Paris, signed on the 30th of April 1803, and ratified on the 21st of October in the same year, ceded it to the United States. Spain has with equal perseverance and earnestness maintained, that her cession to France comprehended that territory only which was at that time denominated Louisiana, consisting of the island of New Orleans, and the country she received from France west of the Mississippi.

Without tracing the title of France to its origin, we may state with confidence that at the commencement of the war of 1756, she was the undisputed possessor of the province of Louisiana, lying on both sides the Mississippi, and extending eastward beyond the bay of Mobile. Spain was at the same time in possession of Florida; and it is understood that the River Perdido separated the two provinces from each other.

Such was the state of possession and title at the treaty of Paris, concluded between Great Britain, France and Spain, on the 10th day of February 1763. By that treaty France ceded to Great Britain the river and port of Mobile, and all her possessions on the left side of the River Mississippi, except the town of New Orleans and the island on which it is situated; and by the same treaty Spain ceded Florida to Great Britain. The residue of Louisiana was ceded by France to Spain, in a separate and secret treaty between those two powers. The King of Great Britain being thus the acknowledged sovereign of the whole country east of the Mississippi, except the island of New Orleans, divided his late acquisition in the south into two provinces, East and West Florida. The latter comprehended so much of the country ceded by France as lay south of the 31st degree of north latitude, and a part of that ceded by Spain.

By the treaty of peace between Great Britain and Spain, signed at Versailles on the 3d of September 1783, Great Britain ceded East and West Florida to Spain. And those provinces continued to be known and governed by those names, as long as they remained in the possession and under the dominion of His Catholic Majesty.

On the 1st of October in the year 1800, a secret treaty was concluded between France and Spain at St. Ildefonso, the third article of which is in these words: "His Catholic Majesty promises and engages on his part to retrocede to the French Republic, six months after the full and entire execution of the conditions and stipulations relative to His Royal Highness the Duke of Parma, the colony or province of Louisiana, with the same extent that it now has in the hands of Spain, and that it had when France possessed it, and such as it should be after the treaties subsequently entered into between Spain and the other States."

The treaty of the 30th of April 1803, by which the United States

quired Louisiana, after reciting this article, proceeds to state that
he first consul of the French Republic doth hereby cede to the
United States, in the name of the French Republic, forever and
64 in full sovereignty, the said territory with all its rights and
appurtenances as fully and in the same manner as they have
en acquired by the French Republic, in virtue of the above men-
ned treaty concluded with His Catholic Majesty." The 4th article
pulates that "there shall be sent by the government of France a
mmissary to Louisiana, to the end that he do every act necessary,
well to receive from the officers of His Catholic Majesty the said
untry, and its dependencies, in the name of the French Republic,
it has not been already done, as to transmit it in the name of the
ench Republic to the commissary or agent of the United States."
On the 30th of November 1803, Peter Clement Laussatt, colonial
fect and commissioner of the French Republic, authorized, by full
wers dated the 6th, of June 1803, to receive the surrender of the
ovince of Louisiana, presented those powers to Don Manuel Sal-
lo, governor of Louisiana and West Florida, and to the Marquis
Casa Calvo, commissioners on the part of Spain, together with full
wers to them from His Catholic Majesty to make the surrender.
These full powers were dated at Barcelona the 15th of October
02. The act of surrender declares that in virtue of these full
wers, the Spanish commissioners, Don Manuel Salcedo and the
rquis de Casa Calvo, "put from this moment the said French
mmissioner, the citizen Laussatt, in possession of the colony of
uisiana and of its dependencies, as also of the town and island of
w Orleans, in the same extent that it now has, that it had in the
nds of France when she ceded it to my royal crown, and such as
ught to be after the treaties which have successively taken place
ween my States and those of other powers."
Previous to the arrival of the French commissioner, the governor
the provinces of Louisiana and West Florida, and the Marquis de
a Calvo, had issued their proclamation, dated the 18th of May
03; in which they say, "His Majesty having before his eyes the
igations imposed by the treaties, and desirous of avoiding any
putes that might arise, has designed to resolve that the delivery
the colony and island New Orleans, which is to be made to the
neral of division Victor, or such other officer as may be legally
thorised by the government of the French Republic, shall be ex-
ted on the same terms that France ceded it to His Majesty; in
ue of which, the limits of both shores of the River St. Louis of
sissippi, shall remain as they were irrevocably fixed by the 7th
cle of the definitive treaty of peace, concluded at Paris the 10th of
ruary 1763, according to which the settlements from the River
shac or Iberville, to the line which separates the American ter-
ry from the dominions of the king, remain in possession of Spain
annexed to West Florida."
On the 21st of October 1803, Congress passed an act to enable the
sident to take possession of the territory ceded by France to the

United States: in pursuance of which commissioners were appointed to whom Monsieur Laussatt, the commissioner of the French Republic, surrendered New Orleans and the province of Louisiana on the 20th, of December 1803.

The surrender was made in general terms; but no actual possession was taken of the territory lying east of New Orleans.

The Government of the United States, however, soon manifested the opinion that the whole country originally held by France, and belonging to Spain when the treaty of St. Ildefonso was concluded, was by that treaty retroceded to France.

On the 24th of February 1804, Congress passed an act for laying and collecting duties within the ceded territories, which authorised the President, whenever he should deem it expedient, to erect the shores &c. of the bay and river Mobile, and of the other rivers, creeks &c. emptying into the gulph of Mexico east of the said River
2055 Mobile, and west thereof to the Pascagoula inclusive, into a separate district, and to establish a port of entry and delivery therein. The port established in pursuance of this act was at Fort Stoddert, within the acknowledged jurisdiction of the United States; and this circumstance appears to have been offered as a sufficient answer to the subsequent remonstrances of Spain against the measure. It must be considered, not as acting on the territory, but as indicating the American exposition of the treaty, and exhibiting the claim its Government intended to assert.

In the same session, on the 26th of March 1804, Congress passed an act creating Louisiana into two territories. This declares that the country ceded by France to the United States south of the Mississippi territory, and south of an east and west line, to commence on the Mississippi river at the 33d degree of north latitude and run west to the western boundary of the cession, shall constitute a Territory under the name of the Territory of Orleans. Now the Mississippi territory extended to the 31st degree of north latitude and the country south of that territory was necessarily the country which Spain held as West Florida; but still its constituting a part of the Territory of Orleans depends on the fact that it was a part of the country ceded by France to the United States. No practical application of the laws of the United States to this part of the territory was attempted, nor could be made, while the country remained in the actual possession of the foreign power.

The 14th section enacts "that all grants to lands within the territory ceded by the French Republic to the United States by the treaty of the 30th of April 1803, the title whereof was at the date of the treaty of St. Ildefonso in the crown, government, or nation of Spain, and every act and proceeding subsequent thereto of whatsoever nature towards the obtaining any grant, title or claim to such land, and under whatsoever authority transacted or pretended, be, and the same are hereby declared to be, and to have been from the beginning, null, void, and of no effect in law or equity." A proviso excepts the titles of actual settlers acquired before the 20th of

December 1803, from the operation of this section it was obviously intended to act on all grants made by Spain after her retrocession of Louisiana to France, and without deciding on the extent of that retrocession to put the titles which might be thus acquired through the whole territory, whatever might be the extent, completely under the control of the American Government.

The President was authorised to appoint registers or recorders of lands acquired under the Spanish and French government, and boards of commissioners who should receive all claims for lands, and hear and determine in a summary way all matters respecting such claims. Their proceedings were to be recorded to the Secretary of the Treasury, to be laid before Congress for the final decision of that body.

Previous to the acquisition of Louisiana, the ministers of the United States had been instructed to endeavor to obtain the Floridas from Spain. After that acquisition, this object was still persued, and the friendly aid of the French government towards this attainment was requested. On the suggestion of Mr. Talle-rand that the time was unfavorable, the design was suspended. The Government of the United States however soon resumed its purpose; and the settlement of the boundaries of Louisiana was blended with the purchase of the Floridas and the adjustment of heavy claims made by the United States for American property, condemned in the courts of Spain during the war which was terminated by the treaty of Amiens.

On his way to Madrid Mr. Monroe, who was empowered in
396 conjunction with Mr. Pinckney, the American minister at the court of His Catholic Majesty to conduct the negotiations passed through Paris; and addressed a letter to the minister of exterior relations, in which he detailed the objects of his mission, and his views respecting the boundaries of Louisiana. In his answer to this letter, dated the 21st of December 1804, Mr. Talle-rand declared, in decided terms, that by the treaty of St. Ildefonso, Spain retroceded to France no part of the territory east of the Iberville which had been held and known as West Florida; and that in all the negotiations between the two governments, Spain had constantly refused to cede any part of the Floridas, even from the Mississippi to the Mobile. He added that he was authorized by His Imperial Majesty to say, that at the beginning of the year 1802, General Bournonville had been charged to open a new negotiation with Spain for the acquisition of the Floridas; but his project had not been followed by a treaty.

Had France and Spain agreed upon the boundary of the retroceded territory before Louisiana was acquired by the United States, the agreement would undoubtedly have ascertained its limits. But the declarations of France made after parting with the province can not be admitted as conclusive.

In questions of this character, political considerations have too much influence over the conduct of nations, to permit their declara-

tions to decide the course of an independent government in a matter vitally interesting to itself.

Soon after the arrival of Mr. Monroe at his place of designation the negotiations commenced at Aranjuez. Every word in that article of the treaty of St. Idlefonso which ceded Louisiana to France, was scanned by the ministers on both sides with all the critical acumen which talents and zeal could bring into their service. Every argument drawn from collateral circumstances, connected with the subject, which could be supposed to elucidate it, was exhausted. No advance towards an arrangement was made, and the negotiation terminated, leaving each party firm in his original opinion and purpose. Each persevered in maintaining the construction with which he had commenced. The discussion has since been resumed between the two nations with as much ability and with as little success. The question has been again argued at this bar, with the same talent and research which it has uniformly called forth. Every topic which relates to it has been completely exhausted; and the court by reasoning on the subject could only repeat what is familiar to all.

We shall say only, that the language of the article may admit of either construction, and it is scarcely possible to consider the arguments on either side, without believing that they proceed from a conviction of their truth. The phrase on which the controversy mainly depends, that Spain retrocedes Louisiana with the same extent that it had when France possessed it, might so readily have been expressed in plain language, that it is difficult to resist the persuasion that the ambiguity was intentional. Had Louisiana been retroceded with the same extent that it had when France ceded it to Spain, or with the same extent that it had before the cession of any part of it to England, no controversy respecting its limits could have arisen. Had the parties concurred in their intention, a plain mode of expressing that intention would have presented itself to them. But Spain has always manifested infinite repugnance to the surrender of territory, and was probably unwilling to give back more than she had received. The introduction of ambiguous phrases into the treaty, which power might afterwards construe according to circumstances, was a measure which the strong and politic might not be disinclined to employ.

2057 However this may be, it is, we think, incontestably, the American construction of the article, if not entirely free from question, is supported by arguments of great strength which can not be easily confuted.

In a controversy between two nations concerning national boundary, it is scarcely possible that the courts of either should refuse to abide by the measures adopted by its own government. There being no common tribunal to decide between them, each determines for itself on its own rights, and if they cannot adjust their differences peaceably the right remains with the strongest. The judiciary is not that department of the government, to which the assertion of its interests against foreign powers is confided; and its duty commonly

o decide upon individual rights, according to those principles
ch the political departments of nations have established. If the
rse of the nation has been a plain one, its courts would hesitate
ronounce it erroneous.

Ve think then, however individual judges might construe the
ty of St. Idelfonso, it is the province of the court to conform its
sions to the will of the legislature, if that will has been clearly
ressed.

he convulsed state of European Spain affected her influence over
colonies; and a degree of disorder prevailed in the Floridas, at
ch the United States could not look with indifference. In Octo-
1810, the President issued his proclamation, directing the gov-
or of the Orleans territory to take possession of the country as far
as the Perdido, and to hold it for the United States. This
sure was avowedly intended as an assertion of the title of the
ted States; but as an assertion, which was rendered necessary in
r to avoid evil which might contravene the wishes of both par-
, and which would still leave the territory "a subject of fair and
ndly negotiation and adjustment."

n April 1812, Congress passed "An act to enlarge the limits of the
te of Louisiana." This act describes lines which comprehend the
l in controversy, and declares that the country included within
m shall become and form a part of the State of Louisiana.

n May of the same year another act was passed, annexing the
due of the country west of the Perdido to the Mississippi terri-
y.

nd in February 1813, the President was authorized to occupy
hold all that tract of country called West Florida, which lies
t of the River Perdido, not now in possession of the United States.

n the third of March 1817, Congress erected that part of Florida
ich had been annexed to the Mississippi territory, into a separate
itory, called Alabama.

he powers of government were extended to, and exercised in
se parts of West Florida which composed a part of Louisiana and
sissippi, respectively; and a separate government was erected in
bama. U. S. L. c. 4, 409.

n March 1819, "Congress passed an act to enable the people of
bama to form a constitution and State government." And in
cember 1819, she was admitted into the Union, and declared one
he United States of America. The treaty of amity, settlement
l limits, between the United States and Spain, was signed at
shington on the 22nd day of February 1819, but it was not rati-
l by Spain till the 24th day of October 1820; nor by the United
tes until the 22d day of February 1821. So that Alabama was
nitted into the Union as an independent State, in virtue of the
e acquired by the United States to her territory under the treaty
April 1803.

After these acts of sovereign power over the territory in
8 dispute, asserting the American construction of the treaty by
which the government claims it, to maintain the opposite

construction in its own courts would certainly be an anomaly in th history and practice of nations. If those departments which ar entrusted with the foreign intercourse of the nation, which asse and maintain its interests against foreign powers, have unequiv cally asserted its rights of dominion over a country of which it is i possession, and which it claims under a treaty; if the legislatu has acted on the construction thus asserted, it is not in its own cour that this construction is to be denied. A question like this respec ing the boundaries of nations, is, as has been truly said, more political than a legal question; and in its discussion, the courts every country must respect the pronounced will of the legislatur Had this suit been instituted immediately after the passage of th act for extending the bounds of Louisiana, could the Spanish co struction of the treaty of St. Ildefonso have been maintained Could the plaintiff have insisted that the land did not lie in Louis ana, but in West Florida; that the occupation of the country by th United States was wrongful; and that his title under a Spanis grant must prevail, because the acts of Congress on the subje were founded on a misconstruction of the treaty? If it be sai that this statement does not present the question fairly, because plaintiff admits the authority of the court, let the parties be change If the Spanish grantee had obtained possession so as to be the d fendant, would a court of the United States maintain his title und a Spanish grant, made subsequent to the acquisition of Louisian singly on the principle that the Spanish construction of the treat of St. Ildefonso was right, and the American construction wrong Such a decision would, we think, have subverted those principl which govern the relations between the legislative and judicial d partments, and mark the limits of each.

2078 The State of Mississippi to the sheriff or any constable of Harrison county:

You are required immediately to summon six good and lawful men of said county to appear before me L. B. Holly a justice of the peace, dist. No. 1, of said county and *ex-officio* coroner of said county at grave yard in the town of Biloxi in said county on the 31st day of October 1886 at the hour of 7 o'clock p. m. then and there to inquire on behalf of the State touching the death of John Kennedy, and be you then and there.

Given under my hand at Biloxi in the said county the 31st day of October A. D. 1886.

L. B. HOLLY,
J. P. and *Ex-officio* Coroner.

Capt. Bayley.
B. R. Clemens.
Mun. Jones.
H. Schnapps.
John Henley.
C. M. Golden.

The State of Mississippi to any lawful officer of Harrison county:

This is to command you to summon Andro Sandro, Simeon Chesterich, Alphonso Fayard, Henry Collier, to appear before the coroner's jury on Nov. 1st 1886 at six o'clock p. m. to testify as witnesses on behalf of the State, as to the cause of the death of John G. Kennedy found dead, and have then and there this writ.

Witness my hand this 1st day of Nov. 1886.

L. B. HOLLY,
J. P., *Ex-officio* Coroner.

Received this writ this 1st day of Nov. 1886 within process executed same day by summoning the within named witnesses.

F. SEAL, Sh'ff,
Per THOMAS BACHNED, Dept. Sh'ff.

The State of Mississippi to any lawful officer of Harrison county:

This is to command you to forthwith summons some surgeon or physician to immediately appear before the coroner's jury now at the Biloxi graveyard to examine the dead body of —— Kennedy found drowned and have then there this writ.

Witness my hand this 31st day of October 1886.

L. B. HOLLY,
J. P., *Ex-officio* Coroner.

Received this writ this 31st day of Oct. 1886, within process duly executed by summoning Dr. Chas. Pelaez according to command of within writ.

F. SEAL, Sh'ff,
Per THOMAS BACHNED, D. S.

2079 BILOXI, MISS., Nov. 1st, 1886.

This is to certify that at the inquest and post mortem examination held on the body of one John Kennedy on the 31st day of October 1886 the following facts were ascertained.

The body having been in the water for several days, then buried and afterwards exhumed was in a fearful state of decomposition and

kin completely disorganized—after due and diligent search but wounds could be discovered, one on the arm and the other on forearm of the left side, as well as a lacerated wound on the left supposed to have been produced by dragging the body by who found him, of an incised character. Owing to the condi- of the body as aforesaid I am unable to determine whether said ds were inflicted by the bite of a fish or the cut produced by shells of the use of a sharp cutting instrument. I also dis- ed that the humerus of the left side was splintered but not ured.

e flesh was firm and exhibited a clean cut.

ere was no wound about the head or face to be observed owing swollen condition of his face and head.

CHARLES PELAES, M. D.

STATE OF MISSISSIPPI, }
Harrison County. }

mony Taken before Jury of Inquest on Body of John Kennedy Found Dead.

FONSE FAYARD, sworn:

ent out to look for the body with Louis Conewas and the two ers of the deceased.

Wednesday morning 27th of October we went to the South at Cat island where they said he was drowned. Ves Homes to us & told us the body was found in Creole gap & buried. ere 8 miles from where the body was buried. He was buried morning, we got there about three o'clock in the evening, we got to where he was buried a man whose name I do not came to us at the body, the first thing that I saw was his hand, his right hand, there was no shirt on his breast, where the men the body there was no shells or brush only marsh grass and one of the boatmen ask us if we wanted any assistance we gave isfaction. One man from the schooner Grace Ellena came with a quilt for us to -rap the body, we had it recovered and go and get a box as soon as the weather would permit. The drug the body above high water mark, it seemed to me that o brothers took it very hard at the grave, the three brothers on a schooner in the oyster trade. They told me that he fell oard between three and four o'clock in the morning, they were road to the marsh to get a load of oysters.

y said that he was sounding outside of south side of Cant about three miles south of sand spit of Cat island. John dy the deceased bought the boat from Joe Kennedy, his er.

his
ALFONSE FAYARD.
mark.

2080 Dr. Pelaez, sworn:

The flesh around the cut, on the forearm, flesh was firm. The bone on the forearm was shivered the cut was to the bone, the wound was perfectly smoothe. I presume if the cut was made by the oysters through the motion of the water there would have been more cuts. The wound on his arm would certainly caused death the artery was severed.

CHARLES PELAEZ, M. D.

Andro Sandro, sworn, says:

The man who first found the body I do not know his name, but his nick name Matriculo. The body was found west mouth of Creole gap. The tide brought in the body lay in the water face up the man *a*came to me and said it was a woman. The man put a rope around his neck and took him alongside the marsh & called all the men, then all hands hauled him ashore with the rope around his body we took a small knife and cut the shirt on his arm & breast to look for marks to identify the body. The shirt on the breast was torn, we found his forearm cut, in raising his arm we found a cut on his arm, the cuts looked as if done with a hatchet, we all thought the man was foully dealt. When we buried the body we put straw under and over the body a plank on each side. Captain of Mobile boat gave me the report to bring to Biloxi. We dragged the body to about 100 ft. above the highwater mark, there was nothing but grass and mud between the water & the place we buried body nothing that would make those cuts.

his
ANDRO SANDRO.
mark.

Simeon Christovich, sworn, says:

I was tonging oysters we saw something while in the water. I called my partner's attention to we had no skiffs to go to it but the tide drifted it towards us. After the thing came near the first boat the captain of the schooner Velocity Capt. Matricole he went to it in a boat and hollowed it was a women, he came to us took me & my partner and went to the body. Matricole said we must put the body and bring we towed the body to the mark with a rope around his neck. Matriculo went to all of the boats to get the men. They all came we took the body ashore and examined it we cut the sleeve of the shirt with a small pocket knife to find mark by which to identify the body as all sailors have mark we found no mark, but we found a cut on the arm & one on forearm. The cuts were deep the cuts looked as if cut with a sharp instrument and by a heavy blow, it does not look as if done by fish or oyster shell he had two cuts on his forehead they bled. The captain of the Mobile boat gave us the certificate to bring to the office in Biloxi, after we buried the body we put a high cross over the grave. The body I saw in the Biloxi grave yard is the idencical body we buried at Creole gap. The breast was bare.

SIMEON CHRISTOVICH.

2061 HENRY COLLIER, sworn, says:—

I met Mr. A. Kennedy & Mr. Castaned, they asked me if I would go out with John Sherer after the body of their brother John Kennedy, we took a boat belonging to the brothers and went out. John Caillaret, John Scherer Louis Coueras; C. F. Coueras, Joe Kennedy and myself that went in the boat. We took the lamp to look for the body, we found the grave at Creole gap with a small cross at the head *the* about 5 or 6 feet high, we could designate as a grave by the cross, we found the grave about 10 or 11 o'clock Friday night, we in digging up the body the first thing I saw was his hand, I did not recognize the body. We went prepared to dig up the body and bring it to Biloxi for burial, No one examined the body. The body was bare. I was so excited I did not notice the body, Joe Kennedy took it hard at the grave. All these brothers were on a boat together.

his
HENRY COLLIER.
mark.

JOE KENNEDY, sworn, says.

That the body at the Biloxi grave yard was that of my brother John C. Kennedy. We left to go for oysters Biloxi, saw a norther gathering we came back to main land about 1 o'clock the deceased called us, we got up make sail we cross over the spit near the bouy at Cat island, after we got our bearing he commenced sounding for oysters, our pole was 11 feet long. I was steering when he fell overboard, my other brother was asleep in the cabin. John hollered only once when he fell over board when I brought the schooner up with *with* an anchor. I put the skiff over *boat*, the boat hardly touched the water before Louis L. Kennedy was in it looking for him, there was about 11 feet of water where he fell over board, we were three brothers on the boat, when I found he was gone I waited until morning then came home, we were about three miles from Cat land, it was outside the spit in Cat Island pass, after we reported his death we returned to look for him. Ves Homes informed us that the body was found, we dug to the body, I saw his hand and was satisfied it was my brother we returned home for a box, I saw him when John Scherer and the party who went for his body dug up.

JOS. C. KENNEDY.

LOUIS L. KENNEDY, sworn, says:—

We left Biloxi about 11 o'clock — m. on Monday to get a load of oysters, being a stranger to these parts do not know the name of the place we started to. John waked us up we got under *weigh*. I went below and went to sleep when Joe called John overboard, we unched the skiff before Joe rounded the schooner up. I got in skiff and went back to look for John to the place where I thought John was. By this time the schooner had got out of sight. I found

the schooner by Joe's blowing the horn. After the body was
2082 found and buried we went to the grave dug to the hands and breast. I recognized it to be my brother by the description given by the men who found the body, but at the Biloxi grave yard I recognized the body to be that of my brother John.

LOUIS L. KENNEDY.

BILOXI, Oct. 31st, 1886.

To L. B. Holly, J. P. & *ex-officio* coroner:

We the undersigned jurors duly sujmoned, empaneled and sworn to diligently inquire into the cause of the death of John Kennedy would request that you cause to be summoned some surgeon or physician to appear before this jury as a witness upon the taking of such inquest.

Respectfully,

J. W. HENLEY.

2085 MISS. DOCUMENT No. 25*a*.

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the March Term, A. D. 1882.

THE STATE OF MISSISSIPPI,
Harrison County.

A term of the board of supervisors of said county, required by law, begun and was held at the court house of said county, in the town of Mississippi City, on the first Monday of March A. D. 1882,

being the 6th day of said month, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board, F. B. Hiern, president, Jno. E. Morrison, T. J. Stewart, A. J. Bond, and Henry Williams, members; Thos. Bond, sheriff of said county, and F. S. Hewes, clerk of said board.

"Ordered by the board of supervisors of Harrison county Missis-" "sippi:—

"1st. That all oysters caught or taken from the public oyster" "banks or reefs, within the limits of this county, shall be culled" "on the banks or reefs, where taken, and that they be so culled as" "to scatter the cullings."

"2nd. That the catching or taking of oysters from said public" "banks or reefs, from the 1st day of May until the first day of Sep-" "tember, of each year, be and is hereby prohibited except for local" "consumption in this county."

"3rd. That it shall be unlawful for any person, company, or cor-" "poration, to convey or carry out of the limits of this county any" "oysters taken during the time prohibited in section 2 of this order."

"4th. That any person or persons violating the provisions of the" "1st section of this order shall be fined in the sum of $10.00, and" "for a violation of the second section, shall be fined in the sum of" "$20.00 and for a violation of the provisions of section 3, the fine" "shall be $25.00. Said fines to be recovered before any court of" "competent jurisdiction. One half of such fines, when collected," "to be paid to the informer and the other half to — paid into the" "county treasury for the benefit of the free public schools of this" "county."

"Done this the 7th day of March, 1882."

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the November Term, A. D. 1892.

THE STATE OF MISSISSIPPI, }
Harrison County. }

A regular term of the board of supervisors of said county of Harrison, begun and was held, in and for said county, at the court house thereof, in Mississippi City in said county and State, on the 1st Monday of November A. D. 1892, being the 7th day of said month, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board A. J. Bond, president, Phil McCabe, T. J. Stewart, John Scarborough & R. W. Hatten, members, F. Seal, sheriff of said county, and F. S. Hewes, clerk of said board.

"An Ordinance for the Protection and Preservation of the Public "
"Oyster Reefs of Mississippi Lying within the Borders of Har- "
"rison County and to Create a Revenue to Enforce the Same."

"SECTION 1. It shall be unlawful for any person or persons to "
ship or carry beyond the limits of the State of Mississippi, by "
any boat or water-craft any oysters taken from any public reef "
in the waters of Harrison county, in said State, while the same "
are in the shell, or to take or catch any oysters from any public "
reef in said county to be so shipped or carried beyond the limits "
of the said State."

"SECTION 2. It shall be unlawful to take from any public reef
"in the waters of said county any oyster, the shells of which are
"less than two and one half inches in length, except for planting
"purposes, and all oysters taken for any other purpose shall be
"culled so that there will not be more than four oysters in any one
"bunch, and they shall be culled free from all dead and empty
"shells and young and unmarketable oysters, which shall be left
"on the reefs where they are taken; provided that such young and
"unmarketable oysters may be removed or disposed of for plant-
"ing purposes within the tide-water of the State of Mississippi."

"SEC. 3. No person shall catch oysters on any public reef in the
"waters of said county, without first procuring from the clerk of
"the circuit court of said county a license for each boat to be used
"by him in catching and transporting oysters, which license shall
"expire one year after date; and in his application for such license
"he shall give the capacity of his boat, or boats and their names;
"all boats shall pay the sum of fifty cents per ton burden for such
"license, and shall pay to the clerk fifty cents for each and every
"license so issued; provided that no boat or vessel under one ton
"measurement shall be subject to the provisions of this section;
"provided, further, that no boats licensed by the board of super-
"visors of Hancock and Jackson counties shall not be required to
"pay an additional license in this county."

"SEC. 4. The clerk shall keep a record of all licenses so issued,
"and shall correctly number the same, and the person to whom
"such license is issued shall cause such number and the word
"'licensed' to be painted in red letters not less than four inches in
"size in some conspicuous place on the boat for which such license
"is issued. The said clerk shall receive all money arising from
"said licenses and shall pay the same to the county treasurer, and
"such money so paid in shall create a fund, which fund shall be
"known and designated as the oyster fund, and shall be
2091 "appropriated by the board of supervisors, in their discre-
"tion, in such manner as will best secure the enforcing of
"this ordinance, and said fund shall be used for no other purpose."

"SEC. 5. The sheriff, oyster inspector, the several constables, and
"all other officers having like powers, within the county of Harri-
"son, shall have the power at any time to go on board of any
"boat or vessel being used in fishing oysters in the waters of said
"county and to demand that the parties in control of such vessel
"exhibit the license of such boat to be used in fishing for oysters
"in said waters; and it shall be unlawful for any person in con-
"trol or on board of such boat or vessel to refuse or fail to exhibit
"such license to any such officer demanding the same for inspec-
"tion; and it shall be the duty of the said sheriff constable and
"other officers, to arrest, with or without process, any person or
"persons violating any of the provisions of this ordinance and to
"take them before any magistrate or justice of the peace, or the
"mayor of any incorporated town or city, in said county, for trial

"and every such magistrate or justice of the peace, or mayor, shall "
"have jurisdiction of all offenses committed in violation of this "
"ordinance."

"Sec. 6 Any person who shall violate any of the provisions of "
"this ordinance shall on conviction be fined not less than ten dol- "
"lars for the first offense, and for the second offense not less than "
"twenty dollars, and be imprisoned in the county jail not less "
"than five days, and all persons so convicted shall stand committed "
"until the fines and costs are paid."

"Sec. 7. When a prosecution under this ordinance shall be com- "
"menced and prosecuted to a conviction upon the information or "
"complaint of any private person, and the officer or judge trying "
"the cause shall so certify on his docket, "then and in that case" "
"such prosecutor shall be entitled to one half of the fine, to be "
"paid to him by the officer collecting the same, upon the order of "
"the magistrate or judge trying the cause; the other half to be "
"paid into the county treasury."

"Sec. 8. That *is* this ordinance take effect and be in force from "
"and after this 7th day of November, 1892, and that all former "
"ordinances of this board on the subject, in conflict with this ordi- "
"nance be and are hereby repealed."

THE STATE OF MISSISSIPPI, }
Harrison County. }

I, F. S. Hewes, clerk of the chancery court of said county and State, and *ex officio* clerk of the board of supervisors of the county of Harrison, said State, do hereby certify that the foregoing contains a true, full, correct and complete transcript of an ordinance passed by the board of supervisors of Harrison county, Mississippi, at their November term A. D. 1892, being the 7th day of November, 1892, as the same appears and remains of record in my office in Minute Book Number Four, pages 222, 223 and 224 of the minutes of the board of supervisors of Harrison county, Mississippi.

Given under my hand and official seal of said chancery court hereto affixed at my office in Gulfport, Miss., this the 23rd day of June, A. D. 1904.

2093 MISS. DOCUMENT NO. 30.

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the December Term, A. D. 1892.

THE STATE OF MISSISSIPPI,
Harrison County.

A regular term of the board of supervisors of said county of Harrison, State aforesaid, begun and was held in and for said county, at the court house thereof, in Mississippi City, in said county and State, on the 1st Monday of December A. D. 1892, being the 5th day of said month, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board, A. J. Bond, president, Phil McCabe, T. J. Stewart, John Scarborough, W. R. Hatten, members, F. Seal, sheriff of said county, and F. S. Hewes, clerk of the chancery court of Harrison county and *ex officio* clerk of said board.

"Ordered by the board that section 3 of an ordinance of this" "board, adopted on the 7th day of November 1892, entitled "An" "ordinance" "for the protection and preservation of the public" "oyster reefs of Mississippi lying within the borders of Harrison" "county, and to create a revenue to enforce the same be and is" "hereby amended as follows, by adding to said section as it now" "appears and after the word "county" in the last line thereof," "the words "provided further that a license, under this ordinance," "shall not hereafter issue to any boat, whose owner is not a citizen" "of the State of Mississippi."

THE STATE OF MISSISSIPPI,
Harrison County.

I, F. S. Hewes, clerk of the chancery court of said county and State, and *ex officio* clerk of the board of supervisors of the county of Harrison, State aforesaid, do hereby certify that the foregoing contains a full, true, correct and complete transcript of an amendment to an ordinance passed by the board of supervisors on the 7th day of November, 1892, entitled "An ordinance for the protection and preservation of the public oyster reefs of Mississippi, lying within the borders of Harrison county, and to create a revenue to enforce the same," as the same appears and remains of record in my office in Minute Book Number Four, pages 228 of the minutes of the board of supervisers of Harrison county, Mississippi.

Given under my hand and official seal of said chancery court hereto affixed at my office in Gulfport, Miss. on this the 23rd day of June, A. D. 1904.

2094 MISS. DOCUMENT No. 31.

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the January Term, A. D. 1893.

THE STATE OF MISSISSIPPI, }
Harrison County. }

A regular term of the board of supervisors of Harrison county, State aforesaid, was begun and held in and for said county, at the court house thereof, in Mississippi City, in said county, and State, on the 1st Monday of January, A. D. 1893, being the 2nd Monday of said month, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board, A. J. Bond, president, Phil McCabe, T. J. Stewart, John Scarborough, and R. W. Hatten, members, F. Seal, sheriff of Harrison county, and F. S. Hewes, clerk of said board.

JANUARY THE 4TH, 1893.

"Ordered that M. Gurovich, Capt. Jack of schooner Gosana, Wm. " Dukate, I. Heidenheim, and F. S. Hewes, chairman, be and are " hereby appointed a committee to draft an oyster ordinance under " chapter 96, Code 1892, to be presented to the board at its next " meeting for consideration."

"Ordered by the board that the issuance of licenses to boats to " catch oysters in the waters of this county be and is hereby sus- " pended until the further order of this board."

"Ordered by the board that the oyster inspector shall be out on " the oyster reefs at least five days in each week."

"Ordered by the board that the board do now adjourn until " next Monday morning at 9 o'clock, being the 9th day of January, " 1893, for the purpose of receiving the report of the committee " appointed to draft an oyster ordinance and to act on same and " to consider the matter of the protection of oysters in the waters " of this county and pass all necessary orders and ordinances on " that subject."

Monday morning, nine o'clock, January the 9th, 1893, the board met pursuant to adjournment: Present, A. J. Bond, president, Phil McCabe, T. J. Stewart, John Scarborough, members, F. Seal, sheriff, and F. S. Hewes, clerk ; absent, R. W. Hatten.

"Ordered by the board that the following ordinance be and is " hereby adopted. (The committee appointed at the last meeting " having reported and suggested the same.) "

"An ordinance for the protection and preservation of the public" "oyster reefs of Mississippi lying within the borders of Harri-" "son county, Mississippi, and to create a revenue to enforce the" "same."

"SECTION 1. It shall be unlawful for any person to take from" "the natural oyster reefs within the waters of this Harrison county," "Mississippi, any oysters between the first day of May, and the" "first day of September, of each year, except by boats owned by" "citizens of the State of Mississippi, for planting purposes and" "domestic use of the inhabitants thereof, and the owners of said" "boats shall present their licenses, hereinafter provided for, to" "the clerk of the circuit court of this county, and have en-" 2095 "dorsed on same the fact of ownership and citizenship, on" "proof thereof made to said clerk."

"SECTION 2. It shall be unlawful to take from any public oys-" "ter reef in the waters of said county of Harrison, any oysters the" "shells of which are less than two and one half inches in length," "except for planting purposes, and all oysters taken for any other" "purpose, shall be culled, so that there will not be more than four" "oysters in any one bunch, and they shall be culled free from all" "dead oysters, empty shells and young and unmarketable oysters," "which shall be left on the reefs where they are taken, provided" "that such young and unmarketable oysters may be removed or" "disposed of for planting purposes, within the tide waters of the" "State of Mississippi."

"SECTION 3. No persons shall catch oysters on any public reef" "in the waters of said county of Harrison without first procuring" "from the clerk of the circuit court of said county, a license for" "each boat to be used by him in catching or transporting oysters," "during the season of each year, to wit:—from the 1st day of Sep-" "tember to 1st day of May, and in his application for such license" "he shall give the capacity of his boat and boats and their names." "All boats shall pay the sum of fifty cents per ton burden for each" "and every license so issued, provided that no boat or vessel under" "one ton measurement shall be subject to the provisions of this" "section; provided further, that boats licensed by the board of" "supervisors of Hancock and Jackson counties shall not be re-" "quired to pay an additional license in this county."

"SECTION 4. The clerk shall keep a record of all licenses so" "issued, and shall correctly number the same, and the person to" "whom such license is issued, shall cause such number and the" "word "licensed" to be painted in red letters, not less than four" "inches in size, in some conspicuous place on the boat, for which" "such license is issued. The said clerk shall receive all moneys" "arising from said licenses, and shall pay the same to the county" "treasurer, and such money so paid in shall create a fund, which" "fund shall be known and designated as the "oyster fund," and"

"shall be appropriated by the board of supervisors in their discre- "
"tion, in such manner as will best secure the enforcing of this ordi- "
"nance, and said fund shall be used for no other purpose."

"SECTION 5. The sheriff, oyster inspector, the several constables, "
"and all other officers having like powers, within the county of "
"Harrison, shall have the power, at any time, to go on board of "
"any boat or vessel, being used in fishing oysters, in the waters of "
"said county, and to demand that the parties in control of such "
"vessel, exhibit the license of such boat, to be used in fishing for "
"oysters in said waters, and it shall be unlawful for any person in "
"control or on board of such boat, or vessel to refuse or fail to ex- "
"hibit such license to any such officer demanding the same for "
"inspection; and it shall be the duty of the said sheriff, constable, "
"and other officers to arrest, with or without process, any person "
"or persons violating any of the provisions of this ordinance, and "
"to take them before any magistrate or justice of the peace, or the "
"mayor of any incorporated town or city, in said county for trial, "
"and every such magistrate, justice of the peace, or mayor, shall "
"have jurisdiction of all offenses committed in violation of this "
"ordinance."

2096 "SECTION 6. Any person who shall violate any of the pro- "
"visions of this ordinance, shall on conviction be fined not "
"less than ten dollars, or more than twenty dollars, for the first "
"offense, and for the second offense, not less than twenty dollars," "
"or more than fifty dollars, and be imprisoned in the county jail "
"not less than five days or more than thirty days, and all persons "
"so convicted shall stand committed until the fines and costs be "
"paid."

"SECTION 7. When a prosecution under this ordinance shall be "
"commenced and prosecuted to a conviction upon the information "
"or complaint of any private person and the officer or judge try- "
"ing the cause, shall so certify on his docket, then and in that case "
"such prosecutor shall be entitled to one half of the fine, to be "
"paid to him by the officer collecting the same, upon the order of "
"the magistrate or judge trying the cause, the other half to be paid "
"into the county treasurey and placed to the credit of said oyster "
"fund."

"SECTION 8. That no corporation, person or association of per- "
"sons, shall take from the public oyster reefs in the waters of this "
"county, more than nine thousand barrels in any one season, and "
"are hereby authorized to take that amount from said reefs."

"SECTION 9. That all ordinances on this subject heretofore made "
"by this board and the amendments thereto be and are hereby re- "
"pealed, provided that all licenses heretofore issued under said "
"ordinances remain in force as issued, subject only to the provis- "
"ions of section one of this ordinance."

"SECTION 10. That this ordinance take effect from and after this "
"9th day of January, A. D. 1893."

"Ordered by the board that the duties of the oyster inspector ap- "

" pointed by this board shall be to see to the enforcement of the "
" oyster ordinance adopted by this board, especially as to the cull- "
" ing of oysters on the reefs, the taking of oysters only by boats "
" having a license from this county or that of Hancock and Jack- "
" son counties, and the taking of oysters for domestic use and plant- "
" ing purposes only, out of season, by citizens of this State. It "
" shall be the duty of such inspector to visit said reefs and be out "
" on same for at least 5 days in the week, and that the compen- "
" sation of such inspector be and is hereby fixed at $90.00 per "
" month including use of boat and crew, and it is further ordered "
" that the expenditures authorized above shall not exceed the re- "
" ceipts provided for in the oyster ordinance."

" Ordered by the board that F. D. Moran be and he is hereby "
" appointed oyster inspector of Harrison county as required by "
" chapter 96, Code 1892, vice L. F. Young, resigned."

THE STATE OF MISSISSIPPI, }
Harrison County. }

I, F. S. Hewes, clerk of the chancery court of said county and State, and *ex officio* clerk of the board of supervisors of Harrison county, Mississippi, do hereby certify that the foregoing contains a full, true, correct and complete transcript of the following orders and ordinances adopted by the board of supervisors of said county at their January meeting 1893 thereof, to wit:—

2097 An order appointing a committee to draft an oyster ordinance, under chapter 96, Code 1892, which order appears in Minute Book 4, page 242, of the minutes of said board; also, an order suspending the issuance of licenses to boats to catch oysters in the waters of this county until the further order of the board, as the same appears in Minute Book Number Four, page 242; also, an order that the oyster inspector shall be out on the reefs at least five days in each week, as the same remains of record in Minute Book No. 4, page 242; also, an ordinance entitled "An ordinance for the protection and preservation of the public oyster reefs of Mississippi, lying within the borders of Harrison county, Mississippi, and to create a revenue to enforce the same," as the same appears and remains of record in my office in Minute Book No. 4, pages 243, 244 and 245; also an order defining the duties of the oyster inspector as to the enforcement of the ordinance adopted by the board, as the same remains of record in Minute Book No. 4, page 245; also, an order appointing F. D. Moran, oyster inspector of Harrison county, which appears of record in Minute Book No. 4, page 245; all of which orders and ordinances above appear and remain of record in my office as clerk of the chancery court, and *ex officio* clerk of the board of supervisors of Harrison county, Mississippi.

Given under my hand and the official seal of said chancery court

ed at my office in Gulfport, Mississippi, on this the 23rd day of
e, A. D. 1904.

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the December Term, A. D. 1893.

THE STATE OF MISSISSIPPI, }
Harrison County. }

A regular term of the board of supervisors of Harrison county, State aforesaid, was begun and held in and for said county, on the first Monday of December, A. D. 1893, being the 4th day of said month, in the court house of said county in Mississippi City, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board, A. J. Bond, president, Phil McCabe, T. J. Stewart, John Scarborough and R. W. Hatten, members, F. Seal, sheriff of said Harrison county, and F. S. Hewes, clerk of the chancery court of said county and *ex officio* clerk of said board.

"Ordered by the board that the following ordinance be and is" "hereby adopted."

"1st—It is ordered by the board of supervisors of Harrison" "county that hereafter it shall be unlawful for any person to fish" "or take oysters from the waters of Harrison county in water" "under fourteen (14) feet in depth, with a dredge, scoop, drag, or" "other like instrument except ordinary oyster tongs."

"2nd—It is further ordered that no oysters shall be fished or" "taken from the waters of said county with such dredge, scoop or" "drag between the first day of May and the first day of November," "in any year."

"3rd—It is further ordered that no oysters shall be fished or" "taken from the waters of said county with any such dredge," "scoop, or drag except within the following places and limits," "towit:—Pass Marion channel, Cat Island channel, and the waters" "north and north west of Cat Island spit. Citizens of Missis-" "sippi and none others may take or fish oysters as hereinbefore" "provided."

"4th—Any person violating any of the provisions of sections" "(1, 2, or 3) one, two or three, of this ordinance shall be punished" "by a fine of not less than one hundred dollars, and not more than" "five hundred dollars."

"5th—It is further ordered that the ordinance adopted by this" "board at its August term 1893, prohibiting the taking or fishing" "of oysters in the waters of Harrison county, with such dredge," "scoop or drag, which ordinance is recorded in Minute Book No." "4, page 289. "of the proceedings of the board of supervisors of" "Harrison county, be and the same is hereby repealed."

"Ordered by the board that the ordinance adopted by this board"

"on the 9th day of January, 1893, and recorded in this book, on"
"page 245, defining the duties of the oyster inspector be and the"
"same if hereby amended by striking out from said ordinance the"
"following words, on the 10th, 11th and 12th lines of the same,"
"towit:—" And it is further ordered that the expenditures author-"
"ized above shall not exceed the receipts provided for in the"
"oyster ordinance."

2104 THE STATE OF MISSISSIPPI,
Harrison County.

(Endorsed:) 1893. Louisiana *vs.* Mississippi Doc. 36 Filed June 25/04, Wm. D. Bullard commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905, James H. McKenney, clerk.

2105 MISS. DOCUMENT No. 37.

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the February Ter-, A. D. 1894.

THE STATE OF MISSISSIPPI,
Harrison County.

A regular term of the board of supervisors of Harrison county, State aforesaid, was begun and held in and for said county, on the first Monday of February, A. D. 1894, being the 5th day of Feb-

ruary, 1894, in the court house of said county, at Mississippi City, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board, A. J. Bond, president, Phil McCabe, T. J. Stewart, John Scarborough and R. W. Hatten, members, F. Seal, sheriff of said county, and F. S. Hewes, clerk of the chancery court of said Harrison county and *ex officio* clerk of said board.

" It is ordered by the board that the ordinance for the protection "
" of the public reefs of Harrison county, Mississippi, passed at the "
" January 1893 meeting of this board be amended by adding the "
" following: " Be it further ordered that oysters culled so that they "
" do not contain more than ten per cent. of small oysters and shells "
" shall be deemed as culled according to the requirements of this "
" ordinance. "

THE STATE OF MISSISSIPPI, }
Harrison County. }

I, F. S. Hewes clerk of the chancery court of said county and State, and *ex officio* clerk of the board of supervisors of said county, do hereby certify that the foregoing contains a true, full correct and complete transcript of an amendment to an ordinance passed at the January 1893 meeting of the board of supervisors, as the same appears above, and as the same appears and remains of record in my office in Minute Book Number 4, page 348 of the minutes of the board of supervisors of Harrison county, Mississippi.

Given under my hand and official seal of the said chancery court hereto affixed at my office in Gulfport, Mississippi, this the 23rd day of June, A. D. 1904.

[Seal of Chancery Court, Harrison County, Mississippi.]

2106 MISS. DOCUMENT NO. 38.

Minutes of the Board of Supervisors of Harrison County, Mississippi, at the September Term, A. D. 1892.

THE STATE OF MISSISSIPPI, }
Harrison County. }

A regular meeting of the board of supervisors of said county of Harrison, begun and was held, in and for said county, at the court house of said Harrison county, State aforesaid, on the first Monday

of September, A. D. 1892, being the 5th day of said month, the same being the time and place designated by law for holding said meeting of said board.

Were present and in attendance on said board, A. J. Bond, president Phil McCabe, John Scarborough, and R. W. Hatten, members, F. Seal, sheriff of Harrison county, and F. S. Hewes, clerk of the chancery court of said county and *ex-officio* clerk of said board.

"James Thomas, C. F. Theobald and W. K. M. Dukate, composing the special committee appointed to make rules and regulations for the protection of the public oyster reefs of this county, submitted the following ordinance for approval by this board, which said ordinance having been duly considered is hereby approved and adopted by this board to be enforced and respected as provided by law, to wit. An ordinance for the protection and preservation of the public oyster reefs of Mississippi, lying within the borders of Harrison county, and to create a revenue to enforce the same."

"SECTION 1ST. It shall be unlawful for any person, or persons, to ship or carry beyond the limits of the State of Mississippi, by any boat or water craft, any oysters taken from any public reef in the waters of Harrison county, in said State, while the same are in the shells; or to take or catch any oysters from any public reef in said county, to be so shipped or carried beyond the limits of the said State."

"SECTION 2ND. It shall be unlawful for any person to take from the natural beds within the waters of this county any oysters between the first day of May and the first day of September of any year, except for planting purposes and local consumption."

"SECTION 3RD. It shall be unlawful to take from any public reef in the waters of said county, any oysters the shells of which are less than two and one half inches in length, except for planting purposes and all oysters taken for any other purpose shall be culled so that there will not be more than four oysters in any one bunch, and they shall be culled free from all dead and empty shells and young and unmarketable oysters, which shall be left on the reefs where they are taken; provided that such young and unmarketable oysters may be removed or disposed of for planting purposes within the tide-waters of the State of Mississippi."

"SECTION 4TH. No person shall catch oysters on any public reef in the waters of said county (artificial beds excepted) without first procuring from the clerk of the circuit court of said county, a license for each boat to be used by him in catching or transporting oysters, which license shall expire one year after date; and in his application for such license he shall give the capacity of his boat, or boats, and their names, and it shall be unlawful for any boat, so licensed to carry or have on board at any time, a greater number of barrels of oysters than the capacity of such boat as stated in such license. All boats having a capacity of 200 barrels or more shall pay the sum of six dollars, and boats

" having a capacity of less than 200 barrels shall pay the"
2107 " sum of four dollars, for such license, and shall pay to the"
" said clerk fifty cents for each and every licence so issued:"
" Provided that no boats or vessel under one ton measurement shall"
" be subject to the provisions of this section; provided further that"
" no boats licensed by the board of supervisors of Hancock or Jack-"
" son county, shall not be required to pay an additional license in"
" this county."

" SECTION 5TH. That said clerk shall keep a record of all licenses"
" so issued and shall correctly number the same, and the person to"
" whom such license is issued shall cause such number and the"
" word licensed to be painted in red letters, not less than four"
" inches in size, in some conspicuous place on the boat for which"
" such license is issued. Said clerk shall immediately procure the"
" painting of the necessary blanks to carry out the provisions of"
" this section, and shall issue his receipts, carefully numbering"
" the same, which receipts shall stand in lieu of, and shall confer"
" on the holder thereof, all the rights and privilegss of, licenses"
" granted under this ordinance, until said clerk shall obtain"
" the necessary blanks when he shall immediately issue licenses"
" to all persons holding such receipts. The said clerk shall"
" receive all money arising from such licenses and shall pay the"
" same to the county treasurer, and such money so paid shall"
" create a fund, which fund shall be known and designated as"
" the oyster fund, and shall be appropriated by the board of"
" supervisors, in their discretion, in such manner as will best"
" secure the enforcing of this ordinance, and said fund shall"
" be used for no other purpose."

" SECTION 6TH. The sheriff, the several constables, and all other"
" officers having like powers, within the county of Harrison, shall"
" have the power at any time to go on board of any boat or vessel"
" being used in fishing oysters in the waters of said county and to"
" demand that the parties in control of such vessel, exhibit the"
" license of such boat to be used in fishing for oysters in said"
" waters, and it shall be unlawful for any person in control or on"
" board of such boat or vessel to refuse or fail to exhibit such"
" license to any such officer demanding the same for inspection."
" And it shall be the duty of the said sheriff, constables and other"
" officers to arrest, with or without process, any person or persons"
" violating any of the provisions of this ordinance, and to take"
" them before any magistrate or justice of the peace, or the mayor"
" of any incorporated town or city, in said county, for trial, and"
" every such magistrate, justice of the peace of mayor shall have"
" jurisdiction of all offenses committed in violation of this ordi-"
" nance."

" SECTION 7TH. Any person who shall violate any of the provis-"
" ions of this ordinance, shall on conviction be fined not less than"
" ten dollars for the first offense, and for the second offense not less"
" than twenty dollars, and be imprisoned in the county jail not"

"less than five days, and all persons so convicted shall stand com-"
"mitted until the fines and costs are paid."

"SECTION 8TH. When a prosecution under this ordinance shall"
"be commenced and prosecuted to a conviction upon the informa-"
"tion or complaint of any private person, and the officer or judge"
"trying the cause shall so certify on his docket, then in that case"
"such prosecutor shall be entitled to one half of the fine to be paid"
"to him by the officer collecting the same, upon the order of the"
"magistrate or judge trying the cause; the other half to be paid"
"in the county treasury."

"SECTION 10TH. This ordinance shall take effect and be in force"
"from and after the 10th day of September, 1892.

2108 THE STATE OF MISSISSIPPI, }
Harrison County. }

I, F. S. Hewes, clerk of the chancery court of said county and State, and *ex officio* clerk of the board of supervisors of the county of Harrison said State, do hereby certify that the foregoing contains a true, full, correct and complete transcript of an ordinance passed by the board of supervisors of Harrison county, Mississippi, at their September term A. D. 1892, being the fifth day of September, 1892, as the same appears and remains of record in my office in Minute Book Number Four, pages 210, 211 and 212 of the minutes of the board of supervisors of Harrison county, Mississippi.

Given under my hand and official seal of said chancery court hereto affixed at my office at Gulfport, Miss., this the 23rd day of June, A. D. 1904.

2109 Miss. Document No. 39.

Pilots' Laws, Rules and Regulations of Ship Island Harbor, Mississippi.

Ernest Desporte, Harbor Master.

Office: Biloxi, Miss.

Laws, Rules, and Regulations of Ship Island Harbor.

Laws of the State of Mississippi, Annotated Code 1892.

Chapter LIX.

An act authorizing the board of supervisors of each county, having a sea-port or harbor therein, to appoint a board of pilot commissioners, and amended by chapter 128, Laws of the State of Mississippi, passed at a regular session of the Mississippi legislature, held in Jackson, commencing January 7th, 1896, and ending March 24th, 1896.

Harbors.

Jurisdiction over Harbors.

Section 2252. The board of supervisors of each county, having a sea port or harbor therein, shall appoint three citizens of sufficient skill and knowledge in maratime affairs as a board of pilot commissioners, who shall have jurisdiction over the harbors and passes leading thereto of their respective counties, but the mayor and board of aldermen of the cities of Natchez, Vicksburg, and Greenville shall have jurisdiction of and be harbor commissioners for their respective harbors.

Commissioners to Keep Record of Their Proceedings.

Section 2253. The several boards of pilot commissioners shall keep a record of their acts and doings, which shall be public records, to be kept and preserved by the clerk of the board.

Terms of Office and Vacancies.

Section 2254. The term of office of pilot commissioners shall be four years, and upon the death, resignation, or removal from office of any commissioner the board of supervisors shall fill the vacancy.

2110 Oath and Bond: Pilot Commissioners to Act as Port Wardens.

Section 2255. The pilot commissioners are empowered to act as port wardens and to perform all duties of such. They shall, before entering on their duties, take an oath, (that prescribed by two hun-

and sixty-eight of the constitution) and give bond to be ap-
ed by the clerk of the chancery court of their respective counties
e penalty of one thousand dollars, conditioned for the faithful
ormance of their duties.

Harbors and Port Regulations.

CTION 2256. The pilot commissioners shall make and publish
eedful regulations for the government of the harbor and port,
may prescribe fines, penalties and forfeitures, and are empowered
force and collect the same.

es of Harbor Masters; Terms of Office; Oath and Bond; Fees.

CTION 2257. The pilot commissioners shall appoint a harbor
er, who shall pass the same examination as to proficiency re-
ed of pilots as to handling vessels, knowledge of the harbor and
orage of vessels therein. His term of office shall be two years.
hall take the oath of office required by section two hundred
sixty-eight of the constitution, and must give a bond to be ap-
ed by the pilot commissioners, in the penalty of one thousand
rs, conditioned for the faithful performance of his duty. The
or master shall have general supervision of the harbor and port,
r the direction of the pilot commissioners, and shall be entitled
harge the following fees, payable by the ship, steamship or
ig vessel to which service is rendered, viz: boarding fee, five
rs; moving fee, five dollars; superintending discharge of ballast,
exceeding three and one-half dollars a day for each day actually
ged.

Duties of Port Wardens; Preference to Present Pilots.

CTION 2258. The pilot commissioners, as port wardens, shall
control of the harbor and port, see that the harbor master and
s perform their duty, and that the regulations are carried out;
shall hold marine surveys and perform such other duties as
be required by the regulations and the character of their office.
shall, as soon as qualified, and at such other times as may be
ssary, examine the pilots acting as such, who have licenses, and
ersons who may make application to be licensed as pilots in all
ers pertaining to the management of vessels; also in regard to
knowledge of the channel and harbor where they wish to act.
pon examination they be found qualified to take command
which probably will enter the port and thoroughly familiar
the channel and currents of the harbor the pilot commissioners
first appoint and license the pilots heretofore appointed and
sed, and then such other persons of those qualified as are requi-
o perform the duties of pilot at that port and for a term of two
s, but the pilot commissioners shall have power to revoke the
se of any pilot or harbor master for misbehavior, neglect of duty,

drunkenness on duty or off duty, or incompetency, or any other cause detrimental to the interest of commerce and navigation. The
2111 board of commissioners shall require from each pilot satisfactory bond for the faithful performance of his duties.

Compensation of Officers and Compulsory Pilotage.

SECTION 2259. That the board of pilot commissioners shall receive the sum of ten dollars from each pilot and harbor master whom it examines, appoints and licenses. The fees allowed pilots for compulsory pilotage shall be so adjusted as not to burden shipping, and shall not in any case exceed four dollars nor be less than three and one-half dollars per foot, and all United States vessels of one hundred and fifty tons burden or less shall be subject to compulsory pilotage. The pilot commissioners of each city or county may fix the rate of pilotage which shall be paid by vessels entering and leaving their respective harbors, but in no case shall they fix the rate greater than that now provided by law. They shall also regulate the compensation and fees of harbor master and port wardens.

Pilots Licensed; Preferences.

SECTION 2260. In appointing pilots preference shall be given those persons who may have served an apprenticeship in this State with the pilots, if they pass the requisite examination.

Apprenticeship.

SECTION 2261. After the year eighteen hundred and ninety four a new applicant cannot be appointed to the position of pilot unless he passes the qualifications prescribed in this chapter and has served an apprenticeship with the pilots in this State.

Penalty for Piloting without License; Misconduct.

SECTION 2262. Any person or persons acting as pilots without being duly licensed shall be guilty of a misdemeanor and punished accordingly, and shall forfeit and pay to the pilot commissioners the sum of two hundred and fifty dollars for every day while so waiting, and that it shall be unlawful for any person or persons not licensed pilots by the Board of Pilot Commissioners of the State of Mississippi to interfere with the business of pilots by serving or assisting in piloting vessels through the harbor or passes in the gulf of Mexico except in cases of distress; and any person or persons violating the provisions of this section shall on conviction thereof be fined not less than one hundred dollars, in the discretion of the court trying the offenders, and the fine collected by this act shall be nor more than two hundred and fifty dollars, paid into the county treasury for school purposes.

Compensation of Pilots Detained in Quarantine; Penalty for Carrying Pilots to Sea.

SECTION 2263. In all cases where any pilot shall be detained in quarantine by reason of having boarded a vessel in the discharge his duty as a pilot, the vessel and her owners shall be required ay him three dollars per day during the time of his necessary ention in quarantine; but the provisions of this section apply to harbors or ports on the sea coast. If the master of any el carry off a pilot from any sea port he shall pay such pilot the sum of five dollars per day for every day the pilot is absent, and he shall further supply the pilot with provisions and accommodations as is usual for the maintenance of mas- of vessels and the master as well as the owner shall be liable the same; but if such vessels have laid to for the space of four rs, after crossing the bar, and a pilot boat did not appear to re- e the pilot, the claim shall not be allowed.

Quorum.

SECTION 2264. Any two of the pilot commissioners shall constitute norum for the transaction of business.

Terms of Office Not to Expire.

SECTION 2265. The terms of office of the present pilot commis- ers shall not expire until the end of the time for which they e appointed.

Special Laws Repealed.

SECTION 2266. All special or local laws providing for pilot com- ioners, limiting the number of pilots and requiring the serving n apprenticeship and relating thereto, are hereby repealed.

ilots' Rules and Regulations, Ship Island Harbor, Mississippi.

t a meeting of the board of pilot commissioners for Ship Island or, it was ordered by the board that the following rules and lations for the government of pilots, and protection of commerce Ship Island harbor, Mississippi, be and are hereby made and ted.

ule 1. That any licensed pilot who shall take or bring a steamer essel into port shall be entitled to take her out, and any other taking out such a steamer or vessel shall forfeit the full amount lotage to the pilot rejected, and the captain and owners thereof be bound to pay to the pilot rejected the fees as established by unless the master aforesaid shall show good cause to the con- , which shall be satisfactory to the board of pilot commissioners. all be the duty of the master of every vessel to give notice to

said pilot before going ashore to clear his vessel, and get from him a bill for pilotage; if such notice cannot be given personally it shall be given by hoisting the jack on the foremast head twenty four hours before going ashore. That all vessels being ready for sea are required to pay their pilotage on shore at Biloxi.

Rule 2. That all steamers or vessels entering said harbor, or leaving the same, shall be subject to compulsory pilotage, and shall pay to the first licensed pilot who shall speak and offer his service to any steamer or vessel entering or leaving said harbor at the rate of four dollars per foot, unless they be United States vessels of one hundred and fifty tons burden or less.

2113 Rule 3. Pilots shall forfeit their authority as such for more than 36 hours' absence from their several bars, except in case of sickness, or when absent in discharge of duty.

Rule 4. That whenever any vessel is ready to leave the harbor the pilot who brought her in shall have notice, and if such notice cannot be given personally it shall be given by hoisting a jack at the fore masthead twenty-four hours before leaving; when, if the pilot signalized does not come on board, the master may take the first pilot that may offer.

Rule 5. If a master of a vessel shall detain a pilot on board, the wind and weather permitting his going to sea, such pilot shall be entitled to five dollars for each day so detained.

Rule 6. No pilot shall be interested, directly or indirectly, in the earnings of more than one pilot boat, or more than one partnership of pilots. No combination or partnership of pilots shall exist unless sanctioned by the board of pilot commissioners. Any pilot violating this rule may be deprived of his license and forfeit a sum to be determined by a majority of the commissioners.

Rule 7. Any pilot bringing a vessel into the harbor who shall fail to bring such vessel to, during the existence of quarantine regulations at quarantine buoy, unless visited by the port physicians, shall be deemed guilty of misconduct, and shall be either suspended from his duties as pilot or shall forfeit his license.

Rule 8. The pilot commissioners shall have power to revoke the license of any pilot for misbehavior, neglect of duty, or drunkenness, or any other cause detrimental to the interest of commerce or navigation.

Rule 9. Any person who shall act as a pilot for any of the passes leading into said harbor without a license from the board of pilot commissioners shall be fined not less than one hundred dollars nor more than three hundred dollars for each and every offense, recoverable before any court of competent jurisdiction in this State, said fine to be paid for the benefit of the common school fund of this State.

Adopted October 6, 1894.

Rule 10. The pilot association shall assign to each boat a full complement of pilots—not less than three—but subject to have more or less, as may be sanctioned or approved by the pilot commissioners.

le 11. It shall be the duty of the captain of the pilot boat or aptain of the watch, to report to the chairman any and all who shall be absent from duty during the week they are ed to duty.

le 12. A pilot guilty of intoxication or the excessive use of in- ting liquors, shall be suspended or have his license revoked, e commissioners may adjudge.

le 13. A pilot, while on his business *a* a pilot, found guilty of abusive or insulting language or guilty of threatening con- shall be suspended or have his license revoked, as the commis- s may adjudge.

le 14. Whatever charges are preferred against a pilot the presi- shall furnish to said pilot a copy of the charges and written of the time and place of the investigation. Said pilot shall the right to be represented by counsel. At least seven days' shall be given to said pilot.

le 15. Any pilot, against whom charges of intoxication or con- nbecoming a pilot, either when on or off duty, shall be proven to the satisfaction of the commissioners, shall be punished by suspension or by revocation of his license at the discretion of the commissioners.

e 16. Should a vessel take the ground or meet with any acci- hile in charge of a pilot, the said pilot shall report the same president, or at the office of the board, or secretary, within -four hours after said accident shall have occurred.

e 17. Suspension beyond thirty days, cancellation or revoca- license of pilot shall be made by the commissioners only, at etings for that purpose.

e 18. A pilot during his term of suspension shall not partici- the profits or earnings of any other pilot or pilots, associa- company of pilots, and any pilot or pilots who shall pay or any part of the earnings or profits as above stated during uspension shall be subject to a forfeiture of his or their

e 19. No pilot or pilots shall receipt any captain or owner of ssel, directly or indirectly, for a greater amount of money ey actually have received for services rendered, a violation of le will subject said pilot or pilots to thirty days' suspension; le will also apply to harbor masters.

e 20. All captains of pilot boats are required to make a report ecretary of the board of pilot commissioners on the first day e and the first day of January each year of all vessels boarded boat during said time; said report shall be made with care curacy, making a correct report of anything out of the ordi- ne of duty. The captain is compelled under penalty to report lect of duty on the part of the pilots under him; this report body only such vessels as are loaded and sailed from Ship harbor.

e 21. All pilots shall be and are hereby required to register

the names, tonnage and official numbers of their respective pilot boats with the secretary of the board of pilot commissioners.

Rule 22. All vessels engaged in the business of piloting at the entrance to Ship Island harbor shall carry each a black number of not less than three feet in length displayed to view, such number to be designated by the board of pilot commissioners; and the secretary shall issue a certificate of number to each vessel so employed; and any piloting done in a vessel not so numbered and registered as a pilot vessel will not be recognized by this board, except in case pilots are compelled to use the small boats belonging to their pilot vessels, such boats to bear the corresponding numbers of their respective pilot vessels on each side of the bows; and any licensed pilot found piloting in a vessel not numbered shall forfeit his license.

Rule 23. No vessel or boat engaged in the business of piloting at the entrance to Ship Island harbor shall be engaged in any other traffic nor as a pleasure or excursion boat, while employed as a pilot boat on duty.

Rule 24. Pilots are required to take all vessels entering Ship Island pass to the northward of the quarantine turning buoy or buoys lying between the pass and the quarantine anchorage, unless expressly permitted to do otherwise in any particular instance by the quarantine officer of the port.

Adopted April 15, 1898.

H. LIENHARD,
R. McINTOSH,
W. K. M. DUKATE,
Commissioners.

2115 Rules and Regulations for Harbor Masters of Ship Island Harbor.

SECTION 1. It shall be the duty of the harbor master to visit all vessels upon their arrival in this port and to designate their anchorage ground and berth; to inform the master or captain of the rules and regulations of the port, and to attend to the enforcement of the same; to cause all ballast to be discharged and deposited as ordered by this board and to render such other and further services in the execution of his office as may be necessary, or which shall be required of him by the master of such vessels, also to move all vessels that are to be moved in the harbor of Ship island, and the pilots are not to move any vessel at anchor in the harbor of Ship island, except to take them to sea or in case of distress, unless requested by the harbor master.

SECTION 2. It shall be the duty of the master of every vessel arriving at Ship Island harber in ballast, to report the same immediately to the harbor master, whose duty it shall be to cause the said vessel to be discharged and the said ballast to be deposited at such place as the board of pilot commissioners may designate in

ter not more than six feet deep at low water, and the harbor mas- shall not move any vessel from the ballast ground to her landing th with more than fifty tons of ballast on board, said ballast may discharged from the landing berth.

ECTION 3. Any owner, master or person in charge of any vessel o shall permit, allow or cause any ballast to be discharged or own overboard from such vessel into the waters of Ship Island bor shall be liable to a fine of one hundred and fifty dollars for first offense and a fine of one thousand dollars for the second and h subsequent like offense, to be recovered before a court of com- ent jurisdiction; and the vessel from which said ballast may e been discharged and thrown overboard shall be liable to be ceeded against to recover the payment of said fines.

ECTION 4. The harbor master shall be entitled to a fee of five lars on boarding each vessel, three dollars and fifty cents per day le superintending the discharge of ballast, and for each service dered at the request of the master a like fee of five dollars, and dollars and fifty cents for each dispute or disagreement between sters of vessels settled by him. And for each removal $5 and for oring vessels $5 each.

ECTION 5. All difficulties and disputes arising between masters of sels to which any one of the rules and regulations may apply ll be adjusted and settled by the harbor master, with the right ppeal from the decision of the board of pilot commissioners or a ority of them.

ECTION 6. All lighters transporting ballast from vessels in Ship nd harbor shall have bulwarks of sufficient height to fully pre- t the spilling of such ballast overboard; and any lighter spill- or discharging such ballast into the waters of the harbor shall fined not more than five hundred dollars and not less than nty-five dollars.

ECTION 7. All ballast shall be deposited on the north side of p island and north side of Cat island in six feet of water at low tide, provided said ballast can be deposited in such depth of 6 water as is included in a regular buoyed and defined ballast ground, and in accordance with section 2, rules and regula- s.

ECTION 8. No person shall be employed or retained as a harbor ster for Ship island who has an interest, directly or indirectly, in ballast lighter He shall employ a deputy when three or more sels are engaged in discharging ballast.

ECTION 9. The harbor master shall act in the interest of no bal- lighter, stevedore or other person having business or intercourse h a vessel in said harbor, but shall confine himself to the duties aid office.

ECTION 10. The harbor master shall at his individual expense nly mark and define and maintain at all times buoys showing northwest and northeast limits of the established ballast ground Ship island, the said buoys to be placed in ten (10) feet of water

and all lighters shall discharge their ballast on the inside of said buoys and, as provided in section 2, failure so to do to subject the masters and owners to the penalties prescribed in section 7.

SECTION 11. The harbor master shall be liable for the acts of his deputy, and for violating any of the foregoing sections (applying to the harbor master or his deputy) shall be fined upon conviction in a sum not less than ten dollars for each offense and for repeated violations subject himself to suspension and removal from office.

SECTION 12. Should the harbor master fail or neglect to report to the pilot commissioner any and all violations of sections 3, 6 and 7 of these rules he shall at once be suspended, and upon conviction, be fined and removed from office.

Adopted October 6, 1894.

218 Act of Congress Approved February 20th, 1811, Providing the Conditions upon which Louisiana Might be Admitted into the Union.

Gayarre's History of Louisiana under American Domination, Pages 264 and 265.

"The conditions annexed to this grant of authority were; That
e constitution should be republican and consistent with the Con-
itution of the United States; that it should contain the fundamen-
l principles of civil and religious liberty; that it should secure to
e citizen the trial by jury in all criminal cases, and the privilege
the writ of *habeas corpus* conformable to the provisions of the
onstitution of the United States; that the laws enacted by the new
ate should be promulgated, and all its records of every description
served, and its judicial and legislative written proceedings con-
cted, in the language in which the laws and the judicial and
gislative proceedings of the United States were published and con-
cted; *that the said convention should provide by an ordinance, irrev-
ble without the consent of the United States, that the people inhabit-
g the said Territory agreed and declared that they forever disclaimed
right or title to the waste or unappropriated lands lying within the
d Territory; that the same should be and should remain at the sole
d entire disposition of the United States;* that each and every tract
land sold by Congress should remain exempt from any tax laid
order or under the authority of the State for any purpose what-
r for the term of five years from and after the respective days of
sales thereof; that the lands belonging to citizens of the United
tes residing without the said State should never be taxed higher
n the lands belonging to persons residing therein; and that no
es should be imposed on lands the property of the United States;
that the River Mississippi, and the navigable rivers and waters
ing into the same, or into the gulf of Mexico, should be common
lways and forever free, as well to the inhabitants of the said State
o other citizens of the United States, without any tax, duty, im-
t, or toll therefor imposed by the said State.

The 4th section of the act declared that, in case the constitution
the State to be created should not be disapproved by Congress
their next session, the said State should be admitted into the
on upon the same footing with the original States.

And at pages 274 and 275, the same historian says: "The convention having assented to all the stipulations imposed by the Federal Government as a preliminary conditions to the framing of a constitution and State government for the Territory of Orleans, and the constitution having been adopted by a unanimous vote, two delegates, Messrs. E. Fromentin and A. B. Magruder, were elected to carry to Washington city, and lay before the proper authorities, the constitution, and the other acts of the convention, with special instructions to urge the speedy action of Congress, and with full power to give all necessary explanations. Two thousand dollars were allowed to each for their expenses."

"The convention adjourned *sine die* on the 28th of January 1812, after having adopted all the provisions which were deemed expedient to carry the constitution into practical effect, should it be approved and sanctioned by Congress.

Here is the preamble of the constitution: "We, the representatives of the people of all that part of the territory or country ceded under the name of Louisiana, by the treaty made at Paris, on the 30th day of April, 1803, between the United States and France, contained in the following limits, towit; beginning at the mouth
2119 of the River Sabine, thence by a line to be drawn along the middle of said river, including all its islands, to the thirty-second degree of latitude—thence due north to the northernmost part of the thirty-third degree of north latitude—thence along the said parallel of latitude to the River Mississippi—thence down the said river to the River Iberville, and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico—thence bounded by the said Gulf to the place of beginning, including all islands within three leagues of the coast—in convention assembled by virtue of an act of Congress entitled: An act to enable the people of the Territory of Orleans to form a constitution and State government, and for the admission of said State into the Union on an equal footing with the original States and for other purposes—in order to secure to all the citizens thereof the enjoyment of the right of life, liberty and property, do ordain and establish the following constitution or form of government, and do mutually agree with each other to form ourselves into a free and independent State, by the name of the State of Louisiana."

2130 THE STATE OF MISSISSIPPI, }
Harrison County. }

I, A. J. Ramsey, clerk of the circuit court of said county and as such *ex-officio* custodian of the records of oyster boat licenses issued by the circuit court clerk of the said county during the years 1892, 1893, and 1894, which said record remains in said office and in my custody, certify that the following pages are a true and correct copy taken from the official register or record of such licenses issued to boats operating in Harrison county during the said years, and that to the best of my knowledge, information and belief said licenses authorize said boats to operate 18 miles, from the shore southward.

Witness my signature at Gulfport, Miss., this the 23rd day of June 1904.

[Seal of the Circuit Court, Harrison County, Mississippi.]

A. J. RAMSEY,
Clerk of the Circuit Court.

(Endorsed:) Louisiana *vs.* Mississippi Doc. No. 41 for Miss. Filed Aug. 8/04 Wm. D. Bullard commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905. James H. McKenney, clerk.

131 MISS. DOCUMENT NO. 42.

Minutes of the Board of Supervisors of Jackson County, Mississippi, at August Term, 1893.

An Ordinance to Prevent the Taking of Oysters from the Public Reefs in the Waters of Jackson County, in the State of Mississippi, with Dredges.

SECTION 1. Be it ordered by the board of supervisors of Jackson unty that it shall be unlawful for any person or persons to dredge oysters in the waters of Jackson Co.

SECTION 2. Any person violating the provisions of this ordinance ll on conviction be fined one hundred dollars or be imprisoned the county jail for six months, or both, all persons so convicted ll stand committed until said fine and costs are paid, said fine e recovered before any court of competent jurisdiction, one half fine to be paid to the informer and the other half to be paid into county treasury.

ECTION 3. This ordinance to take effect from and after its adop-

TE OF MISSISSIPPI, }
County of Jackson, }

F. H. Lewis, clerk of the chancery court of Jackson county, issippi, and *ex-officio* clerk of the board of supervisors of Jack-

son county, and legal custodian of the records of said board, do hereby certify that the *following* is a true and correct copy of an order passed by the board of supervisors of Jackson county held in the town of Scranton, at the August term 1893, on the 10th day of August 1893, as will more fully appear from the minutes of said meeting of said board of record on page 556 of Minute Book No. 2 of the minutes of the board of supervisors of Jackson county, now on file in my office.

Witness my signature this the 5th day of August 1904.

[Seal of Chancery Court, Jackson County, Miss.]

F. H. LEWIS, Clk,
By FRED TAYLOR, D. C.

(Endorsed:) Louisiana *vs.* Mississippi. Doc. No. 42 for Miss. Filed Aug. 9, '04. —— ——, commissioner. Office Supreme Court U. S. Filed Mar. 13 1905, James H. McKenney, clerk.

2132 MISS. DOCUMENT No. 43.

Ordered that the following ordinance be and is hereby adopted

An Ordinance for the Protection and Preservation of the Public Oyster Reefs of Mississippi Lying within the Borders of Jackson County and to Create a Revenue to Inforce the Same.

SECTION 1. It shall be unlawful for any person or persons to ship or carry beyond the limits of the State of Mississippi by boat or water craft any oysters taken from any public reef in the waters of Jackson county in said State while the same are in the shell or to take or catch any oysters from any public reef in said county to be so shipped or carried beyond the limits of said State.

SECTION 2. It shall be unlawful for any person to take oysters from the public reefs in this county during the months of May, June, July and August for any other purpose except for domestic use or local trade.

SECTION 3. It shall be unlawful for any person to take oysters from the public oyster reefs of this county without first culling them of all young and unmarketable oysters all oysters taken for planting purposes shall be culled of all dead and empty shells which shells shall be returned to the reef from which they were taken.

SECTION 4. It shall be unlawful for any person to catch oysters on any public reef in the waters of said county without first procuring from the clerk of the circuit court of said county a license for each boat to be used by him in catching or transporting oysters which license shall expire one year after date and in his application for license he shall give the correct ton-age of his boat or boats and

heir names and shall pay fifty cents per ton for such license and fty cents to the clerk of court for every license so issued and no oat under one ton measurement shall be subject to the provisions f this section, boats licensed by the board of supervisors of Harri- on and Hancock county shall not be required to pay additional cense in this county and no license shall be issued to any person ngaged in fishing oysters in this county who is not a resident citi- n of the State of Mississippi.

SECTION 5. 2134 MISS. DOCUMENT No. 44.

Minutes of the Board of Supervisors of Jackson County, Mississippi, at June Term, 1892.

Be it ordered by the board of supervisors of Jackson county:

1st. That it shall not be lawful for any person or persons to take, catch or remove oysters growing or being in the natural banks not having been planted or bedded there in any of the waters of Jackson county, with intent or for the purpose of carrying them out of Jackson county for sale or for planting or bedding out or for canning purposes.

2nd. If any person shall violate the foregoing order he shall forfeit the boats or vessels employed for the purpose, and shall be fined the sum of twenty five (25.00) dollars for the first offense and fifty ($50.00) dollars for the second offense, or imprisoned in the county jail for thirty days for each offense.

3rd. It shall be the duty of the sheriff or any constable of said Jackson county to seize the boats, vessels or their apparel and take in his possession such boats or vessels so unlawfully employed and carry them before a justice of the peace having cognizance of the case, and the case is to proceed to hearing as if by regular proceedings before the justice of the peace having jurisdiction thereof and if said person or persons have been adjudged guilty of the above offense they shall forfeit said boat or vessel to be sold by the sheriff

or legal officer and the proceeds after paying cost and expense shall go to the common school fund.

4th. This shall not apply to any persons who is a *bona fide* resident or shipper of Jackson county.

5th. It is further ordered that no persons, residents or non residents of this county shall *not* catch or remove any oysters in their natural banks, only for local consumption from the 1st day of May to the 1st day of September and any one violating this section shall be subject to the same penalty as provided in the 2nd section of this order.

MISS. DOCUMENT NO. 45.

Minutes of the Board of Supervisors of Jackson County, Mississippi, at September Term, 1884.

This day coming on for hearing the request of the citizens of this county for the protection and preservation of the oysters fish shrimp and game being produced in a state of nature within its bounds and the board of supervisors being satisfied that the same should be protected and preserved.

It is therefore ordered that no person or persons, who is not a *bona fide* resident of the county of Jackson shall hereafter be permitted or allowed to catch and market any oysters, fish, shrimp or

other game that may be taken or caught within the territorial limits of said county.

It is further ordered that in order to become a *bona fide* resident of said county within the meaning of this ordinance such person or persons must have been actual freeholders or householders for a space of six months.

It is further ordered that every breach of said ordinance shall be considered a misdemeanor and the person so offending shall be fined not less than twenty five dollars and not more than one hundred dollars or imprisoned for not less than thirty days for each offense, besides being subject to all the penalties now enacted by the statutes of this State.

It is further ordered that all oysters fish shrimp or game together with the boats, casts, seines and nets or other fishing tackle found in the possession of persons violating this ordinance shall be subjected to be sold to pay all cost and fines imposed upon them.

It is further ordered that this ordinance take effect from and after the first Monday in October 1884.

Rules and Regulations of the Board — Health of Harrison County, Mississippi, for the Year 1877.

Article 1.

The board of health shall meet at the court house, in Mississippi City, on the third Monday of each month, from March to November, and as often thereafter as the public health shall make such meetings necessary. Three members of said board constituting a quorum.

Article 2.

It shall be the duty of the board of health to supervise the administration of all the health laws of Harrison county, to examine into all cases of malignant, pestilential, infectious, and epidemic diseases, which may occur in said county, and the causes thereof; to examine into all such nuisances as may tend to endanger the health of the said county, and to take such steps as may be necessary for their removal; to exercise a general supervision over the sanitary regulations of all institutions, including hospitals, markets, prisons and public schools; to superintend all matters pertaining to quarantine and the quarantine physician and direct all measures of detention, disinfection and purification of vessels, cargoes and passengers, coming from ports against which quarantine may have been proclaimed.

SECTION 2. Whenever it shall appear to the board of health, that any pestilential or infectious disease has made its appearance in the county, said board shall take such measures as to them may seem expedient and requisite to prevent the spread of such diseases; and any person failing to comply with the requirements of the board of health in all such cases, shall forfeit and pay such fine as may be imposed by a court having competent jurisdiction, not to exceed one hundred and fifty dollars. That no person laboring under any contagious, infectious or other disease dangerous to the public health, shall be removed from one place to another without the permit of the board of health, under a penalty not to exceed one hundred and fifty dollars fine, or imprisonment, or both, at the discretion of the court imposing the same.

SEC. 3. It shall be the duty of every physician or other person practicing medicine in said county, to report to the board of health thereof, every case of small-pox, yellow fever, or other infectious, contagious or pestilential disease, which he may be called upon to treat within the limits of said county; said report to be made within twenty-eight hours after he shall have ascertained the character of the case, and to specify the name of the patient and the locality of the house in which such person is to be found; and, for every viola-

tion of this provision, the guilty party shall forfeit and pay a fine not to exceed one hundred and fifty dollars. That every citizen upon whose premises there may occur any case of small-pox, yellow fever, or other infectious or pestilential disease not under the charge of any physician, shall in like manner report the fact to the board of health. Under such penalty for failure so to do as a court, &c. may impose, not exceeding one hundred and fifty dollars.

2137 But whenever any disease has become epidemic, the board of health may at their discretion declare it unnecessary to report further cases.

SEC. 4. It shall be the duty of the board of health to open a pest-house for the treatment of paupers and indigent persons afflicted with pestilential or contagious diseases; to prescribe rules for its efficient management, and to furnish supplies and medical attendance to its inmates, which said supplies and medical attendance are to be paid for by said county.

Quarantine Regulations for the Ports of Pass Christian, Mississippi City, Biloxi, and Handsboro—All in Harrison County, Mississippi.

Quarantine.

Article 1.

Be it ordained, That there shall be established a strict system of quarantine to be enforced against all vessels arriving in the above enumerated ports, from any port or place where yellow, malignant or pestilential or infectious fever, or other infectious or dangerous diseases is prevailing; or, having any such person on board, suffering from such diseases. That this article shall only be in force when so proclaimed from time to time by the board of health and every proclamation shall define the length of time that it shall continue in force. That it shall be the duty of the quarantine physician and health officer, to attend at the quarantine station; to board all vessels entering the harbor of the respective ports above named; to fully examine into the condition of the vessels and cargo, and the health of all persons thereon; to examine as many of such persons on board, under oath, to learn and obtain any facts that he may deem essential and necessary; which oath he is hereby authorized to administer; to detain all vessels coming from any infected port or place, or that has any case of disease described in the first section of this article, on board, the cargo and every person on board, for any length of time that he may deem necessary or expedient; to direct such measures to be taken as may be necessary to purify the vessel, and supervise the same at the expense of the captain, owner or consignee of the vessel; to treat any person who may be sick of any malignant or infectious disease or fever; to sign all permits for vessels and persons to pass the quarantine, and all discharges for vessels or persons leaving the quarantine; without

which no vessels or persons shall be permitted to leave or pass the quarantine station.

And any person violating any of the quarantine regulations he, or the owner and captain, together with the vessel to which he may belong, or be a passenger, shall be fined such sum as a court of competent jurisdiction may impose, not exceeding one hundred and fifty dollars; or, by imprisonment, or both, at the discretion of the court.

That it is the duty of every person acting as a pilot, to deliver to the officer in charge of every vessel coming into the ports aforementioned, a copy of these regulations, or so much as may
2138 be wanted for the use of the vessel, of which the board shall have a sufficient number of copies printed.

During the existence of the quarantine, all pilots and other persons having charge of vessels entering the aforementioned ports, shall bring such vessels to anchor at the quarantine station; and no vessels shall leave such anchorage until it shall have been boarded by the quarantine physician, and shall have received permission from him to do so.

Every pilot or other person violating this section, shall be fined such sum as a court of competent jurisdiction may impose, not exceeding one hundred and fifty dollars, imprisonment or both.

That all persons who may receive medical treatment under this ordinance shall pay, for the use of the board of health, five dollars for each day of such treatment.

And where the persons so treated, shall be unable to pay the charge, the captain, owner or consignee of the vessel to which he may belong, shall pay the same.

That the word vessel, whenever used in this ordinance, shall extend to boats, steamers and watercrafts of every description.

That no vessel shall take on or discharge the cargo or ballast of any vessel at quarantine without a written permit from the quarantine physician, under such penalty as a court of competent jurisdiction may impose, not to exceed one hundred and fifty dollars on the owner, consignee or person in charge.

Rules.

That the quarantine station is hereby located by the board of health, at a place designated "the Lagoon," which is about four miles east of the light house, in Ship Island harbor.

Rule II. The quarantine physician shall, in every instance, determine the length of time a vessel shall remain at quarantine, and the time that all persons on board such vessels shall remain in quarantine.

Rule III. The quarantine physician shall make a monthly report on the third Monday of every month to the board of health of the number and class of vessels quarantined; the number of patients treated by him; the amount of fees collected, and all other information connected with the station as may be necessary and proper.

Quarantine Physician's Report.

HARRISON CO., MISS., July 22, 1878.

To the honorable board of health of Harrison Co., State of Miss.

GENTLEMEN: I have the honor to submit the following report of my labors as quarantine physician and health officer of Harrison Co. Miss.

Quarantine having been declared by your honorable body to be in force in this Co. on the 23d of April 1878, I immediately entered upon the discharge of my duties.

From the 23d day of April 1878 to the 22nd day of July 1878 inclusive, I boarded five vessels to wit: 3 barks—1 brig and 1 schooner—

The sanitary condition of the vessels boarded by me was good and all had clean bills of health with the exception of the barks "Formose" and "Mathusalem" whose bills of health were qualified by the statement that there *was* a few cases of small pox in Bordeaux at the time that said vessels left there.

Names of Vessels and Ports Whence They Came.

Bark "Formose" Bordeaux France. Bordeaux
Brig "Frontier" Pensacola U. S. Pensacola
Bark "Stadt Frankfurt" Brest France. Brest
Schooner Mollie Emma U. S. Matanzas
Barks "Mathusalem" Bordeaux France. Bordeaux

I desire to call the attention of your hon'ble body to the fact that yellow fever of a virulent type is now raging in several ports on the island of Cuba and the greatest diligence shall be exercised on my part to enforce the quarantine laws and make them effective so far as it lays within my power to do so.

Respectfully submitted your obed't serv't

CHAS. PELAEZ, M. D.,
Quarantine Physician & Health Officer,
Harrison Co., Miss.

2141 MISS. DOCUMENT NO. 48.

Biographical and Historical Memoirs of Mississippi.

CHAPTER I.

Topography, Natural History, and Paleontology.

Mississippi is bounded on the south by the north line of southeast Louisiana, Pearl river and the Mississippi sound of the gulf of Mexico; on the east by the west line of Alabama, and on the north east by the Tennessee river; on the north by the south line of Tennessee (latitude 35 degrees), and on the west by the Mississippi. It embraces also the islands in the gulf of Mexico, within six leagues of shore, viz: Isles Dauphin, Ronde, Corne, au Chevreul, aux Vasseau, au Chat, St. Josephs, Grand island, and a few smaller bodies of elevated sands, or a territory extending from latitude 30 degrees, to latitude 35 degrees north, and from longitude 11 degrees 25 minutes west to 14 degrees 33 minutes west. The area in square miles, as stated in the United States Census Reports, is forty-six thousand eight hundred and ten, but local authorities place it as high as fifty five thousand five hundred. The width of the State, on the line of latitude 35 degrees, is one hundred and twenty miles; on latitude 31 degrees, one hundred and eighty-six miles, and on the Gulf coast, seventy-eight miles. The length of the State, on the line of longitude 12 degrees 30 minutes, being the greater line, is three hundred and thirty miles, but the frontage on the Mississippi is continental in its proportions.

2142 MISS. DOCUMENT NO. 49.

Article 9, Chapter 13 (Public Health and Safety), Hutchinson's Mississippi Code, 1798 to 1848.

AN ACT to Prevent the Destruction of Oysters in the Waters of the State of Mississippi, July 26, 1843.

§ 1. It shall be unlawful for any person or persons to take or catch oysters in any of the waters of this State with a scoop or drag, or any other instrument than such tongs and rakes as are now in use; and all persons whatever, are hereby forbid the use of such instruments in taking or catching oysters in the waters of this State, on pain of forfeiting to the State, the boat or vessel employed for the

purpose, together with her papers, furniture, tackle, and apparel, and all things on board the same.

2. The sheriffs of the counties bordering on the said waters of the State of Mississippi, are hereby charged with the execution of this law, and if any of the said sheriffs shall be, at any time hereafter, credibly informed of the violation of the same, by the oath of any credible person, administered before any justice of the peace, or upon his own view, it shall appear to him that any person or persons are, or to have been engaged in using a scoop or drag, or instrument hereby prohibited in taking or catching oysters in the waters of this State, it shall be his duty to seize and take into his possession the boat or vessel thus unlawfully employed, together with her papers, furniture, tackle, and apparel, and all things on board the same, and to arrest and take into his custody all the boatmen belonging to said boat or vessel, and carry them before a justice of the peace of his county, representing to the justice of the peace the breach of law committed, and naming to him the witnesses to support the charge; and the said justice shall be and he is hereby authorized to take cognizance of the offense then charged, and shall docket the case in the name of the State against the boatmen in the custody of the sheriff, and shall immediately summon before him the witness or witnesses named by the sheriff, and all the witnesses that may be named by him and the defendants; and shall examine the said witnesses on oath, with the said sheriff, if necessary, and inquire fully into the alleged offense of which the finding a scoop or drag, or other prohibited instrument on board such boat or vessel, shall be considered *prima facie* evidence of guilt, and after a full investigation of the case, if the justice shall think the charge groundless, he shall immediately discharge the said boatmen, and restore to them the boat or vessel seized by the sheriff, and all things belonging to him or them; but if he shall be of opinion that oysters have been taken and caught in contravention of this act, by said defendants, he shall require of each or every person found to be concerned, bond, with security for his appearance at the next circuit court of his county, to answer said charge, and on failure to give the same, the said justice shall commit all such defendants to the jail of the proper county; and upon such persons being found guilty, the circuit court shall fine or imprison such persons, as in cases of malicious mischief; and it shall be the duty of the sheriff to take bond with security from the owner or owners of such boat, or craft and tackle, conditioned that the same shall be forthcoming, and subject to the judgment of the said circuit court; and the said circuit court shall, at its next term thereafter direct an issue to be made up to try the fact of forfeiture of such boat; and if the issue shall be found against said boat, the court shall cause a judgment of forfeiture to be entered against the same, and shall award a *venditioni exponas* against the same.

3. Within ten days from the rendition of the judgment, it shall be the duty of the sheriff, after having given ten days'

notice, by public advertisement in three public places of his county, to sell for cash to the highest bidder, for the benefit of the State, the boat or vessel in his possession, together with the property, furniture, tackle and apparel; and the said sheriff is hereby directed to account with the auditor, and pay to the treasurer of this State, the proceeds of such sale, stating his account on oath, with the said auditor, of all expenses necessarily incurred by him in the seizure and disposition, and sale of the said property, and paying the balance that remained after deducting said expenses to the said treasurer, upon which balance the treasurer is authorized to allow him a compensation of ten per centum for his services for conducting the said business; and the said treasurer is hereby required to account for said sums as other money in his office.

4. If resistance be apprehended by the sheriff engaged in the execution of this act, he shall summon to his aid the *posse comitatus* of his county, armed and equipped as occasion may require, and without delay to perform his duty, and if resistance be made to the sheriff by the boatmen of the boat or vessel, or other persons in seizing the same, and taking such boatmen, such resistance in the boatmen or other persons shall be deemed a misdemeanor against the laws of this State, presentable by the grand jury of the county, whose officer is resisted, and punishable by fine and imprisonment, as in cases of resistance to legal process in the hands of such officer.

5. If any person or persons shall obstruct the navigation of any of the creeks, rivers or channels of this State, by throwing into the waters thereof, heaps of refuse in the process of picking the oysters for market, they shall be liable to, and incur a penalty not exceeding twenty dollars, nor less than ten dollars for each and every offense, to be recovered before a justice of the peace, one-half to the informer and the other half to the State, and the party so offending shall stand committed until the said fine, and all cost be paid or otherwise discharged by due course of law.

Chapter XXVI, Revised Code of Mississippi, 1857.

An Act for the Preservation of Game and Oysters in this State.

Art. 1. The board of police of the respective counties within this State shall have full power and jurisdiction for the protection and preservation of the oysters growing or being grown, and of the game running or being produced in a state or condition of nature within the territorial limits of each county respectively; and to regulate the times, places and circumstances under which either may be taken, and by whom and in what quantities, and to what extent made marketable; and with ample power to conserve the same for domestic use and consumption of the citizens and sojourners of the counties respectively, and also to secure a private right of property in oysters, banked, planted, or cultivated in the waters of the county. And to this end said boards of police may, from time to time, pass all such

dinances, in form of orders or resolutions, as they may respectively em necessary; and such ordinances shall from the date of their loption, or from such prospective date as may be specified, have e same force and effect as if enacted by the legislature of this State, and shall remain in force until repealed by said —.

41 Art. 2. The said board may respectively direct the publication of such ordinances, in such manner as they may judge st expedient; and copies thereof, certified by the clerk of the ard, shall at all times be taken as sufficient authentication of said linances.

Art. 3. The judicial administration of said ordinances shall per- n as matter of police, to any justice of the peace in the counties spectively, whether the act complained of transpired in his beat elsewhere in said county, or before any magistrate of any city or wn within said county, whether designated as mayor or by any er title; and the breach of any ordinance prescribed by the board police shall be decreed and taken to be a misdemeanor, and a lation of police order, and subject to forfeiture of the oysters or ne taken in violation of such police regulations, and to such fine d imprisonment as may be prescribed by said ordinances, or to or more of these penalties; and such complaints shall be sumrily heard and disposed of, as other matters affecting the public ce and order.

rt. 4. It shall be the duty of all sheriffs, constables, and town d city marshal/s, within the county, to seize with or without pros, any person or persons whom they may see and know, or have d reason to believe, to be violating any such police regulations, d to seize all such oysters or game found in the possession of such sons in violation of said police regulations, together with the ts, casts, or other conveyances or things in which oysters or game y be held or contained; and first securing the same, shall forthh convey the person or persons from whose custody the game or ters shall have been taken, before any such magistrate or justice he peace as aforesaid, to be dealt with according to the rules and ulations prescribed by such board for such offense.

rt. 5. It shall be competent for the board of police in cases of eiture of the articles seized, to determine the disposition to be le of them; and if there be any delay given to the party arrested the hearing of the case, the magistrate may cause the articles d to be disposed of before the hearing, and the proceeds to be d to abide the result.

pproved, March 11, 1856.

Chapter 30 of the Revised Code of Mississippi of 1871.

An Act in Relation to the Preservation of Game and Oysters.

Article 1.

§ 1889. The boards of supervisors of the respective counties within this State, shall have full power and jurisdiction for the protection and preservation of the oysters growing, or being grown, and of the game running or being produced, in a state or condition of nature, within the territorial limits of each county respectively; and to regulate the time, places and circumstances, under which either may be taken, and by whom and in what quantities, and to what extent made marketable; and with ample power to conserve the same for domestic use and consumption of the citizens and sojourners of the counties respectively, and also to secure a private right of property, in oysters banked, planted, or cultivated in the waters of the county. And to this end, said board of supervisors may, 2145 from time to time, pass all such ordinances, in form of orders or resolutions, as they may respectively deem necessary; and such ordinances shall, from the date of their adoption, or from such prospective date as may be specified, have the same force and effect as if enacted by the legislature of this State, and shall remain in force until repealed by said boards.

§ 1890. The said boards may respectively direct the publication of such ordinances, in such manner as they may judge most expedient; and copies thereof, certified by the clerk of the board, shall at all times be taken as sufficient authentication of said ordinances.

§ 1891. The judicial administration of said ordinances, shall pertain as matters of police, to any justice of the peace in the counties respectively, whether the act complained of transpired in his beat, or elsewhere in said county, or before any magistrate of any city or town, within said county, whether designated as mayor, or by any other title; and the breach of any ordinance prescribed by the board of supervisors, shall be decreed and taken to be a misdemeanor, and a violation of police order, and subject to forfeiture of the oysters or game taken in violation of such police regulations, and to such fine and imprisonment as may be prescribed by said ordinances, or to one or more of these penalties; and such complaints shall be summarily heard and disposed of, as other matters affecting the public peace and order.

§ 1892. It shall be the duty of all sheriffs, constables, and town and city marshals, within the county, to seize, with or without process, any person or persons, whom they may see and know, or have good reason to believe, to be violating any such police regulations, and to seize all such oysters or game, found in the possession of such person, in violation of said police regulations, together with the boats, casts, or other conveyances or things, in which the oysters or

game may be held or contained; and, first, securing the same, shall forthwith convey the person or persons from whose custody the game or oysters shall have been taken, before any magistrate or justice of the peace, as aforesaid, to be dealt with according to the rules and regulations prescribed by such boards for such offense.

§1893. It shall be competent for the boards of supervisors, in cases of forfeiture of the articles seized, to determine the disposition to be made of them, and if there be any delay given to the party arrested, for the hearing of the case, the magistrate may *be* cause the articles seized, to be disposed of before the hearing, and the proceeds to be held to abide the result.

§1894. That this act shall take effect from and after the first day of October, A. D. 1871.

Approved, April 8th, 1871.

Power of Boards of Supervisors.

§956. The boards of supervisors of the respective counties within this State shall have full power and jurisdiction for the protection and preservation of the oysters growing or being grown, and of the game running or being produced in a state of nature within the territorial limits of each county respectively; and to regulate the times, places and circumstances under which either may be taken, and by whom and in what quantities, and to what extent made marketable; and with ample power to conserve the same for domestic use and consumption of the citizens and sojourners of the counties respectively, and also to secure a private right of property in oysters, banked, planted or cultivated in the waters of the county. And to this end said boards of supervisors may, from time to time, pass all such ordinances, in form of orders or resolutions, as they may respectively deem necessary; and such ordinances shall from the date of their adoption, or from such prospective date as may be specified, have the same force and effect as if enacted by the legislature of this State and shall remain in force until repealed by said board.

(Section 956, of the Revised Code of the State of Mississippi of 1880.)

Chapter LXXXIV, Laws of Mississippi of 1884 (Page 89).

An Act to Amend Chapter 29 of the Revised Code of 1880.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That the provisions of chapter 29 of the Revised Code of 1880, are hereby so extended as to give the boards of supervisors of the respective counties within this State full power and jurisdiction for the protection and preservation of fish, shrimp and crabs within the waters and jurisdiction of each county respectively.

SEC. 2. Be it further enacted, This act shall take effect from its passage.

Approved, March 14, 1881.

Chapter LXXXIII, Laws of Mississippi of 1881 (Page 88).

An Act to Amend Section 956 of the Code Relating to the Preservation of Oysters and Game.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That section 956 of the Code of 1880 be and the same is hereby amended as follows: Add after the word "game," in the fourth line of said section, the words "and fish," and that this act take effect from the date of its passage.

Approved, March 13, 1884.

Chapter CVI, Laws of the State of Mississippi of 1886 (Page 180).

An Act to Encourage Planting Oysters, and for Other Purposes.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That all persons having or owning lands in the counties of Hancock, Harrison and Jackson in this State, fronting on the gulf of Mexico or Mississippi sound, bays or bayous, shall have the exclusive right and authority to plant oysters in the waters of said gulf of Mexico, bays and bayous, in front of their lands: *provided*, said right shall not extend across any channel, and only up and to the same, and shall in no way impede or obstruct navigation, or include any natural oyster reefs.

2147 SECTION 2. Be it further enacted, That said oysters so planted and their increase are hereby declared to be the personal property of the owners of the said land.

SEC. 3. Be it further enacted, That any person or persons who shall remove or interfere with the oysters planted by the owners of the land fronting the waters in which the oysters are planted, shall be guilty of a misdemeanor, and on conviction before any court of competent jurisdiction, shall be fined in a sum of not more than twenty five dollars and not less than five dollars, or be imprisoned in the county jail not more than twenty days nor less than one day, and that any person convicted under this act shall be confined in the county jail, until said fine and all costs are paid.

SEC. 4. Be it further enacted, That all laws in conflict with this act are hereby repealed.

Approved, March 4, 1886.

Chapter 90, Laws of Mississippi, 1888.

An Act to Amend an Act Entitled "An Act to Encourage Planting Oysters, and for Other Purposes," Approved March 4, 1886, and for Other Purposes.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That section one of an act entitled "An act to encourage planting oysters, and for other purposes," approved March 4, 1886, be and the same is hereby amended by adding to the said section the following: "And provided that no person shall fence in or stake off any of the public oyster reefs, or any part or parts thereof, in the counties of Jackson, Harrison or Hancock, under a penalty of two hundred dollars, to be recovered in any court of competent jurisdiction, in the name of the State, for the use of the common school fund.

SEC. 2. Be it further enacted, That any person who has fenced in or staked off any of the public oyster reefs, or any parts thereof, in the first section of this act mentioned, who shall not within thirty days after the passage of this act remove such fencing or stakes, and any person who shall hereafter fence or stake off such public oyster reefs, or any part thereof, shall be guilty of a misdemeanor, and on conviction shall be fined in any sum not exceeding two hundred dollars.

SEC. 3. Be it further enacted, That this act take effect and be in force from and after its passage.

Approved March 7, 1888.

Chapter 194, Laws of Mississippi of 1890 (Page 304).

An Act to Protect the Public Oyster Reefs in the Counties of Jackson, Harrison, and Hancock.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That the selling of unculled oysters in the within named counties is hereby prohibited (except for planting purposes), and any person or persons found selling or buying oysters not culled from all young and unmarketable oysters, shall on conviction for the first offense be fined in a sum of not less than twenty-five dollars and ten days in the county jail, and for the second or other offenses be fined one hundred dollars and remain months in the county jail. One-half of the fine to go to the one giving the information leading to the arrest and conviction and the other half to go to the common school fund of the State.

SEC. 2. There shall be a measure known as the oyster measure, which shall be of the following description and size: A half barrel measure shall be a tub 17 inches in diameter on the bottom (inside), inches in diameter on top (inside), and 13 inches deep (inside).

A quarter of a barrel shall be a box 6 inches deep, 12 inches wide, and 18 inches long (inside). All measures before being used shall be taken to the sheriff of the county where to be used, who shall measure them, and if they comply with the provisions of this section, he shall stamp on the measure the word "Inspected," with his name attached, and shall receive a fee of twenty-five cents for each measure stamped. And all oysters in the shell shall be sold and bought by the above mentioned measure, and any person found selling or buying oysters in the shell by any other measure, shall on conviction be fined not less than ten dollars for each offense.

SEC. 3. The catching of oysters from the public oyster reefs during the months of May, June, July and August is prohibited, except for home use and local consumption, and anyone convicted of violating the provisions of this section shall be subject to all the penalties provided in section one of this act, provided that nothing in this section shall prohibit the catching of oysters on the public reefs of Harrison county for planting purposes in said county.

SEC. 4. No person or persons shall take in any one year from the public oyster reefs more than one thousand barrels of oysters for their individual use, or for planting purposes, and any person or persons violating the provisions of this section shall be subject to all the fines and penalties as provided in section one of this act.

SEC. 5. All acts and parts of acts in conflict with this act are hereby repealed, and this act take effect and be in force thirty days after its passage.

Approved February 22, 1890.

Chapter 96 of the Annotated Code of Mississippi of 1892.

Oysters, Crabs, Fish, and Shrimp.

3080. Coast counties to regulate.—The boards of supervisors of the counties of Hancock, Harrison, and Jackson have full jurisdiction and authority for the protection and preservation of oysters, crabs, salt water fish, and shrimp in their respective counties, and they may make all the proper regulations for that purpose, to the same extent, and with like effect in every particular, and to be enforced and subject to the like penalties and forfeitures as the regulations of boards of supervisors generally for the protection of game and fish.

3081. Regulations to protect public oyster reefs.—The boards of supervisors of said counties shall have full authority to make all needful regulations, not contrary to law, for the protection of the public oyster reefs in their respective counties, and to con-
2149 serve the same for the use of the inhabitants of the State.

3082. Regulations as to shrimp.—It is unlawful to haul any shrimp-net on the beach above low tide; and the said boards of supervisors may prescribe the size of the meshes of shrimp-nets, but may not otherwise regulate the taking of shrimp. All nets of meshes smaller than those prescribed shall be forfeited.

83. Mississippi sound; regulations.—The regulations of any
y relating to the preservation and protection of oysters, fish,
, and shrimp in the Mississippi sound and adjacent waters,
not give any preference to citizens of that county over those
y other county.

84. Natural oyster-reefs public.—All natural oyster reefs belong
e public, and cannot be appropriated exclusively by any
n.

85. Unlawful to take oysters in certain months.—It is unlawful
e oysters from the public oyster-reefs during the months of
June, July and August, except for the domestic use of the in-
nts and for planting purposes, as regulated by the boards of
isors.

86. Unlawful to sell unculled oysters.—In taking oysters from
tural reefs, they shall be there culled of all young and un-
table oysters, unless taken for planting.

87. Taking of oysters limited.—Any person, corporation, or as-
on of persons shall not take from the public oyster-reefs more
wo thousand barrels, unless authorized by the board of super-
and in no case to exceed ten thousand barrels in any one

88. Oysters are personal property.—Oysters, whether in the
l reefs or in plantations, are personal property, and the sub-
larceny; and any person taking oysters from the public
r beds contrary to law or the regulations of the board of super-
shall be guilty of larceny, in addition to suffering the other
es prescribed.

89. Oyster-boats to be licensed.—The taking of oysters in any
han licensed boats, except the boat be of less than one ton bur-
d the only one belonging to the party, is prohibited; and the
of supervisors of said counties shall license oyster boats and
e all proper regulations for the same; but the fee for license
t exceed one dollar a ton burden, and the license shall be
season only, and shall be taken out in the county of the
e of the owner of the boat, or in the county where the boat
oyed, and shall be good in each of said counties. Every
boat shall have conspicuously painted on it the word
ed," and the number of the license.

90. Oyster-inspector.—The boards of supervisors of said coun-
jointly, or each may severally, appoint an oyster inspector
vise the oyster and other interests in the sound and adjacent
nd may prescribe his duties and fix his compensation.

91. Powers of oyster-inspector.—The oyster-inspector shall have
ority and power of a police officer, and he may arrest, with
ut warrant, all persons violating the laws and regulations;
may seize and hold for condemnation or forfeiture, all oysters,
h, and shrimp taken unlawfully or contrary to the regula-
d all boats, tackle, nets, and appliances used in such taking.

92. Police boats.—The said boards of supervisors may, in like

manner, purchase and equip one or more boats, to be used by
2150 the inspector as the board or boards shall direct, as police boats, and may regulate the *the* use thereof in the protection of oysters, crabs, fish, and shrimp, and the enforcement of the laws and regulations.

3093. Expenses; how defrayed.—The fees for licenses, and all fines, penalties and forfeitures for violating the laws and regulations concerning oysters, crabs, fish, and shrimp, shall constitute a special fund in each of said counties, out of which all the expenses incurred shall be paid, but any deficiency may be supplied by allowance out of the general fund of the counties. All fees, fines, penalties, and forfeitures shall be paid into the treasuries of the respective counties, and shall be disbursed only on the warrant of the board of supervisors. The several county treasurers shall be liable for all such funds on their official bonds.

3094. Planting oysters.—The sole right of planting oysters belongs to a riparian owner, and extends only up to the channel, and does not include any natural oyster-reef or bed. Stakes of such frail material as may not injure water craft may be set up to designate the bounds of the plantation; but the water shall not be fenced in or otherwise appropriated, and navigation shall not be impeded.

3095. Misdemeanor to violate laws or regulations.—Any violation of the laws and regulations relating to oysters, crabs, fish, and shrimp shall be a misdemeanor.

Chapter 129, Laws of Mississippi 1896, Page 142.

An act to regulate the fishing of oysters, crabs, fish, and shrimp in the gulf of Mexico and Mississippi sound, and to increase the public revenue by leasing public oyster grounds, and to repeal chapter 96 of the Code of 1892.

Section 1. Be it enacted by the legislature of the State of Mississippi, That the boards of supervisors of the counties of Hancock, Harrison and Jackson have full jurisdiction and authority for the protection and preservation of oysters, crabs, salt water fish, and shrimp, in their respective counties, and they may make all proper and reasonable regulations for that purpose, to *be* the same extent, and with like effect in every particular, and to be enforced and subject to the like penalties and forfeitures as the regulations of boards of supervisors generally for the protection of game and fish.

Sec. 2. That the boards of supervisors of said counties shall have full authority to make all needful and reasonable regulations, not contrary to law, for the protection of the public oyster reefs in their respective counties.

Sec. 3. That it is unlawful to haul and shrimp net on the beach above low tide; and the said boards of supervisors may prescribe the size of the meshes of shrimp nets, but may not otherwise regulate the taking of shrimp by *bona fide* residents of this State. All nets of meshes smaller than those prescribed shall be forfeited.

1. That the regulation of any county relating to the preser-
and protection of oysters, fish, crabs and shrimp, in the Mis-
sound, and adjacent waters, shall not give any preference to
itizens of that county over those of any other county.

SEC. 5. That all natural oyster reefs belong to the public
and cannot be appropriated exclusively by any person, and a
oyster reef is hereby declared to be such a reef, as from which
n can make reasonable wages by taking oysters in ordinary
r.

6. That it is unlawful to take oysters from the public oyster
ring the months of May, June, July and August, except for
nestic use of the inhabitants and for planting purposes as reg-
by the boards of supervisors.

7. That in taking oysters from the natural reefs, they shall
ed as far a- practicable, without destruction to the oyster, of
ng and unmarketable oysters, unless taken for planting.

8. That oysters, whether in the natural reefs or in planta-
re personal property, and the subject of larceny, and any
taking oysters from the public reefs or beds contrary to law,
regulations of the boards of supervisors, shall be guilty of lar-
n addition to suffering the other penalties prescribed.

9. That the sole right of planting oysters and erecting bath
and other structures in front of any land bordering on the
f Mexico or Mississippi sound, belongs to a riparian owner,
tends not more than one thousand yards from the shore, and
ot include any natural oyster reef or bed, and does not ex-
eyond any channel. Stakes of such frail material as may not
any water craft may be set up to designate the bounds of the
tion; but the water shall not be fenced in or otherwise appro-
l, and navigation shall not be impeded.

10. That the clerks of the chancery court of Harrison, Jack-
d Hancock counties be authorized to lease to *bona fide* resi-
of Mississippi for a period of fifty years, for cash, any g.ounds
Mississippi sound, covered with water, within their respective
es, which is a thousand yards from the shore, or is in front of
ublic land, or is beyond the channel from the shore for the
ng and cultivating of oysters; and no more than forty acres
e leased to a single person or corporation: Provided, however,
round planted by private individuals under the provisions of
isting laws shall not be so leased, or the owner or owners dis-
in their possession; and provided further, that this shall not
to public oyster reefs.

11. That when any person, being a *bona fide* resident of Mis-
i, desires to take advantage of section 10 of this act, he shall
a survey of the land desired to be leased by him, to be made
county surveyor, and shall also mark the boundaries of the
by placing on each corner of the same buoys, marked in such
as to clearly designate the ground sought to be leased, and
ile his petition to the clerk to lease such ground, and the ex-

penses so incurred shall be repaid to the petitioner by the clerk out of the proceeds of such lease, on the affidavit of such petitioner being filed in his office.

SEC. 12. That when any person, being a *bona fide* resident, files in the office of the clerk of the chancery court of the county in which the land is situated, the petition and survey provided for in section 11 of this act, it shall be the duty of said clerk to advertise in some newspaper published in the county, for three weeks, a notice stating the land to be leased, when to be leased, and where to be leased, and at the time and place advertised, he shall proceed to lease the same at public outcry, to the highest bidder, being a *bona fide* resident of the State of Mississippi, and the proceeds arising from the sale, after paying the expenses of advertising, surveying and marking
2152 such lands, shall be by him paid into the State treasury, and at the time of paying the same he shall also file in his office a statement of his doings under this act.

SEC. 13. That the boards of supervisors of Jackson, Harrison and Hancock counties shall never adopt any rules or regulations to prevent citizens of the State of Mississippi from dredging oysters in water fourteen feet in depth, or more, or from fishing with tongs in water of any depth.

SEC. 14. That chapter 96 of the Code of Mississippi of 1892, be and the same is hereby repealed, and this act take effect and be in force from and after its passage.

Approved March 14, 1896.

Chapter 58, Laws of Mississippi, 1902.

An act to regulate the fishing and canning of oysters in the State of Mississippi and improving and enlarging oyster beds in the Mississippi waters and to repeal chapter 96 of the Annotated Code, chapter 129 of the Laws of 1896, and chapter 90 of the Laws of 1898.

Repealing Existing Oyster Laws.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That chapter 96 of the Annotated Code, chapter 129 of the Laws of 1896, and chapter 90 of the Laws of 1898, in relation to oysters, crabs, fish and shrimp, be and the same are hereby repealed.

Board of Oyster Commissioners Created; Governor to Appoint Commissioners; Terms of Office.

SEC. 2. That a board of oyster commissioners be, and the same are hereby created, to consist of five members to be appointed by the governor, whose term of office shall begin on the first Monday in September, and shall be for five years each, except the members of the first board appointed under this act, whose terms of office

shall begin upon their appointments and shall continue for one, two, three, four, and five years, respectively, after the first Monday in September, 1902, so that one member of said board shall be appointed annually. In case of a vacancy, the governor shall appoint a successor to fill out the unexpired term. In making appointments, the governor shall endeavor to select members who are familiar with all branches of the oyster industry, but who are not engaged in catching, canning, or dealing in oysters in any way.

Meeting of Board; to Supervise Oyster Catching and Canning; Compensation of Commissioners; Duties of Secretary; Deputy Inspectors.

SEC. 3. Said board shall have an official seal and shall meet on the first Monday in each month during the canning season, and as often as business may require, at the office of the secretary of the board, and the president may call special meetings on giving one day's notice to each member. They shall receive and audit the accounts of oysters bought and caught, of all canneries and dealers, and the accounts of all inspectors and members of said board, and all the expenses incident to the carrying into effect of this act; and shall see that privilege taxes and license fees are paid and
2153 that the officers faithfully discharge their duties and shall hear complaints of any person aggrieved by the action of any officer. The members of said board shall receive as compensation five dollars per day while engaged, not to exceed twenty days in any one year, and shall receive their actual traveling expenses to be audited and allowed by the board. Said board shall annually, at a regular meeting to be held on the first Monday in September, elect a president from their number, who shall preside at all meetings and shall have but one vote, and a chief inspector, who shall not be a member of said board, who shall be familiar with the oyster industry but shall not be interested therein as fisher, packer or shipper, and who shall receive the sum of one hundred dollars per month, as such inspector, and actual railroad fare, in performing the duties of his office. Said board shall annually elect at said meeting a secretary, who may be a member of said board, and who shall perform all the duties usually performed by secretaries of like bodies to be prescribed by the board. He shall have his office at some point centrally located on the Gulf coast, to be fixed by the board. He shall keep his office open at all times during business hours. He shall keep the seal of the board, and shall receive as his compensation the sum of six hundred dollars per annum, fifty cents per each license issued, and, if a member of said board, his regular per diem. Said board shall appoint deputy inspectors, not exceeding three, who shall be familiar with fishing and culling oysters, who shall serve during the canning season. They shall visit the different points where oysters are canned or shipped and aid the inspector in enforcing the provisions of this act, and shall receive therefor the sum

of sixty dollars per month for the time they are engaged, together with their actual railroad fare.

License Fee for Catching Oysters.

SEC. 4. Any owner of any vessel of over one ton burden gross, desiring to catch or take oysters from the public oyster reefs of this State shall first obtain from the secretary of the board of oyster commissioners a license therefor, and said license shall have effect for twelve months from the first day of the month in which it is issued, and no vessel of over one ton burden gross shall be used in catching and fishing for oysters on the public reefs in the waters of this State unless so licensed.

Secretary to Account for License Blanks.

SEC. 5. The auditor shall furnish the said secretary from time to time a sufficient number of license blanks, which shall be charged to said secretary, and all unused blanks shall be accounted for annually by said secretary, and all moneys collected therefor by said secretary shall be paid into the State treasury monthly and placed to the credit of the oyster fund.

License; What to Show; Fees for Same.

SEC. 6. Each license to take and catch oysters in this State shall state the name of the applicant and the name of his or her vessel, and a license under the provisions of this act shall not be used except on the vessel so mentioned in said license, and the applicant therefor shall pay a license fee of two dollars and fifty cents on vessels of over one ton burden gross and under five tons; and five dollars for vessels of five tons and under ten; ten dollars on
2154 vessels of ten tons and under twenty; and fifteen dollars on vessels of twenty tons and over for each vessel for which he may obtain license, and fifty cents license fee to the officer issuing the same.

Unlicensed Boats Prohibited.

SEC. 7. No person shall take oysters with rakes, tongs, dredges, or other instruments from the public reefs of this State in an unlicensed boat of over one ton burden gross, and all persons engaged in taking and catching oysters shall exhibit their authority for so doing when required by an officer of the police force. Any boat of over one ton burden gross, which is not enrolled in the custom house of the United States, shall pay a license fee of two dollars and fifty cents.

Fee for Unclassified Vessels; Secretary to Receive 50 Cents for Each License.

SEC. 8. Before issuing any license, the secretary of the board shall collect the license fee, as provided for in section 6, and in case there are no measurements and the vessel or vessels are not classified by the custom house records, a license fee of two dollars and fifty cents shall be exacted from any person or persons fishing or taking oysters from the waters of this State in any canoe, barge, skiff or other vessel of over one ton burden gross. Said secretary shall receive as a fee for the issuance of said license, the sum of fifty cents for each license so issued, to be paid by the person to whom the license is issued. No license shall be required of any canoe, barge, skiff or other vessel of one ton burden gross or under.

Vessels to be Provided with Numbers.

SEC. 9. The board of oyster commissioners shall have painted a sufficient number of signs in black figures on white canvass, numbered from naught to two hundred, consecutively, and a greater number, if needed, and with each license so issued the applicant is to be furnished a number corresponding to the number of his or her license; said figures shall be twenty-two inches in length and proportionate in width, and the figures shall be at least six inches apart; the receiver of said number shall not conceal nor deface the same, but when fishing shall expose the number to view upon the sails of his or her vessel, or some conspicuous portion of such vessel, and shall at all times when fishing or tonging oysters from the public reefs of this State, expose said number at the starboard side of their vessel.

Tax on Canning Factories and Shippers.

SEC. 10. Each canning factory shall pay a privilege tax of one hundred dollars, and each shipper of raw oysters a tax of twenty-five dollars, and shall receive from the secretary of the board of oyster commissioners a license therefor upon the payment of said sum to said secretary, as well as a license fee of fifty cents for issuing the same, and it shall be unlawful for any person to can or ship raw oysters without first having paid said tax and received said license.

2155 Additional Tax on Oysters; Packer to Pay Same; When to be Collected; Record of all Oyster Purchases Kept; Not to Apply to Oysters Taken from Private Beds.

SEC. 11. In addition to the privilege license required by this act, a further tax and fee of two cents per barrel is hereby laid upon all oysters canned and packed in and on all oysters shipped raw in or

from this State, and on all oysters caught or taken from the public reefs for packing, canning, and for shipment or sale raw.

This tax shall be paid by the person, firm, or corporation packing or canning said oysters, and in cases of oysters sold or shipped raw by the dealer selling or shipping the same, that is to say, by the first dealer who handles said oysters, and any oysters sold by any person who has purchased same from a dealer who has paid the license thereon shall not be again taxed.

It shall be the duty of the inspector of State fisheries to collect from each firm, corporation, packer, commission man, dealer or other person engaged in buying and selling oysters said tax upon the first day of each month, or as soon thereafter as practicable, and oftener if he deem it necessary, and to pay the same to the treasurer once each month.

Each packer, canner, corporation, firm, commission man, and dealer shall keep a record of all the oysters purchased by them, with the names of the parties from whom purchased and date of purchase and shall keep an itemized account of all oysters caught by such packer, canner, corporation, firm, dealer, or other person, and all caught and taken by boats controlled by them, and shall exhibit the same at all times when called upon by any commissioner or officer so to do, and shall, on the first day of each month, make return under oath as to the number of barrels purchased and caught during the preceding month, and the making of any false affidavit to any return shall be perjury and punishable as if provided in other cases of perjury.

This section shall not apply to oysters taken from private bedding grounds, but the burden of proof shall be on any person having oysters in his possession to show that they came from private bedding grounds.

Taxes may be collected by the chief inspector under this section by distress, and all laws regulating the collection of other taxes by distress shall, as far as practicable, apply to the collection of this tax, but the chief inspector and not the sheriff, shall collect the same.

Oyster Fund Created.

SEC. 12. All moneys received or obtained by the payment of taxes or the issuance of licenses under the provisions of this act, except the sum of fifty cents for each licence, to be retained by the secretary, shall be paid over to the State treasurer, and shall constitute a fund to be known as the "oyster fund;" the expenses of enforcing this act shall first be paid out of said fund, and the sum of five thousand dollars annually shall be expended in improving the oyster reefs and in spreading the shells and making new bottom, under the direction of the board of oyster commissioners; the remainder of all moneys received thereunder shall, on the 15th day of September in each year, be passed to the credit of the general fund.

Oysters to be Culled.

SEC. 13. All oysters taken from the public reefs of the waters of this State, either with scoops, dredges, tongs, or other instru-
2156 ments or appliances, shall be culled upon their natural beds or bars as taken, and all young oysters measuring less than two and one-half inches from hinge to mouth, and all dead shells, shall be returned to the bed or bar from which taken, and it shall be unlawful for any person to remove from public reefs or beds where taken any oysters without immediately culling the same and returning all dead shells and young oysters to the same reefs from which taken.

How Cargo to be Culled.

SEC. 14. No captain or other person in charge of any vessel shall have oysters in his or her possession, or offer for sale in this State, oysters taken from the public oyster reefs which contain more than 7 per cent. of shells and small oysters, and in order that the inspector may arrive at the percentage of unculled oysters, he shall cause to be culled, according to law, every tenth barrel in the cargo, if he deem it necessary; if the cargo upon this basis of percentage prove unculled as required by law, the inspector shall condemn said cargo, cause the same to be reculled, and cause the young oysters and dead shells to be returned to the reefs from whence taken, and shall proceed against said offender as the law directs for such offense.

Unlawful to Buy Unculled Oysters.

SEC. 15. It shall be unlawful for any packer, commission man or other person to purchase or have in his possession, oysters not culled according to law.

Inspector to Patrol Oyster Reefs and See that Oysters are Culled; May Arrest for Violation of this Law; Licensed Vessels to Assist Inspector.

SEC. 16. The board of oyster commissioners shall provide the chief inspector with one additional inspector, who shall be a seafaring man competent to act as captain of the boat on which he shall be engaged, who shall receive a salary of sixty dollars per month during the canning season, whose duty it shall be to patrol daily the waters of the Mississippi sound under the direction of the chief inspector, and to see that all oysters taken from public oyster reefs are culled on the reefs or beds where taken, and when not otherwise engaged, the chief inspector shall patrol said sound in person, under rules to be adopted by the board; and said inspector and all subordinate inspectors shall be clothed with power to arrest with or without warrant any person who shall violate any of the provisions of this act, and to take him before a justice of the peace for trial. They

shall at all times be governed by all lawful rules and regulations prescribed by said board. It shall be the duty of every captain of a licensed vessel, when called upon by an inspector so to do, to assist said officer, both in person and with his boat and crew, in making any arrest for a violation of this act, and such captains may use such force at their command as may be necessary in making the arrest when such persons attempt to escape or resist arrest, and any such captain or member of any crew failing so to do, shall be guilty of a violation of this act, and subject to its penalties.

Patrol Board and Crew to be Provided by Commissioners.

SEC. 17. The board of oyster commissioners shall provide the necessary boat and engage the necessary crew to be employed
2157 by the chief inspector in patrolling the waters of the Mississippi sound, as aforesaid, and all expenses therefor shall be audited and allowed by the board of oyster commissioners at any regular meeting or any meetings called therefor, not to exceed in amount one hundred and forty dollars per month, exclusive of the salary of the captain, as fixed by section 16 of this act.

Reefs to be Dredged When Too Thick; Oyster Beds to be Built up.

SEC. 18. During the season between the 15th day of May and the 1st day of September in each year, the chief inspector, under the direction and control of the board of oyster commissioners, shall employ boats, crews, and laborers, and shall dredge the oysters in the Mississippi sound from places where they are too thick, and shall spread them on reefs there they are too thin, and shall carry shells from the factories and spread them in places where the oyster beds can be improved and enlarged thereby, and the board of oyster commissioners, in transplanting and spreading shells, may expend such sums out of the "oyster fund" as they may deem proper, not exceeding five thousand dollars per annum.

How Expenses to be Paid.

SEC. 19. All expenses of enforcing this act, together with the salaries of the officers herein provided for, shall be paid by the State treasurer out of the "oyster fund" on the warrant of the auditor. Whenever an allowance is made by said board, a certificate shall issue to the person to whom such allowance is made, which certificate, with a copy of the account on which the allowance is made, shall be presented to the governor, and when the governor or shall have endorsed his approval thereon, the auditor shall issue his warrant therefor.

Oysters Not to be Taken from Reefs During Certain Seasons.

SEC. 20. It shall be unlawful for any person to catch or take oysters or have oysters taken from the public oyster reefs in his or

her possession between the 15th day of May and the 15th day of September in any year, except for planting or domestic purposes or consumption in the State of Mississippi; provided, that this section shall not prevent transportation companies from carrying oysters from other States through this State, nor shall it be construed to prevent any person from taking oysters from private bedding grounds or transplanting or cultivating. And it shall be unlawful to take and catch oysters in the State of Mississippi between the 1st day of May and the 15th day of September in any year to be transported out of the State or to transport oysters in their raw state at any time out of the State of Mississippi without first paying the chief inspector a license tax of two cents per barrel.

Unlawful to Violate or Evade This Act.

SEC. 21. It shall be unlawful for any packer, commission man, or boatman to conspire or agree with any person to evade any of the provisions of this chapter, or to knowingly participate in any such violation.

Inspector's Duties; Penalty for Evading Inspection.

SEC. 22. It shall be the duty of the inspector of oysters to supervise the operation of the oyster industry and to dilligently aid in the enforcement of the provisions of this act, and it shall be unlawful for any packer, commission man, or boatman to refuse to
2158 open his house or boat where oysters may be dumped or stored, for inspection to any officer whose duty it is to inspect the same, or to conspire or agree with any other person to evade any of the provisions of this act, or to knowingly connive at or participate in such violation.

Right to Plant Oysters or Erect Bath Houses on Land Bordering the Mississippi Sound Belongs to Riparian Owner; Bounds of Oyster Plantation Marked with Stakes.

SEC. 23. The sole right of planting oysters and erecting bath houses and other structures in front of any land bordering on the gulf of Mexico or Mississippi sound, belongs to the riparian owner, and extends not more than five hundred yards from the shore, but does not include any reef or natural oyster bed, and does not extend beyond any channel. Stakes of such frail material as will not injure any water craft may be set up to designate the bounds of the plantation; but the water shall not be fenced in or otherwise appropriated, and navigation shall not be impeded.

Oysters Taken for Planting Purposes at Any Time.

SEC. 24. This act shall not prohibit any citizen of Mississippi from taking oysters from the public reefs for planting in the waters of

this State from the 15th day of May to the 1st day of July, and oysters taken for planting purposes shall not be required to be culled.

Oyster Commissioners and Secretary to Make Bonds.

SEC. 25. The members of the board of oyster commissioners shall enter into bond in the sum of two thousand five hundred dollars each, and the chief inspector in the sum of ten thousand dollars, conditioned according to law, to be approved by the governor; and the secretary and subordinate inspectors shall enter into bond in the sum of two thousand five hundred dollars each, conditioned according to law, to be approved by and filed with the board of oyster commissioners, and to be recorded in a book kept for that purpose, and each of said officers shall take an oath to faithfully discharge the duties of the office upon which he is about to enter, and shall file said oath with said secretary. No person directly or indirectly engaged in canning, shipping, fishing or dealing in oysters shall be accepted as a surety on any bond required by this act.

Board to Report to the Governor Annually.

SEC. 26. It shall be the duty of said board to make an annual report to the governor and to report to the legislature biennially, in which said reports shall be set forth in details the amount of expenses of the industry under their supervision.

Governor May Remove Members of Board.

SEC. 27. The governor shall have the power to remove the president or any member of the board for neglect of duty or incompetency, and to appoint his successor, and the board of oyster commissioners shall have the power to remove any inspector or other subordinate officer for any neglect of duty or incompetency, malfeasance or misfeasance in office, whenever the interest of the service may in their judgment require it, and to appoint another in his stead.

2159 Steam Dredges and Steam Vessels Not Allowed to Take Oysters.

SEC. 28. No steamer or other vessel using or propelled by steam or any other power than sail or hand, and no dredge, tongs, scoop, or other instrument or appliance of any character propelled, managed, aided, used or operated by means of steam or other power except hand and sail, shall be used or employed in catching or taking oysters in any of the waters of this State. This shall not prohibit the transportation by means of steam vessels of any oysters that have been lawfully caught.

Organization of Commissioners.

SEC. 29. Immediately after their appointment, the first board of oyster commissioners appointed under this act shall qualify and shall organize by electing a president and secretary who shall hold such offices until the first Monday in September, A. D. 1902.

Penalty for Violating Provisions of this Act.

SEC. 30. Any person violating any of the provisions of this act shall be fined not less than ten dollars nor more than fifty dollars, for the first offense, and not less than twenty-five dollars, nor more than five hundred dollars for any subsequent offenses.

Appropriation for Carrying Act into Effect.

SEC. 31. To meet the necessary expenses of carrying this act into effect, there shall be appropriated annually the sum of twelve thousand dollars, or so much thereof as may be necessary, out of the oyster fund of this State.

Laws Repealed Hereby to Remain in Effect for Enforcement of Penalties and Prosecution of Offenses Committed under Them.

SEC. 32. Nothing herein contained shall affect or abate any prosecutions already commenced for any violation of any law hereby repealed, nor shall this bill operate to release any person for any violation of any such law, but all such violations, whether prosecutions have or have not been heretofore begun, shall be prosecuted and punished as if such laws were still in force.

SEC. 33. That this act shall take effect and be in force from and after the first day of June, A. D. 1902.

Approved, February 13, 1902.

Chapter 113, Laws of Mississippi, 1904.

An act to make an appropriation to purchase or build a patrol boat for the use of the board of oyster commissioners and the inspectors appointed by said board in patrolling the waters of the Mississippi sound in protecting the natural reefs in said sound.

Appropriation to Purchase a Patrol Boat for Protecting Oyster Reefs.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That the sum of three thousand dollars ($3,000), or so much thereof as may be necessary, is hereby appropriated out of the oyster fund for the purpose of purchasing or building a suitable patrol boat to be used by said oyster commission and the inspectors appointed by said board in patrolling the waters of

the Mississippi sound, in protecting the natural oyster reefs and enforcing the provisions of chapter 58, Acts of 1902.

Oyster Commission to Purchase Patrol Boat.

SEC. 2. That said board of oyster commissioners is hereby authorized to purchase said patrol boat and pay therefor out of the appropriation herein provided for.

May Build Same if Suitable Boat Cannot be Purchased.

SEC. 3. That in the event that a suitable patrol boat cannot be found, said oyster commission is hereby authorized to have said patrol boat built by some competent mechanic and boat builder, according to plans and specifications furnished by said board and under the direction and supervision of said board. That said board of oyster commission- shall draw their warrants for the purchase or for the building of said boat as now provided by law out of the oyster fund, not to exceed the said sum of three thousand dollars ($3,000) and shall submit an itemized account of all expenditures made under the provision- of this act in their report to the legislature.

SEC. 4. That this act take effect from and after its passage.
Approved March 18, 1904.

2161 MISS. DOCUMENT NO. 50.

By the King. A Proclamation. George R.

Whereas, we have taken into our royal consideration the extensive and valuable acquisitions in America, secured to our crown by the late definitive treaty of peace concluded at Paris the 10th day of February last; and being desirous that all our loving subjects, as well of our kingdom as of our colonies in America, may avail themselves, with all convenient speed, of the great benefits and advantages which must accrue therefrom to their commerce, manufactures, and navigation; we have thought fit, with the advice of our privy council, to issue this our royal proclamation, hereby to publish and declare to all our loving subjects, that we have, with the advice of our said privy council, granted our letters patent under our great seal of Great Britain, to erect, within the countries and islands ceded and confirmed to us by the said treaty, four distinct and separate governments, filed and called by the names of Quebec, East Florida, West Florida, and Grenada, and limited and bounded as follows, viz.

First, the government of Quebec, bounded on the Labrador coast
the River St. John, and from thence by a line drawn from the
of that river, through the Lake St. John, to the south end of
Lake Nippissim; from whence the said line, crossing the River
Lawrence and the Lake Champlain in 45 degrees of north
ude, passes along the High Lands, which divide the rivers that
pty themselves into the said River St. Lawrence, from those
ich fall into the sea; and also along the north coast of the Baye
Chaleurs, and the coast of the gulf of St. Lawrence to Cape
anes, and from thence crossing the mouth of the River St. Law-
ce by the west end of the island of Anticosti, terminates at the
said River St. John.

Secondly. The government of East Florida, bounded to the west-
d by the gulf of Mexico and the Apalachicola river; to the
thward, by a line drawn from that part of the said river where
e Catahouchee and Flint rivers meet, to the source of St. Mary's
er, and by the course of the said river to the Atlantic ocean;
d to the east and south by the Atlantic ocean, and the gulf of
rida, including all islands within six leagues of the sea coast.

Thirdly. The government of West Florida, bounded to the south-
d by the gulf of Mexico, including all islands within six leagues
the coast from the River Apalachicola to Lake Pontchartrain;
the westward by the said lake, the Lake Maurepas, and the River
sissippi; to the northward, by a line drawn due east from that
t of the River Mississippi which lies in thirty-one degrees north
ude, to the River Apalachicola, or Catahouchee; and to the
tward by the said river.

Fourthly. The government of Grenada, comprehending the island
that name, together with the Grenadines, and the islands of Do-
ica, St. Vincent, and Tobago. * * *

Given at our court at St. James's the 7th day of October, 1763, in
third year of our reign.

God save the king.

2162 MISS. DOCUMENT No. 51.

Extract from His Most Christian Majesty's letter to M. d'Abbadie, director general and commandant for His Majesty in Louisiana, ordering him to deliver up to His Catholic Majesty all the French possessions in North America not already ceded to Great Britain. From the original, printed by Denis Brand, printer to the king at New Orleans, in October, 1764, and circulated amongst the French inhabitants there.

Mons. d'Abbadie:

By a special act, done at Fontainebleau, Nov. 3, 1762, of my own will and mere motion, having ceded to my very dear and beloved cousin the King of Spain, and to his successors, in full property, purely and simply, and without any exceptions, the whole country known by the name of Louisiana, together with New Orleans, and the island in which the said city is situated; and by another act done at the Escurial Nov. 13, in the same year, His Catholic Majesty having accepted the session of the said country of Louisiana, and the city and island of New Orleans, agreeable to the copies of the said acts, which you will find hereunto annexed; I write you this letter to inform you, that my intention is, that on receipt of these presents, whether they come to your hands by the officers of His Catholic Majesty, or directly by such French vessels as may be charged with the same, you are to deliver up to the governor, or officer appointed for that purpose by the King of Spain, the said country and colony of Louisiana, and the posts thereon depending, likewise the city and island of New Orleans, in such state and condition as they shall be found to be in on the day of the said cession, willing that in all time to come they shall belong to His Catholic Majesty, to be governed and administered by his governors and officers, and as possessed by him in full property without any exceptions.

At the same time, I hope for the prosperity and peace of the inhabitants of the colony of Louisiana, and promise myself, from the friendship and affection of His Catholic Majesty, that he will be pleased to give orders to his governor, and all other officers employed in his service in the said colony, and in the city of New Orleans, that the ecclesiastics and religious houses which have the care of the parishes and of the missions, may continue to exercise their functions, and enjoy the rights, privileges and immunities, granted by their several charters of establishment; that the ordinary judges do continue, together with the superior council, to administer justice according to the laws, forms, and usages of the colonies; that the inhabitants be preserved and maintained in their possessions; that they be confirmed in the possession of their estates, according to the grants which have been made by the governors and directors of the colony, and that all the grants be holden and taken as confirmed by His Catholic Majesty, even though not as yet confirmed by me.

Hoping, above all, that His Catholic Majesty will be pleased to bestow on his new colony of Louisiana the same marks of protection and good will, which they enjoyed while under my dominion, and of which the misfortunes of war alone have prevented their experiencing greater effects, I command you to cause my present letter to be recorded in the superior council of New Orleans, to the end that the several estates of the colony may be informed of its contents, and may have resource thereto when necessary. And the present being for no other purposes, I pray God, Monf .d'Abbadie, to have you in his holy keeping.

Given at Versailles, April 21, 1764.

(Signed) LOUIS.

2164 MISS. DOCUMENT NO. 52.

Extract.

James Madison, Secretary of State, to Robert R. Livingston, Minister to France, Dated .

DEPART. OF STATE, September 28, 1801.

You have been already informed of the intention of the President that your departure from France should be hastened, and that you would be furnished with a passage in the Boston frigate, which, after landing you at Bordeaux, is to proceed to the Mediterranean.

From different sources information has been received that, by some transaction concluded, or contemplated between France and Spain, the mouth of the Mississippi, with certain portions of adjacent territory, is to pass from the hands of the latter to the former nation. Such a change of our neighbors in that quarter is of too momentous concern not to have engaged the most serious attention of the Executive. It was, accordingly, made one of the subjects of instruction to Mr. Charles Pinckney, our minister ple-ipotentiary to the court of Spain. You will find an extract of the passage hereto annexed, No. 1. A paragraph connected with the same subject, in a letter to Mr. King, is also extracted and annexed, No. 2. In these extracts you will see the ideas entertained by the Executive, and the general considerations which, it is presumed, will have most tendency to dissuade the parties from adhering to their object. As soon as you shall have prepared the way by the necessary inquiries at Paris, it will be proper for you to break the subject to the French government, and to make the use of these considerations

most likely to give them their full weight. You will probably find it advantageous to press, in a particular manner, the anxiety of the United States to maintain harmony and confidence with the French Republic, the danger to which these will be exposed by collisions, more or less inseparable from a neighborhood under such circumstances, and the security which France ought to feel that it cannot be the interest of this country to favor any voluntary or compulsive transfer of the possessions in question from Spain to France.

Among other topics to be employed on this occasion, you may, perhaps find it eligible to remark on the frequent recurrence of war between France and Great Britain, the danger to which the western settlements of the United States would be subject of being embroiled by military expeditions between Canada and Louisiana, the inquietudes which would be excited in the Southern States, whose numerous slaves have been taught to regard the French as the patrons of their cause, and the tendency of a French neighborhood, on this and other accounts, to inspire jealousies and apprehensions which may turn the thoughts of our citizens towards a closer connexion with her rival, and possibly produce a crisis in which a very valuable part of her dominions would be exposed to the joint operation of a naval and territorial power. Suggestions of these kinds must be managed with much delicacy; or rather the expediency of hazarding them at all, as well as the manner of doing it, must be left to your own information and discretion.

Should it be found that the cession from Spain to France has irrevocably taken place, or certainly will take place, sound policy will require, in that state of things, that nothing be said or done which will unnecessarily irritate our future neighbors, or check the liberality which they may be disposed to exercise in relation to the trade and navigation through the mouth of the Mississippi; every thing being equally avoided, at the same time, which may compromit the rights of the United States beyond those stipulated in the treaty between them and Spain. It will be proper, on the contrary, to patronize the interests of our western fellow-citizens, by cherishing in France every just and liberal disposition towards their com-
2165 merce. In the next place, it will deserve to be tried whether France cannot be induced to make over to the United States the Floridas, if included in the cession to her from Spain, or at least West Florida, through which several of our rivers, particularly the important River Mobile, empty themselves into the sea. Such a proof, on the part of France, of good will towards the United States, would contribute to reconcile the latter to an arrangement in itself much disrelished by them, and to strengthen the returning friendship between the two countries; and, by affording a fund for indemnifying and soothing our fellow-citizens who have suffered from her wrongs, would, in that view, also, be a measure founded not less in an enlarged policy, than in solid justice. The great importance of West Florida to the United States recommends to your patriotism

he prudent use of every fair consideration which may favor the at-ainment of the object.

These ideas suppose that the cession to the United States is to be btained from the single will of France. But it may happen that he Floridas are so far suspended, on unfinished negotiations be-ween her and Spain, as to admit or require the concurrence of both n gratifying the wishes of the United States. In this state of things, rance may yield to the considerations suggested with less of con-ession and reluctance; and as Spain, to-, must feel an interest in the ood will of the United States, and is responsible, in justice, for very onsiderable depredations on their commerce, there may be the reater possibility of her joining in the measure.

Should the Floridas neither have been ceded to France, nor be an equisition contemplated by her, still it will be material, considering er intimate and influential relations to Spain, to dispose her to favor xperiments on the part of the United States, for obtaining from Spain he cession in view. The interest which the latter has in cultivating ur friendly dispositions, and the obligation she is under to satisfy ur claims for spoilations, for doing which no other mode may be so onvenient to her, are motives to which an appeal may be made ith no inconsiderable force. Mr. Pinckney is accordingly to avail imself of the most auspicious occasions for sounding and exciting he dispositions of the Spanish government on this subject; and our efforts at Paris cannot be too attentively combined with his at Madrid, as well on the last supposition that Spain alone is to make he cession, as on the former, that France is to have a direct share n the transaction. Mr. Pinckney's instructions will relate to each lternative, and you will be sensible of the advantages of such a orrespondence between you as will give the proper concert to your perations.

(American State Papers (Foreign Relations), vol. 2, page 510.)

(Endorsed:) Louisiana *vs.* Mississippi Miss. Doc. 52. Filed Aug. 0, '04 Wm. D. Bullard, commissioner. Office Supreme Court U. S. iled Mar. 13, 1905 James H. McKenney, clerk.

166 MISS. DOCUMENT No. 53.

(Extract *of* a Letter of Albert Gallatin, Esq., to J. Madison, Esq.)

DATE FEB'Y 7, 1803.

If West Florida can alone be purchased, it is certainly worth at-nding to; but in that case, making the River Iberville the bound-ry, as it was made in the treaty of 1762, between France and Eng-nd, the article should be so worded as to give us the whole channel that river, or at least to permit us to open it, so as to render it avigable in all seasons. At present, the bed is 30 feet above low-ater mark for 15 miles, from the Mississippi to Amit river; but I

have no doubt that a very small opening would be widened and deepened afterwards by the river. There is no obstruction, the whole being level, or mud or sand. But supposing even a portage there, the advantage of American houses settled in a- American port would soon give a preference over New Orleans to that port. The seaport may be, perhaps, on the main, between Pearl and Pargacola rivers, but certainly on that island called "Ship island," as through the passage between that and the next island there are more than 20 feet water, and good anchorage close to the shore, which faces the main. A frigate of 36 guns was seen there by E. Jones, (the first clerk in my office, who is a brother of our late consul at New Orleans, and lived ten years with him in West Florida,) and it is the reason of its bearing that name. Judge Bay says that there is another island called Deer island, close to the entrance of Lake Pontchartrain, which affords the same advantages. That Jones disbelieves; but the other is certain; and as it is about half way between Mobile and the lake, as the whole navigation between these two places is locked in by the islands, and safe even for open boats and canoes, that island would become the proper seaport for both rivers, Mississippi and Mobile; for you can bring but nine feet up Mobile bay, 7 feet over the bar of Lake Pontcgartrain, and 15 over the bar at the mouth of the Mississippi. It results from all that, that the possession of West Florida, even without New Orleans island, is extremely important and that if it can be obtained, it ought expressly to include all the islands within twenty leagues, or such distance as to include those which are marked on the map.

(Endorsed:) Louisiana *vs.* Mississippi. Miss. Doc. 53. Filed Aug. 20/04 Wm. D. Bullard, commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905, James H. McKenney, clerk.

2167 MISS. DOCUMENT NO. 54.

Letter of Secretary of State to Mr. Monroe, Minister to Spain, of Date July 29, 1803.

The communications by Mr. Hughes, including the treaty and conventions signed with the French government, were safely delivered on the 14th instant. Enclosed is a copy of a letter written in consequence of them to Mr. Livingston and yourself.

On the presumption which accords with the information given by Mr. Hughes, that you will have proceeded to Madrid, in pursuance of the instructions of the 17th February last, it is thought proper to observe to you, that although Louisiana may, in some respects, be more important than the Floridas, and has more than exhausted the funds allotted for the purchase of the latter, the acquisition of the Floridas is still to be pursued, especially as the crisis must be favorable to it.

You will be at no loss for the arguments most likely to have weight in prevailing on Spain to yield to our wishes. These colonies, separated from her other territories on this continent by New Orleans, the Mississippi, and the whole of western Louisiana, are now of less value to her than ever; whilst to the United States they retain the peculiar importance derived from their position, and their relations to us through the navigable rivers, running from the United States into the gulf of Mexico. In the hands of Spain, they must ever be a dead expanse in time of peace; indefensible in time of war, and at all times a source of irritation and ill blood with the United States. The Spanish government must understand, in fact, that the United States can never consider the amicable relations between Spain and them as definitely and permanently secured, without an arrangement on this subject, which will substitute the manifest indications of nature for the artificial and inconvenient state of things now existing.

The advantage to be derived to your negotiations from the war that has just commenced will certainly not escape you. Powerful, it might be presumed effectual, use may be made of the fact that Great Britain meant to seize New Orleans with a view to the anxiety of the United States to obtain it; and of the inference from that fact that the same policy will be pursued with respect to the Floridas. Should Spain be engaged in the war, it cannot be doubted that they will be quickly occupied by a British force, and held out on some condition or other to the United States. Should Spain be still at peace, and wish not to lose her neutrality, she should reflect that the facility and policy of seizing the Floridas must strengthen the temptations of Great Britain to force her into the war. In every view it will be better for Spain that the Floridas should be in the hands of the United States than of Great Britain; and equally so that they should be ceded on beneficial terms by herself, than that they should find their way to us through the hands of Great Britain.

The Spanish government may be assured of the sincere and continued desire of the United States to live in harmony with Spain; that this motive enters deeply into the solicitude of their government for a removal of the danger to it which is inseparable from such a neighborhood as that of the Floridas; and that, having by a late convention with Great Britain adjusted every territorial question and interest with that nation, and the treaty with France
2168 concerning Louisiana having just done the same with her, it only remains that the example be copied into an arrangement with Spain, who is evidently not less interested in it than we are.

By the enclosed note of the Spanish minister here, you will see the *the* refusal of Spain to listen to ou. past overtures with the reasons for the refusal. The answer to that communication is also enclosed. The reply to such reasons will be very easy. Neither the reputation nor the duty of His Catholic Majesty can suffer from any measure founded in wisdom and the true interests of Spain. There is as little

ground for supposing that the maritime powers of Europe will complain of, or be dissatisfied, with a cession of the two Floridas to the United States, more than with the late cession of Louisiana by Spain to France, or more than with the former cessions through which the Floridas themselves have passed. What the treaties are subsequent to that of Utrecht, which are alleged to preclude Spain from the proposed alienation, have not been examined. Admitting them to exist in the sense put upon them, there is probably no maritime power who would not readily acquiesce in our acquisition of the Floridas as more advantageous to itself, than the retention of them by Spain. Shut up against all foreign commerce, and liable at every moment to be thrown into the preponderant scale of Great Britain, Great Britain her self would unquestionably have no objection to their being transferred to us, unless it should be drawn from her intention to conquer them for herself, or from the use she might expect to make of them in a negotiation with the United States. And with respect to France, silence at least is imposed on her by the cession to the United States of the province ceded to her by Spain, not to mention that she must wish to see the Floridas, like Louisiana, kept out of the hands of Great Britain; and has, doubtless, felt that motive in promising her good officers with Spain for obtaining these possessions for the United States. Of this promise, you will, of course, make the proper use in your negotiations. For the price to be given for the Floridas, you are referred, generally, to the original instructions on this point. Although the change of circumstances lessens the anxiety for acquiring immediately a territory which now more certainly than ever, must drop into your hands, and, notwithstanding the pressure of the bargain with France on our Treasury, yet, for the sake of a peaceable and fair completion of a great object, you are permitted by the President, in case a less sum will not be accepted, to give two millions and a quarter of dollars, the sum heretofore apportioned to this purchase. It will be expected, however, that the whole of it, if necessary, be made applicable to the discharge of debts and damages claimed from Spain, as well those not yet admitted by the Spanish government as those covered by the convention signed with it by Mr. Pinckney, on the 11th day of August, 1802, and which was not ratified by the Senate, because it embraced no more of the just responsibilities of Spain. On the subject of these claims you will hold a strong language. The Spanish government may be told plainly that they will not be abandoned any further than an impartial tribunal may make exceptions to them. Energy in the appeal to its feelings will not only tend to justice for past wrongs, but to prevent a repetition of them in case Spain should become a party to the present war.

In arranging the mode, the times, and the priorities, of paying the assumed debts, the ease of the Treasury is to be consulted as much as possible: less is not to be done with that view than was enjoined in the case of the French debts to our citizens. The stock to be engaged in the transaction is not to be made irredeemable without a

necessity not likely to arise; and the interest, as well as the
2169 principal, should be payable at the Treasury of the United States. The only admissable limitation, on the redemption of the stock, is that the holder shall not be paid off in less than about one fifth or one fourth of the amount in one year.

Indemnifications for the violation of our deposite at New Orleans have been constantly kept in view in our remonstrances and demands on that subject. It will be desirable to comprehend them in the arrangement. A distinction, however, is to be made between the positive and specific damages sustained by individuals, and the general injuries accruing from that breach of treaty. The latter could be provided for by a gross and vague estimate only, and need not be pressed as an indispensable condition. The claim, however, may be represented as strictly just, and a forbearance to insist on it as an item in the valuable considerations for which the cession is made. Greater stress may be laid on the positive and specific damages capable of being formerly verified by individuals; but there is a point beyond which it may be prudent not to insist even here; especially as the incalculable advantage accruing from the acquisition of New Orleans will diffuse a joy throughout the western country, that will drown the sense of these little sacrifices. Should no bargain be made on the subject of the Floridas, our claims of every sort are to be kept in force.

If it be impossible to bring Spain to a cession of the whole of the two Floridas, a trial is to be made for obtaining either, or any important part of either. The part of West Florida adjoining the territories now ours, and including the principal rivers falling into the Gulf, will be particularly important and convenient.

It is not impossible that Spain, in treating on a cession of the Floridas, may propose an exchange of them for Louisiana beyond the Mississippi, or may make a serious point of some particular boundary, to that territory. Such an exchange is inadmissable.

In intrinsic value there is no equality; besides the advantage given us by the western bank of the entire jurisdiction of the river. We are the less disposed also to make sacrifices to obtain the Floridas, because their position and the manifest course of events guaranty an early and reasonable acquisition of them. With respect to the adjustment of a boundary between Louisiana and the Spanish territories, there might be no objection to combining it with a cession of the Floridas, if our knowledge of the extent and character of Louisiana were less imperfect. At present, any arrangement would be a step too much in the dark to be hazarded; and this will be a proper answer to the Spanish government. Perhaps the intercommunications with the Spanish government on this subject, with other opportunities at Madrid, may enable you to collect useful information and proofs of the fixed limits, or of the want of fixed limits, to western Louisiana. Your *injuries* may also be directed to the question, whether any, and how much, of what passes for West Florida, be fairly included in the territory ceded to us by France?

The treaties and transactions between Spain and France will claim particular attention in this inquiry.

Should no cession whatever be attainable, it will remain only for the present to provide for the free use of the rivers running from the United States into the Gulf. A convenient deposite is to be pressed as equally reasonable there as on the Mississippi; and
2170 the inconveniency experienced on the latter from the want of a jurisdiction over the deposite, will be an argument for such an improvement of the stipulation. The free use of those rivers for our external commerce is to be insisted on as an important right, without which the United States can never be satisfied; and without an admission of which, by Spain, they can never confide either in her justice or her disposition to cultivate harmony and good neighborhood with them. It will not be advisable to commit the United States into the alternative of war, or a compliance on the part of Spain; but no representation short of that can be stronger than the case merits.

The instruction to urge on Spain some provision for preventing or rectifying by a delegated authority, here, aggressions and abuses committed by her colonial officers, is to be regarded as of high importance. Nothing else may be able to save the United States from the necessity of doing themselves summary justice. It cannot be expected that they will long continue to wait the delays and the difficulties of negotiating, on every emergency, beyond the Atlantic. It is more easy, and infinitely more just, that Spain and other European nations should establish a remedy on this side of the Atlantic, where the source of the wrongs is established, than that the complaints of the United States should be carried to the other side, and, perhaps, wait till the Atlantic has moreover been twice crossed in procuring information for the other party, without which a decision may be refused.

The navigation of the bay of St. Mary's is common to Spain, and the United States; but a light-house, and the customary water marks, can be established within the Spanish jurisdiction only. Hitherto, the Spanish officers have refused every proper accommodation on this subject. The case may be stated to the government of Spain, with our just expectation that we may be permitted either to provide the requisite establishments ourselves, or to make use of those provided by Spain.

This letter will be addressed to Madrid; but as it is possible that you may not have left Paris, or may have proceeded to London, a copy will be forwarded to Paris, to be thence, if necessary, sent on to London. In case it should find you either at Paris or London, it must be left to your own decision how far the call for you at either of those places ought to suspend these instructions. Should you desire to go to Madrid, it may be proper first to present your credence to the French or British government, as the case may be; and to charge a fit person with the public business during your absence. Should you even be at Paris, and your commission filled up in Lon-

don, it may be best to proceed first to London, if the call to Madrid be not very urgent.

I shall write to Mr. Pinckney, and inform him that this letter is intended for his use jointly with yours; though addressed to you alone, because in part not applicable to him. Should you suspend, or have suspended, your visit to Madrid, you will please to write to him also, giving him your ideas as to the expediency of prosecuting the object of the joint instructions or not until you can be with him.

I have the honor to be &c.

JAMES MADISON.

(Endorsed:) Louisiana *vs.* Mississippi Miss. Doc. 54 Filed Aug. 20, '04 Wm. D. Bullard, commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905 James H. McKenney, clerk.

2171 MISS. DOCUMENT NO. 55.

Extracts from another letter of instructions addressed to Mr. Monroe, April 15, 1804, as minister extraordinary, jointly with Charles Pinckney, Esq., to the court of Spain, with which was enclosed a draft of an agreement to be proposed and obtained if possible.

Sections 1 and 2 of article 1 of the proposed agreement are as follows:

Art. 1, § 1. Spain acknowledging and confirming to the United States the cession of Louisiana, in an extent eastwardly to the River Perdido, cedes to them forever all the territory remaining to her between the Mississippi, the Atlantic, and the gulf of Mexico, together with *all* the islands annexed thereto, either whilst the Floridas belonging to Great Britain, or after they became provinces of Spain.

Or, if the article be unattainable in that form, Spain cedes to the United States forever all the territory, with the islands belonging thereto, which remain to her between the Mississippi, the Atlantic, and the gulf of Mexico.

§ 2. Possession of the said territory shall be delivered to a person or persons authorized by the United States to receive the same, within — days, or less, if practicable, after the exchange of the ratifications of this convention. With the said territory shall be delivered all public property, excepting ships and military stores, as also all public archives belonging to the provinces comprehending the said territory.

Then, in commenting upon these sections, the author continues.

The first form of article 1, § 1, is preferred, because it explicitly recognizes the right of the United States under the treaty of St. Ildefonso, and of April 30, 1803, to the River Perdido, which is con-

structively provided for only in the second form. It is indispensable that the United States be not precluded from such a construction, first, because they consider the right as well founded; secondly, and principally, it is known that a great proportion of the most valuable lands between the Mississippi and the Perdido have been granted by Spanish officers since the cession was made by Spain.

These illicit speculations cannot otherwise be frustrated than by considering the territory as included in the cession made by Spain, and thereby making void all Spanish grants of subsequent date.

It is represented that these grants have been extended, not only to citizens of the United States, but to others whose interests now lies in supporting the claim of Spain to that part of Louisiana, in opposition to that of the United States. It is conjectured that M. Laussat himself has entered into these speculations, and that he felt their influence in the declaration made confidently to our commissioners at New Orleans, that no part of West Florida was included in Louisiana.

In supporting the extent of Louisiana to the Perdido, you will find materials for your use in the extent above referred to, and the other documents annexed, to which you will add the result of your own reflections and researches. The secret treaty between France and Spain, ceding Louisiana west of the Mississippi to Spain, and which has never been printed, may doubtless be obtained at Paris, if not at Madrid, and may be of use in the discussion. From the references in the French orders of 1764, for the delivery of the province, it is presumed to be among archives at New Orleans; and Governor Claiborne has been requested to send a copy of it: but it may not be received in time to be forwarded for your use. In an English work, "The Life of Chatham," printed in 1793, for J. S. Gordon, London, No. 166, Fleet street, I find a memorial referred to
2172 but not there printed, with the other negotiations preceding the peace of 1762–'3, expressly on the subject of the limits of Louisiana, and, as sufficiently appears, with a view to give the province its extent to the Perdido. You will perhaps be able to procure in London or Paris a sight of this document: it probably contains most of the proofs applicable to the question, and will be the more important as proceeding from France; it will strengthen our lien on her seconding our construction of the treaty. The memorial will be the more important still, if it should be found to trace the western limits also of Louisiana, and to give it a corresponding extent on that side. In page 416 and sequel of vol. 1, you will see the fact established that the Floridas, including the French part, were ceded to Great Britain as the price for the restoration of Cuba, and that, consequently, the French part now claimed by the United States was a cession purely for the benefit of Spain.

The reasons, beyond the advantages held out in the arrangement itself, which may be addressed to Spain, as prompting a cession of her remaining territory eastward of the Perdido, will be found in the remarks in the extract aforesaid, in the instructions to Mr. Pinck-

ney and yourself of the 17th day of February last, and in those which have from time to time been given to Mr. Pinckney. The Spanish government cannot but be sensible that the expense of retaining any part of that territory must now more than ever exceed any returns of profit; that, being now more than ever indefensible, it must the more invite hostile expeditions against it from European enemies; and that, whilst in her hands, it must be a constant source of danger to harmony with the United States.

(American State Papers, (Foreign Relations) vol. II, pp. 628, 629.)

(Endorsed:) Louisiana *v.* Mississippi Miss. Doc. No. 55 Filed Aug. 20, '04. Wm. D. Bullard, commissioner. Office Supreme Court U. S. Filed Mar. 13 1905 James H. McKenney, clerk.

2173 MISS. DOCUMENT No. 56.

Letter of James Madison to Messrs. Monroe and Pinckney, of Date July 8, 1804.

GENTLEMEN: Since the instructions given you on the 15th of April last, further views have been obtained with respect to the interior of Louisiana, and the value which Spain will probably put on such a limitation of our settlements beyond the Mississippi as will keep them for some time at a distance from hers. The President has accordingly become the more anxious that, in the adjustment authorized by those instructions, the terms may be made favorable to the United States. He does not, indeed, absolutely restrain you from yielding to the ultimatum therein fixed, in case it be required by the inflexibility of the Spanish government, and particularly by the posture and prospect of affairs in Europe; but he is not a little averse to the *occulsion*, for a very long period, of a very wide space of territory westward of the Mississippi, and equally so to a perpetual relinquishment of any territory whatever eastward of the Rio Brovo. If this river could be made the limit to the Spanish settlements, and the Rio Colorado the limit to which those of the United States may be extended; and if a line northwest or west from the source of whatever river may be taken for the limit of our settlements could be substituted for the ultimatum line running from the source of the Sabine to the junction of the Osages with the Missouri, and thence, northward, parallel with the Mississippi, the interval to be unsettled for a term of years would be defined in a manner peculiarly satisfactory. The degree, however, in which you are to insist on these meliorations of the arrangement, must be regulated by your discretion, and by the effect which the probable course of events will have on the temper and policy of Spain. Should she be engaged in the war, or manifestly threatened with that situation, she cannot fail to be the more anxious for a solid accommodation on all points with

the United States; and the more willing to yield, for that purpose, to terms, which, however proper in themselves might otherwise be rejected by her pride and misapplied jealousy. According to the latest accounts from Great Britain, a revolution in the ministry, if not a change on the throne, was daily expected; and, from either of those events, an extension of the war to Spain, if not precluded by the less probable event of a speedy peace with France, would be a very natural consequence. It is to be understood, that a perpetual relinquishment of the territory between the Rio Bravo and Colorado is not to be made, nor the sum of — dollars paid without the entire cession of the Floridas; nor any money paid in consideration of the acknowledgment by Spain of our title to the territory between the Iberville and the Perdido. But a proportional sum out of the — dollars may be stipulated for a partial cession of territory eastward of the Perdido. If neither the whole nor part of East Florida can be obtained, it is of importance that the United States should own the territory as far as the Appalachicola, and have a common, if not exclusive right to navigate that stream. I must repeat that great care is to be taken that the relinquishment by Spain of the territories westward of the Perdido be so expressed as to give to the relinquishment of the Spanish title the date of the treaty of St. Ildefonso. The reason for this was before explained, and is strengthened by recent information, as you will find by the annexed extract of a letter from Governor Claiborne. Other proofs might be added. In any further cession of territory, it may be well so to define it, as to guard
2174 as much as possible against grants irregular or incomplete, or made by Spanish officers in contemplation of such a cession.

On entering into conferences with the Spanish ministry, you will propose and press, in the strongest manner, an agreement that neither Spain nor the United States shall, during the negotiation, strengthen their situation in the territory between the Iberville and the Perdido, and that the navigation of the Mobile shall not be interrupted. An immediate order from the Spanish government to this effect may be represented as of the greatest importance to the good understanding between the two countries; and that the forbearance of the United States thus long is a striking proof of their sincere desire to maintain it. If such an order should be declined, you will not fail to transmit the earliest information of it, as well as to keep up such representations to that government on the subject, as will impress it with the tendency of so unreasonable and unfriendly a proceeding to drive the United States into arrangements for balancing the military force of Spain in that quarter, and for exerting their right of navigation through the Mobile. This navigation has become important, or rather essential; and a refusal of Spain to acquiesce in it must commit the peace of the two nations to the greatest hazard. The posture of things there is already extremely delicate, and calls for the most exemplary moderation and liberality in both the governments. As a proof of it, I enclose a correspondence between Governor Claiborne and the Spanish govern-

ment at Pensacola, on the same subject as that of mine with the Marquis de Yrujo, already transmitted to you.

I have the honor &c. &c.

JAMES MADISON.

2175 MISS. DOCUMENT No. 57.

Extract from Message of Thomas Jefferson, President of the United States, to Both Houses of Congress, November 8, 1804.

* * * * * * *

Soon after the passage of the act of the last session, authorizing the establishment of a district and port of entry on the waters of the Mobile, we learned that its object was misunderstood on the part of Spain. Candid explanations were immediately given, and assurances that, reserving our claims in that quarter as a subject of discussion and arrangement with Spain, no act was meditated in the mean time inconsistent with the peace and friendship existing between the two nations; and that conformably to these intentions would be the execution of the law. That government had, however, thought proper to suspend the ratification of the convention of 1802. But the *the* explanations which would reach them soon after, and still more the confirmation of them by the tenour of the instrument establishing the port and district, may reasonably be expected to replace them in the disposition and views of the whole subject, which originally dictated the convention.

2176 MISS. DOCUMENT No. 58.

Extract from Letter of Mr. Monroe to Mr. Talleyrand, of Date Nov. 8, 1804.

SIR: Before the conclusion of the late treaty between the United States and France, Your Excellency will recollect that it was an object of the President to acquire of Spain, by amicable arrangement, Florida; it being that portion of her territory which she held east-

ward of the Mississippi. It was also his object, after the conclusion of that treaty, not that it was pressed by such imperious considerations as before, but that, as it would contribute to remove all cause of uneasiness and jealously between the two powers, they might adopt and harmonize in future such a system of policy as might secure to them peace, and give additional protection to their possessions in that quarter, especially to those of Spain. In the conferences which produced the treaty above mentioned, the good offices of His Imperial Majesty were engaged to the United States in any negotiation which the President might commence with the Catholic King, for the acquisition of Florida. The same assurance was renewed after the conclusion of the treaty, though it was intimated that that was not a suitable time for the commencement of such a negotiation. It was, on that intimation, as Your Excellency will also recollect, at a moment when I was about to set out for Spain in pursuit of the object, (the then recent orders of the President permitting it,) that I postponed my journey thither, and took a different position. The proposed negotiation with Spain was, in consequence, and has since remained, suspended; and it was in obedience to late orders from my Government that I am now so far on my way to Madrid on that subject, and that Mr. Livingston has requested the good offices of the Emperor in support of it. It is proper here to remark, that, since the epoch referred to, the treaty then just concluded between the United States and France has been carried in effect, in its great points, with that scrupulous attention to good faith which does to both parties the highest honor. Their conduct in that transaction gives to each a pledge for the integrity which is to prevail in their future intercourse. I may be permitted to add, that, as I declined my visit to Spain at that epoch, the more readily to give an opportunity for the complete execution of that treaty, so, now that it is carried into effect, I undertake it with the greater pleasure, since it confirms me in the confidence, before entertained, of the support which would be given to it by His Imperial Majesty.

The President has been induced to adopt this measure at this time, by considerations the most urgent. As these are inseparably connected with the proposed negotiation, indeed, form, in part, the object of it, it is due to the friendship subsisting between our governments, and to the candor which the President will never fail to observe in his transactions with the Emperor, to give you a distinct idea of them. They will, I doubt not, satisfy you that the President has heretofore shown a sincere desire to cultivate the friendship of the Catholic King, and that the attempt which he now makes to preserve that relation is a new and signal proof of that disposition.

Since the treaty between the United States and France, whereby Louisiana was ceded to the former, a question has arisen between those States and Spain, relative to the boundaries of the ceded territory. It is understood that the government of Spain entertains an idea that that cession comprises only that portion of Louisiana
2177 which was ceded to it by France in 1762; that it does not comprise that portion also which was ceded by her, at the

same time, to Great Britain, distinguished, while in her possession, by the name of West Florida. This pretension of the court of Spain cannot, it is presumed, be supported by even the color of an argument. Had that been the intention of the parties in the treaty of St. Ildefonso, it would have been easy to have provided for it. The idea was a simple one, which a few plain words would have expressed. But the language of the article referred to conveys a very different sentiment. We find in it nothing which countenances a presumption that the emperor meant to retake from Spain only a portion of Louisiana, or to refer to it in a dismembered state. It was natural to suppose, in accepting a retrocession of that province from a power possessed of the whole, that he would take it entire, such as it was when France possessed it. Accordingly, we find that the terms of the article making the cession are as full and explicit to that object as it was possible to use. It is not stipulated that Spain should cede to France that portion of Louisiana only which she had received from France, or that West Florida should be excepted from the cession. It is, on the contrary, stipulated that she shall cede it such as it was when France possessed it; that is, such as it was before it was dismembered by the cessions afterwards made to Spain by Great Britain; that she should cede it with the same extent that it now has in the hands of Spain; that is, entire, which it became by the treaty of 1783, whereby West Florida was ceded by Great Britain to Spain; such as it is according to subsequent treaties between Spain and other powers: a stipulation which does honor to His Catholic Majesty, since it proves that, in making the cession to France, he intended to cede only what he had a right to cede; that he recollected the treaty which he had concluded with the United States in 1795, knew the extent of its obligations, and was resolved to execute them with good faith. Your Excellency will receive, within, a paper containing an examination of the boundaries of Louisiana, which, it is presumed, proves incontestably the doctrine above advanced, as also that the River Perdido is the ancient, and, of course, present boundary of that province to the east, and the Rio Bravo to the west.

(American State Papers (Foreign Relations) vol. II, p. 634).

(Endorsed:) Louisiana *vs.* Mississippi Miss. Doc. 58. Filed Aug. 20 '04 Wm. D. Bullard, commissioner Office Supreme Court U. S. Filed Mar. 13, 1905 James H. McKenney, clerk.

2178 MISS. DOCUMENT No. 59.

Letter of Mr. Talleyrand to General Armstrong, of Date December 21, 1804.

SIR: I had the honor, in Brumaire last, to inform Mr. Livingston that I would submit to the inspection of His Imperial Majesty the letters he addressed to me relative to the motives of Mr. Monroe's

journey to Spain, and some discussions between the court of Madrid and the United States.

Among the observations made on this subject by Messrs. Livingston and Monroe, His Imperial Majesty has been obliged to give particular attention to those bearing on the discussions, of which the object is peculiarly interesting to the French government. He has perceived that he could not have been a stranger to the examination of these discussions, since they grew out of the treaty by which France has ceded Louisiana to the United States; and His Majesty has thought that an explanation, made with that fidelity which characterizes him, on the eastern boundaries of the ceded territory, would put an end to the differences to which this cession has given rise.

France, in giving up Louisiana to the United States, transferred to them all the rights over that colony which she had acquired from Spain; she could not, nor did she wish to, cede any other; and, that no room might be left for doubt in this respect, she repeated, in her treaty of 30th April, 1803, the literal ex-ressions of the treaty of St. Ildefonso, by which she has acquired that colony two years before.

Now it was stipulated, in her treaty of the year 1801, that the acquisition of Louisiana by France was a retrocession; that is to say, that Spain restored to France what she had received from her in 1762. At that period she had received the territory bounded on the east by the Mississippi, the River Iberville, the Lakes Maurepas and Pontchartrain; the same day France ceded to England, by the preliminaries of peace, all the territory to the eastward. Of this Spain had received no part, and could, therefore, give back none to France.

All the territory lying to the eastward of the Mississippi and the River Iberville, and south of the 32d degree of north latitude, bear the name of Florida. It has been constantly designated in that way during the time that Spain held it; it bears the same name in the treaties of limits between Spain and the United States; and, in different notes of Mr. Livingston of a later date than the treaty of retrocession, in which the name of Louisiana is given to the territory on the west side of the Mississippi; of Florida to that on the east of it.

According to this designation, thus consecrated by time, and even prior to the period when Spain began to possess the whole territory between the 31st degree, the Mississippi, and the sea, this country ought, in good faith and justice, to be distinguished from Louisiana.

Your Excellency knows that, before the preliminaries of 1762, confirmed by the treaty of 1763, the French possessions, situated near the Mississippi, extended as far from the east of this river, towards the Ohio and the Illinois, as in the quarters of the Mobile; and you must think it as unnatural, after all the changes of sovereignty which that part of America has undergone, to give the name

Louisiana to the district of Mobile, as to the territory more to
north, on the same bank of the river, which formerly belonged
France.

These observations, sir, will be sufficient to dispel every
9 kind of doubt, with regard to the extent of the retrocession
made by Spain to France, in the month of Vendemiare, year
It was under this impression that the French and Spanish pleni-
entiaries negotiated, and it was under this impression that I have
e had occasion to give the necessary explanations when a proj-
was formed to take possession of it. I have laid before His Im-
ial Majesty the negotiations of Madrid which preceded the treaty
801, and His Majesty is convinced that, during the whole course
hese negotiations, the Spanish government has constantly re-
d to cede any part of the Floridas, even from the Mississippi to
Mobile.

His Imperial Majesty has, moreover, authorized me to declare to
, that, at the beginning of the year 11, General Bournonville was
rged to open a new negotiation with Spain for the acquisition of
Floridas. This project, which has not been followed by any
ty, is an evident proof that France has not acquired, by the
ty retroceding Louisiana, the country east of the Mississippi.

The candor of these observations proves to you, sir, how much
ue His Majesty attaches to the maintenance of a good under-
nding between two powers, to whom France is united by con-
ions so intimate and so numerous. His Majesty, called upon to
e explanations on a question which interested France directly,
suades himself that they will leave no ground of misunderstand-
between the United States and Spain; and that these two powers,
mated, as they ought to be, by the sentiments of friendship which
r vicinity and their position render so necessary, will be able to
e with the same facility on the other subjects of their discus-
.

This result His Imperial Majesty will learn with real interest.
saw with pain the United States commence their differences
Spain in an unusual manner, and conduct themselves towards
Floridas by acts of violence, which, not being founded in right,
ld have no other effect but to injure its lawful owners. Such an
ression gave the more surprise to His Majesty, because the
ted States seemed, in this measure, to avail themselves of their
ty with France as an authority for their proceedings, and be-
se he could scarcely reconcile, with the just opinion which he
rtains of the wisdom and fidelity of the Federal Government, a
rse of proceedings, which nothing can authorize, towards a power
ch has long occupied, and still occupies, one of the first ranks in
ope.

ut the Federal Government having entered the path of negotia-
, and the question which divided the two powers being cleared
there is reason to hope that they will easily agree on the other

points; and His Majesty, from the sincere interest which he feels for the equal prosperity of the two nations, ardently desires.

Accept sir, the assurance of my high consideration.

CH. MAU. TALLEYRAND.

2180 MISS. DOCUMENT No. 60.

Extract from a Letter of Messrs. Monroe and Pinckney to Mr. Cevallos, of Date January 28, 1805.

There is another question which it is equally proper to adjust at this time. By the cession of Louisiana by His Majesty the Emperor of France to the United States, it becomes necessary to settle its boundary with the territories of His Catholic Majesty in that quarter. It is presumed that this subject is capable of such clear and satisfactory illustration, as to leave no cause for any difference of opinion between the parties. By the treaty of April 30, 1803 between the United States and France, the latter ceded to the former the said province, in full sovereignty, in the same extent, and with all the rights which belonged to it, under the treaty of October, 1800, by which she had acquired it of Spain. That the nature and extent of the acquisition might be precisely known, the article of the treaty of St. Ildefonso, making the cession, is inserted in that of Paris. To a fair and just construction, therefore, of that article the United States are referred for the extent of their rights under the treaty of 1803. There is nothing to oppugn its force or detract from the import of its very clear and explicit terms. We have the honor to present to Your Excellency a paper on this subject, which, we presume, proves, in the most satisfactory manner, that the boundaries of that province, as established by the treaties referred to, are the River Perdido to the east and the Rio Bravo to the west. The facts and principles which justify this conclusion are so satisfactory to our Government, as to convince it that the United States have not a better right to the island of New Orleans, under the cession referred to, than they have to the whole district of territory which is above described. Aware, however, that the question of boundary was one in which His Catholic Majesty was also interested, the President was not unmindful of what was due to that consideration. In pursuing and supporting the just rights of the United States, he is far from wishing to interfere with, or encroach on, those of Spain. As neighbors, he was also sensible of what was due to that interesting relation; and as a power which claims respect in its intercourse with

nations, he was resolved to give a distinguished proof of that United States for His Catholic Majesty in the present case. o step has been taken since the territory was surrendered to States by France, otherwise than a strong expression by the ss of its sense of their rights; no portion of it has been gar-, or even possessed by their troops, which could involve any n of the kind adverted to, or manifested a disposition incom- with these just and friendly sentiments. His definitive ar- ents are yet to be taken. He seeks to adopt them in har- with the sentiments and interests of His Catholic Majesty—a which induced the measure of an extraordinary mission, and s this communication.

r, we have treated of the boundary which of right ought to blished between the two nations. It is proper, however, to e and treat the subject in another view.

he acquisition of Louisiana, the United States and Spain have d, in some respects, a new relation to each other. It is in its a very interesting one. It is practicable, at this time, to place ch a footing, by suitable arrangements, as to preserve their ip for ages. The importance of the subject merits their very ionate consideration, since a failure to adopt such may be pro- of much harm. Happily, it is an unquestionable truth, that, n consideration of the permanent and substantial interest of he two powers, there does not exist at present a single point f collision, an opposing interest between them. There are me topics of uneasiness and jealousy easy to be removed, but f suffered to remain, may engender animosities, embitter their rse, and finally prove the cause of much trouble, and even ne, to both nations. To remove them requires no sacrifice; ontrary, much will be gained, since, by so doing, their har- nd with it their permanent interests, will be secured.

effect does the acquisition of Louisiana by the United States on the interests of the two powers in reference to each and what ought it to produce in their policy? These ques- mit a ready answer. That province is bounded by Florida st, and Mexico to the west; hence, Florida is surrounded on de, that of the ocean excepted by the territory of the United It is, of course, an object with those States to possess it. Louisiana extends westward to Mexico, it is presumed to be t with Spain to retard the progress of their settlements in rter. Here, then, is the obvious ground of an accord be- e two nations, in an arrangement which seems to be well to accomplish an object which each deems of importance. ect which we have the honor to present to Your Excellency is to conciliate and provide for those interests. It is believed adoption will effectually do so. Your Excellency must be under existing circumstances and especially since the acqui- Louisiana, that that of Florida has become an object of ss importance to the United States. It is not from the want

of territory, because it is known not to be fertile, and without it they have enough to satisfy their growing population for ages to come. It is, in truth, suggested more by a desire to remove all cause of a future variance between them and Spain, than of any immediate advantage to be derived from it in other respects. While that province remains to Spain, it must be, in some degree, a cause of jealousy to the United States. Situated in their interior, and detached from the other dominions of His Catholic Majesty, it is probable, to render it secure, that he would be compelled to put a strong force there. Hence, the United States would be compelled to do the same. Thus the attitude of hostilities would be taken, which a thousand causes would tend to promote. The jealousy of governments so contiguously situated, the rivalry of governors and generals, and the conflict of commercial regulations, could not fail to produce that effect. In addition to which, it cannot be doubted that other powers would take a pleasure in seeing a rupture between the United States and Spain. It is presumed that they are interested in it. Remove, however, this obstacle, and establish on just principles their western boundary, and all cause of inquietude and misunderstanding will be at an end. Their territories and police will be distinct, and their military stations at some distance from each other. Each power will regulate its own concerns as it thinks best; neither will be interested in disturbing those of the other. Their governments, on the contrary, will find themselves, bound by their interests, their faith, and their character, to keep their citizens within their own limits, which it will take ages to fill. Should Spain not place a strong force in Florida, it will not escape Your Excellency's attention, that it will be much exposed to the danger of being taken possession of by some other power who might wish to hold it, with very different views towards Spain than those which animate the Government of the United States. Without a strong force there, it might even become an asylum for adventurers and freebooters, to the great annoyance of both nations. In this light, however, we forbear to press it.

2182 It is proposed, by the enclosed project, to establish a district of neutral territory between the two powers, on which neither party shall encroach, and with a view to accommodation, that it should be, exclusively, for a given term, within the supposed limits of Louisiana. We are willing that the term should amount to twenty years, to give time for ulterior arrangements relative to that object, and the establishment of a permanent boundary between them in that quarter. If the boundaries of Louisiana are, as our Government believe them to be, and as, we presume, is sufficiently proved by the enclosed paper, this arrangement cannot be considered otherwise than in the light it is intended. This proposition, however, is not offered as an equivalent for the cession of Florida. It is proposed to make a pecuniary compensation for the cession to an amount which is deemed equal to its value. To fix that value, in case His Catholic Majesty is disposed to make the cession, can-

not, it is presumed, be difficult, since, without regarding other considerations, the sum given for the whole province of Louisiana furnishes a just and suitable standard. By comparing the extent of the territory of Louisiana with that of Florida, and taking into consideration the immense advantages derived to the United States from the entire command of the Mississippi and all the waters emptying into it, which followed the cession of Louisiana, we are promptly led to a fair result. On this point we wish to confer in person, when it may suit Your Excellency's convenience. The sum which may thus be agreed on, it is wished to appropriate in the manner mentioned in the proposed convention.

In seeking to terminate amicably all subsisting differences between the two powers, and to place their future relations on a basis of permanent friendship, it is thought that a formal stipulation in behalf of each, not only to observe the limits which may be agreed on, but to cause them to be observed by their respective citizens and subjects, may have a very salutary effect. If such a stipulation is regarded only as a proof of the spirit in which the convention is formed, it will always have weight with both goverments to ensure compliance with it. But it merits to be received in a stronger light, since it makes it the duty of each government to be attentive to, and to enjoin it on her citizens and subjects, respectively, strictly to observe the same. As the convention of the 11th of August, 1802, has not been carried into effect, it is thought best to suffer it to fall, and incorporate its contents into the present one: on that principle the project is formed. There seems to be a propriety in accommodating all subsisting differences, and providing for the respective interests of the two powers, to comprise the stipulations which are necessary for the purpose in the same instrument. To this mode, however, we have no preference, and only submit the idea to Your Excellency's consideration.

To facilitate the communication, and promote dispatch in an object of so much importance to our Government, we have the honor to annex a translation into French of this note, and the papers which accompany it, to Your Excellency. They are as correct as they could be made by those attached to the legation to whom alone we could confide their contents. We beg leave, however, to observe, that we consider ourselves responsible only for the originals, which are in English.

1803 We beg Your Excellency to accept the assurance of our distinguished consideration, &c.

CHARLES PINCKNEY.
JAMES MONROE.

126—11

2184 MISS. DOCUMENT No. 61.

Extract from Letter of Mr. Madison to Mr. Monroe, of Date May 23, 1805.

SIR: I have duly received the sevaral communications transmitted by Mr. Pinckney and yourself, under date of the 1st March last. I have also received from General Armstrong copies of his letters to you of the 12th and 18th of March. The passages in this last, in cipher, having not been copied into that used by this department with General Armstrong, remain locked up, but probably do not effect the general tenor of this letter.

From these communications, it appears that France has arranged herself on the side of Spain, in such a manner that Spain will neither be disposed nor be permitted to bend to our claims, either with respect to West Florida or the French spoilations. What past France may take in relation to the western boundary of Louisiana seems not to have been disclosed. From the silence on that point, in Talleyrand's note of November 8th, in answer to yours, in which the claim of the United States to the Rio Brave is expressly asserted, and from the confidential acknowledgment of that boundary by M. Laussat to Governor Claiborne and General Wilkinson, it might be expected that, on this important point France would side with us against Spain. Should this be the case, it is hoped, notwithstanding the unfavorable posture of the negotiation, that there will be room to give it some such result as was contemplated. But there is so little reliance to be placed on the temper and views of France, as lately developed, that a failure of your efforts ought to be anticipated. The alternative presented by this event is that of war, or a state of things guarding against war for the present, and leaving in vigor our claims to be hereafter effectuated. Against war, if to be safely and honorably avoided, the considerations are obvious and powerful. As it is a question which belongs to Congress, not to the Executive, that consideration alone forbids any step, on the part of the latter, which would commit the nation, and so a far take from the legislature the free exercise of its power. And it may be fairly presumed, considering the daily increase of our faculties for a successful assertion of our rights by force, that neither the nation nor its representatives would prefer an instant resort to arms to a state of things which would avoid it, without hazarding our rights or our reputation. The two essential articles in such a state of things are, 1st. A forbearance on the part of Spain, as well as of the United States, to augment their settlements, or to strengthen in any manner, their military establishments within the controverted limits; 2dly. Not to obstruct the free communication from our territories, through the Mobile and other rivers mouthing in the gulf of Mexico, or through the Mobile at least.

2185 MISS. DOCUMENT No. 62.

(12th Congress.) No. 296. (1st Session.)

Application to Annex West Florida to the Mississippi Territory.

Communication to the House of Representatives, November 20, 1811.

To the honorable Senate and House of Representatives of the United States:

We, the inhabitants of West Florida, your petitioners, represent to your honorable body, that, while we rejoice in the late event which has brought about our emancipation from the iron shackles of despotism, or rather released us from the more horrid calamities of anarchy, we still labor under the painful apprehension that your enlightened body will either continue us a separate Territory, or attach us to the Territory of New Orleans, instead of incorporating us with the Mississippi Territory, which we most ardently wish, for the following reasons:

The geographical and relative situation of West Florida and the Mississippi Territory, plead powerfully in favor of the measure. The climate, the soil, the people, the manners, and the politics of both countries, are the same, being only divided by an ideal boundary. We are all Americans by birth, and in principle; but if we are united with the Territory of Orleans, we will be subjected to all the inconveniences and miseries resulting from a difference of people, language, manners, customs, and politics. The safety, and indeed the political salvation of the Government of the United States, entirely depend on the unanimity of all its parts, which is best insured by combining persons and things homogeneous in their nature. If this be true, and if West Florida and the Territory of Orleans differ in every material respect, (of which there can be no doubt) it follows that a coalition of the two countries would be productive of discord, the evil genius of republican governments.

Your petitioners are aware of the policy suggested by some, of adding us, who are all Americans, to the people of the Territory of Orleans, who are chiefly French, in order to counteract the French influence. This may be sound policy, but to make us the instruments of effecting that object, at the same time that it might be advantageous to the United States in general, it would be destructive to our individual happiness; a sacrifice too great, we trust, to be required of us to make by a Government, wise in its Constitution, and just in its administration.

If, to counteract French influence, and subvert French politics, by populating the country with Americans, be the policy of the Government, your petitioners conceive that object will be shortly effected by the very great emigration of Americans from all parts of the United States. If those emigrants are subjected to all the inconveniences which we deprecate from a similar connexion, the case is not so hard with them as it would be with us, because they have voluntarily chosen that situation.

But waiving all objection on the score of dissimilarity betwixt us and the people of Orleans, nature herself seems to have thrown a barrier in the way to oppose the union. The city of New
2186 Orleans is, and in all probability will continue to be, the seat of government of that country; where, of course, all public business must be transacted, and which will, therefore, induce the necessity of the personal attendance of a great proportion of the people within the jurisdiction of that government, at the city of New Orleans, which will be extremely inconvenient to the inhabitants of West Florida, on account of the largeness and difficult navigation of Lake Pontchartrain, which completely insulates us from the city of New Orleans.

If, however, your honorable body should deem it unadvisable to attach us to the Territory of Orleans, in order to prevent a measure calculated to continue us under a separate territorial government we beg leave to state that, owing to the local situation of our country, it is not susceptible of a thick settlement; that, if it were settled with as many persons as the nature of the country will admit, yet we do not believe there would be wealth enough among us to defray the expenses of a government, without operating a very serious injury to us. But, admitting we are able to bear the expenses of a territorial government, if the Mississippi Territory, and the Territory of Orleans should become States, independent of us, we would forever remain a Territory; for, neither in point of numbers, nor in point of extent of country, would we ever arrive at the proud magnitude of claiming an admission into the Union, as a free sovereign, and independent State. Our only hope of participating with the rest of our brethren on the continent, in the rights and blessings of State sovereignty, is built upon the pleasing anticipation of becoming a part of the Mississippi Territory. By that means, independent of our own individual interests, the Mississippi Territory will derive the advantage of an extensive seacoast, of which she will otherwise be deprived.

For the for-going reasons, we humbly trust that your honorable body will grant our request, by adding all that tract of country, now in possession, by virtue of the President's proclamation of 1810, to the Mississippi Territory.

There is also another subject in which your petitioners are deeply interested, to which we beg leave to call your attention. Your petitioners have generally emigrated to this country since the cession of of Louisiana to the United States. When possession of New Orleans, and that of the country west of the Mississippi was taken, and the

province of West Florida left in possession, and under the exclusive jurisdiction of Spain, we took it for granted that the Government of the United States, either did not claim, or, if they did, meant to insist upon their claim to West Florida; we, therefore, have made settlements on lands, under the rules and forms of the Spanish government, expecting to hold our lands to ourselves and our heirs forever. We, therefore, pray your honorable body to confirm to us our settlement right, made between the time of the cession of Louisiana, until the time of taking possession of West Florida, wherever they have been made *bona fide*, and not with an intention to monopolise unreasonable quantities of lands, under such regulations as may best comport with the wisdom and justice of Congress.

We humbly trust that your enlightened body will grant this request, when you take into view all the circumstances which it involves. The consequences to us and our families are all important. If we are deprived of our possessions, we are deprived of our property; and, consequently, will be reduced to the extremes of
2187 want and wretchedness.

GEORGE PATTERSON,
And Four Hundred and Ten Others.

(NOTE.—See report No. 301.)

2188 MISS. DOCUMENT No. 63.

Extract from a Letter Addressed to the Secretary of State by the Minister of Spain, of Date December 30, 1815.

The diplomatic relations between the king, my master, and the United States being happily restored, and both governments being disposed mutually to strengthen the ties of the most pure and perfect friendship, it is my duty to inform the President of whatever may contribute to so desirable an object, and remove the obstacles which may prevent it. On the important points on which this note must turn, I have written to you under other circumstances less favorable than the present. I will now confine myself to a plain and simple explanation of them.

The first of these points is, that the direct and official relations between Spain and the United States having been broken off since the year 1808, the affairs of both nations, as well as their respective frontiers, should now be placed in the same state and situation in which they were at that period; and that, in conformity to this

principle, the part of West Florida which the United States took possession of during the glorious insurrection of Spain, and have retained until this day, should be restored to His Catholic Majesty. This just and conciliatory measure, at the same time that it will convince the king, my master, of the purity and sincerity of the sentiments of the American Government, and of their disposition to arrange and terminate amicably the several points of negotiation, will not in the least impair the right which it may believe it has to the whole or a part of the territory occupied, since it will remain subject, exactly as it was before its occupation, to a frank and friendly discussion between the two Governments.

2189 MISS. DOCUMENT No. 64.

Extract from a Letter of the Secretary of State, James Monroe, to the Minister of Spain, of Date January 19, 1816.

You require that Spain shall be put into possession of West Florida, as an act of justice, before a discussion of the right of the parties to it is entered on.

It is known to your government that the United States claim by cession, at a fair equivalent, the province of Louisiana, as it was held by France prior to the treaty of 1763, extending from the River Perdido, on the eastern side of the Mississippi, to the Bravo or Grande, on the western. To the whole territory within those limits, the United States consider their right established by well-known facts and the fair interpretation of treaties. In a like spirit may the United States demand the surrender of all the territory above described, now in the occupancy of Spain, as a condition to the commencement of any negotiation for the adjustment of differences. When we consider how long your government has maintained what is deemed an unjust possession; more especially when we recollect that the injuries before received are still unredressed, and that others have been since rendered, there can be, it is presumed, but one opinion as to the great moderation of this Government in acquiescing in it. But why restore this province to Spain, if it is the intention of your government to make the title to it, in connexion with other differences, a subject of amicable negotiation and arrangement? May not such a negotiation be entered into as well while it is in the occupancy of the United States as if it were in that of Spain?

(American State Papers (Foreign Relations) vol. IV, page 425.)

(Endorsed:) Louisiana vs. Mississippi Miss. Doc. 64 Filed Aug. 20/04. Wm. D. Bullard commissioner. Office Supreme Court U.S. Filed Mar. 13, 1905, James H. McKenney, clerk.

Extract from a Letter of the Minister of Spain to the Secretary of State, of Date Feb. 22, 1816.

I will now pass to the second object of which your letter treats; that is to say, to the resolution which this Government has taken on the three points stated in my letters of the 30th December and 24 January.

The first was confined to a request that, in conformity to the principles I have stated, that is, that the affairs between the two nations should be placed on the same footing they were before the interruption of the diplomatic relations between them, His Majesty should be put in possession of that part of Florida which the troops of this Union had occupied. You were pleased to state, in reply, that this Government, believing that it had a well founded right not only on the part of West Florida, which their troops had occupied, but to a greater extent of territory, comprehended in the limits of the vice-royalty of Mexico, had judged that, with the same propriety that the king, my master, occupied those possessions, the United States might retain that part of West Florida they held, until it was decided by a friendly convention to whom it belonged.

Permit me to observe that there is no parity in the cases. The country to which you allude, extending to the Rio Bravo, or Del Norte, has been under the dominion of Spain, not only before and since France ceded Louisiana to His Majesty by the treaty of 1764, but from the time of the discovery and conquest of Mexico, without ever having passed by treaty to any other nation; whereas the Floridas ceased to be a French or Spanish possession, and passed into the hands of England, under the name of East and West Florida, in the year 1763. They remained under the power of His Britannic Majesty, as such, until the year 1783, when by conquest, the Spanish arms, and by solemn treaty, they passed under the dominion of His Catholic Majesty. From this you will infer that, be the interpretation which may be wished to be given to the treaty of retrocession of Louisiana, made between France and Spain in 1800, what it may, the two Floridas can never be directly or indirectly included in it; first, because these provinces being in the legitimate possession of England from the year 1763 to the year 1783, France could not cede them to Spain by the treaty of 1764—nor Spain retrocede them to France, not having received them from her, unless there should have been an article on this point, in which express and direct mention was made of the cession; and, secondly, because the two contracting parties (Spain and France) have declared in the most solemn manner, the first, that she did not cede to France any part of the Floridas—the second, that she had not acquired them by the treaty of St. Ildefonso, or of retrocession of 1800; nor had had the least intention to set up a claim to them. You know very well that, accord-

ing to all the acknowledged principles of justice, no one can be put out of the possession of what he holds until the right of the person who claims it shall be proved and recognized; and that, by a natural consequence of this principle, Spain having been in possession of West Florida when the United States laid claim to it, it is proper she should keep it until this Republic shows a better right, which ought to be done in a friendly negotiation between the two powers; and that it would be anticipating the negotiation to begin by taking possession of the territory, the right to which, so far as it respects the United States, ought to be the object of the negotiation itself. These are the ground- which support the first demand I made on you, in the name of His Majesty, in my letter of the 30 December;
2191 and I flatter myself that, reflecting on facts so well known, you cannot do less than consider them just.

(American State Papers (Foreign Relations), vol. 4, page 427.)

(Endorsed:) Louisiana *vs.* Mississippi Miss. Doc. 65 Filed Aug. 20 '04. Wm. D. Bullard commissioner. Office Supreme Court U. S. Filed Mar. 13 1905 James H. McKenney, clerk.

2192 MISS. DOCUMENT NO. 66.

Extract from a Letter to the Minister of Spain from the Secretary of State, of Date June 10, 1816.

You state that as that portion of Louisiana, which lies eastward of the Mississippi and the Iberville, had been ceded by France to Great Britain in 1763, and by Great Britain to Spain in 1783, it could not be comprised in the cession of Spain to France in 1800, nor of the latter to the United States in 1803; and you draw this conclusion from the supposed import of the term "retrocession" used in the two latter treaties; which, you say, applies to that portion only which Spain had received from France. My interpretation of these treaties, taking into view so much thereof as relates to this subject, is very different As to the term "retrocession," it is evident that it was not the intention of the parties that it should have any effect whatever on the extent of the territory ceded. The import of this term is too vague, and the term itself was used in a manner too casual, to admit such an inference, even had there been nothing else in the treaty, between Spain and France of 1800 to show that the construction you contend for is altogether inconsistent with the manifest intention of the parties. The import of this term would, in my opinion, be satisfied, if the whole province had passed in the first instance from France to Great Britain, and had been conveyed afterwards by Great Britain to Spain, and by Spain back again to France. In regard to France, this last conveyance would have been a "retrocession," as, by it, the territory would have been ceded back to her. It was very natural, therefore, that this term should be

sed, being applicable, in the most limited sense in which it can be aken, to at least nineteen-twentieths of the province, and, in a qualiied sense to the whole.

Had it been intended to exempt any portion of the province in he possession of Spain from the operation of the treaty of St. Ildeonso, it would have been easy to have done it, and in a manner to reclude all doubt of the intention of the parties. It might, for exmple, have been stated that Spain ceded back to France such parts f the province as France had ceded to Spain. A stipulation to this ffect would have been concise, simple, and very perspicuous; it ould have rendered useless and unnecessary the other provisions f the article in regard to the point of discussion, and for any purose whatever the first of those provisions; or they might have efined the extent of the cession by a natural boundary, which would ave been equally distinct and satisfactory. Had Spain ceded to rance all that portion of Louisiana which lies westward of the Missippi, the Iberville, and the Lakes Maurepas and Pontchartrain, o controversy could ever have arisen between France and Spain especting the eastern limits, as to what Spain had ceded in that uarter, and what she had retained, nor could there have been one etween the United States and Spain. By declining to define the oundaries of Louisiana, eastward, in some one of these obvious and erspicuous modes, it is just to conclude that it was intentional; that here was an object in it; and what that object was, is sufficiently pparent from a fair construction of the provisions of the article ready noticed.

By the treaty of St. Ildefonso, in 1800, the province of Louisiana ceded to France by Spain, "with the same extent it now has in he hands of Spain, and that it had when France possessed it, and ich as it should be after the treaties subsequently entered into beween Spain and other States." And by the treaty of 1803, between he United States and France, this article of the treaty between rance and Spain is inserted verbatim, by which the United States re placed precisely on the same ground on which France herself stood.

93 If we recur to the several provisions, we shall find that each has a distinct object, for which it would not have been necesry to provide, especially in that mode, if it had been the intention the parties that no portion of West Florida in question should ave been exempted from the cession. By stipulating first that the rovince was ceded "with the same extent that it now has in the nds of Spain," direct reference was made to that portion of West lorida lying between the Mississippi, the Iberville, the Lakes Maures and Pontchartrain, and the Perdido. This provision cannot be nstrued as alluding to any other part of the province, and its sole ffect was intended to be to include it in the cession to France. The cond provision is equally explicit—"that it had when France possed it." It is known that France had held the province to that tent before the treaties of 1763, by which she had ceded it to

Spain and Great Britain; and by this stipulation it was ceded back to her, in the same extent, so far as Spain could do it. The third provision has an object equally distinct, and is the more important because, by giving it its intended effect, the construction given to the others is fully confirmed "such as it should be after the treaties subsequently entered into between Spain and other States." By the treaty between the United States and Spain, in 1795 the boundaries as established between the United States and Great Britain in 1783, and the free navigation of the Mississippi, are confirmed, with the addition of the right of deposite at New Orleans. This provision applies to this treaty, and likewise to the treaty of 1783 between Great Britain and Spain, by which West Florida was ceded to the latter, whereby she was enabled to restore it, in the extent contended for, to France. In regard to its operation on the treaty of 1795 between the United States and Spain, it was a provision which the United States had a right to expect from the good faith of Spain.

This view of the subject, which was, in substance, taken by the ministers of the United States in 1805, in a negotiation with your government at Aranjuez, appears to me, as it then did, to be conclusive. You urge, however, against it, that the French government had stated that it was not its intention to cede to the United States that portion of Louisiana which France had ceded to Great Britain by the treaty of 1763. The same declaration was made to the ministers of the United States at Aranjuez, in 1805, for the same purpose that it is now repeated. A just regard to the rights of the United States, founded on the cession which France had made to them, with a thorough knowledge of all the circumstances attending the transaction, combined with a due respect to the government of France, dictated the answer. Your government was informed that the American envoys had proposed to the French government, in the negotiation which terminated in the cession of Louisiana by France to the United States, in 1803, that its boundaries should be defined by the treaty; to which the French government did not accede, preferring to insert in it an extract from the treaty of St. Ildefonso, by which the province had been ceded by Spain to France, with intention to place the United States, in regard to Spain, on the same ground precisely that France held herself under the treaty of St. Ildefonso, unprejudiced by any opinion of her own. Nothing had occurred in the negotiation with France to excite a doubt that the Perdido was the eastern boundary of Louisiana. It had been the boundary of the province when held by France, before the treaties of 1763, and it was made so again by the treaty of St. Ildefonso, which restored it to her. Such was the construction which the American ministers gave to that treaty, who were engaged in the negotiation with France; and such their representation of it to their Government, after the treaty with France was
2194 concluded. It merits particular attention that when your government was requested to cede to the United States such territory as they were desirous of obtaining prior to their acquisition

of Louisiana, it replied to their minister at Madrid, by a letter of the 3d of May, 1803, "that, by the retrocession made to France of Louisiana, that power regained the province with the limits it had, saving the rights acquired by other powers, and that the United States could address themselves to the French government to negotiate the acquisition of territories which might suit their interest." With the subject thus presented before the Government of the United States, the fair construction of the article of the treaty of St. Ildefonso, maintained by the American ministers in their official communication accompanying the treaty, sanctioned, as it evidently was, by the letter of your minister of state, the treaty of Paris of 1803 was ratified. It could not be expected that the United States would appeal under these circumstances, to France, for information as to the extent of the acquisition which they had made, or be governed by any opinion which her Government might express, in that stage, respecting it.

(Endorsed:) Louisiana *vs.* Mississippi. Miss. Doc. 66. Filed Aug. 20, '04. Wm. D. Bullard, commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905. James H. McKenney, clerk.

2195 MISS. DOCUMENT No. 67.

Extract from Letter of Don Jose Pizarro to Mr. Erving, of Date August 17, 1817.

Besides this, posterior to the year 1805, the extraordinary event has occurred of His Majesty's having been unexpectedly deprived, in the year 1810, during his captivity, of the pacific possession in which he was of that part of West Florida which is between the River Iberville, the Lakes Maurepas, Pontchartrain and Borgne, on the one side, and the River Perdido on the other. When the indisputable property of His Majesty in the said territory was demonstrated, it was proved that Spain did not acquire it of France in 1763; that she received it of England in 1783 by a solemn treaty; that it was not and could not, be comprehended in the "retrocession of Louisiana" made to France in the year 1800; that the government of France "has declared so officially," and in the most solemn manner, as well to Spain as to the United States; that the fifth article of the treaty of 1778 between France and the United States opposes itself expressly to the acquisition by France (though she had attempted it) of said territory from Spain in 1800; that the royal cedula of His Majesty, issued at Barcelona on the 15th October, 1802, for the delivery of Louisiana, (which royal cedula was in the hands of the French government before the United States thought of acquiring the colony,) did not contemplate the delivery of territory east of the Mississippi other than that of the "island of New Orleans."

To these grounds, which have established, and do establish, in the clearest manner, the property of His Majesty in the said territory, may be added those of his pacific possession without interruption. The delivery of Louisiana took place without the least idea having occurred to the French commissioners, who received it of His Majesty for the purpose of delivering it to the United States of aspiring to the possession of the territory between the Iberville and the Perdido; Spain continued, in the years following the delivery, exercising over it all her authority, and the United States respected this possession. A certain customhouse regulation of the United States, in the year 1804, which seemed to contain some expressions susceptible of an equivocal meaning as to the rights of His Majesty in the territory of Mobile, was declaimed against on the part of the king, and the United States agreed to give a satisfactory and honorable explanation as to the said expressions. Whatever might be then, in that state of things, the pretension of right which might be formed against it, it did not appear to conform to the principles universally acknowledged to enforce that pretension * * * by means of acts, and, in truth, it was a painful duty for the faithful ministers of His Majesty, on his return from his captivity, to explain to him by what means and circumstances he had been deprived of the peaceful possession of the greater part of West Florida without war, or any stipulation which could authorize, having preceded it.

The king, attributing this extraordinary event to the circumstances, also extraordinary, of the epoch which had intervened, flattered himself that the United States would not defer placing things in the state which they were in at the time he left his dominions, and the invasion of the peninsula by Bonaparte. The glory, and even the interest of the United States, might equally incline them to this restitution, for a recent and costly experience has made the world see that there are no acquisitions of territory, however extensive, which can compensate the advantages to result from the reputation which those governments acquire who regulate
2196 their operations by principles conservatory of order and justice.

With these ideas, the king directed his minister at Washington that, before he entered into the discussions which had remained pending, he should solicit the restoration of affairs in the state in which they were at the time of his absenting himself. This preliminary step appeared correspondent to the decorum of His Majesty, and the United States could not fail to acknowledge it to be so; it being very certain that the delicate honor of the American Government would not consent, in a similar case, to enter into other negotiations, finding itself inquieted in the pacific possession of even one mile of its acknowledged territory, without first soliciting and obtaining the due restoration.

Notwithstanding this, and that the answer of the Secretary of State, of 19th January, 1816, is far from containing the satisfaction

restoration which Spain had reason to expect, His Majesty, to unequivocal proofs of his moderation, and of his friendly dis-ions toward the United States, without renouncing, as he does o way renounce, nor will renounce, unless in the case of some promise, the right of property and possession which he has in aid territory, has judged fit not to insist on his demand for the ent, in the hope that this point, though in its nature it ought to reliminary, may enter into the general arrangement with the s; but your penetration will acknowledge readily that on this tial point, as in others, the state of the question is not what it in the year 1805, new occurrences of such importance having n place since that period.

ou ought not, then, to be surprised that Don Luis de Onis, see-himself in the necessity of omitting all discussion, as well on oint already discussed in the year 1805, as on the more recent rrences, and invited to give his judgment on plans of adjustment nted by one or the other party, should believe that the instruc-which he previously had were insufficient, and even the inti-on (*aviso*) conformable to the contents of your note of 26th ust, which was remitted to him with the powers; and that in state he conceived himself without instructions to treat in the e which, from the commencement, he knew would be agreeable at government: for, though you are pleased to say that it was ne note of the Secretary of State of 25th January that Señor might observe that it was desired to avoid all further discus-I observe, by the letters which I have from that minister, that ne 6th of January he received the powers of His Majesty, and on the 10th of the same month he advises that the Secretary of had already in verbal conference expressed his opinion that ssion was useless, and that he had desired proposals and plans rangement to be made out, which were already making out on 2th.

t leaving aside these incidents, which will be settled by the mission of competent instructions to Señor Onis, I go on to ose to you, as I have offered, the principal conditions of an gement which, in my opinion, may terminate with reciprocal action the pending questions. Although these will be sufficient plain my mode of thinking, you will probably notice that in points they are diffuse, where I have thought it necessary to le to the right from whence proceeds the proposal made; and in other places they are succinct, where I have thought that ls may be omitted for the present which it will be necessary to enter into afterwards, if it be agreed to put in form the trans-action, to clothe it with the correspondent authority; in which case we shall draw it out by common consent in terms appro-e to our purpose.

2198 MISS. DOCUMENT NO. 68.

Extract from Letter of Don Luis to the Secretary of State, of Date January 5, 1818.

SIR: In my note of the 29th of last month, I proved to you to a degree of moral demonstration which I think to be fully convincing, what are and ought to be the eastern boundaries of Louisiana; and I hope such incontrovertible, decisive reasons cannot fail to bring you fairly to acknowledge that Louisiana neither does nor can include any part of West Florida. As I have not yet received your answer to the said note, it was my intention to wait for it, and not proceed to the examination of the second point of the question of boundaries before we had agreed on and settled what relates to the first, in order to proceed methodically, and not to involve or embar-ass the plain and expeditious course of this investigation; but being desirous of not losing an instant in explaining every point relative to so important a matter, I anticipate the examination of the western boundaries of Louisiana, which is the second point of the question, thereby facilitating whatever may claim your attention as to both in their respective order, and enabling you to comprehend the truth at once.

201 MISS. DOCUMENT NO. 72.

THE STATE OF MISSISSIPPI,
Hancock County.

Board of Supervisors, January Term, 1898.

Be it remembered that a regular meeting of the board of supervisors was begun and holden in and for said county at the courthouse thereof in the city of Bay St. Louis, on the first Monday of January A. D. 1898 and on the 2" day of said meeting, the same being the 4" day of said month, an order was made by said board, which is in the following words and figures, to-wit:

Ordered by the board that the following ordinance be adopted to-wit:

An Ordinance to Prevent the Dredging of Oysters from the Public Oyster Reefs in Hancock County, Mississippi, and to Enforce the Same.

SEC. 1. It shall be unlawful for any person or persons to catch or take oysters from the natural oyster reefs known and declared by law to be public oyster reefs, in Hancock county, Mississippi, with a steam dredge or other dredge in less than fourteen feet of water.

SEC. 2. It shall be the duty of the sheriff or other lawful officer in Hancock county to arrest with or without warrant any person or persons violating this ordinance to take them before any magistrate or justice of the peace in said county for trial, and every such magistrate or justice of the peace shall have jurisdiction for a violation of this ordinance.

SEC. 3. Any person who shall violate this ordinance shall on conviction be fined not less than two hundred & fifty dollars for each offence or be imprisoned in the county jail not less than thirty days or both at the discretion of the court; and all persons so convicted shall stand committed until the said sentence is complied with and all costs be paid.

SEC. 4. When a prosecution under this ordinance shall be commenced and prosecuted to a conviction upon information or complaint of any private person, and the officer or justice of the peace trying the cause shall so certify on this docket, then and in that case, such prosecutor shall be entitled to one-half of the fine, to be paid him by the officer collecting the same, upon the order of the magistrate or justice of the peace trying the cause, and the other half of said fine to be paid into the treasury of Hancock county.

SEC. 5. That this ordinance take effect and be in force from and after this day.

(Signed) J. L. MEGEHEE, President.

Approved January 4, 1898.

I, Emile H. Hoffman, clerk of the chancery court and *ex-officio* clerk of the board of supervisors in and for said county, in the State aforesaid, do hereby certify that the above is a true copy of the order passed by the said board, at their meeting aforesaid, as fully as the same appears of record in Minute Book D, on pages 406 & 407, of said board.

Given under my hand and official seal, at my office in Bay St. Louis, Miss., this the 10″ day of August, A. D. 1904.

THE STATE OF MISSISSIPPI, }
Hancock County. }

Board of Supervisors, September Term, 1898.

Be it remembered that a regular meeting of the board of supervisors was begun and holden in and for said county at the courthouse thereof in the city of Bay St. Louis, on the first Monday of September A. D. 1898 and on the 1″ day of said meeting, the same being the 5″ day of said month, an order was made by said board, which is in the following words and figures, to wit:

An Ordinance for the Protection and Preservation of the Public Oyster Reefs in Hancock County, Mississippi, and to Enforce the Same.

SEC. 1. It shall be unlawful for any person to take from the public oyster reefs within the waters of Hancock county any oysters between the first day of May and the first day of September of any year except for planting purposes and domestic use of the inhabitants of said State.

SEC. 2. It shall be unlawful to take from the natural oyster reefs in the waters of said county any oysters, the shells of which are less than two and one half inches long, except for planting purposes, and all oysters taken for any other purpose shall be culled so that there will not be more than five oysters in any one bunch, and they shall be culled without destruction to the oysters, free from all dead and empty shells and young and unmarketable oysters, and which culling shall be done & left on the reefs where the oysters are taken, provided however that such young and unmarketable oysters may be removed or disposed of for planting purposes only within the tide waters of Mississippi.

SEC. 3. That it shall be unlawful to buy, purchase or receive any ysters from any person or persons, except for the purposes set forth n section 2 of this ordinance that are not in conformity & culled as equired in said section.

SEC. 4. It shall be the duty of the sheriff or other lawful officers f & in Hancock county to arrest with or without warrant any per- on or persons violating this ordinance to take them before any agistrate or justice of the peace in said county for trial, and every ich magistrate or justice of the peace shall have jurisdiction for a iolation of this ordinance.

SEC. 5. Any person who shall violate any of the provisions of this rdinance shall on conviction be fined not more than fifty dollars r each offence or be imprisoned in the county jail not more than irty days, or both at the discretion of the court; and all persons convicted shall stand committed until the said sentence is com- lied with and all costs be paid.

SEC. 6. When a prosecution under this ordinance shall be com- enced and prosecuted to a conviction upon the information or mplaint of any private person, and the officer or judge trying the use shall so certify on his docket, then and in that case such prose- tor shall be entitled to one half of the fine to be paid to him by e officer collecting the same upon the order of the magistrate or dge trying the cause; the other half to be paid into the county easury.

SEC. 7. That this ordinance be published in the Gulf Coast ogress being the official journal of this board for three weeks & oof of publication to be filed.

SEC. 8. That this ordinance shall take effect and be in force from d after the first day of October, 1898.

Approved Sept'r 5, 1898.

Ordered that board adjourn until to-morrow morning 8 o'clock.

J. L. MEGEHEE, President.

03 I, Emile H. Hoffman, clerk of the chancery court and *ex-officio* clerk of the board of supervisors in and for said unty, in the State aforesaid, do hereby certify that the above is a ue copy of the order passed by the said board, at their meeting oresaid, as fully as the same appears of record in Minute Book D, pages 460 & 461, of said board.

(Endorsed:) Document Mississippi No. 77 Offered by State of Mississippi, Aug. 27, 1904 Frank H. Mortimer commissioner. Office Supreme Court U. S. Filed Mar. 13 1905, James H. McKenney, clerk.

BILOXI, MISSISSIPPI, October 2nd, 1901.

Hon. A. H. Longino, governor of Mississippi.

SIR: In pursuance of your request, dated February 9th, 1901, asking the following gentlemen J. I. Ford, Scranton, E. J. Bowers and A. Keller, Bay St. Louis, W. A. White and H. T. Howard, Biloxi, to act as a commission to confer with a like commission appointed by the governor of Louisiana to consider the determination of the water boundary line between the two States, and arrange for the easy location and identification by a proper system of buoys.

Your committee met in Biloxi, February —, 1901, electing H. T. Howard chairman, and J. I. Ford secretary.

The chairman was requested to correspond with the Louisiana commission and arrange for a joint meeting of the committee.

March 4th, the chairman issued a call for the commission to meet in New Orleans, Louisiana, at the office of John Dymond, Jr., the secretary of the Louisiana commission, 339 Carondelet street on 26th March, 10 a. m.

On the day appointed there were present Messrs. Albert Estopinal Jr., John Dymond Jr., Clem Story, Sidney Lewis and H. C. Cage of Louisiana, and Messrs. H. T. Howard, J. I. Ford, W. A. White and E. J. Bowers of Mississippi. Absent only one, A. Keller of Bay St. Louis.

The meeting was called to order by Honorable Albery Estopinal Jr. chairman of the Louisiana commission, who stated the purpose of the meeting and suggested that Mr. H. T. Howard should be elected chairman of the joint meeting.

Mr. Howard was elected chairman and Mr. John Dymond Jr., secretary.

Mr. Dymond, at the request of the gentlemen present, stated and explained the views of the Louisiana commission. On motion of Mr. Bowers, seconded by Mr. Cage, the Louisiana commission was requested to express their ideas as to the boundary line on the map which had been the subject of discussion, the line to be delineated in red ink, which map should be presented to the Mississippi commission, and that the Mississippi commission should endorse their views thereon in black ink. Carried.

On April 8th, the Louisiana commission sent the map and their views, a copy of which is hereunto attached marked Exhibit "A," to the chairman of the Mississippi commission, who, after repeated calls for a meeting, finally succeeded in getting the Mississippi commission together at Bay St. Louis, at the office of the Honorable E. J. Bowers, on the 20th, of July 1901.

As the Mississippi commission could not agree to fix any lines upon the map sent them, the map was returned to the Louisiana commission, and a letter signed by the five Mississippi commission-

ers was sent to the Honorable Albert Estopinal, chairman of the Louisiana commission, a copy of which is hereunto attached marked Exhibit "B," notifying him that the Mississippi commission could not agree to the lines of the Louisiana commission, and asking that a friendly suit in the Supreme Court of the United States be instituted as the only course of settlement.

Having pursued the investigation for which we were ap-
2209 pointed, as fully as we could, we make this, our report, without suggesting anything more than has already been suggested by us to the Louisiana commission.

Respectfully submitted,

H. T. HOWARD, Chairman.
J. I. FORD, Secretary.
W. A. WHITE.
E. J. BOWERS.
AUG. KELLER.

STATE OF MISSISSIPPI, }
Hinds County. }

This is to certify that the above and foregoing is a true and correct copy of an official document now on file in the office of the governor of the State of Mississippi.

Witness my signature this 26th day of August 1904.

GEORGE R. EDWARDS, JR.,
Private Secretary to the Governor
of the State of Mississippi.

EXHIBIT "A."

To the honorable chairman and members of the Mississippi Boundary Commission:

The great State of Louisiana wishes to lay before the great State of Mississippi its desires as to the establishment of a boundary in the waters between the said States. The cause that necessitates this request on the part of one State of its neighboring State, is found in the fact of the existence of a difference in the laws of the two States over the waters thereof. It therefore becomes necessary that the two States should, if possible, come to an amicable agreement as to their water boundaries so that their respective court- would have jurisdiction in any matters that might subsequently arise.

The State of Louisiana feels that its boundaries, as well as those of the State of Mississippi, have already been fixed and determined by the United States Government, the parent and creator of both of the said States, and that all that is necessary in the premises would be a recognition of this already created boundary, yet a recognition in such terms and made in such manner as would free it from any possibility of confusion which end could be readily attained in the manner we now propose to present.

Recognizing the necessity of establishing the boundary between the two States, his excellency, W. W. Heard, governor of the State of Louisiana, appointed a commission on the boundary representing the State of Louisiana and presented to his excellency, A. H. Longino, governor of the State of Mississippi, the request of the great State of Louisiana that the great State of Mississippi should in turn appoint a commission on boundary which might confer with the Louisiana State Commission and thereby ascertain if it were possible to amicably settle any dispute that might exist in so
2210 far as the powers thereto were vested in such committee.

The conclusions of the Louisiana Boundary Commission will be presented to the legislature of the State of Louisiana, and we feel quite sure and in fact could confidently assert that if the Mississippi Boundary Commission were in accord with the views of the Louisiana Boundary Commission as to the boundaries that such action as these joint commissions might take would be carried into effect by the legislature of the great State of Louisiana.

Section 4, of the constitution of the great State of Mississi- as adopted November 1st, 1890, provides that the legislature shall have the power to settle disputed boundaries between the State of Mississippi and its coterminous States whenever such disputes arise. His excellency, A. H. Longino governor of the State of Mississippi, recognizing that any recommendations made by the Mississippi Boundary Commission would have great weight with the legislature thereof, appointed you gentlemen in compliance with the request of his excellency, W. W. Heard, governor of the State of Louisiana, and we now desire to lay before you the facts as appealing to our commission emphas-ing that the purpose of both commissions is to get at the facts and do justice to the parties and the rights, independent of a desire to aid by any action any interest that might be affected in the conclusions of the joint commission.

When we say that the boundary between the two States already exists, we mean by that that an interpretation of the acts of Congress creating respectively the States of Louisiana and Mississippi gives to each of them boundaries which do not conflict, provided the limits of the two States are separated the one from the other by the deep water channel beginning at the mouth of the Pearl river, extending north of Grassy island, southwest of Cat island, northwest of Chandeleur island to the sea. Any other construction of the acts of Congress creating the respective States would apparently make the boundaries of the two overlap, and if there be as we have stated, a definite line that harmonizes the two acts in question, we say that such boundary must have been in the contemplation of Congress rather than Congress would have been presumed to have laid down conflicting boundaries.

The State of Louisiana founds its boundary limits on the dimensions of the Louisiana Territory transferred by Napoleon, Emperor of France, to the United States Government. The United States Statutes at Large, volume 1, charter 1, page 245, approved October

31st, 1903, provides for the acceptance and taking possession of the Louisiana Territory thus ceded to the United States by the French people. By the same volume, page 283, chapter 38, approved March 26th, 1804, we find Congress dividing the Louisiana purchase into two Territories and providing for the government thereof. The whole subject of the dimensions of the Louisiana purchase is set forth in the recent work compiled by Binger Herman, Commissioner of the General Land Office and issued by the Government Printing Office at Washington, D. C., in the year 1900. According to the terms of the said purchase, the State of Louisiana claims that the Chandeleur islands belonged to it, in as much as they were part of the territory ceded by France to the State of Louisiana. The question whether they did or did not, however, is not necessarily a subject for settlement between the Louisiana and Mississippi Commission, as the limits of the State of Mississippi, under no circumstances could be construed to extend as far south as the Chandeleur islands, and for that reason we pass this phase of the subject by, except to state that according to the Louisiana purchase the eastern boundary of the territory extended from the Rigolets to the gulf of
2211 Mexico following the deep water channel to the sea to the eastward and inclusive of the Chandeleur islands.

When the State of Louisiana was admitted into the Union of the United States we find its boundaries defined in chapter 50 of the United States Statutes at Large, volume 2, page 701, approved April 6th, 1812 to be as follows:—

"Whereas the representatives of the people of all of that part of the territory or country ceded under the name of Louisiana by the treaty made at Paris on the 30th, day of April 1803 between the United States and France, contained within the following limits, that is to say; beginning at the mouth of the River Sabine; thence by a line to be drawn along the middle of said river, including all the islands to the 32nd, degree of latitude; thence due north to the northernmost part of the 33d ? degree of north latitude; thence along the said parallel of latitude to the Mississippi river; thence down the said river to the River Iberville and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by the said Gulf to the place of beginning, including all islands within three leagues of the coast.

There is no way to go from Lakes Maurepas and Pontchartrain to the gulf of Mexico other than by the deep water channel. To any one contemplating the trip no other course but the deep water channel would naturally suggest itself.

We find that in 1812 the State of Louisiana had additional territory added to it. This territory is what was commonly known as the Florida parishes, and was at one time a sort of free government. The legislature on the subject of this additional territory is found in the acts of Congress, United States Statutes at Large, volume 2,

page 708, chapter 57, approved April 14th, 1802 wherein we find the following language :—

"Beginning at the junction of the Iberville, with the River Mississippi; thence along the middle of the Iberville and of the River Amite and of the Lake- Paurepas and Pontchartrain to the eastern mouth of Pearl river; thence up the eastern branch of the Pearl river to the 31st, degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said river to the place of beginning, shall become and form a part of the State of Louisiana."

There was nothing taken away from the State of Louisiana by this act of Congress. On the contrary, the object and the result was the addition of the Florida parishes to the State of Louisiana. The water rights or boundaries were not affected or changed, except that the eastern junction of the water boundary line and the main land was moved from the channel of the Rigolets to the channel of the eastern mouth of the Pearl river. Immediately leaving the point where the boundary joined the shore it follows the main channel to the sea and in so doing joined in the main channel the former water boundary line separating the State of Mississippi, which line it followed till it separated from it at a point southwest of Cat island, where the boundary lines struck the sea.

In confirmation of his contention on the part of the State of Louisiana we need but to turn to the act of Congress creating the great State of Mississippi. It was known to Congress that there was a string of islands along south of, and running parallel to the main land of the State of Mississippi. The State of Mississippi was admitted into the Union by the act of Congress found in the United States Statutes at Large, volume 3, chapter 23, page 348, *provided* March 1st, 1817, wherein the inhabitants of the western part of the
2212 then Mississippi Territory were authorized to form themselves a State constitution, and to be admitted into the Union. The boundaries of the then to be created State were as follows:—

"That the said State shall consist of all the territory included within the following boundaries, to-wit:

"Beginning on the River Mississippi at the point where the southern boundary line with the State of Tennessee strikes the same; thence east along the said boundary line of the Tennessee river; thence up the same to the mouth of Bear creek; thence by direct line to the northwest corner of the county of Washington; thence due south to the gulf of Mexico; thence westwardly, including all the islands within six leagues of the shore, to the most southern junction of Pearl river with Lake Borgne; thence up said river to 31st, degree of north latitude; thence west along said degree of latitude to the Mississippi river, thence up the same to the beginning."

The State of Louisiana in adopting its present constitution that of the year 1898, did not fix boundaries *and* did the State of Mississippi in its constitution adopted November 1st, 1890, for we find in

the 3rd, section of the second article of the Mississippi constitution the following:

"The limits and boundaries of the State of Mississippi are as follows, towit: Beginning on the Mississippi river (meaning thereby the center of said river or thread of the stream where the southern boundary line of the State of Tennessee strikes the same, as run by B. A. Ludlow, D. W. Connelly and W. Petrie, commissioners appointed for the purpose on the part of the State of Tennessee; thence east along the said boundary line of the State of Tennessee to a point on the west bank of the Tennessee river, six four-pole chains south of and above the mouth of Yel*b*ow creek; thence up the said river to the mouth of Bear creek; thence by a direct line to what was formerly the northwest corner of the county of Washington, Alabama; thence on a direct line to a point ten miles east of the Pascagoula river on the gulf of Mexico; thence westwardly, including all the islands within six leagues of the shore, to the most eastern junction of Pearl river with Lake *Lake* Borgne; thence up said river to the 31st, degree of north latitude; thence west along said degree of latitude to the middle or thread of the stream of the Mississippi river, or thread of the stream to the place of beginning, including all islands lying east of the thread of the stream of said river, and also including all lands which were at any time heretofore a part of this State."

Taking the boundaries as determined by the constitution of the State of Mississippi we find that they conform with the contention of the State of Louisiana in that they begin at a point ten miles to the eastward of the Pascagoula river at a point eighteen miles out at sea. Thence the boundary line runs westwardly. It includes the several islands we have heretofore mentioned, viz: Petit Bois, Horn island, Ship island and Cat islands, the island contemplated by Congress. Thence it meets the Louisiana boundary in the deep water channel to the southwest of Cat island and follows this channel up through to the north of Grassy island to the mouth of Pearl river.

The State of Louisiana lays down the proposition that in all divisions of territory between States they are governed, where the same are separated by bodies of water, unless otherwise specified by the rule that the deed water channel makes the boundary lines. This is modern *porceedure*, and is illustrated by the action of the Canadian and American commissioners in settling the dispute
2213 as to the small island in front of the city of Detroit. This island having been found to be on the American side of the deep water channel was held to belong to the State of Michigan. This theory is confirmed by the very article of the Mississippi constitution, which we have just cited, where the Mississippi river and other streams separate the great State of Mississippi from its neighbors. We quote from the Mississippi constitution "and thence up the middle of the Mississippi river, or the thread of the stream to

he place of beginning, including all islands lying east of the thread of the stream of said river."

We therefore respectfully submit and urge that the great State of Mississippi, through the medium of your honorable gentlemen appointed for the purpose by his excellency A. H. Longino, governor of the great State of Mississippi, should declare to your legislature unanimously, that from the researches you have made, from the law you have examined, and from the arguments you have heard it is our opinion that the boundary line between the great States of Mississippi and Louisiana, separating them and their waters, begins at the mouth of the Pearl river and thence follows the deep water channel to the east of Grassy island, to the southwest of Cat island by the Cat Island channel to the deep water of the gulf of Mexico where the said lines diverge, that of Louisiana extending to the eastward of the Chandeleur islands, and that of Mississippi extending eastwardly, including Ship island Horn island and Petit Bois island to a point ten miles to the eastward of the Pascagoula river, where it extends north at right angles; and we do repeatedly urge that you may request of your legislature that they enact such laws as may carry into effect your finds.

Respectfully submitted,

JOHN DYMOND, JR.,
Secretary Louisiana Boundary Commission.

S. F. LEWIS,
JOHN DYMOND, JR., Secretary.

New Orleans, Louisiana, April 6th, 1901.

214 EXHIBIT "B."

on. Albert Estopinal, Jr., chairman Louis-ana Boundary Commission:

The commission appointed by the State of Mississippi to confer ith a like commission appointed by the State of Louis-ana having et and considered maturely the claims advanced by the Louis-ana mmission, and having examined the line as delineated by that dy and submitted with said claims, are unable to concede the line claimed by the State of Louis-ana and as marked and set forth on e map of said claim.

The difference between the line marked between your honorable dy and that which we conclude is the true boundary, is so great at we have no hope of being able to reconcile them and therefore em it useless to submit any counterline or proposition.

The Mississippi commission considers as islands considerable terri-

tory which the Louis-ana commission claims as main land, and the difference over this question of fact appears to us to — past reconciling.

We beg to disclaim any idea of being discourteous in failing to submit a counter line for your consideration.

It is apparent that the only hope of settlement is a friendly suit in the Supreme Court of the United States and we respectfully suggest that court.

Respectfully submitted,

H. T. HOWARD, Chairman.
J. I. FORD, Secretary.

GEO. R. EDWARDS, Jr.,
Private Secretary to the Governor of Mississippi.

(Endorsed:) Document Mississippi No. 78. Offered by State of Mississippi Aug. 27, 1904. Frank H. Mortimer, commissioner. Office Supreme Court U. S. Filed Mar. 13 1905. James H. McKenney, clerk.

2215 MISS. DOCUMENT NO. 79.

To his excellency A. H. Longino, governor of the State of Mississippi:

The undersigned members of the commission on the part of the State of Mississippi, appointed by Your Excellency to confer with a similar commission appointed by the governor of Louisiana "to consider the determination of the water boundary line between the two States &c." beg leave to report that after a joint conference the commissioners for Louisiana submitted to the commissioners for Mississippi a statement of what they claimed to be the boundary line, said line extending from the junction of the eastern mouth of Pearl river with Lake Borgne, through said lake, Grand pass, the Mississippi sound, South pass and Cat Island channel into the gulf of Mexico.

The commissioners for Mississippi declined to accept the said line as the boundary, and the undersigned members beg leave to submit to Your Excellency our reasons therefor as follows:

1st. The boundaries of the States of Mississippi and Louisiana are ed by the several acts of Congress relative thereto; towit: the s of April 8th, 1812, April 14th 1812 and March 1st. 1817.

2nd. The boundaries of the State of Louisiana as fixed by the act Congress of April 8th, 1812, constituting the State of Louisiana as follows: "Beginning at the mouth of the River Sabine; nce, by a line to be drawn along the middle of said river includ- all islands, to the thirty second degree of latitude; thence due th to the northernmost part of the thirty-third degree of north itude; thence along the said degree of latitude to the River Mis- ippi; thence down the said river to the River Iberville; and nce, along the middle of said river, and Lakes Maurepas and ntchartrain to the gulf of Mexico; thence, bounded by the said lf to the place of beginning, including all islands within three gues of the coast; and were enlarged by the act of April 14th, 2, by adding the territory included in the following boundaries: eginning with the junction of the Iberville with the Mississippi er; thence along the middle of the Iberville with the Missis- pi river; thence along the middle of the Iberville, the River ite and of the Lakes Maurepas and Pontchartrain to the eastern uth of the Pearl river; thence up the eastern branch of the Pearl er to the thirty first degree of north latitude, thence along said ree of latitude to the River Mississippi thence along the said er to the place of beginning."

n as much as it would be impossible to pass out through Mau- as and Pontchartrain to the gulf of Mexico proper without pass- through Lake Borgne, and the Mississippi sound of the Chan- eur sound, it is obvious that these three bodies of water, which are s of the gulf of Mexico, are referred to as the "gulf of Mexico," and t the term gulf of Mexico is used indiscriminately with reference Lake Borgne, Mississippi sound, Chandeleur sound and the Gulf per, and that Lake Borgne is referred to as the gulf of Mexico in phrase "thence along the middle of said river and Lakes Mau- as and Pontchartrain to the gulf of Mexico" and that Lake gne, the Mississippi sound and the Chandeleur sound are re- ed to as the gulf of Mexico in the phrase "thence bounded said Gulf to the place of beginning:

rd. That when the eastern boundary line reaches the northern re of Lake Borgne, the true boundary line, according to these of Congress, follows the shore in all its meanderings south south west to the mouth of the Sabine river, and therefore all islands within three leagues of this shore are Louisiana 6 territory but that no water, island or marshland not within three leagues of this main shore of Louisiana, as thus defined, ngs to the State of Louisiana.

th. The boundaries of Mississippi, as fixed by the act of Congress March 1st. 1817, are as follows:—"Beginning at the River Missis- pi, at the point where the southern boundary line of the State of nessee strikes the same; thence east along the said boundary

line to the Tennessee river; thence up the same to the mouth of Bear creek; thence in a direct line to the north-west corner of the county of Washington; thence due south to the gulf of Mexico; thence, westwardly including all islands within six leagues of the shore, to the eastern junction of Pearl river with Lake Borgne; thence up the said river to the thirty-first degree of north latitude; thence along the said degree of latitude to the Mississippi river; thence up the same to the place of beginning."

It will be seen from the above that the southern boundary of Mississippi runs from the point where the Alabama and Mississippi line strikes the gulf of Mexico to the eastern junction of Pearl river with Lake Borgne and that all islands within six leagues of the shore, and not within three leagues of the State of Louisiana as above described, are included in Mississippi territory.

5th. Our information is that the territory in dispute between the two States, all of which is within six leagues of the Mississippi shore, consists wholly of water and small islands, most of which in high tide are covered by water, and that little if any, of said territory is within three leagues of the Louisiana shore, but it is impossible to tell from the maps, just how much, if any, of said territory is within said limit, of three leagues, by reason of the fact that the main shore line of Louisiana is not distinctly defined on any maps to which we have had access, and therefore it is impossible to fix the true boundary line without a survey. Yet it is manifest that the greater portion of the territory in dispute is within the jurisdiction of the State of Mississippi, for the reason that it is within six leagues of the Mississippi shore, and not within three leagues of the Louisiana shore.

6th. By reason of the fact that the exact boundary line between the two States can not be ascertained without a survey, we agreed to submit no line to the commissioners appointed by the governor of Louisiana, but the commissioners of Mississippi suggested to them a friendly suit in the Supreme Court of the United States as the only method by which to fix the true boundary.

Respectfully submitted,

W. A. WHITE.
J. I. FORD.

State Boundary Controversy.

I had the honor to bring to the attention of the legislature at its session in 1902 the question of the disputed boundary between Mississippi and Louisiana, wherein each State is claiming ownership of and jurisdiction over certain islands and waters in the gulf of Mexico. The legislature having taken no action looking to a settlement thereof, I took the matter up in person and tried in vain to effect an adjustment of said controversy with my ideas of the rights and merits of Mississippi's claim and interests in the premises, and I have now to say that since then the State of Louisiana, acting through its governor and attorney general, filed a bill against this State in the Supreme Court of the United States, styled: "The State of Louisiana, complainant, *vs.* The State of Mississippi, defendant," wherein the complainant seeks to have the disputed territory adjudged to be the property of that State and under the exclusive jurisdiction of its laws. The effect of such decree in favor of the complainant would, under the operations of the laws of the State of Louisiana, prohibit the citizens of Mississippi from taking fish and oysters from the waters in dispute. The said oyster reefs are to a very large extent the dependence for supply of fish and oysters to the people of Mississippi living on the southern border of the State, who are engaged in that particular line of industry. The property in controversy is of great value, extending perhaps into millions of dollars.

2219 Owing to the enormous consequences to the State, which are involved in the controversy, and because also of the multitudinous and complex duties already devolving upon the attorney general, rendering it impossible for that officer to give the necessary time, work and study which the importance of this case demands, it became imperative that assistant counsel should be employed therein. I secured therefore, Hon. Monroe McClurg, of Greenwood, Mississippi, and the firm of Dodds & Griffith, of Biloxi, Miss., to assist the attorney general in representing the State's interest in said case, and I recommend to your honorable body suitable recognition of their valuable services and that you appropriate for the payment of their fees respectively such liberal sums as your judgment approves.

The attorney general's report will acquaint you with the progress made in said cause to date.

1899.

* * * * * * *

Introduction.

WASHINGTON, D. C., June 29, 1898.

On May 6, 1897, the United States Fish Commission received a communication from Hon. Adolph Meyer, M. C., inclosing the following concurrent resolution of the legislature of Louisiana:

Be it resolved by the house of representatives of the State of Louisiana, and the senate concurring, That the United States Fish Commission be requested to investigate in the oyster-spawning season and report to this General Assembly before its next session the exact season of the oyster spawning in this State and all other facts respecting the same, and whether or not the present existing laws are not injurious to the oyster industry of this State.

S. P. HENRY,
Speaker of the House of Representatives.
R. H. SNYDER,
Lieutenant Governor and President of the Senate.
MURPHY J. FOSTER,
Governor of the State of Louisiana.

JOHN T. MICHEL,
Secretary of State.

21 Pursuant to this request, and in view of the importance of the Louisiana oyster industry, it was decided to undertake an investigation of the subject, and Dr. H. F. Moore, of this commission, was directed to visit Louisiana in August and September, 1897, for the purpose of making some preliminary inquiries, and the steamer

Fish Hawk, Lieut. Franklin Swift, U. S. N., commanding, was dispatched to the State in February, 1898, to conduct a more extensive examination of certain oyster grounds. The accompanying report, based on the investigations thus made, has been prepared by Dr. Moore, who accompanied the vessel and was charged with the consideration of the biological aspects of the work. It was the intention of Lieutenant Swift to write the report on the reconnaissance made by the Fish Hawk, but before he could do so he was detached from the commission and assigned to naval duty.

GEORGE M. BOWERS,
U. S. Commissioner of Fish and Fisheries.

Report on the Oyster Beds of Louisiana.

By H. F. Moore,
Assistant, United States Fish Commission.

Within recent years several investigations of Gulf coast oyster grounds have been made by the United States Fish Commission, but none of these related to the waters of Louisiana. Upon the receipt of the request from the General Assembly for information concerning the oyster-beds of that State, the writer was ordered to Louisiana for the purpose of determining certain facts relating to the question of close seasons, and to make an examination preliminary to a more careful and extended investigation by the steamer Fish Hawk later in the season. A period of about fifteen days in August and September was spent in the oyster regions of St. Bernard, Plaquemines, and Terrebonne parishes, and as a result it was decided to confine the contemplated survey to the St. Bernard region as offering better facilities for the character of work which it was desired to undertake. The Fish Hawk was not available until February 1, from which time until February 24, when she
2222 left in order to begin her regular work of shad-hatching, the field work was prosecuted vigorously and continuously, except when interrupted by stormy weather.

Owing to the shallowness of the water the Fish Hawk could not be used for active duty in the survey, and she was therefore anchored as close as possible to the oyster-beds and used as a base of operation for the launches, at first off the northern entrance to Grand pass, and afterwards, during the greater part of the work, off the mouth of Three-mile bayou. The work was often performed at a distance from the ship, and much time was unavoidably lost in running to and from the scene of the day's operations. Should a complete oyster survey of the region be attempted in the future, it could be much facilitated by employing several light-draft vessels, which could be worked into the marshes and used as quarters for the field parties on the launches.

It was originally intended to make a thorough and complete survey of the oyster-beds of St. Bernard parish similar to that which

as made by the Fish Hawk in Apalachicola bay, but this plan was abandoned when it was found that the time at the disposal of the party was to be so limited. Many of the stations established by the Coast Survey have been obliterated or washed away by the storms, and it would have required more time than was available for the entire work to erect and cut in the signals necessary to a proper survey. Contrary to expectations, it was found that the topography in general had not undergone many important changes since the survey upon which the Coast Survey charts were based, and the several points could be identified and located with sufficient accuracy to suit the purposes of a reconnaissance.

The plan finally adopted was to run lines of timed soundings from point to point, so as to cover the intervening waters by series of intersecting zigzags. As the lines were rarely over 2 miles in length, the position of any given sounding could be approximately determined by its time, the time of beginning and ending the line being noted, and the speed of the launch being nearly uniform on each series of soundings. Most of the important beds were also located by compass bearings, from charted points. The charted areas of the beds, as well as their positions, are but approximate; but it is believed that the aggregate is measurably near the truth, although individual beds might prove somewhat greater or less in extent than appeared from the hurried examination which it was possible to make. The soundings were made by means of the sounding pole devised and used by Lieutenant Swift in the survey of Apalachicola bay, and described in his report upon the oyster-beds of that vicinity. Owing to lack of time no effort was made to determine with exactness the number of oysters to the square yard, as is done in a regular survey, and the terms "dense," "scattering," and "very scattering" are relative in their application to this field only. Dense and scattering beds are such as can be worked with profit by means of tongs. "Very scattering" beds are shown on the chart with some ambiguity,—in a few places especially in the lagoons, denoting growth, which it hardly pays to work, sparsely distributed over the entire bottom; in other places, as in the northern part of West Karako bay, representing small beds more or less dense, distributed at irregular intervals, and in the text described as "scattered in patches," or in somewhat similar terms. Such beds can be worked with profit.

The investigation in St. Bernard parish was under the direction of Lieut. Franklin Swift, U. S. N., commanding the Fish Hawk. The hydrographic field work and the location of the oyster beds were carried on by Mate J. A. Smith, U. S. N., and by Mr. Eugene Smith, of the steamer Fish Hawk.

After the Fish Hawk concluded the reconnaissance in St. Bernard parish, the writer was instructed to make an examination of the oyster-grounds of Louisiana west of that region. In pursuance of the latter purpose, he left the ship at Bay St. Louis upon its departure for the north on February 25, and proceeded to several places in

Plaquemines parish, where boats were hired, and all the principal natural beds and planting-grounds were examined. At Grand isle, on Barrataria bay, a lugger was secured and an examination made of all the oyster-grounds in the vicinity, after which a cruise was made to the westward, under the guidance of men familiar
2224 with the region, as far as Morgan City, all of the oyster regions, with the exception of the upper waters of Terrebonne bay, being visited en route. No attempt was made to chart or locate even approximately the individual beds examined on this brief tour, but their general character, present condition and future prospects are reported upon in the following pages.

The writer acknowledges his indebtedness to Col. F. C. Zacharie, Hon. E. McCullom, Hon. Adolph Meyer, and Hon. S. P. Henry for valuable assistance and information and to Mr. F. F. Hansell for the use of his yacht in visiting the St. Bernard beds in August 1897.

The Natural Oyster-beds of St. Bernard Parish.

General description of the region.—The area embraced within the limits of the reconnaissance made by the Fish Hawk, and shown upon the chart accompanying this report, does not include all of the oyster-grounds within the parish of St. Barnard. Field work was pushed into the interior waters lying southwest of Indian Mound bay and Southwest pass, and known to the oystermen as Treasure bayou, Mussel bayou, Flat bay, etc., but the lack of a chart of this region approaching even approximate correctness has made it seem advisable to attempt to plot the oyster-beds found there, though they are described in general terms in the text. South of Drum bay, in which lie the southernmost of the charted beds, are extensive areas of good oysters stretching to the parish line at Mozambique point, but these were not examined owing to lack of time. We were informed that notwithstanding their extent and the good quality of the oysters they were not extensively worked, on account of their inaccessibility as compared with other beds of St. Bernard parish, and for this reason it was considered that, for the purposes of the investigation, it was not advisable to devote to their examination time which could be more profitably spent in the study of those beds which were in active use and which therefore presented problems of more immediate importance. In this connection incidental mention may be made of the gregariousness and the general lack of enterprise of the oystermen of this district, who, in the latter part of the season, often spent upward of two weeks in loading their
2225 boats in Three-mile bay rather than leave their fellows and familiar ground to sail 20 or 30 miles to the southward, where they claim they could secure their fares in three or four days.

The district covered by the field work extends from Mississippi sound on the north as far as Morgan harbor on the south, and from Chandeleur sound to the zone where the water becomes of such slight

salinity as to be fatal to oyster life. Within the limits of the reconnaissance this zone accords approximately with the meridian passing through Lake Borgne light-house in Mississippi sound the oysters extending a mile or two west of that limit, while in the marshes they are all east of the line. The area covered by the reconnaissance was about 200 square miles, comprising a large part of the "Louisiana marsh." The land is low, rarely rising more than 18 inches above the level of ordinary high water, but in a few cases shell-banks have been thrown up by wave-action, thus producing the maximum land elevations, in no case, perhaps more than 3 or 4 feet above tide. During storms the entire land area may be flooded, and in the disastrous hurricane of 1893 it was covered by from 8 to 12 feet of water. The soil is a stiff mud or blue clay, covered with a sparse growth of coarse grasses and scattered tufts of salicornia. Along the bayous there are clumps of mangrove bushes, but with the exception of several crab trees on Mudgrass island, there is probably not in the whole dreary expanse a plant reaching a height of 10 feet, nor is there a single human habitation.

The land constitutes a low-lying archipelago of irregular islands separated from one another by shallow bays, muddy lagoons, and tortuous bayous, the area of the water being somewhat greater than that of the land. The bayous are of two classes, rather broad, short, deep passes, like Nine-mile bayou, Three-mile bayou, and Deep pass, which serve as the main avenues of tidal flow to and from the interior bays, and long narrow water-courses which characteristically run lengthwise of the islands, as is seen in the cases of Door Point bayou, Dead Man bayou, etc. The bayous of the first class have generally a depth of from 18 to 42 feet, those of the second class from 5 to 12 feet, and all are more or less obstructed by bars across their mouths. The bottoms of the bayous are almost invariably composed of soft mud.

2226

The bays, with the exception of several of those opening into Chandeleur sound, communicate with the outer waters by narrow mouths. Their floors are comparatively level and, with one or two exceptions, are composed principally of soft mud, with scattered patches of hard mud and sand, usually so small in area as to be negligible in plotting the soundings. The depth of water is generally from 3 to 6 feet, although in some of the bays, particularly those to the eastward, there are channels through which a considerably greater depth can be carried.

The lagoons are very shallow, small-mouthed, blind bays, like Blind pass and Grecque bayou, with soft bottoms largely exposed as mud flats at low water.

Blind pass, Nine-mile bayou, and False Mouth bay.—Blind pass marks the western extension of the oyster in the marshes on the south side of Mississippi sound. It is a shallow lagoon communicating on the north with Mississippi sound, on the east by a narrow but deep cut, with Nine-mile bayou, while to the southward a tortuous bayou establishes communication with False-mouth bay. It

consists largely of a mud flat, exposed at low water, with oysters of rather inferior quality sparingly scattered over the bottom.

Nine-mile bayou is about two and a half miles long to its main entrance into False-mouth bay and has a width of from 100 to 300 yards. At its mouth there is a depth of about 18 feet, which rapidly shoals outwardly to 6½ or 7 feet. In the bayou the depth ranges from 17 to 39 feet, the average being about 24 feet. The bottom is soft, excepting that portion lying opposite the small island at the southern end, where hard mud was found. There are no oysters in this bayou.

False-mouth bay covers about 11.3 square miles. It connects with Mississippi sound by means of Nine-mile bayou, and to the eastward opens by a wide mouth into the passage between Raccoon and Mud-grass islands. The bottom is composed of hard mud of a somewhat clayey character, resembling that on the surrounding islands. The depth is almost uniform, in the northeastern part being from 3 to 3¾ feet and elsewhere from 4 to 5 feet. The density in the middle of February varied from 1.0048 to 1.0066 in the several parts of the bay, the temperature at the same time ranging between 16.5° C. (61.7° F.) and 19° C. (66.2° F.) The water is less saline than elsewhere in the marsh, owing to its proximity to the main sources of fresh water, the Pearl river and the discharge from Lake Pontchartrain.

2227

There are very few oysters in False-mouth bay, and those discovered by the reconnaissance were found fringing the three islands shown on the chart, as a scattering growth of single oysters of fine shape, round, deep, and about 6 inches long. The amount of young growth was small, a few oysters about 2 to 2½ inches long being found attached to the old ones, to clam shells and lying singly on the mud. A very small amount of spat was attached to the clam shells which fringe the northeast shore of the southernmost island. All of these oysters, both large and small, were extremely fat, but their flavor was insipid owing to the low salinity of the water. The oystermen state that the oysters are always fatter here than on the beds to the eastward, and that they are kept "cleaned up" by the boats which aim to carry the best oysters to the New Orleans markets. It is the custom of the oystermen to paddle around the shores when the water is clear and smooth and pick up with nippers the oysters which can be clearly seen. In December, 1897, a small bed was found in the northern part of the bay, but a number of boats went to work upon it and within a few days it was reduced to a state of practical extinction and we were unable to find any remnant of it.

An examination of the bottom by means of the dredge and tangles showed it to be remarkably clean and free from debris of all kinds. A few crabs of small size, several species of lamellibranchs, and numerous worms were the only living forms found on the hard bottom. Enemies are probably extremely rare, although it is possible that the drum-fish might cause damage upon beds of planted oysters. The conch was not found at all, although it is not uncom-

mon in the neighboring waters of Three-mile and Nine-mile bays.
The boring clam (martesia) is common, but it is less abun-
2228 dant than in the more saline waters, and in any case it would not prove detrimental to the oyster.

It seems probable that the scarcity of oysters in False-mouth bay is due in a large part to the lack of suitable places of attachment for the spat, and if this be so there is but little doubt that productive beds might be established by planting shells, together with a sufficient number of brood oysters to furnish fry. We found here the largest area of firm bottom discovered any where within the limits of the reconnaissance. In most other parts of the district the hard bottom is distributed in small patches, lying like islands in the midst of soft mud, but in False-mouth bay the shells and seed could be deposited almost anywhere without danger of becoming engulfed. The amount of oyster food is larger than almost anywhere else in the district the average number of diatoms in each liter of water 1 foot above the bottom being about 22,000. The extreme fatness of the oysters is also ample evidence of the abundance of food, although, of course, the amount available for each individual would become less if planting were extensively undertaken. The chief drawback to planting lies in the low salinity, which, as before stated, detracts from the flavor of the oyster, and if not corrected during the spawning season would also militate against the production of young. Without doubt, however, there is an increase in the density during the late spring and summer when fry abound. Material to serve as ultch or collectors for the attachment of the young oysters might e obtained from the island in the extreme southern part of the bay, here the shore is covered by a mass of clam shells, more or less nely broken up. The smaller particles of shells are too small for se, as the action of the storm waves in the shoal waters of the bay ould tend to carry them away; but many of the shells are entire, nd these, together with the larger fragments, should make excelnt cultch.

Nine-mile bay.—This body of water lies east of Pirate point and st and northwest of Raccoon island. It is continuous with Threele bay to the eastward, and in its northwest corner it communies with Nine-mile bayou by a channel in which the depth varies m 10 to 21 feet.

North of Nine-mile bay and in communication with it lies
29 South bayou, a lagoon-like body of water, very shoal and with no oyster-beds. The depth of water in the bay is between 4 and et, and the bottom is composed principally of soft mud. The sity on February 14 was about 1.0060, and the temperature at the e time was about 17° C. (62.6° F.) The oysters are obtained ncipally in the eastern part, between Raccoon island and the ning to South bayou, being generally single, much scattered, and ather good shapes. These beds, like those in Three-mile bay, much worked, and late in the season are composed principally ullings. There is a small bed of scattered oysters just off the

southeast point of Pirate point, which appears to have been established, or at least largely sustained, by artificial means as a result of bedding oysters for "fattening" purposes, the culled young growth and shells being carefully returned to the water to serve as seed and cultch, the product of which becomes available for market in subsequent seasons. This place is claimed by oystermen to possess remarkable properties as a fattening-ground, but as the oysters are brought from the denser waters to the eastward and exhibit their improvement within 24 hours from the time of bedding it is probable that the process is one of bloating rather than of fattening.

— small bed of oysters is found in the southeastern branch of Nine-mile bayou, about the middle of the second reach from Nine-mile bay, on the west side of the channel. It is from 30 to 50 yards long, and extends to about the middle of the bayou. It contains some single oysters of good shape and quality and many dead shells.

Three-mile bay.—Three Mile bay is the most important oyster region in St. Bernard parish, not because its beds are more extensive, than those of other parts of the Louisiana marsh, but because of its accessibility from New Orleans and the cities on Mississippi sound. Nearly all of the boats enter the marsh at Three Mile bayou, whatever may be their ultimate destination, and it is to this place also that oyster freighters resort to secure their fares from the luggers and other craft engaged in the active work of oystering.

Three-mile bay lies between Three-mile bayou (by which it communicates with Mississippi sound) on the north and Raccoon
2230 island on the south, its eastern and western limits being Nigger point and Shell point, respectively. It covers an area of about 7.3 square miles. In Three-mile bayou the depth of water reaches a maximum of about 40 feet, the channel gradually shoaling as it enters the bay, over the greater part of which the depth ranges from 4 to 6 feet. In some places a depth of 3 feet or less is to be found, but in general such shoal spots are less common than in West Karako bay. The average density of water during February was about 1.0065, and the temperature was about 17° C. (62.6° F.) The bottom is composed of mud of varying degrees of softness. There are a few small areas of hard bottom, but these are principally upon old oyster-reefs, and are now used by the oystermen as beds on which to deposit their catch pending the completion of their cargoes. The softest bottom is found in the southern part of the bay near Raccoon island, where the mud is entirely too soft to utilize for planting, but places in the center of the bay might be used, although on account of the danger of suffociation in the mud the oysters could not be planted very thickly. The amount of oyster food contained in the water is large, and, especially in the northern part of the bay near the inlet, the currents are comparatively strong. Originally, we were informed, the natural oyster-beds in this bay were dense and extensive, but as a result of the persistent "working" to which they have been subjected during the past few years the dense,

ell-defined reefs have entirely disappeared, and have been replaced
a scattering growth of more general distribution. The clusters
e kept broken up by the process of culling, with the result that
e separated oysters show considerable improvement in shape, con-
ion, and flavor over their original state. They are usually either
gle or in clusters of from two to four; they are rather elongate,
derately fat, of fair flavor, and comparatively free from extra-
us growths, such as mussels and algæ. On the very soft mud
r Raccoon island, in the southern part of the bay, the oysters
extremely long and in clusters overgrown with mussels.
Early in the season and until about January or February there
rather large proportion of marketable oysters, but later these
become caught up, leaving practically nothing except dead
l shells, spat and young growth. This was essentially the
condition of the beds at the time of our examination, and
r the middle of February it took about three times as long to
h a barrel of oysters as it did early in the season, and in the
r part of the month most of the fleet which had been oystering
e were forced to move farther into the interior. By the time
next season opens many of the young oysters which have been
d off will have reached a suitable size for market, and the
idence of one year thus ensures the plentitude of the next.
e it not for the moderate care with which the oysters are culled
he young ones and the dead shells returned to the beds whence
were taken, it is impossible that these beds should have so long
ined the demands made upon them. Were it the custom here,
is in certain other parts of the State, to carry off the young for
the phenomenon of the annual recuperation of beds previously
usted of their marketable stock would not be witnessed.
t all of the boats cull their catch as carefully as they should.
which carry their oysters to New Orleans and other markets
le as "shell stock," from motives of self-interest exercise due
for imperfectly cleaned and separated oysters bring a lower
than those which are well culled and free from extraneous
hs of barnacles, mussels and young oysters. The chief diffi-
is with those boats which catch oysters for the canneries, located
pally without the State, where the presence of small oysters is
jectionable.
s reported that dredges have worked in Three Mile bay, but
nditions are such that it is probable that this practice was
extensive.
t Karako bay.—West Karako bay embraces about 9 square
included between Crooked island and the land masses em-
g Johnson bay and its connections, and between the Raccoon
s and Shell island. Its greatest extent is east and west. The
resembles that of Three Mile bay, being composed princi-
f soft mud with patches of hard mud at wide intervals. The
depth over most of the bay ranges from 4 to 6 feet, but there
is a maximum depth of 8½ feet in the channel running from
Dead Man island to the cut north of Shell island, and there

are also a number of shoal spots upon which the depth is less than 3 feet, these shoals being usually covered with oysters. The average density of the water is about 1.0065.

The oyster beds in this bay are more extensive that in Three Mile bay, and there are also several well-defined reefs which can be characterized as dense. One of these lies south of Dead Man island and two others lie west of Shell island, about opposite its northern and southern points, respectively. The oysters on these reefs are of moderate size and in clusters of from 6 to 20. North, northeast and east of Dead Man island, as far as the mouth of Picnic bayou, are patches of scattered oysters in clusters. No attempt is made to indicate either their size or location on the chart, although they are shown in toto over the area mentioned. There are other beds of scattered growth, the limits of which are better defined, and these are plotted with some approximation to correctness. All of these oysters are of the same general character, being in clusters of from 6 to 20, rather thin-shelled and elongate, approaching in general the Raccoon type, and in some parts of the bay they appear to be more or less imbedded in the mud. They are to some extent clothed with brown alga, especially in that part of the bay lying east of Dead Man island, and many of the clusters bear a few mussels and barnacles. The amount of young growth is large. At the time of the examination most of these oysters were but moderately fat, and some of them were quite poor. They show many of the features exhibited by Virginia beds, and their quality would doubtless be improved by more extensive working, provided that proper culling methods were practiced. West Karako bay is resorted to by a number of boats, especially by those engaged in taking oysters for the canneries, and late in the season, after the beds of Three Mile bay become depleted of their more desirable oysters, some of the oystermen engaged in the "shell trade" also work there.

Johnson bay and Johnson bayou.—Johnson bayou is about 2 miles long, communicating at its southern end with an intricate series of bays and lagoons lying north of West Karako bay. At the entrance from Mississippi sound the depth of water is about 6 feet, but inside it deepens to 12 or 14 feet towards the west bank. The bottom is composed of very soft mud. It contains a very scattered growth of oysters throughout its length.

2233

Johnson bay is the easternmost and largest of the several bodies of water communicating with the bayou. It contains about 13 square miles. The bottom is principally soft mud, and the density was about 1.0062 during the first week in February.

There is a scattering growth of good oysters all around the shores, and a few also occur in the middle, where there is also an old, exhausted reef, the crest of which is dry at low water. It is about 150 yards long and 100 yards wide, and it constitutes the most extensive area of hard bottom in the bay. It could be utilized to advantage for planting. At the time when this bay was examined there were seven schooners oystering there, the captain of one of

hich stated that the oysters were much scarcer than formerly and at it took him from 10 to 17 days to get a load of 120 barrels. e oysters are gathered by small boats, of which each schooner s several, which go into the small bayous and alongshore, where y pick them up in the shoal water.

In the southern part of the irregular bays west of Johnson bay re is a bed of scattered oysters on the soft mud in a depth of from o 3 feet. They are generally in clusters of from 3 to 15, mostly nedium size, with a good growth of young oysters and some spat, more or less overgrown with mussels. It is stated that there is attering growth all over the irregular lagoons to the northward. density on the bed examined was 1.0066.

ast Karako bay, Northwest Jack Williams bay, and Picnic bay.—Karako bay lies between Shell island and Deep pass, the former rating it from West Karako bay and the latter placing it in munication with the waters of Chandeleur sound. It embraces t 7.4 square miles, its greatest extent being in a north-and- direction. In the northern half of the bay the depth varies 2½ to 4 feet, the bottom being composed principally of soft mud, often mixed with sand. Along the southern side of the island in the northern part, there is considerable hard mud and sand interspersed with soft mud, and also a few patches, or less limited in extent, in other places. In the southern half e bay the water averages somewhat greater in depth, being 4 to 7 feet. A channel runs from the northern point of Shell towards the mouth of Deep pass, the water reaching a maxi- depth of 16 feet near the point projecting into the southern the bay, and there is also some deep water near the upper ce to Deep pass. In this part of the bay the bottom is com- of soft mud almost exclusively. The amount of oyster food is reat.

East Karako bay there are about eight oyster reefs which are awash or exposed on their crests at low water. On and near rests the bottom is invariably hard, being composed of a mac- of sand and ground-up clam and oyster shells, closely com- with entire shells lying upon the surface. As a rule these are long and narrow in their exposed portions.

the crests of the reefs there is usually a scattering growth of oysters about 2 to 2½ inches long, together with a few large d considerable quantities of spat are attached to the dead which from the combined action of the sun and waves are bright and clean and admirably suited to serve as cultch. ung-growth oysters are usually single or in small clusters, well-shaped and flinty-shelled. Away from the crests of the bottom becomes gradually softer, finally merging with the ding mud, and as the bottom changes there is also seen a tion in the characters of the oysters. They occur in larger usually containing from 6 to 10 adult individuals; the se their flint-like appearance and become dark brown

and more or less overgrown by a dark-brown sea-weed, which appears to be especially abundant in the southern part of the bay. These oysters are invariably flat, thin-shelled, and the largest of them are usually not more than 5 inches long. Excepting a bed off the long point on the eastern side, all of the oysters in East Karako bay are inferior in fatness and flavor and are rarely taken by the oystermen. They mark the extreme condition toward which those in West Karako bay indicate a tendency,
2235 and no doubt represent the primitive state of most of the oyster beds of this region. If these beds were worked, there would doubtless result an improvement in the quality of the oysters, due to the breaking up of the clusters and the thinning out and better distribution of the individuals. It would be distinctly advantageous if many of these oysters could be gathered as seed and planted elsewhere, under restrictions advocated in the recommendations attached to this report, thus producing not only an improvement in the character of the plants, but also in the enviro-ment of those left upon the natural beds.

There are several places in the bay where the growth is quite dense, and over considerable areas there is an average of from 6 to 8 clusters of from 3 to 8 adult oysters each per square yard. Surrounding these, and more or less connecting one dense area with another, there are scattered clusters lying on the soft mud. The comparatively few oysters taken from the beds in this region are used exclusively for steaming, and the alga, which often grows in luxuriant tufts on the shells, detracts from the value of the oysters for this purpose, as it is extremely difficult to prevent its filaments from becoming entangled with the "meats."

Northwest Jack Williams bay is a northern extension of East Karako bay, and it bears the same general characteristics as are found in the northern part of the latter. Its density is about 1.0110, the depth of water is from 2½ to 3½ feet, and the bottom is composed largely of soft mud. Two beds of oysters were found—one in the center of the bay, where there are scattered clusters on the soft mud, and another around a shell island in the eastern part, the latter resembling the exposed reefs described above. There is also a scattered growth along the southwest shore.

Picnic bay extends westward from the bay just described, and at the strait connecting the two is a small bed of oysters which extends for some distance into the southern part of Drum bayou. There are also a few oysters scattered all over the bay, the mud there being very soft, with a number of dead shells imbedded beneath the surface. They are long, narrow, and sharp-edged, and grow in clusters, bearing mussels, barnacles and tunicates. The shells fre-
2236 quently contain dark vesicles filled with black muc. The density in this bay was several degrees lower than in the neighboring water, being but 1.0070. The depth rarely exceeds 2½ feet.

Drum bayou and Turkey bayou.—Drum bayou is a long, narrow

channel leading from Mississippi sound southward to Picnic and Northwest Jack Williams bays, and giving off a branch westward to Turkey bay. The depth of water ranges from 5 to 10 feet, with about 3 feet on the bar across the mouth. The density is about 1.0105 and the bottom is mostly soft mud. There are some large single oysters in the channel, together with many dead shells and some young growth, and at low water occasional large clusters of raccoon oysters are exposed along the banks. The oysters in the channel are rather long and narrow but at the time of examination were in fair condition and of good flavor. The creek leading into Turkey bayou possesses the same general features as the main stream, but has a depth of from 1 to 3 feet. It contains oysters of fair quality, both single and in clusters of from 3 to 10, some of them being very large.

In Turkey bay, the large lagoon discharging through Turkey bayou, the depth of water varies from 2 to 6 feet, the bottom being generally soft and muddy, and the density about 1.0076. There are three areas of scattered oysters, one lying in the channel between the eastern shore and a small island, and another being about a quarter of a mile from the entrance to Turkey bayou, and the third beginning opposite the channel opening to the westward and extending southward for about three-eighths of a mile. The latter bed is the largest of the three, and near the mouth of the creek there are some oysters, of good size and quality. This creek also contains a scattered growth of oysters, which becomes dense in the branch running to the northward, where the oysters are large and fine.

Grand pass, Bayou Grecque, and Shrimp bay.—Grand pass (Oyster bay) has an area of about 1.8 square miles. It opens on the north into Mississippi sound and on the southeast toward Chandeleur sound. The depth is generally between 2½ and 5 feet, but deeper water occurs on the west side of the small island in the northern part of the bay, where soundings of from 12 to 16 feet were found. Excepting in the vicinity of the oyster-reefs and in places along the shore, the bottom is composed of deep soft mud. The density during the first week in February averaged about 1.0100 and the temperature was about 10.5° C. (50.9° F.).

There are eight oyster-reefs in the eastern part of this bay, several of them being partially exposed at low water. A scattering growth of marketable oysters also occurs in the shoal water along the eastern shore, and on the middle third of the western shore we found a corresponding development of young growth. In the latter locality every shell or other hard body in the water has young oysters attached to it in clusters, and there is no doubt but that by exposing suitable cultch around the edge of the marshes, as is done at Bayou Cook and Whale bay, important and productive spatting grounds could be established and a supply of seed thereby secured which would be independent of the natural beds. It is stated that considerable quantities of oysters were to be found formerly in the

center of the bay, but that they had been exterminated by the dredges which operated there. At present there are practically no oysters and very few shells to be found away from the shores and reefs, but there is, of course, no indication of the means by which they were caught up if they ever existed in other parts.

Oystering here appears to be confined to the vicinity of the exposed reefs and the shoal water along the eastern shore. The oysters at the time of our examination were rather poor in shape, of moderate size, and inferior in flavor and fatness. They are usually found in small clusters. The conch is the most troublesome enemy with which the oysters have to contend in this vicinity. It is rather more common and destructive here than in the waters farther removed from Mississippi and Chandeleur sounds.

In the extreme southern part of the bay there is a very scattering growth and in the mouth of Jack Williams bayou there occurs a bar of raccoon oysters, partially exposed at low water. Raccoon oysters also occur along the shores between tide marks throughout the length of the bayou and in the small, muddy ditches opening into it, and in the channel are scattered clusters of oysters which are fairly fat and superior in flavor to those which are found on the beds of Grand pass.

2238

From the southwest part of Grand pass a tortuous, narrow, and in some places deep, bayou, leads south to a series of shoal lagoons, the entire chain constituting Grecque bayou. The lagoons have an average depth of about a foot, with a few holes 2 to 3 feet deep in places, and extensive mud flats around the margins. The bottom is usually very soft. The density varies from 1.0107 in the ponds near the entrance to 1.0119 in those at the end of the chain, the flow of water through the long, narrow communication with Grand pass being apparently insufficient to compensate for the increased evaporation on the shallow mud-flats. Over the greater part of these lagoons there is a very scattering growth of large and rather good oysters on the mud, and there is also a scattering fringe of raccoon oysters on the edge of the marsh. The oysters in Bayou Grecque are taken by small boats and carried to the schooners in Grand pass.

Shrimp bay and Southeast Jack Williams bay.—Shrimp bay lies southeast of Grand pass, with which it has direct communication by means of the upper part of Jack Williams bayou. Its depth varies from 1 foot in the northern and eastern parts to about 4 feet at the southern end, where it opens into Southeast Jack Williams bay, together with which it has an area of 1.7 square miles. Its density on February 3 was 1.0096. This bay contains five oyster-reefs, exposed at low water, with a scattered growth of oysters surrounding each. Near the reefs the bottom is hard from the accumulation of ground-up shells and sand, but elsewhere it is soft, and in the northern half of the bay with a hard substratum of dead shells about a foot beneath the surface. This portion of the bay appears to have been at one time an extensive oyster bed, which has been largely

destroyed by an accumulation of mud thrown down, some of the oystermen claim, by the great storm of 1893, and the reefs
229 which have already been mentioned, and several patches of oysters along the northeast shore, are now all that remain. There are also oysters in the bight on the eastern side of the bay, scattered more or less sparsely over the mud-flats, and near the small islands forming an exposed bar.

Upon the reefs the oysters are small and of the clustered raccoon type, but in the slightly deeper waters surrounding them there are some single oysters of good shape, but not very fat. In Southeast Jack Williams bay, which consists of a larger western and a smaller eastern arm, there are very few oysters, although the presence of shells beneath the surface of the mud indicates the submergence of beds formerly existing there. In the eastern branch there are a few shells lying on the surface of the mud, and in the lagoon at its southern end there are raccoon oysters along the banks and a few clusters in the channel in about 5 feet of water.

In the bay the depth is from 2 to 3 feet, the bottom being composed of soft mud. The density in the eastern arm was 1.0107 and in the western 1.0094.

Cranetown bay.—This bay which lies between West Karako bay and Southwest pass, has an area of 2.7 square miles, and a depth of between 3 to 6 feet, except near the mouth of Elephant pass, a broad bayou having a maximum depth of 30 feet, by which it communicates with Chandeleur sound. The bottom over most of the northern and eastern parts of the bay consists of soft mud, except upon and near the exposed crests of the reefs, but toward the middle of the west shore there is a considerable area of hard mud and sand. Being in such intimate connection with the outer waters via Deep pass and Elephant pass it is not surprising to find that the water here is denser than on most of the other oyster-beds of St. Bernard parish, ranging from 1.0139 to 1.0163. The amount of oyster food, as measured by the number of diatoms, is small. The currents are rather strong.

In the northern part there are several dense beds of oysters, which have their crests bare or awash at low water. Surrounding these, as well as on the west side, there is a scattering growth of oysters in clusters. In general character these beds resemble those of East Karako bay, the oysters being inferior both in shape and
230 flavor. Near the crests of the reefs there is a considerable quantity of young oysters in small clusters attached to dead clam and oyster shells.

On the northeast shore, in the small bay between Deep pass and Elephant pass, there is a bed of scattering oysters in small clusters. These are of fair size and fatness, and in general somewhat superior to the other oysters in the vicinity. A scattering growth of rather large oysters and many dead shells are found in the mouth of the bayou opening into the southwestern part of the bay. These are the fattest and best oysters in the vicinity.

Kerchimbo bay lies west of Cranetown bay, with which it communicates by the bayou just mentioned. It opens southward into Southwest pass, westward by an artificial cut into East Karako bay, and northward into the same bay by a bayou containing a few good-sized oysters and many dead shells. The depth of water is about 3½ feet, excepting near its upper end, where there are barely 2½ feet in the channel. It contains several old reefs, composed of dead shells and a scattering growth of rather poor oysters of medium size. According to the testimony of the oystermen there are good oysters scattered all over Kerchimbo bay, but the reconnaissance did not discover them.

Southwest pass.—This is a long, narrow body of water stretching from Cranetown and Kerchimbo bays on the northeast to the entrance to Drum bay on the southwest. It is about 9 miles long, and its width varies from ½ to 1¼ miles, the average being about ¾ mile. The area is about 7.9 square miles, and the depth is generally between 3 and 4 feet, although deeper water is found near the island in the center and some of the oyster-beds are in a depth of less than 2½ feet. There is considerable hard bottom, and in the southern two-thirds hard mud is the predominating characteristic. The density is somewhat greater in the northern part of the bay, where it averages about 1.0120 as compared with an average of 1.0085 in the southern part, this difference appearing to be due to the closer communication with the exterior waters in the north and with the interior bays and bayous, by way of Catfish pass, in the south. The water contains a fair amount of oyster food, more than Drum bay but less than either East Karako or Indian Mound bays,
2241 which lie to the north and west, respectively. There are good marketable oysters distributed throughout practically the entire length of Southwest pass. In most cases the growth is scattering, but north of the island, near the center of the bay, is a reef on which there is a dense growth of small oysters in cluster, together with a few good ones of medium size and some dead shells. This appears to be an old reef, from which the marketable oysters have been nearly all removed, but its condition is such that it will again be productive within a year or two. There is a scattering growth of oysters, in clusters of from 3 to 5, extending eastward from the denser portions of the bed.

A scattering growth also occurs near the shores of the island, and just south of it there are small patches distributed over the bottom, none of them being extensive enough to be called a bed, but constituting in the aggregate quite a large body of oysters. In the southern half of the pass there is a growth along shore on both sides of the channel, where the oysters are in clusters, much scattered, and all of fair quality. These beds appear to be rather extensively worked, and it is said that large quantities of oysters have been taken from there to the markets and that prior to the Atchafalaya crevasse in 1890 they had been almost exterminated by excessive tonging.

Drum bay.—Drum bay lies southeast of Southwest pass, with which it communicates by a broad pass at the western end. Including the waters as far east as Keelboat pass, the bay embraces about 12 square miles. North of Drum bay, and separated from it by a long, irregular island, there are two shallow bays, having together an area of about 1.7 square miles. The water in Drum bay is from 3½ to 6 feet, deep, the general depth being greater to the eastward, where, between the two islands lying northwest of Keelboat pass, there are 19 feet of water in one place. In the composition of the bottom hard mud predominates, but it is interspersed with areas of soft mud. The density varies from 1.0101 near the western pass to about 1.0150 in the eastern part, near Keelboat pass. The amount of oyster food, as determined by an examination of the water, appears to be small.

There are oysters scattered all over this bay as far as the entrance to Chimney bay. There is one very dense bed about ½ mile 2212 long and ¼ mile wide, lying near the center of the bay, and northwest of it lies a smaller reef, where the oysters are equally dense. Upon these beds the oysters are in clusters of from 3 to 10, of the raccoon type, poor in shape, condition and flavor. These reefs are not worked and there are about 18 inches of water on their crests at low tide. There is a scattering growth of oysters over a large part of the bay to the westward of the reefs just described, especially along the shores, and lying across the narrowest part is a reef of clustered oysters of fair quality. The best oysters, so far as flavor and condition are concerned, are found on a small bed northeast of the entrance to Chimney bay, but the growth there is very scattered and the bed is apparently nearly exhausted.

A dry shell reef lying north of this bed is now extinct as an oyster-ground, being composed entirely of dead shells, and it — stated that a bed of excellent oysters formerly existed between the two islands to the eastward, but that it was exterminated a number of years ago by tonging. No indication of it now remains.

In Julius pass, in some parts of Scow pass, and in Chimney bay there are, according to the statements of the oystermen, a few scattering oysters, but except the former these waters were not examined. There is a scattering growth in the two bays north of Drum bay, where the water is very shoal and the bottom muddy. The amount of young growth in Drum bay is fair. The clusters are overgrown to a slight extent with algæ, barnacles and mussels.

California bay.—In the head of California bay the depth varies from 3 to 5 feet and the bottom is composed almost entirely of hard shell. Excepting at the mouth of Dead Man bayou, there are no oysters, but several beds of dead shells were found. At the mouth of the bayou there is a scattering growth of fine, large, single oysters of excellent flavor and fatness. Formerly such oysters were found throughout the bayou and we were informed that in the winter of 1896–97 about 2,000 barrels were carried away from this place, and

CARD 24

our soundings and examination showed that practically none are left.

Fox bay contains a few scattering oysters near its eastern end, and there is a small bed in Redfish bend near Elephant pass.

2243 Indian Mound bay.—This is the largest body of water in the Louisiana marsh, and it contains more good, marketable oysters than any other of the bays within the limits of this reconnaissance. It lies between Crooked island and Catfish pass, and between Mudgrass island and the long island forming the western side of Southwest pass. Its area is about 21 square miles and its depth averages about 4 feet and ranges between 3 and 5 feet. Its density is least in the northwestern part and greatest in the southern part, as may be seen from an inspection of the chart; the average for the entire bay was about 1.0070 somewhat greater than in West Karako bay and less than in either East Karako bay or Southwest pass, with all of which it is in communication. The amount of oyster food in the water is large.

Practically the entire shore of this bay is fringed with oyster-beds, and there is besides a scattering growth around the islands in the middle. In the northeastern part, between Crooked island and Mudgrass island, there is a dense bed about ¾ mile long by ⅜ mile wide. The oysters on this bed are of good size, single and in clusters, and quite fat, although the flavor at the time of examination was poor, owing to the low salinity of the water. In the northeast corner of Indian Mound bay, there is another bed of dense growth extending in a northeast and southwest direction for about 1½ miles, with a maximum width of about ⅜ mile, and running off westward into a scattered growth of considerable extent. This bed constitutes the largest single body of good oysters in the region covered by the reconnaissance. They grow principally on the mud bottom, in clusters of from 3 to 10, their upper valves being dark with broad coriaceous edges, which usually indicate rapid growth, the lower valves being flinty and sharp-edged. Notwithstanding the denseness of this bed, the oysters are generally fat and in good order, and the flavor is excellent. There is some growth of alga on the clusters here, but it is much less luxuriant than on the beds of Karako bay. Taking into consideration the abundance and character of the oysters on this bed, it is but little frequented by the oystermen, not more than two or three vessels being seen upon it at any time during our visit.

2244 South of this bed is another dense body of oysters of somewhat similar character, but smaller in extent. On both beds there is an abundance of young growth and spat.

Near the middle of the northern part of the bay lies another dense bed, fringing a long, narrow reef, exposed at low water. The oysters here are mostly in clusters and covered with a considerable growth of alga, mussels, and barnacles. Most of the other oysters in this bay are more or less scattering, but in the extreme southern part, just north of Catfish pass, there is a dense bed of good oysters

urrounded by a considerable area of more scattered growth. Sev-
ral vessels were oystering here, and a considerable quantity of
ysters is caught late in the season, after the beds of Three-mile
ay and vicinity have been somewhat exhausted.

North and west sides of Mudgrass island.—These shores are
rgely composed of very soft, deep mud, a condition which has a
ry palpable effect upon the character of many of the oysters,
hich assume an extremely narrow, elongated form, and grow in
verted pyramidal bunches, the lower members of which are im-
rsed in the mud. On the north shore there are three areas of
ise growth. Two of them are situated near the northwestern
nt of the island, on moderately hard mud, the oysters being
ge and single or in small clusters, with an abundance of spat
ched. The third bed lies in a deep bay near the western end of
north shore, close to the point the oysters being of fair shape
quality, but on the soft bottom which constitutes by far the
ter part of the bed they are long, narrow, and sharp-edged as
ribed above.

ear the middle of the west side of the island, lying in a cove, is
nse bed of rather good, large oysters on hard bottom. There
few barnacles here, but mussels are abundant. The rest of the
rs on the west side of the island are of the kind described as
cteristic of the soft bottom.

easure bay, Mussel bayou, and vicinity.—The waters included
r this heading, except a portion of Treasure bay, are not shown
upon the accompanying chart, inasmuch as a proper survey
has never been made. They embrace an intricate system of
shallow bays, and bayous lying southwest of Indian Mound
The bottom is almost everywhere composed of a very soft,
nud, and the density of the water is low. The oysters are
y long, narrow, clustered, and rather poor in condition and
The shells are covered with great clusters of large mussels
ne barnacles, the growth of the former being more luxuriant
any other place in the parish of St. Bernard. Immediately
f Dutchman pass there is a rather dense bed of oysters lying
ht behind a small island. Upon the denser parts of this bed
ters are rather small and are in clusters, but near the edges,
leeper water, there is a scattering growth of single oysters of
t shape and flavor and very fat. A limited amount of
growth is found upon these single oysters, but the denser
near shore is well covered with spat. The bottom in the
of this bed is composed of hard mud.

sippi sound.—There are probably beds of oysters scattered
there on the shoals throughout such parts of Mississippi
fall within the limits of St. Bernard parish, but with the
of those near the entrance to Lake Borgne and in the
f Isle à Pitre they are rarely or never worked by the oyster-
were not investigated by the Fish Hawk. Scattered
ver the whole stretch between Lake Borgne light and St.

Joseph island, but as they lie within the limits of the State of Mississippi they are not represented on the chart. In the deep waters lying between Lake Borgne light and Half-moon island many small beds of oysters are found in depths of from 7 to 25 feet, most of them being in less than 15 feet. These beds, being small and numerous, could not be definitely located without the consumption of more time than was at our disposal, and they are therefore indicated only in the most general way on the accompanying chart. Upon most of these the growth was a scattering one, but there was one bed lying in 8 to 10 feet of water which was quite dense. There is another dense bed lying on the northeast side of Half-moon island, close inshore and in a depth of from 3 to 7 feet, where all of
2246 the oysters were small, apparently the result of last year's spatting, and in dense clusters. They will probably be fit for use in the canneries next season, but unless broken up and transplanted they will never be suitable for the "shell trade." This is evidently an old bed recently rejuvenated.

About two miles east of Half Moon island lies a bed known as Grand bank. It is in from 9 to 13 feet of water and extends about north and south for about 1¼ miles, with an average width of about ⅜ mile. The oysters here are in bunches, rather scattering and of small size. It is stated that this bed was formerly very productive but that it has been ruined by steam dredges.

On the south side of Half Moon island, there is a scattering growth beginning near shore and extending out for a distance of about a mile. The oysters here are not uniformly distributed, but occur in patches usually of small size, although there is one large bed, triangular in shape and measuring about ½ mile in base and altitude.

South of Grassy island is a circular patch of scattering growth about ½ mile in diameter. About ⅜ mile southwest of the same island lies a smaller but somewhat denser bed.

A dense bed circular in shape and about ½ mile in diameter, occurs southwest of Round island, in about 6½ to 7 feet of water, and from the southwest side of the island a very scattering growth extends for about ½ mile, where it merges with a well-defined bed.

Off the north point of Le Petit Pass island is a bed of scattering oysters, and on the east side there is another bed, a portion of which is covered by a dense growth. About midway between Le Petit pass and Nine Mile bayou there lies a crescentic bed, beginning ¼ mile from the shore and stretching in a general northeast direction for about 1½ miles. Upon all of these beds the oysters are poor in size, shape and flavor, being in clusters of the raccoon type, and fit only for use in the canneries. At the time that these beds were visited there were a number of vessels working upon them with tongs, and between Half Moon island and Lake Borgne a steam dredge was engaged in scraping the bottom. The oystermen claim that the dredges have caused much harm in the vicinity. The water here is always comparatively fresh, owing to the discharge

from the Pearl river and Lake Pontchartrain, and apparently
2247 the oysters are sometimes killed by the low salinity, an explanation which would account for the existence of beds composed entirely of young growth on old, dead shells. In the latter part of February the average density of the water north of Half Moon island was 1.0012, and south of the island is was 1.0028. This was without doubt lower than normal, as the readings were taken immediately after a period of heavy rainfall. It is doubtful if the oysters could withstand such a low density for any considerable period and they probably do so for a limited time only by tightly closing their shells against the admission of the objectionably fresh water. It was noticed that certain marine animals, notably species of worms, were either dead or dying on the beds of Half Moon island.

There is a small bed of oysters just at the mouth of Turkey bayou, and a considerably larger bed, now almost exhausted, lies about ½ mile offshore, midway between Drum bayou and Grand pass.

Lying south and southwest of South Shell bank and stretching as far as the north of Grand pass there is an extensive oyster bed known as Cabbage reef. It receives its name from the abundance of the seaweed ulva, known to fishermen as "sea cabbage." The growth on this bed is very scattering and it appears to be rarely worked by the oystermen, although formerly it was an important oyster ground. It is stated that the oysters here were nearly exterminated by the conchs and that most of those not so destroyed were covered with mud and sand during the great storm of 1893. Practically continuous with this bed there is a moderately dense growth skirting the north shore of Isle à Pitre and extending more or less into the bayous, as far as the edge of the deep water lying to the westward of Deep-water point. Most of these oysters, both along shore and on Cabbage reef, are of moderate size and in clusters of from 5 to 5. There are but few mussels or barnacles, but there was in February a moderate growth of seaweed, which is said to become more extensive later in the season. Young growth and spat are abundant. East of Deep Water point there are no oysters excepting scattering growth in a salt pond, now closed, but formerly an open lagoon.

Chandeleur sound.—There are now according to the testimony of the fishermen, very few oysters to be found in Chandeleur
248 sound, although there were formerly beds of considerable extent in several localities. No detailed examination of this region was made, although the shores were explored in a few places. There appear to be a very few, if any, oysters on the outer shore between Isle à Pitre and Door point, but there were formerly some more or less extensive beds between Door point and Pelican point, as well as in the neighborhood of Brush island and outside of Deep pass. In Live Oak and California bays, around the shores of Martin, on Holmes and Mitchell islands, there are beds of old shells where there were formerly productive oyster reefs frequented by oyster-

men. The general opinion of oystermen is that these beds have been exterminated by the conchs.

First Annual Report
of the
Oyster Commission of Louisiana
to
His Excellency, the Governor, and the General Assembly of the State of Louisiana.
August 11, 1902, to January 31, 1904.

New Orleans, La.
May, 1904.

* * * * * * *

First Annual Report
of the
Oyster Commission of Louisiana.

To his excellency Newton C. Blanchard, governor, and the General Assembly of the State of Louisiana:

In obedience to the provisions of act 153 of 1902, the Oyster Commission of Louisiana begs to submit this, its first annual report, covering the period from Aug. 11th, 1902, to Jan. 31, 1904, or the first 18 months of its existence.

The members composing this commission, to wit:

Mr. N. H. Nunez, of St. Bernard parish, La.
Capt. Ben Michel, of Plaquemines parish, La.
Mr. F. P. Parra, of Lafourche parish, La.
Mr. James M. Breaux, of Terrebonne parish, La.
Mr. Thomas Shannon, Jr., of St. Mary's parish, La.

having been appointed to their positions by his excellency, Governor W. W. Heard, and having taken their oaths of office, met in the city of New Orleans on Aug. 11, 1902, for the purpose of

2250 effecting an organization, and this they proceeded to do by electing the following officers, to wit:

President: J. M. Breaux, Terrebonne parish, La.
Secretary: J. R. Langridge, Jefferson parish, La.

Chief inspector: Harry Cage, Terrebonne parish, La.
Chief surveyor: Hugh C. Smith, St. Bernard parish, La.
Attorney: John Dymond, Jr., Plaquemines parish, La.
Official journal: The Plaquemines Protector, of Plaquemines parish, La.

For a moment trying to look back over the history of oyster legislation in our State, in order to appreciate the conditions that confronted this new board, we find that the first instance where an effort was made to control our oyster industry was by act 18 of the legislature of 1870, when the State fixed a close season, or determined certain points of time between which oysters could not be fished in the waters of this State.

By act 91 of 1871, this close season was shortened by one month.

It was in 1886, by act 106 of the legislature of that year that the State first undertook to legislate in any manner comprehensively on the subject of her oyster industry.

Owing to a lack of familiarity with our own requirements, but appreciating the necessity that something should be done, that legislature adopted bodily the then oyster law of the State of Maryland. It is but natural to suppose that an oyster law suitable to the requirements of the State of Maryland would not necessarily fulfill all our wants, yet the intention was most excellent. Under this Maryland law, the State was divided in three oyster districts, and the governor was authorized to appoint an oyster commissioner for each district. Boats and vessels were required to take a license before fishing oysters; oysters had to be culled on the natural reefs; a close season was established, and the police juries of the several parishes were authorized to lease bedding grounds, not to exceed three acres, to any one person, at an annual rental of 25 cts. per acre.

The above law continued on the statutes for six years, or until the act 110 was adopted by the legislature in the year 1892. The 2251 salient differences between this and the former law, consisted in the fact that the three oyster districts were abolished, the police jury of each coast parish was vested with exclusive jurisdiction of the waters within each parish, each police jury appointed its own oyster inspector, and boats and vessels desiring to fish oysters, had to get separate licenses for each parish in which they desired to fish. The area of barren bottom which could be leased by any one person, firm or corporation was increased to 10 acres, and the annual rental remained at 25 cts., per acre.

By act 121 of 1896, the law of 1892 was amended to the extent of exempting bedded oysters from taxation.

It was a notorious fact that these oyster laws, existing from 1870 to 1900, were recognized more in their breach than in their observance. This was due to the fact that there was no centralized, effective form of control of the State's industry, and no one, other than the oyster fishermen and those directly engaged in the industry, knew anything about the industry or the necessities for legis-

lation, although every one knew that the existing conditions were not satisfactory.

In 1900, the legislature of that year by act 159, concluding that it was time that the industry should be studied, and that some intelligent information should be gathered concerning the subject, so that adequate legislation might be enacted formed a legislative investigating commission, composed of two senators and three representatives, who studied the industry during the intervening two years and made their report to the General Assembly of 1902, which was amended and resulted in the adoption of act 153 of that year. The salient feature of this act was that the governor of the State was authorized to appoint five persons who should constitute the Oyster Commission of Louisiana, which body by the provisions of the act was vested with the control of the industry, and required to compile statistics, and to make recommendations which would be laid before the Legislative Assembly of 1904. The idea was an experimental one. The results under the former laws were entirely unsatisfactory. The new law generally remained the same as the old law, except that there was appointed this commission to study the in-
2252 dustry, compile statistics and make recommendations.

When your commission met therefore, on Aug. 11, 1902, it was confronted with a most difficult undertaking. It must first instill into the minds of those engaged in the oyster industry the necessity of ob-erving laws, which, as stated, the fishermen had been accustomed to recognize more in their breach than in their observance. They must evolve order out of chaos.

Whatever statistical data existed, consisted solely of the recordation of bedding grounds leases, scattered over the coast parishes of the State in the records of the respective police juries, and it at once became necessary to concentrate this data in systematic shape in the office of this commission. The season for the opening of the oyster industry was closely approaching; namely, on the first of September, for the purpose of fishing oysters for beading purposes; and it therefore became necessary to make herculean efforts in order to be prepared for the work as it came. Your commission established its offices at No. 339 Carondelet St., in the city of New Orleans, at which regular meetings were held on the third Wednesday in each month. It established its office force, equipped its office with furniture, circulated copies of the oyster law, published in the coast parishes the notices required by the law and prepared and circulated the necessary blank forms for systematically conducting its business. All boats and vessels engaged in the oyster business, some fifteen hundred in number, had each to be measured up so that licenses might be issued to them, and ports of entry had to be established where the taxes would be collected.

Your commission divided the ten coast parishes of the State into the following inspection districts, appointed therefor the following deputy inspectors and collectors at the salaries indicated and established the following ports of entry, to-wit:

Inspection district No. 1, to include the parish of Orleans, Joseph Jurish, deputy inspector, at $60.00 per month. Ports of entry at Lugger landing on the Mississippi river and at Old Basin.

Inspection district No. 2, to include the parish of St. Bernard, Alfred C. Ruiz, deputy inspector, at $60.00 per month. V. M.
2253 Guiterez deputy inspector at $40.00 per month. Ports of entry at the factory of Louisiana Oyster Co., Ltd., Rigolets, La., Dunbar, La., and the Ship Island canal locks, on the Mississippi river.

Inspection district No. 3, to include that portion of the parish of Plaquemines, east of the Mississippi river, Joseph A. Yuratich, deputy inspector, at $60.00 per month. Ports of entry at the factory of Neptune Canning Co., Ltd., Ostrica, La., Thomas Brophy, collector at $15.00 per month, Pilot Town, La., B. J. Williams, no salary.

Inspection district No. 4, to include that portion of the parish of Plaquemines, west of the Mississippi river, Gustave Shoenberger, deputy inspector, at $60.00 per month.

Inspection district No. 5, to include the parish of Jefferson, and that portion of the parish of Lafourche, east of Bayou Lafourche, L. Adam Bellanger, deputy inspector, at $60.00 per month. Ports of entry, Westwego, La., W. W. Osborn, collector, at $20.00 per month, Cutoff, La., Elie Ducos, collector, at $15.00 per month.

Inspection district No. 6, to include that portion of the parish of Lafourche, west of Bayou Lafourche and that portion of the parish of Terrebonne as far as the east bank of Bayou Little Caillou, and Last island, Thomas Prevost, deputy inspector, at $60.00 per month. Ports of entry, Houma, La., J. D. Brown, collector, at $50.00 per month.

Inspection district No. 7, to include that portion of the parish of Terrebonne, west of the east bank of Bayou Little Caillou, including Last island, Alidore Guidry, deputy inspector, at $60.00 per month. Port of entry, Houma, La.

Inspection district No. 8, to include the parishes of St. Mary and Iberia, to the west coast of Vermilion bay, James Furlong, deputy inspector, at $60.00 per month. Ports of entry Berwick, La., Alonzo Gilmore, collector, at $50.00 per month. Morgan City, La., Henry Wolf collector, at $50.00 per month.

Inspection district No. 9, to include the parish of Vermilion, E. W. Gaspard, deputy inspector, at $5.00 per month. Port of entry, Abbeville, La.

Inspection district No. 10, to include the parish of Cameron. Port of entry, Cameron, La.

2254 During the course of its two years' existence the employees of the commission necessarily changed from time to time. On Jan. 21, 1903, Mr. John R. Langridge, our secretary resigned to accept the position of clerk of the court of the parish of Jefferson. The commission regretted very much to lose the valuable services of Mr. Langridge. His position was at once filled by the election of Mr. Andrew G. Gugel, also of the parish of Jefferson. We give

herewith a roster of the officials and employees of the commission as follows:

Commissioners.

($10 per Diem.)

Jas. M. Breaux.
N. H. Nunez.
Ben. Michel.
Frank P. Parra.
Thomas Shannon, Jr.

Officers and Employees.

A. G. Gugel, secretary, $100.00 per month.
Wm. M. Jungblut, assistant secretary, $75.00 per month.
John Dymond, Jr., attorney, $100.00 per month.
H. C. Smith, chief surveyor, $150.00 per month.
Harry Cage, chief inspector, $83.33 per month.
C. M. Bourg, secretary to president, $60.00 per month.
Mrs. R. Cure, clerk to fin. com., $20.00 per month.
Joseph Jurisich, deputy inspector, $60.00 per month.
A. C. Ruiz, deputy inspector, $60.00 per month.
Joseph A. Yuratich, deputy inspector, $60.00 per month.
Gus Schoenberger, deputy inspector, $60.00 per month.
B. J. Williams, deputy inspector, no salary.
L. A. Bellanger, deputy inspector, $60.00 per month.
A. E. Guidry, deputy inspector, $60.00 per month.
C. A. Johnson, deputy inspector, $60.00 per month.
Elie Ducos, deputy inspector and collector, $15.00 per month.
J. D. Brown, deputy inspector and collector, $50.00 per month.
E. M. Farray, deputy inspector and collector, $5.00 per month.
2235 Wm. Dillard, engineer of launch Nita, $50.00 per month.
Two sailors, on schooner Majestic, at $30.00 each per month.

Certain of these employees whose services are not required during the closed season, such as deputy collectors, are laid off. During the first season the commission was compelled to reduce the salaries of all of its employees.

The oyster commission was absolutely without funds to carry on its work, and was compelled to collect its revenues in order to pay its employees. These revenues consisted of a license tax of 50 cts. per ton on vessels engaged in the oyster industry, a license of $2.00 for each tongman engaged in fishing oysters, a license of $100.00 on each canning factory, and $25.00 on each oyster shucking establishment and those who bought, shipped and resold oysters. The law levied a privilege tax of 2 cts. per barrel on each barrel of oysters fished for consumption, and stipulated a rental of $1.00 per acre for each acre of bedding ground leased. The deputy inspectors were instructed to see that the vessels and tongmen, as well as can-

nate and shuckers secured their licenses. Each one of the 1500 boats and vessels engaged in the oyster industry had to be individually inspected and measured in order to determine the tonnage upon which the respective vessel licenses would be paid. Each vessel was given a number, and it was the duty of the inspectors to see that these vessels displayed their numbers on their sails and hulls, as required by the law. Where a considerable amount of trading in oysters was done, it became necessary to establish ports of entry, and to appoint deputy collectors, in order to provide for the collection of 2 ct. tax levied on the oysters marketed.

Where the oysters were carried by regularly established lines of common carriers, the commission endeavored to arrange for the collection of the tax on the bill-lading, and succeeded in doing this with the New Orleans, Fort, Jackson & Grand Isle Railroad Co., and the Lower Coast Packet Company, in the parish of Plaquemines, both of these companies settling direct with the sheriff of the parish of Plaquemines. Where the commission has been able to arrange with the factories to submit sworn returns of oysters handled, 2256 and thus save the expense of collectors it has done so.

In addition to the above force of inspectors and collectors established by the commission, it was necessary that the commission should establish and maintain a separate patrol system in the waters of the Mississippi sound in order that the provisions of the Louisiana law prohibiting non-residents from fishing oysters in our waters might be enforced. The boundary dispute on hand with the State of Mississippi rendered the policing of this territory additionally expensive and difficult.

Being without funds at the initiation of this work, and having not only to provide for the payment of its several employees, the establishment of a systematic control of the oyster industry, but also to acquire the necessary patrol boats and vessels to make such control effective, it became necessary for the commission to borrow the money needed for its immediate requirements, and a contract to this end was made with the Louisiana national bank, which lent the commission the necessary funds, and which were repaid by the revenues of the commission as they were subsequently collected. Every existing oyster bedding ground lease had to be registered with the commission and a plan of survey furnished, so that the foundation could be laid for an oyster map of the State of Louisiana.

The official statement of the secretary approved by the finance committee will show the financial operations of the commission and the condition of the finances of the commission at the end of the period covered by this report.

This is the first instance where there has ever been any statistical data compiled in regard to the extent of the oyster industry of Louisiana. In making provisions for the expense incident to this and in calculating upon its possible revenues, the commission was compelled to guess at what its revenues would be and keep down its expenses as much as possible, as there were no statistics whatever

that it could turn to in order to get any more definite data. This of itself, was quite embarrassing, and although the commission got the best data it could from the sources available, the oyster crop which the legislative investigating commission estimated to be 700,000 barrels was found at the end of the year to be about 225,000 barrels less than had been estimated. Making its budget on a basis of the original estimate, the commission was, therefore, embarrassed by the failure of its revenues to meet expenditures, and having been compelled to go to an expense of about $4,000.00 in purchasing its two patrol boats; namely, the schooner "Majestic" and the launch "Nita" the greatest economy had to be practiced immediately after finding that the revenues would not come up to the expectations, and as a matter of fact, an insufficient patrol system had to be subsequently maintained, because there were not the necessary funds to carry on and maintain the patrol system as it should be conducted, and the salaries of all employees were reduced.

The oyster season in Louisiana extends from Oct. 1 to Sept. 30, and it is the intention of the commission that hereafter its reports should be made according to this period of time. The commission is pleased, however, to be able to report that while it has had a hard struggle to make both ends meet, it has, as a result of its efforts, notwithstanding the restrictions of the present law, met all of its obligations, come out more than even on expenses, and still has on hand its patrol boats, office furniture, and that character of permanent investment, representing an available capital of about ($5,000.00) five thousand dollars, including the cash on hand. During the first season, extending from September 1, 1902, to August 31, 1903, the commission issued licenses to 1574 boats and vessels, 1953 tongmen, 27 dealers, 3 canners. The quantity of oysters marketed during that period equaled four hundred and seventy-two thousand one hundred and ninety-one (472,191) barrels, or one million six hundred and seventeen thousand and forty-four (1,617,044) bushels valued at over seven hundred thousand dollars ($700,000.00). From August 11, 1902, to January 31, 1904 the total revenues of the commission were $36,816.15, and its disbursements during the same period of seventeen and one-half months were $36,148.96, which included the cost of a permanent investment of about four thousand dollars ($4,000.00) now on hand in the shape of patrol boats and other equipment. In 18 years under the old laws there had been made 512 oyster bedding grounds leases aggregating 2820.52 acres, or an average of 7.6 acres per lease. In the 18 months of the 258 commission's existence 238 leases, aggregating 2677.10 acres were made. In other words, the commission has leased in 18 months nearly as many acres as was leased in the previous 18 years.

As previously stated, the commission caused all existing bedding ground leases to be registered in its office. A limit of time was fixed within which tenants should so register their leases, and as a

of this registration it developed that from 1886 to 1902, there
en as stated 512 continuous leases of oyster bedding ground
covering a total area of 2820.52 acres, or an average of 7.6
er lease. The commission found that the State owns between
d six million acres of water bottom more or less suitable for
cultivation. Of these, less than 50,000 acres are covered by
here oysters grow naturally. About 2800 acres were under
nd the balance of over five and one half million acres were
dle. The leases made by the police juries and registered
e commission are shown in detail in the secretary's report.
ds whatsoever were under lease in the parishes of Orleans,
y, Iberia, Vermilion or Cameron. The commission has done
to increase the area of bedding grounds rented for the pur-
oyster cultivation, as it recognized that each acre rented
an increase of the State's revenue of at least $3.00 per annum,
owing to the restrictions of the present oyster law, it has
ed in leasing since Aug. 11, 1902, less than 3,000 acres, al-
it is reliably informed, and has every reason to believe that
ense quantity of this idle barren lands could be leased and
into cultivation, if legislation were had which would tend
rage the investment of capital in this industry and protect it
ce invested.

ommission finds that the oyster industry as it is carried on
onsists almost exclusively in an absolute dependence on the
of the natural oyster reefs for our oyster supply. The expe-
other States, as found in the studies made by the commis-
icate this to be a most unwise policy. We know of no in-
ustry where dependence is had entirely upon the natural
ild product. We know that one acre of water bottom under
ltivation will, at the very minimum, produce 100 barrels
s per annum, and we know further that the last annual
op was less than half a million barrels. From this it con-
follows that the total oyster crop of Louisiana for the past
uld have been produced on a 5000 acre oyster farm properly
d. The oyster commission is alive to the immense possi-
oyster production possessed by Louisiana. We know that
ill grow in our warm southern waters about three times as
s they will grow on the Atlantic coast.

ing these natural advantages, the only thing that stands
ur oyster industry and development, the commission finds
illogical restrictions, which for twenty years past have been
in our successive oyster laws. These restrictions have
ough an ignorance of the true facts, and now that we know
se these provisions are, they should immediately be re-
m the statutes. Your commission, during the past two
ts existence, has necessarily been compelled to take the
as it is, no matter how imperfect it has found it to be.
he chief aims of the commission has been its desire to aid
way it could those engaged in the oyster industry, and

wherever complaints or suggestions have been made they have had our earnest consideration.

Learning that vessels entering the Mississippi river en route from Texas were accustomed to pump out their bilges and discharge fuel oil in the river, which, during periods of high water, was carried over the banks of the river into the oyster fields on each side, the co-operation of the Secretary of War of the United States was sought, and a stop was put to this injurious practice.

The assistance of the United States Coast and Geodetic Survey was secured in the matter of establishing township and range points on our coast in order that our oyster bedding grounds, as surveyed, might be connected up with these well established points. This service has been of great value to the commission.

2260 As an excess of fresh water is fatal to oyster life, we sent our attorney, Mr. John Dymond, Jr., to St. Louis, to appear before the Mississippi River Commission in June, 1903, in order that the value of the oyster interests protected by our levee system might be laid before that body and fully explained. The result of Mr. Dymond's visit was an increased allotment of twenty thousand dollars ($20,000.00) in two years for the levees below the city of New Orleans, which will prove of incalculable benefit to the oyster growers of that section, where, by the high water of 1903, over one million dollars ($1,000,000.00) worth of oysters were killed in a period of ten days.

Your commission appreciates the importance of the litigation now pending in the Supreme Court of the United States between the States of Louisiana and Mississippi as to our State's boundary in the waters of the parish of St. Bernard. The area in dispute has a value of between five million and ten million dollars. We have been offered the sum of two hundred thousand dollars ($200,000.00) per annum rental for the exclusive use of the oyster waters there. The area undoubtedly belongs to Louisiana and we have been rendering all the assistance we can to the State's attorneys to win the case.

In connection with the matter of boundaries and in obedience to the provisions of the oyster law, the commission had devised and adopted a set of rules for the purpose of settling boundary disputes between the lessees of oyster bedding grounds in the State.

We cheerfully endorse the recommendation presented by Mr. John Dymond, Jr., which forms a part of this report. Any implement or labor-saving device should be permitted on a man's own oyster farm. In water too deep and too exposed to be fished by hand-tongs, other means should be permitted to make these oysters available to man. There need be no fear of the law being violated. This commission will take care of and prevent that. That is its business.

It has been the common understanding of students of the oyster industry that in the deep and exposed waters of our State there existed many undiscovered acres of natural oyster reefs, more particularly in the gulf of Mexico. In some instances parties are known

to have trailed a rope over the stern of their boats to which a
61 piece of iron chain would be attached, and as the boat sailed
along the chain would show that the boat was passing over
ster shells. It is known also, more especially on the east bank of
e Mississippi river, when a crevasse occurs and the oysters are
lled by an excess of fresh water, the shells of the dead oysters are
on covered by a new set of young oyster spat. So much is this
e case that it is the common belief among the oyster fishermen
at these young oysters are reproduced or brought into being by the
esh water, and they laugh at the idea that oysters lay eggs and are
different sexes, contending that the fresh water is a spontaneous
ency of oyster life. As a matter of fact, the true explanation of
is physiological phenomena is found in the existence of oysters in
e deep water where the excess of fresh water does not reach. The
ore favorable surroundings produced by the fresh water on these
ep water reefs stimulate the reproductive or genital organs of
ese oysters and the increased quantity of oyster spat thrown off
ttles on the shells of the dead oysters and the reefs are replenished
d reëstablished.

These oysters are in water too deep and exposed to be fished by
e only means of fishing allowed under the present law, namely
and tongs. The commission, however, was authorized by the
ster law to procure and experiment with the more modern and im-
roved implements necessary for deep water fishing and purchased
scraper, or what is commonly but erroneously, called a dredge. A
icture of the implement will be found in Mr. Dymond's article,
ade a part of this report. This scraper was placed aboard the
atrol schooner Majestic, which was sent to the west Gulf coast, off
e parishes of Iberia and Vermillion, and a committee from the
ommission, composed of Messrs. James M. Breaux, N. H. Nunez,
nd the chief inspector, carried on the investigation during the
nonth of April. These gentlemen report that new o-ster reefs,
ever before known, were found to exist, that thousands of acres of
atural reefs extend along the coast, and that these oysters are at
resent perfectly useless and doing no one any good, because under
e present law they can not be fished with the only legal imple-
ment we have, viz., hand tongs. It is the opinion of the com-
262 mission that these oyster reefs should be opened to commerce,
that it is a great source of wealth for our people that at present
es idle, and it recommends that the use of modern oyster
rapers should be permitted, so that these oysters in deep and ex-
osed waters could be fished and made available under proper con-
ol of the commission.

Another of the illogical restrictions of our present oyster law is
e limitation to twenty acres as being the maximum amount of
arren water bottom that any one person, firm or corporation may
ase for the purpose of cultivation. In any other locality, and in
ny other industry, the residents of the locality and the citizens of
e State would hail with gratification and delight the development

or bringing into cultivation a large tract of unreclaimed and barren lands.

We have more territory available for oyster production than is now used in the whole State in any one agricultural crop, either cotton, sugar cane or rice, and yet we have less than 6,000 acres, less than one-tenth of one per cent. of the total area, under lease. Twenty years of experience has proven conclusively that, on the basis of maximum units of three, ten or twenty acre oyster farms, no development will result, and it would appear to the commission from the studies it has made as to this limitation, that it has been repeated in the previous oyster laws for the purpose of preventing any oyster development, with the result that the State is deprived of her just revenues from her large holdings of barren oyster bottom. It is true that the excuse has been given that such legislation was enacted for the purpose of preventing the formation of an oyster trust. Experience shows that trusts never control the raw product, and consequently we have no cotton trust producing cotton. We have no sugar trust producing sugar. We have no rice trust producing rice. Where a trust is formed, when it is formed, it is for the purpose of handling the crop produced by some one else, and no restriction on acreage will have any effect upon the handling of the product, except as it may absolutely prevent the raw material from coming into existence and being.

The practical result of this, therefore, is that the fear of
2263 *of* an oyster trust has heretofore paralyzed any possible development of the oyster industry. The fear is unquestionably and absolutely unfounded. If we should judge by the experience of the other States where no limitation is placed upon the acreage that may be leased, we find that in the State of Connecticut, for instance, the oyster farmer, with three acres successfully does business along with the oyster farming company controlling over 10,000 acres, and in no State where extensive areas are subject to leases, has the complaint arisen that an oyster trust has been formed. Let us for a moment look at the opposite side of the picture, and see whether those who cry "Trust" are justified in their cry, or whether it is not due to some other cause that they make these pretensions. Carried on as this industry is today, the oyster fisherman gathers his crop from the natural reefs for which he pays nothing, other than the small tax exacted by the State, and the expense of going to the reef and gathering his product. He does not fear a trust, but he fears that if there be any considerable development in the oyster industry he may lose by increased competition the oyster market which he has all along regarded as his own. The commission feels that the operation of the law, as it stands today, practically stifles and prevents any development of the industry, or any increased competition which would naturally come as a result of that development and be of benefit to all.

We have as a result of our studies of the industry, positive knowledge that people desiring to raise oysters on an intelligent basis and

nodern means and appliances are prevented from doing so, ne State is losing the revenue it should justly receive. This is sult of the unfounded fear and prejudice that has previously d, and the commission feels that it is its duty to lay the facts the legislature, so that these restrictions may be removed.

ts control of the oyster industry, and its patrol of the Gulf vaters, the commission has found itself seriously embarrassed want of sufficient and suitable patrol boats. Its deputy in- rs were required to furnish their own boats, where they could, as the funds of the commission did not permit it to purchase more than its schooner and gasoline launch. The boats fur- nished by the deputy inspectors were not well suited to the because they are required to move quickly to overtake a vio- of the oyster law and in their tours of inspection they are re- l to travel long distances. What is needed is a number of nation sail and gasoline boats, suitable sail boats, with ary gasoline engines, and these boats should be the property commission.

atrol boat will be required constantly on the boundary line en the States of Louisiana and Mississippi and our patrol ner is now used for this purpose. The commission should have er large-size gasoline boat with auxiliary sails, for the use of ef inspector, and this vessel should be of a size and character would permit her to navigate the open waters of the Gulf. additions to our oyster fleet are absolutely necessary, yet the ission has not the funds to procure them.

re is, however, in the State treasury, lying idle, the sum of .71, collected by the State under the former oyster laws, and um could be used for the purpose of acquiring the necessary s. The commission, therefore, urgently recommends that and sts the legislature to appropriate this fund to be disbursed by mmission, for the purchase of additional patrol boats, the dis- ment to be with the advice and approval of the governor of ate.

reproduce the report made to us by our chief inspector, con- g recommendations, the report of Mr. J. B. Baylor of Virginia, ne study of the oyster industry as prepared by our attorney, ning recommendations, all of which, with the result of our we have embodied in an oyster bill, which we respectfully t for consideration by the legislature, and earnestly urge its ge, feeling that we will, with intelligent and conservative legis- be soon depositing in the State treasury funds in quantities dreamed of.

Respectfully submitted,

2265 Report of Chief Inspector.

To the honorable Oyster Commission of Louisiana.

GENTLEMEN: In accordance with your instructions, I have the honor to submit my report as your chief inspector from the time of my appointment August 1902 to date, together with such recommendations as my experience suggests.

The earliest white settlers in Louisiana found oysters growing naturally on natural reefs, and from the first settlement these were gathered by those persons living in the vicinity of the reefs, and used for local consumption.

Gradually these persons, in answer to the demands of the people who lived too far from the reefs to personally fish the oysters, began to bring up the bayous and rivers in their boats these oysters, and to sell them, in small quantities, to the people living along the banks of these streams for immediate use.

As the city of New Orleans increased in size, population and wealth, it became the principal market for this trade and absorbed, by far, the greater portion of the oysters gathered and fished in the State.

The methods of fishing and culling were of the most crude and wasteful character, and as the demands grew larger, and more and more people engaged in the business, of filling the demand, it was soon found that the reefs to which the fishermen resorted, were one by one being exterminated and that the fishermen had to go further and work harder, and consume more time in gathering the same quantity of oysters.

This created dissatisfaction and engendered discussion. It was the consensus of opinion that the whole trouble was caused by the fishing and taking of oysters during the spawning season and that if this could be forbidden and prevented, that all the reefs would be restored to their pristine productiveness.

2266 Accordingly, for the first time in the history of the State the legislature was appealed to and in 1870 it passed act No. 18 of 1870, which made a closed season from April 1st to September 15th, and provided penalties for the taking or fishing oysters during this time.

In 1871 by act No. 91 of that year, this closed season was made from May 1st to September 15th.

So far as I am informed these acts were "more honored in the breach than in the observance," and both became practically "dead letters," and the depletion and destruction of the reefs went on rapidly.

The fishermen who resided in the parish of Plaquemines were those who supplied the demand for the New Orleans market. About this time, also, it was found that the oysters could be opened or "shucked" and being placed in wooden buckets with lumps of ice, renewed from time to time in transit, could be shipped by express

interior points and sold at a large profit, and this business was arried on in that city, the oysters therefor being supplied by the Plaquemines fishermen.

These two demands under the destructive system of fishing, soon xterminated the supply of oysters in that parish, and its fishermen ound that they could go into the parishes of Jefferson, Lafourche nd Terrebonne and gather the oysters from little used reefs, deposit hem on beds in Plaquemines convenient to the market, where they ould grow and thrive and in due time take them up and supply he New Orleans market demand for local consumption and for hipment to the interior.

The natural reefs of Jefferson parish, were, under this system, oon depleted and destroyed. The Plaquemines men then went urther west to the reefs of Lafourche and Terrebonne and the oyster nen of these two parishes soon found that the reefs which had eretofore abundantly supplied their needs for their limited local lemands were being depleted and destroyed.

An outcry arose. The fishermen in each parish regarded the ysters in each particular parish as the exclusive property of the nhabitants of that parish and they looked on the fishermen of other parishes, and particularly those from Plaquemines who 2067 were supplying the New Orleans market as strangers, invaders and robbers.

So in 1886, the legislature was again applied to for relief and act No. 106 of that year was passed.

Its salient provisions were to recognize the practice of gathering ysters from the natural reefs and bedding them for future use, to rovide that not more than *three* (3) *acres* could be taken by any one erson, firm or corporation for this purpose; to provide that no one ould fish oysters in any parish without having first obtained a liense from the police jury of that parish for the privilege; imposing icenses and taxes therefor on the boat and tongsmen, providing that ne-half of the net amount arising from these rents, licenses, and axes should be equally divided between the respective parishes and he State, and placing the oyster industry of each parish within the bsolute control of the police jury of each parish.

This law accomplished little, and in 1892 was superseded by act No. 110 of that year, which made little change beyond increasing he amount of bedding ground which could be leased by any one erson, firm or corporation from three (3) to ten (10) acres.

In 1896 this act was superseded by act No. 121 of that year, and he only material change which I can find in this latter act was to elieve from taxation the oysters bedded on the leased bottoms.

All these laws were loosely administered, their provisions were isregarded, and the laws themselves fell into contempt.

In the meantime, the population of the State increased; an era f prosperity ensued, and the people became better-to-do, more prosperous and more wealthy. The local demands for oysters for local consumption became larger, the interior demands for "shucked oys-

ters" packed in ice tremendously increased, and individuals firms and corporations to carry on this business not only multiplied in New Orleans, but sprang up in Houma and Morgan City, and canneries were established on the Mississippi shore, in New Orleans, Plaquemines parish and elsewhere.

The demand for oysters from these various sources could not be filled; the cry arose that the natural reefs were being destroyed and that further legislation must be had to cure the evil.

2268 The matter was discussed in the legislature during the sessions of 1900. The consensus of opinion was that the previous legislation was hopelessly faulty, but that no one had given that study to the subject which would enable the General Assembly to intelligently take up the matter and formulate the necessary laws.

The sense of the legislature was expressed in house concurrent resolution No. 31, which appears in the records as act No. 159 of 1900, and reads as follows:

"Be it resolved by the house of representatives, the senate concurring, That an oyster commission be formed to be composed of three (3) members of the house of representatives and two (2) members of the senate, to be appointed by the respective presiding officers thereof, who shall examine into the oyster industry of this State, and formulate a bill for its improvement and present the same to the next session of the General Assembly of the State of Louisiana."

There were appointed on this body Senators Dymond and Cage, and Representatives Leopold, Jacobs and Bonvillain.

These gentlemen visited the various oyster parishes, and oyster waters of the State, sought and obtained the views of numerous persons interested in this industry and investigated and searched the statistics, reports and literature throwing light on the subject matter.

They were of unanimous opinion that the existing laws were radically wrong, and inefficient, and that the natural reefs were being rapidly depleted and destroyed. They also agreed that the control should be taken from the respective police juries and confided to a State commission and that some legislation should be enacted which would increase the amount of oysters produced in the State. But as to the measures necessary to produce this effect the members widely differed and their differences are set forth in the majority and minority reports of the General Assembly. These differences were radical. The minority held that the proper protection of the natural reefs was a practical impossibility and that the only way in which the oyster output of the State could be increased, and a revenue provided for the State was to allow the barren grounds to be rented in large quantities to those who had the inclina-

2269 tion and capital to take and work them.

The majority took the view that if these barren bottoms were leased in large quantities, the supply of oysters would be so greatly augmented, and the quality so improved that these cultivated oysters would supply the whole demand, and that those persons who fish

ers on the natural reefs could not compete and would be driven
of the business. They thought that the enormous revenues which
ld, under this system accrue to the State, would not warrant or
ify the injury which they thought would be caused to the natural-
fishermen.
he view of the majority prevailed, and the law enacted, act No.
of 1902, limited the area which could be leased by any one indi-
ual, firm or corporation to twenty acres.
he act of 1902 being the only law that was enforced might be
idered the first oyster law of the State.
hile this law is not all we need to encourage and develop the
stry, its effects have been far reaching in that it has called the
ntion of our people to the possibilities of the industry and has
acted the attention of outsiders as evidenced by inquiries to our
e for information from parties from Chicago, Maryland, and
from the State of Washington.
is unreasonable to expect any development in the oyster indus-
while the State refuses to lease to any one person, firm or cor-
ation more than twenty (20) acres of water bottom. To lease so
ll a tract of land is attractive only to the fisherman who owns
boat and fishes his own oysters. The leases now existing show
the fisherman does not care to avail himself of even this limit.
that his traditions or his habits teach him is to have a small
of bedding ground where he can plant the oyster he takes from
natural reefs. Three or four acres would be ample for this pur-
, so the present law does not meet the requirements of any class.
ompels the fisherman to take ten acres, which is more than the
rage of them want, and refuses to lease in sufficiently large quan-
s to be an inducement to capital to invest.
here is a reluctance on the part of the fishermen to see the oyster
oms of the State leased in large tracts, as they fear a trust might
be formed and that lands would be taken in such quantities
by big concerns as to shut out the small men, but as long as
the State holds the ownership of her lands and leases them,
is impossible. Again: We know that trusts never strive to pro-
e the raw material, but satisfy themselves with controlling and
ng it; so if we are ever to have an oyster trust we will not see
wning and working the lands but controlling the product, and if
is to come it will come whether Louisiana leases her lands in
e or small tracts, or whether she leases them at all.
ur State is rich in her soils but her agriculture was not de-
ped by her plowmen, nor were her sugar-houses, rice mills and
on gins erected by the day laborer. She is rich in her forests,
it was not the axman who developed her lumber industry. She
ch also in her oyster lands but it is not to the fisherman that
must look to develop her oyster industry.
e must enact laws that will enable every man so inclined to
st according to his means, his money, his energy and his abili-
The fishermen will soon learn that the big operator does not

interfere with him any more than the big sugar and cotton planter does with his less fortunate neighbor who works his little farm.

No man without a boat or the means of buying one, and about $2,000.00 capital could ever be the lessee of oyster lands. Grant that every one of these fishermen who own boats could be induced to lease twenty acres of land it would amount to thirty thousand acres. According to Dr. Stubbs the State owns 6,000,000 acres of coast waters running out into the Gulf to a depth of 20 feet, this would leave 5,970,000 acres on the State's hands. My duties have taken me all over the coast where oysters are fished and I have become as familiar with conditions there as it is possible in a two years' experience over so vast a territory, though I do not profess to know it all.

In the discharge of my duties I am brought in close contact with our fishermen, and I find them as a class to be law-abiding, generous, hospitable and hard workers while they are at it.

Most of them favor just laws to regulate the fishing and protection of the reefs. The feature of our present law most objectionable to the fishermen is the tongsman's license. He regards this as
2271 as a tax on his labor and it is hard to reason with him or persuade him to the contrary.

Our coast parishes are St. Bernard, Orleans, Plaquemines, Jefferson, Lafourche, Terrebonne, St. Mary, Iberia, Vermilion, and Cameron.

The principal oyster reefs of the State are in the parishes of St. Bernard, Plaquemines, Lafourche and Terrebonne.

Formerly some of the best reefs in the State were in Jefferson parish, but from some cause these reefs have become unproductive. Some claim that the waters of Grand lake, where these reefs principally are, have become too dense or salty to produce oysters. Others claim that the reefs were so completely cleaned of oysters by the fishermen that there were none left to produce spawn. Of these two theories I am not prepared to judge, but it is a fact that these once magnificent reefs show no disposition to become productive again.

West of the Atchafalaya river there is no oyster fishing except around Southwest pass and Marsh island in the parish of Iberia. From the fact that that coast is well watered by rivers and bayous bringing down fresh water and creating the conditions which produce oyster life I am led to believe that there are good reefs along that coast which are unknown to our fishermen. I regret that I have been able to devote so little time to investigations there, but circumstances have prevented.

It may be well to state right here that my principal drawback in the discharge of my duties has been the want of a suitable boat.

The only boats owned by the commission are the Majestic, a fine schooner, and the Nita, a small gasoline launch used as a tender to the schooner. These boats have more than they can do thoroughly to patrol the vast territory of the parish of St. Bernard and could not be taken from there to be used in general tours of inspection and

investigation. The other oyster districts are patrolled by deputy inspectors who are required to furnish their own boats. I could not use these for my purposes without leaving those districts unguarded.

It is absolutely necessary, in my opinion, that the commis-
2272 sion furnish their chief inspector with a suitable boat, and if the revenue of the commission will not permit of this then the legislature should be asked to assist you by an appropriation of the $8,958.71 now to the credit of the "oyster fund" in the State treasury.

I have watched the process of dredging oysters in what is called the "neutral grounds" with keen interest, and I am induced to the conclusion that there is very little in the cry that dredges destroy the reefs. *Excessive* dredging and improper culling will destroy a reef, but this can be accomplished with hand tongs, and while I do now know it of my own knowledge, it is claimed that reefs in this State have been destroyed by tongs.

When the question of whether or not the dredging of oysters should be permitted in this State came up, I had never seen an oyster dredge, but I had seen dredge boats. I saw them dredging canals and unloading coal barges, and thinking that an oyster dredge was built on the same order my horror of them was so great I thought the fisherman would be justified in taking his gun and driving them out of the State. But as you gentlemen know, the oyster dredge so called, is not a dredge at all. It is misnamed. It is *a drag*. If you take a common garden rake, attach a wire net behind it to catch the trash and then hold the handle perpendicular and in this position move it along the ground you have a very good representation of the working of an oyster dredge. Some contend that the dredge passes over the oysters and forces them into the mud where they die. But the dredge or drag is intended to pass *under* the oysters and gather them up and it *does* the work it is intended to do. Compare the process of dredging as done by the Mississippi fishermen and the tonging as done by our fishermen and let us see which is the most destructive process.

When dredging the boat is under sail and in motion. As the oysters are dumped on deck there is a force at work culling the oysters, depositing the good ones aboard and throwing back the shells and small oysters. This of necessity scatters the culls over practically the same area from which they were taken with
2273 the exception that when the boat passes beyond the reef some culls are thrown beyond and consequently the tendency is to constantly extend the area of the reef.

When fishing with tongs the fisherman casts his anchor and ties his boat up short. He then fishes such oysters as are within the length of his boat, when he lets out his cable until another length of his boat has been gained, and so on until he has fished his decks full. He then proceeds to cull and all the oysters he has gathered in one or more lengths of his cable he culls without moving his boat an inch. These culls go overboard in two piles on each side

of his boat and he has smothered more young oysters one with the other than a dredge would have buried in fishing ten times the amount.

It is useless to say that the inspectors should put a stop to such practices. The inspector can only be on one reef at a time and has under his eye the boats fishing on that reef. While he may force them to cull properly for the time being, hundreds of other boats are doing as they please in other parts of his district. Nor can the commission ever assign an inspector to each reef for then the expense of maintaining such a police force would be enormous and our oyster industry would become a burden instead of a profit to the State.

Human nature is such that men take but little interest in what does not belong to them and our fishermen are not different from others when they fail to spend their present time and cut off their present profit, that a natural reef may be in better condition in the future and perhaps for the benefit of some one other than themselves. Every one reasons, "The other fellow is not doing it, and why should I?"

We are therefore forced to the conclusion that the State can never successfully protect her natural reefs and build up an industry thereon. Strict laws and good officers may retard the process of depletion but they cannot prevent it.

In conclusion, and with your permission, I would make the following recommendations:

1st. That you recommend to the legislature a law that
2274 would prohibit dredging on the natural reefs in shallow and unexposed waters, because the present day fisherman wants it so and under liberal leasing of lands he will soon be the principal patron of the natural reefs.

2nd. That lands be leased with some limit named, but with such a liberal limit as to let in any-size firms or corporations as might desire to invest, and at the same time throwing such safeguards around the leases as to make capital secure. Allow any and all appliances and implements to be used in private planting grounds in the cultivation and fishing of oysters, as you can safely trust the lessee not to do anything that would injure what is his own. And further because he must be allowed this privilege if he is to compete successfully with his rivals in the open markets. He must be allowed to use his own judgment and to control his oyster farm as absolutely as if he were renting land from the State on which to plant cotton or cane.

3rd. Add the month of September to our open season because Texas on one side of us and Mississippi on the other both open their seasons before we do and our dealers claim they are thereby placed at a disadvantage.

4th. Abolish the tongman's license and increase the tax on oysters from 2 cents to 3 cents, because, first, we have a great many men who work in the fields during sugar grinding or at other jobs and

h oysters the latter part of the season. It is unequal to charge
em all alike while the tax falls in proportion to the length of time
man fishes; second, captains are often hampered in making up
eir crews because otherwise available men have no licenses; third,
large number of green boys are deterred from taking to the cull-
g because the small wages they earn at first do not justify them
taking out licenses, and thus the making of a good fisherman is
st; fourth, the license is hard to collect while the tax on the oysters
hich will produce the same result is easy to collect; and finally,
ermit me to say that in my opinion *that* a liberal leasing law, with
beral dredging laws, permitting dredging on the natural reefs in
water over fourteen feet in depth or in exposed waters and in
75 dredging in any depth on leased bottoms, would soon result
in an oyster industry in this State greater than that in any
tate in the Union, indeed greater than any other in the world. I
lly believe that under such laws, millions would be invested in
e industry in this State, and I am satisfied that the revenue that
ould accrue to the State would be measured in hundreds of dollars
nd, eventually, in millions.

Respectfully submitted.

HARRY CAGE,
Chief Inspector.

* * * * * * *

2076 The honorable Oyster Commission of Louisiana:

By formal resolution, your commission has requested me to pre-
pare a written report, and in this connection to recommend such
changes in the present oyster law of Louisiana as would seem to me
to encourage the development of the oyster industry of your State.

Your present oyster laws creating the Oyster Commission of Louisi-
ana in many respects are admirable. As your laws stand today you
are in advance of many of the oyster States.

About twelve years ago, the writer made a complete survey of the
natural oyster reefs of the State of Virginia. This survey for the
first time clearly defined the natural oyster reefs, and an oyster
planter's title to his oyster beds in that State cannot now be ques-
tioned.

In connection with this survey, the oyster question became promi-
nently before the people of Virginia.

With other speakers and writers, the writer, as a citizen of Vir-
ginia, took an active part in encouraging oyster culture in Vir-
ginia.

It will be instructive to note what has been the effect of this
agitation on the oyster industry of Virginia. In 1891, Virginia
realized $2,524,348.00 from the sale of 6,074,025 bushels of oysters.
An insignificant sum was obtained from planted oysters in Virginia
at that time. This product came from the natural oyster reefs. In
1901, Virginia realized $2,923,357.00 from the sale of 7,885,357

bushels. Of this product 3,076,525 bushels were obtained from private planted oyster beds.

In 1891 Maryland was far in advance of Virginia and of every State, in the production and sale of oysters. She can no longer claim this honor, as to production, having produced only 5,085,561 bushels of oysters in 1900, valued at $3,031,518.00. Of this amount $2,732,274 was realized from natural reef oysters, and only $299,244 from planted oysters. (Report United States Commissioner of Fish and Fisheries, 1903, pages 495 and 518.)

2277 The State of Virginia, after supporting an expensive oyster navy of three steamers and two sailing vessels, now receives a net annual revenue of fifty thousand dollars from her oystering territory, where she formerly had an annual deficiency.

Yearly the area of native oyster grounds grows less in Maryland and Virginia, as the result of this over-working of the reefs. The splendid increase in the production of oysters in Virginia, as compared with the production in Maryland, is the direct result of the agitation of the oyster question in Virginia, and the encouragement of oyster culture in that State.

What has been accomplished in oyster culture in Virginia is strikingly exemplified in Elizabeth City county, one of the smallest oyster counties in Virginia.

Before oyster culture was started in this county, only a few hundred bushels of oysters were sold annually, where there — now sold annually 350,000 bushels of oysters.

Messrs. Darling & Son, oyster planters of Hampton, Elizabeth City county Virginia, now give profitable employment to large numbers of people in working the profit of what was at one time a *barren* oyster area.

Louisiana has a coast line following the indentations of the bays and of over 1200 miles. According to figures carefully compiled by so eminent an authority as Dr. Wm. C. Stubbs, your State has *seven* thousand square miles of tidal bottoms, over *four millions* of acres, not covered by more than twenty or twenty-five feet of water. This is far in excess of the area of the oyster bottoms claimed by either Virginia or Maryland.

It is a striking fact that most of the tidal bottoms of the whole coast of Louisiana, including the bays, sounds, inlets and bayous, is composed of a fine, light black sediment, known to the naturalist as *oyster mud*.

Your tidal bottoms afford opportunities for the cultivation 2278 of the oyster almost unparallelled in other countries.

You have not the destructive shifting sands, far too common in the bottoms of Chesapeake bay and its tributaries.

Unquestionably a very large percentage of your soft mud bottoms which now smother both shell and oyster, can be converted into prolific oyster grounds by the application of sufficient sand and shells, wherever these bottoms can be adequately protected from an

excess of fresh water from the Mississippi, through its numerous crevasses.

A beneficent Providence has so ordered things, in this great valley of the Mississippi and its tributaries, that there seems to be a complete harmony of interests amongst all the industries which center here.

The same locks and dams which are necessary to protect the valuable paddy rice fields, all along your coast, from the salt water, are also necessary to protect the valuable oyster beds, in your numerous bays and bayous, from destructive fresh water floods.

The same levees which protect the lands adjacent to the Mississippi—an agricultural region which can only be compared to the valleys of the Nile and the Ganges and other great rivers—unquestionably tend to improve the navigation of this great highway of commerce.

The great reservoirs which are being built at the headwaters of the Missouri and Arkansas rivers to retain the destructive floods produced by the rapidly melting snow, to be used in the season for converting the marvelously rich arid land of the West into productive agricultural regions, unquestionably tend to diminish the force of the floods, sometimes so destructive to both the agricultural and oyster interests of the State of Louisiana.

The great national forest preserves it is proposed to establish in the Appalachian mountains at the headwaters of the Ohio, Tennessee and Cumberland will unquestionably tend to protect from destructive floods the rich valleys of all the rivers which rise in these mountains, and at the same time preserve, under scientific government control, a valuable timber region, whose preservation means so much to so many States. Many of the great floods of the
2279 Mississippi came from the Ohio, largely the result of the clearing of timber on the precipitous mountain sides at the headwaters of the Ohio and its tributaries.

The writer has had frequent occasion to observe the terrific force of the waters on the sides of these denuded mountains.

He has known your coast for over a quarter of a century, as a Government surveyor, and he is convinced your oyster interests can never be highly developed until your bays and inlets are *effectively protected* from the destructive crevasses of the Mississippi river.

Cubits gap has entirely destroyed the once valuable oyster reefs of Bay Rondo.

The crevasse at the Jump has rendered Grand pass and a large percentage of the extensive bottoms of Grand pass and West bay useless for oyster culture.

Pass à Loutre crevasse has not only destroyed the once very extensive oyster reefs of Garden Island bay, but the sediment from it seems to be a constant menace to the safety of navigation at the mouth of the jetty at South pass, upon which the ocean commerce of New Orleans to-day depends.

On the contrary, in some of the bays and inlets of Cameron parish

which have been protected by the dams and locks of the rice planters you now have oyster beds where oyster beds were unknown before.

What has already been accomplished in oyster culture, in the bays and bayous of your State, where these bays and bayous are effectively protected from crevasses, is best illustrated in Whale bay and Grand bayou, just west of the South pass of the Mississippi river.

Messrs. McLaughlin & Lobrano are said to be the pioneers in the culture of oysters from the shell in Louisiana.

These gentlemen who own about twenty-five acres of planted ground in Whale bay, have sold daily during the past season over one hundred barrels of oysters. They sell these oysters on their shore for $1.30 per barrel to the canning factories. One man
2280 gathers and prepares for market ten barrels of oysters a day, gathering them in about two feet of water. This firm will sell, during the present oyster season *eight thousand* barrels of oysters from about twenty-five acres of oyster ground planted from shells, an annual yield of over four hundred dollars. ($400.00) an acre. These oysters are unsurpassed in quality and size and are marketable in about two years from the time the shells are deposited in the water.

It is only a question of time when such valuable tidal lands, millions of acres in extent, will be protected and utilized, if every crevasse has to be closed, and tons of sand and shells have to be deposited on your soft mud bottoms to make them productive oyster grounds.

In this age, a territory which, with so little labor, will yield annually four hundred dollars an acre, will not be permitted to remain idle. Your warm waters are marvelously rich in microscopic plants—the products of a continent—the very microscopic plants upon which the oyster feeds. Here frosts are almost unknown, and the oyster under scientific culture flourishes everywhere even above low water.

As requested, by formal resolution of your honorable commission, the writer would respectfully recommend some changes in your present oyster law. He has made a study of the oyster laws and oyster interests of the different oyster States, and is convinced that these changes will tend to improve your oyster industry, and the condition of a majority of those engaged in it will in the end be benefitted. You should change your 20-acre limit. The maximum acreage which can now be rented to one person for bedding or cultivating oysters is twenty acres. In Virginia, the limit of bottoms which may be rented to one person is two hundred and fifty acres. This does not apply to Chesapeake bay where there is no limit to the acreage.

I find in your State, under present laws, that only on a *narrow strip* of territory, along the shores of many of your bays and bayous are the bottoms hard enough to be used, in their present condition, to plant shells and cultivate the oyster.

Your law reads:

81 "All leased bedding ground must be square where the water surface will permit of such shape."

If this law were enforced, an oyster planter could utilize only a all fraction of his 20-acre lease, in many of your bays and bayous. om my observation in your State, I am convinced that this law s to be violated, by leasing ground in other people's names, in der to make oyster culture profitable.

This must tend to discourage capital.

In large open bays, such as Chandeleur sound, oyster culture can ver be made profitable, except in large areas, and by the use of bor-saving appliances.

There are vast areas of soft mud bottoms, in your State, which ay be made just as productive in oysters as is the ground of essrs. McLaughlin & Lobrano and others, but not until vast quanies of sand and shells are deposited upon them, and they are fectively protected by locks and dams from fresh water floods, and is fresh water is *regulated* and utilized either in fattening the oyster in protecting the beds from an excess of salt water after a severe orther." This can never be successfully done with a 20-acre nit.

In leasing your lands, I would recommend the adoption of some the features of the New York law.

Your natural oyster reefs are scattered, and not nearly in as well fined and in as large areas as are those of Chesapeake bay and its butaries.

Your commission, in my opinion, has been wisely authorized by w to determine in each case what is a *natural oyster reef*, and may t be rented. In this you follow the New York law.

Your commission will find that, in defining your natural oyster efs, you must give and take—you cannot define your natural ster reefs and not let them contain some barren area. You cannot fine your barren oyster rentable area and not let it contain some tural oyster reefs. It must be a question of honorable compro-se, with due regard to the rights of the "fisherman."

82 Your natural oyster reefs are so scattered, and in such *shoal* water that a complete survey of them would, indeed, be a *costly* undertaking. Fortunately, under our existing laws, ere is no necessity for such a complete survey of the natural ster reefs as was made in Virginia.

I would recommend that every survey of a planter's oyster ounds be *connected* with the adjacent *section corners*, and the same ctangular system of record, giving the township and ranges, be ed as is now used in your land surveys.

Along your whole coast line, points should be accurately deterned by the same systems of triangulation as has been used in the rvey of the coast.

This work should be gradually done wherever it is most needed. gnals should be built and the points should be securely marked. hen the latitude and longitude of these points are known, the sec-

tion corners, on the even minutes of latitude and longitude, can be correctly located from them. You will have endless trouble, in connection with your oyster surveys and oyster bedding-ground titles, unless you do adopt and execute some such system of surveys.

It is impossible to accurately trace out the section lines and establish the section corners, across the impassable bogs and "floating prairies," which skirt your entire coast line by any other system than by systems of triangulation. The corners of your rice farms and oyster planted beds can then be accurately restored in every dispute as to boundary lines.

The New York law reads:

"Before a lease is made, notice thereof must be posted for at least three weeks in a conspicuous place, in the office of the commission, in the office of the town clerk, and in the postoffice nearest the land applied for. The letting shall be at public auction for not less than twenty-five cents an acre annually, and for not more than fifteen years."

Your oyster grounds are radically different from those of New York. It will require much more labor and capital to convert the soft mud bottoms of your coast into productive oyster bed-
2283 ding areas. They have to be protected from the floods of fresh water by expensive levees, and vast quantities of shells and sand will have to be deposited in order to utilize them.

It seems to me leases should be for *twenty-five* years, and at the end of twenty-five years the lessee should be paid for the cost of his improvements if he has to vacate his land in favor of some other person. Thus only can you induce capitalists to utilize your soft oyster bottoms.

No one knows the ultimate value of the vast oyster and tidal bottoms of your State. They are the property of the people of the *whole State.* It would be folly for the State to sell them absolutely. Wise public policy demands that the State should rent her oyster ground to the *very best* advantage.

The New York law is a good one; but here your leases should be made for twenty-five years, and your oyster planters, present and prospective, should be paid for any expensive improvements made on their bottoms, in re-renting to the highest bidder. At the end of their lease, in every case, they should have the refusal of their ground.

Where there is no maximum rental, your oyster land will be more rapidly taken up. This has been strikingly exemplified in New York. On her limited coast and oyster area she sold, in 1901, $1,972,540 worth of oysters. In the same year from the natural oyster reefs, to which the public resorted, only $20,104 worth of oysters were sold. The rest came from rented ground, *rented* to the highest bidders. (Report of the United States Commission of Fish and Fisheries, 1903, page 422.)

Your oyster planters, when they have paid their rentals to the

State, should be perfectly *free* to work their oyster grounds, as their own interest and experience dictate.

By law they should be authorized to use dredges, steam or gasoline, on their private beds, if they so desire.

Your commission should be vested by law with authority to confiscate these dredges and to impose a heavy fine if they are ever used on your natural oyster reefs or at night.

Your planters should be authorized to use the same labor-
2284 saving appliances as their competitors are to-day using on the Atlantic coast. In Connecticut, on 64,907 acres of rented grounds, one hundred and two steam and gasoline dredges are in use. Some of these dredges take up 3500 bushels of oysters a day, in twenty-five feet of water.

Oyster culture, in fifteen or twenty feet of water, along your coast, can never succeed, unless your planters are authorized to use these dredges and have large areas.

There should be no "closed season" for the oyster planter. He should have the right to ship, in and out of the State, the products of his *own oyster farm*, whenever he so desires.

From my observations, in your State, I find there is much just ground for friction between the buyer and the seller, owing to the sale of oysters in bags, etc.

"At no place on the Louisiana coast is a standard measure used for handling oysters." (Report United States Commission of Fish and Fisheries, 1899, page 1477.)

I would strongly recommend the adoption of the Virginia law. It reads:

"It shall not be lawful, at any time, for any person to buy or sell oysters in this State, in the shell, by any other than the metallic measure adopted by the State, and *bearing* the seal of the State. These metallic tubs must be filled with a slight rise above the top. *Any person* violating this law shall be *fined* not less than $10.00 nor more than $100.00 for each offense."

These metallic tubs should be sold by your commission at the contract price, plus the cost of delivery, with a small charge for the official seal.

When oysters are sold out of the shell, the Virginia law reads: "All oysters sold out of the shell shall be by uniform wine measure. Any person violating this law shall be fined not less than $5.00 and not more than $50.00 for each offense."

Some of your planters find that it costs as much to bag their oysters for sale, as it does to cull them.

2285 It is interesting to note what is the annual yield of oysters in Louisiana, from its extensive oyster areas.

Your 2-cent barrel tax, on every barrel of oysters gathered in the State, should be a fairly correct measure of your present annual yield of oysters.

From these figures, you produced annually 1,617,044 bushels of oysters to September 1st, 1903.

The United States Commission of Fish and Fisheries have furnished me with no later data than 1897. You then sold annually only 959,190 bushels of oysters, valued at $432,668, the largest sale of any State south of Virginia. Your oyster industry is, indeed, in its infancy, but it is showing a gratifying increase since the establishment of your commission.

There is every reason why Louisiana should *encourage* oyster culture. The fishermen and oyster men of Louisiana are largely of foreign birth, moving from place to place, according to the productiveness of your natural reefs and fishing grounds. They have little attachment to the places where they camp.

This is not conducive to good citizenship. It is a well recognized fact among all political writers that a common need of good citizenship is that labor have a settled place of abode.

A nomad population can hardly be called a highly civilized one. Only a firmly settled laboring population which desires and expects to pass its life in one spot can be truly happy and produce good citizens.

The best friend of the working man is that State which encourages the working man to help himself and have a fixed home.

The State of Louisiana has a *princely inheritance* in her more than four millions acres of tidal bottoms. It will require *persistent labor, intelligence* and *capital* to properly utilize and develop this area.

Let your State by long leases, encourage your oyster man to have a fixed home near his bedding ground, which he rents from the State.

Your State should also encourage capitalists to engage in
2286 oyster culture, *wherever* large capital is *necessary* to properly develop your vast oyster territory.

You have an unlimited market for your oysters, in the great middle West, which is adjacent to you. The Pacific Coast region is open to you. Their oysters are poor and there is a constant demand for the Atlantic and Gulf Coast oyster. Our oyster does not produce fertile spat in the cold waters of the Pacific.

Chesapeake Bay oysters are shipped to the Pacific in shells, and deposited in the bays of California, Oregon and Washington until ready for use. You should have here a good market for your oysters shipped in the shell.

There is a good trade in oysters, from New York and Long Island sound, to Europe via New York city. Louisiana can build up a trade here with your great lines of steamers direct to Europe with their refrigerator plants.

The Superintendent of the United States Coast and Geodetic Survey has authorized the writer to determine, by triangulation, a series of points along your coast, to be used in strengthening your oyster and rice land surveys, and in noting changes in our coast charts.

Signals are being built over these points, and their latitude and longitude are being accurately determined. The points are securely marked, and from these section corners can be correctly located.

This work is being done so far without cost to your State.
Last year a series of points were determined in the marshes, adent to the Mississippi sound, and this year along the bays, east of Mississippi river, near its mouth.
This work should be gradually extended, by State as well as nanal aid, if necessary.
The geographical position of all triangulation stations so far demined will be furnished so soon as the computations can be rised in Washington. The distance of each securely marked trianlation station, in a north and south line and east and west line, om the adjacent section corner, will also be furnished your honorable commission.

87 Tall, substantial observing towers have been built over each of these marked triangulation points.

The State of Louisiana has at present an extremely valuable and mparatively unproductive asset in the ownership of her estimated ster territory of 4,631,152 square acres. It is the property of the ople of the whole State. The highest acre of land in your State s to be taxed to protect your lowlands. Your extensive levee stems will have to be strengthened and enlarged. Your common hool system will demand larger State expenditures, if your State pes to compete with the great manufacturing States. Your highys must be improved, if you would build up the remote sections your State. Large sections of your oyster area can only be utild in one of two ways. Either, under a community of interest, the ate must authorize large sums of money to be spent in oyster lture for the benefit of those of her citizens who live adjacent to em, or else she must rent or sell these barren oyster areas to individuals or companies.

Respectfully yours, J. B. BAYLOR.

* * * * * * *

88 The Oyster in Louisiana.

By John Dymond, Jr.,

Attorney Oyster Commission of Louisiana.

The coast line of Louisiana bordering the gulf of Mexico comprises e ten parishes (counties) of Orleans, St. Bernard, Plaquemines, fferson, Lafourche, Terrebonne, St. Mary, Iberia, Vermillion and meron. Their shores are largely indented with bays, lakes and yous, where the tide ebbs and flows daily, mixing the salt water the gulf of Mexico with the fresh waters of the Mississippi river d the bayous and smaller rivers leading therefrom. The area of is water surface, calculated out to a 20-foot depth of water in the lf of Mexico, has been found by Prof. W. C. Stubbs, director of r State experiment stations, to equal seventy-two hundred and enty-six (7226) square miles, or four million, six hundred and irty-one thousand one hundred and fifty-two (4,631,152) square

acres. If, in place of limiting the area to a 20-foot depth of water, we extend it to a seventy-five-foot depth of water in the gulf of Mexico, it would add probably a million more square acres to the above figures, and for the purpose of studying our oyster industry, we could readily do this, as will now be shown. Dr. Stubbs' calculation stopped at a 20-foot depth of water, because he considered that that was the limit of depth in which oysters could be profitably fished and cultivated by means of the extension shafts or tongs, with which he was familiar, as a one-time Virginia oyster planter. We know, however, that oysters in other States, on the Atlantic coast, are found, fished and cultivated in water seventy-five feet deep; so there is no reason why we should not be able to do the same thing in Louisiana; and for the purposes of this article, showing the possibilities of Louisiana's future oyster industry, we may base our ideas and calculations on Louisiana's coast waters containing possible oyster fields equal to nearly six million square acres. When we consider that the whole State of Louisiana contains but twenty-five millions, two hundred and three thousand, two hundred (25,203,200) square acres of land above water, we see what an immense
2289 area these oyster fields cover, being equal to over one-fifth of the total area of the State. In the matter of oyster production, this coast water area is competent to produce, with the prevailing high prices of food stuffs, untold wealth for the people of our State.

However, since the year 1886, it has been the policy of our State, under the guise of developing her oyster industry, through her oyster laws, to have in fact unconsciously and unwittingly retarded its development by ridiculously restricting and limiting the area of barren water bottom that could be leased by her citizens for the purpose of oyster cultivation, so that there are now, to-day, but seven hundred and fifty (750) oyster-bedding-ground-leases in existence, covering an area of five thousand four hundred and ninety-seven, and sixty-two hundredths (5,497.62) square acres, when the area leased from the State should, under intelligent and liberal oyster laws, by now have reached up into the hundreds of thousands. Part of this vast water area, above mentioned is now and has been occupied by what are called natural oyster reefs, where oysters grow wild, unaided by man. There are no accurate data as to the area covered by the natural oyster reefs of Louisiana, as they are scattered all along the Gulf coast, but it is estimated that they will not exceed fifty thousand (50,000) square acres. Returning, therefore, to the foregoing figures, and deducting the leased bottoms and natural oyster reefs from the total area just mentioned, this would leave over five and one half millions acres of barren oyster bottoms, at present unproductive, but which, with the expenditure of money and labor by our citizens in private enterprise, as will be hereinafter shown, could be made to produce millions of barrels of oysters, or millions of dollars of money through the oyster business. The reason this has not been done heretofore is due, as we have just said, to the fact that the State oyster law, shaped in the past by the oys-

ishermen, alone, has been calculated to restrict and retard all elopment in the oyster industry. The fishermen were content et their oysters for nothing from the natural reefs, the only cost g the expense of gathering them, and they wanted to keep every one else out of the oyster business and prevent its development, because they feared they might lose their markets through an over-production.

Property of the State.

he Supreme Court of the United States has repeatedly held that bottoms of the navigable waters of a State are the property of State within which the water bottoms are situated. In the case ames W. McCready *vs.* Commonwealth of Virginia, 94 U. S., p. the court used the following language:

"Each State owns the tide waters and beds of all tide waters in its jurisdiction. Subject to the paramount right of naviga-, fisheries remain under the exclusive control of the State.

"A right of fishery is a property right, and not a mere privi- or immunity of citizenship.

"The citizens of one State are not invested by the Constitution he United States with any interest in the common property of citizens of another State.

"A State can grant to its own citizens the exclusive use of lands ered by water for raising oysters, and may prohibit, under a alty, their use for such purposes by citizens of other States."

he power of a State over these water bottoms is, therefore, abso-, except that the right of navigation, controlled by the United es, must not be impaired; and, as to these lands, each State is a reign. According to the law of nations, this sovereign right of State extends a distance of at least three miles off shore into high seas, and the mouth of a bay, opening into the sea, must ed six miles in width for any part of the bay to be considered a sea, although a State may claim jurisdiction as far out in the for police and other purposes, as she chooses to enforce her ts.

ll of this vast water area, therefore, belongs to Louisiana as a e, just as do her public swamp or high lands, and may be rented ier to her citizens or sold, as she does her other lands. They e an enormous future value. A comparatively small portion of e oyster fields is in dispute, as to ownership, between the States of Louisiana and Mississippi, and a suit to determine this issue has been instituted by *by* the State of Louisiana in the Supreme Court of the United States at Washington. One he large Mississippi oyster canning concerns recently stated to writer its willingness to pay two hundred thousand dollars 0,000.00) per annum net to the State for the exclusive right to oyster product of the disputed area, for such number of years as ht be agreed to. This gives a rough idea of the value of these

water bottoms. Although it is but a small part of Louisiana's total oyster fields, this offer would mean four (4) per cent. interest on a value of five million dollars ($5,000,000.00).

The Duty of the Legislature.

All State property is managed by the legislature. It provides for such management by appropriate laws. To intelligently manage an interest so important as these oyster fields which belong to the State, one should have knowledge of that which one manages, as otherwise the best results will not be obtained. It is, therefore self-evident, if we are to have good oyster laws, that the members of our legislature should be fully informed of our oyster industry. We have ten coast parishes out of a total of fifty-nine parishes. Heretofore it has been the custom of our legislators to leave to the members from the coast parishes the entire formation of our oyster laws. They were not aware of the fact that there were two interests to be considered, namely, that of the State, as well as that of the fishermen. The fishermen erroneously thought that their best interests lay along the line of preventing any development of the oyster industry, while the State's interests would certainly best be subserved by encouraging the development of the industry, because it would enable her to get a revenue from her large holdings of barren oyster bottoms by securing their rental. There heretofore being no objection from the State at large, the members from the coast parishes, not being themselves as well informed as they are to-day, in regard to the oyster industry, were naturally influenced by the desires of the local oyster fishermen. These local oyster fishermen wished to keep the oyster industry for themselves, and prevent new labor and capital from becoming interested therein; and
2292 they therefore dictated oyster laws that have proven themselves to be admirably calculated to prevent any development in the industry. That development which has occurred in the last few years has been due to the utter inability of the oyster law to prevent it, a natural development that has burst through the narrow restrictions and absurd limitations of the law.

As the State owns the natural oyster reefs also, the legislature should know what these natural reefs are, and what they need, so that the annual oyster crop from this source may be maintained and if possible increased, for the benefit of the fishermen who have neither the money nor inclination to cultivate oyster beds for themselves, and for the benefit of the general consuming public.

The State also owns the oyster bedding grounds now leased by it to private parties. The legislature should know the needs of this more progressive class of people so that their interests may be encouraged and protected, because the State gets one dollar ($1.00) a year rental for each acre of oyster bedding grounds, leased for this purpose.

There are, then, in addition to the above, over five and one-half

illion acres of oyster bedding ground now barren and unproductive, hich also belong to the State. If the State could rent this area at ne same rental as the bedding grounds already under lease, the tate's annual revenue from this source alone would amount to more han five million dollars ($5,000,000) per annum, or more than nough to pay the annual expenses of the State government. It is, herefore, the duty of the legislature to see that local labor and local apital are encouraged to take up this industry and rent these barren ottoms, thousands of acres of which could be made profitably pro- uctive on a handsome scale at a very small expense. In one way his is not a remarkable thing. It is not the dream of a visionary. The province of Ontario, Canada, never levies any taxes. It has mmense areas of timber lands and annually makes up its budget, nd sells enough stumpage rights to lumber men to meet the ex- enses of its budget, which makes it unnecessary for the province o levy any taxes.

2293 Natural Oyster Reefs.

The oyster crop of Louisiana for the year ending September 30, 1903, and amounting to four hundred and seventy-two thousand, one hundred and ninety-one (472,191) barrels, or one million, six hundred and seventeen thousand and forty-four (1,617,044) bushels, came almost entirely from our natural oyster reefs, which are the property of the State. It will be remembered that the area of these natural oyster reefs is estimated not to exceed fifty thousand (50,000) square acres, and as they are the source of a delicious food product, it behooves us to know something of their natural history, so that by its knowledge we may profit in our legislation for their benefit and improvement. Let us note, therefore, that the oyster has no power of locomotion, and where he once settles, whether placed by nature or by man, there he stays until he is removed by man. As in other animate life, the oyster is of two sexes, male and female, but with the peculiarity that the same oyster may be one year male and the next year female. The breeding season extends generally from May 1 to September 1, the months without the letter "R" when the oysters are commonly said to be milky. This milk is given off by both the male and female, and under a microscope, the milk of the female will be found to be a fluid composed of innumerable eggs, while the milk of the male is made up of innumerable *spermatoza*. It has been calculated that a single oyster each year lays the enormous number of from forty million (40,000,000) to sixty million (60,000,000) eggs, and the male oyster a similar quantity of spermatoza. The eggs of the female and the spermatoza of the male are brought together and mingled by the tides and currents. In order to develop oyster life, it is necessary for one of the spermatoza to attach itself to an egg. When this happens fertilization and oyster life at once begin. This elemental fact in the natural history of the oyster has been demonstrated by the following

experiment conducted at the Johns Hopkins university at Baltimore, Md.: A well developed male oyster and a well developed female oyster, both in the milky condition, were selected, carefully opened,
2294 and with the gentle pressure of a glass rod over the egg ducts, the milk from each oyster was expressed into separate glasses of sea water, a teaspoonful of the liquid from one glass was then poured into the other glass, and the results heretofore described were observed and followed with a microscope. Each spermatoze selected and attached itself to an egg. The eggs at once began to swell, the transformation was quite rapid, and soon the young oyster *spat*, for they are so called at this period, had formed and developed a few *cilia* or hairs, by means of which they are, for a brief space of time, able to swim about. These oyster *spat* are now in search of some clean, hard surface, where they may stop and affix themselves, and where they may take up their permanent abode, as once *set* they lose all powers of locomotion. They are still microscopic in size and very delicate, for if covered by any silt or sediment in the water, they are at once smothered and die. The process here described goes on annually on the oyster reefs. The most available hard clean surface is generally the shells of other oysters lying in the locality. To these the young oyster *spat* attach themselves, and when these young oysters become adults, the cycle of reproduction begins again. Thus are the natural reefs formed, and we find oysters that have grown on top of oysters until they have formed themselves into large bunches. Of course the natural reefs had a beginning, but they can be increased by the spreading of oyster shells, and private bedding grounds can be made as productive as the natural reefs in exactly the same way. These reefs are generally of limited area, individually. The bottom is made hard by old shells, so that the oysters cannot sink in the mud; and the young oysters build themselves on top of the old ones, and the reefs extend no further than the oyster shells are scattered. In New York recently the oyster crop measured in dollars was as follows:

Product of cultivated oysters on rented bottoms.....	$1,972,540
Product of natural reefs.....	20,104

Showing how much more productive cultivated bottoms are. In Louisiana, as we have said, our crop is almost entirely a natural reef crop. How much greater our crop will be when we begin to intelligently cultivate oysters will be seen at once from the above figures.

2295 In order to bring about the most prolific oyster life in any given locality, we must have a proper mixture of fresh and salt water. The oyster gets its food from the *diatoms*, a low order of vegetable life, found in the fresh water, and it gets its lime to make its shell from the salt water. From investigations made it has been found that oysters live best in water ranging in density from 1.0011 to 1.0022 with pure water at 1000 as the basis. A great excess of either fresh or salt water is fatal to oyster life, determined to a great

extent by the age or size of the oyster, for the larger the oyster the greater the change in density it can stand. This has been clearly demonstrated by our experience with crevasses, expecially those occurring above the city of New Orleans, on the east bank of the Mississippi river. For instance, the water from the Nita crevasse killed all the oysters in the parish of St. Bernard. The point of proper mixture of fresh and salt water was, by this excess of fresh water, extended or pushed much further out into the salt water of the Chandeleur sound, and at this new point of proper mixture, at once oysters were found to begin to grow. When the crevasse was closed the old conditions gradually re-established themselves; the oysters in the sea were in time impoverished or made thin and of little value by the excess of salt water, and the oysters grew again on the old shells and reefs in St. Bernard, the proper line of water mixture gradually moving backward to the shore.

From this exposition of the subject, it appears that in order to develop oyster life to the best advantage, we must have:

1st. A proper mixture of fresh and salt water, ranging in density from 1.0011 to 1.0022.

2nd. Oysters, both male and female, present or in proximity in the adult stage, to make the oyster *spat*.

3rd. A bottom hard enough to keep the oyster shells from sinking in and being covered by the mud.

4th. Oyster shells, or some other hard clean material, scattered over the bottom to act as *cultch*, to which the young oyster
2206 spat may attach themselves.

These conditions exist naturally on the natural reefs; where they are found, there you find natural oyster reefs, and as long as they continue to exist the reefs will continue to produce annual crops of oysters. Where they do not exist naturally they can be brought into existence by the expenditure of labor and capital, in supplying the missing conditions, that is, in bedding adult oysters and spreading old shells on the bottoms, and this is what is done on the private bedding grounds. To insure a continuance of the existence of these favorable conditions on the natural reefs, or private bedding grounds, three things must be observed by the oyster fishermen that are absolutely necessary, and for the following reasons to-wit:

(*a*.) The fishermen, when fishing oysters from the natural reefs should *cull* their oysters and scatter the dead shells back on the reefs, because they become the *cultch* or attaching place for future young oyster *spat*, which would otherwise be smothered by the soft mud of the bottom, as they would have no other hard surface to which to attach themselves.

(*b*.) The small oysters under two and one-half (2½) inches in size from hinge to mouth, should also be returned by the fishermen to the natural reefs when they are fishing. The fishermen always take all the adult oysters, and it is necessary to return these small oysters

to the reefs so that they may in time become adult and produce young spat to keep the reefs alive.

(c.) No oysters should be removed from the natural reefs while the oysters are spawning *or* in their milky period, that is during the closed season from May 1st to September 1st, as this will then give the young spat a chance to set and replenish the reef.

Human nature is such, however, that the ordinary fisherman will not follow these simple natural laws even when they are for his own benefit. An effort is made to compel the fishermen to obey these natural laws by requiring them, under positive law, to do so; but our own experience and the experience of our sister oyster States shows that the task is almost, if not quite, hopeless, and sooner
2297 or later the natural oyster reefs are doomed to destruction.

That this may be appreciated let us take the fishing system in vogue with our oyster fishermen to-day. A fisherman will anchor his boat by pushing his pole in the bottom and fastens his rope or cable to it. He will then begin to fish over the side of the boat with his oyster tongs, depositing his catch on deck and gradually letting out his rope as he gathers up the oysters from the water bottom around him. After he has changed the position of his boat once or twice, he will have gathered up a deck load. He will probably have removed the oysters and dead shells from over one thousand (1,000) square feet of surface. He will now begin to clean or *call*, which consists in knocking the small oysters and dead shells from the marketable oysters. He does this sitting on the deck, without moving his boat, and the shells and small oysters *and* thrown overboard into two small piles in the water, on each side of his boat, covering scarcely twenty-five (25) square feet of bottom. In this way the size of the reef or the hard surface of the shells to which the young spat may attach itself is being reduced from 1,000 to 25 square feet, and no oysters will grow on the remaining 975 feet of bottom because all of the shells have been removed from it. To prevent this would require an inspector on each boat, an expense to the State out of all proportion to the benefit received by it, and our only hope for the oyster in the future lies in the direction of the encouragement of private bedding grounds, where it will be more to a man's interest to take care of his private reefs made by himself in such a way as to keep them annually productive to their fullest capacity, than is the case with public property where every one is interested solely in present results, and all are generally regardless of the future.

The Oyster Industry as It Is.

This is the first year during which we have ever had any statistics as to our annual oyster crop, or as to the number of those engaged in the industry. It is true that the oyster industry has been
2298 subject to legislative control, on a comparatively comprehensive basis, since 1886, yet that law and the laws of 1892 and 1896 were recognized by the fishermen more in their breach

than in their observance. There was no effective way or means provided to enforce the law until the act of 1902, when the present oyster commission was created. Even as it is, the present law is not designed to immediately develop the oyster industry. All that can be hoped for under its operation is to compile statistics, to have the benefit of a thoughtful and careful study of the industry by the gentlemen composing the oyster commission; and with that to educate our people to an appreciation of the true importance and possibilities in the development of the Louisiana oyster.

Under the present oyster law the waters of the State are regarded as a common, and all residents of Louisiana may enter thereon and fish oysters from the natural reefs upon the condition that they procure from the State, through the oyster commission, annual oyster licenses for their vessels, on the basis of fifty cents a ton; a license of two dollars per annum for each man using oyster tongs with which the oysters are fished, and the payment to the State of a privilege tax of two cents per barrel of oysters fished. It is possible that the amount of oysters marketed this year was slightly larger than the results of last year. This, however, does not mean that we have had a better or bigger crop. It means simply that a few more people were employed in depleting the natural reefs, which are at present practically the sole source of our oyster supply. Some one may, however, suggest that some of our oysters come from bedding grounds. This is true, but these bedding ground oysters, as the business is carried on to-day, have been merely transplanted, and are the identical oysters that came from the natural reefs only a few months, or perhaps a year, before, so no matter how you look at it, it comes right back to the proposition that we are at present dependent on the natural reefs for our oyster supply.

Now comes the serious problem. The crop on the natural reefs is getting scarcer and scarcer every year, the fishermen have to go further and work harder to get oysters from the natural
2269 reefs and in a given length of time are able to tong fewer oysters than they used to. This subject will receive further attention under the head of recommendations, as there is a ready remedy for it. Under the present law, also each dealer and shipper of oysters must pay an annual police license of $25.00, and each canner of oysters an annual police license of $100.00 The records of the oyster commission show the following licenses to have been issued for the several purposes during the year ending September 30, 1903, to-wit:

1574 vessels aggregating	$2,710.50
1,953 tongmen aggregating	4,882.50
27 dealers aggregating	689.00
3 canners, aggregating	301.50

It will appear from the above that the average vessel employed in the oyster industry has a tonnage of 2.44 tons, or an oyster carrying capacity of a little less than fifty (50) barrels of oysters of three and one-quarter (3¼) bushels per barrel.

The last annual oyster crop to September 1st, 1903, as we have heretofore stated, was one million, six hundred and seventeen thousand and forty-four (1,617,044) bushels. Under the oyster law of 1886, a citizen of the State could lease from the State for the purpose of oyster cultivation a part of the water bottom, not a natural reef, not to exceed three acres. Here he could deposit the oysters which he had fished from the natural reefs and when so deposited they at once became his private property, protected by the laws governing same. Oysters deposited anywhere other than on private bedding ground, leased from the State, belonged to whomsoever might wish to come along, find them a second time and take them. Under the oyster laws of 1892 and 1896, this area that any one person, firm or corporation could lease for the above purpose was increased to ten acres, and by the act of 1902 was further increased to twenty acres as a maximum. Some fishermen fish their oysters direct from the natural reefs to the market, and this is particularly the case with those who fish for the canning factories. The same practice has also been largely in vogue in Terrebonne and St. Mary parishes, where heretofore the natural reef
2300 oysters of marketable size were plentiful. Others fish on the natural reefs, and temporarily deposit their catch on provate leased bedding grounds where the oysters are increased in size and improved in shape and flavor, better fitting them for the counter trade, for which they are intended, where oysters are opened and sold on the half shell. It is this latter class of oyster fishermen who are the only ones who have heretofore made what little use has been made of the water bottoms belonging to the State. They wanted, however, individually but a small area for this purpose. They were even unwilling to spend money in improving this small bedding ground, and usually selected a part of a natural reef which was already a hard bottom, and leased it, notwithstanding that this was against the law. They did not try to make more oysters grow. They simply improved the oysters they had caught on the natural reefs. During the past seventeen years only a limited quantity of the water bottoms was leased from the State for the above purposes, and not an acre was leased for raising new oysters like other farmers make their crops. The new oyster law required the lessees of these previously leased bedding grounds, belonging to the State, under penalty of forfeiture of their rights, to register their leases, with the oyster commission within a designated length of time. This time has now elapsed, and the records of the oyster commission show the following data:

Five hundred and twelve leases made under the oyster laws previous to 1902, aggregating 2,820.52 acres distributed among the parishes as follows:

	St. Bernard.	Plaquemines.	Jefferson.	Lafourche.	Terrebonne.
No. of leases...	12	359	7	24	110.
Total acreage..	120	1547.07	70	120.68	962.77
Average.....	10	4.30	10	5.02	8.75

When we stop to think that in seventeen years the State has leased less than three thousand acres out of the five and one-half million acres that the State has to lease, and that we still have these five and one-half millions acres to lease, it strikes one at once that there must be something radically wrong with the system we heretofore followed and still follow, which prohibits any one per-
2301 son from leasing more than 20 acres of barren bottom, especially when one compares our results with that of other States.

Since the creation of the oyster commission, that body, as representing the State, has itself leased twenty-six hundred and seventy-seven and ten hundredths (2,677.10) acres to two hundred and thirty-eight (238) different people in the past year. This is more encouraging when we see how little was done in former years but it —still far from satisfactory, when we consider that we have still over five and one-half million acres that we wish to have become productive, and which can be made to grow oysters as profitably as the natural reefs.

Effect of Existing Conditions on the Future of the Oyster Industry.

The oyster commission at considerable expense, is policing the natural oyster reefs in the several parishes along the Gulf coast, and is endeavoring to enforce the provisions of the oyster law, prohibiting the removel of small oysters and dead shells from the natural reefs and preventing the fishing of oysters from the natural reefs during the closed season, or while the oysters are milky. To do this the commission has inspectors equipped with boats in all the coast parishes, and maintains two police boats, one a schooner and the other a gasoline launch, on the boundary to the eastward between the States of Louisiana and Mississippi. The commission is in this manner doing a great deal of good in a negative way, by trying to prevent any decrease in the natural reef supply, but it is at the same time endeavoring in a positive way to benefit the industry by encouraging the cultivating of oysters by private enterprise, as it is through this means and this means alone that there will ever come any material and permanent improvement in the oyster industry or any substantial benefit to the State. Protection of the natural reefs helps, but a much more effective means to produce results would come from increasing the oyster producing area. We have nearly six million acres of water bottom, hundreds of thousands of acres of which are now barren and unproductive, but which could be made to yield annually at least one
2302 hundred barrels of oysters per acre at but a small expense, if the law was designed to encourage this. Most of the people who are in the industry to-day, do not desire to see any increase or development in it. In fact, with few exceptions, they regard every new comer as an intruder into a business that belongs entirely and exclusively to them. That the State's water bottoms remain idle

and the State loses hundreds of thousands of dollars yearly in rentals is no concern of theirs, just so long as there is no development in the oyster industry. They get their oysters from the natural reefs for nothing, except the expense of going there and getting them, and the small tax of two cents a barrel they pay the State. They must know that it is yearly more and more difficult to find oysters on the natural reefs, and yet they are opposed to the leasing of the barren bottoms of the State on any liberal basis, because they fear that something might happen which would injuriously affect them. They do not know what this something is. Their fears are, in fact, entirely unfounded, and yet the best interests of the State are sacrificed to an alarming extent. The fisherman's influence has caused the law to be so framed as to restrict to twenty (20) acres the area of barren bottoms that any one can lease from the State and improve and plant in shells and oysters. The effect of this is to paralyze any development. On the basis of units of twenty acres and hand labor to work them, there are not and never will be in Louisiana sufficient people, without means, voluntarily willing to go into the cultivation of oysters in this way. Twenty years of experience has shown that the present oyster fishermen won't do it, and yet they do not want any one else to do it. It takes labor and money to change an acre of barren bottom into a condition as permanently and profitably productive as a natural reef. It can be done, has been done, is no experiment, and its development means the coming into the State treasury of an immense revenue from the leasing of these barren bottoms owned by the State, a revenue to the State that in the next ten years should easily reach a million dollars a year.

2303 One of the first things necessary to do to change the existing condition of things and to encourage the cultivation of oyster beds in this way is to remove this ridiculous limit placed in the law as to the area that any one person may lease. The State itself owns more barren oyster bottoms than there are high lands in cultivation in any one industry of the State, in which its citizens are engaged, yet how absurd it would be to say that no citizen should cultivate more than twenty acres of cotton, sugar, rice or corn land which these citizens own. Nevertheless, we find the astounding provision in the oyster law in which the State says that no person, firm or corporation can lease more than twenty acres of the State's own barren oyster bottoms, though she has six million acres to lease and in the past twenty years has not succeeded in leasing six thousand acres. The folly of this policy, from this point of view, appears with the mere statement of it. But it will be said, if the State does not put a limit on the area, a trust will get hold of the industry and the small fishermen will be crowded out. To any one who has given the subject any thought, this is manifestly impossible; it is nothing but a cry gotten up for a purpose. To make an American oyster trust it would be necessary to control and consolidate the oyster industries of the States of Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, North Carolina, South

Carolina, Florida, Alabama, Mississippi, Texas and Louisiana. The steel trust would not be a circumstance. To control the oyster bottoms of Louisiana alone, such a trust would have to pay into the State treasury of Louisiana the enormous sum of five million dollars ($5,000,000) annually, in rentals, besides ten million dollars ($10,000,000) in the two cent ($.02) tax, not considering what it would have to pay into the treasuries of the other States. *No trust could be formed when the title to the water bottoms was founded on a lease, as the law that permitted the lease could, by special provisions, prevent a trust.* Be that as it may, if a limit is needed and desired, place at five thousand (5,000) acres the maximum amount any one person, firm or corporation can lease. It would take twelve hundred persons to take up all of the water bottoms, and then there need be no fear, as any combination of these elements would be prohibited by the law itself, and we have many sugar plantations and cotton farms with as many as this. Connecticut and Rhode Island have no limit, and yet have no oyster trusts. Virginia, in Chesapeake bay, has no limit and she has no trust.

The reason that those who are in the oyster industry oppose any development or utilization of the great natural resources of the State, the reason they regard each new comer into the oyster industry as an intruder, is due to the mistaken idea that there will be so many oysters produced that it will hurt the market values now existing. This conclusion is absolutely unfounded when the facts regarding the real and future oyster demand are known, for the following among other reasons:

The people who are at present in the oyster industry, with the exception of the parish of Terrebonne, almost entirely depend upon the city of New Orleans for a market. Generally the fishermen have neither time, money nor ability to build up markets elsewhere. The result is that at times the New Orleans market is glutted, and then it is devoid of oysters. Houma, in Terrebonne parish, and Morgan City, in St. Mary parish, are largely engaged in the shipping of oysters outside of the State of Louisiana. Raw oysters, removed from the shell, are called shucked oysters, and these have been shipped by express successfully from Houma to the State of Washington, in the northwest corner of the United States, and she to-day is shipping raw oysters daily through Texas, California, to Salt Lake City, Utah, to Phœnix, Arizona, to Denver, Colorado, and, in fact, to twenty-six States. There is no reason, with liberal oyster laws in Louisiana, why this and the canned oyster business should not be built up to unlimited proportions, and there is no reason why we should not compete with the Atlantic Coast oyster, and successfully supply our superior southern oysters to the hotels and large consumers throughout the whole of the United States, at least west of the Mississippi river, and through a great part of said territory east of said river.

In order to be able to do this, we must be in a position to make

contracts for delivery, and this we cannot do unless we can get sufficient oysters to fill the contracts with certainty, and we have not enough oysters now to justify one in making a large contract for continued delivery. It will be five or six years before we
2305 would be able, even with liberal laws, to supply the demand as it exists to-day, not considering to what proportions the demand may be built up by industry and money, and this can be readily done. At one time the parish of Plaquemines produced more rice than all the other Louisiana parishes put together, and even then her product was comparatively small. Calcasieu, Acadia, and a number of western parishes started into rice, and it was feared by the Plaquemines planters that this extra supply would glut the market, that prices would consequently fall, and they would have to sacrifice their rice. How mistaken they were is shown by the fact that with a bigger rice crop this year than ever before, nearly 3,000,000 barrels from the western parishes, prices for rice for a time rule higher than ever before. This is explained by the fact that each new rice farmer as soon as he got into the rice business, at once began to look for and build up new markets. Such an increased demand has grown from the greater use of rice brought about through *by* advertising, by *rice kitchens*, and other means throughout the country, that the greatly increased crops are not only readily absorbed, but they are disposed of at greater advantage than ever before. It is true that the rice market is presently slightly depressed, but this will adjust itself. Thus we may confidently count upon the fact that a development of our oyster industry and an increase of our annual crops will carry with it an enormous increase of the already large demand brought about by new brains and new money in building up and establishing new markets.

The present demand from outside the city of New Orleans for the Louisiana oyster is many times greater than the supply. I know of one firm, perhaps the largest shipper of Louisiana oysters, who received two separate orders for a daily supply, either of which, if accepted, would have taken every oyster this shipper received, and all of the firm's other customers would have gone unsupplied.

These orders, however, carried with them a necessity of fill-them, a contract obligation which the firm was unwilling to assume, because it could not be sure of getting the oysters in the Louisiana market, owing to the insufficiency and irregularity of the supply.

This belief of the fishermen, that oyster development will
2306 hurt them, is very unfortunate, but it is equally unfounded, and it is the duty of our people to educate our fishermen to a true knowledge of the future consequences of these changes in the State's policy toward her oyster industry. This fear of the fishermen is nothing unusual; it is part of the history of the oyster industry of every State that has or ever had an oyster industry, and we can therefore profit by the mistakes of these other States and avoid them ourselves.

A Comparison with Other States.

Maryland, they have practically no private bedding grounds
lepend for their supply of oysters upon the natural reefs, which
ommon property and open to everyone. They endeavor to
ct these reefs by a most elaborate police patrolling system,
oying fourteen regular patrol boats and six extra vessels during
eason. In its time Maryland has produced more oysters than
ther oyster center in the world, yet depending on her natural
and not encouraging the production of oysters on barren bot-
by private enterprise, they have been killing the goose that
the golden egg, as exemplified by the following table of the
al oyster output of the city of Baltimore, which shows a won-
l but gradual falling off in production, to-wit:

Seasons.	Bushels.	Seasons.	Bushels.
-1886.....	7,405,963	1899–1900.....	4,062,665
-1889.....	6,559,733	1900–1901.....	3,502,114
-1890.....	5,925,400	1901–1902.....	2,877,861
-1894.....	4,913,060		

aryland has 31,543 persons directly engaged in her oyster in-
y. The above data were taken from the report of the bureau
atistics and information of Maryland, 1902, and a recent visit
at city shows a general feeling of depression and despair in re-
to the future of the Maryland oyster industry, and it is the
there now that the legislature will encourage private enter-
on leased bedding grounds. Dredging is authorized in this
, and enables the oyster fishermen to fish their oysters more
ply than we can, and they are therefore able to undersell
us.

In Virginia we find, on the contrary, that they have broken away from the ill-advised policy of Maryland as to leases, having adopted a more liberal policy towards the development e oyster industry, that State has now about 50,000 acres of her ing ground leased to her citizens, and the State and its citizens eaping the reward.

ne reports of the Virginia Oyster Commission show the follow-
expenses and net profit to the State for the following years:

Season ending—	Gross revenue.	Expenses.	Net profit.
30, 1900.....	$48,392.32	$21,534.71	$26,858.05
30, 1901..... ..	53,506.50	21,248.04	32,258.46
30, 1902.....	58,576.95	25,205.66	33,371.29

redging is extensively practised in Virginia, under wise legal
ations, to the advantage of all concerned.

Connecticut, we find the most liberal and logical laws in effect the oyster cultivating industry carried to its highest point of

development. According to the report of the oyster commission of that State for the year 1902 there were leased by the State to private parties sixty-six thousand, four hundred and eighty and eight-tenths (66,480.8) acres of water bottoms among 185 tenants. There is no limit in the Connecticut oyster law to the number of acres of oyster bedding ground that any one person, firm or corporation may hold. Notwithstanding this, there are 185 separate tenants, showing that no trust can control the oyster industry even when there is no limit as to area. The average holding is 359.30 acres, the smallest being one (1) acre, and the largest being ten thousand, five hundred and forty and two-tenths (10,540.2) acres. There are sixteen different firms and individuals with over one thousand (1,000) acres each. There were 102 steamers used to fish oysters in Connecticut waters, not including 79 sailing vessels.

In Connecticut no rent as such is charged for the use of the oyster bedding grounds, but annually, on November 1, grantees of oyster beds must make a report to the Connecticut Oyster Commission of the value of their beds, and an annual tax of one and one
2308 half (1½) per cent. is levied on this value. Connecticut's oyster industry is small as compared to the possibilities of Louisiana. The State does not strive for a direct revenue for herself, yet her net profit for the year ending September 30, 1902, was nevertheless $3,570.42. Dredging is extensively practised in Connecticut, and many of the private bedding grounds are covered by water seventy-five (75) feet deep, where oysters could not be cultivated unless the use of modern implements was permitted.

In Rhode Island, we find them using dredges wherever the water is over fifteen feet deep. This State puts no limit on the area any one may lease, and had on January 1, 1902, 102 leases, ranging in area from .03 of an acre to 987.40 acres. The annual rental ranges from $5.00 to $10.00 an acre, and the State's revenues for the last four years are as follows:

1900.....	$20,973.08	1902	$38,216.75
1901.....	25,767.38	1903	45,000.00

and the industry is prospering there, though it is composed largely of temporarily bedding seed oysters grown in other States, and brought to Rhode Island to increase in size and improve in shape and flavor.

In New Jersey we find them using modern implements in fishing and cultivating oysters. The report of the New Jersey commission for 1901 is interesting, as it shows they had to combat the same ignorance as to the real welfare of the oyster industry that we have here. They charge an annual rental of but twenty-five cents ($0.25) an acre for bedding grounds.

In Florida there is practically nothing being done in the way of the State's controlling her oyster industry, and it has suffered correspondingly. Some years ago, the United States Fish Commission made some elaborate studies of and researches into the oyster con-

ditions of Florida, and found the prospects very flattering, but the industry there, being without the control of any oyster commission or similar body, no development has occurred.

In New York, on January 1, 1903, that State had under lease, as private bedding grounds, 27,352 acres, which were rented for not less than 25 cents per acre per year rent. Before a lease is
2309 made the price is fixed by public auction, so that the State gets the benefit of any advantage possessed by any particular locality. The oyster industry comes under the head of the Shell Fish Department of the State Forest, Fish and Game Commission.

Great encouragement is lent by the New York oyster law to the development of her oyster industry. Among these encouraging features may be mentioned the right to lease as many acres as one wishes at a rental fair to the State and the applicant, and the right to use whatever means or implements one chooses in cultivating, fishing or harvesting one's oysters from his leased bedding grounds.

In North Carolina the total oyster product for the season ending August 31, 1902, was 643,410 bushels. Heretofore they have operated one steamer in patrolling the State's oyster beds, but the oyster commissioner in his report to the governor recommends the acquisition of three sixty-foot gasoline boats and three schooners for patrolling purposes. The gross receipts from January 1, 1901 to December 31, 1902, amounted to $29,473.63, while the expense during the same period reached the sum of $27,458.11. In North Carolina a tax of two cents ($0.02) per bushel is collected by the State on all oysters fished, which is over three times as much as we collect in Louisiana, and there you may use any implement you choose in fishing oysters on the natural reefs, except in designated places, where the use of anything but hand-tongs is prohibited. In other words, hand-tong fishing is confined to inland shallow waters, while in open and deep waters, where hand-tongs cannot be conveniently used, you may use the more modern implements.

Little or nothing has been done in North Carolina in the matter of leasing barren bottoms to private citizens for the purpose of oyster propagation and culture, and in this respect she is very much behind our own, and her other sister Atlantic States.

The above statement is based on the biennial report of the Oyster Commission of North Carolina, issued in January, 1903.

In Texas the latest report we have is dated August 31, 1900, and shows that the State then had 884 acres of oyster bottom under lease by the State to twenty-three individuals and one corporation.
2310 The State has an oyster law and a fish and oyster commissioner. The law authorizes the leasing of not exceeding 50 acres of bottom to a person, and prohibits corporations from holding more than 640 acres of oyster bottom. The lands are leased for an indefinite period at a rental of 10 cents an acre per year for the first five years, and 25 cents an acre per year thereafter. A charge of $5.

a year is made for a tongman's license. On private bedding grounds you can use any means or implements you choose in handling and marketing your oysters, but on the public reefs nothing but hand-tongs can be used. In speaking of this subject, Mr. I. P. Kibbe, the fish and oyster commissioner of Texas, says:

"The law prohibiting the use of any form of oyster dredge in the waters of this State has been a menace to the trade and detrimental to the growth of the industry. Dredges could be used with good results in many instances not only where the water is too deep for tonging but also where the oysters grow in ridges, for by the dredge the latter would be torn down or spread over a greater surface, thus furnishing a larger area for growth."

Texas claims to have 87,680 square acres of natural oyster reefs, yet her crop for the year ending August 31, 1900, was only 72,208 barrels with but 118 tongmen's licenses, and showing that her great natural resources have not even been worked, regardless of any development in the industry.

Mississippi, our sister State, has practically very little of her bottoms suitable for the cultivation of the oyster, and as a consequence her product largely consists of small reef oysters called "cove oysters," which when they are steamed shrink up to about the size of one's thumb-nail. This is due to the fact that her coast line is so open that there is an excess of salt water.

Her oyster law gives to the riparian proprietor the private use of the bottoms a distance of 500 yards off shore.

This area gets the benefit of the water shed from the land as stated, and except in cases of natural reefs it belongs to private parties and the State gets nothing from its use. There is no such thing
2311 known to the Mississippi law as leasing her barren bottoms to private parties for oyster culture upon the basis of a definite rental, and her annual oyster crop therefore comes from the natural reefs, except when supplemented by these riparian bedding grounds.

Mississippi authorizes the use of scrapers or dredges anywhere in fishing oysters. This is but proper in her case, as her waters are so open that with the least bit of wind it becomes so rough as to prevent a man standing up on the side of a boat and working his hand-tongs overboard. She, however, confines the use of these modern implements to sailing vessels and will not permit of them being used on boats propelled by steam, gasoline or other power. This is done in deference to the poor man, as they think he cannot afford to buy a steamboat, and they want to force him to a position of equality with his richer brothers so far as opportunity for business is concerned. It has a bad side, however, because a sailboat can work only when it has wind, and when there is a calm they must shut down everything, as the canning factories must be assured a regular supply of oysters in order to operate. Then, again, many excellent oysters are found in the deep water channels, and it is almost impossible to follow their curves and meanderings with a sailboat with a scraper dragging behind it.

While dredging in Mississippi has undoubtedly decreased the mber of adult oysters to be presently found there, it has never-less greatly enlarged the natural reef area, and as this is all cov-d with an excellent crop of small oysters, Mississippi will soon re again what she could just as well have lost through the use of nd-tongs. Mississippi's possibilities as an oyster producer do not mpare with Louisiana, as she has not the vast area of otherwise ren bottom covered by a proper mixture of fresh and salt water, ich area in Louisiana can be brought into cultivation by encour-ng private enterprise.

Recommendation.

In looking over the map of the Unit ed States, as well as those of foreign countries, it will be noted that the oyster fields of a 2 State or country are always found in proximity to the mouth of a river discharging its fresh water into the salt water of the . In this respect Louisiana possesses natural advantages enjoyed no other State, for it has the greatest fresh water river in the rid, the Mississippi, discharging its enormous volume of fresh ter into the salt water of the gulf of Mexico; and the area of proper xture of fresh and salt water, heretofore discussed, exceeds that of y other portion of the world. Her oyster fields can, therefore, be de that much more extensive in area, and her possibilities are hout parallel in oyster history, for the warmth of her waters kes her oysters grow many times as fast as they do on the Atlantic st, as will be seen from the relative natural size of the Atlantic st and Gulf Coast oysters at one year of age, as illustrated herein. Louisiana, however, will never be able to compete in oyster pro-ction with the other oyster States of the Union until she enjoys h them equal advantages in the use of the modern labor-saving plements in the gathering of her crops, particularly on private sed bedding grounds, nor until the ridiculous limit as to the area t may be leased is removed. Under the law as it is, even on 's own private bedding ground leased from the State, and for ich an annual rental of $1.00 an acre is paid to the State, one can nothing but hand-tongs to harvest one's crop, no matter how irable any other device may be, and no matter how much money ould save the lessee in gathering his oyster crop from his private ding ground. Though this is absurd, yet it is nevertheless true. ppose the legislature of our State were to say to the Calcasieu rice nter that he must use nothing but a hand sickle in gathering his crop, and must not use a reaper and binder, under penalty of ere punishment, although he might annually save thousands of lars thereby? Suppose it were to say to the sugar planter, You ll not use derricks, nor rope straps, nor the new cane loader; to cotton planter, You must not experiment with the hoped-for on picker, because we will not let you use it? If the legislature

tried to do such a thing with a rice planter, a sugar planter, o
cotton planter, the people would say it was outrageous,
2313 rectly contrary to the spirit of modern times, an idea t
would emanate appropriately from a Chinese legislature, b
certainly not from one of the United States, and yet this law unjus
stands on the statute books, preventing the oyster bedding grou
lessee from conducting his business according to the most improv
and economical methods. The law should be changed in this r
spect, and I have every reason to hope the legislature will
change it.

As to the wisdom of the use of modern implements on priv
bedding grounds, there can be no doubt. As to the wisdom of t
use of anything but hand-tongs on the natural reefs, there is a gr
deal of diversity of opinion. A very careful study of the whole su
ject, and an intimate knowledge of the oyster industry leads to t
following conclusions:

1. Oysters cannot be profitably fished with hand tongs in wa
over ten feet deep. Of course they can be fished; one could g
very long handled rakes and fish a few oysters, but for commerci
purposes oysters cannot be profitably fished in water over ten fe
deep.

2. Natural reefs in ten or less feet of water should not be fished wi
anything but hand or patent tongs. If the bottom is sufficient
hard, the scraper or dredge will not hurt the oyster reef, if the sm
oysters and dead shells are at once culled and thrown back on t
reefs, but in the present state of the public mind, I think the prop
sition to use scrapers or dredges in water under ten feet, on the natu
reefs, if it comes at all, should emanate from the small oyster fish
men. There is a scraper with a windlass that is now built at a co
of $40.00, a price easily within the reach of our small fishermen, a
they could use it to advantage in open water on rough days when
is impossible for them to fish with hand-tongs. Frequently the
cannot fish over the side of the boat with hand tongs, because of t
tossing of the boat by the waves, and if they had a small scraper
dredge they could fish their oysters with it while they sailed alon
and it would harm the reefs less than the use of the hand tong.
regard these shallow water reefs as properly the property
2314 the poor man, who has not the money to lease and prepare h
own bedding ground, and it will be time to permit them to u
these improved implements when they themselves ask for th
privilege, but when these dredges are used by the fishermen the
must cull their oysters and throw back on the reefs the culling
and dead shells, or the natural reefs will continue speeding on t
destruction.

3. If the bottom is soft, a scraper or dredge is injurious, becaus
it will press the oysters into the soft bottom and kill them.

has been claimed, and correctly, that the oyster reefs of Mississippi have been greatly increased in area by the bunches that have been broken up and the oysters scraped off the hard reef onto the soft bottom; but to my mind the use of live oysters to make hard bottom is a heroic means entirely unnecessary when the same thing can be done with dead shells.

(Here follow diagrams marked pp. 2314 *a* and *b*.)

2314a

A drag, or scraper, with hoisting winch, incorrectly called a dredge, used in deep water fishing.

23145

Oyster schooner fishing with drag or scraper. The drag is overboard on the

There is no mechanical appliance that has suffered more unjust criticism, born of ignorance, than has the scraper, commonly misnamed the dredge. Any one unacquainted with the facts would at once suppose that it was similar in construction to the mechanism we use in dredging our canals, and when one speaks of steam dredges we at once picture a machine competent to dig the Panama canal. All these ideas are born of absolute ignorance. The instrument is, in fact, nothing but a garden rake, with very short teeth, inclined at an angle with a chain net behind it. A rope is tied to it and it is thrown overboard, and follows or drags behind the vessel as it moves along. It merely scrapes or rakes the bottom, the short teeth set at an angle pass under the oyster, which falls back into the bag. The thing is pulled up on deck from time to time, and the oysters removed. It take*d* up the oysters just like you would rake the hay in your fields, but, of course, you must throw the small oysters and dead shells back on the reef for the reasons we have heretofore given, and just as tongmen must do, or you will soon destroy the reef. People say oysters are getting scarce in a certain locality because scrapers or dredges are used there. We hear the same complaint from localities where a scraper or dredge was never known. I know of hundreds of natural reefs that have been completely wiped out by hand tongs where a scraper or dredge has never been known, so that we must
2315 render justice where it is due. The fault has not been with the implement so much as it has with the man who operates it, as well as the man who operates the hand tong, in failing to return to the natural reefs the small oysters and dead shells. This is demonstrated by the fact that the use of scrapers or dredges is permitted and encouraged in Mississippi, Virginia, Maryland, New York, Rhode Island, Connecticut and New Jersey. A sailing dredge is one where the boat moves by sail, and a steam dredge is one where the boat moves by steam, and in the latter instance the scrapers are hauled on deck by means of steam.

In the open deep waters of the gulf of Mexico, off the mouth of the Mississippi river, off the mouth of the Atchafalaya river, south of the parish of St. Mary, and off Southwest pass of Marsh island in the parish of Vermilion, and off the mouth of the Calcasieu river, there are millions of barrels of oysters that have never been, and under the present law never will be fished. They are in water too deep to fish them with hand tongs, and being in the waters of the open Gulf, the small boats, now engaged in the oyster industry, are afraid to venture there, though boats patterned after the style of the Connecticut boats could fish these oysters easily, bringing a great profit to the State and a great development in the industry. It would mean the industrial salvation of Morgan City and all places similarly situated, were dredging permitted in deep or open water.

It is only logical and proper that our State Oyster Commission should be vested with discretion to permit the use of implements

and to encourage the adoption of means to bring these unused oysters into commerce, and the present oyster law should be so amended as to permit this discretion to be exercised by the commission.

In conclusion, it is our hope that we have shown that Louisiana owns, in her oyster bottoms, a veritable gold-mine. Indolence and poverty will not develop this vast vault of riches. It requires labor and capital, intelligence and industry. The door needs but to be opened, and the key is in the hands of the members of our State legislature.

The key is intelligent legislation that will provide:

2316 *First. That the oyster commission shall be vested with great discretion in matters concerning the oyster industry.*

Second. That the shallow water natural reefs shall be preserved for the poor man, who must, in turn, not be permitted to destroy these reefs.

Third. That the industrious man or company must be permitted to lease from the State and cultivate as many acres of barren bottom as he desires, not to exceed five thousand (5,000) to any one person or company.

Fourth. That each bedding ground lessee must be given the right to use such implements as he chooses in cultivating and gathering his own crops on his leased bedding grounds.

Fifth. That the oyster cultivator must be permitted to sell his own crop when he chooses.

Sixth. That in open waters and those too deep to be fished with hand-tongs, other means must be permitted to gather these oysters otherwise useless to man.

If such law be adopted, we shall, in less than ten years, see the State receiving a net annual revenue of one million dollars ($1,000,000) from these vast water bottoms belonging to her, and this amount will annually increase by leaps and bounds.

When we stop to think what a world of good could be accomplished with these funds in the matter of the education of our youth and the building of good roads throughout our State, we feel that the intelligence of our legislators will respond to the necessities of the occasion and secure to Louisiana the enjoyment of her lawful and logical rights.

8 MISS. DOCUMENT No. 85.

Copy.

BILOXI, MISS., November 5, 1902.

his excellency A. H. Longino, governor of Mississippi.

SIR: We have the pleasure to transmit to you, herewith, a certi-
d copy of a resolution passed by the mayor and board of alder-
en of the city of Biloxi at their regular monthly meeting held in
e city hall on yesterday, the 4th inst. In transmitting this reso-
tion, we desire to call your attention to a few important facts in
nnection with the subject matter, to-wit:

1st. The territory in controversy, and concerning which a suit
s been filed in the Supreme Court of the United States by the
ate of Louisiana against the State of Mississippi, has been under
e control of the State of Mississippi, as we are informed and be-
eve, for so long a time that the memory of the oldest inhabitants
this section runneth not to the contrary.

2nd. It is our opinion that the State of Mississippi owns the ter-
tory in controversy, and we believe that, even though there is a
oubt as to whether said territory belongs to Mississippi or Louisi-
na, Mississippi and Mississippians have as much right therein as
ouisiana and Louisianians during the pending of the suit in the
nited States Supreme Court over the boundary line between the
tates of Mississippi and Louisiana.

3rd. The oyster reefs within said territory have been a source of
enefit, revenue, and profit to Mississippi and the citizens thereof.

4th. The State of Louisiana, whether under and by virtue of any law of that State or not, has invaded the said disputed territory and is patrolling the same with an armed force, for the purpose of preventing Mississippi oyster men from catching oysters upon the oyster reefs within said territory.

5th. This action upon the part of the State of Louisiana or its authorities, is working great hardship and becoming very prejudicial to the interests of the State of Mississippi and its citi-
2319 zens; and, as result thereof, a large number of the citizens of Mississippi, to-wit; about one hundred, owning oyster boats to the value of about one hundred thousand dollars, have gone and are going into the State of Louisiana, and have there taken out, and are taking out licenses in order to evade arrest by the authorities of Louisiana for catching oysters upon the oyster reefs within said disputed territory.

6th. The law passed by the last legislature of the State of Louisiana, as Your Excellency will remember, forbids any oysters caught within the boundaries of Louisiana to be brought into the boundaries of Mississippi for any purpose whatever.

7th. It is our opinion that it is the duty of the executive of the State of Mississippi to see that the law is enforced to the extent that the rights of Mississippi and Mississippians in said disputed territory are fully protected.

In view of the foregoing matters, and in behalf of the mayor and board of aldermen of the city of Biloxi and the citizens of the entire coast section, we would respectfully and earnestly request and urge that Your Excellency come to the coast for the purpose of fully investigating and becoming acquainted with the situation as it is, to the end that the rights of Mississippi and Mississippians in the territory in controversy may be accorded the protection that justice demands.

Trusting that Your Excellency may see fit to grant the request herein made, and assuring you of our hearty co-operation in every way possible in this matter,

We beg to remain,

Very respectfully yours,

t a regular meeting of the mayor and board of aldermen of the of Biloxi, held November 4, 1902, the following communication presented:

o the hon. mayor and board of aldermen of the city of Biloxi.

GENTLEMEN: At a meeting held in the Fireman's hall, Nov. 3rd ., composed of citizens directly and indirectly interested in the iness of catching and canning and shipping oysters, 'the unlaw- usurpation of a part of the public oyster reefs belonging to the te of Mississippi' was discussed, and we, the undersigned, ap- nted a committee to present to your honorable body a request for in behalf of the aforesaid citizens that you communicate offi- ly to his excellency, Hon. Gov. A. H. Longino, the above men- ed unlawful usurpation of the rightful property belonging to the zens of the State of Mississippi, requesting his personal investi- ion and the assistance of his executive authority in the protection he lawful rights of the citizens of this State. We ask the con- eration of your honorable body and stand ready to answer to the t of our ability and knowledge all questions concerning the tter.

Very respectfully,
(Signed) E. C. JOULLIAN.
E. M. BARBER."

he following resolution was introduced and adopted:

Resolved, That it is the sense of the mayor and board of alder- n of the city of Biloxi, in view of the unsettled condition of the ndary dispute between the States of Mississippi and Louisiana, olving, as it does, the question of the rights of Mississippians to oysters in the oyster beds which have been under the control Mississippi from time immemorial, that it is the duty of the ernor of the State of Mississippi to make a trip to the coast to familiarize himself with the conditions surrounding the l question: and to this end, T. J. Rossell, E. Gennan, and Buck Chinn, members of this board, are, by order of said mayor board of aldermen, appointed as a committee to act in conjunc- with E. M. Barber, and E. C. Joullian, the committee appointed the citizens' meeting to confer with this board on said question, draft a letter to the governor of the State of Mississippi, express- to him that it is the desire of this board and the entire commu- that he look into this matter and protect the interests of sissippi in said territory.

Further ordered, that the above resolution be spread upon the utes and a copy thereof forwarded to the governor."

STATE OF MISSISSIPPI,
County of Harrison, City of Biloxi,

I, O. G. Swetman, clerk of the mayor and board of alderme
the said city of Biloxi, do hereby certify that the above and

2322 MISS. DOCUMENT NO. 86.

(On Cover.)

Report of special committee appointed to investigate the subj
matter of the bill to provide for defraying the expenses of t
State of Mississippi in the case of The State of Louisiana *vs.* T
State of Mississippi, now pending in the Supreme Court of t
United States, wherein the boundary lines of said States are
dispute.

(The Tucker Printing House, Jackson.)

2323 Report of special committee appointed to investigate the su
ject-matter of the bill to provide for defraying the expenses
the State of Mississippi in the case of The State of Louisiana
The State of Mississippi, now pending in the Supreme Court of t
United States, wherein the boundary lines of said States are
dispute.

Mr. President:

Your committee appointed to investigate the subject-matter of th
bill to provide for defraying the expenses of the State of Missi
sippi, in the case of The State of Louisiana *vs.* The State of Missi
sippi, now pending in the Supreme Court of the United States, wherei
the boundary lines of said States are in dispute, beg leave to re
port:

That on investigation and from the testimony of the most reputable witnesses, composed of the business men of the beautiful, thriving and growing city of Biloxi, and from a personal investigation of the enterprises and industries dependent upon the property now in dispute between the States of Louisiana and Mississippi, and claimed by the State of Louisiana, we state the following to be facts, amply supported by undisputed and undeniable evidence of the highest character, and the existence of enterprises and industries of which Mississippi should be proud and from which she is now deriving a large revenue and will derive a larger as the years go by:

1st. That the territory in dispute in said case and claimed by the State of Louisiana of and from the State of Mississippi, exceeds three hundred square miles.

2d. The said territory in dispute is worth to the State of Mississippi, and her people, ten times all the oyster and water territory in the State of Mississippi not in dispute.

3d. That said territory in dispute, based on the lowest estimate, is of the value of two millions of dollars, and will increase in value.

4th. That the Mississippi Oyster Commission, at its last report, reported for the years 1902 and 1903, that there had been
2324 collected from the oyster business in Mississippi the sum of $14,020.45, and the expense $11,982.67, leaving a balance of $2,057.88, which was turned into the State treasury. That the larger part of said expense was paid out for the purpose of planting oysters, and the building up of reefs in the waters of Mississippi sound. So it will be seen that the expense money is devoted to a purpose which results in the increased value of said territory, and therefore, the revenue therefrom, to the State of Mississippi, is increased yearly, and we are informed that the last year that has not yet been reported will show a large increase in its revenue therefrom to the State.

5th. That there are five large canning factories in operation in the city of Biloxi, and four shippers of raw oysters, and the volume of said shipping and canning business in said city of Biloxi amounts to one million dollars per annum, and one-half million of dollars is invested in said business, and all of this is in the city of Biloxi.

6th. That taking into consideration said business all along the coast in the State of Mississippi, including Biloxi, the volume of said business exceeds a million and a half dollars per annum, and it takes, and there is used in each year, to operate said business more than a million and a quarter dollars in cash, and the daily number of employees in the cannaries alone, is about one thousand, and more — three hundred boats and twelve hundred employees engaged in catching the oysters, and the daily pay-roll for labor in handling the oysters amounts to over one thousand dollars, and for catching the oysters one thousand and five hundred dollars per day. And the average value monthly of the oysters caught is about one hundred and twenty-five thousand dollars for the cannaries alone, and does not include those caught for the raw shipments of shrimp

business, which is large, and the sales of one firm, "Lopez & Dukate," for the month of February, 1904, amounted to ninety thousand dollars.

7th. The oyster catch for this year will amount to eight hundred thousand barrels, and the shrimp business amounts, at Biloxi, to fifteen thousand barrels, which are worth sixty thousand dol-
2325 lars, in their raw state and two hundred thousand dollars in their finished state.

8th. That all of the foregoing figures were doubled year before last, at which time oysters were caught from the territory now in dispute and claimed by Louisiana. And if Louisiana succeeds in winning the territory that she claims, it will have the effect to virtually destroy the oyster and shrimp business in the State of Mississippi, and the property of our citizens invested in said business will be completely lost and they suffer irreparable injury, and the State of Mississippi suffer a loss of about three hundred square miles of her most valuable territory.

We can form no definite opinion as to which State will win out in said case, as the determination of the issue involved depends upon a construction of the acts of Congress, admitting the said States into the Union, with reference to the boundary lines of said States as fixed by said acts of Congress, and also upon what has been the recognized boundary lines of said States and other questions of fact.

Your committee find that in addition to the immense interests this State has in the oyster and fish industry, that the "deep water channel" claimed by Louisiana to be the dividing line between the two States hugs the Mississippi shore across Hancock and part of Harrison counties, and if her claim should be established, it would be a menace to our commercial and maritime interests, especially as to the deep water channel constructed out of Gulfport by the Gulf and Ship Island Railroad Company. The contention of our State, as set up by her answer and cross bill, to the effect that Congress in creating States, out of the Gulf coast territory did not intend that one State should dominate the mouths of the rivers and the water front, and that Louisiana had her three league reach to her south, and that Mississippi has her six league reach to her south, both seaward. It cannot fail casual observation that Louisiana in her three league reach around the mouth of the Mississippi to the Sabine, has more sea frontage than Mississippi with her six league limit from Pearl river to the Alabama line.

2326 Your committee further find, as it believes, that Louisiana has been preparing, as she had the right to do, for several years to make this contest, and that she has not spared means to present her case strongly. In addition to the active services of her historical society, which, as we are informed, has been both diligent and discreet in gathering pertinent data, she has to assist her Attorney-general, Hon. Walter Guion, and his assistant attorney-general, Lieutenant-Governor Albert Estopinal, Judge Zachrie and Mr. John Dymond, Jr., of New Orleans, and Mr. Alexander Porter Morse, a

ry eminent lawyer at Washington, who was lately official attor-
y for the District of Columbia.
Hon. Monroe McClurg had followed the case closely from the be-
nning of the suit, and we approve of his being retained under the
tute to aid General Williams, whose duties would not permit him
spend months in taking testimony and following the case to
ashington. Mr. McClurg immediately employed Judge Hannis
ylor to aid him. We approve this: Judge Taylor was our min-
er plenipotentiary to Spain at the outbreak of the Spanish-Ameri-
n war; he is now professor of international law in the Georgetown
. C.) law school. He was one of counsel in the great Alaskan
undary case, and the author of the Origin of the English Consti-
tion and of International Law, both of said works being pro-
ounced by competent judges as being among the best of their kind
print. Mr. Taylor is a native Mississippian, but was a member
the Mobile bar when appointed minister to Spain. We regard
s selection a wise one. Governor Longino also employed Messrs.
odd & Griffith, of Biloxi, as he did General McClurg, to look to the
gislature for compensation; they are practitioners in the storm
nter of the controversy and are valuable, not only because of their
nown legal ability, but because of their opportunity to gather per-
nent testimony for our State.

It is deemed not out of place to say here that our side is making
od progress, the State of Louisiana has already served notice to
withdraw a great portion of her bill and exhibits, and which
327 our attorneys will resist. March and April have been agreed
upon for Louisiana to take her testimony, while our State
ill take May, June and July, with August and to September 15th
r Louisiana to rebut, and then Mississippi to October 1st, when
ne evidence is to close and be printed, and the case will most likely
e ready for hearing by the first of next January.

Therefore, in view of the foregoing facts hereinbefore stated, we
elieve that it is the duty of the State of Mississippi, to defend said
ase and contest the claim of Louisiana to said territory, and defend
nd protect her title to said territory, and above all protect the pri-
ate property of her citizens that is necessarily effected by the issues
nvolved in said case, and to furnish all money necessary to that
nd.

We, therefore, recommend that senate bill No. 60 do pass.

Respectfully submitted,

PATRICK HENRY, Chm.
W. J. CROOM,
E. H. MOORE,
H. BLOOMFIELD,
H. H. ELMORE,
Committee.

Original.

Report on the agriculture and geology of Mississippi, embraced in a sketch of the social and natural history of the State, by B. L. C. Wailes, geologist of Mississippi, member of the American Association for the Promotion of Science, corresponding member of the Natural Institute, and of the Boston Society of Natural History, etc., etc.

Published by Order of the Legislature.

E. Barksdale, State Printer.
1854.

1. Historical Outline.

The State of Mississippi lies between the thirty-first and thirty-fifth parallels of north latitude, with the addition of that portion lying between the first mentioned parallel and the gulf of Mexico and Lake Borgne and east of Pearl river. On the west it is bounded by the Mississippi and Pearl rivers, and on the east by a line dividing it from the State of Alabama, which is drawn from the mouth of Bear creek on the Tennessee river to the northwestern corner of Washington county, Alabama, and thence south to a point on Grand bay on the gulf of Mexico, about seventeen miles due west from the bay of Mobile. The State also embraces the islands in the Gulf within six leagues of the northern shore, the principal of which are Horn, Ship, and Cat islands.

The width of the State along the northern boundary is one hundred and twenty miles; on the sea shore seventy-eight miles; and along the 31° of north latitude one hundred and eighty-six miles. The greatest length from north to south is three hundred and thirty miles. It embraces an area of 55,500 square miles or 35,520,000 acres.

liminary report on the geology and agriculture of the State f Mississippi, by L. Harper, L. L. D., correspondent of the Im-erial Museum for Nat. Science of France, etc., State geologist of Mississippi.

By Order of the Legislature of Mississippi.

E. Barksdale, State Printer.
Jackson.
1857.

Geographical Description of the State of Mississippi.

The State of Mississippi is bounded, north, by Tennessee; the ndary line, which separates it from the latter State, agrees with 35 degree of N. lat. It commences W. on the Mississippi river, g. 90° 18′, divides Horn lake in two parts, leaving only a part of southern arm in the State of Mississippi, and comes out of the e exactly below a ridge of hills, reaching the lake from the E. From there, that boundary line continues to the Tennessee river, king this river under the 88° 13′, of long. from Greenwich. From re to the mouth of Big Bear creek under the 88° 7′, the Ten-see river forms the boundary line of Mississippi, leaving a small ner within the square of the State between it and Tennessee, to State of Alabama.

From the mouth of Big Bear creek, from the 88° 7′, of long. from eenwich, the State *if* is bounded E. by Alabama, the boundary e going from that point in a direction of about S. S. W., or more ictly S. 15° W., to a point under lat. 32° 8′, long. 88° 38′, from which point it turns again a little E., and goes S. 15° E. to the 31 gulf of Mexico, which it reaches in lat. 30° 25′, long. 88° 18′.

From the latter point to the mouth of Pearl river, lat. 30° ′, long. 90° 25′, the gulf of Mexico forms the boundary of the con-ental part of the State, not excluding, nevertheless, a number of nds, of which Round, Horn, Ship, Deer, Cat, and Aupied islands the principal.

From the latter point, lat. 30° 13′, long. 88° 18′, in the mouth of arl river, this river makes the W. boundary of the southern part Mississippi, to lat. 31°, long. 88° 45′, separating the State from t of Louisiana.

From the latter point on Pearl river, lat. 31°, long. 89° 45′, the uthern boundary line, which separates Mississippi from Louisiana, rresponds with the 31° of N. lat. to the Mississippi river, in long. ° 41′.

From this point, in lat. 31°, long. 91° 41′, to the line of Tennessee, in lat. 35°, long. 90° 18′, the principal channel of the Mississippi river forms the western boundary line of the State, and separates its southern part from the State of Louisiana, and its northern part from Arkansas.

The territory, on whose geology I have the honor of reporting to the legislative body of the State, extends, therefore, according to the above geographical description, from the 35° of N. lat. to lat. 30° 13′, and measures, in its greatest latitudinal extent, 287 geographical, or 331.65 statute miles.

In longitude it extends under the 31° of N. lat. from the Alabama line, in long. 88° 23′, to long. 91° 41′, on the Mississippi river, and measures, in its greatest longitudinal extent, 198 geographical, or 227.7 statute miles.

The State has the smallest latitudinal extent west of Pearl river, where the southern boundary line follows the 31° of N. lat. It measures there in length 4° *degrees*, from the 31st to the 35th, or 330 geographical, or 276 statute miles; and width, from long. 88° 23′, on the Alabama line to long. 89° 45′, on Pearl river; extending over 1° 11′, or 71 geographical, or 81.65 statute miles.

The area comprehended in the territory of the State of Mississippi comprises, according to a careful calculation, about 45,468 square miles or 29,099,520 acres of ground, which is divided as follows among the different geological formations in the State:

CHAPTER XL.

An Act to Provide for the Printing of the Second Annual Report of the Agricultural and Geological Survey of the State, and for Other Purposes.

SEC. 1. Be it enacted by the legislature of the State of Mississippi, That so much of "An act to further endow the University of Mississippi," approved March 15th, 1850, as appropriates out of the treasury three thousand dollars per annum to aid in making an agricultural and geological survey of the State, and also so much of said act as connects the said survey in any manner whatever with the university, be, and the same is hereby, repealed.

SEC. 2. Be it further enacted, That the agricultural and geological survey of the State shall be prosecuted and completed, according

the provisions of the above recited act, and of any act entitled An act to authorize the printing of the first annual report of the gricultural and geological survey of the State," approved March t, 1854, by a State geologist, to be appointed by the governor.

SEC. 3. Be it further enacted That the State geologist shall keep is office in the city of Jackson, and shall receive a salary of two ousand dollars per annum, to be paid quarterly, upon the requisition the governor, and shall also be furnished with such an outfit as may e necessary to be provided under the direction of the governor; he all also keep an exact account of his expenses in making his sur- ey, and submit the same to the examination of the governor, who all issue his requisition upon the treasury for the amount, pro- ided the sum shall not exceed one thousand dollars per annum.

SEC. 4. Be it further enacted, That twelve hundred dollars be, and he same is hereby appropriated, out of any money in the treasury ot otherwise appropriated, for the purchase of suitable apparatus r making the analysis provided for in the above recited acts. The pparatus shall be purchased under the direction of the governor, nd shall not cost, including all expenses in procuring the same, ore than the same herein appropriated.

SEC. 5. Be it further enacted, That the State geologist may occupy a laboratory the two front rooms in the second story of the Peni- ntiary building, and shall be allowed the assistance of one con- ict, to be named by the inspectors, to aid him in keeping his ap- aratus in good order.

SEC. 6. Be it further enacted, That five thousand copies of Pro- ssor Harper's report be printed, under the direction of the gov- nor, to be bound in boards, with such plates, charts, and wood- uts therein, as His Excellency may deem appropriate and neces- ry for its illustration.

SEC. 7. Be it further enacted, That when said report shall be rinted and bound, it shall be distributed according to the provis- ions of the last recited act.

333 SEC. 8. Be it further enacted, That a sum not exceeding three thousand five hundred dollars be appropriated, to be rawn from the treasury upon the requisition of the governor, for e purpose of carrying into effect the sixth and seventh provisions this act.

SEC. 9. Be it further enacted, That Professor Harper shall be en- tled to receive a salary at the rate of two thousand dollars per annum, om the first day of November, 1856, to the first day of March, 1857, being necessary to allow him time to finish writing out his re- ort.

SEC. 10. Be it further enacted, That the State geologist to be ap- ointed under the provisions of this act, shall enter upon the dis- harge of the duties of his office on the first Monday of March, 57, and this act shall go into effect from and after its passage.

Approved January, 31, 1857.

CHAPTER XXXVIII.

An Act Entitled An Act to Provide for the Appointment of an Harbor Master for Ship Island Harbor, and for Other Purposes.

Be it enacted by the legislature of the State of Mississippi, That the governor of the State shall biennially appoint an harbor master for the harbor of Ship island and for other harbors and anchorages upon the sea coast of Mississippi, to superintend the delivery and unloading of ballast within such place.

SEC. 2. Any harbor master may continue to act until his successor is appointed and qualified, or if any person appointed shall fail to act, or a vacancy in said office should otherwise happen, the board of police of Harrison county shall fill such vacancy, and such person so appointed by said board shall continue to perform the duties of said office until his successor is duly appointed and qualified.

SEC. 3. The harbor master may appoint one or more assistants, and all the provisions of this act in respect to the harbor master shall apply to such assistants. If any person after accepting the said office shall fail in any duty prescribed in this act, he shall forfeit and pay the sum of one hundred dollars to any person who will sue for the same, one half for the use of the State.

SEC. 4. The said harbor master shall be entitled to receive for his services the sum of two hundred dollars per annum, to be paid him out of the State treasury and the auditor of public accounts is hereby authorized to draw his warrant in favor of the said harbor master, upon exhibition of his certificate of appointment.

SEC. 5. Every harbor master on receiving information that ballast is to be discharged from any vessel in such harbor, roads or anchorage, shall go on board such vessel and attend until the whole is unloaded. He shall see that it is brought on shore, or in water not more than four feet deep, and laid in some convenient place where it will not obstruct navigation, nor be washed or rolled in the channel, and thereupon he shall give to the commander of such vessel a certificate that his ballast has been duly unladen from on board his vessel, on being paid by such commander the sum of three dollars per day for each day's attendance.

SEC. 6. Every commander of a ship or vessel having ballast to

unload shall give notice in writing to some harbor master of the time when he intends to unload the same. If any such commander shall land, or cast overboard any ballast, without having given such notice, or otherwise than according to the directions of an harbor master, he shall forfeit and pay the sum of five hundred dollars, to be sued for by said harbor master, who is hereby authorized to proceed for the recovery of the same by attachment or otherwise.

SEC. 7. If a commander of any vessel, from which ballast has been unloaded, shall, when required by any ballast master, justice of the peace, sheriff, coroner, constable, or freeholder of the county or town adjacent to, which said vessel may ride, fail to produce the certificate of the harbor master, he shall forfeit and pay the sum of fifty dollars.

SEC. 8. If the commander of any vessel, or any person on board thereof, shall cast into the channel of the harbor of Ship island, or any other harbor, road, or anchorage, within the jurisdiction of this State, any ballast, stone, or other heavy articles, he shall forfeit and pay the sum of five hundred dollars to any one who shall sue for the same, one half to the use of the State.

2335 SEC. 9. All justices of the peace, sheriffs, coroners, constables, harbor masters, members of the board of police and corporate authorities of the towns and counties of Jackson, Harrison, and Hancock, are hereby required to bring suit immediately against any commander of any vessel, or other person offending against the provisions of this act, and if any such officer on receiving information of such violation shall fail to institute suit against such persons, — shall be deemed guilty of a misdemeanor, and on conviction shall be fined in a sum of not less than ten nor more than fifty dollars.

SEC. 10. This act shall take effect and be in force from and after its passage.

Approved, November 19, 1857.

CHAP. CXXV.

Memorial of the Legislature of the State of Mississippi.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the legislature of the State of Mississippi respectfully represents: That it is important that light houses should be erected at the Rigolets, Joseph's island, at the mouth of Pascagoula and Pass Christian, on the waters of Lake Borgne; that the citizens of this State are extensively engaged in commerce on the whole coast, from Mobile to New Orleans, in the transportation of lumber, wood, sand, lime, and cattle; that the Rigolets is the only entrance into Pontchartrain to New Orleans; that the entrance into the lake cannot, by the most experienced navigator, be discovered at night, because no object presents itself at the entrance but a dreary marsh, which at night is difficult to avoid; that for the want of a light at Joseph's island, vessels frequently mistake the channel and either get aground or are wrecked; that the contractors for the transportation of the United States mail by steam boats, from Mobile to New Orleans, could not comply with their contract except by hiring in-

dividuals to suspend lamps at their private expense, and for the want of lights at other points the contract has been totally abandoned. The importance of the light houses as a means of facilitating the commerce of other States who navigate the waters of Lake Borgne and Pontchartrain, must be well known to your honorable body. We, therefore, pray that an appropriation may be made to carry into effect the object of this memorial.

Resolved by the senate and house of representatives of the State of Mississippi, in General Assembly convened, That a copy of this memorial be transmitted by the governor of this State to our Senators and Representatives in Congress.

CHAPTER 150.

Joint Resolution to Congress for a Light-house on the Shoal or Middle Ground between Pass Christian and Pass Mary-Ann.

Resolved, by the legislature of the State of Mississippi, That our Senators in Congress be instructed, and our Representatives be requested, to use their exertions to procure the passing of a law by Congress, with an appropriation, to build a light-house on the south point of the shoal or middle ground between Pass Christian and Pass Mary-Ann, nearly west of the Cat Island light-house, in order to enable vessels to find and use said Pass Mary-Ann in the night, which is now impracticable, and very hazardous for the want of such light-house, and in consequence of Pass Christian being so crooked, narrow, and shallow, our commerce in those waters is thereby frequently retarded and much time often lost by the steamboats carrying the mail between New Orleans and Mobile, as said boats often get aground in said Pass Christian.

Be it further resolved, That the governor forward each of our Senators and Representatives in Congress with a copy of the above resolution.

Approved February 7, 1840.

CHAPTER 148.

To the Senate and House of Representatives of the Congress of the United States:

Your memorialists, the legislature of the State of Mississippi, would respectfully but earnestly call the attention of the Congress to the importance of erecting and establishing, on the southern coast of this State, suitable naval fortifications, and a minute survey of the bays, sounds and harbors within, and adjacent to the State.

It will be remembered by your body, while our Atlantic States are amply provided with highly useful and necessary fortifications,

that there is but one naval depot in the whole southwest; and, consequently, the long extent of our coast is not only defenceless, in this particular, but completely exposed to the inroads of those who may become our enemies.

No section of the whole country can claim, over the cotton growing States, any substantial reason why less adequate means of protection should be extended to the Atlantic States than to the States of the South. The commerce of the South is annually increasing, and promises, within the circle of a few years, to be equal to any portion of the Union; that great staple has a market chiefly abroad, and for the products of their soil and agricultural labour, receive a return in the shape of commercial commodities, to supply the demands of the whole valley of the Mississippi; and to swell the commercial business of these States to an extend to need the strong arm of protection from the country, that the commerce of all nations requires at the hands of their Government, when exposed to the aggression of those that for any reason may become antagonistical in their intercourse. We do not hesitate to say, that the commerce of the United States will be more assailable in this quarter for foreign assaul- than any other section of the continent, and with the most limited means of defence. It is a matter of regret that our country and its vast peculiarities and recourses are so little known, and so lightly regarded; and that inaccurate surveys and partial reports, made by incompetent persons, constitute almost every thing that can be referred to for information in the archives of the country. As little as it is generally understood, it is nevertheless true, that, in an extent of facilities and importance, the coast of Mississippi presents harbours, soundings, &c., as well as adapted for the anchorage of ships of war of the largest class, and the easy, uninterrupted purposes of commerce, as the most approved favorite points elsewhere.

None of the States are more accessible to invasion, by sea, than our coast, and during the last war, the want of a proper defense was most seriously felt in the easy invasions of Louisiana through this channel of internal communication; and but for the decisive triumph of our soldiery, at the memorable conflict of 1814 and '15, the most calamitous results might have happened to our southern cities and towns, which time to this day might have not subdued or mitigated. It is also painfully true, that in the invasion of the Southern States, by the British, it was found that the English surveys of the southern coast, made years before, when the country was an unbroken wilderness, were far more extensive and complete than any information furnished by the departments at Washington, or in the possession of the officers
2343 of either the army or the navy, assigned on duty in this section of the country, during the time of the invasion; a whole fleet of the British navy found an easy ingress to our shores, and one of the largest men of war, anchored off Cat island during the time, and by its position was enabled to command the whole pass, yielding the greatest succour to their own forces, and entirely cutting

our means of attack or defence; since the war very few examina-
ns or surveys have been made, and the departments may, even
, be said to be destitute of this most desirable information.
In the support of the necessity of erecting suitable naval fortifica-
ns on this coast, to the reason stated before, may be added the
t, that the whole country around is most abundantly clothed with
growth of live oaks, eminently fitted for the construction of
ry description of vessels; and the quality, not inferior to the
wth of that valuable wood in any region, on this account, not
y would the United States, in point of economy, study the inter-
s of the country, (but at the same time build up a most important
ence for the whole country). The coast of Mississippi immedi-
ly on the gulf of Mexico has been invariably considered the
lthiest point in the Southern States, and is the usual resort of our
zens during the season of sickness and the visitation of epidemics,
ere they are enabled to remain with perfect security. There has
er been a solitary instance of the fatal fevers (epidemical) of the
th that originated on the coast, while in other particulars no
t can be selected freer from disease either on account of location
climate.
So far as any risk from exposure to sickness to those who may be
ployed in the erection, or detained in or about the proposed
ifications, is concerned, the Government may not have the
htest fears or objections. And that the proposed works will meet
united consent and approbation of the whole South, we do not
itate to assert; and we would, therefore, with all due deference,
reat your honorable body to a full investigation of the subject
l a speedy action thereon.
n conclusion, we would again revert to the importance of taking
mediate steps to have an accurate survey and examination made
his coast, so essential to southern interest, as being not only of
t utility to the department at Washington, but useful to our
ble citizens; and when it is remembered, that other nations, in
ir scientific explorations, are possessed with a knowledge of some
our harbours and coast, superior to what we ourself possess, it
be readily conceded that our safety, to a small extent, is greatly
ardized and compromitted.
f national pride would not stimulate us to the performance of
duty, at least a regard for the defence and protection of the
ntry loudly demands that this branch of the public duty be no
ger neglected or delayed.
Therefore, resolved, that our Representatives in Congress, be re-
sted, and our Senators instructed, to use their utmost means to
cure the passage of a law, by Congress, to cause the erection of
al fortifications at some suitable point on the southern coast of
State, and cause an accurate survey and examination to be
le of the different harbors and sounds of said coast.
pproved February 22, 1840.

CHAPTER 196.

Resolutions Requesting the Congress of the United States to Remove the Custom House from Pearlington, on Pearl River, to Shieldsborough, on the Bay of St. Louis.

Whereas, the present location of the custom house at Pearlington is extremely inconvenient to a large portion of the owners of vessels interested in the custom house, for the reason that Pearlington is situated on the extreme western border of this State, and the said location at Pearlington is not of easy access, owing to the fact that it is some ten miles above the mouth of Pearl river, which is, at certain stages of water, of difficult access to vessels propelled by wind, in consequence of the current of the river; and, whereas, nine-tenths of the vessels interested in the location of the custom house, are owned and navigated by persons living to the eastward of said location at Pearlington; and, whereas, Shieldsborough, situated on

of St. Louis is about twenty-five miles from the western , and about fifty miles from the eastern boundary of this l is not more than two miles from the usual route from ans to Mobile, thus presenting a location as nearly central e conveniently had; thus it is seen that Shieldsborough is in every respect more suitable than Pearlington: Therefore ed, That our Senators in Congress be instructed, and Repre- s requested to use all proper exertions to have the custom ow located at Pearlington, removed to Shieldsborough, on of St. Louis.

CHAPTER 307.

le and Resolutions Asking Congress to Erect Light Houses, tablish a Mail Route on the Sea Coast of Mississippi, &c.

reas, that portion of the State of Mississippi bordering on lf of Mexico, is rapidly improving in population, commerce vigation, and its people and interest are suffering greatly for f that attention from the General Government which has generally extended to our northern and eastern sea coasts, way of light houses, to guide our hardy and tempest tossed ers—protect their lives and the property of our citizens; and as the last acquisition of the extensive territory of Texas, ex- g our possessions to the south and west on the gulf of Mexico, great additional importance to every part of those waters, and ade and commerce passing through them, and the apprehen- t present of a rupture with our old British foe, and our liabil- any time to the difficulties with foreign powers, render the t of our wholly unprotected sea board, in every way, of the st importance to the General Government, and particularly to States, more immediately the subjects of such neglect; and as, our entire sea coast is deprived of such mail facilities from o the cities of New Orleans and Mobile as are extended to t every other portion of our country similarly situated, which tter of the most serious importance in the present advanced and rapid progress of physical knowledge, and as our whole oard is entirely unprotected in case of invasion: Therefore—

Be it resolved by the legislature of the State of Mississippi, That our Senators in Congress be instructed, and our Representatives requested, to use their best and untiring exertions to get laws passed to the following effect, viz: First, a law making an appropriation for building light houses at Biloxi, Mississippi City, and Pass Marianne, at such places as may be deemed suitable, to be selected by direction of the Secretary of the Treasury. Second, a law establishing a mail line by steam from New Orleans to Biloxi and back, touching regularly each way at Fort Pike, Shieldsboro, Pass Christian, and Mississippi City, once a week each way in the winter, and twice a week each way in the summer: Provided, said contract shall not let for a sum exceeding $8,000.00 per annum. Third, a law appropriating the sum of $5,000.00 to clean out and deepen the channel to Biloxi, at the west end of Deer island, and a like sum to deepen the channel on the bars at Pass Christian. Fourth, a law reserving Ship island from sale, and making an appropriation for building a fort and navy yard or naval depot, on the west end of said island, and barracks in or near the center of said island, as a place of summer resort for U. S. troops to avoid sickness, and where their services may be of utility in building such fort.

Chapter 46, Laws of Mississippi, 1854.

An Act to Authorize the Printing of the First Annual Report of the Agricultural and Geological Survey of the State.

Section 1. Be it enacted by the legislature of the State of Mississippi, That two thousand copies of the report of Prof. B. L. C. Wailes, State geologist, be printed under his supervision in quarto form, and in such manner and with such illustrations and plates therein given as his excellency the governor shall deem appropriate and necessary, for its illustration.

Sec. 2. Be it further enacted, That when printed and bound, the said report shall be deposited in the office of the secretary of state, to be by him distributed as follows: Fifty copies to be deposited in the State library, twenty-five copies to be deposited in the State university, one copy in each State in the Union, one copy to be given to each incorporated college and academy in the State, one copy

h to the governor, secretary of state, auditor of public accounts, te treasurer, adjutant general, the chancellor and vice chancel-s, the judges of the high court of errors and appeals, the attorney eral, the judge and district attorney of each district, each mem- of the present senate and house of representatives, and one hun- d copies to the State geologist, to be by him exchanged for simi- reports from other States, and to furnish the scientific societies l public libraries.

EC. 3. Be it further enacted, That one thousand copies of said ort shall be deposited in the office of the secretary of state, to be l by any agent or agents to be appointed by the governor, under h regulations and for such sum each, as he may deem prudent l advisable for the purpose of reimbursing the State for publish- the same, and the balance to be distributed among the several nties of the State in proportion to their representation in the slature to be furnished to the people thereof in such a manner as board of police of the several counties may direct.

EC. 4. Be it further enacted, That previous to the printing of l report, it shall be revised and completed by said State geologist; the portion of it that treats of zoology, as far as prepared, shall mitted, and in lieu thereof a catalogue of the fauna of the State ar as ascertained, be substituted.

EC. 5. Be it further enacted, That a further and more efficient secution of the survey, analysis of the marls, soils, mineral ers and the chief agricultural productions of the State, shall be le at the University of Mississippi, as the trustees may designate, the State geologist may from time to time furnish such marls, , and waters as may be required for analysis, and shall receive, eturn from the chemist, full and precise reports of all analysis ch may be made, and specimens of the marls, and soils shall be erved in convenient glass bottles in the State cabinet and in the net of the university, properly labelled, with the chemical char- r of the substance, and the locality from which the same was ined.

EC. 6. Be it further enacted, That the State geologist shall make collections of specimens to illustrate the mineral character and paleontology of the State, in addition to the geological productions which by law he is now required to collect, and ause them to be suitably arranged and preserved in the State net, and in that of the university, and any duplicates that re- n may be distributed by him among such of the incorporated ges as may apply for them.

EC. 7. Be it further enacted, That the sum not to exceed two sand five hundred dollars *to* be appropriated out of any money e treasury, to be drawn upon the requisition of the governor, he purpose of carrying into effect the provisions of this act.

EC. 8. Be it further enacted, That — act shall take effect and be ree from and after its passage.

CHAPTER CV.

An act to enable the United States of America to obtain a title to St. Joseph island, near the east end of the Rigolets, in the county of Hancock, for the purpose of constructing a lighthouse thereon.

Whereas it is represented that the United States are desirous to acquire a title to a small island on the Gulf coast, near the east end of the Rigolets, called St. Joseph island, situated within the limits of the county of Hancock in this State, for the purpose of erecting a lighthouse thereon, and that they have not been able to obtain from the owner thereof a title to the same, and whereas it is important to the safety of navigation of said coast that the said improvement should be made, therefore:

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That it shall be lawful for the United States of America, by that name, or in the name of any officer thereof authorized for that purpose, on giving five days' personal notice to the owner of said St. Joseph island, or if such owner be not found or known, then on posting such notice for five days at the door of the courthouse in the said county of Hancock, to apply to the circuit court of said county for the appointment of five disinterested persons as commissioners to appraise and value the said island, or such part thereof as may be required for the purpose aforesaid, and the said commissioners, or a majority of them, shall value and appraise the same, and make their report thereof to the said court without delay, under oath, and the said court shall confirm the same, and thereupon the United States and their officers and agents, upon payment or tender of the amount of said valuation to the owner of said island, if he be found or discovered, to enter upon and use the land so valued for the purpose aforesaid, and the said United States shall be invested with the full title to use, occupy and possess the same so long as it may be desired for the purpose aforesaid; and this act shall take effect from its passage.

Chap. XX.

An Act for the Relief of John Quavre.

Whereas, it has been represented to the General Assembly, by the tition of sundry citizens of Hancock county, that John Quavre, of d county, has rendered to the State of Mississippi, and to society general, great service in detecting and bringing to justice, John ker, and Martin Hogan, the first of whom was tried at the last perior court, held in and for said county, for robbery committed the gulf of Mexico, within the boundary of this State, was con- nned and sentenced to death by said court and was executed on 27th day of September last; the latter having made his escape m jail, was not tried.

And, whereas, it is considered important to the interest of this te, that persons should be encouraged in deeds of valor, humanity l patriotism; such as this, is represented to have been, especially relation to the atrocious crimes committed on high-seas and sea- rd—Therefore,

c. 1. Be it enacted by the senate and house of representatives he State of Mississippi, in General Assembly convened, That the of two hundred dollars be paid to John Quavre, for having de- d and delivered to justice, John Baker and Martin Hogan, for ery committed in the gulf of Mexico, within this State, out of money in the State treasury, not otherwise appropriated.

Doc. *a*.

Extract from Letter of W. C. C. Claiborne to George Poindexter, a Member of Congress, of Date Jan. 7, 1812.

"NEW ORLEANS, Jan. 7, 1812.

The Honorable George Poindexter, a member of Congress.

DEAR SIR: I have for some time past anticipated the pleasure of a letter from you. But I see (through the medium of the papers) that you are busily engaged, and can readily find for you an apology. I sincerely wish you success in your application for a State authority:—Territorial governments are at best necessary evils:—they are ill suited to the genius of the American people and should never exist but over small communities, who are neither able nor desirous to manage their own affairs. I cannot however wish success to your efforts to take from Orleans the whole of West Florida:—

Had you designed to give us a moiety for example, had you proposed that the Orleans Territory should extend eastwardly to Pearl river, and the tract of country extending from Pearl river to the Perdido to be attached to the Mississippi territory, I do not know that the plan would be very exceptionable:—But your demand for the whole seems to me somewhat extravagant and if granted by Congress, will in my opinion be highly injurious to the new State of Louisiana (the name the convention has preferred) whose best interests suggest an extension of its eastern boundary. I myself would prefer the Perdido, but we would compromise and take as far as Pearl river, and leave to your State the country on the Tombigbee and Pascagoula and the care of one of the great avenues for the western commerce the mouth of the Mobile."

Doc. *b*.

Original.

Extract from Letter of W. C. C. Claiborne to James Monroe, Secretary of State, of Date Jan. 31, 1812.

"Mess. Fromentin & Magruder are charged by the convention with a memorial to Congress which prays for the annexation of a part of West Florida to the new State. How far the posture of our relations in respect to that district, with foreign nations, will permit the Government to annex permanently, to a State, such part of Florida as lies west of the Perdido, is not for me to determine. But you will permit me to observe that the interests of the new State strongly advise an enlargement of its limits, and I do add that the annexation solicited would, (in my opinion), not only conduce to the convenience and prosperity of the people, more immediately interested but to the national good."

Doc. *c*.

Original.

Extract from Letter of W. C. C. Claiborne to John H. Johnson, Esq., Sheriff of the 7th Court, etc., St. Francisville, Dated at New Orleans, April 20, 1812.

"A bill approving the constitution formed by the Orleans convention has passed the House of Representatives; but I am not advised the details. It is understood, that the country from Pearl river to Perdido, is to be added to the Mississippi territory. But of the disposition to be made of the residue of Florida, I am not informed. I indulge however the pleasing hope that the parishes of St. Tammary, Hellena, Baton Rouge and Feliciana will ultimately form a part the State of Louisiana."

Doc. *d.*

Original.

Extract from Letter of W. C. C. Claiborne to John H. Johnson, Esq., St. Francisville, Dated New Orleans, May 4th, 1812.

"We have information that the passage of the bill, by the two houses of Congress, for the admission of Louisiana into the Union, and by the ensuing mail, shall no doubt, receive a copy of the act as approved by the President.

Florida as far as Pearl river is annexed to Louisiana; but as to the conditions I remain uninformed."

Extract from Letter of W. C. C. Claiborne to William L. Brent, Esq., Attackapas, Dated New Orleans, May 14, 1812.

"We are momently in expectation of receiving official information of our admission into the Union. On the 6th of April a bill approving the constitution passed both houses of Congress, and by the ensuing mail, we shall doubtless receive a copy with the President's approbation. It is understood, that Florida, as far as Pearl river, with the assent of the State legislature is to be added to Louisiana. There are individuals in this city, and some too, who will probably be in the legislature, who would withhold this assent. But I trust a great majority will accede to the proposition with promptitude and pleasure. For myself I shall view such an acquisition of population and territory, as an event greatly interesting to the present and future prosperity of this section of the Union."

Original.

Extract from Letter of W. C. C. Claiborne to the Honorable James Monroe, Secretary of State, Dated Near New Orleans, June 27th, 1812.

"As the tract of country which lies between the Mississippi and Pearl rivers is not yet included within the State of Louisiana, nor annexed to the Mississippi territory, it has been considered as forming at this moment the Territory of Orleans.

If this opinion should be deemed correct, I beg the favor of you to announce to the President my resignation as governor of Orleans, from and after the date of this letter."

Letter from W. C. C. Claiborne to the Honorable Albert Gallatin, Sec'y of the Treasurer, Dated Near New Orleans, 27th June, 1812.

"I have had the honor to receive your letter of the 25th ultimo, and shall in obedience to your directions, close my accounts against

the U. States, for contingent expenses, with the 30th of April, 1812. As that tract of country, which lies between the Mississippi and the Pearl river, is not yet included in the State of Louisiana nor annexed to the Mississippi territory, it has been considered as forming at this moment the Orleans Territory. I do not know that this opinion is correct, but as doubts may arise upon the subject, I have this day, forwarded my resignation as governor of Orleans to the Hon. the Secretary of State for the U. States."

Doc. *f*.

Original.

Letter from W. C. C. Claiborne to Thos. B. Robertson, Esq., New Orleans, Dated New Orleans, July 4th, 1812.

"On the 27th ultimo, in a letter to the Secretary of State, I announced to him my resignation of the office of governor of the Orleans Territory. It would seem by Mr. Gallatin's letter of the 25th of May (a copy of which I requested Mr. Vassant to hand you) that in his opinion no such Territory existed. But as the tract of country, which lies between the Mississippi and Pearl rivers is not yet included within the State of Louisiana, nor annexed to the Mississippi territory an opinion has prevailed that this tract formed for the present the Orleans Territory. I will not undertake to say, that this opinion is correct. But as the ordinance has provided in the event of the resignation of the governor, that his powers shall devolve upon the Secretary. I have deemed it my duty to address you this letter."

2358

Doc. *g*.

Original.

Letter from David Holmes to Governor Claiborne, Dated Town of Washington, 22nd of June, 1812.

"I have seen on a public print an act of Congress to enlarge the boundaries of the Mississippi territory, by which it appears that all the tract of country lying east of Pearl river, west of Perdido, and south of the thirty-first degree of north latitude, is annexed to our territory. In all probability it will be my duty to organize this newly acquired country, and as you have heretofore exercised authority as governor over the same, it is in your power to afford me some useful information in this discharge of this duty. I will, therefore, thank you for the names of the persons that have been commissioned to fill the offices within this district under your government, and any other information which, in your opinion, will aid me in performing this duty."

Extract from a Letter of David Holmes, Governor of the Mississippi Territory, to General Wilkinson, Dated at the Town of Washington, 7th of September, 1812.

"I have erected the whole of that tract of country lying south of the 31st degree of north latitude, east of Pearl river, and west of the Pe-dido, into a county by the name of Mobile. Civil and military commissions were forwarded to Judge Toulmin with a request that he would have them distributed. Since then I have not heard from that part of the territory."

Doc. *h*.

By David Holmes, Governor of the Mississippi Territory.

A Proclamation.

Whereas by an act of the Congress of the United States passed the 14th day of May in the year one thousand eight hundred and twelve, "entitled'An act to enlarge the boundaries of the Mississippi territory," there has been annexed to said territory all that tract of country lying east of Pearl river, west of the Perdido, and south of the thirty-first degree of north latitude, and whereas the same is declared by the act aforesaid to be a part of the said territory, and to be governed by the laws thereof now in force, or such as hereafter may be enacted, and the laws and ordinances of the United States relative thereto, in like manner as if the said tract of country had originally formed a part of the said territory. Now, know ye, that by virtue of the powers in me vested, as governor of the Mississippi territory, and in order that the benefit of the laws and ordinances aforesaid may be extended to the people inhabiting the said tract of country, I do hereby erect the same into a
2359 county, and by these letters made patent do order and declare that the said county shall be called and known by the name of Mobile, and do further declare that the laws of the Mississippi territory, and the ordinances and acts of Congress relative thereto are in force within the said county of Mobile, and that the inhabitants thereof are entitled to all and singular the jurisdiction, rights, privileges and immunities that respectively appertain to the counties of the Mississippi territory, and moreover—I do invite and enjoin the inhabitants of the said county, to be obedient to the laws, to maintain order, and to demean themselves as peaceable citizens.

In testimony whereof, I have caused the seal of the Mississippi Territory, to be hereunto annexed, and signed the same with my hand.

Done at the town of Washington, the first day of August A. D. 1812, and in the 37th year of the Independence of the United States of America.

DAVID HOLMES.

Original.

David Holmes, Governor of the Mississippi Territory—A Proclamation.

Whereas by a proclamation issued by me on the 1st day of August
I did, by virtue of the powers in me vested, erect into a county
e known by the name of Mobile all that tract of country lying
t of Pearl river, west of the Perdido, and south of the thirty-first
ree of north latitude, which said tract of country was annexed to
Mississippi Territory by an act of the Congress of the United
tes, passed on the 11th day of May, in the year of our Lord 1812,
itled An act to enlarge the boundaries of the Mississippi Territory.
d whereas by the aforesaid act of Congress the inhabitants of
l county of Mobile are entitled to one representative in the General
embly of said Territory, now know ye, that I do hereby authorize
l empower the sheriff of the said county of Mobile, to convene
freeholders of the same, on the third Monday in October next,
uch place or places as he may deem most convenient for the said
holders, of which he is to give public notice, for the purpose of
ting one fit person, qualified as the ordinance directs, to repre-
t them in the General Assembly of the Territory. And I do fur-
r empower and direct the said sheriff to cause to be appointed
able persons to superintend the said election as managers. And
reover I do order that said election be conducted in all things
ording to the laws of the Mississippi Territory, in like manner as
he said county had originally formed a part of the said Terri-
.

n testimony whereof, I have caused the seal of the Mississippi
ritory to be hereunto annexed, and signed the same with my
d at the town of Washington, the 17th day of September, A. D.
2, and in the 37th year of the Independence of the United States
America.

DAVID HOLMES.

2366

Supreme Court United States.

STATE OF LOUISIANA, Complainant,
vs.
STATE OF MISSISSIPPI, Respondent. } No. 11, Original, October Term, 1904.

Motion to Set Cause for Argument.

Now, comes The State of Louisiana, complainant, through Walter Guion, attorney general, and John Dymond, Jr., and Frank C. Zacharie, of counsel, and The State of Mississippi, respondent, through William Williams, attorney general, and Hannis Taylor, of counsel, and move the court for an order to have this cause on its merits set for argument for October 10, 1905, and further move the court for an order to grant such additional time for argument, considering the character and importance of the issues involved in this cause as the court may find itself able to grant.

STATE OF LOUISIANA.
WALTER GUION,
Attorney General.
JOHN DYMOND, JR.,
Of Counsel.
STATE OF MISSISSIPPI.
WILLIAM WILLIAMS,
Attorney General.
HANNIS TAYLOR,
Of Counsel.

(Endorsed:) Original, No. 11 Supreme Court of the United ates. State of Louisiana *vs.* State of Mississippi Agreement and otion. Filed —— —, —. —— ——, clerk John Dymond, Jr., torney for ——.

(Endorsed:) Supreme Court U. S. October term, 1904, No. 11, iginal State of Louisiana, complainant, *vs.* State of Mississippi otion to assign cause for argument. Filed May 1st 1905.

7 And on the same day, towit, on the first day of May, A. D. 1905, the following entry appears of record, viz:

And now comes the State of Louisiana, through Walter Guion, its Attorney General, and Messrs. John Dymond, Jr., and Albert Estopinal, Jr., of Counsel, and moves this Honorable Court for permission to file in this Court its bill of complaint against the State of Mississippi, and for process to answer.

Attorney General of Louisiana.

Of Counsel.

Supreme Court of the United States.

No. ———

STATE OF LOUISIANA

versus

STATE OF MISSISSIPPI.

BRIEF ON THE PART OF THE STATE OF LOUISIANA IN SUPPORT OF ITS MOTION TO FILE ITS BILL OF COMPLAINT.

May it please Your Honors:

This proceeding is an action of boundary on the part of the State of Louisiana brought against its adjoining sister State, Mississippi, and relief is sought through the original jurisdiction of this Honorable Court, as provided in Section 2 of Article Three of the Constitution of the United States of America.

We have set forth in our Bill of Complaint the detail of the dispute between the two States. It is as to their respective boundaries as created, described and established by the Acts of Congress of the United States forming the two

States, and your Honors are asked to interpret the meaning of these Acts of Congress and to apply your resulting conclusions in establishing a boundary line in the waters between certain parts of the two States where the disagreement as to their respective rights exists.

The proceeding is not a novel one, as in the course of the history of our Union many similar cases have been heard and decided by your Honors.

In the case of the *State of New Jersey vs. The State of New York*, 5 Peters, 284, the question was first fully considered and it was there held, that the Supreme Court of the United States had original jurisdiction to settle boundaries between States. This decision on this point was affirmed in the cases of the *State of Rhode Island vs. The State of Massachusetts*, 12 Peters, 657; and has been uniformly followed in the cases of the *State of Missouri vs. The State of Iowa*, 7 Howard, 660; *The State of Florida vs. The State of Georgia*, 17 Howard, 478; *The Commonwealth of Virginia vs. The State of West Virginia*, 11 Wallace, p. 39; *The State of Missouri vs. The State of Kentucky*, 11 Wallace, p. 395; *The State of Indiana vs. The State of Kentucky*, 136 U. S. p. 479; *The State of Virginia vs. The State of Tennessee*, 148 U. S. p. 503.

Your Orator therefore respectfully prays that its motion for leave to file its Bill of Complaint be granted, and that process to answer be issued and all other necessary orders be granted.

WALTER GUION,
Attorney General of Louisiana.

STATE OF LOUISIANA

versus

STATE OF MISSISSIPPI.

BILL OF COMPLAINT.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The STATE OF LOUISIANA, one of the United States of America, by WILLIAM W. HEARD, Governor, and upon the information of WALTER GUION, Attorney General, brings this, her Bill of Complaint, against the STATE OF MISSISSIPPI, one of the United States of America, and against ANDREW H. LONGINO, a citizen of the State of Mississippi, in his capacity as Governor of the State of Mississippi, and Monroe McClurg, Attorney General of the State of Mississippi, and thereupon your orator complains and says:—

1st. That the State of Louisiana was admitted into the Union of the United States of America by the Act of Congress, found in Chapter 50 of the United States Statutes at

Large, Volume 2, page 701, approved April 6th, 1812, and therein the boundaries of the said State of Louisiana, in the preamble of said act, were described as follows:—

"WHEREAS, the representatives of the people of all that part of the territory or country ceded under the name of Louisiana, by the Treaty made at Paris on the 30th day of April, 1803, between the United States and France contained within the following limits, that is to say: Beginning at the mouth of the River Sabine, thence by a line drawn along the middle of said River, including all islands to the 32d degree of latitude; thence due north to the northernmost part of the 33d degree of north latitude; thence along the said parallel of latitude to the Mississippi River; thence down the said River to the River Iberville, and from *thence along the middle of said River and Lakes Maurepas and Pontchartrain to the Gulf of Mexico; thence bounded by said Gulf to the place of beginning, including all islands within three leagues of the Coast*" etc. (Italics ours.)

2nd. That according to the foregoing description, the eastern boundary of the State of Louisiana was formed by the Mississippi River, beginning at the northeast corner of said State and extending south to the junction of the said River, with the River Iberville (now known as Bayou Manchac) and thence exteading eastwardly through the lower end of the Amite River, through the middle of Lake Maurepas, Pass Manchac, and Lake Pontchartrain, and in order to reach the Gulf of Mexico its only course was through the Rigolets, into Lake Borgne, and thence by the deep water channel through the upper corner of Lake Borgne, following said channel, north of Half Moon Island, through Mississippi Sound to the north of Isle à Pitre, through the Cat Island Channel, southwest of Cat Island, into the Gulf of Mexico, which said eastern boundary of the State of Louisiana is more fully shown on diagram No. 1, made part of this bill;

3rd. That by the Act of Congress, found in the United States Statutes at Large, Vol. 2, p. 708, chapter 57, approved April 14th, 1812, additional territory was added to the then

FOLD OUT IS TOO LARGE TO BE FILMED

existing State of Louisiana, which additional territory was described in the following language:—

"Beginning at the junction of the River Iberville with the Mississippi River; thence along the middle of the Iberville and of the River Amite and Lakes Maurepas and Pontchartrain to the eastern mouth of Pearl River; thence up the eastern branch of the Pearl River to the 31st degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said River to the place of beginning, shall become and form a part of the State of Louisiana";

4th. That the effect of this legislation, as to the eastern boundary of the State of Louisiana, was to retain the Mississippi River as the original eastern boundary, as far [illegible] as the 31st degree of north latitude. The change then moved the eastern boundary eastward along the 31st degree of north latitude to the Pearl River, whence it then ran south down the said River, through its eastern branch, till it entered the northern corner of Lake Borgne, where the State's eastern boundary then joined and followed the boundary line originally fixed in the Act of April 6th, 1812, and followed, as heretofore stated, the deep water channel through the upper corner of Lake Borgne, north of Half Moon Island, eastward through the deep water channel along the Mississippi Sound till it reached the Cat Island channel north of Isle à Pitre, and southwest of Cat Island, whence passing through Chandeleur Sound, northeast of Chandeleur Islands, it entered the Gulf of Mexico, and ran south around the Delta of the Mississippi River and then north and westward to the point where the Sabine River enters the Gulf of Mexico, as will be more fully seen from the diagram No. 2, made part of this bill;

5th. That the territory lying adjacent to, and to the eastward of the State of Louisiana is the State of Mississippi, which latter State was admitted into the Union of the United States of America by the

Act of Congress, found in the United States Statutes at Large, Volume 3, Chapter 23, page 348, approved March 1st, 1817, whereby the inhabitants of the western part of the then Mississippi Territory were authorized to form for themselves a State Constitution and to be admitted into the Union, the boundaries of the then to be created State being described as follows:—

"Beginning at the River Mississippi at a point where the southern boundary line with the State of Tennessee strikes the same; thence along the said boundary line to the Tennessee River; thence up the same to the mouth of Bear Creek; thence by a direct line to the northwest corner of the county of Washington (Alabama); thence due south to the Gulf of Mexico; *thence westwardly, including all islands within six leagues of the shore to the most southern junction of Pearl River with Lake Borgne;* thence up said River to the 31st degree of north latitude; thence west along said degree of latitude to the Mississippi River; thence up the same to the beginning";

6th. That by the said Act, Congress intended that the southern boundary line of the State of Mississippi, beginning at the point dividing it from the State of Alabama, should run westwardly till it joined the Louisiana eastern boundary line, and that in doing so, the said southern boundary would in effect start westward from a point eighteen miles south of the Coast line, and include in its westwardly direction the western end of Petit Bois Island, all of Horn Island, Ship Island and Cat Island, and the smaller islands north of these, those islands being the ones contemplated in the Act of Congress, as being within eighteen miles of the Southern Coast line of Mississippi, and that the said southern boundary of Mississippi, extending in its *westwardly* direction through the Gulf of Mexico, would gradually approach the coast line, and meet the eastern boundary line of Louisiana, just as the said eastern boundary line of Louisiana immerges from the Cat Island Channel into the Gulf of Mexico, and thence follow and

FOLD OUT IS TOO LARGE TO BE FILMED

become the same as the Louisiana boundary line extending westwardly to the south of Cat Island, through Mississippi Sound to the north of Half Moon or Grand Island to the *most southern junction of the east branch of Pearl River with Lake Borgne*, being identical with the Louisiana eastern boundary, and thence extending up the channel of Pearl River;

7th. That the islands included between the shore line and the southern boundary of the State of Mississippi are the islands heretofore described, viz: the western end of Petit Bois Island, with all of Horn Island, Ship Island and Cat Island, and the small islands north of them, those islands being large, and well known to Congress at the time of the passage of the act, all of which islands and the southern boundary of the State of Mississippi will more fully appear from the diagram No. 3, made a part of this bill;

8th. That the islands contemplated in the Act of Congress of 1812, creating the State of Louisiana, and intended to be embraced within the State of Louisiana, as provided by the clause, "*Thence bounded by the said Gulf to the place of beginning, including all islands within three leagues of the Coast,*" were all of the other islands, except those heretofore named as going to the State of Mississippi, as all other islands, and all other mainland, are south and west of the boundary line thus passing from Pearl River through the Deep Water Channels in Lake Borgne, and Mississippi Sound, through the Deep Water Channel, southwest of Cat Island to the eastward of the Chandeleur Islands, and thence south, taking in the Delta of the Mississippi River, and extending westward along the Gulf coast, including all islands along the coast, to the Sabine River, where the State of Louisiana is thence bounded on the westward by the State of Texas, all of which will more fully appear from diagram No. 2, heretofore referred to;

9th. Now your orator avers that there has developed in recent years in the waters south of the State of Mississippi and

east of the southern portion of the State of Louisiana a considerable growth of oysters, and an industry of large proportions, in the handling of the said bivalves, either in their fresh or in a canned condition, has resulted therefrom;

10th. That the State of Mississippi has, by legislative enactments, regulated the oyster industry in the waters of said State, and *permits* the dredging of oysters on the natural oyster reefs in waters of the said State, as will more fully appear from the statutes of said State to which reference is made;

11th. That the State of Louisiana has by legislative enactments regulated the oyster industry in the said State of Louisiana, and *prohibits* the dredging of oysters on the natural reefs in the waters of said State, as will more fully appear from the statutes of said State to which reference is made;

12th. That the provisions of the laws of the said two States differ considerably in many other respects.

13th. That the existence and location of the natural oyster reefs in the waters of the Parish of St. Bernard in the State of Louisiana which adjoins the State of Mississippi is shown by the map made from a reconnaissance by the United States Fish Commission steamer, "Fish Hawk", in February, 1898, as will more fully appear from diagram No. 4, now made part of this bill;

14th. Now your orator avers that the boundary line dividing the two States in the waters thereof has been clearly defined by the Acts of Congress creating the States of Louisiana and Mississippi, as will be seen from the diagram No. 5, made up from the boundary descriptions taken from the Acts of Congress creating the said States of Louisiana and Mississippi, which diagram is also made part of this bill;

15th. That the said boundary line in the waters between said States has never been designated by buoys or marks of any kind by either State, nor designated in any manner, except by the United States Government in so far as it has buoyed the *Deep Water Channel*, extending from the mouth of the Pearl

FOLD OUT IS TOO LARGE TO BE FILMED

River through the upper corner of Lake Borgne north of Half Moon Island, eastward to the Cat Island Pass, north of Isle à Pitre, and southwest of Cat Island, which buoys were placed by the Coast Survey of the United States Government;

16th. That owing to the differences in the laws of the States of Louisiana and Mississippi, regulating the oyster industry of the respective States, the said statutes providing penalties for the violation thereof, much confusion has resulted and a great public demand has arisen in Louisiana to definitely mark the boundary line dividing the two States in the waters thereof; that citizens of the State of Mississippi, in violation of the laws of the State of Louisiana, have been fishing oysters with dredges on the natural reefs in the waters of the State of Louisiana, said fishermen claiming that they were in the waters of the State of Mississippi and consequently not violating the laws of the State of Louisiana;

17th. That affairs had reached such a crisis that, to avoid an armed conflict between the sheriff and officers of the Parish of St. Bernard in the State of Louisiana and the sheriff and officers of the County of Harrison in the State of Mississippi, a meeting of citizens of the State of Louisiana was called by the Governor of the State of Louisiana and held in the City of New Orleans, State of Louisiana, as will be seen from a certified copy of the minutes of said meeting, to-wit:—

"Minutes of a meeting held Saturday, Jan. 19th, 1901, at the office of John Dymond, Jr., No. 339 Carondelet street, New Orleans, La., of the following gentlemen:—

Present:—His Excellency, Gov. W. W. Heard; Lieutenant Governor Albert Estopinal; Major H. B. Richardson, Chief of the Board of State Engineers; Messrs. Simon Leopold and A. T. Bonvillain, representing the Commission appointed by the House of Representatives of the State of Louisiana; Mr. H. C. Cage, representing the Commission appointed by the Senate of the State of Louisiana, and Messrs. J. B. Easterling and R. Perez, representing the Committee from the Police Jury of the Parish of Plaquemines; Albert Estopinal, Jr., District Attorney for the

Twenty-ninth Judicial District; Clem Story and Gus Schoenberger, Oyster Inspectors, respectively of the Parishes of St. Bernard and Plaquemines; Frank C. Mevers, Sheriff of the Parish of Plaquemines; E. E. Nunez, Sheriff of the Parish of St. Bernard; Messrs. Paul Renaud, S. M. Fuchich, M. P. Doullut, James Wilkinson and many others.

On request of Mr. Clement Story, Gov. Heard was asked to preside and Mr. John Dymond, Jr., was asked to act as secretary of the meeting. Mr. Clement Story then addressed the meeting upon the subject of the call, stating that the oyster industry was of much greater magnitude than our people believed; that it was in need of consideration and protection at the hands of the State officials inasmuch as the existing law failed to provide the means by which to secure the protection of the oyster beds from depredation by citizens of Mississippi, incidentally showing that there was a dispute between the States of Louisiana and Mississippi as to the boundary line dividing the waters of the two States, and that Mississippians were not only fishing oysters with tongs in the State of Louisiana, contrary to the statute, but were fishing them on Louisiana natural reefs with steam dredges, which under the Louisiana law is made a Penitentiary offense. Mr. Story called to the attention of the meeting the Congressional legislation defining the boundaries of the State of Louisiana and suggested that some action should be taken to secure the co-operation of the State of Mississippi in fixing the boundary line.

Mr. John Dymond, Jr., followed Mr. Story, quoting the law on the subject, and stating to the Committee that the Mississippi Oyster Factories desired to be permitted to go ahead, regardless of the law, pending the fixing of the boundaries, but at the same time calling to the attention of the Committee the fact that these tongmen and the dredges from the Oyster Factories in Mississippi were fishing in waters that were admittedly within the State of Louisiana. He called to the attention of the meeting the fact that Congress could possibly be induced to appropriate a sum sufficient to buoy the boundary line if the States of Louisiana and Mississippi were unable to agree amongst themselves, but suggested that a conference should be had. He also called attention to the necessity of enforcing the law during the interval of establishing a boundary, in order that the oyster industry might be protected.

Mr. James Wilkinson then addressed the meeting, showing the immense development of the oyster industry in our sister Atlantic Coast States and demonstrating that the Louisiana Oyster Industry was susceptible of much greater development than enjoyed in any of those States; that an acre of oysters would yield 300 barrels, which at $1.00 a barrel would give gross proceeds of $300.00 from one acre of oysters; that there were at least a million acres, if not more, of oyster beds or lands covered with water which could be made into oyster beds along the coast of the State of Louisiana; that the Northern States appropriated large amounts of money in order to protect their oyster industry while the State of Louisiana so far spent practically no money whatsoever for the purpose.

Mr. Ducate, of the firm of Lopez & Ducate, owners of an oyster factory at Biloxi, Miss., and also of a factory at Neptune, La., then addressed the meeting at some considerable length, denying that his dredges fished oysters in the State of Louisiana, he claiming that the eighteen-mile limit of the State of Mississippi took in some of the marsh islands, or what he called marsh islands, in the *Louisiana Marshes*. These marsh lands are merely intersected by small bayous and in no sense islands, yet it shows the disposition of the Mississippi people to invade the State of Louisiana, at least to the extent of this disputed territory.

Mr. S. M. Fucich, an Oyster Receiver of this city, addressed the meeting on the general welfare of the oyster industry, showing the necessity of its protection, calling to the attention of those present that the Parish of St. Bernard was the frontier which had to be defended and urging that steps should be taken in this direction.

Messrs. Paul Renaud, Captain M. P. Doullut, F. C. Mevers and many others addressed the meeting.

Lieutenant Gov. Albert Estopinal then proposed the following Resolution, which on motion was duly adopted, to-wit:—

Be it *Resolved*, That the Governor of the State of Louisiana request the Governor of the State of Mississippi to appoint a Commission of five gentlemen to confer with a Commission to be appointed by the Governor of the State of Louisiana to consider the determination of the water boundary line between the two States and arrange for its easy location and identification by a proper system of buoys.

The above motion being carried, Gov. W. W. Heard announced the appointment of the following gentlemen on the Committee, to constitute the Commission, to-wit:—

Messrs. Albert Estopinal, Jr., John Dymond, Jr., Clement Story, Sydney F. Lewis and H. C. Cage. Thereupon the meeting adjourned.

(Signed) W. W. HEARD, Chairman.
(Signed) JOHN DYMOND, JR., Secretary."

The original minutes of said meeting being made part of this bill as Exhibit "A".

18th. That to determine amicably the eastern boundary line between the said States, in the waters to the south of the State of Mississippi, and to the east of the southern portion of Louisiana, W. W. Heard, Governor of the State of Louisiana, addressed the following communication to his Excellency, A. H. Longino, Governor of the State of Mississippi, to-wit:—

"STATE OF LOUISIANA, EXECUTIVE DEPARTMENT,

BATON ROUGE, January 26, 1901.

His Excellency, Governor A. H. Longino,

Jackson, Miss.:

Dear Sir:—

On January 19th an important meeting was held at New Orleans for the purpose of considering the actual condition of the Oyster Industry, and to devise plans for defining the water boundaries between the States of Mississippi and Louisiana, with the view of extending to the oyster beds the protection contemplated by the Laws of these two States.

To enable you to fully ascertain the objects of this meeting and its proceedings, I herewith enclose an official copy thereof together with newspaper clippings which kindly return after perusal. You will observe that a resolution was adopted requesting the Governors of Mississippi and Louisiana each to appoint a commission of five to consider the determination of the water boundary line and to arrange for its easy identification by a proper system of buoys.

Pursuant to this resolution I have appointed the following gentlemen: Messrs. Albert Estopinal, Jr., John Dymond, Jr., Clement Story, Sidney F. Lewis and H. C. Cage.

I would therefore request that you appoint the Commissioners for your State at your earliest convenience.

(Signed) W. W. HEARD,
Governor."

As will be seen from a copy of said letter taken from the letter book in the hands of the Governor's private secretary, sworn to by said secretary and made part of this bill, marked Exhibit "B".

19th. That his Excellency, A. H. Longino, Governor of the State of Mississippi, in response to the foregoing, then addressed to his Excellency, W. W. Heard, Governor of the State of Louisiana, the following communication, to-wit:—

"EXECUTIVE DEPARTMENT,
JACKSON, MISSISSIPPI.
February 9, 1901.

His Excellency, Gov. W. W. Heard,
Baton Rouge, La.

Dear Governor:—

I have the honor to inform you that I have this day appointed the following named gentlemen as Commissioners from this State to confer with the Commissioners appointed by you to determine the water boundary line between the two States, to-wit:—

Hon. E. J. Bowers, Bay St. Louis, Miss.
Mr. A. Keller, Bay St. Louis, Miss.
Hon. W. A. White, Biloxi, Miss.
Mr. Harry T. Howard, Biloxi, Miss.
Hon. J. I. Ford, Scranton, Miss.

I have the honor to be, sir,

Very truly yours,
(Signed) A. H. LONGINO,
Governor."

The original of which said letter is made a part of this bill marked Exhibit "C".

20th. Your orator avers that this joint commission on boundary met in the City of New Orleans, State of Louisiana, on the 26th of March, 1901, as will appear from a certified copy of the minutes of said meeting as follows, to-wit:—

"Minutes of the meeting of the joint commissions appointed by Gov. W. W. Heard on the part of the State of Louisiana, and Gov. A. H. Longino on the part of the State of Mississippi, to confer as to the boundary line between the two States in the waters thereof, held at the office of Mr. John Dymond, Jr., Tuesday, March 26th, 1901, at 10 A. M.

Present:—Mississippi Commission:—Harry T. Howard, chairman; Hon. W. A. White, Hon. E. J. Bowers, Hon. J. I. Ford. Absent:—Hon. A. Kellar.

Louisiana Commissioners:—Hon. Albert Estopinal, Jr., chairman; Mr. John Dymond, Jr., secretary; Hon. Clem Story, Col. Sidney F. Lewis and Senator H. C. Cage.

The meeting was called to order by Hon. Albert Estopinal, Jr., chairman of the Louisiana Commission, and upon roll call by Mr. John Dymond, Jr., the above personnel was announced to be present.

Mr. Albert Estopinal, Jr., stated the purposes of the meeting and suggested that Mr. Harry Howard, chairman of the Mississippi Commission, should be elected chairman of the joint meeting of the two commissions.

On motion of Mr. John Dymond, Jr., seconded by Hon. Clement Story, Mr. Harry T. Howard was elected chairman of the joint session.

On motion of Hon. H. C. Cage, seconded by Hon. E. J. Bowers, Mr. John Dymond, Jr., was elected secretary of the joint session.

Commissioner W. A. White stated to the assembly that the Mississippi Commission had not yet had an opportunity to confer as to the subject matter before them, and thereupon he moved, and the same was duly seconded by Mr. Clement Story, that a recess of the joint commission be taken until 11:30 A .M. This motion was put and adopted, and the meeting then took a recess until 11:30 A. M.

At 11:30 A. M., after recess, the meeting was again called to order by Chairman Harry T. Howard.

Present:—Messrs. Howard, White, Bowers, Ford, Estopinal, Story, Lewis, Cage and Dymond.

Mr. John Dymond, Jr., at the request of the Louisiana Commission, then presented to the Mississippi Commission the views of the Louisiana Commissioners on the subject of the boundary line in the waters between the two States. Mr.

Dymond stated that there was no justification for the popular opinion of confusion as to the boundary between the two States; that there was in truth and fact no confusion; that the eastern boundary of the State of Louisiana in the waters between that State and the State of Mississippi originally ran through the Rigolets and extended to the Gulf following the deep water channel; that by the Act of 1812 annexing the territory west of the Pearl River the eastern boundary of Louisiana was extended to the mouth of the Pearl River, from which point the line joined the original water boundary and extended to the Gulf by the deep water channel, passing to the eastward of Chandeleur Islands. This boundary entirely agreed with the boundary subsequently given to the State of Mississippi when it was admitted as a State to the Union, inasmuch as its boundary began at a point ten miles east of Pascagoula River, thence ran westwardly, including islands within eighteen miles of the coast, and that in following this westwardly direction the boundary took the deep water channel which made it coincide with the boundary of the State of Louisiana.

This view of the matter having been presented a general discussion followed during which the members of the Mississippi Boundary Commission admitted that the view was a novel one to them, they being unable to pass upon it at the moment and requesting further time.

On motion of Hon. E. J. Bowers, seconded by Hon. H. C. Cage, the Louisiana Boundary Commission were requested to express their ideas as to the boundary line on the map which had been the subject of discussion, the line to be delineated in red ink, which should be presented to the Mississippi Commission subsequently, and that they in turn should endorse their views thereon.

The motion was put and carried.

The Louisiana Commission thereupon invited the Mississippi Commission to luncheon at the Cosmopolitan Hotel, whereupon on motion of Hon. Clement Story, duly seconded, the meeting adjourned subject to the call of the chairman.

(Signed) JOHN DYMOND, JR., Secretary.
(Signed) H. T. HOWARD, Chairman."

Which said original minutes are now made a part of this bill marked Exhibit "D", and the said original map, the sub-

ject of discussion, is now made a part of this bill marked Exhibit "E".

21st. That the said Commission appointed on the part of the State of Mississippi met, after some five months' delay, and on July 20th, 1901, submitted its reply to the Louisiana Commission, as follows, to-wit:—

"Hon. Albert Estopinal, Jr.,

Chairman Louisiana Boundary Commission.

The Commission appointed by the State of Mississippi to confer with a like Commission appointed by the State of Louisiana, having met and considered maturely the claims advanced by the Louisiana Commission, and having examined the line as delineated by that body and submitted with said claims, are unable to concede the line as claimed by the State of Louisiana, and as marked and set forth upon the map filed with said claim.

The difference between the line marked by your honorable body and that which we conceive is the true boundary is so great that we have no hope of being able to reconcile them, and therefore deem it useless to submit any counter line or proposition.

The Mississippi Commission considers as islands considerable territory which the Louisiana Commission claim as mainland, and the difference over this question of fact appears to us to be past reconciling.

We beg to disclaim any idea of being discourteous in failing to submit a counter line for your consideration.

It is apparent that the only hope of settlement is a friendly suit in the Supreme Court of the United States and we respectfully suggest that course.

Bay St. Louis, Miss., July 20, 1901.

(Signed) H. T. HOWARD, Chairman;
J. I. FORD, Secretary;
E. J. BOWERS,
W. A. WHITE,
AUG. KELLER."

Which said original document is now made a part of this bill marked Exhibit "F".

22nd. Your orator now avers that, as will appear from the foregoing, the State of Louisiana has exhausted all means whereby the said boundary line might be established amicably, except for the suggestion made by the State of Mississippi through its Commission in its foregoing reply and contained in the following language:—

> *"It is apparent that the only hope of a settlement is a friendly suit in the Supreme Court of the United States, and we respectfully suggest that course."*

23rd. Now your orator avers that it is entitled to appeal for relief to your honors, as one of the causes influencing the establishment by the Constitution of the United States of America, of your august tribunal, was the determining of disputed boundaries between Sovereign States of the Union and that the right and power is therefore within your jurisdiction to fix and determine the boundary line dividing the States of of Louisiana, south of the State of Mississippi, in the waters lying between the said States;

24th. That the eastern water boundary line as claimed by your orator, viz: a line beginning at the most southern junction of the Channel of the east branch of the Pearl River with Lake Borgne and thence eastward following the Deep Water Channel to the north of Half Moon Island, through the Mississippi Sound Channel, to Cat Island Pass, northeast of Isle à Pitre into the Gulf of Mexico, thereby dividing the waters between the two States, agrees, and is in accord, with the acts of Congress creating respectively the State of Louisiana and the State of Mississippi as already shown by diagram No. 5; that any other boundary than the *Deep Water Channel* as aforesaid would cause the limits of the two States to conflict and overlap, and that it is not to be presumed that the Congress of the United States intended to, or would establish, in its description, a boundary for the State of Mississippi, conflicting with the already existing Louisiana eastern boundary, when there is a construction of the wording of the two Acts,

in fact the only construction that suggests itself, that shows a boundary readily ascertained, harmonizing with the words of the Acts as they now read, and clearly defining the limits of the two States in the waters between them.

25th. Your orator further avers that the use of the word "*Westwardly*" in the description of the southern boundary of the State of Mississippi, as that southern boundary line extends westwardly from the Alabama State line to the Louisiana eastern boundary line, shows that it was not the intention of Congress to have it run direct or due west throughout the whole course, and that it was evidently the intention of Congress, in giving to the State of Mississippi the Islands north of that westwardly drawn line, that the eighteen-mile limit shall gradually decrease as it approached the Louisiana line on the east till it met and followed it to its source. If the Mississippi line ran parallel to the southern coast of Mississippi, at a distance of eighteen miles from such coast line following the meander of the coast, and thence joined at right angles a line emerging from the mouth of Pearl River, such line would not only include Grassy, Half Moon, Round, LePetit Pass Islands and Isle à Petre, already belonging to Louisiana as being within nine miles or three leagues of the Louisiana shore line, but such line would also include part of the mainland of the State of Louisiana as will be seen from the following diagram (No. 6) made a part of this bill, and it certainly could not have been the intention of Congress to take away from the State of Louisiana any islands or mainland already belonging to it and to give them to the State of Mississippi, as such a proceeding, without the consent of the Legislature of the State of Louisiana, would be in violation of Sec. 3 of Art. IV of the Constitution of the United States.

26th. Your orator avers that the marsh lands claimed by the State of Mississippi to be islands are in truth, with the exception of the Isle à Pitre, Grassy, Half Moon, Round and Le Petit Pass Islands, low lying marsh lands forming part of the mainland of the State of Louisiana; that said swamp

or marsh lands and islands have been known as and called since time immemorial "The Louisiana Marshes"; that they were approved to the State of Louisiana by the Commissioner of the General Land Office on May 6, 1852, as will appear from a certified copy of said record of approval from the United States Land Office made a part of this bill, marked Exhibit "G", and where not since sold by the State of Louisiana to private purchasers have always stood on the books of the Register of the Louisiana State Land Office as State lands, to be offered for sale, until recently transferred by the State of Louisiana to the Board of Commissioners for the Lake Borgne Basin Levee District by the provisions of Act No. 14 of the Legislature of the State of Louisiana for the year 1892, for the purpose of enabling the said Levee Board, by the proceeds of sale of said lands to secure the funds to aid in the building of levees in that Levee District, to protect the lands from overflow.

27th. That parts of said disputed territory claimed by the State of Mississippi to be islands within eighteen miles of its shore line are in fact part of the mainland of the State of Louisiana, and therefore belong to and form part of said State of Louisiana, but if your Honors should feel that any part of this disputed area was islands by reason of the presence of shallow water, then as islands they are within the nine mile limit of distance from the shore line of the State of Louisiana and therefore belong to and form part of the State of Louisiana by that second provision of the Act of Congress giving Louisiana all islands within three leagues of its shore line.

28th. Your orator further avers that where contiguous States or countries are separated by water it is, and always has been, the custom to regard the *Channel* as establishing the boundary line of such States, and that the State of Mississippi has itself recognized this principle in the description of its territorial limits as found in the second article of its own Constitution adopted November, 1890, in the following words:—

"The limits and boundaries of the State of Mississippi are as follows, to-wit:— Beginning on the Mississippi River (*meaning thereby the center of said River or thread of the stream*) where the southern boundary line of the State of Tennessee strikes the same, as run by B. A. Ludlow, D. W. Connelly and V. Petrie, commissioners appointed for that purpose on the part of the State of Mississippi A. D. 1837 and J. D. Grahan and Austin Miller, commissioners appointed for that purpose on the part of the State of Tennessee; thence east along the said boundary line of the State of Tennessee to a point on the west bank of the Tennessee River, six four-pole chains south of and above the mouth of Yellow Creek; thence up the said River to the mouth of Bear Creek; thence by a direct line to what was formerly the northwest corner of the County of Washington, Ala:; thence on a direct line to a point ten miles east of the Pascagoula River on the Gulf of Mexico; thence westwardly including all the Islands within six leagues of the shore *to the most eastern junction of Pearl River with Lake Borgne;* thence up said Pearl River to the 31st degree of north latitude; thence west along said degree of latitude *to the middle or thread of the stream of the Mississippi River; thence up the middle of the Mississippi River or thread of the stream* to th the place of beginning, *including all islands lying east of the thread of the stream of said River*, and also including all lands which were at any time heretofore a part of this State."

29th. Your orator avers that as heretofore stated the Congress of the United States, as well as the various departments of the United States Government having authority in the premises, have themselves recognized the boundary line contended for by the State of Louisiana, by reason of the fact that the United States Government has confirmed to the State of Louisiana the lands composing Half Moon Island which is just south of the deep water channel, and which island is composed of Section 36 of Township 10 S. R. 17 East, Sections 29, 31, 32 and 33 of Township 10 S. R. 18 East; Section 1 of Township 11, S. R. 17 East; Sections 5 and 6 of Township 11, S. R. 18 East, in the South-Eastern

Land District of Louisiana, East of the Mississippi River; and that the lands forming what is commonly known as Isle à Pitre and being in sections 23, 24, 25, 26, 27, 28, 32, 33 and 34 of Township 10, S. R. 20 East, and in fact all of the remaining lands in Township 11, S. R. 17 East; Township 11, S. R. 18 East; Township 11, S. R. 19 East; Township 11, S. R. 20 East; Township 12, S. R. 16 East; Township 12, S. R. 17 East; Township 12, S. R. 18 East; Township 12, S. R. 19 East; Township 12, S. R. 20 East; Township 13, S. R. 16 East; Township 13, S. R. 17 East; Township 13, S. R. 18 East; Township 13, S. R. 19 East; Township 13, S. R. 20 East; in the aforesaid Land District, and parts of which are claimed by the State of Mississippi under its right angle line to belong to the State of Mississippi, have in fact been also confirmed to the State of Louisiana by the United States Government, and are recognized as belonging to and forming part of the State of Louisiana by the said United States Government and have always heretofore been so recognized by the people of the said two States; that the lands forming the Isle à Pitre were sold by the State of Louisiana to Richard Pindell on March 20, 1867, as per land patents of the State of Louisiana Nos. 194, 195 and 196, that Pindell sold to H. J. Leovy on April 18, 1867, by acts of sale before Geo. W. Christy, a notary public of the State of Louisiana, certified copies of said State land patents and said notarial acts being made part of this bill, marked Exhibits "H", "I", "J", "K" and "Z", and are now owned by the Messrs. Gilmore of the State of Louisiana, who acquired the said, and other, lands from Leovy on March 2, 1892, by two acts of purchase before Theo. Cotonio, a notary public of the State of Louisiana, certified copies of said notarial acts being made a part of this bill, marked Exhibits "L" and "M", and said lands have been assessed on the assessment rolls of the Parish of St. Bernard, State of Louisiana, and taxes thereon have been paid to the State of Louisiana for the past 35 years, and said lands have never been

assessed on the rolls of, nor have any taxes ever been paid to, the State of Mississippi and that this is the case with all the other lands and islands now claimed by the State of Mississippi, but which in truth and fact belong to the State of Louisiana.

30th. Your orator therefore further avers that all constituted authorities competent to create, adopt or consider the said boundary line have declared the water boundary line claimed by the State of Louisiana, viz: The deep water channel running from the most southern junction of the Eastern mouth of Pearl River, through Lake Borgne, north of Half Moon Island, through Mississippi Sound, north of Isle à Pitre and southwest of Cat Island, through Cat Island Pass, through Chandeleur Sound northeast of Chandeleur Islands, to the Gulf of Mexico, to be the true water boundary between the said States.

To the end therefore that the said defendants may, if they can, show why your orator should not have the relief prayed for and may, according to the best and utmost of their several respective knowledge, remembrance, information and belief, full true, direct and perfect answer make to the matters and things averred in this Bill, an answer under oath being herewith specially waived, may it please your Honors to grant to your orator the most gracious writ of subpœna directed to the said State of Mississippi, and to said Andrew H. Longino, Governor of the State of Mississippi, and Monroe McClurg, Attorney General of the State of Mississippi, commanding them and each of them to be and appear in this Honorable Court on a day to be therein named, and to abide the judgment of this Court.

And after due proceedings may it please your Honors to adjudge and decree that the boundary line dividing the States of Louisiana and Mississippi, in the waters between the said States to the south of the State of Mississippi, and to the southeast of the State of Louisiana is the deep water channel, commencing at the most southern junction of the eastern mouth

of Pearl River with Lake Borgne, thence by the deep water channel through Lake Borgne, north of Half Moon Island through Mississippi Sound, north of Isle à Pitre, through Cat Island Pass Channel, southwest of Cat Island, through Chandeleur Island Sound, northeast of the Chandeleur Islands, to the Gulf of Mexico, as is delineated on the original map submitted by the Louisiana Boundary Commission to the Mississippi Boundary Commission and now made part of this bill marked Exhibit "E", that the said deep water channel be located throughout its course and permanently buoyed at the joint expense of the two States, that the State of Mississippi and its citizens be perpetually enjoined from disputing the sovereignty and ownership of the State of Louisiana in the said land and water territory south and west of said boundary line, and your orator prays that she may be allowed her costs in this cause expended, and that she may have all such other further and general and equitable relief as the nature of the case may require.

WALTER GUION,
Attorney General of Louisiana.

JOHN DYMOND, JR.
ALBERT ESTOPINAL, JR.,
Of Counsel.

STATE OF LOUISIANA, PARISH OF ORLEANS.

Personally came and appeared before me the undersigned authority, William W. Heard, who being duly sworn deposes and says that he is the Governor of the State of Louisiana; that he has read the foregoing bill, and knows the contents thereof, and that the same is true to the best of his knowledge, information and belief.

W. W. HEARD, *Governor.*

Sworn to and subscribed before me this 14th day of October, 1902.

ALVIN EDWARD HEBERT,
Notary Public.

[Seal]

Supreme Court of the United States.

OCTOBER TERM, 1902.

No. 12. Original.

STATE OF LOUISIANA, COMPLAINANT,

versus

STATE OF MISSISSIPPI, DEFENDANT.

BRIEF FOR COMPLAINANT ON DEMURRER.

SYLLABUS.

1st. In a boundary suit between States, a State properly makes its appearance in the Supreme Court of the United States through its Governor or Chief Executive. Commonwealth of Kentucky vs. Dennison, Governor, 24 How. 66.

2d. The Governor, as the special guardian of the State's interest, is a proper party to initiate necessary litigation. His right to do so is indeed a part of his general powers of supervision over the property and welfare of the State. State vs. Dubuclet, 22 La. An. 602; 25 La. An. 161, and it therefore is not necessary that he should first be authorized by legislative act.

3d. The Supreme Court of the United States, exercising original jurisdiction, will take judicial cognizance, with-

out proof or plea, of the laws of a State whether depending upon statute or judicial opinion. Lamar vs. Micou, 114 U. S., p. 223, and authorities cited in brief.

4th. The Court will, therefore, take judicial notice of Act 65 of the Louisiana Legislature for the year 1884, vesting authority in the Attorney General to initiate litigation necessary to protect the State's interests.

5th. In addition to this specific authority, the Attorney General of Louisiana has, by virtue of the jurisprudence of our country, general authority justifying him in joining in the institution of this suit. Am. and Eng. Ency. of Law, 2d Edition, Vol. 3, p. 479, Verbo Attorney General.

6th. This Court will take judicial cognizance of Act 153 of the Louisiana Legislature for the year 1902, and Chapter No. 58 of the laws of Mississippi for the year 1902, which two statutes control the oyster industries of the respective States.

7th. This Court will take judicial notice of the laws of the State of Mississippi for the year 1902, page 240, where the Governor of Mississippi stamped with the badge of authority the conclusions or findings of his Advisory Boundary Commission when he submitted its report to his Legislature for action.

8th. The submission to the Legislature of the State of Mississippi of the Report of the Advisory Boundary Commission made that report official and binding upon the State of Mississippi to the extent that, as the conclusions there formulated were not repudiated by the Legislature of Mississippi when it could have easily done so, Louisiana was justified in presuming that the action of the Advisory Boundary Commission was the official action of the State of Mississippi.

9th. The allegations of the demurrer to the effect that this is not a controversy between two States is negatived by the averments of the Bill of complaint; but if there be any doubt in the mind of this Honorable Court as to the suf-

ficiency of the allegations of the bill, the case of Kansas vs. Colorado, 185 U. S. p. 125, would be sufficient warrant for this Court to refuse to dismiss the bill on demurrer.

The State of Louisiana having, as its Bill of Complaint will show, exhausted all means at its command to amicably and extra-judicially ascertain one of its boundary lines, contiguous to the State of Mississippi, accepted the invitation of that State to have the rights of the respective States, in the pending controversy, settled judicially. Our State had hoped that the conference of the respective advisory boundary commissions, previously appointed by the Governors of the two States, would have resulted in the outlining of a plan of settlement that could have been referred to and approved by the Legislatures of the two States, and subsequently ratified by an act of Congress.

Being informed, however, by the Advisory Commission appointed by the Governor of the State of Mississippi that the contentions as to boundary made by that State were so much at variance with ours that they could not be extra-judicially settled, and this Advisory Commission having suggested that the issues should be submitted to and determined by the Supreme Court of the United States, it comes to us in the nature of a surprise, that we should be called upon, at the threshold of the action, to meet a Demurrer that among other things alleges that there is no boundary dispute between the two States; and that this controversy is not one within the jurisdiction of this Honorable Court.

Making nevertheless a virtue of necessity, we beg to say that the Demurrer as filed, we presume is to be considered by the name given it by the defendant. It really also contains pleas as to the jurisdiction of the Court. Upon a proper proceeding and upon proper plea being filed, it might become necessary, in the event that the Bill of Complaint was not found to be self-sufficient, to take evidence on these pleas. We think,

however, this will not be found to be necessary and we will consider, therefore, the allegations of the Demurrer, as a Demurrer, and as they are severally presented, under their twelve headings, to-wit:

1st. The sufficiency of the Bill of Complaint is first attacked upon the ground that it does not show that the same was filed, or is being prosecuted by the authority of the State of Louisiana, or by the authority of any law whatsoever. The substantive allegation or plea is then made that the Governor and the Attorney General of the State of Louisiana, as a matter of fact, have no authority in law to proceed in this matter of their own motion.

The first paragraph of the Bill of Complaint, it will be seen, is to the effect that the State of Louisiana, one of the United States of America, through William W. Heard, Governor, and upon the information of Walter Guion, Attorney General, brings her Bill of Complaint. This allegation, we respectfully submit, when taken in connection with the jurisprudence of our country, is amply sufficient to sustain the bill on this point. The proper person through whom a State shall make its appearance in any boundary litigation before the Supreme Court of the United States is its Chief Executive. Not only has the appearance been so made in the present bill, but the substantive allegation is also made that the State of Louisiana also appears upon the information of its Attorney General.

Your Honors held, in the case of Commonwealth of Kentucky vs. Dennison, Governor of the State of Ohio, 24 Howard, page 66, as follows:

"The cases referred to leave no question open to controversy as to the jurisdiction of the Court. They show that it *has been the established doctrine* upon this subject ever since the Act of 1789, that in all cases where original jurisdiction is given by the Constitution, this Court has authority to exercise it without any further Act of Congress, to regulate its process or confer jurisdiction; and that this Court may regulate and mould the processes it uses in such manner as in its judgment will best promote the purposes of justice; *and that it has also been set-*

tled that where the State is a party, plaintiff or defendant, the Governor represents the State, and the suit may be, in form, a suit by him as Governor, in behalf of the State where the State is plaintiff, and he must be summoned or notified as the officer representing the State where the State is defendant." (Our italics).

It would seem to us that the only legitimate reason for denying the authority of the Governor of the State of Louisiana to appear in these proceedings, as representing the State of Louisiana, would be an anxiety on the part of the State of Mississippi to have the State of Louisiana bound by any decision that might eventually be rendered herein. Any other reason for such a demurrer could have for its purpose only the mere matter of delay.

We feel gratified to state that it has been recognized as one of the principles of law that the Governor of a State is the proper party to initiate necessary litigation, and he may do so without legislative authority.

Strange as it may seem, this recognized legal proposition emanates from a decision of the Supreme Court of the State of Louisiana. If the Supreme Court of this State has therefore judicially determined that the Governor of this State is a proper party to initiate litigation, without the necessity of specific legislative authority, then there can be no just cause for anxiety on the part of the State of Mississippi that the State of Louisiana, as a State, would ever endeavor to repudiate this present litigation, or its consequences.

In the American and English Encyclopedia of Law, Second Edition, Volume 14, page 1100, Verbo, Governor, we find the following:

"The Governor, as the special guardian of the State's interest, is a proper party to initiate necessary litigation. His right to do so is indeed a part of his general powers of supervision over the property and welfare of the State." State vs. Dubuclet, 22 La. An. 602; 25 La. An. 161.

This authority has likewise been recognized in the suit of Alexander vs. the State, 56 Ga. 478.

It would be a peculiar condition of affairs if the Governor of a State, in the event of necessity, were compelled to delay the initiation of necessary litigation until the regular session of the Legislature of the State, or be compelled to put the State to the enormous expense of having a special session of the Legislature called for the purpose of considering a subject which, though very important, might not justify the expense. In support of this proposition, we find that your Honors have likewise held in the case of Texas vs. White, 7 Wallace, 700:

"That the Governor of a State may authorize an attorney to institute in the Supreme Court of the United States, suit in the name of the State."

We submit, therefore, that the general proposition can be taken as well settled that it is one of the rights, inherent in the office of the Governor, or of the Chief Executive of a State, and it is one of his duties, to initiate, without the necessity of previous legislative authority, such proceedings on the part of the State as may be necessary to protect that sovereignty in the enjoyment of its rights.

While this single proposition would justify the status of this Bill of Complaint, the State of Louisiana has gone further and has had its Attorney General, by information, join in initiating these proceedings. An examination of the powers and duties connected with the office of Attorney General shows that it is also an inherent right in his office to likewise initiate such proceedings as may be necessary to protect the State in the enjoyment of its rights.

Referring again to the American and English Encyclopedia of Law, Second Edition, Volume 3, page 479, Verbo, Attorney General, we find the following:

"The powers and duties connected with the office of Attorney General are so numerous and varied that it has not been the policy of the various Legislatures to attempt the difficult task of enumerating them exhaustively, and they have ordinarily been content, after expressly defining such as are deemed most important, to leave the residue as they exist at common

law, so far as applicable to our jurisprudence and system of government."

In the case of Hunt vs. Chicago R. R. Co., 20 Ill. App. 282, we find:

"In those jurisdictions where the common law has been adopted, wherever applicable, and so far as it has not been changed by statute, a duty required of an Attorney General by the rules of common law is as much a duty required of him by law as though it were imposed by the express mandate of the statute."

Speaking of what the common law duties of an Attorney General are, it was held, in the case of the People vs. Miner, 2 Lans. (N. Y.) 397:

"Most, if not all, of the Colonies appointed Attorney Generals, and they were understood to be clothed with nearly all the powers of the Attorney Generals of England, and as these powers have never been defined, we must go back to the common law in order to ascertain them. The Attorney General had the power, and it was his duty:

"1st. To prosecute all actions necessary for the protection and defense of the property and revenues of the Crown."

A grant by statute of certain powers would not operate to deprive the Attorney General of those belonging to the office at common law, unless the statute either expressly or by reasonable intendment forbade the exercise of powers not thus expressly conferred." (Idem.)

In the case of the Attorney General vs. Detroit, 71 Mich., page 92, we find the following:

"It is the right and duty of an Attorney General to intervene and prevent franchises of a public nature from usurpation and destruction. Thus, the Attorney General can intervene to prevent the destruction of a public market."

Referring again to the American and English Encyclopedia of Law, Second Edition, Volume 3, page 481, Verbo, Attorney General, we find the following:

"The Attorney General, as the Chief Law Officer of the State, has the power to institute proceedings in equity in behalf of the people to compel the discontinuance of acts which constitute a public nuisance."

In the brief of counsel for plaintiff, in the case of Knowlton,

Attorney General, vs. Williams, 47 L. R. A., p. 314, the authorities or adjudicated cases on the right of an Attorney General to initiate proceedings are further collated in detail.

Thus far, we have considered the right of the Attorney General to bring this suit from the point of view of the general jurisprudence of our country. Considering, however, the legislation of the State of Louisiana, we find that this State has granted specific authority by Act No. 65 of the Acts of the Legislature of the State of Louisiana, approved July 9th, 1884, which provides:

"That the Attorney General be, and he is hereby, authorized and empowered, to institute and prosecute any and all suits he may deem necessary for the protection of the interests and rights of the state," etc.

This being not only a proceeding, but also an original proceeding, before a United States Court, this Court will take notice, without proof, of the laws of the several States of the United States.

Your Honors held, in the case of the Chicago and Alton R. R. Co. vs. Wiggins Ferry Co., 119 U. S., p. 622:

"This Court, and the other Courts of the United States, when exercising their original jurisdiction, take notice, without proof, of the laws of the several States of the United States, etc."

In the case of Lamar vs. Micou, 114 U. S., p. 223, your Honors held: "The law of any State of the Union, whether depending upon statutes or upon judicial opinions, is a matter of which the Courts of the United States are bound to take judicial notice without proof or plea." Owings vs. Hull, 9 Pet. 607; Pennington vs. Gibson, 16 How. 65; Drawbridge Co. vs. Shepherd, 20 How. 227.

In the case of Gormley vs. Bunyan, 138 U. S., p. 635, your Honors held:

"With respect to the refusal of the Court to allow certain other public statutes to be introduced in evidence, it need only be said that the Courts of the United States take judicial notice of all the public statutes of the several States."

Your Honors will, therefore, take judicial notice of the existence of Act No. 65 of the Legislature of the State of Louisiana for the year 1884, authorizing the Attorney General of Louisiana to institute this suit. You will also take judicial cognizance of the opinions of the Supreme Court of this State in this connection, and likewise you will take notice of the other statutes of Louisiana and Mississippi referred to in the Bill of Complaint. There is a long line of authorities in support of this proposition, among which may be mentioned:

Fourth National Bank vs. Francklyn, 120 U. S., p. 747; Huntington vs. Attrill, 146 U. S. 678; Lloyd vs. Matthews, 155 U. S., p. 227; Mills vs. Green, 159 U. S., p. 657; Eastern Building & Loan Association vs. Ebaugh, 185 U. S., p. 114.

The following authorities are also in point, to-wit:

Knower vs. Haines, 31 Fed. 514; Newberry vs. Robinson, 36 Fed. 843; Borland vs. Haven, 37 Fed. 406; State vs. Coosaw Min. Co., 45 Fed. 808; Western, etc. R. Co. vs. Roberson, 61 Fed. 594; Davenport vs. Moore, 74 Fed. 946; Davidow vs. Pennsylvania R. Co., 85 Fed. 944; Andruss vs. People's Building Association, 94 Fed. 580.

The bill filed by the State of Louisiana is, therefore, sustained both by the jurisprudence of our country and by the statute law of the State of Louisiana, and to this extent must be maintained.

2d. The complaint is next made that the bill does not show on its face a question of boundary between the States and within the cognizance and jurisdiction of the Supreme Court of the United States, under the provisions of Section 2 of Article 3 of the Constitution of the United States of America. As to the weakness of this contention, we beg to refer you to the contents of the bill, and more particularly to paragraphs 16, 17 and 21.

3rd. The third objection is somewhat similar to the second. As to it, we would say that the main question at issue, as is shown by the face of the bill, is the interpretation or construction of Acts of Congress fixing the boundaries of two adjacent

States. It was in the interpretation of these Acts of Congress that the two States could not extra-judicially agree by reason of diverging views. As appears from the bill, it is alleged that the State of Louisiana was granted by the Congress of the United States all islands within three leagues of its coast, and the State of Mississippi was subsequently granted all islands within six leagues of its coast, and further that there are islands which are not only within three leagues of the Louisiana coast, but which are also within six leagues of the Mississippi coast, and further that there are lands which Louisiana claims are part of its mainland, but which are claimed by Mississippi to be islands, and that these lands are not only within three leagues of, but form part of the Louisiana mainland, and are also within six leagues of the Mississippi coast line, so that depending upon the interpretation of the Acts of Congress creating the States of Louisiana and Mississippi, it is possible for said lines to conflict both upon land and water, but a further allegation of the bill is that there is an interpretation of the Acts of Congress which does away with this conflict, and that this is the interpretation which the State of Louisiana seeks at the hands of your Honors to have declared to be the proper meaning and true interpretation of said Acts, and the determination of this issue is certainly a subject within the jurisdiction of the Court.

4th. It is here charged that the bill shows that the State of Louisiana has not attempted to mark or define by buoys or otherwise her boundary line in the waters to the south of the State of Mississippi and to the southeast of the State of Louisiana. What the consequences of this are is not stated. We assert that it was not necessary, prior to instituting this suit, for Louisiana to buoy her boundary line, nor was it necessary for her to so allege in the bill. But let us see what in fact the bill does allege. It shows (paragraph 15) that the boundary line, the deep water channel, was and is buoyed by the United States Government. It further shows that the boundary line as claimed by Louisiana was set forth definitely and shown to

the State of Mississippi (paragraph 20, Exhibit E) by the map presented to it; and in the several maps made part of the bill (Diagrams Nos. 1, 2, 3 and 5), the line claimed is clearly set forth.

It is further alleged by complainant (paragraph 29) that all competent authority, including the United States Government, and more particularly the United States Land Office, had reorgarized this line which is set forth on the maps in the bill and had transferred to Louisiana, United States lands in accordance therewith.

This is all that could be required, and this phase of the Demurrer is without merit.

5th. As to this paragraph of the Demurrer, we beg to submit that the Bill of Complaint does not allege that the commissions appointed by the Governors of the two States were clothed with the legal authority to finally fix the boundary between the two States. It simply sets forth, in this respect, a history of the facts as they occurred, and it is for the Court to draw its deductions therefrom. These commissions were appointed for the purpose of examining the question in an advisory manner, and to report the results of their investigations to the Governor appointing them. A favorable, unanimous report of the joint commissions would have paved the way to mutual legislative action by the two States, which, when approved by an Act of the Congress of the United States, would have been binding on both of them. It was only by an elaborate proceeding of this kind that the matter could have been extra-judicially settled. This is recognized by the fourth section of the Constitution of the State of Mississippi, where reference is made to the fact that the Legislature of that State might settle boundary disputes between it and its coterminous States when such disputes should arise.

It is an incident of executive power, however, when information is wanted to appoint persons and commissions to examine and report. What the Bill of Complaint does charge is that the report of the Mississisippi Advisory Boundary Commis-

sion was a sufficient intimation of the official attitude of that State as to justify Louisiana in presuming that an extra-judicial settlement of the boundary dispute was impossible.

As has been heretofore stated, this Court will take judicial cognizance of the public acts of the various States of the Union, and authorities in support of this are herewith submitted. An examination of the official edition of the laws of Mississippi for the year 1902, page 240, will show that the Governor of the State of Mississippi submitted to the Legislature of the State of Mississippi the report of the Advisory Boundary Commission, appointed by him, which report is referred to in the Bill of Complaint (paragraph 21). That the Legislature of the State of Mississippi took no action on the subject is no fault of the State of Louisiana, but a ready explanation of its failure to take action is found in the suggestion that the said Governor there made to his Legislature that a friendly suit in the Supreme Court of the United States was contemplated. There was no need, then, for further action, and none was taken, for this suit was naturally expected and naturally followed. This, however, can only be taken as an official ratification by the State of Mississippi of the action of its Advisory Boundary Commission, and as warranting the State of Louisiana in presuming that the State of Mississippi as a State disputed officially the contention of the State of Louisiana as to boundary, and would be pleased to have the dispute settled by the Supreme Court of the United States.

This element of the Demurrer is, therefore, likewise without merit.

6th, 7th, and 8th. We may consider under one heading these three paragraphs of defendant's Demurrer, because they all in different form assert the same proposition, viz: That the Bill of Complaint discloses that it is private interests of individuals, and not the State's public interest, for which protection is sought by the State at the hands of the Court. Even a cursory perusal of the Bill of Complaint will show that it is asserted that there is a serious difference of opinion between the

official representatives of the two States as to the interpretation of the Acts of Congress establishing their respective boundaries (paragraphs 18 to 21, inclusive); that islands and land as well as water area are in dispute (paragraphs 24 to 37, inclusive); that Louisiana is interested in maintaining her sovereignty over the land and water within her boundaries (paragraphs 11, 12, 16 and 17), and collecting her taxes therefrom (paragraphs 11 and 29); and that her State laws should be effectively enforced within her territorial limits (paragraphs 11, 12, 16 and 17).

While it may be true that there might be some slight advantage to those citizens of Louisiana engaged in the oyster business, to exclude the citizens of Mississippi from the Louisiana Natural Oyster Reefs, this is but an incident, and cannot be considered the ground of complaint of the bill; for the State of Louisiana has a much greater public interest. First of all, it is her duty, and she must maintain order and observance of her laws. Then the natural oyster reefs are the property of the State in her sovereign capacity, as are also the lands under the navigable waters of the State. The Bill of Complaint charges that the State of Louisiana regulates her oyster industry by legislation and specifically refers thereto (paragraphs 11, 12 and 13).

A reference to this Act, No. 153 of the Legislature of the State of Louisiana of the year 1902, shows that the State is entitled to specific license fees from the oyster vessels, tongmen, dealers and canners operating in her waters, and on her oyster beds; that she is entitled to 2 cents per barrel privilege license on each barrel of oysters fished from her waters, and a rental of one dollar ($1.00) per acre of water bottom leased from the State, all of which revenues go into her State Treasury, so that she has a manifold public and direct pecuniary interest in ascertaining whether this disputed area is hers or her neighbor's.

The Court will take judicial cognizance of the existence of Act 153 of the Legislature of the State of Louisiana for the year 1902, which is the Act referred to in the Bill of Complaint

(paragraph No. 11) as regulating the oyster industry of the State of Louisiana, and it will also notice Chapter No. 58 of the laws of the State of Mississippi for the year 1902, p. 54, which is the statute referred to in the Bill of Complaint (paragraph No. 10) as being the one by which the State of Mississippi regulates its oyster industry.

In the case of Kansas vs. Colorado, 185 U. S., p. 142, your Honors referred to the case of Missouri vs. Illinois, 180 U. S., p. 208, and mentioned approvingly the remarks of Mr. Justice Shiras, to the effect that it was not essentially necessary for a State in her Bill of Complaint to allege a pecuniary interest.

By reference to the statutes of the two States of Louisiana and Mississippi, heretofore referred to, it will, however, appear that both States have in fact in this case a pecuniary interest in the matter in controversy, as both States, by their statutes, propose to derive revenue from their respective oyster industries. An oyster industry is situated in the territory in dispute, as charged by the Bill of Complaint (paragraph No. 9), and it is for this Court to determine to which State said territory belongs, so that the fortunate State may reap the profits arising from the oyster industry there existing, and it is therefore readily apparent that this contention of the defendant is without merit.

9th and 10th. These two allegations of defendant's Demurrer are also so closely related as to be better considered together. In answer thereto, it will appear from the bill that the Advisory Boundary Commission appointed by the Governor of Mississippi (paragraph 21) claims an adverse title to these certain lands and water area, and would not concede to Louisiana the area delineated on the map made part of the bill, as exhibit "E" (paragraph 20). This commission represented the Governor, and the Governor represented the State of Mississippi, and the State of Louisiana was justified in presuming that no extra-judicial agreement could be made. If this were not so, and if Louisiana's right of action were dependent on the action of the Mississippi Legislature, and the Mississippi

Legislature should omit or fail to take action thereon when the matter was laid before it, as is the case at bar, Louisiana could never assert her title in the Courts, and there would ensue an oyster war such as has occurred in some of the Atlantic States because of the value the locality has for the development of the oyster industry.

This is just what is charged in the bill, for it says (paragraph 17) that there was about to be an armed conflict between the Sheriff and the officers of the Parish of St. Bernard, of Louisiana, and the Sheriff and officers of the County of Harrison, of the State of Mississippi. These are the counties that most nearly touch each other in the disputed area, as is shown by the maps attached to the Bill of Complaint.

The Sheriff of Harrison County, Mississippi, is an officer of the State of Mississippi, required, as a representative of the State of Mississippi, to preserve peace and order in the County of Harrison, and when he and his officers were claiming Louisiana territory as Mississippi territory, and were about to back up their claim by force of arms, it was high time for Louisiana to seek some tribunal to arbitrate and settle her claims.

If we again refer to the Legislative Acts of the two States, Act 153 of 1902 of Louisiana and Chapter 58 of the laws of 1902 of Mississippi, it will appear that both States have created State Commissions to regulate and control the oyster industry of the respective States. It is, therefore, highly important that these commissions should have their territorial limits defined, so that they would not each be insisting, as the official representatives of their respective States, that the disputed area was under their individual control.

11th. Our answer to this is fully set forth in our reply to the third paragraph of defendant's Demurrer to the effect that our bill is to fix boundaries and have conflicting Acts of Congress properly construed and interpreted and its purpose is not to change any boundary, because we charge that Mississippi never had any legal claim to Louisiana territory (para-

graphs 2 to 8, inclusive), and that there is no boundary to change, but one to determine and fix.

12th. This is a suit for boundary, and not one to determine the number of the armed force that was resisting Louisiana's claim, nor its personnel. Nor is it a suit or proceeding to punish the offenders personally for violating any law or disturbing the peace. We made the substantive allegation and charge (paragraph 17) that something had to be done to avoid an armed conflict which was threatening between the States' officers in those portions of the two States where they most nearly approached each other, in the disputed area, and that the alternative was to appeal to the Governor of Mississippi, which was done. That this did not produce satisfactory results, is no fault of ours, as Louisiana did all it could to settle the matter amicably and extra-judicially, only to be invited to come here. Here we are, and here with the permission of your Honors, we now propose to stay until this matter is finally settled.

For the foregoing reasons, therefore, complainant respectfully represents that the Demurrer of defendant is not well founded in law, in any particular; that it should be overruled and set aside, and defendant required to answer complainant's bill as filed and of record herein, but should your Honors conclude that our Bill of Complaint is not in any respect self-sufficient, then your orators respectfully pray for leave to amend as justice and equity may require.

Respectfully submitted,

WALTER GUION,
Attorney General of Louisiana.

No. 11 ORIGINAL.

STATE OF LOUISIANA, *Complainant,*

versus

STATE OF MISSISSIPPI, *Defendant.*

SUPPLEMENTAL BRIEF FOR COMPLAINANT ON DEMURRER.

It will be remembered that on March 2, 1903, at the time of the submission of the Demurrer to the Court, Louisiana had not yet received the brief of the State of Mississippi, and the brief which we then submitted had therefore been prepared without the advantage of a knowledge of the arguments that Mississippi's able counsel would use in support of its Demurrer. Now that by the delay of twenty days granted by this Court, we have had an opportunity to carefully consider Mississippi's brief, and prepare our supplemental reply thereto, we find that to a very great extent we had anticipated the line of defendant's argument, and it therefore but remains for us to recapitulate our original reasons for urging that the Demurrer of defendant is not well founded, either in law or in fact.

The only proper questions that can be said to be at issue on Demurrer, are:

1st. Does the Bill of Complaint set forth that the State of Louisiana makes its appearance through its proper officer?

2d. Is there a cause of action within the jurisdiction of this Honorable Court set forth in the Bill of Complaint?

The Bill of Complaint is self-sufficient in its answer to both of these tests.

The State appears in the persons of its Governor and Attorney General, and there is no denial that these gentlemen really fill the offices they claim to occupy. The Bill of Complaint sets forth a claim to a certain boundary line, which it alleges the State of Mississippi denies (paragraphs 10, 18, 19, 21, 22, 26, 27, 28). The denial by Mississippi of Louisiana's pretensions is shown not only in the Bill by the action of the Mississippi Advisory Boundary Commission, but also in the Laws of Mississippi for the year 1902, by the action of the Governor and the Legislature of the State of Mississippi on the said Report.. If Mississippi as a State did not propose to approve, confirm and coincide in this denial of Louisiana's claim, it could easily have repudiated the findings of its Advisory Boundary Commission, or kept the matter open for further consideration.

It is a specious argument to say that Mississippi is being drawn unwillingly into this litigation. How easy could she cleanse her own hands and purge her own conscence by admitting Louisiana's boundary claim, if she does not dispute it. Why demurr when she could meet this issue on the merits without cost or trouble to herself by admitting Louisiana's claims, if she does not deny them? But no; the fact is that Mississippi as a State did then, and does now, dispute the correctness of Louisiana's construction of the Acts of Congress, and this appears even from the brief now filed by her able counsel wherein they say:

"We do not understand that any claim has been, or will be made by Mississippi to any of the mainland of Louisiana, but, whatever *islands* that are within six leagues of her shore, at

any point, belong to her and she should have them. It is immaterial to the present contention that land owners on Half Moon Island or Isle a'Pitre, deraign their titles through the State of Louisiana."

The Bill of Complaint and its annexed Exhibits show that these two islands, Half Moon Island and Isle a'Pitre, are not only within nine miles of the Louisiana, but are also within eighteen miles of the Mississippi shōre line, and although Lousiana in her Bill of Complaint alleges specific title to them, Mississippi claims that all of that does not count as they belong to her because within eighteen miles of her shore line, regardless of their position relative to Louisiana.

This therefore is certainly a boundary dispute between the two States.

We have carefully noted the other provisions of defendant's brief, and we find they bear almost entirely on the merits of the case, a subject certainly not to be considered on Demurrer.

Counsel's reference, however, to Act No. 65 of the Legislature of Louisiana for the year 1884 and his admission that it authorizes the Attorney General of Louisiana to defend the State's interests is a concession of our own contention, for, to properly defend a State's interests, it is as often necessary to appear as plaintiff or complainant as it is to appear as defendant.

By their reference to the action of the Governor and Legislature of the State of Mississippi on the Report of its Advisory Boundary Commission, counsel for Mississippi also concede the admissibility, and the right of this Honorable Court to consider this subject in passing upon its Demurrer. It is then in evidence that the State of Mississippi did not repudiate this denial of Louisiana's boundary claim, but by its silence and inaction permitted the dispute to reach this Honorable Court for settlement.

We respectfully submit that the construction of the Acts of Congress creating the two States, is part of the merits of the case, and we therefore forbear from showing the fallacy of counsel's argument in relation thereto, while we are still on the Demurrer.

The same reasoning applies to counsel's extended argument on the subject that the State of Louisiana cannot maintain a suit for the benefit of individuals. We have shown that it is not the interests of individuals that are involved; that there is a boundary controversy here; that both States have a direct pecuniary interest in the controversy, and that the sovereignty of Louisiana is involved as to the territory in question. If these allegations are not true as facts, that is a matter to be proved by the State of Mississippi when the merits of the case are reached and are not to be considered on Demurrer.

We therefore, for the foregoing reasons, and for those set forth in our previous brief, respectively urge, that the State of Louisiana appears before this Honorable Court properly represented and presents for judicial determination a boundary controversy fully within its jurisdiction, and that the Demurrer should therefore be overruled, and the State of Mississippi compelled to answer Louisiana's Bill of Complaint as justice and equity may require.

Respectfully submitted,

WALTER GUION,
Attorney General of Louisiana.

Supreme Court of the United States.

OCTOBER TERM, 1903.

Original No. II.

THE STATE OF LOUISIANA,
COMPLAINANT,

versus

THE STATE OF MISSISSIPPI,
RESPONDENT.

IN EQUITY.

GENERAL REPLICATION AND ANSWER TO CROSS BILL.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The State of Louisiana, repliant, saving and reserving unto herself all advantage of exception to the insufficiencies of the answer of the State of Mississippi herein, for replication thereunto says: that she will aver and prove her bill of complaint in this cause to be true, certain, and sufficient in the law to be answered unto, and that the said answer is uncertain, untrue, and insufficient to be replied to; all of which this repliant is and will be ready to aver and prove as this Honorable Court shall direct, and prays as in and by her said bill she has already prayed.

And further, the said State of Louisiana, now and at all

times hereafter saving and reserving unto herself all benefit and advantage of exception which can or may be had or taken to any errors, uncertainties, or other imperfections contained in so much of the answer of the State of Mississippi, herein, as may be deemed a cross bill herein, and also the right to make further answer thereto, if the same should become necessary, for answer to said cross bill of the State of Mississippi, says she denies:

I.

That the fixing of the southern boundary of the State of Mississippi by Section 2, Chapter 23, of the Acts of the Congress of the United States, creating said State and approved March 1, 1817, found in Vol. 3, page 348, of the Statutes at large, quoted in full in paragraph one (1) of Respondent's cross bill, certainly and indisputably fixed and designated said southern boundary, as alleged and averred by Respondent, but Repliant avers that if the construction of said act sought to be placed theron by Respondent be true, and that Act did purport so to do, which is denied, Repliant avers that said Act in said respect would be in violation of, and contrary to, the Constitution of the United States, in as much as said Act would include in the boundaries of the State of Mississippi the islands, adjacent waters, and territory in dispute and controversy in this cause, which islands, adjacent waters, and territory had theretofore been by the Act of Congress, Chapter Fifty of the United States Statutes at large, Volume 2, page 701, approved April 8th, 1812, admitting the State of Louisiana into the Union, included within the boundaries of the State of Louisiana, by the provisions of said Act, and Repliant avers and alleges that if the Act of Dec. 10, 1817, admitting the State of Mississippi into the Union, is to be construed and interpreted as covering and including the said islands, adjacent

waters, and the territory in dispute and in controversy herein, that said Act is void, unconstitutional and of no effect in so far as the islands, territory and waters in dispute and controversy herein, are concerned, for the reason that said Act is and would be in violation of, and contrary to, Section 3, Article IV, of the Constitution of the United States, which Section and Article prohibit the transfer of any part of the territory of one State to another adjacent State without the consent of the legislature of the two States, which consent the legislature of the State of Louisiana has never granted or given, for the reason that the Act of Congress of 1812, admitting the State of Louisiana into the Union, placed said territory herein in controversy within the boundary lines, and under the sovereignty and jurisdiction of the State of Louisiana.

II.

Repliant further answering, especially denies that the claim set forth in the second paragraph of Respondent's cross bill, that the islands, and territory herein in dispute and controversy belong to, or are included within the lawful boundaries of the State of Mississippi for the reasons set forth in paragraph one (1) of this answer, and Repliant further especially and particularly denies that the limits of the State of Louisiana are to be defined and delimited from the "mainland" of said State, as claimed by Respondent, but are to be defined, determined and delimited from the islands, as the "coast" of the State of Louisiana.

III.

Repliant further answering to the cross bill of Respondent, denies the allegations and averments contained in Respondent's third (III) paragraph of the cross bill, but Repliant avers and alleges on the contrary that the

southeastern boundary of the State of Louisiana, in so far as the territory in dispute and controversy herein is concerned, is governed and fixed by the Act of Admission of the State of Louisiana into the Union, in 1812, by which all islands within three leagues of the coast were included within said State, and that the boundaries therein set forth must be taken and held as the true boundaries of the State of Louisiana, being prior in time to the boundaries of the State of Mississippi, fixed on the admission of that State into the Union on December 10, 1817, and for the additional reasons hereinbefore set forth in Repliant's answer to the cross bill of Respondent, in paragraphs one (1) and two (2) of this answer; and Repliant further avers that there is now and always has been a well-defined and continuous coast line of the southeastern coast of the part of Louisiana herein in dispute and controversy, extending eastward as far as the eastern extremity of Isle a Pitre, intersected only by the several bayous found therein.

IV, V, AND VI.

Repliant, further answering to paragraphs (IV) four, (V) five and (VI) six, of Respondent's cross bill, denies the truth and correctness of the allegations thereof, except in so far as is hereinafter especially admitted, but Repliant only admits that the Act of Congress of May 14th, 1812, set forth in the (V) fifth paragraph of Respondent's cross bill, was passed and enacted at that date, but Repliant alleges and avers that said Act only became a law on the 14th day of May, 1812, (14) fourteen days after the 30th of April, 1812, at which prior date the State of Louisiana had been admitted to the Union and its boundaries defined and delimited, and said Act of May 14th, 1812, could not, and did not, change the boundaries or territory of the State of

Louisiana, for the reasons already hereinbefore set forth in this Repliant's answer to the cross bill in paragraphs one (I), two (II) and three (III), of this answer. And that in truth and fact the southern portion of the said Mississippi territory as claimed by respondent was not even then in possession of the United States, and did not extend south of the thirty-first degree of north latitude, and did not reach or touch the Gulf of Mexico or Mississippi Sound, for it was only on February 12th, 1813, that the Congress of the United States, U. S. Statutes at large, Vol. 3, p. 472, passed "An Act authorizing the President of the United States to take possession of a tract of country lying south of the Mississippi territory and west of the River Perdido." This Act was not published until 1818. It declared that the country called West Florida, which lay west of the Perdido River, was not then in possession of the United States, and the Act was not published till 1818, evidently for fear of the effect its passage might have had on the Government of Spain, with which the United States was then negotiating a treaty relative to that territory, as is similarly shown by the general resolutions on the relation of the United States to Spain, U. S. Statutes at large, Vol. 3, p. 471-472, approved January 15th, 1811, and March 3, 1811, but not published until after April 20, 1818, in which the President of the United States was specially instructed not to publish same unless he deemed it wise to do so.

VII.

Repliant further answering unto paragraph seven (VII) of Respondent's cross bill, denies the averments and allegations therein set forth, and Repliant avers and alleges in contradiction thereof that the acknowledgment of the true boundaries of the State of Louisiana by the officers of the

United States Government are binding as showing that the territory here in dispute and in controversy has always been considered by the Federal Government, and its officers, as being a part of the territory of the State of Louisiana, and Repliant further alleges and avers that all the cartographers who have made maps of Louisiana and Mississippi from a date shortly after the acquisition of Louisiana by the United States, have placed and delineated on all of said maps from the year A. D. 1806, up to the present year, the territory in dispute herein as belonging to Louisiana, and forming a part of its territory, and Repliant further alleges and avers that the government and officers of the State of Mississippi, and of the County of Hancock in said State, have repeatedly officially recognized the territory in dispute and controversy herein as the territory of, and belonging to, the State of Louisiana:

1st—On Hardee's Geographical and Statistical Map of Mississippi, embracing portions of Tennessee, Alabama, Louisiana and Arkansas, from recent surveys and investigations and officially compiled for the State of Mississippi, and paid for by appropriation from the Treasury of the State of Mississippi, all under Statutes of the State of Mississippi, which map was officially approved by the then Governor of the State of Mississippi, in writing, on the face of said map, which official map was published and promulgated in the year 1868, and a second edition in 1872.

2nd—On the official map of the State of Mississippi, published in accordance with an Act of the Mississippi State Legislature, approved March 8th, 1882, by the Mississippi State Board of Immigration and Agriculture, prepared under the direction of E. G. Wall, in 1883.

3rd—On a sectional map of Mississippi compiled from the records of the offices of the Surveyor General and of the Board of Immigration and Agriculture of the State of Mississippi, published by Rand, McNally & Co., in 1896, to be found in the office of the Clerk of the Chancery and Circuit Courts of the County of Hancock in the State of Mississippi; and,

4th—A map of Hancock County, Mississippi, compiled by Leland Henderson of Mississippi from the records of the United States and Mississippi Land Offices, which map Repliant is informed and believes was prepared for and approved by the Board of Supervisors of the County of Hancock, State of Mississippi, by virtue of the powers invested in said Board by the laws of said State, and by divers other official maps prepared, approved, published and issued by competent authority of State and county officers of the State of Mississippi, and Repliant avers that on all of said official maps of Mississippi, the islands, waters adjacent and territory here in dispute and controversy, are delineated and set forth as belonging to, and forming a part of, the territory of the State of Louisiana. Repliant further alleges and avers that if it be conceded, and this Honorable Court should so decide, that the islands and landed territory here in dispute are a part of the territory of the State of Louisiana, it follows that the land and soil underneath said waters, adjacent to said islands are the property of the State of Louisiana, and that said State has full jurisdiction and sovereignty over them. Repliant especially denies that the State of Mississippi has ever "exercised sovereignty and jurisdiction over said waters within eighteen miles of her shore aforesaid, and that her citizens have enjoyed the same for all lawful purposes since her admission into the Union," as alleged and averred by Respondent in paragraph (VII) seven of Re-

spondent's cross bill, but Repliant especially alleges and avers the contrary; that the State of Mississippi has never exercised in any manner whatsoever, any sovereignty over said islands and waters, and Repliant further avers and alleges on information and belief that the citizens of Mississippi have never enjoyed the same for lawful purposes, that is, the taking and obtaining of oysters from said disputed territory, but that it is only in the last few years, when the citizens of Mississippi had, by improvident, careless, and wasteful use of Mississippi's own oyster beds, destroyed or greatly depleted the same, that the said citizens of Mississippi began to trespass on the islands and waters, here in controversy, by taking oysters therefrom, and began to claim any rights in and to the islands and waters here in controversy, that said claims and said trespasses have been resisted by the officers of the State of Louisiana, who at all times have resisted said claims of the State of Mississippi, and the said citizens of Mississippi have been warned off from, and forbidden to use the oyster beds in said territory by said officers of the State of Louisiana. Repliant further avers and alleges that all of said citizens of Mississippi using and trespassing on the territory in controversy herein, always have called and designated, and do now call the territory here in controversy as "the Louisiana marshes" and have no other name for the same.

VIII.

Repliant further answering to the (VIII) eighth paragraph of Respondent's cross bill, alleges: that if, as stated, in that paragraph of Respondent's cross bill "The Congress of the United States, in the early history of the Republic, in dealing with the Gulf Coast or shore and carving States out of the Louisiana purchase, was not perfectly familiar

with said coast or shore line, and as is shown by the several Acts of Congress," then Repliant further avers and alleges that a similar unfamiliarity existed in the minds of Congress when it erected the territory of Mississippi into a State in 1817, and that if Respondent's theory of construction of the Acts of Congress be true, that Congress intended to comprise within the boundary of the State of Mississippi the territory in dispute herein as alleged by Respondent, which, however, is denied, then it was on account of said unfamiliarity that Congress failed to recognize the fact that in placing within the jurisdiction and boundaries of that new State "*all the islands within six leagues of the shore to the most eastern junction of Pearl River with Lake Borgne,*" that Congress, in the Act of Admission of Louisiana in 1812, five years before had fixed a part of the southeastern boundary of the State of Louisiana as "bounded by said Gulf to the place of beginning, *including all islands within three leagues of the coast,*" and Congress thus failed to realize that in fixing the Southern boundary of the State of Mississippi it was including on the western end of the Gulf boundary, as it approached Pearl River, islands and waters previously put and placed within the southeastern boundaries of the State of Louisiana in 1812, thus producing a conflict by the boundaries of both of the two States covering and including a part of the same territory. Repliant avers and alleges that if, owing to said unfamiliarity of Congress with the geography of the new acquisitions of territory, it, by mistake, attempted to take away from Louisiana a portion of its territory previously allotted to it by the Act of Congress of 1812, such would be in violation of Section three (3), Article IV, of the Constitution of the United States.

IX.

Repliant further answering to paragraph (IX) nine of Respondent's cross bill, alleges and avers that if the allegations of fact in said paragraph contained, in so far as they relate to the organizations of the Gulf Coast counties of the State of Mississippi by the Legislature of that State, and also the Sections of the Revised Code of Mississippi and other codifications of the laws of Mississippi, as therein recited, and that the Supreme Court of Mississippi did decide as therein recited in the case of *Leinhard et al. vs. Harrison County*, as alleged by Respondent, be true, Repliant especially denies that the State of Mississippi, or the local authorities of the Gulf Coast counties of the State of Mississippi, have ever exercised control, jurisdiction or sovereignty over the territory herein in controversy, and Repliant especially denies that the Codes, laws, codifications of the State of Mississippi, and the decision of the Supreme Court of Mississippi cited by Respondent, have any application to, or binding effect on, this Repliant, as the State of Louisiana was not in any way, nor were its citizens, parties to said proceedings, and they were all *res inter alios acta*, and neither the legislative nor judicial branch of the government of the State of Mississippi did have, or could have any jurisdiction over the sovereign State of Louisiana in any way, much less to deprive said State of any of its rights, claims or territory; and in all other respects, as to the allegations of fact contained in said paragraph IX, Repliant specially denies the truth thereof.

And the State of Louisiana, as a part of her answer to said cross bill, refers to the original bill herein, and makes every averment thereof a part of this answer, the same as if said averments had been set out at length herein.

And the State of Louisiana for further answer to said cross bill says to any matter or thing in said cross bill con-

tained not herein answered unto, the same is hereby specifically denied.

Wherefore the State of Louisiana prays for relief as in her original bill prayed for; that the Respondent's cross bill be dismissed and for all proper relief in the premises, and for costs of suit.

ORIGINAL No. 11.

THE STATE OF LOUISIANA, Complainant,

versus

THE STATE OF MISSISSIPPI, Respondent,

IN EQUITY.

To the Honorable William Williams, Attorney General of the State of Mississippi, and to the State of Mississippi, represented by Honorable William Williams, Attorney General of said State, herein:

Take notice that this Honorable Court will be moved, for and on behalf of the Complainant, the State of Louisiana, on the 24th day of October, 1904, that Complainant, the State of Louisiana, and Respondent, the State of Mississippi, in the preparation of their evidence for filing and hearing in this cause, will be allowed to respectively offer in separate atlas form, each, the maps offered by them in the preparation of this cause before the Commissioners authorized to take testimony herein, to be prepared under the supervision and direction of the respective

Commissioners of each State, said atlases to be received in lieu of the twenty-five (25) copies of the maps usually required by the rules of this Honorable Court in cases on appeal, or by writ of error, for consideration in the trial of this cause, and for an order in conformity with said motion, as the whole will more particularly and fully appear by a copy of the motion to be filed, which accompanies this notice and is annexed to the same.

STATE OF LOUISIANA,
PARISH OF ORLEANS.

On the 11th day of October, 1904, I served the within notice, together with the annexed motion and exhibits, on William Williams, Attorney General of the State of Mississippi, of counsel for the State of Mississippi in this cause, by handing copies of the same to him personally, in his, the Attorney General's office, in the City of Jackson, and the State of Mississippi.

Sworn to and subscribed before me,
this 12th day of October, 1904.

Notary Public.

Supreme Court of the United States.

Original No. 11.

STATE OF LOUISIANA
COMPLAINANT.

versus

STATE OF MISSISSIPPI,
RESPONDENT.

OCTOBER TERM 1904.

To the Honorable the Chief Justice and Associate Justices of the Supreme Court of the United States:

On motion of the State of Louisiana, Complainant, represented herein by Walter Guion, Attorney General of the State of Louisiana, and,

Upon suggesting and showing to this Honorable Court that the State of Louisiana has already disbursed in costs, in this proceeding, the sum of Twenty-Seven Hundred and Fifty-Two and 16-100 ($2752.16) Dollars, as will more fully appear from Exhibit P-1, hereto annexed and made part of this motion, and has incurred a further expense for costs in this suit, not yet paid, amounting to Twenty-Two Hundred and Forty-Three and 58-100 ($2243.58)

Dollars, as will more fully appear from Exhibits P-2, P-3, P-4, and P-5, hereto annexed and made part of this motion, and that the record, as made up, will embody the following evidence on the part of the State of Louisiana, to-wit:

Fourteen hundred and fifty (1450) legal cap typewritten pages of testimony;

Seventy-seven (77) maps of various sizes;

One hundred and four (104) documents;

Seventeen (17) exhibits;

Five (5) diagrams;

Two (2) samples of earth,

all of which will more fully appear from Exhibits P-6 and P-7 hereto annexed and made part of this motion.

And upon suggesting and showing to this Honorable Court that copies of all such maps, documents, testimony, and other evidence, have been regularly furnished to the State of Mississippi as the same were, from time to time, offered, for filing by said Commissioner, as will more fully appear from Exhibit P-8, hereto annexed and made part of this motion; and,

Upon further suggesting and showing to this Honorable Court that it is estimated by the clerk of this Honorable Court that the printing of the testimony and other evidence, except maps, of the State of Louisiana in the number of copies usually required in cases of appeal and writs of error, would involve an expense of about Two Thousand ($ 2000) Dollars, as will more fully appear from Exhibit P-9 hereto annexed and made part of this motion, and making a total amount of expense already incurred, and to be necessarily incurred, of

six thousand, nine hundred ninety five ($6,995)
Dollars; and 24/100

Upon further suggesting and showing to this Honorable Court that it is estimated that to reproduce twenty-five (25) copies of the seventy-seven (77) maps offered in evidence by the State of Louisiana in this cause, would involve an additional expense of about Seven Thousand ($7000.00) Dollars, an amount almost prohibitive in its nature and for which latter item no adequate and sufficient appropriation has been made by the Legislature of the State of Louisiana, it in fact being impossible to reproduce faithful and correct copies of some of said maps owing to their age and condition, all of which will more fully appear from Exhibit P-10, hereto annexed and made part of this motion; and,

Upon further suggesting and showing to this Honorable Court that the ends of justice would be as well subserved by permitting each State, complainant and respondent herein, to offer one copy of each of its maps, all of the maps of the State of Louisiana to be bound in one atlas, and all of the maps of the State of Mississippi to be likewise bound in one atlas, for use in the trial of this cause.

And upon further suggesting and showing to this Honorable Court that the State of Mississippi, through its Attorney General, has been duly notified of the intention of the State of Louisiana, through counsel, to make this motion and application as will more fully appear from Exhibit P-11, hereto annexed and made part of this motion.

And thereupon the State of Louisiana moves that it be ordered that the States of Louisiana and Mississippi be respectively permitted to, each, offer its

maps in atlas form, an atlas for each State, the respective atlases to contain one copy of each of the maps offered in evidence herein by that State, said atlases of maps to be prepared by the respective commissioners appointed by this Honorable Court, and to be returned to this Honorable Court by the said respective commissioners when making returns under their commissions, and the clerk of this Honorable Court be directed to receive said atlases as being a full compliance with the requirements of this Honorable Court on the subject of this map evidence in preparing the record in this cause for trial and submission.

Attorney General of Louisiana.

EXHIBIT P—1.

Statement of amount disbursed for costs of Court in the suit of the State of Louisiana vs. the State of Mississippi.

1903 July 21,	A. P. Morse, services as asst. counsel	$100 00
" Dec. 16,	American Printing Co. for printing briefs	15 00

I, FRANK H. MORTIMER, Commissioner by appointment of the Supreme Court of the United States, in the suit of the

STATE OF LOUISIANA, Complainant,

versus

STATE OF MISSISSIPPI, Respondent,

No. 11, Original, of the docket of the Supreme Court of the United States—

Do Hereby Certify, that the record in this cause, as made up of evidence offered by the State of Louisiana, consists, and will consist, of the following, to-wit:

About fourteen hundred and fifty (1450) typewritten pages, legal cap size, of testimony;

Seventy-seven (77) maps of various sorts and sizes;

One hundred and four (104) documents;

Seventeen (17) exhibits;

Five (5) diagrams;

Two (2) samples of earth;

I do further certify that no copy was placed in the record of maps Nos. 21 and 23, the originals obtained from the Congressional Library at Washington, D. C., being exhibited before me and returned to said library to be subsequently produced in original on the trial of this cause, it being testified before me that it was impossible to copy said maps by photographic process, by reason of their age and condition,

and that Map No. 56, although the original was filed with me, could not be copied for the same reason.

Frank H. Mortimer

Commissioner.

BEFORE ME, ALVIN EDWARD HEBERT, a Notary Public for the Parish of Orleans, State of Louisiana, duly commissioned and qualified, *Personally Came and Appeared:* MR. FRANK H. Before me, Alvin Edward Hebert, a Notary Public for the Parish of Orleans, this State, duly commissioned and qualified, personally came and appeared, Walter Guiou, Attorney General of the State of Louisiana, who being by me first duly sworn, deposes and says, that, on Friday, October 7th, 1904, he personally, by direct telephonic communication, notified Hon. William Williams, Attorney General of the State of Mississippi, at Jackson, Mississippi, that the State of Louisiana, would, through counsel, appear in the Supreme Court of the United States, at Washington, D. C., on Monday, October 10th, 1904, and then move the said Court for an order, permitting the State of Louisiana in preparing for submission to said Court, the record in the suit of the State of Louisiana vs. the State of Mississippi, No. II, Original, of the Docket of said Court, to tender her map evidence in a single atlas form, containing all maps offered by the State of Louisiana, except those on file in the library of Congress, Washington, D. C., and which could not be copied by photographic process by reason of their age, said Court being moved to accept and receive said single atlas of maps as a full compliance with the requirements of its rules in such cases and the enormous expense of reproducing further copies of said maps being thereby avoided; and,

Affiant further deposes and says that the State of Mississippi had, from time to time, been furnished

with copies of the maps, documents, and other evidence, offered as evidence, in said cause, as said maps were, from time to time, offered in evidence in said cause, save and except those maps, copies of which were formally waived by the State of Mississippi, as shown by the record, and those certain maps Nos. 21, 23, and 56, which, by reason of their age and discoloration could not be copied by photographic process.

OFFICE OF THE CLERK,
SUPREME COURT OF THE UNITED STATES,
Washington, D. C., October 22, 1904.

F. C. ZACHARIE, Esq.,
Washington, D. C.

DEAR SIR: In compliance with your verbal request of today, I beg to say I estimate that the total cost of preparing and printing the record in the case of Louisiana v. Mississippi, No. 11, Original, of October Term, 1904, at about $2,000. This estimate is based on your statement that the record will contain about 1600 typewritten pages of 3 hundred words to a page.

Yours truly,

JAMES H. MCKENNEY,
Clerk Supreme Court U. S.,

No. 11, Original.

STATE OF LOUISIANA, COMPLAINANT,

vs.

STATE OF MISSISSIPPI.

IN EQUITY.

BRIEF ON BEHALF OF THE STATE OF LOUISIANA IN SUPPORT OF HER BILL OF COMPLAINT.

STATEMENT OF PLEADINGS.

Without quoting here at length the pleadings in full, it will be sufficient for the purposes of this argument to state briefly the claims of Louisiana and the counter-claims of Mississippi set forth in the pleadings of the two States.

Louisiana claims the disputed territory by virtue of the act of Congress admitting her into the Union approved April 6, 1812, fixing her boundaries and the amendatory act of Congress approved April 14, 1812, adding territory to her domains, as including within these boundaries the territory here in dispute; Louisiana further claims herein, in

the bill of complaint, that the boundaries of the State of Mississippi under the act of Congress approved December 10, 1817, did not include the territory in dispute; and if they did, that said act would be inoperative and void and would not affect the boundaries laid down in the Louisiana act five years previous to the passage of the Mississippi act; the bill then sets forth that the States of Mississippi and Louisiana have by legislative enactments regulated the oyster industries of the two States, some of the provisions of which laws are in conflict with each other; Louisiana further claims that the true boundary line of southern Mississippi and the northern line of the southeast portion of Louisiana is at the deep-water sailing channel, extending from the mouth of the Pearl river through the upper corner of Lake Borgne, north of Half Moon, or Grand Island, eastward through Mississippi sound to the Cat Island pass, north of Isle à Pitre and southwest of Cat island, in which channel buoys, marking it, have been placed by the United States Coast Survey; that owing to the great differences between the oyster laws of the States of Louisiana and Mississippi, and there being no definitely marked boundary line in this region of the States and the waters thereof, there came about a violent clash and dispute in regard to their rights in the disputed territory between the two States, their officers and citizens, which threatened to result in violence; and, thereupon, that the governor of the State of Louisiana initiated and brought about an agreement and understanding with the governor of Mississippi by which the governor of each State appointed a commission of citizens of each State to endeavor to amicably settle the dispute and agree upon the boundary line; that after a joint meeting of the two commissions and full discussion of the subject-matter, it appeared that there could be no amicable agreement on the subject-matter and the Mississippi commissioners said that—

"*It is apparent that the only hope of a settlement is a friendly suit in the Supreme Court of the United States and we respectfully suggest that course*" (Record, p. 25).

and in accordance with that suggestion and agreement the present suit was brought.

Whereupon The State of Mississippi, respondent, through its counsel, filed a demurrer to the bill of complaint, and asked the dismissal of the suit because the Governor and Attorney General of Louisiana had no authority in law to bring the suit; and further because this honorable court had no jurisdiction in the matter, as it did not constitute a controversy between the States of Louisiana and Mississippi as to their boundary line within the meaning of the Constitution of the United States; and further that, under the boundaries as laid down in the two acts admitting the respective States, the territory in dispute belonged to Mississippi and that there was no conflict between the provisions of said two acts of Congress; and further that the bill showed upon its face that the suit was attempted to be brought by the State of Louisiana in its sovereign corporate capacity, when the said State had no property rights involved, but was simply championing the rights of its private citizens and lending its name for their individual benefit; and further that the State of Mississippi had never, in any manner, denied or controverted the boundary line of the State of Louisiana or through any of its duly authorized officers; and that the action of the so-called commissioners of the State of Mississippi, in regard to the adjusting of the boundary line, was unauthorized by the State of Mississippi or any of its laws; and further that the alleged threats of an armed conflict between the officers of the State of Louisiana and those of the State of Mississippi were merely alleged generally in the bill without setting forth any facts or details.

This demurrer having been overruled, the State of Mississippi filed its answer and cross-bill and denied singularly and articulately almost every material allegation contained in the bill of complaint, and set up in the cross-bill an entirely new and different boundary line from that claimed by the State of Louisiana, basing its claim on its interpretation

of the acts of Congress, creating the two States, to the effect that the islands which Congress gave to Louisiana were other islands outside of and beyond the disputed territory, in the gulf of Mexico, and that Mississippi owned the disputed area, because it was composed of islands which were within six leagues of her shore; and setting forth other new matters which we will not recapitulate here, but will discuss hereafter in the course of the argument in this brief. To this cross-bill of Mississippi, the State of Louisiana filed her replication, and answer to the cross-bill, in which it is set forth and alleged that if the contentions of the State of Mississippi, as set forth in her cross-bill, be true that the act of Congress admitting the State of Mississippi as a State, gave to the State of Mississippi the territory in dispute, then said portion of said act would be unconstitutional and void as taking away from the State of Louisiana without her consent, a portion of her territory previously granted to her by Congress in 1812, and if there be a conflict between the two acts of Congress, the prior grant to Louisiana must prevail over the later grant to Mississippi; that the islands embraced in the grant to the State of Louisiana are not to be defined and delimited from the main land of Louisiana, but are to be defined, determined and delimited from the *Louisiana marshes*, as her *coast* of the State of Louisiana as set forth in the act of Congress creating the State of Louisiana; further that the acts of Congress cited by respondent in the cross-bill cannot in any way affect the prior grant to Louisiana; further that the officers and citizens of the State of Mississippi, as well as the official cartographers, have from almost time immemorial acknowledged and recognized the territory in dispute as belonging to Louisiana and that Louisiana has always uniformly asserted title thereto, and that Mississippi, until quite recently has tacitly assented thereto; and further, if there be any inconsistency or clash between the boundary lines of the States of Louisiana and Mississippi as laid down in their respective acts of admisaion into the Union,

that said conflict was purely unintentional on the part of Congress and arose from a want of geographical and topographical knowledge of the territories, of a remotely distant country from the National Capital, and at the time only recently acquired by the United States; and further that the recent acts of the legislature and courts of the State of Mississippi, in reference to islands within eighteen miles of her shore, referred to those islands belonging to the State of Mississippi outside of the disputed area and about the ownership of which there was no dispute and that such legislative enactments and judicial decisions had no reference or relation to the disputed area of today; and finally that the adoption of the deep-water sailing channel line as the boundary of the States in this region reconciled the acts of Congress, was in accord with the line which the two States have for the past one hundred years recognized by their own acts as the true boundary line, and should be decreed to be such today.

With this statement of the pleadings we will, therefore, in our argument and discussion first consider—

THE DEMURRER OF THE STATE OF MISSISSIPPI TO THE SUFFICIENCY OF THE BILL OF COMPLAINT AS FILED BY THE STATE OF LOUISIANA.

An analysis of the demurrer of the State of Mississippi shows that it subdivides its attack on the sufficiency of Louisiana's bill of complaint into the three following parts:

I. That the governor and attorney general of Louisiana were not authorized to file the bill on behalf of the State of Louisiana.

II. That there was no danger of an armed conflict between the States; that there was no dispute; that Louisiana was acting for her citizens and their private interests and not for herself as a sovereign State; and that there was not a con-

troversy between the two States within the intendment of the provisions of the Constitution of the United States on the subject.

III. That the State of Louisiana had no direct financial proprietary interest that would be affected by a decision of the issues.

We take it that your honors in overruling the demurrer of the State of Mississippi did so on the theory that the bill of complaint, on its face, stated a cause of action giving this honorable court jurisdiction and that your honors would expect the State of Louisiana, on the trial of the case, to show the existence of the state of facts which she claims establish her cause of action (Kansas *vs.* Colorado, 185 U. S., 125).

This leads us to a consideration of the facts established by the record for the purpose of ascertaining if there be really a controversy between the States of Louisiana and Mississippi in their sovereign capacities, such as would justify your honors in asserting your right to jurisdiction as prayed for by the State of Louisiana and such as would come within the provisions of the Constitution of the United States, where there is alleged to exist a *controversy between two States*. It will be necessary to further ascertain if the record shows, as a result of the acts of Congress respectively creating the States of Louisiana and Mississippi, such confusion and conflict as to boundaries as would give rise to a legitimate subject of dispute as to their respective boundaries today, and lastly whether the record shows a direct financial and proprietary interest in either the State of Louisiana or the State of Mississippi which would be affected by the existing contentions and by a decision of the issues involved herein.

We respectfully submit that the record affirmatively shows the existence of all of these facts and conditions essential to constituting a cause of action within the intendment of the

article of the United States Constitution just referred to, as we will now proceed to show by recounting historically the facts that led up to the institution of this suit by the State of Louisiana and as these propositions are all closely interrelated, cognate and bearing one upon the other, we shall consider and discuss them collectively under one heading in our consideration of the demurrer, setting them forth in chronological order.

In the year 1886, the State of Louisiana, by act No. 106 of the legislature of that year, page 195, first undertook to adopt a comprehensive system of control of her State oyster-producing waters and of her oyster industry. This law placed the power to control the industry in the hands of the officials of the political subdivisions of the State of Louisiana, corresponding to the counties of other States, but which are in Louisiana called *parishes*. By its provisions, these parochial authorities were vested with the power to control the oyster waters and regulate the industry in their several localities; but along general lines laid down in the State law. As the oyster industry grew in importance, through its own natural development, this original oyster law was followed by additional oyster legislation to be found in the acts of the Louisiana legislature Nos. 110 of 1892, page 142, and 121 of 1896, page 170, until the year 1900 when the legislature of Louisiana, appreciating the growth of the State's oyster industry and the value of the State's ownership of her oyster water bottoms and beds, adopted act No. 159 of the session of that year providing for the creation of a legislative commission to investigate and study the oyster industry of the State. It will be observed by referring to the Louisiana oyster law, act 121 of 1896, page 175, section 9, 3rd paragraph, that the *dredging* of oysters was prohibited in Louisiana waters. The dredging of oysters is a process by which the water bottoms are scraped for the purpose of gathering the oysters therefrom. Mechanical appliances, called *dredges* are employed and are operated on

vessels, some of which vessels are propelled by steam and others by sail power. Adopting a policy absolutely different from that of Louisiana, the State of Mississippi (chapter 129 of the Laws of Mississippi of 1896 and chapter 90 of the Laws of 1898,) permitted the use of these dredging appliances in the oyster fishing of her waters, thus leading to a radical difference in the treatment by the two States of their oyster industries in their respective waters; and furnishing an opportunity for a consequent conflict in the system of operation in the event of any uncertainty or dispute as to the boundaries of the two States.

It will also be noted that under the provisions of this Louisiana law, page 171, section 4, non-resident oyster fishermen were prohibited from fishing oysters in Louisiana waters In this action of her legislature, in reserving for the exclusive benefit of her own citizens the privilege of fishing oysters in her waters, Louisiana was but following the example previously set by some of her sister oyster States on the Atlantic coast, and was exercising a right which has been universally recognized as being properly hers: (McCready *vs.* Virginia, 94 U. S., 391, affirming 27 Grat. (Va.), 985 (and in effect overruling *Ex parte* McCready, 1 Hughes (U. S.), 503); Alvey, C. J., in Hess *vs.* Moir, 65 Md., 586; Haney *vs.* Compton, 36 N. J. L., 507; People *vs.* Lowndes, 130 N. Y., 455; State *vs.* Medbury, 3 R. I., 138; Chambers *vs.* Church, 14 R. I., 398; 51 Am. Rep., 410. See also New England Oyster Co. *vs.* McGarvey, 12 R. I., 385; Eng. & Am. Encyc. of Law, vol. 13, 2d ed., p. 575, and note 3.)

Returning, however, to the more concrete facts in the record in the matter of the controversy we find that in the locality where the disputed boundary exists, is situated the parish of St. Bernard, a political, governmental subdivision of the State of Louisiana. The parochial authorities of the parish of St. Bernard, as shown by the official records hereinafter referred to, in January, 1898, in enforcing the provisions of the then Louisiana oyster law, act 121 of 1896, equipped

and sent out an official expedition to exclude from the oyster waters of the parish of St. Bernard, and which were necessarily, therefore, oyster waters of the State of Louisiana, any non-resident oyster fishermen who might be found fishing oysters in those waters (documents Nos. 1 and 2, Record, pp. 989 and 990).

The sheriff of St. Bernard, the chief executive law officer (Record, pp. 144 *et seq.*) and the president of the police jury of the parish of St. Bernard, the presiding officer of the parochial legislative body, (Record, pp. 172 *et seq.*) and who was at the time the lieutenant governor of the State of Louisiana, both testify as to the personnel of, and the instructions given to this expedition, while Alcide Guiterrez (Record, pp. 152 *et seq.*) and Raymond Roberto (Record, pp. 158 *et seq.*) who were members of the expeditionary party, both testify as to the results of the expedition; that non-resident Mississippi oystermen were found fishing oysters in Louisiana waters, and that they were, in accordance with the provisions of the Louisiana oyster law, notified that they must stop fishing and move out of the Louisiana waters. These Mississippians then complained to the Mississippi authorities of their ejection from Louisiana waters by the Louisiana officers, and this, in due course, led to a conference in New Orleans, Louisiana, between Mr. Albert Estopinal, Jr., the district attorney, or prosecuting law officer of the parish of St. Bernard, and a Judge J. H. Neville, who undoubtedly had been, and was understood by Louisiana to then still be, the district attorney, or chief prosecuting law officer, of Hancock county, State of Mississippi (Record, pp. 162 *et seq.*). It is true that the Mississippi evidence may now show that Judge Neville had just resigned the office of district attorney of Hancock county, State of Mississippi, or that his term had just expired, and that he was, in the interview hereafter referred to, acting in his private capacity as an attorney-at-law; but the record will also show that Louisiana did not so understand it. On this subject, Mr.

Albert Estopinal, Jr., district attorney of the parish of St. Bernard, State of Louisiana (Record, p. 163), testified as follows, in reference to his conference with Judge Neville of Mississippi, to wit:

Q. "Who was Judge Neville, will you please state?"
A. "He was at that time, the district attorney, if they call him such, over in Hancock county, I believe, State of Mississippi."
Q. "Did he so represent himself to you?"
A. "Yes, sir; it was in his capacity as prosecuting or district attorney over there that he consulted with me in regard to this matter."

In discussing the subject of probable results in the event that the authorities of the parish of St. Bernard persisted in their then intention of excluding Mississippi and other non-resident oyster fishermen from Louisiana waters, Mr. Estopinal further testifies, in relation to his conference with Judge Neville of Mississippi, as follows:

Q. "Did he in any way give any expression as to what the attitude of the Mississippi authorities would be in the event that Louisiana, or the parish of St. Bernard, persisted in her intention."
A. "Yes, sir; he, as district attorney, was quite determined to oppose the contention of the Louisiana people."

* * * * * * *

Q. "Did he, in any way, indicate the extent to which this resistance would be carried."
A. "My recollection is, that he stated there would be an armed conflict. That there would be blood shed. The fact is that the judge, that the district attorney, Mr. Neville appeared to be very anxious and very zealous to do something for the Mississippi people, and as I said a moment ago, he went on to state that the Mississippi authorities would contest any such right of the State of Louisiana as contended by Louisiana, represented in this particular instance by the parish of St. Bernard."

It is well to state at this point that before the adoption and enforcement of the act of the Louisiana legislature excluding non-resident oyster fishermen from Louisiana waters, Mississippi oyster fishermen had been accustomed to fish oysters all through the Louisiana waters, east of the Mississippi river, even down through the parish of Plaquemines, which latter parish is not in any way included in Mississippi's present claim, and that Louisiana was not excluding non-residents from any particular disputed area, but was enforcing a law applying to all her waters. This is shown by the testimony of the Mississippi witnesses taken in connection with Mississippi's present contention. The map, Mississippi "A" (Record, p. 88), shows Drum bay, Live Oak bay, California bay, Scow pass, Martin island, Mitchell islands, and Julius pass, all to the south of the red-ink line thereon, and therefore beyond the Mississippi claim. Yet Mr. B. R. Clements, a Mississippi witness (Record, p. 1216), testified as follows:

Q. "Did you ever fish as far south as Drum bay?"
A. "Yes, sir."
Q. "Did you ever fish as far south as Live Oak bay?"
A. "Yes, sir; no, I did not know it by that name then."
Q. "Did you consider Drum bay and California bay in Mississippi or Louisiana?"
A. "Well, we could not say, Judge. We considered the whole business, there, in Mississippi at that time, because we were never restrained from catching anything and nobody told us anything about it."

The testimony of this, Mississippi's first witness, is typical of all of her other witnesses on this point. They considered that it was wrong for Louisiana, as a State, to restrict to her own citizens the benefit and privilege of her oyster fisheries, and resisted this exercise by Louisiana of her legal right, and did not then raise a complaint as to boundary. The question of boundary arose only as an after conclusion, when it became necessary to, in some way, meet Louisiana's aggressive attitude.

Reference is made to the conference of the district attorney of the parish of St. Bernard and the presumed district attorney from the State of Mississippi for the purpose of showing the official character that the dispute was taking on, and the sort of conflict that was likely to follow aggressive action by the two States. Nothing definite, however, appears to have come from the conferences of these officials of the two States *except a suggestion of litigation to settle the question* until January 19, 1901, when at the instance of the Louisiana legislative commission already referred to as appointed under the provisions of act 159 of 1900 to study the Louisiana oyster industry, and at the instance of committees appointed from the police juries of the Louisiana parishes of St. Bernard and Plaquemines whose oyster waters were being invaded by Mississippi oyster fishermen (Record, p. 990, document No. 3, and Record, p. 1091, document No. 61), a meeting of the State officials of Louisiana was held in New Orleans, Louisiana, to consider the subject of the dispute with the State of Mississippi, and the invasion by nonresidents of the Louisiana oyster waters (Record, p. 20, Exhibit "A"). The meeting was largely attended, was presided over by his excellency, William W. Heard, then governor of the State of Louisiana, and with its occurence, the subject of the trouble ceased to be a matter of parochial concern, and from the Louisiana point of view at once became a State matter. The result of the meeting was that the governor of the State of Louisiana appointed a commission of five (5) members and by an official communication addressed to the governor of the State of Mississippi, requested that official, on behalf of his State, and in order to have the matter considered by the State of Mississippi as a State, to appoint a similar commission, which two commissions might confer and see if it were possible to affect an amicable settlement of the dispute between the two States (Record, p. 22, Exhibit "B").

On February 9, 1901, his excellency, A. H. Longino,

then governor of the State of Mississippi, appointed a similar commission on behalf of his State, and officially advised the governor of Louisiana to that effect (Record, p. 23, Exhibit "C").

These two commissions held a joint conference in New Orleans, Louisiana, March 26, 1901, and thoroughly discussed the subject of dispute. Even then Mississippi's present definite contention had not as yet been disclosed, as will be seen by a reference to the minutes of the meeting (Record, p. 24, Exhibit "D"); but Louisiana's position was clearly defined, and a map showing Louisiana's contention as to the deep-water channel boundary in the disputed area was presented to the Mississippi commission. This map is known as Exhibit "E," and is bound with the Louisiana Atlas of Maps, page 60. The Mississippi Amicable Boundary Commission after some delay and a study of the subject made a reply to the Louisiana commission July 20, 1901, stating that it was in its opinion impossible to effect an amicable extrajudicial settlement of the dispute (Record, p. 25, Exhibit "F"), and concluding its report with the following important sentence, to wit:

"*It is apparent that the only hope of settlement is a friendly suit in the Supreme Court of the United States and we respectfully suggest that course.*" (Italics ours.)

A report to the same effect was likewise submitted by the Mississippi commission to his excellency, A. H. Longino, governor of Mississippi, on October 2, 1901, (Record, p. 2021, Mississippi document No. 78) to whom was also submitted a minority report by two members of the same commission, (Record, p. 2028, Mississippi document No. 79). His Excellency, A. H. Longino, governor of Mississippi, in turn, in January, 1902, in his annual message, submitted to the legislature of the State of Mississippi, then in session, a report concerning his actions in endeavoring to effect an amicable settlement of the dispute with the State of Louisiana

(Record, p. 993, document No. 6, and Record, p. 2031, Mississippi document No. 80) and referred to the suggested and contemplated friendly suit in this honorable court, thus acquainting the Mississippi legislature with that fact. Anticipating that the matter would be settled in this way, and no doubt considering that it would be ample time to make provisions for the defense of the suit after it had been instituted, the legislature of the State of Mississippi took no action at that time on the report of its governor. On the other hand, the State of Mississippi, at this session of its legislature, did adopt a new law controlling her oyster waters and oyster industry, (chapter No. 58 of the Laws of Mississippi of 1902), which indirectly tended to bring this matter to a crisis. This law created a State oyster commission, vested with the entire control of the Mississippi oyster territory and industry. The creation of this commission took the control of Mississippi oyster industry entirely out of the hands of the several coast county authorities, where it had been previously lodged, and centralized it in this State body, a department of the State government of the State of Mississippi, which was, by the terms of the law creating it, authorized to establish a system of patrol of the Mississippi oyster waters, and to maintain patrol boats to enforce the Mississippi oyster law in her territory.

In July, 1902, the State of Louisiana followed the example of the State of Mississippi, and adopted act No. 153 of 1902, page 274, creating the Oyster Commission of Louisiana, which was also created a department of the State government of the State of Louisiana; vested with the full control of the oyster industry of Louisiana, authorized to establish patrol boats, and maintain an armed patrol of Louisiana oyster waters, to protect Louisiana's rights and enforce her oyster laws in her waters.

This legislation of the two States, as just stated, brought the subject of the boundary dispute between the two States to a crisis, as both commissions had the legal authority and

financial ability, as well as the armed vessels and men to enforce their construction and interpretation of their respective rights and ideas as to boundaries, and had there been no danger of an armed conflict before, one was now likely to occur, unless some arrangement was made as to boundaries whereby a *modus vivendi* should be established until the dispute between the States as to their boundary could be judicially determined. The oyster commissions of both States appreciated these facts. Mr. James M. Breaux, president of the oyster commission of Louisiana (Record, pp. 805 *et seq.*) testified on this subject as follows:

Q. "Do you know what the provisions, and did you know at the time, what the provisions of the Louisiana law were in regard to the jurisdiction and control of the Oyster Commission of Louisiana over the oyster waters of the State of Louisiana?"

A. "Yes, sir."

Q. "Did you, at the time, consider that the territory which we commonly call now, the neutral territory, was part of the State of Louisiana?"

A. "Yes, sir."

Q. "Would you or would you not have considered it necessary, in the absence of an amicable agreement between the two States, to have enforced the Louisiana law in what is now called the neutral territory?"

A. "Beyond a doubt."

Q. "Were you authorized by the Louisiana law, as the Oyster Commission of Louisiana, to maintain an armed patrol boat in patrolling the waters of the State of Louisiana and enforcing the Louisiana law?"

A. "We were."

Q. "Did you maintain such a patrol boat in that territory?"

A. "We did."

Q. "In the event there had been resistance on the part of the authorities of the State of Mississippi or the people of the State of Mississippi to the enforcement of the Louisiana law in that territory, would you or would you not, at that time, have felt compelled to have recourse to your armed patrol boat to enforce Louisiana's rights in that territory?"

A. "Certainly, I would."

* * * * * * *

Q. "Mr. Breaux, you, of course, know there was an agreement which happily avoided any crisis. Suppose there had been no such agreement at that time, what would you have done as president of the Oyster Commission of Louisiana in regard to this disputed territory?"

A. "I would have protected the oyster territory of Louisiana in any way—well, with armed force, as we had equipped our patrol boat for that purpose."

Q. "Was this boat actually armed?"

A. "It was, yes, sir."

Q. "At the time, and just immediately prior to this conference which occurred in September, 1902, was there any danger of a conflict, and if so, on what do you base your idea?"

A. "Was there any danger of a conflict before the understanding between the two commissions?"

Q. "Yes, sir."

A. "Well, we thought there would be probable danger of a conflict, yes, sir; in other words, we were satisfied there would be, unless there would be an agreement made between the two commissions, and as president of the Oyster Commission of Louisiana, I was determined to protect the Louisiana territory."

We make this extract from Mr. Breaux's testimony for the purpose of showing the critical condition that affairs had assumed before Louisiana filed her bill of complaint and instituted this suit. In anticipation of this conflict, and to avoid it, the Oyster Commissions of Louisiana and Mississippi met in joint conference in the city of New Orleans, Louisiana, on September 9, 1902, and after a full discussion of the conditions existing adopted the following joint resolution.

"On motion of Commissioner F. J. Ladner of Mississippi, seconded by Commissioner N. H. Nunez of Louisiana, the following resolution was adopted:

"*Be it resolved by the Oyster Commissions of the States of Louisiana and Mississippi, in joint conference*, That all the water territory embraced within the following limits, to wit:

"Beginning at a point in the center of the mouth of Pearl river, thence in a southeasterly direction to Malheureux point, thence in an easterly and northeasterly direction fol-

lowing the shore lines to Grand pass, thence along the west shore line of Grand pass, thence easterly to the southernmost point of Sun Down island, thence in a northeasterly direction to the center of the deep-water channel, called Cat Island pass, and thence following the deep-water channel, westwardly, passing between Grassy island and St. Joseph lighthouse, to the point of beginning, *shall, pending the final decision by the Supreme Court of the United States in the boundary suit to be instituted,* remain a common fishing ground to be fished by boats of either State in accordance with, and upon compliance with, the laws of either State, and inspectors and officers of the respective commissions (oyster) will govern themselves accordingly" (Record, p. 991, document No. 4). (Italics ours.)

The adoption of this agreement established a neutral territory between the two States, pending the judicial determination of the boundary dispute, and permitted the two commissions to operate without danger of a conflict, provided the issues were speedily settled by suit. The neutral territory did not include all of the disputed territory. Louisiana would not consent to this. By it complete temporary jurisdiction was given, however, to Mississippi over all the waters of Mississippi sound, north of the deep-water channel, which waters Louisiana concedes belong to Mississippi. The waters of Mississippi sound between the deep-water channel and the north shore line of the Louisiana marshes were neutral; and all waters of the Louisiana marshes south of the Louisiana shore line were given into the exclusive jurisdiction of Louisiana, as Louisiana would not even temporarily recognize the right of Mississippi therein.

As appears from the agreement, this was but a *modus vivendi,* pending the judicial determination of the disputed boundary, and was adopted by the official authorities of the two States to prevent the serious conflict which would have inevitably followed in the absence of any such provision, and the resulting conflict of authority.

Louisiana then, on October 20, 1902, filed her motion in

this honorable court, asking permission to file her bill of complaint against the State of Mississippi, and the bill of complaint was ordered filed (Record, p. 3).

To show that Mississippi also regarded the issues as *State* issues from her point of view, it is to be noted that even after the institution of this suit by Louisiana, the governor of Mississippi endeavored to secure an amendment of the *modus vivendi* agreement of September 9, 1902 (Record, p. 992, document No. 5), which agreement had been made by the Oyster Commission of Mississippi one of the departments of government of the State of Mississippi.

As we have previously stated the legislature of the State of Mississippi had by the governor's message (Record, p. 2031, Mississippi document No. 80) been advised that a friendly suit would be instituted by the State of Louisiana to settle the disputed boundary, and that by the governor's second message (Record, p. 2032, Mississippi document No. 81) the legislature of the State of Mississippi was advised of the actual institution of the suit by the State of Louisiana and was informed that the State of Mississippi, officially, claimed ownership of the disputed territory and that, owing to the great importance of the suit to the State of Mississippi, special counsel should be employed for its defense. The legislature of the State of Mississippi then took official cognizance of the subject-matter of the boundary suit instituted by the State of Louisiana and through legislative committees made a report (Record, p. 2108, Mississippi document No. 86) and we today find the interests of the State of Mississippi represented here not only officially by her attorney general and by the ablest special counsel which she, as a State, could find within her own borders, but also assisted by one of the present-day great authorities on international law.

On this subject, therefore, of the official character of this controversy between the two States, in recapitulation, we find that the controversy in an official way began when the officials of the parish of St. Bernard, State of Louisiana, ex-

cluded the Mississippi oyster fishermen from Louisiana waters. This was followed by the conference between Mr. Estopinal, a district attorney of Louisiana, and Mr. Neville, who was supposed, as district attorney, to officially represent the State of Mississippi. Then came the correspondence between the governors of the two States in their official capacities, followed by the appointment and conference of their two commissions and the suggestion of the Mississippi commission. Then followed the conference and agreement of the oyster commissions of the two States, all recognizing the absolute necessity of a judicial determination of the issues in dispute; and finally the legislatures of the two States, at all times fully advised of the progress of the negotiations and proceedings, on the one part ratified what had been done and on the other part took the necessary steps to secure a defense of the suit that had been instituted against her. This certainly constitutes an admission of the existence of a boundary controversy between the two States in their sovereign capacity.

Let us now for a moment consider the authority by which the State of Louisiana, in her sovereign capacity, acted in the institution of this suit.

The State of Louisiana, in presenting her bill of complaint to your honors, acted by instructions and authority of his excellency, William W. Heard, governor of Louisiana, and made her appearance through him, and through her attorney general, Judge Walter Guion, the latter appearing in accordance with the provisions of act No. 65 of the Louisiana legislature of 1884, which in part provides as follows:

"*Be it enacted by the General Assembly of the State of Louisiana*, That the attorney general be, and he is hereby authorized and empowered to institute and prosecute any and all suits he may deem necessary for the protection of the interests and rights of the State" * * * (Record, p. 1176.)

To place the question of authority of the governor and attorney general of the State of Louisiana in instituting

this suit beyond any question of dispute, and to show that the State of Louisiana stood ready to abide by the consequences of your honors' eventual decision in this case, the legislature of Louisiana adopted act No. 26 of its session of 1904, reading as follows:

"*Be it resolved by the senate of the State of Louisiana, the house of representatives concurring*, That the action of his excellency, William W. Heard, governor, in instituting in the Supreme Court of the United States, on the part of the State of Louisiana, a suit against the State of Mississippi to determine the water boundary between the two States be approved, ratified and confirmed" (Record, p. 1173, document No. 99).

There is thus shown by the record the existence of abundant authority of a positive character warranting the institution of this suit by these officials, and all of this is independent of the authority that naturally exists in a Governor of any of our States to take, in a comparative emergency, such action as would best protect the interests of his State.

The fact that the act of Congress creating the State of Louisiana gave that State all islands within there leagues, or nine miles, of her *coast*, and that the act of Congress creating the State of Mississippi gave that State all islands within six leagues, or eighteen miles, of her *shore*, and that some islands within nine miles of the Louisiana *coast* were also within eighteen miles of the Mississippi *shore*, gave a basis from which the boundary controversy between the two States could legitimately and logically arise.

We submit that the foregoing recapitulation of facts unquestionably shows a controversy between the two States as such, and such as comes fully within the constitutional provision.

But not alone were questions of ownership, sovereignty, and legal jurisdiction, as general propositions, at issue in this boundary controversy between these two States. Financial values of great magnitude were also involved in the

question of ownership of the disputed territory. This is shown in many ways by the record. The legislature of the State of Mississippi itself, in January, 1904, received a report, through a committee appointed for that purpose, showing the area of the disputed territory to exceed three hundred (300) square miles, and that the lowest estimate placed upon its value was two millions of dollars ($2,000,000) (Record, p. 2108, Mississippi document No. 86). This estimate of value is confirmed by the testimony of Mr. W. K. M. Dukate, a large Mississippi oyster packer, who testified that he and his associates would be willing to pay the State a rental of two hundred thousand dollars ($200,000.) per annum for the exclusive privilege of fishing oysters in the disputed territory, provided he and his associates were protected in their rights by the State owning the territory (Record, p. 372).

The ownership of all the land that had not been previously sold by the State and the ownership of all of the water area in the disputed territory, being the bottoms of navigable waters of the State of Louisiana, was vested in and claimed by the State of Louisiana in her sovereign capacity and no individuals had any private rights therein. This water area had a positive value of great magnitude. The State of Louisiana, under her oyster law was vested with the ownership of these oyster water bottoms, and authorized to rent them for the purposes of oyster cultivation for which she received a direct rental through her oyster commission of one dollar ($1) per acre per annum and a further revenue of two cents (2c.) per barrel from each barrel of oysters gathered, either from these leased bedding grounds, or from the natural oyster reefs, which were also her property in absolute ownership.

Sections 9 and 10 of act 153 of 1902, pp. 281 and 282.

The value of the direct, positive, financial interest which the State of Louisiana, in her sovereign capacity had and

has in this case will therefore extend into the millio
dollars. Capitalizing at 4 per cent. (4 %) Mr. Duk
annual rental offer of two hundred thousand do
($200,000) would place a value of five millions of do
($5,000,000) on these water bottoms, not considering or
cluding the value of the thousands of acres of sea ma
land above water, included in the disputed territory.

We therefore submit that from the above statement
facts made up from the record, it appears beyond ques
of doubt that the governor and attorney general of the S
of Louisiana were authorized to bring this suit and file a
of complaint on behalf of the State of Louisiana seek
relief at the hands of your honors against the State
Mississippi.

That there exists between the States of Louisiana a
Mississippi, in their sovereign capacity as States, a dispu
or controversy affecting the boundary line separating the
in the locality in contention of a character to justify th
suit.

That the two States, in their sovereign capacities, ha
large financial interests at stake in this litigation.

That serious results would flow from the conflict of la
and official authority, were not the dispute judicially dete
mined by the tribunal having jurisdiction of such causes
action; and that a condition of affairs has been shown t
exist that warrants the appeal to and intervention of th
Supreme Court of the United States.

That this is true is shown by the fact that after you
honors had overruled Mississippi's demurrer denying th
existence of a boundary dispute between the two States i
their sovereign capacities, she filed her answer and cross-bil
(Record, p. 74), in which pleading she officially denie
Louisiana's ownership of the disputed area, made specific
and positive claim that the area belonged to her, and se
forth and urged the adoption of a boundary line different
from that claimed by Louisiana; thus, when forced to it,

finally confessing in her sovereign capacity a judicial admission of the existence of a serious controversy between the two States, and confirming the correctness of your honors' original ruling that a cause of action did exist, justifying your taking jurisdiction of this case.

That the facts, proven by the record, justify a dismissal and overruling of respondent's demurrer, is amply sustained by our jurisprudence.

The last clause of section 2, article III of the Constitution of the United States grants jurisdiction to this honorable court—"*to controversies between two or more States*, between a State and citizens of another State" etc. (Italics are our own.) It therefore becomes necessary in order to establish the jurisdiction of this honorable court, to inquire if the allegations made in the bill of complaint, are borne out by the evidence in the record, as showing a "controversy between two or more States" in the language of the Constitution. And in order to determine that issue it must first be determined what a "controversy between two or more States" is in its constitutional sense. Webster's International Dictionary, in common with the other lexicons defines the word "controversy" to be a contention; dispute; debate; discussion; agitation of contrary opinions;" in a secondary sense "quarrel; strife; cause of variance; difference;" and in a still further sense "a suit in law or equity; a question of right" which last he designates as obsolete. It was contended by counsel for respondent herein, (the State of Mississippi) both in their demurrer and by an attempt to prove by evidence at some length in the record that the allegations of complainant's bill were not true and correct and that this case now at issue before this honorable court was not a controversy between the two States, in their sovereign capacities, in a constitutional sense, but was simply a contention and controversy between individual citizens of the two States, and that Louisiana, the complainant was lending her

aid as a sovereign, by instituting this suit, to her citizens, merely to vindicate their individual rights in the premises.

The article in the present Constitution of the United States, was preceded by an article in the prior "Articles of Confederation" which provided under article X, that power should be granted to Congress to erect a tribunal to have jurisdiction over "all disputes and differences now subsisting, or that hereafter may arise between two or more States concerning boundary, jurisdiction or any other cause whatever." The change from the former tribunal under the Articles of Confederation, to the Supreme Court of the United States, and the reasons therefor are fully set forth in No. LXXX of the Federalist. In the case of Rhode Island *vs.* Massachusetts, 12 Peters, p. 719, this honorable court, in a case of boundary between the two States, rules that the jurisdiction granted to it was as broad as that given to Congress under the former Articles of Confederation. In that cause, as in this, the respondent and defendant moved, on the part of the State of Massachusetts "to dismiss the bill on the ground, that the court had no jurisdiction of the cause" (p. 670). In the opinion of the court, delivered by Mr. Associate Justice Baldwin, the question of jurisdiction on boundary suits between States is fully reviewed, and the jurisdiction maintained. On page 721, reference is made to the judiciary act of 1789 organizing the Supreme Court, in execution of the Constitution, and the decision is to the effect that any question or issue as to boundaries between two or more States of the Union, falls within the original jurisdiction of this honorable court. Although Taney, Ch. J., dissented from the decision of the court on other grounds he was careful to say on page 752 "I do not doubt the power of this court to hear and determine a controversy between States, or between individuals, in relation to boundaries of the States, where the suit is brought to try a right of property in the soil or any other right which is properly the subject of judicial cognizance and decision, and which depends upon the true boundary line," but based

his dissent on the ground that Rhode Island, the complainant, did not claim property in the soil in the disputed territory, but only sovereignty and jurisdiction over it. In cases other than those of boundaries this honorable court has taken jurisdiction of cases wherein the pecuniary interests of States have been involved as in State of Pennsylvania *vs.* The Wheeling Bridge Co., 13 Howard, 589; S. C. *vs.* Georgia, 93 U. S., 381. In the latter cause this court said:

"It is argued that this court can take cognizance of no question which concerns alone the rights of a State in her political or sovereign character; that to sustain the suit she must have some proprietary interest which is affected by the defendant. This question has been raised and discussed in almost every case brought before us by a State, in virtue of the original jurisdiction of this court. We do not find it necessary to make any decision on this point as applicable in the case before us."

However, in other decisions this honorable court has declared that in order to vest original jurisdiction a State must have proprietary interest as claimed by Taney, C. J., and Daniel, associate justice, in their dissenting opinions in 13 Howard, and so did the majority of this honorable court in 127 U. S., 287 *et seq.*, and also Louisiana *vs.* Texas, 176 U. S., p. 1. On page 22, 176 U. S., one of the grounds on which the demurrer of the respondent, The State of Texas, was maintained and the bill dismissed was "In our judgment this bill does not set up the facts which show that the State of Texas has so authorized or confirmed the alleged action of her health officer as to make it her own or from which it necessarily follows that the two States are in controversy within the meaning of the Constitution. Finally we are unable to hold that the bill may be maintained as presenting a case of controversy between "a State and citizens of another State."

In the case of The State of Pennsylvania *vs.* The Wheeling Bridge Co. *et al.*, 13 Howard, 519, the State of Pennsylvania

sought an injunction to remove the obstruction in the shape of the bridge, which interfered with the navigation of the Ohio river and interfered with the revenues of the State derived from valuable public works, canals and railways, constructed at great expense as channels of commerce for the transportation of passengers and goods from which a large revenue, as tolls, was received by the State. The respondents set up in their answer "that the State of Pennsylvania had no corporate capacity to institute the suit in the supreme court to vindicate the rights of her citizens; that the State is only a nominal party, whose name was, without proper authority, used by individuals" (p. 558). The question of jurisdiction was fully argued and this honorable court decided (p. 578) "that the State of Pennsylvania has been and will be injured in her public works, in such manner as not only to authorize the bringing of this suit, but to entitle her to the relief prayed for," just as in the present suit Louisiana's pecuniary, financial, and proprietary interests are involved.

In Alabama *vs.* Georgia, 23 Howard, 505, no question of jurisdiction was raised in a suit turning on the interpretation of certain words defining a boundary line, as in the present case.

In Missouri *vs.* Iowa, 7 Howard, 660, there was no question raised as to the jurisdiction of this honorable court in a controversy over boundaries between the two States, but the issue was over the interpretation of the limits defined in the acts of Congress admitting the States, both States claiming full possession, ownership, and enjoyment of the disputed area, as in the suit at bar.

In Florida *vs.* Georgia, 17 Howard, 478, the question was one of boundary between the two States, but the decision goes no further than to discuss the proper process, pleading and procedure in such cases.

In Virginia *vs.* West Virginia, 11 Wallace, 29, a question of boundary was raised, and a demurrer and motion to dis-

miss was filed on the ground that this honorable court had no jurisdiction inasmuch as the issue raised was political and the demurrer was sustained on this and other incidental grounds, among which was that Virginia had by formal act consented to the fixing of that boundary. The demurrer was sustained and the suit dismissed.

This case does not apply in any way to our case.

In New Jersey *vs.* New York, 5 Peters, 284, a controversy arose over the boundary between the two States, and questions were raised and decided more as to jurisdiction and the proper process thereunder; on both of which branches the suit and jurisdiction were maintained.

In the case of Missouri *vs.* Illinois and the Sanitary District of Chicago, 180 U. S., 208, to a bill in equity brought by Missouri seeking an injunction enjoining and prohibiting the emptying of sewerage etc. into a canal entering the Mississippi river, "to the detriment and irreparable and continuing damage and injury to the lives and health of the citizens and inhabitants of the State of Missouri," respondents and defendants demurred to the jurisdiction of this honorable court at length, and in substance that the cause of action was not one between the States in their corporate capacities, and did not constitute such a controversy between the States as contemplated by the Constitution of the United States, and that no property rights were involved therein (pp. 216, *et seq.*). Your honors overruled the demurrer in a lengthy, exhaustive, and able opinion reviewing the whole subject and citing and quoting from all prior adjudications relating thereto, and decided that the bill disclosed sufficient cause to show the interest of the two States. It is true that Mr. Chief Justice Fuller, with whom concurred Messrs. Associate Justices Harlan and White, dissented, but solely on the ground that it was not alleged or claimed that the State of Illinois through its proper officers had taken any action in the premises, the dissenting opinion saying:

"Controversies between the States of this Union are made justiceable by the Constitution, because other modes of determining them were surrendered; and before that jurisdiction which is intended to supply the place of the means usually resorted to by independent sovereignties to terminate their differences, can be invoked it must appear that the States are in direct antagonism as States. Clearly this bill makes out no such state of case."

In the present case we have shown that Mississippi's officers have acted officially.

In Kansas *vs.* Colorado, 185 U. S., 125, in a cause between two States, in regard to the use of the waters of a river, a demurrer was filed to the jurisdiction of the supreme court on the ground that the State of Kansas as a corporate sovereignty had no proprietary interest in the cause of action, but was only lending its name to advance the private interests of certain private corporations and individuals, and that there was, therefore, no such controversy between the States as the Constitution contemplated. This honorable court after reviewing fully all the precedent decisions on this question of jurisdiction, overruled the demurrer, or rather in effect referred it to the merits, as to the proof of the allegations, stating that in an important cause between two sovereign States it would not stand on mere technicalities.

It will be thus seen that from the synopsis of the evidence which we have already presented, together with the citations and quotations from the decisions and opinions of this honorable court that the allegations contained in the bill of complaint have been fully sustained and show a cause of action vesting jurisdiction in this honorable court in this cause. First: as being a suit between States in their corporate capacity in regard to boundary and involving proprietary interest. Second: that the officers of the State of Louisiana brought this suit under full authority from the State and that it is not a controversy between individual citizens of the State,

but that Mississippi's officers had acted in their official capacities. Third: that there was imminent danger of a violent clash over the boundary line between the officers and citizens of the two States. But even this, although we believe it was abundantly shown, was not in our opinion necessary to give this honorable court jurisdiction, as we nowhere find in any of the boundary cases which we have cited and from which we have quoted that there has been alleged or proved any threat or danger of violent conflict between the States, but in all of these cases it would seem that the mere question of a dispute over the boundaries of States was sufficient to give the court jurisdiction irrespective of the fact as to whether there was any imminent danger of violent or forcible conflict between the States, or the citizens thereof.

We think therefore that we have conclusively shown by the evidence and by judicial authority that the claim of the State of Mississippi, respondent herein in this demurrer, is utterly without foundation and that this honorable court is sully seized with jurisdiction in this cause under the provisions of the Constitution of the United States relating to controversies between States.

STATEMENT OF THE CASE.

This suit is instituted by the State of Louisiana in her sovereign capacity as a State against the State of Mississippi in her sovereign capacity as a State to secure a judicial determination of a boundary line separating her in part from the State of Mississippi, and to obtain a decree requiring the State of Mississippi to recognize and observe said boundary line.

Geographically, the State of Louisiana lies on the gulf of Mexico, and is the central Gulf State of the Union, while the State of Mississippi, fronting on Mississippi sound to her south, lies just to the east and north of Louisiana. Both are sovereign sister States in our North American Republic.

Louisiana was the first seat of settlement in that great territory purchased by the United States from the French Republic in 1803, and Mississippi takes her name from that great American river that drains, through the Mississippi valley, over half of the area of our country, and forms the greatest extent of the State of Mississippi's western boundary.

In this proceeding, the State of Louisiana claims a certain line to be the proper boundary line separating her in part from the State of Mississippi, while the State of Mississippi disputes the correctness of the Louisiana line and contends for a separate and distinct line of her own designation, as being the proper boundary to separate the two States.

The area in dispute is located between these two lines, the Louisiana line on the north and the Mississippi line on the south, and consists of more than three hundred (300) square miles of land and water, valued at from two millions ($2,000,000) to five millions of dollars ($5,000,000) by reason of its rich oyster-producing properties, and is now claimed by each State in its sovereign capacity to be its property, to the exclusion of any rights by the other State. This disputed area lies to the east of the southern portion of Louisiana and south of the western portion of Mississippi and embraces the waters of Lake Borgne and Mississippi sound which contain certain sea marsh islands, named Grassy, Half Moon or Grand, Round and Le Petit Pass islands and an island called *Isle à Pitre*. The disputed area in fact extends into the *peninsula* of St. Bernard, Louisiana, or the *Louisiana marshes*, which form part of the *coast* of the State of Louisiana, until the boundary line claimed by Mississippi is reached at a distance of eighteen miles from her main shore, parallel to which the Mississippi boundary line is then claimed to run.

Mississippi sound is an arm of the gulf of Mexico, extending up in between the States of Louisiana and Mississippi at this point, and ends in a body of water, also an arm, inlet or estuary of the gulf, called Lake Borgne. This latter body

of water is not a *lake* in the true geographical sense, because it is a salt-water body of water opening into Mississippi sound, and, as its French name, *Borgne*, implies, it is *one-eyed* in that it has one wide eye or opening into said sound.

Louisiana contends that the proper boundary line separating her from Mississippi in the disputed area is the line of the deep-water sailing channel through this water area, extending from the mouth of Pearl river and emptying into the open waters of the gulf of Mexico, and she has set forth this line in detail on her map, Exhibit "E," bound in the Louisiana Atlas of Maps, page 60, and on diagram No. 1, Record, p. 4.

Mississippi contends that the proper boundary line separating her from the State of Louisiana in the disputed area is a line parallel to her main shore and eighteen miles distant therefrom, and she has set forth this line on her map, Mississippi "A," bound in the Mississippi Atlas of Maps, page 1, also found in the Record, p. 88.

In other words the State of Mississippi, in her defense on the merits to the bill of complaint filed herein by the State of Louisiana:

First. Denies that the deep-water channel sailing line extending from the mouth of Pearl river and emptying into the open water of the gulf of Mexico is the proper boundary line there separating the dominions of the two States.

Second. Contends that she owns the sea marsh islands which we have named as lying south of that deep-water sailing channel line, and

Third. Contends that she owns a portion of the peninsula of St. Bernard, in the State of Louisiana, namely, that portion of the area commonly called the *Louisiana marshes*, which would come within the projection of her eighteen-mile line.

The State of Louisiana, on the other hand, contends, as set forth in her bill of complaint, that—

First. Louisiana owns the *peninsula of St. Bernard* in its entirety, because it is and always has been part of her parish or county of St. Bernard, and that these *Louisiana marshes* at the eastern extremity of her St. Bernard peninsula form part of the *coast* line of the State of Louisiana.

Second. Louisiana owns these islands lying in Lake Borgne and Mississippi sound between that *coast* line and the deep-water channel line, because these islands were given to Louisiana by the act of Congress making her a State, giving her all islands within three leagues, or nine miles of her *coast* and that Congress could not, five years later, take these islands away from Louisiana and give them to Mississippi, and

Third. That the deep-water sailing channel line emerging from the mouth of Pearl river and emptying into the gulf of Mexico is, in truth and fact, the proper water boundary line between the two States in that locality; that it has in fact been recognized as such by both States and is so recognized by all rules of international law.

This statement, made as briefly as the facts will permit, we consider a fair presentation of the substance of the dispute between the two States. And we would now propose to show how the record and the law of the case establish the correctness of the claims of the State of Louisiana in all their details. This leads us therefore to a consideration of the

MERITS OF THE CASE.

As we have previously stated the area in dispute, as bounded by the different lines contended for by each State, is composed of land and water, ownership of and sovereignty

over the land carrying with it jurisdiction, ownership and sovereignty over the adjacent waters as established by international law.

On the merits of the case, as we now approach them, we will proceed to show that the record establishes conclusively that the whole disputed area has always, and does now, belong to, is the property, and forms part, of the State of Louisiana.

This fact we will establish by showing that, of the disputed area,

First. The State of Louisiana owns the peninsula of St. Bernard in its entirety.

Second. The State of Louisiana owns the islands lying north of this peninsula and claimed by her.

This, with the water area, comprises the whole disputed territory.

Louisiana's title to and ownership of this territory we can establish—

I. By the words themselves of the act of Congress, creating Louisiana a State.

II. By the establishment of the deep-water sailing channel line as the proper boundary, south of and on the Louisiana side of which these lands and waters lie.

III. By prescription, usucaption, acquiesence and acknowledgment in favor of Louisiana, and by her exercise of acts of ownership over said territory.

We shall therefore consider the first of these propositions, namely:

I.

THAT THE STATE OF LOUISIANA BY THE WORDS OF THE LAW OWNS THE PENINSULA OF ST. BERNARD IN ITS ENTIRETY AND THE ISLANDS IN DISPUTE, TOGETHER COMPOSING THE DISPUTED AREA.

While the ownership of the St. Bernard peninsula in its entirety is closely related to the ownership of the islands in dispute we nevertheless feel that it is best to treat this subject in two parts, considering first the ownership of the peninsula and second that of the islands and we shall therefore now consider and discuss Louisiana's ownership of the peninsula of St. Bernard.

FIRST.

The State of Louisiana was admitted as a State into the Union of the United States of America by an act of Congress approved April 6, 1812 (Record, p. 1022, document No. 24), and the following was the language used as describing the geographical and territorial limits of the State to wit:

"Beginning at the mouth of River Sabine, thence by a line to be drawn along the middle of the said river, including all islands, to the thirty-second degree of latitude; thence due north to the northernmost part of the thirty-third degree of north latitude; thence along the said parallel of latitude to the River Mississippi; thence down the said river to the River Iberville; and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by the said gulf to the place of beginning; *including all islands within three leagues of the coast*, etc." * * * (Italics ours.)

A sketch showing the limits of the State of Louisiana as thus defined is to be found in the Record, p. 4, as diagram No. 1, made part of the bill of complaint. It will be noted that the point of starting the description begins at the lower left-hand corner of the map or the southwest corner of the State and thence proceeds around the State to the point of beginning. It is to be noted also that the area described in the act of Congress as being contained within the foregoing bounds, is part "of the territory or country ceded under the name of 'Louisiana' by the treaty of Paris on the thirtieth day of April, one thousand eight hundred and three, between the United States and France."

A few days later by an act of Congress, approved April 14, 1812, additional territory was added to the State of Louisiana (Record, p. 1023, document No. 25) embraced within the following limits to wit:

"Beginning at the junction of the River Iberville with the River Mississippi; thence along the middle of the Iberville, the Amite river, and the Lakes Maurepas and Pontchartrain to the eastern mouth of Pearl river; thence up the said eastern branch of Pearl river to the thirty-first degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said river to the place of beginning, shall become, and form part of the said State of Louisiana, and be subject to the constitution and laws thereof in the same manner and for all intents and purposes, as if it had been included within the original boundaries of the said State."

A glance at diagram No. 2 (Record, p. 4), following the red line shown on the east of the State, will show the added territory. The River Iberville is called on this map Bayou Manchac, by which name that stream is now known, and it will be found at the southwest, or lower left-hand corner, of the added territory.

The following outline sketch, taken from the Bulletin of the United States Geological Survey (Record, p. 1032), will

tend to more clearly indicate the boundary outlines of the State of Louisiana.

HISTORICAL DIAGRAM OF LOUISIANA.

We find in the first act providing for the creation of the State of Louisiana the same general eastern boundary as we will hereafter show was adopted in the several treaties affecting this country in its former transfers, except the words "gulf of Mexico" are used in place of the word "sea," although both refer to the same body of water. In order to reach the open gulf of Mexico from the middle of Lakes Maurepas and Pontchartrain, it was necessary, as we know today, for the line to extend through the Rigolets into Lake Borgne, as the "Rigolets" was the main channel connecting these two bodies of water. To get from Lake Borgne into the open water of the gulf of Mexico, beyond Chandeleur islands and around to the western boundary of Louisiana, it was necessary to follow the deep-water channel, north of Half Moon or Grand island through Mississippi sound, and thence by the pass between Cat island and Isle à Pitre, north of Chandeleur islands into the open gulf of Mexico and around to the western boundary of Louisiana. This is the same boundary contended for by Louisiana today, except that by a subsequent act of Congress, just mentioned and quoted from, part of the eastern line of Louisiana was moved eastward to the middle of Pearl river.

The effect of this act of Congress increasing Louisiana's limits was to move part of the eastern boundary eastward from the Mississippi river to Pearl river, and to give to Louisiana that country lying south of the Mississippi territory; that is, south of the thirty-first degree of north latitude, and north of the southern boundary formed by the River Iberville, the middle of Lakes Maurepas and Pontchartrain and the Rigolets.

The Rigolets as seen from maps Nos. 7 and 59, (Louisiana Atlas of Maps, pages 2 and 53) is a strait or *gut* connecting the waters of Lakes Pontchartrain and Borgne, both of which are in fact salt-water bodies of water and were originally arms of the sea (Record, p. 335, testimony of Dr. W. C. Stubbs).

After the adoption of this act of April 14, 1812, the eastern boundary line of the State of Louisiana entered Lake Borgne to the south, by Pearl river in place of the Rigolets. Map Exhibit "E" (Louisiana Atlas of Maps, page 60). In its extension to the eastward of the junction of Pearl river and Lake Borgne, the boundary line remained the same; that is, the deep-water channel north of Half Moon or Grand island, thence through Mississippi sound by the channel or pass between Cat island and Isle à Pitre, north of Chandeleur islands into the open gulf of Mexico.

This necessarily puts the peninsula of St. Bernard entirely in the State of Louisiana.

Many maps showing this general locality have been made since Louisiana became a State and every one of them have recognized the peninsula of St. Bernard as, in its entirety, inclusive of the *Louisiana marshes*, forming a part of the State of Louisiana. An examination of the maps of this country made at a date prior to the creation of Louisiana as a State as well as of those at the time of her being given statehood and for the next few years thereafter, show the St. Bernard peninsula to be geographically a true part of the State of Louisiana or of the area of country that was to form said State; that the said St. Bernard peninsula projected

itself as a distinct and well-defined arm of land out into the waters of the gulf of Mexico, branching off as an arm or projection from what was and is, indisputably, the main body of the land composing the State of Louisiana and forming part of it.

Of the maps collected by the State of Louisiana and offered in evidence in her atlas of maps, the following of an early date show the peninsula of St. Bernard to be naturally, topographically, and geographically a part of the present State of Louisiana, to wit:

1st. Carte Reduite des Costes de la Louisiane, prepared for the French admiralty by M. Le Duc de Choiseul in the year 1764. Map No. 8*a*, Atlas, p. 3.

2d. Map of the course of the Mississippi river from the Belize to Fort Charters, prepared by Lieutenant Ross of the British army in the year 1765. Map No. 11*a*, Atlas, p. 4.

3d. Map of the outlets of the Mississippi river, prepared by the Dutch in the year 1766. Map No. 9*a*, Atlas, p. 3.

4th. Map of the coast of West Florida and Louisiana, prepared by Thomas Jeffreys, geographer to His Majesty the King of England, in the year 1775. Map No. 10*a*, Atlas, p. 4.

5th. A plan of the coast of west Florida and Louisiana prepared by George Gauld, M. A., for the British admiralty in the year 1778. Map No. 63, Atlas, p. 56.

6th. Ellicott's survey of the *southern boundary* of the United States as a commissioner for the United States in that Government's treaty with Spain to establish that line, 1798 to 1801. Maps Nos. 50 and 51, Atlas, p. 46.

7th. Carte Genéral du Terretóire d'Orléans, prepared by B. Lafon in the year 1806. Map No. 19, Atlas, p. 8.

8th. A general map of the seat of war in Louisiana and West Florida. This refers to the war of 1812, between the United States and the British, which ended in the battle of New Orleans, and the map was made by Lacarrier Latour,

an engineer officer serving with General Jackson. Map No. 34*a*, Atlas, p. 32.

These maps were all of a period before Louisiana was created a State and represented the cartography of the country in so far as it was possible to lay it before the Congress of the United States if any such thing was done at the time that Congress was creating, or preparing to create, the State of Louisiana. If Congress saw these maps and had them before it, then it is to be presumed that it had in mind the marshy outline of the State of Louisiana when it made use of the word *coast* in describing this outline as distinguishable from the word *shore* subsequently used in the act creating the State of Mississippi, the word *shore* implying more stability of soil and definiteness of geological outline than that indicated by *coast*.

As indicating what it was presumed Congress had intended as forming the limits of the State of Louisiana, we have but to continue our examination of these maps, and we find that those immediately following the creation of the State of Louisiana recognized her ownership of the St. Bernard peninsula, to wit:

9th. New chart of the West Indies, gulf of Mexico and northern provinces of South America, prepared by Joseph Dessieu in the year 1813. Map No. 58*a*, Atlas, p. 52.

10th. Map of Louisiana, prepared by M. Cary in the year 1814. Map No. 48, Atlas, p. 45.

No. 11. A map of the State of Louisiana, prepared by Wm. Darby in the year 1816. Map No. 20*a*, Atlas, p. 9. Accompanying the second edition of this map, published in 1817, there was a letter-press explanation of some features contained on the map, as follows: "On the map accompanying the book is the following entry on the peninsula which is part of the present parish of St. Bernard, 'This peninsula has never been surveyed northeast of Bayou Terre aux Bœufs; the coast and interior remain but imperfectly known. The surface is flat, and but little elevated above the level of the

sea'" (document No. 68, p. 1140, Record). And again the same author says in his Immigrants' Guide, published in 1818: "The force of the sea is broken by the long peninsula that bounds Lake Borgne on the southeast and by a chain of islands south of Malheureux islands, Marianne islands, Cat island, Ship island, Isle aux Petit Bois, and Dauphin island. The bottom of this strait is soft sand" (document 69, Record, p. 1141). The author is speaking of what is now known as the Mississippi sound and is describing how the force is broken by the chain of islands and the peninsula of St. Bernard.

No. 12. Map of the United States with the contiguous British and Spanish possessions, prepared by John Melish in the year 1816. Map No. 57*a*, Atlas, p. 51. The boundaries on this map are those recognized by the United States and Spain as correct in the treaty between the said powers in the year 1819 concerning the cession of East and West Florida, which treaty was ratified in the year 1822 (Record, p. 1144).

No. 13. Map of Louisiana and Mississippi, prepared by H. S. Tanner in the year 1819. Map No. 66*a*, Atlas, p. 59.

If we were to follow our investigation down through the past century to the date this suit was instituted, we would find that every cartographer in the *world* has recognized Louisiana's ownership of the St. Bernard peninsula in its entirety, and not one has, on any map, indicated that Mississippi had any rights therein.

Even if it be that Congress did not have any maps before it when considering and passing the act creating the State of Louisiana, then we say it is provable by other means that what forms today the peninsula and parish of St. Bernard formed part of the province of Louisiana as acquired by the United States from France and formed part of the territory placed by Congress within the limits of the State of Louisiana.

This fact that the peninsula of St. Bernard was part of

ouisiana, part of the island of Orleans, and part of the ter-
tory of Orleans, and part of the State of Louisiana, is
so established from the record, in the report made by Mr.
homas Jefferson, then President of the United States, to
ongress, November 14, 1803 (Record, pp. 1015 *et seq.*, Docu-
ent No. 19), entitled "An Account of Louisiana," from
hich we make the following extract:

"The object of the following pages is to consolidate the
formation, respecting the present State of Louisiana fur-
shed to the Executive by several individuals among the
st informed on the subject.

"Of the province of Louisiana, no general map suffi-
ently accurate to be depended upon, has been published,
r has any been yet procured from a private source. It is,
deed, probable that surveys have never been made upon
extensive a scale as to afford the means of laying down
e various regions of a country, which, in some of its parts,
pear to have been but imperfectly explored."

* * * * * * *

We then find the further sub-title and comments.

"St. Bernard:"

"On the east side of the Mississippi, about five leagues
low New Orleans, and at the head of the English bend, is
ettlement known by the name of the Poblacion de St.
rnardo, or the Terre aux Bœufs, extending on both sides
a creek or drain, whose head is contiguous to the Missis-
pi, and which flowing eastward after a course of eighteen
gues, and dividing itself into two branches, falls into the
and Lake Borgne. This settlement consists of two
rishes, almost all the inhabitants of which are Spaniards
m the Canaries, who content themselves with raising
ls, corn and garden stuff for the market at New Orleans.
e lands cannot be cultivated to any great extent from the
nks of the creek on account of the vicinity of the marsh
hind them, but the place is susceptible of great improve-
nt and of affording another communication to small craft
from eight to ten feet draft, between the sea and the
ssissippi."

The stream of water thus referred to by President Jefferson as a creek or drain was Bayou Terre aux Bœufs seen on the maps of today (geological maps of St. Bernard, map No. 18, Atlas, p. 7), and the branches referred to, the one extending into Lake Borgne, is the Bayou la Loutre of today, and the other branch to the sea, or gulf of Mexico, has retained the original name of Bayou Terre aux Bœufs. These are the bayous that, it will be seen, are referred to by Dr. William C. Stubbs in his geological discussion of this section as forming in past ages by the deposit of their alluvion, the peninsula of St. Bernard. It will be noted also that the marshy characteristics of the country are also here mentioned by President Jefferson over a century ago; and more important still is the fact that an extension of this bayou eighteen leagues, or fifty-four miles, eastward from the Mississippi river would carry us right through the *Louisiana marshes*, the territory that Mississippi is claiming as hers today. President Jefferson's memoranda, data and information were purposely furnished to Congress with the express intent of providing that body with the best necessary and indisputable knowledge for its future guidance and action in erecting Territories and States from the newly acquired province. This communication of Mr. Jefferson's is presumably what Congress acted on, in fixing the boundaries of the new State of Louisiana. All of this, we respectfully submit, clearly establishes that under the act of Congress of 1812 creating the State of Louisiana, this St. Bernard peninsula formed then a part of the parish of St. Bernard, State of Louisiana, and Louisiana's title to it cannot now be denied by the State of Mississippi.

Let us now therefore take up our second proposition:

Second.

That the State of Louisiana owns the islands lying north of this peninsula and within nine miles distance therefrom.

We have just seen how the St. Bernard peninsula forms part of the parish of St. Bernard, and part of the State of Louisiana. This peninsula has a distinct coast line from Shell beach on the south shore of Lake Borgne up by Malheureux point on to Isle à Pitre at its northeast extremity. This coast line forms part of the *coast* of the State of Louisiana, as contemplated and understood by the Congress of the United States, when it passed the act creating the State of Louisiana and *giving her all islands within three leagues or nine miles of her coast.* The islands claimed by Louisiana in this suit are all within three leagues or nine miles of her said coast. According to the strict letter of the law, as set forth in the act of Congress, these islands are the property of the State of Louisiana, her ownership, under this legal title of donation, dating from April 6, 1812. Mississippi's claim as a State to islands within six leagues of her shore dates from the act of Congress approved December 10, 1817, or nearly six years subsequent to the date of Louisiana's claim. It is true that there were enabling and other acts passed at earlier dates concerning both States as Territories, the one as the Territory of Orleans and the other as the Territory of Mississippi, under which Louisiana could also prove priority of claim and title, but for the present we are considering only the acts of the Congress of the United States creating these two Territories into States and admitting them into the Union. It was only when they were admitted into the Union as States that they would be first able to claim the benefits of all constitutional provisions affecting the integrity of their domains. All previous congressional and other acts and legislation can be considered only in their relation as affording

an explanation of what Congress had really intended to do. The State of Louisiana, as a State had been given these islands as part of her territory and had owned them as such for a period of over five years before the State of Mississippi was created. Louisiana having the prior title to the islands is protected in her ownership thereof by the provisions of our Constitution, insuring to the States the integrity of their domains unless a change be made with the State's consent.

Article IV, section 3, of the Constitution of the United States provides in the second clause that—

"*Nor shall any State be formed by the junction of two or more States without the consent of the legislatures concerned as well as of the Congress.*"

It might perhaps be contended that section 3 of article IV of the Constitution of the United States in its prohibition as to taking territory from one State and adding it to another only referred to the creation of a new State or States out of the territory of "*two or more States*," but this would be a very narrow construction and interpretation, and the intent to the contrary is shown in the last clause of the same section, which provides that "the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; *and nothing in this Constitution shall be so construed as to prejudice* any claims of the United States, OR OF ANY PARTICULAR STATE." (Italics and capitals are ours.)

It follows, therefore, that all islands within nine miles of the Gulf shore (the littoral line) were by the act of 1812 made a part of the domain of Louisiana. Congress could not by the subsequent act (Mississippi) of 1817 take away any portion of the territory of the State of Louisiana and give it to the State of Mississippi "so as to prejudice any claims" of the particular State, Louisiana.

Further it is a general rule, that where there are two conicting titles, the elder shall be preferred. * * * So where there are conflicting rights as to real property, courts f equity will inquire, not which party was first in possesion, but under what instrument he was in possession, and when his right is dated in point of time; or if there be no nstrument, they will ask when did the right arise,—who ad the prior right" (Broome's Legal Maxims, 7th Am. ed. . 355, with authorities in note 5).

And this principle has been frequently applied by this onorable court in cases of boundaries between States where he grants to the colonies prior to the establishment of our Government have seemed to conflict. So in Rhode Island s. Massachusetts, 12 Peters, 658, it is said in the syllabus, "No court acts differently in deciding on boundary between States, than on lines between separate tracts of land," and hat the rules and principles of equity would equally apply between States, as between individuals. The conclusion herefore irresistibly follows from the above exposition of the facts and the law that the peninsula of St. Bernard in its entirety formed an integral part of the State of Louisiana, and that the islands within nine miles of the coast of that peninsula once given by Congress to Louisiana could not be subsequently given by Congress to the State of Mississippi.

II.

LOUISIANA'S TITLE TO THE DISPUTED AREA IS ESTABLISHED BY THE FACT THAT THE SAID AREA IS SOUTH OF AND ON THE LOUISIANA SIDE OF THE DEEP-WATER CHANNEL BOUNDARY LINE AND AS THIS DEEP-WATER CHANNEL SAILING LINE IS THE CORRECT WATER BOUNDARY BETWEEN THE STATES AT THIS POINT ALL LAND AND WATER SOUTH OF IT IS THE PROPERTY OF THE STATE OF LOUISIANA.

But if we suppose, for the sake of argument, that what we have already said as to the conclusiveness of Louisiana's claim under the boundaries laid down in the acts of Congress admitting her and the State of Mississippi into the Union is not deemed by your honors sufficiently clear to settle the issue in this case; and if there be any lingering doubt as to the plain intendment of Congress in adopting the language that is contained in these acts, then we say that Louisiana's claim to the disputed territory is clearly established by the fact that the deep-water sailing channel line in this region is the true boundary line between the two States and that if it be adopted as the true boundary it gives to Louisiana all of the disputed area.

Existence of Deep-water Channel.

This deep-water sailing channel line claimed by Louisiana as the proper boundary between the two States exists today and is shown on the United States Coast and Geodetic Survey of that section, (map No. 59, Louisiana Atlas of Maps, p. 33) as emerging from the mouth of Pearl river and extending east between Lower Point Clear and Grand island, it being called *Grand Island pass* at that point, and is shown by the coloring and the depth of the water indicated on the chart. From this point it separates into two branches, one extending

northeast, in which branch we have no interest; and the other branch extending eastward, the one we are interested in, is indicated by a black line as it passes on between Cat island and Isle à Pitre, which black line carries with it certain sailing directions, designating it as the sailing line. This extension of the main Grand Island Pass channel by the *sailing channel*, succeeded by the *South Pass* and *Cat Island channels*, constitute the deep-water channel claimed by the State of Louisiana to be the proper boundary line between the States in this region. That it exists to-day there is no dispute. That it has existed for the past one hundred years and was in existence when and before Louisiana was created a State we shall now proceed to show, and the further fact that it is the same as the channel of today. As establishing this fact we find that the legislature of the State of Mississippi by an act approved February 14, 1839, provided for a survey of the Mississippi coast (Record, p. 2120, Mississippi document No. 99).

An engineer named John Wheeler was employed by his excellency A. G. McNutt, governor of the State of Mississippi to make this survey and a report embodying the same. The survey and report are given in full in the record (Record, p. 1145, document No. 73) and the deep-water channel which we have just been describing is shown in detail in the sketch (Record, p. 1148) the depths of water constituting the channel being given. A comparison of this sketch of 1839 with the Coast and Geoedetic Survey map No. 59 of today will show the channels indicated by each to be the same channel.

If we now refer to the map made by Mr. George Gauld, M. A., for the British admiralty in the year 1778, or long before Louisiana was created a State, (map No. 63, Louisiana Atlas of Maps, p. 56,) we note, from the relative depths of water given, the existence of this same channel extending out to the gulf of Mexico southwest of Cat island, showing it to be the same channel noted on the maps in subsequent

years and which in fact was used in part by the British in the war of 1812 in attacking the city of New Orleans (map No. 34a, Louisiana Atlas of Maps, p. 32) which shows that a large part of this channel was used in the instance of the expedition going in the direction of Pearl river from the gulf of Mexico. It is true that this force started from a point in the next eastward channel between Cat and Ship islands but they soon took up the deep-water channel of today, and it will be noted that another part of the force entered between Cat island and Isle á Pitre showing the existence then of that deep-water pass forming also a part of the channel of today.

This channel is the only deep-water channel between the points in question, namely the mouth of Pearl river and the open waters of the gulf of Mexico and although the State of Mississippi proved that you could sail through the Louisiana marshes in certain places with very light draft boats no recognized channel through them was proven to exist.

In support of this proposition we cite the testimony of two of Mississippi's own witnesses, Captains William Goranflo and John Walker.

Captain Goranflo (Record, pp. 1247–'8) testifies that the deep-water channel we have just described is the deep-water sailing channel; that there is no other channel; and that it has always been there.

Captain Walker (Record, pp. 1270 to 1275) testifies that he knows the deep-water channel; knows it to be the one contended for by Louisiana as the boundary line; knows that it existed as the deep-water channel in the year 1856; and knows of no other channel.

Mr. J. B. Baylor, an assistant of the United States Coast and Geodetic Survey, who happened to be detailed in Louisiana on some surveying work in the neighborhood of the disputed territory, testified in this case while he was in Louisiana. Mr. Baylor had been one of your honors' commissioners in the boundary settlement between the States of

Virginia and Tennessee. Mr. Baylor testified (Record, p. 418) that he was familiar with the disputed area; that he knew the deep-water channel and designated it with the letters C C on map No. 17 (Louisiana Atlas of Maps, p. 6); that he knew of no other channel and that there was no channel recognized as such, through the Louisiana marshes.

We have now shown the existence in the past and today of this deep-water channel. It carried into the open gulf of Mexico the waters brought down by Pearl river and it is only reasonable to suppose that geologically it has existed ever since Pearl river has been a river, as it had its functions to perform in connection with said river in carrying its waters to the sea and was in fact the child of the current of those waters, being created by them.

We will now undertake to show in support of our third proposition that this deep-water channel, for the following reasons:

1st. Is a boundary created by nature and that the soils separated by it and forming the limits of the two States are of natural geological difference.

2d. That it is the boundary line that was recognized by England, France, and Spain in their ancient treaties affecting their separate interests in this country.

3d. That it was the boundary line as recognized by the acts of Congress and treaties of the United States referring to this section of the country and dividing it up.

4th. That it was the boundary line so recognized by the States of Louisiana and Mississippi in all their acts as the boundary separating them.

5th. That it is the proper boundary line between the two States as recognized by all rules of international law.

We will therefore consider these propositions in the order stated.

First.

That the deep-water channel is a boundary created by nature and that the soils separated by it and forming the limits of the two States are of natural geological difference.

We feel that we can under this heading show that nature made the deep-water channel her boundary in this area and that the subsequent enactments of man were but a confirmation of this basic principle.

In the 136 U. S., 479, Indiana vs. Kentucky, some stress was laid upon the geological character of the territory in dispute as compared with that of the two States and this geological affinity and similarity was held to be confirmatory of other evidence in the case.

A glance at any of the general maps of the United States filed in this cause and appearing in the Atlas of Maps will show that the State of Louisiana lies between the States of Mississippi to the east and Texas to the west. All these States border on the gulf of Mexico, except in this, that Mississippi's main land borders on Mississippi sound, an arm of the sea or gulf of Mexico, formed by a chain of large islands extending westward from Mobile bay in Alabama to Cat Island channel, separating Cat island from Isle à Pitre in Louisiana. The southern portion of Louisiana is fanlike in shape, and geologically is of alluvial formation, containing the delta of the Mississippi river. A part of this delta formation is the peninsula of the parish of St. Bernard which extends out eastwardly, south of the waters of Lake Borgne and Mississippi sound.

Beginning at the northeast corner of Louisiana, the boundary separating her from the State of Mississippi to her east is the thread of the channel of the Mississippi river. This boundary extends southward until it reaches the 31st de-

gree of north latitude, whence it then runs directly east along this degree of latitude until Pearl river is reached. It then extends south along the channel of that river, until it reaches Lake Borgne. Pearl river flows into Lake Borgne, Lake Borgne into Mississippi sound, and Mississippi sound into the open gulf of Mexico through South pass, separating Cat island from Isle à Pitre. There is and always has been a thread of flow, or a well-defined deep-water channel or sailing line, extending from the mouth of Pearl river into Lake Borgne, north of Half Moon or Grand island into Mississippi sound, and thence, through that sound, along the same well-defined channel between Cat island and Isle à Pitre, north of Chandeleur islands into the open waters of the gulf of Mexico. As this deep-water channel is but a natural continuation of the channel of Pearl river, the admitted boundary between certain portions of Louisiana and Mississippi, Louisiana contends and has always contended that it is and always has been the correct boundary line separating her from the State of Mississippi in these waters.

These same maps show the Mississippi river to be the main outlet of the great watershed in the center of the United States, formed by the ranges of the Allegheny and Rocky mountains. The delta of this great river is in, and forms today, the southern part of the State of Louisiana. Dr. William C. Stubbs, State geologist of the State of Louisiana, (Record, pp. 332 *et seq.*) testifies at length and interestingly concerning the geological history and formation of the State of Louisiana. Briefly stated, the substance of his testimony is that the State of Louisiana is formed by the alluvion of the Mississippi river, gathered from the soil of the twenty-nine States and Territories drained by this river, deposited along the banks of the river when there were no levees and discharged into the gulf of Mexico at its mouth, each year forming land which never existed before. The small particles of earth are carried in suspension by the waters of the river so long as these waters are in motion, and the load is

dropped as soon as the movement of the waters is suspended, either by the water overflowing the banks or discharging into the comparatively still waters of the gulf of Mexico. At each annual rise of this mighty river, it would overflow its banks and deposit a layer of alluvion, decreasing in thickness as the distance from the banks increased. Lateral streams were formed where the river would break through its banks, and these streams would in turn overflow, forming banks on each side of them, which would be built up by the annual overflow and deposit of alluvion. That the Louisiana alluvion was characteristic and could be readily recognized by any geologist; that one of the lateral streams branching off from the Mississippi river in ancient times was Bayou Terre aux Bœufs; that it was this bayou and its branch called Bayou la Loutre that by the deposit of its suspended sediment or alluvion formed what is today the parish and peninsula of St. Bernard (Record, p. 334).

A glance at the United States geological map No. 18 (Louisiana Atlas of Maps, p. 7) will show that Isle à Pitre forms the northeastern extremity of the St. Bernard peninsula; that it was just to the west of, and immediately adjacent to the deep-water channel boundary line claimed by Louisiana at that point. Just across this deep-water channel, and the first land immediately to the east of it, is Cat island which is admitted by Louisiana, on the deep-water channel theory, to be the property of the State of Mississippi. After leaving the mouth of Pearl river and the channel between Grand or Half Moon and St. Joseph islands, this point between Isle à Pitre and Cat island is the first where other lands of the two States nearest approach each other in the whole course of this water boundary line. Samples were taken of the earth of Isle à Pitre and Cat island (Record, p. 298, testimony of Alfred C. Ruiz) and have been offered in evidence and appear in the original, that of Isle à Pitre as sample No. 1, and that of Cat island as sample No. 2. These samples were submitted to Dr. Stubbs as an expert. He at once recog-

ized sample No. 1 taken from Isle à Pitre, on the Louisiana de of the channel, as detritus or alluvion brought down by ie Mississippi river and belonging to the same geological ormation as the other parts of Louisiana. Sample No. 2, aken from Cat island, Dr. Stubbs recognized (Record, pp. 34 and 342) as being of an entirely different formation and ause from sample No. 1, he claiming sample No. 2 to be a and washed up by the waves from the sea, similar to that f the whole of Mississippi's chain of islands to the east-ard. We thus see two different geological formations, one n each side of this deep-water channel, the different forma-ons belonging to the two different States, so that the deep-ater channel seems to have been a recognition of a bound-ry created by nature, and separating formations of natural ifference and distinction. All of the Mississippi islands irting her shore are of this sea-sand formation, while all ose of Louisiana are of this alluvial formation created by ie deposit of sediment or detritus of the Mississippi river nd its lateral tributary bayous, such as those geologically reating the lands forming the disputed area, and as this haracter of soil is the basis of the formation of Louisiana a State, this deep-water channel as a boundary is a recog-tion of natural geological proprieties in the separation of ie two States.

Second.

That the deep-water sailing channel line is the boundary that as recognized by England, France, and Spain in their ancient reaties affecting their separate interests in this country.

The adoption by the Congress of the United States, in the eation of the State of Louisiana, of the line extending down e Mississippi river to the River Iberville and thence rough the middle of Lakes Maurepas and Pontchartrain to e sea, as one of the boundaries of that State was not a new ie established for the first time but was in fact an affirma-

tion and recognition of an ancient line long since established, which in its extension to the open sea must follow the deep-water channel that we have been discussing. That this is true is shown by the treaties that have been negotiated between the various foreign nations from time to time owning this country.

In the treaty of peace between England, France and Spain adopted February 10, 1716, the following language is found in article VII on the subject of the boundary line separating the dominions of England and France in the New World, to wit:

"That for the future, the confines between the dominions of His Britannic Majesty, and those of His Most Christian Majesty in that part of the world shall be fixed irrevocably by a line drawn along the River Mississippi from its source to the River Iberville, and from thence by a line drawn along the middle of this river and the Lakes Maurepas and Pontchartrain to the sea" (Record, p. 1008, document No. 13).

With the information shown on the map No. 24, bound into the Atlas of Maps, p. 10½, we see that the River Iberville is known today by the name of Bayou Manchac and that it is there called Manchac or Iberville river. (See also Record, p. 4, diagram No. 1.) In order for this line, passing through the middle of Lakes Maurepas and Pontchartrain, to reach the open *sea*, it was necessary for it to pass through what is now called the "Rigolets," just west of the mouth of Pearl river, and thence to follow the deep-water channel through the upper end of Lake Borgne, north of Grand, or Half Moon, island, through Mississippi sound, by the deep-water pass between Cat island and Isle à Pitre, north of Chandeleur islands into the open gulf of Mexico, which was then commonly known as the *sea*. There was no other rational route for the extension of such a line to take in describing the respective limits of the nations at interest. According to this treaty, England retained the port of Mobile and its river and

erything east of the Rigolets. The island of Orleans, rmed by the River Iberville, Lakes Maurepas and Pontartrain, the Rigolets, the gulf of Mexico and the Mississpi river remained the property of France.

This same boundary line is found in another translation this treaty (Record, p. 1009, document No. 14).

In the treaty between the same nations, on February 10, 63 (Record, p. 1010, document No. 15), practically the me language is used in describing the boundary line sepating the British from the French territory and stating hat belonged to each nation. In an extract from this aty (Record, p. 1863, Mississippi document No. 1) article X provides for the cession by Spain to England of Florida d all that Spain possessed on the continent of North nerica.

In the treaty of September 3, 1783, between England and ain (Record, p. 1865, Mississippi document No. 2) England les East and West Florida back to Spain.

Then by the treaty of St. Idelfonso of October 1, 1800, ain ceded to France—

"The colony or province of Louisiana with the same ext that it now has in the hands of Spain, and that it had ien France possessed it, and such as it should be after the aties subsequently entered into between Spain and other ites" (Record, p. 1012, document No. 17).

On April 30, 1803, France ceded to the United States the ony or province of Louisiana (Record, p. 1012, document . 17), using exactly the same description used by Spain ceding the territory to her, and adding in article II the clusion of the adjacent islands belonging to Louisiana.

In all of these transfers of this territory, there never was y question but that the peninsula subsequently known *the peninsula of St. Bernard was part of the island of leans*, and that this island of Orleans was in fact partly rmed by the extension to the sea of the boundary line

coming down through the middle of Lakes Maurepas and Pontchartrain and finding its way to the sea by the deep-water channel claimed by Louisiana to be the correct water boundary line, separating her from Mississippi, and which has in fact always existed as a boundary line separating and designating different ownerships of country as lying on the respective sides of said boundary line, which was thus recognized by these treaties to exist and to be a proper boundary line to designate and separate their respective domains.

Third.

That the deep-water channel was in fact recognized by the Congress of the United States in its legislation and in the treaties referring to this section of the country, as the proper boundary, and according to which it divided it up.

We will now endeavor to show that just as the treaties of foreign countries recognized, in the words used, the deep-water channel as necessarily forming in part a portion of the boundaries of the province of Louisiana, so did the early acts of the Congress of the United States and the treaties which Congress negotiated in regard to that territory.

We have clearly shown how Louisiana was described prior to her acquisition by the United States. It now becomes necessary for the purpose of this case to ascertain what limits the laws of the United States placed upon her domain.

On March 26, 1804, the Congress of the United States adopted an act dividing the country acquired as Louisiana from France into two parts. The pertinent portions of this act read as follows:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That all that portion of the country ceded by France to the United States under the name of Louisiana which lies south of the Mississippi Territory and of an east-and-west line to commence on the Mississippi river at the thirty-third degree of

north latitude, and to extend west to the western boundary of said cession, shall constitute a Territory of the United States under the name of the Territory of Orleans, the government whereof shall be organized and administered as follows:"

* * * * * * *

"SECTION 12. The residue of the province of Louisiana ceded to the United States, shall be called the district of Louisiana, the government whereof shall be organized and administered as follows:"

* * * * * * *

It is true that the boundary description here given is not very elaborate, yet the words used are sufficient to show that Congress intended to include in the Territory of Orleans not only what had constituted the island of Orleans on the left or east bank of the Mississippi river, and referred to in the original treaties, but also further additional lands west of said river, and south of the thirty-third degree of north latitude, but which are not of special interest to us in this case, and the present discussion.

Congress regarded the lands to the east, that were south of the Mississippi Territory and which form the disputed area of today, as part of the original island of Orleans referred to in the original treaties and included in its treaty with France of April 30, 1803, and these were given to the Territory of Orleans, and her southeastern boundary was the original southeastern boundary of the island of Orleans. At that date, the Mississippi Territory did not extend south of the thirty-first degree of north latitude, and its domain did not reach the shore of Mississippi sound or the locality of the disputed area until many years later, as we will see when we come to consider the limits of the Territory, and subsequently, of the State of Mississippi, as fixed by contemporaneous acts of Congress. As we have already stated the transfer of the province of Louisiana by France to the United States included the island of Orleans. We have heretofore given the boundaries of this so-called island.

These boundaries, when extended through the centers of Lakes Maurepas and Pontchartrain, followed Louisiana's present deep-water channel into the sea. It, therefore, appears from the above description of the Territory of Orleans, that what was subsequently called the St. Bernard peninsula was part of the Territory of Orleans, when the Territory of Mississippi had not yet been extended to the waters of Mississippi sound.

The Territory of Orleans remained as such until February 20, 1811, when an act of Congress was approved, entitled:

"An act to enable the people of the Territory of Orleans to form a constitution and State government, and for the admission of such State into the Union on an equal footing with the original States, and for other purposes."

According to this act of Congress, the Territory to form the future State of Louisiana was described as follows:

"That all the inhabitants of that part of the territory or country ceded under the name of Louisiana by the treaty made at Paris on the thirtieth of April, one thousand eight hundred and three between the United States and France, contained with the following limits—that is to say:

"Beginning at the mouth of the River Sabine, thence, by a line to be drawn along the middle of said river, including all islands, to the thirty-second degree of latitude, thence due north to the northernmost part of the thirty-third degree of north latitude, thence along said parallel of latitude to the *River Mississippi, thence down the said river to the River Iberville, and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico*, thence, bounded by said gulf, to the place of beginning, including all islands within three leagues of the coast, etc., etc." (Record, p. 1018, document No. 21). (Italics ours.)

It will be noted from the above that the same language is used in describing the eastern boundary as was used in the ancient treaties, namely: the *Mississippi river to the River Iberville and the middle of that river and Lakes Maurepas and Pontchartrain to the sea or gulf of Mexico*. It is to be ob-

served that this entire eastern boundary of the State of Louisiana is a *water boundary*. The conclusion is therefore irresistible that in extending this water boundary to the open sea or gulf of Mexico or in connecting the middle of Lakes Maurepas and Pontchartrain with the open gulf of Mexico, a water boundary would be used and this naturally contemplates the Rigolets (map No. 7, Louisiana Atlas of Maps p. 2) and the deep-water sailing channel line as being the only natural and rational extension of this boundary line to the open waters of the gulf of Mexico, reaching round to the westward.

And it will be remembered that this identical eastern boundary line was given to Louisiana when she was created a State a little over one year later by the act of Congress approved April 6, 1812 (Record, p. 1022, document No. 24).

And it will be further noted that the addition of territory to the State of Louisiana by the act of Congress approved April 14, 1812 (Record, p. 1023, document No. 25), to which additional territory being added to the State the legislature of Louisiana gave its consent (Record, p. 1024, document No. 26), that the addition of this territory, *did not in any way affect the deep-water sailing channel line as the boundary in the disputed territory*, for the moving of the part of the eastern boundary east to Pearl river caused the boundary line, as it emerged from the channel or mouth of that river, to take up and follow the extension of the already existing deep-water sailing channel line, all of which we have endeavored to set forth on the map Exhibit "E," (Louisiana Atlas of Maps, p. 60) to which we respectfully direct your honors' special attention.

We think this clearly shows a recognition by Congress of the deep-water sailing channel line as being the proper boundary in the disputed area. Yet as additional proof of this fact a study of the legislation of Congress shows that it was clearly the intention of Congress, in all of its early legislation, that the State of Mississippi, either as a State or

previously as a Territory, should have no rights in the neighborhood of the locality, the ownership of which Mississippi disputes today.

The Domains of Mississippi.

The first reference to Mississippi in the acts of Congress is the one approved April 7, 1798 (Record, p. 1014, document 18) entitled:

"An act for an amicable settlement of the limits with the State of Georgia and authorizing the establishment of a government in the Mississippi Territory" the pertinent part of which reads as follows:

"SEC. 3. *Be it further enacted*, That all that tract of country bounded on the west by the River Mississippi, on the north by a line drawn due east from the mouth of the Yassous to the Chattahoochee river, *and on the south by the thirty-first degree of north latitude* shall be, and is hereby constituted one district to be called the Mississippi Territory."

* * * * * * *

(Italics ours.)

The Mississippi Territory, therefore, did not extend south of the thirty-first degree of north latitude. This is in conformity with the treaty between Spain and United States adopted October 27, 1795 (Record, p. 1011, document No. 16), wherein the following language is found in article II, to wit:

"To prevent all disputes on the subject of boundaries which separate the territories of the two high contracting parties, it is hereby declared and agreed as follows, to wit:

"The southern boundary of the United States, which divides their territory from the Spanish colonies of East and West Florida, shall be designated by a line beginning on the River Mississippi at the northernmost part of the thirty-first degree of latitude, north of the equator, which from thence shall be drawn due east to the middle of the River Apalachicola or Chattahoochee, thence along the middle thereof

to its junction with the Flint, thence straight to the head of the St. Mary's river, and thence along the middle thereof to the Atlantic ocean."

It was to determine this thirty-first degree of north latitude that commissioners were subsequently appointed by the governments of Spain and the United States, and the American representative, Andrew Ellicott's projection of the line of the thirty-first degree of north latitude is shown in maps Nos. 50 and 51 bound into Louisiana's Atlas of Maps, p. 46, showing that the rights of the United States did not at the time extend south of the thirty-first degree of north latitude at that point.

To further show that the extension of the Territory of Mississippi had not reached the coast of the gulf of Mexico up to 1811, we beg to now refer to an act of Congress approved January 15, 1811 (Record, 1021, document No. 23), whereby the President of the United States, with the consent of the local authorities or in the event that any foreign government attempted to exercise sovereignty over same, was authorized to occupy and take possession of that country lying *east* of the River Perdido and south of the State of Georgia and *Mississippi Territory*. The River Perdido, as will be seen from the maps of today is in the State of Alabama, east of the State of Mississippi and flows into the gulf of Mexico between Mobile bay in Alabama and Pensacola bay in Florida. Mississippi certainly could not claim to own as far south as Mississippi sound or have any rights in the disputed area, when the locality, possession of which the United States was seeking, was not even then in possession of the United States, and the territory mentioned in the act of Congress is a great distance to the east and therefore not in the neighborhood of the disputed territory, and in fact formed a part of what was called *East* Florida and was not a part of *West* Florida.

A few days later than the act just mentioned, or on March

3, 1811, there was approved an act of Congress (Record, p. 1020, document 22), whereby it was provided that the act of Congress of January 15, 1811, in regard to the President of the United States taking possession of the country *east of the Perdido river* and *south of* the State of Georgia and *the Mississippi Territory*, and that this act also, should not be published until the end of the next session of Congress, unless with the consent of the President of the United States.

The purpose of this act was evidently to prevent the government of Spain from knowing what the United States Government was doing in regard to East and West Florida, until matters took a more definite shape. This is indicated by the resolution of Congress approved January 15, 1811 (Record, p. 1025, document No. 27), whereby it was specifically declared that the United States could not permit any foreign government to control the country adjoining its southern boundary.

An act of Congress was approved April 25, 1812 entitled: "An act for ascertaining the titles and claims to land in that part of Louisiana which lies east of the River Mississippi and island of Orleans (Record, p. 1025, document No. 28). In this act it clearly appears that the Mississippi Territory had not yet come south of the thirty-first degree of north latitude as the country mentioned in said act as part of Louisiana is divided into two land districts, which are designated as being separated by Pearl river, and are both said to be *south of the Mississippi Territory*.

There was approved, however, on May 14, 1812, or thirty-eight days subsequent to the creation of the State of Louisiana, on April 6, 1812, an act of Congress which proposed to enlarge the boundaries of the Mississippi Territory, (Record, p. 1027, document No. 30) using the following language, to wit:

"That all that portion of the territory lying east of Pear river, west of the Perdido, and south of the thirty-first degree of latitude be, and the same is hereby annexed to the Mississippi Territory, etc." * * *

Confining the added territory to that east of Pearl river was a recognition of the fact that the country west of Pearl river had already been added to the State of Louisiana by a previous act of Congress. It is very much to be doubted, however, if the country thus proposed to be added to the Mississippi Territory was actually at the time, that is, May 14, 1812, really in the possession of the United States Government to be so added, because it was only on February 13, 1813, or nine months later, that Congress passed an act entitled, "An act authorizing the President of the United States to take possession of the tract of country lying south of the Mississippi Territory, and west of the River Perdido (Record, p. 1027, document No. 29). In this act this country west of the Perdido, and which would mean the country east of Pearl river, for that west of Pearl river had already been incorporated into the State of Louisiana by an act of Congress concerning which there was no concealment, was spoken of as not then, February 12, 1813, being in possession of the United States Government, and the act was passed for the purpose of enabling the President to actually take possession of it. No southern boundary is mentioned in reference to this addition to the Mississippi Territory, but it is not to be presumed that it extended south of the north shore of Mississippi sound, because the St. Bernard peninsula lying to the south already formed a part of the State of Louisiana.

Admitting, however, that Mississippi did have the country south of the thirty-first degree of north latitude, and east of Pearl river added to her domains on May 14, 1812, it was subsequent to the fixing of the limits of the State of Louisiana, and even if her domains extended to the shores of Mississippi sound at that time, there was absolutely no conflict between her boundary and that of the State of Louisiana as set forth in the acts of Congress of the United States, because it was only in 1817 that reference was first made to islands within six leagues of her shore.

The present ground or basis of dispute on the part of the

State of Mississippi arises with the adoption by Congress of an act approved March 1, 1817, or five years after the State of Louisiana was admitted into the Union, entitled, "An act to enable the people of the western part of the Mississippi Territory to form a constitution and State government and for the admission of such into the Union on an equal footing with the original States" (Record, p. 1028, document No. 31), wherein, in describing the boundaries of the area to be included in the State to be formed, the act of Congress uses the following language in reference to the southern boundary in its extension from east to west, as the eastern boundary of the proposed State reaches the gulf of Mexico, to wit:

"Thence due south to the gulf of Mexico; thence westward, including all islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne; thence up said river to the thirty-first degree of north latitude, thence west along said degree of latitude to the Mississippi river, thence up the same to the beginning."

The words, "including all islands within six leagues of the shore," is the legislation on which counsel for Mississippi hang all their hopes as injecting an element of uncertainty in the description of the boundaries of the two States. If these words were introduced in this Mississippi act by Congress because of any lack of familiarity by Congress with the locality being divided up, their presence would not give to Mississippi islands which had been given to Louisiana by acts of Congress adopted many years previous.

Darby, the expert cartographer, to whose map of 1816 we have previously alluded, and who perhaps of all other cartographers, engineers and surveyors, was from his extended experience in the vicinity of Louisiana and Mississippi better and more thoroughly acquainted with the topography of that section, then so remote, difficult of access, and comparatively unknown to the then law-givers, surveyors, and people

generally of the United States says in his letter press accompanying his 1817 second edition map:

"*The islands of Malheureux, Marianne, and Cat island are included in the bounds assigned to both the States of Louisiana and Mississippi. There must have been some oversight in framing the respective acts, which marked the possession of each State*" (Record, p. 1140). (Italics are our own.)

This calls attention to the error, if error it be, of Congress, and the oversight consists not "in framing the respective acts" for the admission of the two States, but in the drafting of the Mississippi act, more than five years after the Louisiana act, and embracing in the Mississippi act, islands which had already been granted to Louisiana. The oversight probably arose in this way: That Congress in defining the southern boundary of Mississippi as "thence westward, including all islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne" overlooked the fact that as this southern boundary line of Mississippi approached the eastern mouth of Pearl river, the space and area of water between the northern coast of St. Bernard in Louisiana, and the southern shore of Mississippi near that point, was less than ten miles in width, and breadth, and that the islands granted to Louisiana more than five years before, were within three leagues or nine miles of her coast, and that the six leagues from the shore of Mississippi could not, at this point, be allowed without interfering with the prior grant to the State of Louisiana. And it is to be borne in mind that the second edition of Darby's map, and the letter press from which this extract is taken were both published in 1817, almost contemporaneously with the admission of Mississippi into the Union in the same year.

We shall presently show, however, that the presence, in the Mississippi act of the words referring to the islands, with a possible proper and legitimate construction, introduces

no element of confusion or uncertainty in the description of the boundaries of the two States. It will be noted, however, from the extract from the Mississippi act just quoted, that the eastern mouth of Pearl river, the thirty-first degree of north latitude, and the Mississippi river, previously fixed as forming the system of Louisiana's eastern boundary, are recognized, which shows an intention on the part of Congress not to interfere with the limits and domain of the State of Louisiana as already fixed and determined, and is we contend an affirmation of the correctness of our proposition that Congress intended in her acts to recognize the deep-water channel as the true boundary between the two States in this section.

Fourth.

That the deep-water channel as the boundary line was so recognized by both States of Louisiana and Mississippi as limiting their respective domains.

We would propose here to show that both the States of Louisiana and Mississippi have, in many of their previous official acts as States, recognized the deep-water sailing channel line as the proper boundary between them, in the disputed area. This recognition, respectively, by the States of Louisiana and Mississippi of the deep-water channel as the boundary line separating them, is shown by their acts in relation to the territory respectively on each side of this line, the one State claiming and exercising ownership in the area south and the other State claiming and exercising ownership in the area north of said deep-water channel, and in fact the volume of evidence in the record on this subject is overwhelming. We, however, propose in our discussion of this case to devote a branch to the special consideration of the subject of Louisiana's acquisition of her rights to the disputed territory by *prescription and usucaption* and to show

that the State of Mississippi has, not only acquiesced in Louisiana's ownership, but has officially recognized the same and we shall therefore defer any further discussion of this branch for the present and take it up under the special heading devoted to it.

Fifth.

That the deep-water sailing channel is the proper boundary line between the two States recognized by all rules of international law.

Aside from the documentary and other evidence which we have adduced, we think it plain that under the principles of international law that the boundary between these two States in this region should be fixed at the deep-water channel between the two States. The principles of international law have always been regarded and applied by this honorable court to boundary questions between the various States of the Union with as much force as international law is applied to States or nations foreign to each other, and as late as Kansas *vs.* Colorado, 185 U. S., 146, in deciding a question between those two States this honorable court said that, "Sitting as it were as an international, as well as a domestic tribunal, we apply Federal law, State law, and international law as the exigencies of the particular case demand." But, before quoting the commentators and decisions it will be well for us here to fix in advance the terminology of the various waters which will be mentioned in the international authorities. For instance the bodies of water adjoining the area in dispute herein are commonly known and called Lakes Borgne and Pontchartrain, taking the names of lakes from the French word "lac" which includes under that appellation estuaries or inlets of the sea, in this case, the gulf of Mexico, partly enclosed by

land as we will see in some of the quotations which we shall hereafter make.

Littré Dictionnaire de la Langue Française gives the definition of "lac" to be:

"Grand espace d'eau qui se trouve enclavé dans les terres."

But, in English such bodies of salt water would not be called lakes but estuaries, inlets or arms of the sea or gulf. Webster's International Dictionary defines "lake" to be "a large body of water contained in a depression of the earth's surface, and supplied from the drainage of a more or less extended surface." And the Century Dictionary and Encyclopedia defines "lake" to be "a body of water surrounded by land, *or not forming a part of the ocean* and occupying a depression below the ordinary drainage level of the region. Lakes are depressions or basins filled by streams flowing into them." (Italics are our own) "Inlet" is defined by Webster's International Dictionary to be "a bay or recess, as in the shore of a sea, lake, or a large river; a narrow strip of water running into the land or between islands." The Century Dictionary and Encyclopedia defines "inlet" to be "a water-way leading into a sea or a lake and forming part of it." This is also the definition in the English and American Encyclopedia of Law, volume 18, p. 130, taken from Black's Law Dictionary. "Sound" is defined by Webster's International Dictionary to be "a strait connecting two seas or connecting a sea or a lake with the ocean." The Century Dictionary and Encyclopedia gives "sound" as "a narrow passage of water, not a stream between the mainland and an isle, or a strait connecting two seas or connecting a sea and a lake, or connecting a sea or lake with the ocean." In 34 Louisiana's Annual, 838, the supreme court of Louisiana decided that Lake Pontchartrain, so called, is an arm of the sea.

The English and American Encyclopedia of Law, volume 2 (2d edition), p. 828, defines "arm of the sea:" "This

phrase designates a navigable body of water, where the tide flows and reflows, and so far only as the tide flows and reflows," and in notes 1 and 2 authorities are cited showing that "sounds" are arms of the sea.

Littré Dictionnaire de la Langue Française gives the definition of "arm of the sea" as follows:

8°. "Bras de mer" as "détroit, Ils sont separés par un bras de mer."

The meaning of the word "sea" in the treaty of peace of 1783, between the United States and Great Britain defining the boundaries of the United States, was given by the American claim, and acquiesced in by the British as follows: "The term 'sea' in its general sense embraced the whole body of salt waters. Its great subdivisions were designated by the names Atlantic ocean, Pacific ocean, etc. Each of them generically embraced all the bays, gulfs and inlets formed by the indentures of its shores or by adjacent islands." (Moore's International Arbitration, vol. 1, p. 102); and the bay of Fundy, the gulf of St. Lawrence and the bay of Chaleurs were considered parts of the sea (*ibid.*, pp. 114, 158, and note 3). Seashore has been frequently defined to be that portion of the land adjacent to the sea which is covered by the highest tides.

"Coast is defined to be the seaboard of a country" (Eng. and Am. Encyc. of Law, vol. 6, p. 171).

"In the Anna 5, C. Rob. (reprint 332, p. 373, orig.), on the question as to whether small mud islands at the mouth of the Mississippi, composed of earth and trees drifted down by the river, were part of the United States, Sir William Scott said, 'I think that the protection of territory is to be reckoned from these islands, and that they are the natural appendages of the coast on which they border and from which indeed they are formed."

And held the islands to be a part of the coast of the United States (Eng. and Am. Encyc. of Law, vol. 16 (2d edit.), p. 1131.) The Anna was captured on the outer side of one of these islands, which were estimated to be from two and a half to five miles from the mainland, and yet the islands were considered a part of the coast.

Mr. Justice Story in Thomas and Hatch, 3 Sumner, 178, defined "shore" to be the space between the margin of the water at a low stage, and the banks to be what it contains in its greatest flow; Lord Hale defined it as synonymous with flat; Mr. Justice Parker does the same in 6 Mass., 436, 439, and Chief Justice Marshall described the shore of a river as bordering on the water's edge. (See 23 Howard, 513, Alabama *vs.* Georgia.)

"Thalweg" a term now universally used by international law-writers to define water boundaries between States and nations, is a German word composed of two separate words, "thal," a valley, and "weg" way, meaning the middle or the deepest or most navigable channel. We have in English no one word which is its exact equivalent, but it is sometimes rendered as "fairway" or "midway" and "main channel."

Littre Dictionnarie de la Langue Française gives as a definition of canal—

"5me. Lit d'une riviere—Le fleuve offre partout un canal tranquille semblable a ces fluves qui se creussent un nouveau canal"

"6me. Reviere creusée du main d'homme."

Verbo "chénal 1er Passage practiqué dans une riviere ou a l'entrée du port. * * * Forme ancienne de canal."

Having given these preliminary definitions of the terms which we shall find used in the various extracts from the commentators or other authorities on international law which, we now propose to show, uniformly support

our contention, that the deepest navigable channel, or "thalweg" in sounds, bays or arms of the sea constitutes the boundary between riparian States and nations, we beg to refer to these authorities as follows:

Halleck's International Law, or Rules Regulating the Intercourse of States in Peace and War. A new edition, revised, with notes and cases, by Sir Sherston Baker, Bart., of Lincoln's Inn, barrister-at-law. London, 1878.

Vol. 1, chap. VI, p. 145.

No. 23. A river which flows, for its entire length, through the territory of a State, is regarded as forming part of its dominion, including the bays and estuaries formed by its junction with the sea. Where the entire portion of a navigable river is included within a single State, the part so enclosed is undoubtedly the property of such State. Where a navigable river forms the boundary of coterminous States, the middle of the channel—the *filum aquæ* or *thalweg*—is generally taken as the line of their separation, the presumption of law being, that the right of navigation is common to them both. But this presumption may be rebutted or destroyed by actual proof of the exclusive title of one of the riparian proprietors to the entire river. Such title may have been acquired by prior occupancy, purchase, cession, treaty, or any one of the modes by which other public territory may be acquired. But where the river not only separates the coterminous States, but also their territorial jurisdictions, the *thalweg*, or middle channel, forms the line of separation through the bays and estuaries through which the waters of the river flow into the sea. As a general rule, this line runs through the middle of the deepest channel, although it may divide the river and its estuaries into two very unequal parts. But the deeper channel may be less suited, or totally unfit, for the purposes of navigation, in

which case the dividing line would be the middle of the one which is best suited and ordinarily used for that object. The division of the islands in the river and its bays would follow the same rule.[1]

No. 24. Where the dividing line of two States is water, as a river or lake, which is subject to changes, important questions may arise respecting the rights of property. Thus, where, by a gradual and insensible movement, the water advances on one side and recedes on the other, or by detrition on one side and deposit on the other, a portion of the soil is gradually transferred, there is evidently a loss to one State and an increase to the other. So also, where islands are washed away on one side of the channel, and new ones formed on the other, there is a corresponding change of territory. Again, suppose that the river or lake which constitutes the boundary has suddenly changed its bed, will this change produce a corresponding increase or diminution of territory to the adjacent proprietors? The Roman law determined with great care the effect of changes in the distribution of waters upon the ownership of private lands; and the influence of this law is manifest in the rules adopted by publicists with respect to international property.[2]

No. 25. Where the moving of the dividing water is so gradual as to be almost insensible, the changes produced are

not considered as acquisitions and losses of property, but the natural consequences of property already existing; because, the thing owned is naturally susceptible of this physical increase or decrease. In such a case, whether the dividing water belongs entirely to one State, or the boundary is the middle or *thalweg*, each party gains or loses accordingly as the increase or decrease is upon its side. The same rule applies to the gradual removal or formation of islands in a river or lake which divides States, or in a sea, within the territorial limits or *ligne de respect* of a State bordering upon the ocean. Moreover, a State has a certain right of preëmption to islands formed adjacent to its coast, even outside of this line of respect. But the case is very different where the river abandons its ancient bed and forms a new channel, or where a lake leaves its former banks and forms a new lake, or a series of new lakes; the boundaries of the State remain in the abandoned bed of the river, or the position formerly occupied by the lake.[1]

Extracts from "First Steps in International Law," by Sir Sherston Baker, Bart., London, 1899.

"Navigable Rivers as Boundaries," p. 68, No. 23.

A river which flows, for its entire length through the territory of a State, is regarded as forming part of its dominion, including the bays and estuaries formed by its junction with the sea. Where the entire upper portion of a navigable river is included within a single State, the part so enclosed is undoubtedly the property of such State. Where a navigable river forms the boundary of conterminous States, the middle of the channel—the *filum aquæ*, or *thalweg*—is generally taken as the line of their separation, the presumption of law being, that the right of navigation is common to them both. But this presumption may be rebutted by proof of the exclusive title of one of the riparian proprietors to the entire river. Such title may have been acquired by prior occupancy, purchase, cession, treaty, or any one of the modes by which other public territory may be acquired. Where the river not only separates the conterminous States, but also their territorial jurisdictions, the *thalweg*, or middle channel, forms the line of separation through the bays and estuaries through which the waters of the river flow into the sea. As a general rule, this line runs through the middle of the deepest channel, although it may divide the river and its estuaries into two very unequal parts. But the deeper channel may be less suited, or totally unfit, for the purposes of navigation, in which case the dividing line would be in the middle of the one which is best suited and ordinarily used for that object. The division of the islands in the river, and its bays, would follow the same rule. A difference of opinion having for many years existed between Great Britain and the United States as to the meaning of the words "the middle of the channel," in the treaty of Washington of June 15, 1846, the matter was referred to the Emperor of Germany.

The treaty provided that the line of the boundary on the 49° parallel should be continued "westward along the said parallel of north latitude to the middle of the channel which separates the continent from Vancouver's island, and thence through the middle of the said channel and of Fuca straits to the Pacific ocean." In the middle of this channel lay the island of San Juan. Both countries contended for this island. The question was whether this channel should be run, as claimed by the British government, through the Rosario straits or through the canal of Haro, as claimed by the Government of the United States. The emperor gave his award in favor of the United States, October 21, 1872. But there is reason to believe that, had the fact of an existing third and middle channel dividing the group of islands been made part of the question, the emperor would have selected the middle channel.

Changes in Dividing Rivers and Lakes.

No. 24. Where the line of two States is water, as a river or lake, which is subject to changes, important questions may arise. Thus, where by a gradual and insensible movement, the water advances on one side and recedes on the other, or by detrition on one side and deposit on the other, a portion of the soil is gradually transferred, there is evidently a loss to one State, and an increase to the other. So, also, where islands are washed away on one side of the channel, and new ones formed on the other, there is a corresponding change of territory. Again, suppose that the river or lake which constitutes the boundary has suddenly changed its bed; will this change produce a corresponding increase or diminution of territory to the adjacent proprietors?

Effects on Boundaries.

No. 25. Where the moving of the dividing water is so gradual as to be almost insensible, the changes produced

are not considered as acquisitions and losses of property, but the natural consequences of property already existing; because the thing owned is naturally susceptible of this physical increase or decrease. In such a case, whether the dividing water belongs entirely to one State, or the boundary is the middle or *thalweg*, each party gains or loses accordingly as the increase or decrease is upon its side. The same rule applies to the gradual removal or formation of islands in a river or lake which divides States, or within the sea, within the territorial limits or *ligne de respect* of a State bordering upon the ocean. Moreover, a State has a certain right of preëmption to islands formed adjacent to its coast, even outside of this line of respect. But the case is very different where the river abandons its ancient bed and forms a new channel, or where a lake leaves its former banks and forms a new lake, or a series of new lakes; the boundaries of the State remain in the abandoned bed of the river, or in the position formerly occupied by the lake.

International Law: A Simple Statement of its Principles. By Herbert Wolcott Bowen. The Knickerbocker Press, G. P. Putnam's Sons, 1896.

29 (Page 10).

Filum Aquæ or *Thalweg*.

When nations are separated by water the middle of the channel (*filum aquæ* or *thalweg*) that is best adapted for navigation is the boundary line between them. In the absence of a superior channel, the middle of the stream is the boundary line, unless a larger title can be proved by one of the nations.

First Platform of International Law, by Sir Edward Shepherd Creasy, M. A., Professor of Jurisprudence in the Hon. The Four Inns of Court, Late Chief Justice of Ceylon, Emeritus Professor of History in University College, London; Sometime Fellow of King's College, Oxford. Printed at London, 1876.

Rule when a Navigable River is a Boundary, p. 221.

No. 230. "Where a navigable river forms the boundary of conterminous States, the middle of the (navigable) channel, the *thalweg*, is generally taken as the line of their separation, the presumption of law being that the right of navigation is common to them both.[1] But this presumption may be rebutted by actual proof of the exclusive title of one of the riparian proprietors to the entire river."[2] For, "a nation which has established itself upon one of the banks of a river prior to the occupation of the opposite bank by any other nation, may, with a view to its own security, reduce the channel of the river into possession without occupying the other bank. It may for this purpose either station an armed fleet upon its waters, and thereby occupy the fairway of the river, or it may erect armed forts upon its own bank and thereby command the fairway; and in either case it will be able effectively to exclude all other nations from the use of the river." That a nation which is settled on one only of the banks of a river may nevertheless have a right of empire over the entire river, is noticed by Grotius.[3] But though,

[1] Halleck, p. 138.

[2] Travers Twiss, p. 201.

[3] The original passage in Grotius is, "Quanquam res in dubio, ut diximus, imperia ad medietatem fluminis utrinque pertingunt, fieri tatem potuit, et contigisse alicubi videmus, ut flumen totum parti uni accederet, quia scilicet ripæ alterius imperium serius occupato jam flumine coepisset; aut quia eum in modum pactionibus esset definita." Lib. 2, c. iii, sect. 18.

as I have said in case of any "doubt, the jurisdiction on each side reach to the middle of the river that runs between them, yet it may be, and in some places it has actually happened, that the river belongs wholly to one party, either because the other nation had not yet possession of the other bank until later, when their neighbors were already in possession of the whole river, or else because matters were so stipulated by some treaty." The sanction, which Usucapion, or established possession, in such a case gives to the claim of a nation to exclude other nations from the use of a river, has not been overlooked by Vattel: "A long and undisputed possession establishes the right of a nation, otherwise there could be no peace, no stability between them; and notorious facts must be admitted to prove possession. Thus, when from time immemorial a nation has without contradiction exercised the sovereignty upon a river which forms its boundary, nobody can dispute with that nation the supreme dominion over it."[1]

The *Thalweg* and the *Medium Filum*.

No. 231. It has been stated that where a navigable river separates neighboring States, the *thalweg*, or middle of the navigable channel, forms the line of separation. Formerly a line drawn along the middle of the water, the *medium filum aquæ*, was regarded as the boundary line; and it will be regarded *prima facie* as the boundary line, except as to those parts of the river as to which it can be proved that the vessels which navigate those parts keep their course habitually along some channel different from the *medium filum*. When this is the case, the middle of the channel of traffic is now ordered to be the line of demarcation. Dr. Travers Twiss[2] on this subject quotes and agrees with Kluber:—"Pour ce qui est des fleuves et lacs frontieres, dont la rive opposee est

[1] Travers Twiss, p. 202.
[2] P. 206, citing Kluber "Droit des Gens," sect. 133.

également occupée, leur milieu, y compris les îles que traverse la ligne du milieu, separe ordinairement les territories. Au lieu de cette ligne on a nouvellement choisi pour frontiere le '*thalweg*' c'est-a-dire le chemin variable que prennent les bateliers quand ils sont aval, ou plutot le milieu de ce chemin." He goes on to observe that "Grotius and Vattel speak of *the middle of the river* as the line of demarcation between two jurisdictions, but the modern publicists and statesmen prefer the more accurate and more equitable boundary of the navigable *mid-channel*. If there be more than one channel of a river, the deepest channel is regarded as the navigable mid-channel for the purpose of territorial demarcation; and the boundary line will be the line drawn along the surface of the stream corresponding to the line of deepest depression of its bed.

The islands on either side of the mid-channel are regarded as appendages to either bank; and if they have once been taken possession of by the nation to whose bank they are appendant, a change in the mid-channel of the river will not operate to deprive the nation of its possession, although the water-frontier line will follow the change of the mid-channel."

Common Cause of Dispute when River Flows Through Other Territories.

No. 232. The chief disputes connected with rivers have arisen in cases where a navigable river, during part of its course, flows through the territory of a State, or forms its boundary, that river having passed or passing through the territory of some other state before it reaches the sea."

Pages 221–224, Inclusive.

The Law of Nations, Considered as Independent Political Communities by Sir Travers Twiss, D. C. L., Regius Professor of Civil Law in the University of Oxford and One of Her Majesty's Counsel. Printed at Oxford and London, 1869.

Territorial Seas Distinguished from Jurisdictional Waters.

Paragraph 2; section 174; page 251. Puffendorf,[1] to the same effect says, "that gulfs and channels or arms of the sea are, according to the regular course, supposed to belong to the people with whose lands they are encompassed." Whenever a nation has an exclusive right over an entire sea, or over a bay, or over straits, no other nation can claim a right of navigation therein against its will. But in case the opposite sides of a bay or strait are inhabited by different nations, each nation has a right to go to the central line, drawn at low-water mark, as the limit of its maritime territory.[2] But although the territorial limit of either nation for purposes of absolute jurisdiction may not extend beyond the central deep-water line, yet the right of *innocent use* of the entire bay or strait for the purposes of navigation or passage may be common to both nations. Such a right does not destroy the territorial jurisdiction of each nation as far as the middle of the stream, but it is in the nature of an *easement*, as it is called in English law, or a *servitude*, as it is termed in the Roman law.[3] It is in fact analogous to the right of *private way* over the land of another. The right of passage and navigation must exist as a common

[1] De Jure Belli et Pacis, L. 11, c. 3, No. 8; Law of Nature and of Nations, L. IV, c. 5, No. 8.

[2] Note 2, *ibid.*

[3] Note 3, Instit. 11, tit. 3. De Servitutibus. Hugo, historie de Droit Romain, t. 1, No. 202. Kluber.

right in all those cases, where such passage or navigation is ordinarily used by both nations, and is indispensable for their common access to their own shores. A river or bay may be so narrow, or so irregular, or so liable to difficulties from winds, waves and currents, that it cannot be navigated by either nation, without each having a right of passing over the whole waters at all times. If in such a case no exclusive right is recognized in either nation the constant use by both is a conclusive proof of a common right of passage and navigation in both.

A Treatise on International Law, by William Edward Hall, M. A. Fifth Edition. Edited by J. B. Atlay, M. A., of Lincoln's Inn, Barrister-at-law. Oxford and London. 1904.

Boundaries of State Territory, Page 122.

The boundaries of State territory may consist either in arbitrary lines drawn from one definite natural or artificial point to another, or they may be defined by such natural features of a country as rivers or ranges of hills. In the latter case more than one principle of demarcation is possible; certain general rules therefore have been accepted which provide for instances in which from the absence of express agreement or for other reasons there is doubt or ignorance as to the frontier which may justly be claimed. Where a boundary follows mountains or hills, the water divide constitutes the frontier. Where it follows a river, and it is not proved that either of the riparian States possesses a good title to the whole bed, their territories are separated by a line running down the middle, except where the stream is navigable, in which case the center of the deepest channel, or, as it is usually called, the thalweg, is taken as the boundary. In lakes, there being no necessary track of navigation,

the line of demarcation is drawn in the middle. When a State occupies the lands upon one side of a river or lake before those on the opposite bank have been appropriated by another power, it can establish property by occupation in the whole of the bordering waters, as its right to occupy is not limited by the rights of any other State; and as it must be supposed to wish to have all the advantages to be derived from sole possession, it is a presumption of law that occupation has taken place. If, on the other hand, opposite shores have been occupied at the same time, or if priority of occupation can be proved by neither of the riparian States, there is a presumption in favor of equal rights, and a State claiming to hold the entirety of a stream or lake must give evidence of its title, either by producing treaties, or by showing that it has exercised continuous ownership over the waters claimed. Upon whatever grounds property in the entirety of a stream or lake is established, would it seem in all cases to carry with it a right to the opposite bank as accessory to the use of the stream, and perhaps it even gives a right to a sufficient margin for defensive and revenue purposes, when the title is derived from occupation, or from a treaty of which the object is to mark out a political frontier. In 1648 Sweden, by receiving a cession of the River Oder from the empire under the treaty of Osnabruck, was held to have acquired territory to the exaggerated extent of two German miles from its bank as an inseparable accessory to the stream; and in the more recent case of the Netze in 1773 Prussia claimed with success that the cession of the stream should be interpreted to mean a cession of its shore. Where, however, the property in a river is vested by agreement in one of two riparian States for the purpose of bringing to an end disputes arising out of the use of its waters for mills and factories, as in the case of a treaty concluded in 1816 between Sardinia and the Republic of Geneva, by which the Foron was handed over to the latter,

it would be unreasonable to interpret a convention as granting more than is barely necessary for its object.[1]

Apart from questions connected with the extent of territorial waters, which will be dealt with later, certain physical peculiarities of coasts in various parts of the world, where land impinges on the sea in an unusual manner, require to be noticed as affecting the territorial boundary. Off the coast of Florida, among the Bahamas, along the

[1] Grotius, lib. ii, c. iii, No. 18; Wolff, Jus. Gentium, Nos. 106–107; Vattel, liv. i, ch. xxii, No. 266; De Martens, Precis, No. 39; the Twee Gebroeders, iii, Rob., 339–40; Bluntschli, Nos. 297–8, 301; Twiss, i., Nos. 143–4. An instance of property by occupation is afforded by the occupation of the River Paraguay between the territory of the Republic of Paraguay and the Gran Chaco, which was effected by the Republic, and maintained until after the war with Brazil and the Argentine Confederation.

Sir Travers Twiss points out with justice that the doctrine which regards the shore as attendant upon the river, when the latter is owned wholly by one power, might lead, if generally applied, to great complications; and indicates that when it is wished to keep the control of the river in the hands of one only of the riparian owners, it is better to make stipulations such as those contained with respect to the southern channel of the Danube in the treaty of Adrianople, than to allow the common law of the matter to operate. By that treaty it was agreed that the right bank of the Danube from the confluence of the Pruth to the St. George's mouth should continue to belong to Turkey, but that it should remain uninhabited for a distance inland of about six miles, and that no establishments of any kind should be formed within the best of land thus marked out. Stipulations of such severity could rarely be needed, and in most cases could not be carried out; but the end aimed at, viz., the prevention of any use of the borders of the river for offensive or defensive purposes, and of any interference with navigation, could be obtained by prohibiting the erection of forts within a certain distance of the banks, and if necessary by specifying the places to which highlands or railways might be brought down.

shores of Cuba, and in the Pacific, are to be found groups of numerous islands and islets rising out of vast banks, which are covered with very shoal water, and either form a line more or less parallel with land or compose systems of their own, in both cases enclosing considerable sheets of water, which are sometimes also shoal and sometimes relatively deep. The entrance to these interior bays or lagoons may be wide in breadth of surface water, but it is narrow in navigable water. To take a specific case, on the south coast of Cuba, the Archipielago de los Canarios stretches from sixty to eighty miles from the mainland to La Isla de Pinos; its length from the Jardines bank to Cape Frances is over a hundred miles. It is enclosed partly by some islands, mainly by banks, which are always awash, but upon which as the tides are very slight, the depth of water is at no time sufficient to permit of navigation. Spaces along these banks, many miles in length, are unbroken by a single inlet; the water is uninterrupted, but access to the interior gulf or sea is impossible. At the western end there is a strait, twenty miles or so in width, but not more than six miles of channel intervene between two banks, which rise to within seven or eight feet from the surface, and which do not consequently admit of the passage of sea-going vessels. In cases of this sort the question whether the interior waters are, or are not, lakes enclosed within the territory, must always depend upon the depths of the banks, and the width of the entrances. Each must be judged upon its own merits. But in the instance cited, there can be little doubt that the whole Archipielago de los Canarios is a mere salt-water lake, and that the boundary of the land of Cuba runs along the exterior edge of the banks.

"Programme d'un Cours de Droit des Gens pour servir a L'Etude privee et aux Lecons Universitaires, par Alphonse River, Professeur de Bruxelles." Printed at Paris and Bruxelles, 1889.

Section 14. Les Frontiers.

Page 46—2 Montagnes frontieres: ligne de faite. Rivieres: la frontiere peut etre sur l'une des rives (ci-dessus, section 13). Si elle est dans le lit de la riviere, c'est, d'apres les traites recents, generalement le *thalweg*, c'est-a-dire la ligne la plus profonde selon laquelle se dirige le fil de l'eau. Changement de lit; ile, pont. Frontieres dans les lacs, dans la mer.

Translation.

Section 14. The Frontiers.

Page 46. 2 frontier mountains; actual line. Rivers; the frontier can be on one of the banks (as below in section 13). If it is in the bed of the river, it is according to recent treaties, generally the *thalweg*, that is to say the deepest line according to which the thread of the water directs itself. Change of the bed; island bridge. Frontiers in the lakes, in the sea.

De Marteus, Droit des Gens., tom. 1, (2eme edit.) No. 39, p. 134, lays down the rule that where ordinary unnavigable rivers form the boundary between two States, "que chacune des deux nations est maîtresse de la rivière et des îles qui s'y trouvent jusqu' au milieu de la rivière * * * Dans les fleuves navigables, c'est le courant du fleuve qu'on a communement en vue, en convenant de prendre le milieu pour limite." Thus adopting the channel theory, or fixing the boundary line "*usque ad filum.*" In section No. 40, p. 141, under the heading of "Des Détroits de Mer, des Golfes,

et de la Mer voisine" the same author says "Ce qui vient d'être dit des rivières et des lacs est également applicable aux détroits de mer et aux golfes, surtout en tant que ceux-ci ne passent pas la largeur ordinaire des rivières, ou la double portée du canon" and he cites in the foot-note (*b*) Pfeffel Principes du Droit Naturel liv. III, chap. IV, § 15; Pestel Selecta Capita Juris gentium maritimi. § 9; Gunther L.V.R. 1, II, p. 38 et suiv.

Translation.

"That each of the two nations is mistress of the river and the islands which are situated in the middle of the river. * * * In navigable rivers it is the current of the river which is commonly had in view in agreeing to take the middle for the boundary." * * * "What we have just said in regard to rivers and lakes is equally applicable to the straits or gulfs of the sea, especially those which do not exceed the ordinary width of rivers or double the distance that a cannon can carry."

Lorsqu'une rivière forme la limite, et qu'elle n'est pas devenue propriété exclusive d'un des états riverains, on admêt dans la doute que la frontière passe par le milieu de la rivière.

Le thalwege des rivières navigables est dans le doute regarde comme le milieu" & in the note "le mot allemand *thalweg* est même devenu français depuis le traité de Lunéville, 9 fevrier, 1801, art. III" and further "aussi preférе-t-on depuis quelques années prendre pour la ligne de démarcation dans les rivières navigables le chemin (thalweg) suivi par les bateaux qui descendent le courant" Bluntschli, Le Droit International Codifie, cinquième edition, 1895. §§ 298, 299, pp. 184, 185.

Translation.

"When a river forms the boundary, and has not become the exclusive property of one of the riparian States, it is admitted in the doubt that the frontier is in the middle of the river. The thalweg of navigable rivers is in case of doubt regarded as the middle. * * * The German word 'thalweg' has even become French since the treaty of Luneville, the 9th of February, 1801, article III. * * * It has been also preferred since many years to take for the line of demarcation in navigable rivers the road (thalweg) followed by the boats which descend the current." * * *

The same author says in § 301, p. 185, "Le milieu d'un lac sert également de ligne de démarcation entre les deux états riverains, a moins qu'une autre limite n'ait été consacrée par l'usage ou par les traités. On reconnait dans la règle aux habitants des deux rives le droit de libre navigation. 1. On doit prendre ici pour ligne frontière le milieu du lac, parcequ'il n'y a pas ou presque pas de thalweg des lacs" plainly conveying the intimation that where there is a main channel or thalweg, the center of it is the boundary line. And again the same author says in § 316, p. 194, "Les lacs font partie du territoire de l'état qui les entoure. Lorsqu'ils sont situés entre plusieurs états; ils sont traités par analogie, comme les fleuves et les rivières."

"The middle of a lake serves equally as the line of demarcation, as between two riparian States, at least when no other line has been consecrated by usage or treaties. The rule is recognized to allow the inhabitants of both banks the right of free navigation. 1. We must take here for the boundary line the middle of the lake because there is not or generally not any thalweg in the lakes. * * * Lakes are a part of the territory of the State which encloses them. When they are situated between several States they are treated by analogy as streams and rivers."

P. Pradier Fodéré, in his "Traité de Droit International Européen et Américain, suivant les progrès de la Science et de la Pratique Contemporaines," 1885, one of the most modern and exhaustive works on international law, in seven volumes, says in section 657, tome 2eme, p. 202: "*d. Les lacs formés dans le voisinage immédiat de la haute mer*—Si l'eau maritime qui baigne les côtes est censée appartenir aux États riverains, il en est plus forte raison de même pour les eaux de mer qui sont en deça des côtes, c'est à dire pour les lacs formés dans le voisinage immédiat de la mer libre. Ces lacs doivent être considérés comme appartenant à l'État ou aux États dans le territoire desquels ils se trouvent, aux mêmes conditions que les mers fermées ou reputées telles (V. *supra* Nos. 641, 642, 643, 645, 646); *et comme ils sont generalement en communication avec la mer on doit les soumettre aux mêmes règles que les fleuves internationaux.* (V. *infra* 690 *et suiv.*, 699 *et suiv.*)" (The italics are our own.)

Translation.

"THE LAKES FORMED IN THE IMMEDIATE NEIGHBORHOOD OF THE HIGH SEA.—If the maritime water which bays the coast is considered to belong to the riparian States there is still greater reason that the waters of the sea which touch the coast should be the same, that is to say, if the lakes form in the immediate neighborhood of the sea. These lakes ought to be considered as belonging to the State or to the States in whose territory they lie, under the same conditions that the enclosed seas are all reputed as such, *and as they are generally in communication with or connected with the sea they ought to be considered under the same rules as international rivers.*" (The italics are our own.) * * *

Referring to these sections 690, 699, *et seq.*, the author collates all the authorities on the subject of boundaries on rivers between States, at too great length to be quoted in full here, but we condense from his text the following: Under the older

authors such as Grotius and Vattel the delimitation extended to the middle of the stream, and with them is the more modern author G. F. de Martens, who, however, fixes the line in navigable rivers at the channel; he quotes Kluber as at first favoring the middle of the stream as the line, but he adds: "Cependant il (Kluber) annonce qu'au lieu de cette ligne on à récemment choisi pour frontière le thalwoge, c'est à dire le chemin (variable) que prennent les bateaux quand ils descendent le fleuve, ou plûtôt le milieu de ce chemin" (V. *infra* No. 639). Our author further says: "Heffter dit que 'Si un fleuve sépare deux États, l'empire de l'un et de l'autre s'étend juste au milieu du fleuve, sauf convention contraire,' mais il ajoute, néanmoins que" quelquefois le chénal dit thalweg, a servi de limite (V. *infra* 693.)

Translation.

"Nevertheless he (Kluber) announces that in lieu of this line the thalweg has been recently chosen as the frontier, that is to say, the road (variable) that the vessels take when they descend the river, or rather the middle of this road." * * * Heffter says that if a river separates two States, the dominion of one and the other extends to the middle of the river unless there be a convention to the contrary, but he adds, nevertheless, that sometimes the channel, called the thalweg, has served as the boundary.

The author also quotes Bluntschli as laying down the middle of the river as the boundary line, but neglects to quote, as we have already done, the qualifying phrase of Bluntschli: "Aussi prefóre-t-on depuis quelques annees prendre pour la ligne de demarcation dans les rivières navigables le chemin (thalweg) suivi par les bateaux qui descendent le courant." P. Pradier Fodéré quotes Wheaton and Calvo as advocating the middle of the stream as the proper boundary. In sections 692, 693, 694 he sustains the thalweg or channel theory, as being the most natural, just

and reasonable, and as the one now most generally and universally adopted by civilized nations, instancing France, Germany, Russia, Prussia, Austria, Italy, Great Britain, Bavaria, all of which countries have in their treaties, and some in their congresses, recognized the thalweg or middle of the channel as the proper boundary. In section 695, page 230, he explains that "la limite indiquée par le thalweg c'est a dire le milieu du chénal" does not follow mathematically always the middle in all the variations of the channel, but says: "L'on se contente d'ordinaire d'observer la course des bateaux de plus fort tonnage, et on l'indique au moyen de signaux fixes et de boúées, ces jalons permettant de tracer graphiquement la ligne médiane avec une exactitude suffisante" and he cites in note 2, 1879, chap. II, p. 74, Engelhardt-Du régime conventionel des fleuves internationales.

Translation.

"Also it has been preferred since several years to take for the line of demarcation in navigable rivers the road (thalweg) followed by the boats which descend the current." * * * "It is considered sufficient ordinarily to observe the course of vessels of the heaviest tonnage and to indicate by means of fixed signs and buoys, the channel; these marks permitting to graphically trace the middle line with sufficient exactness.

It will thus be seen that according to the writers of international law the deep-water channel or thalweg theory is now almost universally adopted in regard to boundaries on water parts of the sea or gulf, whether they be sounds, bays, straits, gulfs, estuaries, or other arms of the sea, with the same force and applicability as to interior rivers, streams or lakes. Of course, there are but few judicial decisions, that is to say, decisions of the courts upon this point, because it is seldom, if ever, that such cases come up before the courts of any country, but the same principle has been fre-

quently maintained in treaties between foreign nations, as well as by arbitration tribunals, which are, of course, in a manner a very high order of judicial tribunals. However, there is one case in which this honorable court selected the channel or midway of the bay between New York and New Jersey as the proper boundary.

In Devoe Manufacturing Company, 108 U. S., 401, the question was at issue in regard to the boundary line between New York and New Jersey, under an agreement between the two States, the case coming up on an application for a writ of prohibition. The jurisdiction of the State of New Jersey was claimed, on the interpretation of the agreement to the boundary line, to extend "down to the bay of New York, and to the channel or midway of the said bay," and the court sustained the claim, and denied the application for the writ.

We have already seen that the thalweg theory or deep-channel theory was adopted in the French treaty of Luneville in the year 1801, and subsequently early in the century the King of the Netherlands, as arbitrator between the United States and Great Britain, in establishing the north-eastern boundary between the United States and Canada, 1831, adopted the "thalweg" in regard to the rivers and the bay of Fundy, as the true boundary line, under international law. (See p. 12, Translation Northeastern Boundary Arbitration, Washington, printed at the office of the United States *Telegraph*, to be found in Congressional Library.) The translator in a note says "Thalweg—a German compound word—thal, valley—weg, way. It means here the deepest channel of the river."

So in what is commonly known as "the San Juan water boundary" a controversy in regard to the boundary between the United States and Great Britain, Emperor William I of Germany, the chosen arbitrator, gave the award in favor of the United States, at Berlin, October 21, 1871, by deciding "that the boundary line between the territories of Her

Britannic Majesty and the United States should be drawn through the Haro channel." The emperor, arbitrator, in his award says that he has arrived at his decision "after hearing the report made to us by the experts and jurists summoned by us upon the interchanged memorials and their appendices." This sustained the American claim and the British immediately withdrew their military garrison from the island of San Juan, which was south of the Haro channel and the United States took possession.

It also gave to the Americans, as said by President Grant in his message of December 2, 1892, "the important archipelago of islands lying between the continent and Vancouver's island." Although in the emperor arbitrator's award there is no mention, *eo nomine* of the thalweg, yet it is plainly seen that the decision is based on the deep-channel theory as applicable to arms and sounds of the sea, such as the straits of San Juan de Fuca and the Haro channel, and in the subsequent definition of the boundary signed by Hamilton Fish, U. S. Secretary of State, Edward Thornton, British Minister, and James C. Prevost, British representative, the boundary line is said to be prolonged until "*it reaches the center of the fairway of the straits of San Juan de Fuca*"—fairway being the nearest English equivalent to thalweg. The "experts and jurists" mentioned by the Emperor William as those on whose reports he relied and based his decision were according to Prof. John Basset Moore three in number, viz: "Dr. Grimm, vice-president of the supreme ecart at Berlin; Dr. Kiepert, the eminent pupil of Carl Ritter; and Dr. Goldschmidt, the member of the supreme commercial court at Leipsic;" International Arbitrations by Prof. John Basset Moore, vol. I, p. 229, where this arbitration case is very fully treated. We regret that we have been unable to obtain the reports and opinions of these eminent German juri-consults so as to lay them before your honors, as we doubt not that they evidence the profound and exhaustive study of the subject, which charac-

terizes German scientists, especially German jurists. Senator Foster of Louisiana kindly made application to the United States Secretary of State to ask the gracious offices of our minister at Berlin to obtain copies of these reports, and although the request was properly and promptly made, the German government declined, as we have since been informed, is its usual practice, to furnish copies, although we offered to defray all expenses and fees.

Another case in which the "thalweg" was adopted as the boundary line was the arbitration case between Roumania and Bulgaria. By the treaty of Paris, 1858, at the Congress of Powers, the navigation of the Danube river was placed under the control of an international commission, and in 1878 by the treaty of Berlin the powers of that commission were much enlarged. Under the second article of that treaty, a commission was instituted to fix the boundaries of Roumania and Bulgaria. This commission consisted of seven members, one named by the Emperor of Germany, one by the Emperor of Russia, one by the President of the French Republic, one by the Queen of Great Britain, one by the King of Italy; one by the Sultan of Turkey; and one by the Emperor of Austria. This commission, unanimously, on the 17th of December, 1878, at Constantinople, fixed the southern boundary of Roumania and the northern boundary of Bulgaria as the "thalweg" of the River Danube (*vide* State Papers, vol. 70, 1878, 1879, pp. 514 *et seq.*). Although the Russian commissioner did not sign the award when made, he gave his adhesion to it in a note August 16–28, 1880—note, p. 514.

So, in the "Treaty between the Argentine Republic and Chile, defining the boundaries between the two countries (Tierra del Fuego, neutrality of straits of Magellan, etc.), signed at Buenos Ayres, July 23, 1881. Ratifications exchanged at Santiago, October 22, 1881, translation," the plenipotentiaries of the two powers, although not designating the channel boundary as the "thalweg," yet adopted the

deep-water channel as the boundary, and thereby fixed the nationality of the islands on either side of it. They divided Tierra del Fuego, giving the western portion to Chile, and the eastern portion to the Argentine Republic, and in article II said "in regard to the other islands, Isla de los Estados belongs to the Argentine Republic" (this island lies off in the Atlantic opposite and adjacent to the eastern portion of Tierra del Fuego), "with the isles next to it, and the other islands in the Atlantic and east of Tierra del Fuego, and the coast of Patagonia; while to Chile belong all the islands south of Beagle channel, down to Cape Horn, and those west of Tierra del Fuego" (*vide* State Papers, vol. 72, 1880, 1881, pp. 1103 *et seq.*). The maps of this territory show that Beagle channel is a part of the waterway running between the Atlantic and Pacific, and it will thus be seen that the thalweg or channel theory was adopted, and the ownership of the islands determined according to whether they were east or west of that channel; those west going to Chile and those east to the Argentine Republic.

The commissioners on the part of the United States and Great Britain, Porter, for the United States, and Barclay, for Great Britain, fixed the boundary in the so-called Detroit river, under the sixth and seventh articles of the treaty of Ghent at the deep-water channel (thalweg), giving Hog island, or Belle Isle, to the Americans, as lying south of the channel. See Gannett's Boundaries (3d edit., pp. 12 *et seq.*, report dated 18th of June, 1822), and see map N–III photo-lithographic copies of original charts in State Department, by the U.S. Light House Board, November, 1891. We have said the "so-called Detroit river," because the English name of river is a misnomer, as the body of water is not a river, but a strait between two lakes and properly called by the French "D'etroit," that is a "strait."

That this deep-water channel or thalweg has been generally held to be the true boundary between Louisiana and Mississippi by citizens of both States we have already shown

by evidence of witnesses and Mr. Hodgkins of the Coast and Geodetic Survey in his report on the boundary question between Louisiana and Mississippi, says, in regard to the cartographers and others that "there seems to have been a general consensus that the passage called Cat Island channel divides the jurisdiction of the two States" (Record, p. 1001). He also says on page 1003:

"It is also worth noticing that the principal channel into Lake Borgne lies to the northward of the islands between them and Lower Point Clear. From all the information at hand, therefore, it would appear that the boundary between the States probably takes the course indicated on the final tracing, *i. e.*, north of the Malheureux islands, and thence through the Cat Island channel to the gulf of Mexico."

In the Alaskan boundary case, which was decided by an arbitration tribunal, consisting of "six impartial jurists," namely, Baron Alverstone, Lord Chief Justice of England; Mr. Elihu Root, present Secretary of State and ex-Secretary of War of the United States; Henry Cabot Lodge, U. S. Senator from Massachusetts; George Turner, U. S. Senator from Washington; Sir Louis Amable Jette, K. M. G., lieutenant governor of the province of Quebec, and Allen Bristol Aylesworth, one of His Majesty's counsel, the award by the majority of the commission including the three American representatives, joined with Baron Alverstone, Lord Chief Justice of England, decided that the middle of the Portland channel was the proper boundary line, and included Wales island, to the north of which the channel passed. This award was made October 20, 1903 (*vide* Foreign Relations of the United States, 1903, pages 544 and 545). This sustained the American construction in regard to the "thalweg" and the island lying south of it.

In concluding upon this question of the application of the "thalweg" we cannot more forcibly state its applicability than by quoting what our distinguished opponent here, Dr.

Hannis Taylor, said in his argument before the Alaskan boundary commission when he said—"What I claim that I have demonstrated beyond all question to this tribunal is that the boundary set by that treaty between these two nations was that estuary, that arm of the sea which is one unbroken whole, a fjord, a canal, which had in it two channels, and that there was no kind of designation or inscription intended to indicate which one of the subordinate divisions, which one of the channels of the indivisible whole was intended as the boundary. Therefore, I say that no case has ever arisen between nations where there was a more ideal basis, a more perfect predicate upon which to apply the doctrine of the thalweg, to discriminate by operation of law which one of the two channels is the real boundary, when the body of water as a totality and an indivisible whole was set up as the boundary." The learned doctor then goes on to quote from Sir Travers Twiss, Bluntschli, Hall, Wheaton, and David Dudley Field, giving the following quotation from David Dudley Field's International Code—"*Boundary by stream of channel 30.*—The limits of national territory bounded by a river or other stream, or by a strait, sound, or arm of the sea, the other shore of which is the territory of another nation, extend outward to a point equidistant from the territory of the nation occupying the opposite shore; or if there be a stream or navigable channel, to the thread of the stream, that is to say, to the mid-channel; or, if there be several channels, to the middle of the principal one." Dr. Taylor adds in relation to this quotation—"That is the clean-cut, definite statement of David Dudley Field as to an arm of the sea that is a boundary between two countries, and he rests his statement upon the authority of Bluntschli."

If this be good international law, as contended by Dr. Taylor, as between the United States and England in interpreting the treaty between Russia and England, where it became necessary to interpret the meaning of the latter treaty, then the same rule would be applicable to the interpretation of

the boundary in this case between Louisiana and Mississippi, where there is any doubt as to the boundaries in the acts of Congress, according to the general principles of international law. It would thus appear that according to Dr. Taylor, himself one of the opposing counsel in the present cause, that he at least and his side would be hoisted by his own petard, and we would respectfully refer this honorable court to his argument in full on this particular topic, to be found at pages 535 *et seq.* of the record of the Alaskan boundary tribunal for the 13th day, Wednesday, September 30, 1903.

III.

Louisiana's title to the disputed territory confirmed by prescription, usucaption, acquiesence, and specific acknowledgment by the State of Mississippi.

First. There is a mass of evidence in the record showing that the State of Louisiana has uniformly acted in relation to the disputed territory as though it were hers; that she has asserted title thereto, and has exercised acts of ownership and sovereignty over same.

Second. There is a mass of evidence in the record showing that the various departments of the United States Government have in their interpretations of the acts of Congress, creating respectively the States of Louisiana and Mississippi, recognized and affirmed Louisiana's ownership of the disputed area.

Third. Finally there is a mass of evidence in the record showing that the State of Mississippi has never asserted title to the area, when she should have done so, if she had any claim; and that she has, by her official maps, recognized Louisiana's ownership of the disputed area.

We shall therefore consider the evidence under these subheadings and in doing so we will consider first what Louisiana has actively and affirmatively done in regard to her ownership of the disputed territory.

First.

Recognition by Louisiana of the deep-water channel as her boundary in the disputed territory, and her long, continuous, and undisputed acts of ownership and exercise of sovereignty over said area.

This is, after the United States statutory provisions on the subject of the boundary of the States of Louisiana and Mississippi, the next most important phase of this case, because the State of Mississippi after acquiescing for nearly one hundred years in Louisiana's ownership of the disputed territory will not now be permitted to set up a claim to the territory because she has become aware of its value.

As we have previously stated the disputed territory consists of land and water, and is bounded on the north by the deep-water channel. The land has not much value, being low-lying, tide-level sea marsh, valued at twenty-five cents an acre, while the waters really present the cause of dispute on account of their oyster-producing qualities. Jurisdiction of, and sovereignty over, the land carries with it, under international law, jurisdiction and control of the surrounding waters. The extension of the eighteen miles, or six-league line, of Mississippi projects her claim a great distance down into the Louisiana mainland, or St. Bernard peninsula, as will be seen by referring to the red-ink line on Mississippi's map "A" (Record, p. 88). The claim of Mississippi would also include the land forming Half Moon or Grand island, Grassy island, Malheureux island and Isle à Pitre, which islands are all, in a way, north of the Louisiana main shore line, but are south of the deep-water channel.

When Louisiana was to be created a State, by the enabling act of Congress, February 20, 1811, section 3, of the said act, provided that all of the waste and unappropriated land in said State should be and remain the property of the United States Government (Record, p. 1019, document No. 21). The National Government for many years had these public lands of Louisiana in course of being surveyed. The disputed area of today includes lands and waters located in the following townships in the southeastern land district of Louisiana, east of the Mississippi river, to wit:

Township 10 south, range 17 east; township 10 south, range 18 east.

Township 11 south, range 17 east; township 11 south, range 18 east.

Township 10 south, range 20 east; township 11 south, range 19 east.

Township 11 south, range 20 east; township 12 south, range 16 east.

Township 12 south, range 17 east; township 12 south, range 18 east.

Township 12 south, range 19 east; township 12 south, range 20 east.

Township 13 south, range 16 east; township 13 south, range 17 east.

Township 13 south, range 18 east; township 13 south, range 19 east.

Township 13 south, range 20 east.

Record, p. 730, testimony of Mr. H. C. Smith.

The lands in these townships were surveyed by surveyors in the employ of the United States Government, the surveys being made about the year 1842, and all of these lands were surveyed as being in, and forming part of, the State of Louisiana. This data is all given in photolithographic plats of the township surveys appearing in the record as:

Document No. 7, Record, p. 994.
Document No. 38, Record, pp. 1046–1047*h*—45.
Document No. 39, Record, p. 1047*i*—46.
Document No. 40, Record, p. 1047*j*—47.

Document No. 50, Record, p. 1047*g*—44.

It will be recalled that by the acts of Congress of the United States of 1849 and 1850, called the swamp-land grants, the United States authorized the return to certain States of the swamp and overflowed lands within their respective limits, in order that these lands might be reclaimed, protected from overflow and brought into use. Acting under authority of these acts, which provided that the respective States should make application for the lands to the Commissioner of the General Land Office of the United States, the State of Louisiana made application to the United States Government for the approval to her of these lands south of the deep-water channel as being part of her territory and situated within her limits. All of these lands selected by Louisiana and lying south of the deep-water channel were approved to the State of Louisiana May 6, 1852, and thereafter the private title thereto and absolute ownership thereof was vested in the State of Louisiana. All of these facts are shown by certified extracts from the books of the United States land office at New Orleans, Louisiana, where these transfers were recorded (Record, pp. 27 to 46, both inclusive, Exhibit G). It is also shown by certified copies of the lists of swamp and overflowed lands, unfit for cultivation, se-

lected as surveyed and approved to the State of Louisiana, appearing in the record as documents Nos. 62 and 63 (Record, pp. 1091 to 1103, inclusive).

These lands *in the disputed territory* were then by the State of Louisiana offered for sale through her register of her State land office, and sales of same were from time to time made by the State of Louisiana to individuals as shown by the following extracts from document No. 64, being an abstract of entries from the tract books of the land register of the State of Louisiana (Record, pp. 1105 to 1115, both inclusive) and from the patents issued to these lands by the State of Louisiana, to wit:

January 12, 1853.—Mary C. Gordon, certificate No. 449. Lands in township 13 south, range 16 east (Record, p. 1111, and also Record, p. 1149, document No. 74) patent No. 726.

July 5, 1854.—W. A. Gordon, certificate No. 772 N. S. Lands in township 13 south, range 16 east (Record, pp. 1111 and 1150, document No. 75), being patent No. 7850.

July 24, 1854.—Bernard Bermudez, certificate No. 801 N. S. Lands in township 13 south, range 16 east (Record, p. 1111).

April 28, 1859.—Mrs. Ann Gordon, certificate No. 5696 N. S. H. Lands in township 12 south, range 18 east (Record, p. 1108).

November 18, 1859.—Henry Florence, certificate No. 7785 N. S. H. Lands in township 11 south, range 18 east (Record, p. 1105).

February 28, 1861.—Louis Palms, certificate No. 10350 N. S. H. Lands in township 13 south, range 16 east (Record, p. 1111).

May 30, 1861.—Louis Palms, certificate No. 3485. Lands in township 13 south, range 16 east (Record, p. 1111), and patent No. 10331 (Record, p. 1151, document No. 76).

November 25, 1854.—A. W. Morse, certificate No. 52 N. S. G. Lands in township 13 south, range 17 east (Record, p. 1112), patent No. 143 (Record, p. 1153, document No. 78).

November 29, 1864.—F. M. Stevens, certificate No. 55 N. S. G. Lands in township 13 south, range 17 east (Record, p. 1112), patent No. 144 (Record, p. 1152, document No. 77).

January 7, 1865.—Bertrand Plongas, certificate No. 92 N. S. G. Lands in township 13 south, range 17 east (Record, p. 1112).

January 9, 1865.—Henry McGuinn, certificate No. 106 N. S. G. Lands in township 13 south, range 17 east (Record, p. 1112), patent No. 1176 (Record, p. 1154, document No. 79).

March 20, 1867.—Richard Pindall, patent No. 194. Lands in township 10 south, range 20 east (Record, p. 47, Exhibit "H").

March 20, 1867.—Richard Pindall, patent No. 195. Lands in township 10 south, range 20 east (Record, p. 48, Exhibit "I").

March 20, 1867.—Richard Pindall, patent No. 196. Lands in township 10 south, range 20 east (Record, p. 49, Exhibit "J").

March 20, 1867.—Richard Pindall, patent No. 193. Lands in township 14 south, range 16 east (Record, p. 1155, document No. 80).

August 28, 1869.—Annie Duncan, certificate No. 358 N. S. D. Lands in township 13 south, range 17 east (Record, p. 1112).

August 28, 1869.—Alexander Duncan, certificate No. 359 N. S. D. Lands in township 13 south, range 17 east (Record, p. 1112).

August 22, 1873.—Stephen Moloche, certificate No. 1288 N. S. D. Lands in township 13 south, range 16 east (Record, p. 1110).

March 15, 1887.—J. C. Gilmore, certificate No. 571 N. S. L. Lands in township 11 south, range 20 east (Record, p. 1106), patent No. 706 (Record, p. 1156, document No. 81).

April 7, 1887.—J. C. Gilmore, certificate No. 595 N. S. L. Lands in township 12 south, range 20 east (Record, p. 1109), patent No. 751 (Record, p. 1158, document No. 83).

April 7, 1887.—J. C. Gilmore, certificate No. 594 N. S. L. Lands in township 11 south, range 20 east (Record, p. 1106), patent No. 750 (Record, p. 1157, document No. 82).

April 11, 1887.—W. V. Gilmore, certificate No. 601 N. S. L. Lands in township 11 south, range 20 east (Record, p. 1106), patent No. 761 (Record, p. 1159, document No. 84).

June 11, 1887.—W. V. Gilmore, certificate No. 659, N. S. L. Lands in township 11 south, range 20 east (Record, p. 1106), patent No. 870 (Record, p. 1161, document No. 85).

September 12, 1887.—Samuel L. Gilmore, certificate No. 719 N. S. L. Lands in township 12 south, range 20 east (Record, p. 1110), patent No. 961 (Record, p. 1162, document No. 86).

November 7, 1887.—J. C. Gilmore, certificate No. 770 N. S. L. Lands in township 11 south, range 19 east (Record, p. 1105), patent No. 1039 (Record, p. 1163, document No. 87).

November 7, 1887.—J. C. Gilmore, certificate No. 769 N. S. L. Lands in township 11 south, range 20 east (Record, p. 1106), patent No. 1038 (Record, p. 64, document No. 88).

November 7 1887.—J. C. Gilmore, certificate No. 771 N. S. L. Lands in township 12 south, range 20 east (Record, p. 1110), patent No. 1040 (Record, p 1165, document No. 89).

April 27, 1894.—S. Moloche, certificate No. 2805 N. S. L. Lands in township 11 south, range 19 east (Record, p. 1106), patent No. 5094 (Record, p. 1050, document No. 53).

April 27, 1894.—S. Moloche, certificate No. 2806 N. S. L. Lands in township 11 south, range 20 east (Record, p. 1107), patent No. 5095 (Record, p. 1051, document No. 54).

April 27, 1894.—J. C. Gilmore, certificate No. 2804. Lands in township 11 south, range 20 east (Record, p. 1106), patent No. 5093 (Record, p. 1049, document No. 52).

In furtherance of the object of better protecting the lands of the parishes of St. Bernard and Plaquemines from the overflow by the annual high waters of the Mississippi river, as contemplated by the swamp land grant acts of Congress,

the legislature of the State of Louisiana adopted act No. 14 of 1892, which created the Lake Borgne Basin levee district, and provided a board of commissioners therefor as a department of the State government. This board of commissioners was authorized to levy taxes on the property within the limits of its district, which taxes were to be used in establishing a protective levee system for the district to prevent annual overflows. The act also provided that as a means of raising further revenues to better enable the board of commissioners to discharge its duties, the register of the State land office was authorized to transfer and deed to the board of commissioners for the Lake Borgne Basin levee district, all of the unsold lands belonging to the State of Louisiana, lying within the limits of the levee district. The limits of this levee district included the whole of the parish of St. Bernard and a portion of the parish of Plaquemines. This deed was executed April 2, 1895, and a certified copy appears in the record as document No. 55 (Record, pp. 1052 to 1081). It transferred from the State of Louisiana to the said levee board, as a special department of the State government, three hundred and eighty-four thousand nine hundred and forty-one and 17/100 acres of State lands in the parish of St. Bernard. Of the lands in the parish of St. Bernard involved in and forming part of the area now in dispute with the State of Mississippi, there were transferred lands in the following townships, to-wit:

Township 11 south, range 17 east.....	8,960	acres.
Township 11 south, range 18 east..... ..	4,920	"
Township 11 south, range 17 east..... ..	12,160	"
Township 11 south, range 20 east.....	4,360	"
Township 12 south, range 16 east.....	7,040	"
Township 12 south, range 17 east.....	21,120	"
Township 12 south, range 18 east.....	19,611.40	"
Township 12 south, range 19 east.....	21,120	"
Township 12 south, range 20 east.....	12,120	"
Township 12 south, range 21 east.....	640	"

Township 13 south, range 16 east.....	11,134.36	acres.
Township 13 south, range 17 east.....	20,760	"
Township 13 south, range 18 east.....	22,400	"
Township 13 south, range 19 east.....	20,480	"
Township 13 south, range 20 east.....	15,360	"
Total.....	201,985.76	

This transfer was supposed to convey to the said levee board all of the State lands in the parish of St. Bernard, and included all of the unsold land in the disputed territory, except as omissions might be developed and corrected. When this land was transferred by the State to the Lake Borgne Basin levee district, an entry was made by the register of the State land office in his tract book as appears from document No. 64 (Record, pp. 1105 to 1115).

The board of commissioners for the Lake Borgne Basin levee district, which was nothing more or less than a department of the State government of the State of Louisiana, as we have stated, created for a special purpose, having these lands on hand was authorized by law to sell same, and did make sales thereof to individuals as follows:

September 16, 1898.—To Chas. Sanger of Bay St. Louis, Mississippi, 4,320 acres in township 11 south, range 19 east, parish of St. Bernard (Record, p. 1083, document No. 57).

June 17, 1899.—To Geo. H. Dunbar, of New Orleans, Louisiana, 5,122 24 acres in township 11 south, range 19 east, township 11 south, range 20 east, and township 12 south, range 18 east (Record, p. 1085, document No. 58).

March 14, 1902.—To Lazaro Lopez and William W. M. Dukate, of Biloxi, Mississippi, 510 acres in township 12 south, range 18 east (Record, p. 995, document No. 8).

March 7, 1902.—To Geo. Ruppel, of New Orleans, Louisiana, 620 acres in township 11 south, range 20 east, and township 12 south, range 20 east (Record, p. 1087, document No. 59).

These lands acquired from the State by various individuals were in due course in some instances sold by them to other individuals and corporations, and the rights of ownership and power to transfer enjoyed under the laws of Louisiana, and no contention was ever made as to the State of Mississippi having any right in the lands. In fact, as appears from the record, citizens of Mississippi came to Louisiana and bought these lands, though they were in the heart of the present disputed area created by the present contention of the State of Mississippi.

Isle à Pitre is the main and most important island now claimed by the State of Mississippi under her present island theory of defense. It is composed of sections 23, 24, 25, 26, 27, 28, 32, 33, and 34 of township 10 south, range 20 east, southeastern district of Louisiana, east of the Mississippi river. Yet we find these lands approved to the State of Louisiana by the Commissioner of the General Land Office of the United States May 7, 1852 (Record, p. 1091, document No. 62), as being in and forming part of the State of Louisiana. In turn the State of Louisiana patented these lands to Richard Pindall in 1867 (Record, pp. 47–48–49 and 1155, Exhibits H, I, and J, and document No. 80). Richard Pindall sold these lands to Henry J. Leovy of New Orleans, Louisiana, in 1867 (Exhibits K & Z, Record, pp. 50 and 57). Henry J. Leovy sold them to J. C. Gilmore of New Orleans, Louisiana, in 1892 (Exhibits L and M, Record, pp. 53 and 55), and J. C. Gilmore sold them to the Louisiana Navigation Company, Limited (Record, p. 1081, document No. 56), by which company, Isle à Pitre, the *piece de resistance* of Mississippi's claim in the disputed territory, and other lands are now owned under a chain of title and undisturbed possession extending from 1852 to date, or a period of over fifty years.

In addition to these acts of ownership and sovereignty shown by the sale of these lands in the heart of the disputed territory, and, in fact, composing its whole landed area, other

FOLD OUT IS TOO LARGE TO BE FILMED

acts showing Louisiana's exercise of sovereignty abound in the record.

In all of her official maps, the State of Louisiana claims the peninsula of St. Bernard as her property (maps No. 30, section No. 1, Louisiana Atlas of Maps, p. 24), and in these maps the area in dispute is recognized as forming part of the parish of St. Bernard, a territorial governmental subdivision of the State of Louisiana.

Your honors' special attention is called to a map of Louisiana, representing the several land districts, by W. J. McCulloh, surveyor general of Louisiana, October 1, 1859 (map No. 16, Atlas, p. 5) as distinctly claiming at that date the disputed area to be part of the State of Louisiana, and dividing said area into townships and ranges.

The official map of the parish of St. Bernard (map No. 52, Louisiana Atlas of Maps, p. 47) shows every acre of the landed portion of the disputed territory to be carefully divided into townships, ranges and sections, and claimed to form part of said parish of St. Bernard, including all islands south of the deep-water channel. This is also confirmatory of the testimony of the various citizens of St. Bernard parish to the effect that they had always regarded this area as forming part of the parish of St. Bernard. We make part of this brief a photographic reproduction of this official map of the parish of St. Bernard.

According to the laws of Louisiana, the State taxes, or alimony, are collected by the county or parish officials on all lands, and other property located within the limits of the respective parishes, and when collected, are remitted by these officials to the State treasurer. The State of Louisiana has for years been exercising her sovereignty and collecting taxes on these lands in the disputed territory in cases where the lands were privately owned (Record, p. 772, testimony of E. E. Nunez, sheriff and *ex-officio* tax collector). The lands forming Isle à Pitre, claimed by Mississippi, under her island

theory of ownership, have been paying taxes to the State o Louisiana for years.

Certified copies of the *assessment-rolls* of the parish of S Bernard, made up annually, and showing the lands subjec to State, parish and levee district taxation, and the amoun of such taxes are to be found in the record (Record, pp. 111 to 1136, document No. 65). It is true that these assessment rolls as given in the record, do not go back beyond the yea 1889, but this is explained by the fact that the assessment rolls of previous years were kept in the county or parish court-house of the parish of St. Bernard, which building, with all its contents, was destroyed by fire in the year 188 (Record, p. 149, testimony of Mr. E. E. Nunez, sheriff and *ex-officio* tax collector of the parish of St. Bernard). With the destruction of these official records, a temporary condition of chaos as to tax and land matters necessarily resulted in the parish of St. Bernard, and the State legislature of Louisiana came to her assistance, enacting special legislation to suit the requirements of her peculiar situation (act No. 6 of the Acts of the Louisiana Legislature of 1884, p. 13). To make up the annual listing of property for purposes of taxation, reference was always had to the assessment-rolls of the previous year, and to the transfers of property appearing of record in the conveyance office of the clerk of court in the parish of St. Bernard. With all of these records destroyed, it required a great length of time and an entirely different course of action to get these properties back again on the tax-rolls, the process being gradual and difficult (Record, p. 748, testimony of A. C. Gonzales, assessor). This destruction by fire of these old records, therefore, accounts for our inability to produce copies of them today, and is the reason why we are unable to go back beyond the year 1889, in presently producing this character of evidence or old parish maps of St. Bernard. From the date the records are given, the collection of taxes by the State of Louisiana from these privately owned lands in the disputed area is continuous and con-

secutive, and the rolls in each succeeding year show the changes that have occurred in the individual ownership of the respective properties. By referring for instance, to Record, p. 1120, we see that in the year 1893, Mr. J. C. Gilmore is listed as the owner of the whole of Isle à Pitre in addition to other lands, and that taxes were paid to the State of Louisiana thereon, and that for the year 1903 (Record, p. 1134) they appear as assessed to the Louisiana Navigation Company.

We have already shown, under another heading, in stating our cause of action in this case, acts by the local or parish officials wherein political and police control and jurisdiction was exercised by the St. Bernard officials over the disputed area, notably in the case of the expulsion of non-resident oyster fishermen, when the oyster law was enacted confining to citizens of Louisiana the privilege of fishing oysters from Louisiana waters. Other acts of police control and jurisdiction by Louisiana officials over this general territory, are shown by the record. Mr. Albert Estopinal, lieutenant governor of the State of Louisiana, testifies (Record, p. 180) to an incident occurring many years ago, where a murder was committed in the St. Bernard sea marsh, that the murderer was taken either to Hancock or Harrison county, Mississippi, to be tried; that the Mississippi judge refused to try the case because of lack of jurisdiction, the crime having been committed in Louisiana and that the murderer was subsequently taken back to the parish of St. Bernard in Louisiana where he was tried. Mr. A. S. Cowand (Record, pp. 562 *et seq.*) testifies apparently to the same incident but more in detail as occurring between the years 1857 and 1860, and says that in Grand pass, which separates Isle à Pitre from the main Louisiana marshes, there were, on an Italian holiday, a number of luggers, a character of sailboat, gathered together, the boats being manned by Italians, who got to drinking, which ended in a fight, in which one of the *dagoes* was killed by another, who was

taken to Pass Christian in Harrison county, State of Mississippi, by the others who tried to get the sheriff of that county to take the prisoner in charge; that this Mississippi official refused to act, claiming that the murder had occurred in Louisiana and that he had no jurisdiction; that the prisoner was then turned over to the sheriff of the parish of St. Bernard, Louisiana, where he was tried, convicted and sent to the penitentiary from Terre aux Bœufs in said parish. Mr. Cowand also refers to another incident where a man was drowned at Half Moon or Grand island, and the Mississippi coroner refused to hold an inquest on the body, because he had no jurisdiction, as Half Moon or Grand island was in Louisiana. The destruction of these records also, by fire in the court-house already referred to prevented us from offering official copies of the records of these trials.

As appears from the testimony of Mr. H. C. Smith, parish surveyor of the parish of St. Bernard (Record, pp. 737 *et seq.*), and who was subsequently chief surveyor of the Oyster Commission of Louisiana, the State of Louisiana was continuously exercising jurisdiction in the disputed area by leasing, under the terms of her oyster law, to private parties on the basis of a direct rental, portions of the water bottoms of said locality for the purpose of oyster cultivation.

The disputed territory consists largely of what is known as the *Louisiana marshes*. The name is itself a quasi-recognition of title and ownership in the State of Louisiana. In the XVII paragraph of her answer in this case, the State of Mississippi admits that the marshes have since time immemorial been known as the *Louisiana* marshes, yet she introduced a number of witnesses to prove that they were also known as the *Grand* marshes. Every Louisiana witness, with knowledge of the subject, testified that they were known as the *Louisiana* marshes, while almost every Mississippi witness, who claimed that they were called the Grand marsh, admitted that they were, with as great frequency, called the *Louisiana* marshes. Louisiana then in-

troduced a number of witnesses who were accustomed to visit, year after year, the summer resorts such as Waveland, Bay St. Louis, Pass Christian, Mississippi City and Biloxi, on the main southern shore of the State of Mississippi, and who were, therefore, thrown into daily contact with the citizens of Mississippi at home and under unsuspicious circumstances; and they all, without exception, testify that these marshes were universally called the *Louisiana* marshes by these Mississippians (Record, p. 876 *et seq.*, testimony of Mr. John M. Parker; p. 880 of Mr. Alexander Brewster; p. 885 of Mr. Emile J. O'Brien; p. 891 of Mr. Thomas T. Barr; p. 909 of Justice Frank A. Monroe of the supreme court of the State of Louisiana; p. 916 of Capt. Steve Maloche; p. 922 of Judge Lawrence O. Donnell; p. 927 of Mr. Oswald Ogden; p. 929 of Dr. Jos. T. Scott; p. 932 of Mr. Louis H. Fairchild; p. 935 of Mr. E. H. Farrar; p. 971 of Mr. Louis Cucullu). Of these gentlemen the following, Capt. Steve Meloche, p. 916; Judge Lawrance O'Donnell, p. 922; Mr. Oswald Ogden, p. 927, and Mr. E. H. Farrar, p. 935, all testify that it was generally understood that the deep-water channel was the proper boundary between the States, and Judge O'Donnell, p. 924, refers to a case in which he was counsel, wherein a number of years ago some parties were arrested for violating the then oyster law, and upon it being proved that the offense was committed on the north side of the deep-water channel, the Louisiana judge discharged the accused on the ground that the offense, if any, had been committed in the State of Mississippi, and that he had no jurisdiction. As will be seen by reference to the testimony of His Excellency Governor W. W. Heard, of Louisiana (Record, p. 191), he himself had had pointed out to him by a Mississippian, the Cat Island channel as the true boundary between the two States.

An apt illustration of this universal recognition of the disputed territory as being the property of the State of

Louisiana and within the limits of that State is gathered from the following facts:

"There is a very short bayou, called Three-mile bayou which connects the waters of Mississippi sound and those of the Louisiana marshes. It is one of the three bayous cutting the coast line of the Louisiana marsh, and is much frequented by oyster fishermen (map No. 59, Louisiana Atlas of Maps, p. 53). Messrs. Eugene Ahrens, Jr. (Record, pp. 848 *et seq.*), and Edward Wentzell (Record, pp. 911 *et seq.*), two thrifty and industrious Mississippians, desiring to avail themselves of the commercial opportunities presented in the congregation of oyster fishermen at Three-mile bayou, proceeded to this point and there erected a building in which they conducted a store and bar-room. In due course, they had billheads printed for their firm's business. These billheads had to be localized so far as the place of business was concerned, which was designated as Three Mile, *Louisiana*, as appears from the billheads in the record (Record, pp. 1166 *et seq.*, documents Nos. 90, 91, 92, 93, 94 and 95). The dates on some of the billheads, found in the building, show that they were doing business there in 1901 and 1902. This is further confirmed by the United States Post-Office stamped date appearing on an envelope received from the United States Treasury Department and containing their United States internal-revenue liquor license, for their liquor business done at Three Mile, *Louisiana* (Record, p. 1171, document No. 96). In connection with the location of their place of business, Mr. Edward Wentzell (Record, p. 917) testifies as follows:

Q. "Will you look at this map No. 59, map of Louisiana, and upon being shown Isle à Pitre to the east, and Malheureux point to the west, and Bay St. Louis immediately north, is this the Three-mile bayou, right along the shore between Isle à Pitre and Malheureux point, at which you conducted your establishment?"

A. "Yes, sir."

Q. "Is that the Three-mile bayou to which you had refer-

ence when you printed your billhead as Three Mile, Louisiana?"

A. "Yes, sir; the same place, our place was located right there, right inside of the marsh."

Q. "And you thought then you were in Louisiana when you had those billheads printed?"

A. "Yes, sir; I did."

We, therefore, submit that we have clearly established that the State of Louisiana has consistently and continuously asserted her ownership of and sovereignty over the disputed area, in that the State of Louisiana owned the landed area thereof, and exercised the right to sell the same; that she collected her taxes on those lands there located, belonging to private parties; that she showed by her maps and the action of her State and parish officials that she was sovereign of said area and exercised police control thereof, and that private individuals were protected in their rights by the power of the State, and exercised uninterruptedly their private ownership without dispute or contest by the State of Mississippi. Louisiana's exercise of sovereignty and ownership must now be respected by Mississippi.

Second.

That the various departments of Government of the United States in their interpretation of the acts of Congress respectively creating the States of Louisiana and Mississippi have uniformly recognized Louisiana's ownership of the disputed area.

Having heretofore shown the statutory provisions of the United States on the subject of the boundaries of the States of Louisiana and Mississippi, we must now consider how these statutory provisions were interpreted and construed by the United States officials who would, in due course, be called upon to exercise jurisdiction in regard thereto.

United States Coast and Geodetic Survey.—In making this investigation we will first consider this department of our

National Government, which is perhaps the best informed on the subject of the water boundaries of our several States, as it is specially required, by the United States laws, to survey the coast of the United States, in which undertaking this department, or its predecessors, has been engaged for nearly a hundred years, and the area presently in dispute is part of the coast of the United States.

In boundary controversies that have heretofore developed between other States of the Union, representatives of this department have frequently rendered expert services, sometimes under direct appointment of this honorable court. One of the most expert of these representatives or assistants of the United States Coast and Geodetic Survey Service is Mr. William Chandler Hodgkins who has in his past experience as an expert been identified with the following boundary settlements between the following States of this Union, to wit:

Pennsylvania and Delaware.
Missouri and Iowa.
Maryland and Virginia.
Virginia and Tennessee.

He settled a county boundary between the counties of Spartansburg and Greenville, South Carolina, was the American representative with the English surveying party in the matter of the Alaskan boundary dispute between the United States and England, and was the American agent in charge of the American maps in the recent hearing and settlement of the Alaskan boundary dispute that took place in England (Record, pp. 444 *et seq.*).

As we have previously mentioned, when the commissions appointed by the governors of Louisiana and Mississippi were trying to effect an amicable settlement of the boundary dispute, back in January, 1901, a Mr. F. A. McLain, a United States Congressman from the State of Mississippi wrote a letter January 27, 1901, to the Superintendent of this department asking that official for information in regard to the

boundary line between Louisiana and Mississippi in the present disputed area (Record, p. 997, document No. 9). This letter from Mr. McLain was no doubt prompted by the occurrence of the boundary meeting in New Orleans, January 19, 1901 (Record, p. 20, Exhibit "A"), as it was dated just eight days subsequent to that meeting, and the day following the date of the letter of the governor of Louisiana to the governor of Mississippi, namely January 26, 1901 (Record, p. 22, Exhibit "B"). As the letter itself explained, it was written at the request of I. Heidenheim of Biloxi, Mississippi, who was subsequently chairman of a committee appointed to gather up the Mississippi evidence for her defense of this suit (Record, p. 1705, testimony of Mr. I. Heidenheim).

To return to the subject, this request of Mississippi Congressman McLain, for information as to the proper water boundary between the two States of Louisiana and Mississippi in the disputed territory, was referred, by the Superintendent of the United States Coast and Geodetic Survey for a report, to Assistant William Chandler Hodgkins, whose expert qualifications, for making an unbiased, intelligent and exhaustive report we have just given.

This report was made by Mr. Hodgkins January 30, 1901, and was forwarded to Mr. McLain February 8, 1901 (Record, p. 997, document No. 9). The report, and the accompanying sketches, are reproduced in full in the record (Record, p. 997, document 11) and merit the careful consideration of your Honors. The issues and points submitted to Mr. Hodgkins were the identical issues involved in this suit now before your Honors for decision. Mr. Hodgkins' report shows logically and conclusively, after considering the subject in all of its phases, that the correct boundary between the two States in the locality in dispute is the deep-water sailing channel line contended for by Louisiana. Louisiana's counsel, by a streak of good luck stumbled on this report in their researches just before evidence began to be taken.

Although it was a report from a disinterested United States

official and was absolutely decisive of the disputed issu
although it was made at the request of a Congressman fr
Mississippi, who had been asked to get the report by a g
tleman who subsequently appears in this case, in the rol
chairman of the defense's committee on evidence; althou
it was made at a time when the two States were endeavori
to amicably and extrajudicially settle their differences,
mention of it was then, or ever subsequently, made by M
sissippi; and although it was promptly forwarded by t
U. S. Coast and Geodetic Survey to Mr. McLain, no Miss
sippian ever thereafter knew of its existence or had seen
In order to explain this rather perplexing condition
affairs, Louisiana's counsel caused the said Mr. F. A. McL
to be summoned as a witness in this case, so that his tes
mony might elucidate the subject, but although four separ
subpœnas were issued (Record, p. 985), the United Stat
marshal was never able to serve him and secure his atten
ance.

It is a pity that the report of Mr. Hodgkins never reach
the officials of the State of Mississippi for its effect mig
have caused them to so act as to prevent the necessity f
this suit, unless it be that it was better to hold on till a fin
decree of your honors' court excluded them even from th
neutral territory.

United States Geological Survey.—This department of th
National Government published in the year 1900 its Bulleti
No. 171, devoted specially to a consideration and discussio
of the boundaries of the States and Territories forming ou
Union, and giving a history of the changes in the bounda
ries as they have occurred. We have extracted from th
bulletin and reproduced in the record all that is said on th
subject of the States of Louisiana and Mississippi as well a
the outline sketches of both States (Record, p. 1030, docu
ment No. 33). According to the opinion of this departmen
Louisiana was originally bounded by the deep-water chan
nel and is the owner of the area in dispute today. That is

such is the conclusion we would draw from the report and sketches.

There is no questioning of, or uncertainty about, the fact that this department recognizes Louisiana's ownership of the St. Bernard peninsula. This is shown on the geological map of the disputed area, map No. 18 (Louisiana Atlas of Maps, p. 7) which is perhaps the best map extant of the disputed area. An inspection of this map will show the words "St. Bernard" immediately under the north shore line of the St. Bernard peninsula, commonly called the Louisiana marshes.

United States Commission of Fish and Fisheries.—By a joint resolution of the State of Louisiana, adopted in 1897 (Record, p. 2033), this department of the National Government was requested to make an investigation and report upon certain technical matters in connection with the oyster industry of that State which would require a visit to and inspection of the oyster fields of Louisiana. The investigation was made in February, 1898, by the United States Fish Commission steamer *Fish Hawk* in charge of Lieutenant Swift; and the investigations were conducted and a report made by Dr. H. F. Moore.

These investigations began in the parish of St. Bernard, State of Louisiana, and the study of the local oyster conditions was extended through other parishes of the State. A map was made of the area investigated in St. Bernard parish and the map is reproduced in the record, page 6, as diagram No. 4. This map shows that the area investigated and reported on, as being in St. Bernard parish, Louisiana, was in fact the area that constitutes the disputed territory of today. In other words, without any previous suggestions or instructions from any one on the subject, Dr. Moore and Lieutenant Swift entered the disputed area of today, naturally understanding that it was a part of and within the limits of the State of Louisiana and they, by their acts, so reported that in the opinion of this department the area, from the data they had, was naturally supposed to belong to the State

of Louisiana. An extract from this report of Dr. Moore appears in the record (Record, p. 2033) wherein the conditions existing in the early part of the year 1898 in the disputed area are set forth. The location of the Louisiana oyster reefs in the disputed area is accurately set forth in the map above referred to and the whole incident is a clear recognition of Louisiana's ownership.

General Land Office of the United States.—This department has in charge the general surveying of the area of our country and as far back as the year 1842 began the detail survey of the land forming the disputed area. Township plats showing the detail in each township appear in the record as documents Nos. 7 and 38 to 50, the latter both included, record beginning at page 1046. Document No. 7, is found in Record, p. 994.

This survey shows the disputed area of today to be comprised within the following townships, to wit:

T. 10 south, ranges 17, 18 and 20 E.

T. 11 south, ranses 17, 18, 19 and 20 E.

T. 12 south, ranges 16, 17, 18, 19 and 20 E.

T. 13 south, ranges 16, 17, 18, 19 and 20 E.

The survey further showed the following to be the location of the islands south of the deep-water channel line, to wit:

Marsh island as section 26, T. 10 S., R. 17 E.

Half Moon or *Grand island* as being comprised of—

Section 36, T. 10 S., R. 17 E.

Sections 29, 31, 32 and 33, T. 10 S., R. 18 E.

Section 1, T. 11 S., R. 17 E.

Sections 5 and 6, T. 11 S., R. 18 E.

The above islands are immediately south of the deep-water channel and just alongside of it.

Unnamed island as sections 2 and 11, T. 11 S., R. 17 E.

Petit Pass island as sections 14 and 23, T. 11 S., R. 17 E. See township plat, Record, p. 1047*a*—38.

Isle à Pitre as sections 23, 24, 25, 26, 27, 28, 32, 33, and 34 of T. 10 S., R. 20 E.

All of these islands and other lands are designated as being in the southeastern land district of Louisiana, east of the Mississippi river, and as forming part of the State of Louisiana.

When the State of Louisiana, in the year 1852, under the swamp-land grants of Congress of 1849 and 1850 selected these islands and other lands as being within her State limits and enuring to her under the provisions of the acts of Congress just referred to, this department of the National Government on May 6, 1852, recognized the correctness of Louisiana's claim to these lands and they were promptly approved and patented to her as a State (Exhibit "G," Record, pp. 27 to 46, both inclusive; documents Nos. 62 and 63, Record, pp. 1091 to 1103). This was a specific recognition of Louisiana's ownership of the lands composing the disputed area.

And similar action was taken by this department of the National Government in the matter of the application of the State of Mississippi to the United States for the lands enuring to that State under the provisions of the swamp-land grants of Congress.

Mr. E. H. Wall, State land commissioner of the State of Mississippi, a witness for the State of Mississippi, testified, on cross-examination (Record, pp. 1755 *et seq.*), that the State of Mississippi had in former years applied to the United States Government for the lands enuring to that State under the swamp land grants of 1849 and 1850 and had received her swamp lands, and he admitted that the State of Mississippi had never selected and had never had approved to her, as shown by the books of the State land office of Mississippi, any lands in the disputed area of today. This testimony further shows that the State of Mississippi did have in her land-office books a record of the land forming St. Joseph's island, and as this island lies immediately north of the deep-water channel, it is a recognition of the deep-water channel

as the boundary and that the rights of the State of Mississippi did not extend south of that channel.

The General Land Office of the United States has been equally and uniformly consistent in its recognition of Louisiana's ownership of the disputed area in all the maps it has caused to be made of the States of Louisiana and Mississippi respectively, as will be seen by a reference to the following maps appearing in our Atlas of Maps, to wit:

State of Louisiana, 1879, Map No. 35, Atlas, p. 33.
State of Louisiana, 1886, Map No. 36, Atlas, p. 34.
State of Louisiana, 1887, Map No. 61, Atlas, p. 54.
State of Louisiana, 1896, Map No. 39, Atlas, p. 36.
State of Mississippi, 1890, Map No. 37, Atlas, p. 35.

We therefore submit that it has been proven from the first to the last, by United States statutory enactments and by the interpretation of same by our National Government's official departments, that the area in dispute has been consistently and uniformly recognized as the property of the State of Louisiana, and that the deep-water channel has been recognized as the proper water boundary in that locality.

Third.

Recognition by the State of Mississippi of the disputed territory as being the property of the State of Louisiana, and that her present boundary pretension is but a matter of recent creation after long years of recognition of, and acquiescence in, Louisiana's ownership and sovereignty.

It was only after the oyster fishermen of Mississippi by their wasteful system of fishing had either fished up or destroyed all of the Mississippi oysters of any value that these fishermen began to invade Louisiana waters in search of the bivalve.

Until recent years the Louisiana fisheries were open to all, but are now closed to all except her citizens, a plan that was

initiated by many of the oyster-producing States of the Atlantic coast, as we have previously mentioned.

It was the exercise of this right by Louisiana that incurred Mississippi's displeasure and brought on this boundary suit. We now propose to show how, prior to this, the State of Mississippi never made any claim to the disputed territory, but officially recognized it as belonging to Louisiana.

The lands forming the disputed territory have existed since Louisiana and Mississippi were created States, nearly one hundred years ago, yet Mississippi has, not only had no title or ownership thereto, but has never sought in over fifty years to find out why she was not given a title thereto, tacitly recognizing Louisiana's prior and better claim.

Mr. E. H. Wall, State land commissioner of Mississippi, was summoned by Mississippi as a defense witness in this case. He testified (Record, p. 1755) that there is no record on the books of the land office of the State of Mississippi showing Mississippi to have any interest in the landed part of the disputed area. He testified further that the former governors of Mississippi had, as representing that State, asked the United States for the swamp lands to which Mississippi would be entitled under the United States swamp-land grants of 1850. He stated further that Governor Vardaman of Mississippi, elected governor of said State *after this suit had been instituted by the State of Louisiana*, had recently written and asked the Secretary of the Interior of the United States for everything within the 18-mile limit, but had at that date, August 20, 1904, received no reply so far as he was able to ascertain. In other words, it was after Louisiana had owned these lands for over fifty years by deed of the United States that Mississippi was first inquiring why she did not own them.

The State of Mississippi is to be presumed to know, or at least to have ascertained, what lands she was entitled to receive under the swamp-land grants of the United States

Congress of 1849 and 1850. As a matter of fact, she did select her lands under those acts, and the lands selected were approved to her, but never did she make a pretense of claiming to own, nor did she try to select, under those laws, any of the sea marsh islands in Mississippi sound and Lake Borgne now claimed by her for the first time in her defense of this suit, filed after over fifty years' possession of these lands by the State of Louisiana, nor did she ever make, until now, any claim to the sea marsh lands in the Louisiana marshes in the St. Bernard peninsula. Not only did she fail to initiate any proceedings of her own accord, during these many years, to have her ownership of these lands recognized, and the title to the lands placed of record in the books of her State land commissioner, but even when her attention was called to it by an application for some of these lands in the disputed area today, she took no steps to secure title, but through her State land commissioner admitted that she had no title to the lands.

Mr. Casimier Harvey, (Record, pp. 952 *et seq.*), a resident and citizen of Back Bay, Biloxi, State of Mississippi, where he was born 59 years ago, testified that he wanted to buy the lands around Creole gap, which divides Isle à Pitre into two parts, and is part of the disputed area of today, and that he wrote, or caused a letter to be written, to the State land commissioner of the State of Mississippi at Jackson, Mississippi, applying for these lands, and that his letter was returned by the said State official of Mississippi with a statement to the effect that no record of Mississippi's ownership of said lands appeared on the records of his office, and that, necessarily, he could not make title to said lands. That was about the year 1887, and still no step was taken by the State of Mississippi to secure title to these lands, and as testified to by Mr. E. H. Wall, Mississippi State land commissioner, no steps were taken to claim title to these presently disputed lands until Governor Vardaman of Mississippi, who took his office January 19, 1904, *two years after this suit was instituted,*

made claim to them on behalf of the State, or at least initiated inquiries to that end (Record, pp. 1759 and 1756).

Mississippians cannot allege that they did not know that these lands were privately owned. Mr. Joseph C. Gilmore, who owned Isle à Pitre, and who was troubled by parties removing shells from his property, testifies (Record, p. 764) that he caused an advertisement to be published in the Pass Christians (Miss.) *Beacon* and the Biloxi (Miss.) *Herald*, Mississippi coast newspapers, that the Gilmore brothers prohibited trespassing on their property and yet no protest came from any Mississippi officials.

As acts and instances wherein the State of Mississippi has recognized the State of Louisiana's ownership of the disputed area, in addition to the striking example of her failure to claim under the swamp-land grants of Congress the swamp lands in the Louisiana marshes which she is now claiming, may be mentioned the following:

The legislature of the State of Mississippi passed an act entitled, "An act to provide for a survey of the Mississippi coast," under which the governor of the State of Mississippi was authorized to contract with an engineer and surveyor for the performance of the work. Under authority of this act, his excellency A. G. McNutt, then governor of the State of Mississippi, contracted with a Mr. John Wheeler, engineer and surveyor, to make the survey and a report. The survey was made by Mr. Wheeler, who submitted his report to the governor of Mississippi December 13, 1839, which report included a detailed sketch of the coast of Mississippi (Record, pp. 1145 *et seq.*, document 73), and owing to its important bearing on the issues of this case, we reproduce both the sketch and report in full in the record. A reference to the sketch (Record, p. 1148) shows:

First. The existence of the deep-water channel claimed by Louisiana to be the proper boundary in the waters of Lake Borgne and Mississippi sound, as emerging from Pearl

river and extending out into the open waters of the gulf of Mexico, north of Chandeleur islands.

Second. Emerging from the Rigolets, the old Louisiana eastern channel boundary of 1803, at this point, and how this Rigolets channel runs into the Pearl River channel, as it proceeds eastward to the gulf of Mexico.

Third. That no claim was made by the State of Mississippi that the lands of the St. Bernard peninsula formed any part of the coast of the State of Mississippi.

The territory lying south of the deep-water channel is shown in an outline to be of peninsular formation, no name is given to it on the sketch, and no claim is made to it, although the depth of the channel between Cat island and Isle à Pitre is given. It is also true that Isle à Pitre, at the point of the St. Bernard peninsula is not, on said sketch, called by that name, nor given any individuality. It is designated merely as forming part of the general territory, south of the deep-water channel, to which the State of Mississippi made no claim.

If there be any doubt upon this point, by reason of the fact that the recognition of Louisiana's ownership and Mississippi's disclaimer of ownership, is purely negative, this doubt is settled in favor of a definite recognition by Mississippi of Louisiana's ownership, by reference to the written report (Record, p. 1147, next to last paragraph) where this territory, southwest of the deep-water channel or South pass, is called the *Louisiana marsh*. It is to be noted that the report only discusses Horn, Pilit Bois, Cat and Ship islands as belonging to Mississippi and these are east of the disputed territory.

Taking the sketch and report together, they clearly indicate a recognition by the State of Mississippi of Louisiana's then ownership of the area disputed by Mississippi today.

As we have already stated, in an earlier part of our brief, no cartographer, of the United States or elsewhere, has ever made a map recognizing any rights of the State of Mississippi in the St. Bernard peninsula. We now announce the fact, most important to a decision of the issues of this case;

That the official maps of the State of Mississippi recognize Louisiana's ownership of the disputed territory.

On October 26, 1866, there was approved by the then governor of the State of Mississippi, Mr. Benjamin F. Humphreys, an act of the legislature of the State of Mississippi entitled, "An act to create the office of State engineer for the purpose of compiling a new State map under certain conditions" (Record, pp. 1729 *et seq.*).

As will be seen by reference to the act, this map was to be official, and three copies were to be furnished to each county in the State of Mississippi, so that it is to be presumed that the coast counties of Mississippi received their share.

On May 10, 1871, there was also approved by Mr. J. L. Alcorn, then governor of the State of Mississippi, another act of the legislature of the State of Mississippi entitled, "An act to grant aid for the purpose of revising and publishing an official map of the State" (Record, pp. 1730 *et seq.*)

Capt. T. S. Hardee, appointed State engineer of the State of Mississippi under the provisions of the two above-mentioned acts of the Mississippi legislature, made an official map of the State of Mississippi, which was approved May 10, 1871, by his excellency, J. L. Alcorn, then governor of the State of Mississippi.

In the evidence offered by the State of Louisiana, one of these maps is found under the number 46 bound in the Louisiana Atlas of Maps, p. 43. This official map of the State of Mississippi specially, by its coloring, recognizes Louisiana's ownership of the disputed territory. Counsel for the State of Mississippi appreciated the serious effect,

against their present contention, that the offering of this map would have, and they thereupon proceeded to attack it in every way possible, their main contention being that as the map was approved by a *reconstruction* governor that it was not deserving of credence and respect, and they proceeded, by the testimony of ex-Governor Robert Lowry (Record, p. 1711) and others, to show that Governor Alcorn was a radical or Republican governor elected by the elements that were in control after the civil war. In contrast to him, they eulogized the merits and honesty of his excellency Benj. F. Humphreys, who was the Democratic governor preceding Governor Alcorn, and the Mississippi witnesses admitted that anything that Governor Humphreys approved must be corrrect and free from suspicion. With these facts once in the record, Louisiana's counsel then established a fact, that was apparently unknown to counsel for the State of Mississippi, namely, that there was a previous issue of this same official map of the State of Mississippi made by Captain T. S. Hardee, that this previous issue was, as to Mississippi's recognition of Louisiana's ownership of the disputed territory, exactly the same as the Alcorn map, that this official map had been made by authority of the act of the Mississippi legislature approved October 26, 1866 (Record, pp. 1729 *et seq.*); and that this official map of the State of Mississippi which thus plainly, clearly, distinctly and officially recognized Louisiana's ownership of the presently disputed territory had been approved by that paragon of probity, honesty and propriety, his excellency Benjamin F. Humphreys, governor of the State of Mississippi (map No. 65, Louisiana Atlas of Maps, p. 58), and as the map is an important recognition of Louisiana's ownership of the disputed area, as shown by the coloring, we reproduce here in our brief a colored photographic reprint of the disputed area as shown on said map, together with a reproduction of the governor's approval.

Nor is this the only instance where, by the official maps of Mississippi, that State has recognized Louisiana's ownership of and sovereignty over the area in dispute today.

Notable among the other maps may be mentioned the following:

1st. Official map of the State of Mississippi published in accordance with an act of the State legislature approved March 8, 1882, by the State board of immigration and agriculture and prepared under the directions of E. G. Wall, commissioner (map No. 32, Louisiana Atlas of Maps, p. 30).

2d. Rand, McNally & Co.'s sectional map of Mississippi, *compiled from the records of the office of the surveyor general and of the board of immigration and agriculture, Jackson, Miss.* (map No. 44, Louisiana Atlas of Maps, p. 41).

3d. Railroad commissioners' map of Mississippi (map No. 64, Louisiana Atlas of Maps, p. 57).

In fact, as we have previously stated, after a most exhaustive research, we have failed to find any map of either Louisiana or Mississippi, covering the area in dispute, which recognized or showed that the State of Mississippi had any right in or to the area she is claiming today, save and except the lone, solitary, instance of the Mississippi railroad commission map issued in 1904, *two years after this suit was instituted*, wherein, on the Eighteen-mile Island theory, Mississippi for the first time cartographically extends her claims into the St. Bernard, Louisiana, peninsula, which action on the part of the State of Mississippi is, we submit, a confession of the absolute weakness of her prior claim, to such an extent as to preclude its serious consideration today (map No. 71, Mississippi Atlas of Maps, p. 4), and Louisiana is justified in claiming that the State of Mississippi has officially recognized Louisiana's prior and better claim to the disputed area

and that this area is part of Louisiana because it is south of the deep-water channel which separates the two States as the true boundary line.

With this statement of the facts upon which Louisiana bases her plea of title by prescription, usucaption and acquiescence, we now furnish the following authority on the international law of prescription:

Priority of Right, Acquiescence, Prescription, Assertion of Title, Ownership and Sovereignty as Derived Therefrom.

These various sources of title and ownership are generally treated by the commentators on international law, under one general heading. Pradier-Fodéré treats them under the heading "Comment les États acquierent la propriété territoriale," "How States acquire territorial property;" Tom. II, Droit International Public, § 781, p. 337, from which author we prefer to quote as being more thorough, and exhaustive and he collates the opinions of all the great international law-writers, and criticises their unmethodical treatment of the various manners of acquiring property by States and nations. He says that Klüber, and G. F. De Martens "n'admettent que l'occupation et les conventions; les autres comme Heffter citent la cession, les accroissements naturels, l'occupation, Wheaton parle de l'occupation, de la conquête, de la cession, confirmées par la presumption qui resulte d'un long laps de temps, ou par des traités et d'autres contrats avec les États etrangers. Suivant Bluntschli il faut compter parmi les moyens d'acquérir la propriété la prise de possession ou occupation, la cession, l'incorporation (dans trois cas) la conquête, la prescription, l'echange (dans un cas) l'accession. Dudley Field admet l'occupation, l'accession, (comprenant l'alluvion) la cession, la conquête. Pasquale-Fiore en seigne que les Etats acquierent la propriété territoriale par l'occupation, les traités, la conquête, la prescription, l'accession, et dans certains cas la succes-

sion, et le testament. Calvo par la prise de possession, la cession, l'incorporation (dans trois cas), la conquête, la prescription, l'alluvion, l'occupation de contrees desertes." Our author comments on this diversity of opinion and the want of precision, which he says throws the subject into somewhat of confusion, and in order to systematize the treatment of the subject, and discuss it in something like order, he recurs to the civil law, from which international law is derived, as to the various manners of acquiring property by individuals. In §§ 782, 783, 784, 785, p. 338 *et seq.*, he first discusses "occupation," and sums up the doctrine that the occupation must be with the idea of permanent control and possession. and in § 791 *et seq.*, p. 345, he treats the question "Mais comment cette prise de possession se conservera t'elle?" He cites G. F. De Martens who agrees with Vattel, that the actual occupation must continue in some form, by cultivation, or some such actual use, drawing material, &c., therefrom, and not by mere signs, crosses, inscriptions, and other figurative occupation. He says that, on the other hand, Klüber and Bynkershoëk contend that there need not be actual continuous corporeal possession "a titre de proprietaire," but it is sufficient if "tous les signes extérieurs qui marquent l'occupation et la possession continue," and it is sufficient if these signs serve to show that there has been no intention of abandonment of occupation or possession. He further says that Heffter seems to hesitate to pronounce himself between these two doctrines, "De simples declarations verbales, dit-il, des signes incertains d'une appropriation projetée, lorsqu'ils sont contredits par les faits, et qu'ils rendent l'intention douteuse ne pourvont pas être regardés comme un titre valable, bien que la pratique des nations ne soit quelque fois prévalue de mesures semblables." The author (Fodéré) coincides in the opinion of Vattel and De Martens, and says that the civilized nations of the world do not regard the mere discovery or claiming territory, without

a continued possession and occupation, as giving either title, ownership or sovereignty.

Translation.

G. F. De Martens—"Only admitting that occupation and conventions; the others as Heffter cited cession, natural increase, occupation; Wheaton speaks of occupation, cession confirmed by presumption which results from the long lapse of time, or by treaties and other contracts with foreign States. Following Bluntschli we must account among the means of acquiring property or taking possession or occupation, cession, incorporation (in three cases), conquest, prescription, exchange (in one case) accession. Dudley Field admits occupation, accession (including alluvion), cession, conquest. Pasquale-Fiore teaches that the States acquire territorial property by occupation, treaties, conquest, prescription, accession and in certain cases succession, and testament. Calvo, by the taking of possession, cession, incorporation (in three cases), conquest, prescription, alluvion and occupation of abandoned countries." * * * "But how is this taking of possession continued and kept," it must be "under title of propriety" with "all the exterior signs which mark occupation and continuous." * * * "Simple verbal declaration" says he "uncertain signs of a projected appropriation when they are contradicted by acts, which render the intention doubtful cannot be regarded as a good title, especially where the parties of nations do not allow to prevail similar measures."

Under section 820, p. 381 Fodéré discusses prescription, confining it to that class of prescription, which is known in the civil law as "prescription acquisitive ou usucaption." In section 821, p. 382, he propounds the question "La prescription est-elle de droit naturel ou seulement de droit civil?" "Is prescription from natural law or only from the civil law," and says that Grotius assigns it to the civil law,

as according to natural law long possession should not necessarily constitute title or ownership. Cujas, he says, also assigns it to the civil law and rejects it from both natural and international law. Merlin, he says, contends that it is both natural and civil law, as being essentially equitable. Fodéré seems to think that it is not natural but civil law, but says, " Mais en réalité il importe peu que la prescription soit de droit naturel ou de droit civil ; il suffit qu'elle soit utile et qu'elle réponde aux exigences, non seulement de l'intérét privé, mais encore et surtout de l'intérêt général. 822, Cette consideration me seurva a resondre la question de savoir si la prescription existe et peutêtre invoquée en droit naturel, question trés débattue et sur laquelle les auteurs ont jété peu de lumière." In section 823 he cites and quotes G. F. De Martens to the effect that, in international law, when a nation or a State sees another State or nation take possession of and acquire by occupation a portion of its territory, and so continues for a long time without any claim by the first nation, which remains silent, there is a tacit renunciation of ownership and an acquiescence in the ownership of the second occupant and possessor. On page 384, Martens is quoted as saying in regard to presciption " L'avantage mutuel des nations semble a la vérité, exiger qu'on la reconnaisse ; on pourrait donc en faire un principe de droit naturel social par rapport a ces nations reconnues pour vivre dans une société générale ; cependant on n'a rien gagné encore tant qu'on ne peut fixer l'espacede temps necessaire pour l'acquisition ou pour l'extinction des droits par prescription ; et il est evident que le droit naturel ne peut pas fixer cet espace de temps avec la precision nécessaire" Fodéré cites Klüber and Heffter as in effect opposed to the doctrine of absolute prescription, as a part of international law, but Fodéré adds " Il est vrai que Heffter domet la renonciation tacite resultant d'un abandon voluntaire qui met la possession à l'abri de toute contestation, el que parmi les cas d'abandon empor-

tant renonciation il range la présumption d'abandon qui resulte d'une tres longue possession non contestée et non interrompue" Mais dit il "c'est toujours aux principes de la renonciation qu'il faut recourir en pareille question ; la prescription est purement une question de fait" and again Fodéré says quoting from De Martens "tandis qu'elles-memes se curent en devoir d'empêcher par les declarations faites à temps que les presomptions qu'elles ont fait noirtre n'induisent d'autres nations dans une erreur préjudiciable, elles paraissent avoner par la obligation de rompre lesilence a l'egard des droits qu'elles ne veulent pas abandonner" "L'usage constant et approuve des nations, dit Wheaton, montre que, quelque soit le nom que l'ondonne a ce droit, la possession non interrompue par un *État* d'un territoire ou de toute autre bien pendant un certain laps de temps exclut les droits de tout autre *État* a cet égard, de meme que le droit naturel et civil de toutes les nations civilisées assure a un particulier la propriété exclusive d'un bien qu'il a possédé pendant un certain temps sans que personne ait prétendre y avoir les droits."

In section 825 Fodéré contends that prescription is a fundamentally necessary part of international law, and he quotes Bluntschli to that effect. In section 826 he says: "Vattel excellement démontré que l'usucapion et la prescription sont d'un usage beaucoup plus necessaire entre les *États* souverains qu' entre les particuliers;" and he further quotes Vattel to show that the rejection of usucaption and prescription from international law would produce constant quarrels, wars, and disagreements among the States and nations, which would constantly threaten and involve the peace of the civilized world. He quotes Vattel also to show that tacit or silent acquiescence by a State or nation, in the occuption of territory, claimed by it, by a foreign power, will fortify ownership and title by prescription and usucaption, which Vattel calls "une approbation tacite." In sec-

tion 828, Fodéré discusses, and quotes from Vattel, the length of time by which prescription can be acquired, and recommends that it ought to be fixed by treaties.

Translation.

"But, in reality it matters but little whether prescription comes from natural or from civil law. It suffices that it is useful and that it answers exigencies, not only of private interest, but yet and above all general or public interest. This consideration serves me to solve the question of knowing if prescription exists and can be invoked in natural law, a question which has been much debated and disputed, and upon which authors have thrown but little light." * * * "The mutual advantages of nations would seem in truth to exact its recognition; we can then adopt it as a principle of natural social law in relation to those nations recognized as living in a general society; nevertheless there is nothing gained since we cannot fix the space of time necessary for the acquisition, or for the extinction of rights by prescription; and it is evident that natural law cannot fix this space of time with the necessary precision." * * * "It is true that Heffter admits the tacit renunciation resulting from a voluntary abandonment which puts possession beyond all contest, and among the cases of abandonment which results from a very long possession not contested or interrupted. But, says he, it is always to the principle of recognition that we must incur in such a question; prescription is purely a question of fact." * * * "Since they themselves ought to have stopped by declarations made at the time and should not induce other nations into a prejudicial error; they should appear to declare by the obligation to break the silence in regard to the rights which they did not intend to abandon." * * * "The constant and approved use of nations says Wheaton, shows that whatever name that we will give to this right, possession not interrupted by a State or a Territory or

of any other thing during a certain lapse of time excludes the rights of others in this regard. Since natural and civil law of all of the civilized nations assures to a particular individual the exclusive property of a thing which has been in possession during a certain time without any one pretending to have any rights concerning it." * * * "Vattel excellently demonstrated that usucaption and prescription are of a much more necessary use between sovereign States than between individuals."

In section 829—Fodéré admits that certain commentators on international law do not admit prescription or *usucapsion* in international law, except under the doctrine of *uti possidetis, jus et favor possessionis*, to the limited degree, as following conquest or force of arms.

In section 832, Fodéré explains the right of ownership which has accrued from the long gathering of the fruits and products of a territory, or thing which is called in the civil law, *perception*. He says "Par *perception il faut entendre le fait d'avoir recueilli les fruits produits par une chose.*" Fodéré claims that the same principle and doctrine forms part of international, as it does of civil law. He says that Heffler denies the proposition, and that Heffler quotes from Groteus to fortify his dissent. Following the subject up the author then goes on at too great length to quote here the question as to "*Comment se perd le propriété du territoire?*" and instances occupation by another State, prescription, abandonment, and neglect to assert ownership and title.

Translation.

"By perception must be understood the fact of having gathered the fruits produced by a thing."

This doctrine of ownership by prescription in favor of nations and States has bean frequently maintained both in arbitrations and by judicial decisions of our own courts. In

his decision as arbitrator between England and Portugal as to the ownership of Delagoa bay and the islands therein, President McMahon of the French Republic decided in favor of Portugal on account of the discovery of the bay by the Portuguese in the 16th century, and that Portugal had asserted title in 1732 against Holland, and against Austria in 1781 and had exercised the right of continuous ownership; that there had been a tacit acknowledgment by England of Portugal's ownership and possession as late as 1817, and no claim by England to the ownership, except one in 1823, based on some treaties with native neighboring tribes by an English officer. This award was made at Versailles, 24th of July, 1875 (State Papers, vol. 66, 1874, 1875, pp. 554 *et seq.*).

In an arbitration between Great Britian and Venezuela, to settle the boundary line between British Guiana and Venezuela (February 2, 1897) it was agreed that "adverse holding or prescription during a period of fifty years shall make a good title. The arbitrators may deem exclusive political control of a district, as well as actual settlement thereof, sufficient to constitute adverse holding or to make title by prescription" (Moore's International Arbitration, vol. 5, pp. 5017 *et seq.*). We have said that our courts have in such cases judicially recognized the plea of prescription and sustained it between States of the American Union.

The case of Keyser *vs.* Coe, 9 Blatchford, 32, presents an issue between two individuals in regard to the question as to whether Goose island, in Long Island sound, belonged to New York or Connecticut. The court decided in favor of Connecticut, saying (p. 41) "The possession of Connecticut has always been consistent with this view of the documentary title. So far as these islands have been permanently occupied at all, that occupancy has been by citizens of this State, who have recognized its jurisdiction over their island possessions. In conveyances, the land of which they are composed has been described as lying within the State, and the deeds thereof, offered in evidence, have been recorded in

the appropriate land records within the same jurisdiction. * * * To this uniform possession of Connecticut, New York has made no adverse claim, so far as we are apprised, except in the single instance" referring to a correspondence between the officers of the two States in 1765. And the court sustained the claim of the State of Connecticut by reason of prescription and uninterrupted possession of the island. This language setting forth the facts in this case admirably fits the case at bar between Louisiana and Mississippi as almost the identical facts alluded to by the court in regard to Connecticut's possession can be applied to the possession of Louisiana.

And these principles of general international have been applied and sustained by this honorable court in cases of boundaries between States of the Union.

As early as the case of Rhode Island *vs.* Massachusetts, this honorable court recognized the right of a State to ownership by prescription, in a boundary suit saying, on p. 638, in 4th Howard:

"More than two centuries have passed since Massachusetts claimed and took possession of the territory up to the line established by Woodward and Saffrey. This possession has been steadily maintained, under an assertion of right. It would be difficult to disturb a claim thus sanctioned by time, however unfounded it might have been in its origin."

On pages 591 and 639 the court, speaking of the long possession of Massachusetts, and the delays in alleging any mistake in the action of the commissioners of the colonies, said:

"Surely this, connected with the lapse of time must remove all doubts as to the right of the respondent under the agreements of 1711 and 1718. No human transactions are unaffected by time. Its influence is seen on all things subject to change. And this is peculiarly the case in regard to matters which rest in memory, and which consequently fade

with the lapse of time and fall with the lives of individuals. For the security of rights, whether of States or individuals, long possession under a claim of title is protected. *And here is no controversy in which this great principle may be invoked with greater justice and propriety than in a case of disputed boundary.*" (Italics are our own.)

In Missouri *vs.* Kentucky, 11 Wallace, 403, this honorable court laid great stress on the long possession by Kentucky of the disputed territory, as cumulative and confirmatory of other proof in establishing Kentucky's ownership, the court saying:

"There is, therefore, nothing in this record which shows that Kentucky has not maintained for a long course of years, exclusive possession and jurisdiction over this territory and the people who inhabit it. It remains to be seen whether she shall remain in possession and continue to exercise this jurisdiction or whether she shall give way to Missouri."

And, on page 410, the court says, after discussing the testimony of witnesses about the exercise of dominion and jurisdiction by Kentucky over the disputed territory:

"Can there be any need of further evidence to sustain the long-continued possession of Kentucky to the island?" &c.

And the court sustained Kentucky's claim, and dismissed the bill of the State of Missouri.

So in 136 U. S., 511, this honorable court based its decision in favor of Kentucky as against Indiana, on the seventy years' possession and exercise of jurisdiction over the land in question, uninterrupted by any claim of Indiana, by virtue of prescription, and quoted Vattel, Pradier-Fodéré, and Wheaton as maintaining the doctrine of prescription in settling boundaries between States. In that case this honorable court said:

"The long acquiescence in the exercise by Kentucky of dominion and jurisdiction over the island is more potential than the recollections of all the witnesses produced on either

side. * * * It is a principle of public law universally recognized, that long acquiescence in the possession of territory and in the exercise of dominion and sovereignty over it is conclusive of the nation's title and rightful authority."

In Virginia *vs.* Tennessee, 148 U. S., 522 *et seq.*, the same doctrine is upheld and reaffirmed by this honorable court, supporting it with abundant English and American authorities, quoting from Rhode Island *vs.* Massachusetts, 4 Howard, 591, 639, and also from State of Indiana *vs.* Kentucky, 136 U. S., 479, 510, the following: "It is a principal of public law, universally recognized, that long acquiescence in the possesion of territory and in the exercise of dominion and sovereignty over it, is conclusive of the nation's title and rightful authority." The court also quotes Vattel to the same effect, as follows:

"The tranquillity of the people, the safety of States, the happiness of the human race do not allow that the possessions, empire, and other rights of nations should remain uncertain, subject to dispute, and ever ready to occasion bloody wars. Between nations, therefore, it becomes necessary to admit prescription founded on length of time as a valid and incontestable title (Book II, c. 11, § 149)." (French text in bottom note.)

The court also quotes the following from Wheaton in his International Law: "The writers on natural law have questioned how far that peculiar species of presumption, arising from the lapse of time, which is called *prescription*, is justly applicable as between nation and nation; but the constant and approved practice of nations shows that by whatever name it be called, the uninterrupted possession of territory or other property for a certain length of time excludes the claim of every other in the same manner, as by the law of nature and the municipal code of every civilized nation, a similar possession by an individual excludes the claim of every other person to the article of property in question (part II, c. 4, § 164)." The court then proceeds to show that

the State of Virginia had manifested "its acquiescence for over eighty-five years, embracing nearly the lives of three generations," on the boundary line, by various acts, which she was now attempting to overthrow and change.

In Iowa *vs.* Illinois, 147 U. S., 1, and 151 U. S., 239, the whole doctrine of the boundary line between States of the Union, being on navigable rivers at the main channel or "thalweg" is fully discussed, maintained and fortified by quotations from commentators on international law, such as Halleck, Creasy, Wheaton, Twiss, Woolsey, Phillimore and others.

We thus have conclusively shown, as we confidently believe, that the general principles of international law on the subject of prescription, as between independent nations and States, have been applied by this honorable court to no less than six boundary cases between the States of the American Union.

In the case at bar the evidence abundantly shows that Louisiana has continuously occupied the territory in dispute from 1812 to date, during a period of ninety-three years, and has in every way exercised complete dominion over it, in which Mississippi acquiesced until, in her code of 1880, she for the first time made a pretense in that code to the dominion over the islands *by a general reference therein to islands within six leagues of her shore*, but never attempted any physical possession or control until after 1900, when she first began to assert actively her ownership of the disputed territory, when by improvident use and neglect the oyster fishermen of Mississippi had destroyed the oyster fields of that State and were seeking new fields to conquer. This circumstance will not overthrow the facts and law cited sustaining Louisiana's title by prescription to the area in dispute.

MISSISSIPPI'S DEFENSE.

In our final consideration of the many elements that go to make up a full presentation of the issues of this case, it is necessary to consider the theory upon which counsel for the State of Mississippi will base that State's claims to the ownership of the disputed territory, and with a knowledge of this theory once obtained, we can show its fallacies and inapplicability to the issues of this case.

We take it that the State of Mississippi claims the disputed area because it is assumed to be composed of islands, and as these islands are within six leagues or eighteen miles of her shore, that they were given to her by the act of Congress creating her a State on December 10, 1817.

Louisiana admits that there are some islands in the disputed area, namely, Grassy, Half Moon or Grand, Le Petit pass, an unnamed island and Isle à Pitre, all of which are between the deep-water channel on the north and the main coast line of the St. Bernard peninsula on the south; and contends that these islands were previously given to her, Louisiana, by the act of Congress creating her a State, April 6, 1812, nearly six years prior to Mississippi's creation as a State, and that her title thereto is better than that of the State of Mississippi, and Louisiana further contends that these islands are hers by reason of the fact that they are south of the deep-water sailing channel line which is the true boundary between the two States. The relative merits of these contentions we have already discussed at length, showing as a result of the argument that these above-named islands are, for the reasons heretofore given, truly the property of the State of Louisiana.

But we come now to another phase of this case, to which we have previously referred but incidentally, namely, to the topography of the peninsula of St. Bernard. Mississippi bases her claim to that portion of the disputed area within

six leagues of her shore on the theory that the peninsula of St. Bernard and the Louisiana marshes constitute an *archipelago of islands* and not a *peninsula* in the true sense of the words, and, as islands within eighteen miles of her shore, are hers.

Louisiana admits that there are today in the body of the *Louisiana marshes*, or *St. Bernard peninsula*, some portions and spots of sea marsh which might technically be denominated as islands because they are entirely surrounded by water, but alleges that these bodies of sea marsh are not true islands even today and are not to be regarded as such.

Mr. E. H. Wall, commissioner of the State land office of the State of Mississippi, in the year 1904, two years subsequent to the institution of this suit by the State of Louisiana, wrote a letter to the Commissioner of the General Land Office of the United States at Washington, D. C., inquiring in regard to islands within eighteen miles of the Mississippi main shore line, having in mind these supposed islands in the *Louisiana marshes*.

The answer of the Commissioner of the General Land Office of the United States to the letter of Mr. E. H. Wall, Mississippi's land commissioner, is given in full in the record (Record, pp. 1191 *et seq.*, Exhibit No. 2), and from it these Mississippi officers get very little satisfaction as to the extension of their eighteen-mile theory into the St. Bernard peninsula, for the Commissioner says:

"By a reference to the inclosed portion of the map of the State of Louisiana, it will be seen that a line drawn parallel to the north shore line of Lake Borgne and Mississippi sound, and at a distance of six leagues therefrom would include portions of townships 11, 12 and 13 south, ranges 17, 18 and 19 east, and townships 10, 11 and 12 south, range 20 east, St. Helena, meridian, in St. Bernard parish, Louisiana, in which are to be found many tracts of land surrounded by water and which would, therefore, be denominated as islands, *but which are, in fact, hummocks of land surrounded by the marsh*

and swamp in said township, etc." (italics our own), thus putting a quietus to their theoretical creation of islands in the St. Bernard peninsula.

But we have many facts, much stronger than this, showing that the peninsula of St. Bernard is a true peninsula and that the Louisiana marshes form part of the *coast* line of the State of Louisiana not only today, but that the peninsula of St. Bernard was a true peninsula and the Louisiana marshes formed part of it and part of the coast line of the State of Louisiana at the time the Congress of the United States created the State of Louisiana and that the Congress of the United States so regarded it.

Map No. 18, the geological map of the St. Bernard peninsula (Louisiana Atlas of Maps, p. 7) shows the peninsula of St. Bernard to be a true peninsula and it shows a true *Louisiana coast line* on the south shore of Mississippi sound, entirely across the disputed area, or between *Malheureux point* and *Isle à Pitre*. This distinct coast line of Louisiana exists today.

Its existence is fully established by abundant evidence in the record (Record, p. 245, testimony of Capt. J. D. Railey; p. 282, testimony of Mr. Harry Cage; p. 286, testimony of Mr. James M. Breaux). This is further demonstrated by the fact that Mr. Alfred Joseph Monier, under instructions, for the purpose of testifying in this case, *walked along this well defined coast line dry shod* from Petit pass or Malheureux point on the west to Isle à Pitre on the east, except that when he came to these bayous that intersect this coast line, he was transferred across the bayous by Geo. Thiel, who followed along for the purpose in a skiff (Record, p. 324, testimony of Mr. Alfred Joseph Monier; p. 330, testimony of Geo. Thiel; p. 297, testimony of Captain A. C. Ruiz).

If this area, as a peninsula, exists today it certainly existed one hundred years ago when Louisiana was created a State. There has been no building up of the country in the neighborhood of the disputed area since Louisiana was

created a State. The protective levee system, to a point below the parish of St. Bernard, was built as early as the year 1750 and there has been no building up of the country since by alluvion from the Mississippi river, as we will in a moment show; but as a matter of fact the process has been one of subsidence and disintegration.

We have already referred to the ancient maps of this peninsula and called your honors' attention to the fact that they show the coast line as a true coast line and the peninsula of St. Bernard as a true peninsula, maps issued at, or about, and before the time Congress was creating the State of Louisiana.

We have already referred you to the report made by President Thomas Jefferson to Congress in the year 1804 showing that the peninsula of St. Bernard was created by the Bayous Terre aux Boeufs and La Loutre and how that peninsula and the *marshes* then formed part of the parish of St. Bernard.

We now assert that in place of the peninsula of St. Bernard being an archipelago of islands at the time Congress created either the State of Louisiana or the State of Mississippi it was then even a better defined peninsula and the coast line was, if anything, a truer coast line than it is today and *that the process ever since then has been one of subsidence and disintegration*.

In our geological discussion of the St. Bernard peninsula we have shown how the peninsula was formed, when, in past ages, Bayou Terre aux Boeufs first became a lateral branch of the Mississippi river and by extending out into the waters of the gulf of Mexico, and itself dividing into branches, created, by the deposits of alluvion brought down by the annual overflows of the Mississippi river, the lands that form today the peninsula of St. Bernard and the Louisiana marshes. Having seen how this peninsula was thus formed, we must now consider the effect that natural influences have had upon it during the past one hundred years to see if any resulting changes have occurred in its topography, to see if the country is the same as it was when Louisiana was

created a State. This investigation will show that considerable changes have occurred during the last century from which the conclusion naturally follows, when considering the cause and effect, that the St. Bernard peninsula was, one hundred years ago, even a better defined peninsula than it is today and that the coast line of the Louisiana marshes was if anything more distinct.

Dr. Wm. C. Stubbs (State geologist of Louisiana) shows that this alluvial soil of Louisiana by its very nature, originally deposited by its own gravity, is of very loose formation, and that the tendency naturally is for it to become more and more compact as time passed. This process of compacting itself carried with it as a natural result a consequent sinking of the surface level of the soil, which before the erection of the levee system was offset and replaced by the fresh and recurring deposits made by the annual overflow by the river of its banks. As Louisiana became settled, a levee system was gradually extended by its people along the banks of the Mississippi to prevent the annual inundation of the inhabited lands, and this levee system had extended itself to English turn, or English bend, a point on the east, or left. bank of the Mississippi river, and that Bayou Terre aux Bœufs was closed off at its head as early as the year 1750 (Record, p. 129, testimony of Major B. M. Harrod). This extension of the system carried the levees below and south of the parish of St. Bernard as early as 1750, and by the exclusion of the river water prevented the annual deposit of sediment, prevented the annual compensating or offsetting of the annual settlement or subsidence, and the tendency in the southern portion of Louisiana has been and is, with the completion of the levee system to the mouth of the river, one of continual settlement, subsidence and lowering of the surface level of the land, which has been calculated at the rate of from four to five feet a century (Record, p. 339, testimony of Dr. Wm. C. Stubbs). The subsidence at the actual mouth of the Mississippi river, distant say 100 miles from the dis-

puted area, that is, at Port Eads, has been accurately calculated by the United States engineers in charge of the maintenance of the jetty system at South pass, and was found to be one and 54/100 feet between the years 1876 and 1902 (Record, p. 648, testimony of Mr. C. Donovan). This fact was demonstrated by a system of carefully run levels from Cairo, Ill., south to the gulf of Mexico.

These conditions as to alluvial formation, the completion of the levee system, and the consequent subsidence exist in the St. Bernard peninsula, just as in other portions of the State of Louisiana. The record abounds with illustrations of this phenomenon. The most characteristic illustration of this fact of subsidence is the finding of sunken trees, and at times whole forests, ten to one hundred feet below the present surface level of the soil, the trees and their stumps, in a perfect upright position, just as they grew (Record, p. 341, testimony of Dr. Wm. C. Stubbs; p. 359, testimony of Mr. R. R. Barrow; p. 363, testimony of Mr. James C. Hugh; p. 527, testimony of Mr. James Wilkinson; extract from the Transactions of the American Society of Civil Engineers, Record, p. 705).

A striking instance of this evidence of subsidence is also found in the following:

A point on the extreme east sea coast of the St. Bernard peninsula is called "Point Chicot" meaning "stumpy point."

The point as will be seen from map No. 7 (Louisiana Atlas of Maps, p. 2) juts out into the waters of Chandeleur sound which waters are as salty as those of the sea, and entirely too salty to permit of the life or growth of cypress trees. Nevertheless, in 1854, Major. B. M. Harrod, on a visit to that point, saw upright stumps there in the water, and recognized them to be the stumps of cypress trees which had grown there, thus indicating that there had previously been a time when the land had been sufficiently high above the level of the salty sea water to permit of the existence of cypress tree life

at that point (Record, pp. 121 *et seq.*, testimony of Major B. M. Harrod). Now then for the sequel. Mr. George H. Dunbar, who had no knowledge of Major Harrod's experience many years before and did not know that he had previously testified in this case, testified that he visited Point Chicot about fifty years later, about 1902, and, while fishing there, lost his fishing lines by their becoming entangled in these stumps, which were then not observable above the surface of the water (Record, pp. 311 *et seq.*), showing that the tree stumps had settled or sunk under the surface of the water in the intervening half century.

The fact of subsidence in the St. Bernard peninsula, or Louisiana marshes, as the locality is commonly called, is further shown by the gradual extinction of all tree life in that section. At various points, there were oak trees that used to grow, but which are all now either dead or dying (Record, bottom of pp. 272 *et seq.*, testimony of Wm. Dillard; pp. 299 *et seq.*, testimony of Alfred C. Ruiz), thus showing not only the geological tendency, but the actual settlement and subsidence of the St. Bernard peninsula.

The question may be asked, If these lands are sinking, why have they not all sunk out of sight?

In the interior of the Louisiana marshes, where the lands have stayed above water and at tide level, a phenomenon is observed similar to that discovered in other parts of Louisiana similarly situated—that is, that for several feet down the soil is composed entirely of decayed vegetable matter. This answers the above question and is explained by the fact that the annual growth of sea marsh grass by its annual death and decay, forms annual layers of vegetable composition which offset or compensate the continuous subsidence and keeps these lands at tide level or just above water (Record, p. 353, testimony of Dr. Wm. C. Stubbs; p. 526, testimony of Mr. James Wilkinson).

In connection with this demonstration of subsidence Louisiana also contends that topographical conditions ex-

isting in 1803 when Louisiana was purchased from France, or in 1812 when she was created a State, when established by evidence, must control in the decision of this case, and that the record clearly shows that for the past hundred years the St. Bernard peninsula has been undergoing a continuous process of disintegration and subsidence.

As merely another confirmatory illustration of subsidence, we refer to the gradual disappearance of Round island, southeast of the mouth of Pearl river, in the disputed territory, (Record, p. 268, testimony of Mr. William Dillard; p. 253, testimony of Mr. J. D. Railey) and to the gradual disappearance of St. Joseph's island, just north of the deep-water channel (Record, p. 254, testimony of J. D. Railey; p. 243, testimony of Capt. Thomas Summerall; p. 544, testimony of Capt. A. S. Cowand, etc.).

Another influence that has tended to affect the topography of the St. Bernard peninsula, in the matter of producing and hastening its disintegration has been that of the storms which have prevailed in that region for the past one hundred years.

Mr. Isaac M. Cline, forecaster of the United States Weather Bureau located at New Orleans (Record, pp. 505 *et seq.*) testifies as to the dates of the storms affecting the St. Bernard peninsula, so far as records thereof had been kept, and the record shows their occurrence to have been frequent, and that they were of very destructive effect.

In connection with the testimony of Mr. Cline, extracts were offered in evidence from the reports of the Superintendent of the United States Coast Survey for the years 1852 and 1853, (Record, pp. 512 *et seq.*), showing the effect of storms occurring in those years in the general region of the disputed territory.

The record also contains extracts from De Bow's Review, List of Hurricanes, 1700 to 1856, and clippings from 1837 to 1893, taken from the New Orleans Picayune, a daily

newspaper published in that city (Record, pp. 1036 *et seq.*, document No. 36).

Even Mr. Thomas Jefferson, then President of the United States, in a message to Congress, November 14, 1803, in reference to the recently acquired province of Louisiana, refers to the destructive effect produced by hurricanes in the parish of Plaquemines, which adjoins the parish of St. Bernard, and is of the same geological formation, and in the same general geographical location (Record, p. 1015, document No. 19). The record abounds with the testimony of individuals as to the general process of disintegration produced by the prevailing storms in the disputed territory (Record, pp. 242 *et seq.*, testimony of Capt. Thomas Summerall; pp. 250 *et seq.*, of Capt. J. D. Railey; pp. 259 *et seq.*, of Mr. Chas. Sanger; pp. 266 *et seq.*, of Mr. William Dillard; pp. 293 *et seq.*, of Capt. Alfred C. Ruiz; pp. 309 *et seq.*, of Mr. George H. Dunbar; pp. 363 *et seq.*, of Mr. James C. Hough; pp. 404 *et seq.*, of Mr. John McGraw; pp. 529 *et seq.* and pp. 671 *et seq.*, of Mr. James Wilkinson; pp. 544 *et seq.*, of Capt. A. S. Cowand; pp. 662 *et seq.*, of Mr. J. S. Beckwith; pp. 669 *et seq.*, of Mr. Ernest Cucullu; pp. 681 *et seq.*, of Mr. Charles Marshall; pp. 710 *et seq.*, of Mr. Albert Estopinal, Jr.; pp. 829 *et seq.*, of Mr. Henry T. Goodloe; pp. 837 *et seq.*, of Mr. Campbell K. De Lappe; pp. 838 *et seq.*, of Mr. Edward M. Wallace; pp. 862 *et seq.*, of Mr. James K. Henley; pp. 864 *et seq.*, of Mr. John Conner; pp. 868 *et seq.*, of Mr. Patrick M. McDonnell, and pp. 872 *et seq.*, of Mr. Frederick M. Weed).

The topographical and geological conditions immediately west of the marsh or delta of the Mississippi river are naturally the same, in a general way, as those of the St. Bernard peninsula. Similar results in the process of disintegration were produced by storms in that locality as was the case with the storms in St. Bernard. Additional evidence to this effect is found in the record (Record, pp. 323 *et seq.*, testimony of Mr. Edmond McCullom; pp. 388 *et seq.*, of Mr. Adam Duet;

pp. 393 *et seq.*, of Mr. Joseph Tomessi; pp. 400 *et seq.*, of Mr. Julien Labat; pp. 401 *et seq.*, of Mr. E. L. Lecompte).

On this proposition of the case, the State of Louisiana, therefore, maintains that the St. Bernard peninsula is a peninsula today; that it was even a better defined peninsula one hundred years ago when she was created a State, and formed at that time what was considered the main coast line of the State of Louisiana in that locality, measuring from which, in the mind of Congress, Louisiana should get all islands within three leagues of her coast, and that the record clearly shows that the peninsula of St. Bernard was not in the mind of Congress an archipelago of islands which Congress intended to give to Mississippi when creating her a State on December 10, 1817.

Having thus conclusively shown that the claim of the State of Mississippi to the area in dispute cannot be seriously considered, first, because the islands in that area had previously been given by Congress to the State of Louisiana; and second, because the peninsula of St. Bernard was a true peninsula in the mind of Congress and not an archipelago of islands, we are now led to consider the further claims, if any, that Mississippi urges, giving, or even seeming to give, a basis for her present contention. As we understand them these claims are :

1st. That the islands which Congress intended to give to the State of Louisiana are other islands in the open gulf of Mexico beyond the disputed territory and that therefore Louisiana had no prior title to the islands in the disputed territory when Mississippi was admitted into the Union, December 10, 1817.

2d. That the State of Mississippi has title to the disputed territory because she has exercised acts of sovereignty over it and heretofore regarded it as hers.

The first of these is the more important proposition and we shall now show that there is absolutely no basis justifying such a contention.

The words of the act creating Louisiana a State and which affect the proposition are:

"*thence down the said river (Mississippi) to the River Iberville; and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by the said gulf to the place of beginning, including all islands within three leagues of the coast.*"

The sustaining of the correctness of the Mississippi construction would do away entirely with the recognition of the deep-water channel sailing line as the true boundary between the States, a conclusion that could not be reached in the face of the facts in the record.

Then the words of the act do not admit of any such construction. The clause, "*including all islands within three leagues of the coast*" refers to the *whole* coast of the State and we have shown how the peninsula of St. Bernard formed an integral part of the *coast* of the State of Louisiana. It was not necessary for the line of demarcation between the States to reach the open waters of the gulf of Mexico before the *coast* of Louisiana came into existence. As a matter of fact the waters of Mississippi sound were considered as the sea or as forming part of the sea and gulf of Mexico at that time. We have already shown that Mississippi sound and Lake Borgne are salt-water bodies of water and true parts of the sea or gulf. Congress in its description so regarded these bodies of water, for in its boundary description it carried its line from the middle of Lakes Maurepas and Pontchartrain *immediately* to the gulf of Mexico, thus indicating that it considered that to be the next body of water to be reached in the extension of the southern boundary of Louisiana around to the westward until it reached the Texas line. We have also shown, under our discussion of international law, how these bodies of water, Mississippi sound and Lake Borgne, are true arms of the sea. It is only natural to presume that Congress so regarded them. That they were re-

garded as part of and forming the beginning of the sea at that point is further established by the fact that on the early maps of that section of the country these bodies of water, with the exception of Lake Bongue which is not mentioned in the acts of Congress, are given no separate individuality, have no names of their own and are therefore recognized only collectively as being and forming part of the sea or gulf of Mexico. As a matter of fact it was not until the year 1866 (map No. 29 Louisiana Atlas of Maps, p. 23) that the body of water known today as *Mississippi sound* was given that name. Even in the survey of the coast of the State of Mississippi in the year 1839 by Mr. John Wheeler, engineer, under authority of the State legislature of Mississippi (Record, p. 1148) no name is given on the sketch to the body of water known today as Mississippi sound.

It is therefore clearly to be presumed from this that Congress regarded the waters of Mississippi sound as being the gulf of Mexico in its reference to that body of water in the act of Congress creating the State of Louisiana; that the *coast* of the State of Louisiana began along the north shore of the St. Bernard peninsula, or on the south shore of the waters today known as Mississippi sound; and that it would be absurd to suppose that the islands referred to by Congress in the act admitting Louisiana into the Union as a State were solely those islands to the south of the State. If we take this theory of the State of Mississippi and reduce it to its natural elements it proves itself to be absurd. In order to carry out the present Mississippi idea to its full extent it is necessary that, working backwards, the line, extending from the mouth of Pearl river, should extend due south a distance of eighteen miles. It will be seen from the map Mississippi A (Record, p. 88) that it is there admitted that this extension that distance of this line *due south* would conflict with and run into what is admitted to be the *mainland* of Louisiana; and these theorists are therefore compelled to back up several miles around *Malheureux point* and go eastward along the

Louisiana coast, or St. Bernard peninsula, until they come to Nine-mile bayou down which they project their line into the center of the *Louisiana marshes*. The extension of this line eastward, then bisects and runs through various *hummocks* of marsh land, introducing new elements of uncertainty, because if the *marsh hummocks* are *islands*, then in many instances the claim of the State of Mississippi only takes parts or portions of these islands, when in their theory Mississippi would be entitled to *all* of the islands, and a difficult question naturally arises in determining to which State these divided *islands* (?) would really belong; for if we follow this theory further it comes as a natural result that when Louisiana was created a State her boundary must have run directly south from the mouth of the Pearl river. The projection of this line would have cut the peninsula of St. Bernard into two parts, and would have given to Spain the better or greater part, not only of that parish, but of the parish of Plaquemines to the south in order for this line extending south to reach the open waters of the gulf of Mexico; thus this theory by the process of *reductio ad absurdum* shows its own fatal fallacy.

This therefore brings us to a discussion of the next question to be considered:—

"*That the State of Mississippi has title to the disputed area because she has exercised acts of sovereignty over it and heretofore regarded it as hers.*"

We have already referred to and cited such an overwhelming mass of evidence in the record, showing not only Louisiana's affirmative exercise of ownership of the disputed territory, but also the official recognition by the State of Mississippi of Louisiana's ownership of the disputed area, that it would be like painting the lily and perfuming the violet to now disprove Mississippi's acts of sovereignty and ownership, yet our treatment of the case would not be complete

did we not fully explain and account for the few instances in which the State of Mississippi might appear to be claiming rights in the disputed area. These instances are few and a full knowledge of, and careful search through, the record shows the following to be the only occasions when the State of Mississippi might appear to be in any way referring to the disputed area:

1st. In her legislative enactments wherein she makes use of, and in her judicial decisions where she refers to, the words

"*thence westward including all islands within six leagues of the shore.*"

This is explained by the fact that there were in existence a number of islands, to-wit, Petit Bois, Horn, Ship, Cat, Round, and Deer islands, which were within six leagues of the Mississippi shore, but which were outside of the disputed area, and are the islands to which reference was intended to be made in such legislative enactments and judicial decisions.

2d. In her legislation granting to Congress a right to erect a light-house on Half Moon island.

This instance was on February 17, 1842, when the legislature of Mississippi passed an act entitled "An act giving consent of this State to the United States to purchase a site in St. Joseph's or Half Moon island for the purpose of erecting a light-house thereon" (Record, p. 1819). The fact that the State of Mississippi here granted to Congress her consent to erect a light-house on Half Moon island would perhaps, on the first blush, indicate an assumption of ownership on her part of Half Moon island, yet Mr. E. H. Wall, the State land commissioner, testified (Record top of page 1758) that the State of Mississippi never had on the books of her State land office any record of ownership of

lands in townships 10 south, range 17 east, 11 south, range 17 east, 10 south, range 18 east, 11 south, range 18 east, which are the four townships that form the lands comprising Half Moon island. How then can we account for this action by the State of Mississippi, when it is so at variance with her otherwise acquiescent recognition of Louisiana's ownership of all the disputed area of which this island forms but a small and unimportant part? An answer and full explanation is readily found in the fact that the legislature of the State of Mississippi did not know that *St. Joseph's island* and *Half Moon island* were two separate and distinct islands, the former being owned by Mississippi and the latter being owned by Louisiana, and that the confusion in regarding them as one and the same island was due to legislative ignorance of the subject, as appears from a resolution of the Mississippi legislature, approved February 22, 1842, or five days later, entitled "A resolution to Congress concerning the erection of a light-house on St. Joseph's island," and reading as follows:

"*Resolved by the legislature of the State of Mississippi*, That our Senators in Congress be instructed, and our Representatives requested to unite their best exertions to obtain a sufficient appropriation for the erection of a light-house on St. Joseph's, *sometimes called Half Moon island*, situated in Lake Borgne, and lying between the mouth of Pearl river and the bay of St. Louis" (Record, p. 2124, Mississippi document No. 102). (Italics ours.)

St. Joseph's island was never called Half Moon island. They are, were, and always have been separate and distinct islands. This reference, therefore, to "St. Joseph's, as to being *sometimes called Half Moon island*" shows that no special significance can be attached to the mention by Mississippi of Half Moon island so far as evidencing any claim or ownership as it in fact indicates that the reference to Half Moon island was alone due to ignorance and confusion. As a matter of fact on November 19, 1857, an act

of the Mississippi legislature was approved authorizing the United States to expropriate St. Joseph's island for light-house purposes, and no reference is made therein to Half Moon island (Record, p. 2128, Mississippi document No. 106). In due course a light-house was built by the United States on St. Joseph's island, but owing to the fact that this St. Joseph's island has practically washed away and disappeared (Record, p. 544, testimony of Capt. A. S. Cowand), there is no light-house there now, it having been removed to the mainland, and yet Mississippi contends that no changes have taken place in this country in the last hundred years.

3d. The next instance that might be construed as indicating an assumption of sovereignty by Mississippi over a part of the disputed area was where an inquest was held and a preliminary hearing had in a case where a drowned man was thought to have been murdered. Joseph, Louis and John Kennedy, brothers, all citizens of Biloxi, Mississippi, were on board a sailboat going from Mississippi to the Louisiana marshes, and when the vessel, in a storm, was passing one of the buoys which marked the deep-water channel, John Kennedy fell overboard and was drowned. In a search instituted by members of his family, his body was found washed up in the Louisiana marsh, and was naturally taken home to Biloxi, Mississippi, for burial. As some bruises were discovered on the body, the two brothers, Louis and Joseph Kennedy, were arrested by the Mississippi authorities, and at the preliminary hearing before the justice of the peace, were honorably discharged.

Mr. Louis Kennedy (Record, p. 1266) testified that he was told his brother was drowned or fell overboard off *Cat island*, and although he was on the boat at the time, he did not know where he was, because of lack of knowledge of the locality, but that it was marked in the family Bible that he was drowned at Cat island. The extract in the family Bible reads as follows :

"Drowned on Wednesday, October 26, 1886, at 2 o'clock in the morning at Cat island. John Callavati Kennedy" (Record, p. 1267).

Joseph Kennedy, who was pilot, says a gale was blowing from the north, he was pilot; and had just passed a black-and-white buoy, off Cat Island spit, when his brother slipped on a rope which rolled and he fell overboard. At best, this was very close to Mississippi territory, the only written record shows the incident to have occurred *at Cat island*, which is really in Mississippi, it was only natural that the body should be taken back by the family for burial at their and his *home* at Biloxi, Mississippi, and this assumption of jurisdiction if it be such to, under these circumstances, hold an inquest and preliminary hearing where the accident may have occurred at Cat island in Mississippi territory, is to our mind no fair test of the exercise of police power and sovereignty for the purpose of fixing State boundaries.

Mississippi has also introduced a multitude of documents in reference to her licensing of vessels to fish oysters. These records do not in any way show jurisdiction, or even an attempt to exercise jurisdiction, over the area now in dispute. Each vessel, operating in the oyster business in Mississippi, had to procure and pay for a permit or license to do so. The State of Mississippi had her own oyster waters; and it was, as to the fishing in these waters, that these licenses referred. These Mississippi oystermen fished in Mississippi waters; and, until the enactment and enforcement of the Louisiana oyster law prohibited it, they were welcome to fish oysters in Louisiana waters; and not only fished there but overran the whole Louisiana marsh, to the mouth of the Mississippi river, over a hundred miles beyond the disputed area of today.

4th. The last instance shown by the record wherein the State of Mississippi, or any of her political subdivisions,

might be presumed to cherish and entertain ideas of ownership in the disputed area is found in the case of the official map of Hancock county, State of Mississippi (Mississippi map No. 62, Louisiana Atlas, p. 65).

Hancock county forms the southwest corner of the State of Mississippi, and its western boundary being Pearl river, it adjoins the State of Louisiana. It is the most western of the Mississippi coast countries and therefore lies immediately north of the disputed area. The map in question was made by Mr. J. L. Henderson, a land agent in that county, in 1895; it was accepted, in December, 1895, as the official map of Hancock county, Mississippi, by the board of supervisors of said county, which body in consideration of his making the map relieved Mr. Henderson of liability on his certain note due the county and held by the sheriff for collection. We were able only to obtain a blue print of the map as the original is on file in the county court-house and is the only official county map there.

An examination of the map shows that the county of Hancock, State of Mississippi, makes no claim whatever to the ownership of lands in the St. Bernard peninsula, as claimed by Mississippi, today, in her defense of this suit. It does show a reference to St. Joseph island and Half Moon island, which might indicate that she claimed to own both of these islands. A reference to the map will show however that Mr. Henderson must have made it up by simply compiling the township plats on file in the office of the commissioner of the State land office at Jackson, Miss. This idea is confirmed by the following facts: The map simply designates Half Moon island and gives its area and direction from the mainland without subdividing it into sections, townships and ranges, and as explaining where Mr. Henderson got his data, from which to make his official map of Hancock county, Mississippi, and as accounting for the appearance of Grand island there, it will be noted that there is on file, in the office of the commissioner of the State land office at Jackson, Missis-

sippi, a plat of a township survey called, T. X, R. XV W., land district, east of the island of New Orleans and west of the Pearl river (document, Louisiana, 1, Record, p. 1190). A comparison of this township plat with the Henderson map will show that Mr. Henderson must have gotten his data as to these islands from this township plat. Now in truth the township plat does not indicate that the islands mentioned are in, or form any part of, the State of Mississippi. The plat is based on surveys made in the year 1824 of what is now called *Lower Point Clear* and which is really a part of the State of Mississippi. The lands forming this point are sectionized, but the islands are not. It is between these two islands that the deep-water sailing channel line runs and the survey really merely indicated the general location and area of the islands. There was a resurvey of the area in this township as will appear from the above document, Louisiana No. 1, approved September 12, 1846, and no mention is then made of these islands.

If Grand or Half Moon island was part of the township, it would have been subdivided, while the subdivision was being made. That it formed no part of the Mississippi township in question, is shown by the detailed survey and sectionizing of the island, made in 1845, when the island was found to be formed of parts of four Louisiana townships; namely:

Section 36, township 10 south, range 17 east.

Section 1, township 11 south, range 17 east.

Sections 29–31–32–33, township 10 south, range 18 east.

Sections 5 and 6, township 11 south, range 18 east.

Approved July 31, 1846, by the surveyor general of Louisiana (Record, 1047*a*, document 38).

This explanation we think accounts for all the apparent instances where the State of Mississippi would appear to have wandered from her policy of quasi-studied recognition of the priority and greater strength of Louisiana's claim to the disputed area.

CONCLUSION.

We have thus endeavored to meet and discuss what we consider to be the only salient points in this cause. The record is very, indeed unnecessarily, voluminous in our opinion. The evidence and testimony having been taken before commissioners appointed by this honorable court, a great deal of matter has been thrust into the case which we deem inadmissible, as irrelevant and not pertinent to the issues. The commissioners having no power to rule upon our objections and exceptions to evidence, your honors must decide upon those points. Our opponents have, for instance, introduced a great deal of evidence in the nature of opinions of citizens of Mississippi as to the boundaries of the States, all of which we regard as utterly inadmissible. There were many other similar instances, to which we deem it unnecessary to refer in detail. Attempts were also made by the counsel for Mississippi to establish certain propositions in which, in our opinion, they have signally failed. Not having as yet been favored with a copy of their brief, we cannot say whether they will still seriously persist in their efforts of contention on those points. Considerable space, in the record, is devoted by them to an endeavor to show that, should your honors decide this cause in Louisiana's favor, the commerce of Mississippi's sea or gulf ports would be seriously menaced and interfered with. We apprehend that even if this should be the case, it could not affect the decision of your honors in regard to the rights of Louisiana in the premises. But as the navigable waters would still be open to Mississippi commerce, we cannot see any possible damage to Mississippi to result therefrom, except to prevent Mississippi fishermen from poaching or pirating oysters from Louisiana territory. Nor can we see why, if it be true that Louisiana's seacoast is now much longer than that of Mississippi, there is any reason why your honors should therefore

take any of Louisiana's territory away from her and give it to Mississippi to increase her coast or shore line. An abortive effort was also made to try and show that the peninsula of St. Bernard, or the now archipelago of islands therein, was formed by silt and alluvion from the Mississippi river since the admission of Louisiana as a State. No proof was administered to establish this theory, but, on the contrary, it was shown by us that since the year 1750, when the levees were built on the right bank of the river in front of the parish of St. Bernard, no alluvion has passed to the eastward of that parish, but all the alluvion has been discharged through the mouths of the Mississippi river and has been borne by the littoral current to the westward, and not to the eastward, as claimed by our opponents (testimony of C. Donovan, Record, p. 652). We have also shown that the disintegration of the peninsula was due to violent storms, overflows, subsidence, &c., which have occurred since the admission of Louisiana into the Union. That these changes in the territory have had no effect in altering the ownership and dominion of the territory is plain under the principles of international law in regard to avulsion.

Fodéré, in section 808, pages 365 *et seq.*, discusses at length the principle and doctrine of alluvion in lakes and arms of the sea, as forming a part of international law. Speaking of alluvion in waters or lakes separating two different States, he quotes with approval Vattel on the subject, who says: "Si ces accroissements ne sont pas insensible, si le lac, franchessant ses bords, inondait tout a coup un grand pays, cette nouvelle portion du lac, ce pays couvert d'eau appartien drait encore a son ancien maitre. Surquoi en fonderait on l'acquisition par le maitre du lac? L'espace est trés reconnaissable quoiqu'il changé de nature, et trop considérable pour presumer que le maitre n'ait pas eu l'intention de se le conserver malgré les changements qui pourraient y survenir;" and Vattel, approved by Fodéré, adds "Que si quelques terres voisines du lac sont seulement inondées par

les grandes eaux, cet accident passager ne peut apporter aucun changement à leur dépendance" and again "Par les memes raisons, si les eaux du lac, penetrant par une ouverture dans le pays voisin, en forment une baie ou en quelque façon un nouveau lac joint au premier par un canal, ce nouvel amas d'eau et le canal appartientrent au maitre du pays dans lequel ils se sont formés. Car ces limites sont fort reconnaisables, et on ne presume point l'intention d'abandonner un espace si considerable, s'il vient à être envalie par les eaux d'un lac voisin." In section 810, pages 368, 369, Fodéré quotes with approval from "M. d'Argont a la Chambre des Paris de France, (1828)" Journal Administratif as to the ownership of territory on the sea either increased or diminished by the action of the waters of the sea: "L'alluvion maritime au contraire apparaitra souvent tout a coup; un coup de mer la produira, un autre la fera disparaitre; elle sera composée des matieres que la mer repose, souleve, et delaisse, des sables et galets qu'elle charrie. La presence des coquillages, qui ne peuvent vivre que dans l'eau salée et les herbes salines qui croitront à sa surface attesteront d'une maniere certaine qu'elle est un lais et relais, et que consequent le rivage qui la borde est exclusivement maritime."

Translation.

"If the encroachments are not imperceptible, if the lake, overflowing its banks inundates all at once a large section of country, this new portion of the lake, this portion of the land covered with water, still belongs to its former owner upon what is founded the acquisition by the owner of the lake? The space of land is very recognizable, although it has changed its nature, and it is too considerable in extent to presume that the owner has not had the intention to keep it, in spite of the changes which have come over it." * * * "That if some lands bordering on a lake are only inundated by high tides or waters, this transient occurrence does not

bring any change in their dependence (or dominion)" * * * "For the same reasons, if the waters of a lake, penetrating through an opening in the neighboring land, and forming in it a bay, or in a certain manner a new lake joined to the first by a canal (or channel), this new body of water and the canal or channel belong to the owner of the land in which they are formed. For these boundaries or limits are very recognizable and it is not to be presumed at all that the intention was to abandon so considerable a space (of territory) if they became inundated by the waters of a neighboring lake." * * * "Maritime alluvion, on the contrary, appears often suddenly; one force of the sea will produce it, another will cause it to disappear; it will be composed of substances which the sea deposits, raises or lowers, sands and debris which it carries. The presence of shells and shell fish which cannot live but in salt water and the salt grasses which grow upon its surface, show in a positive manner that it is the rise and fall of the tide, and that consequently the shore is exclusively maritime."

Thus establishing the correctness of the Louisiana contention that the fact that the forces of nature have helped to partially destroy the peninsular formation of the St. Bernard peninsula does not affect Louisiana's ownership of that body of land.

As a matter of fact, as we have previously stated, it is alone the clause, referring to the islands, in the act of Congress creating the State of Mississippi, that has given rise to the boundary dispute at issue in this case. It is not to be presumed that the Congress of the United States intended to make a conflict of boundaries when there is a possible construction of the acts of Congress which would reconcile the apparent inconsistencies.

Louisiana contends and has always contended that there is an interpretation of the acts of Congress, creating the States

of Louisiana and Mississippi respectively, that would do away with all of the conflict, an interpretation that we really believe faithfully and truthfully represents the intention of Congress at the time it created the State of Mississippi.

We have heretofore shown and the maps in the record establish the fact that there is a chain of *white sea sand islands*, running from the west shore of Mobile bay, in the State of Alabama, westward to, and inclusive of, Cat island, in the State of Mississippi. These are the islands which by their chain form the southern boundary of Mississippi sound and they are all relatively of the same distance from the shore of the States of Mississippi and Alabama. These islands, beginning at the eastern end are Dauphin, Petit Bois, Horn, Ship, and Cat islands. There are two other islands, namely, Round island, off Pascagoula, and Deer island, off Biloxi, both in the State of Mississippi and lying inside of this chain of islands. If Congress referred to this chain of islands, as being those within six leagues of the shore, when she adopted her act creating the State of Mississippi, it follows that there would be no conflict with the prior existing boundaries of the State of Louisiana, provided the deep-water sailing channel line was taken as the correct boundary between the States of Louisiana and Mississippi. That this is so, that Congress was really referring to these large and important islands, on the south of the State of Mississippi, when it admitted her into the Union, is shown by the fact that in the act of Congress creating a separate territorial government for the eastern part of the Mississippi Territory and calling said Territory Alabama, the act being approved March 3, 1817, (Record, p. 2121, Mississippi document No. 107), the same language is used as will be seen from the following extract concerning the western and southern boundary of the Territory of Alabama—"thence due south to the gulf of Mexico, thence eastwardly *including all islands within six leagues of the shore* to the River Perdido, and thence up same to beginning." We think from this

that it clearly and conclusively follows that it was to this chain of islands that Congress referred, when it admitted Mississippi into the Union, and that it had no intention whatsoever of giving Mississippi any right or pretense to a claim of ownership in the *sea marsh islands* south of the deep-water sailing channel line in the disputed territory and which had been previously given by Congress to the State of Louisiana.

In concluding, therefore, our discussion of this whole subject-matter and in thanking your honors for your kind indulgence, in bearing with us in the long space it has taken to present the many phases of our case, we submit that the title of the State of Louisiana to the whole of the disputed area has been established clearly by the words of the acts of Congress and by the intention of Congress in creating, respectively, the States of Louisiana and Mississippi; but if there be in the minds of your honors any lingering doubt on this subject, as we have already stated, then we say that by the adoption of the deep-water sailing channel line as the proper boundary between the two States, in this region, the correctness of which proposition we have established beyond question, Louisiana's ownership to the disputed territory, in its entirety, is again established; and even then, if there still be any doubt upon the subject, that the record contains an abundance of evidence showing that Louisiana has acquired a title to the disputed territory by prescription, and that her ownership of the same cannot now be successfully contested by the State of Mississippi. And we therefore confidently submit our case to your honors for final consideration and decision, praying that the deep-water channel sailing line extending from the mouth of the most eastern branch of Pearl river north of Half Moon, or Grand island, through Mississippi sound, between Cat island and Isle à Pitre, north of Chandeleur islands into the open waters of the gulf of Mexico be decreed to be the proper boundary between the two States of Louisiana and Mississippi in that

region and that it be in due course properly buoyed and publicly designated as such; that the State of Louisiana be quieted in her ownership, sovereignty and possession of all the region south of said boundary line, and that the State of Louisiana recover her costs in this case unjustly sustained.

Respectfully,

WALTER GUION,
Attorney General of the State of Louisiana.

JOHN DYMOND, JR.,
FRANCIS C. ZACHARIE,
Of Counsel.

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1905.

No. 11, Original.

STATE OF LOUISIANA, COMPLAINANT,

vs.

STATE OF MISSISSIPPI, DEFENDANT.

IN EQUITY.

Supplemental Brief on Behalf of the State of Louisiana in Support of Her Bill of Complaint.

At the time of the preparation of our original brief in this case, we did not have before us the two briefs which have since been filed by the counsel of Mississippi, one by the attorney general and assistant attorney general of Mississippi, and the other by the associate counsel, Messrs. Monroe McClurg and Hannis Taylor. We, therefore, as counsel on behalf of Louisiana, were ignorant of what defenses would be set up by, and for, the State of Mississippi, except in so far as they had been developed by the answer and cross-bill of that State, and also by what had been indicated during the taking of the testimony, and offering of evidence.

We were therefore surprised, on the perusal of their briefs, at the fact that the State of Mississippi had now shifted its

defenses to far different grounds from those which it had originally assumed; indeed to grounds which were not only inconsistent with the original positions taken by Mississippi, but in direct contradiction of, and in opposition to, their whole previous theory of the case.

I.

This change of base by the State of Mississippi, heretofore referred to, is illustrated by her treatment of the evidence introduced in this case. In the twentieth paragraph of her *answer* (Record, page 81) the State of Mississippi contends that "except as to a small portion of *Isle à Pitre* in the whole expanse of this territory there is not a single human habitation, nor is there any animal life thereon, nor can any such be thereon. That it is a low-lying archipelago of irregular islands sometimes entirely covered by the high tide and at all times soft and boggy and to walk upon them is at almost all times impracticable and no actual occupancy of any kind has ever been had of the said territory except the boats of the fishermen, etc."

In our brief we called the attention of the court to the fact that this territory, composing the peninsula of Saint Bernard, and the Louisiana marshes, is of alluvial origin, and has never been higher than the surface of the highest water which by the deposit of its suspended alluvion had made the peninsula, and therefore is, necessarily, at about tide level; and an abundance of evidence has been introduced in the record showing that the character of the country conforms to its general recognized name of *marshes*. There are some few habitations of Louisianans engaged in the oyster industry who have built houses in the marsh, but that the area is not susceptible of cultivation and is at tide level, except the coast line, extending from Malheureux point on the west to Isle à Pitre on the east, forming the coast line of the State of Louisiana. The testimony of George Thiel and

Adolph Monier was introduced by the State of Louisiana for the purpose of showing that there has always existed, and that there exists today, a distinct and well defined coast line between these two points, forming the south boundary of Mississippi sound, and that this well defined and distinct coast line, higher than the balance of the Louisiana marshes, constitutes a part of the coast line of the State of Louisiana, as contemplated by the Congress of the United States when erecting Louisiana into a State, and yet we find counsel for Mississippi now quoting this very evidence to establish a character to the whole Louisiana marsh entirely different from, and at variance with, the character of the country as claimed by them in their answer to the bill of complaint and contrary to the true facts; this change of base being apparently assumed for the purpose of endeavoring to impress the court with the island character of the *marsh hummocks* composing the Louisiana marshes, forming a part of the parish of Saint Bernard and the peninsula of that name (Record, pages 324-330, testimony of Alfred Joseph Monier, and, pages 330-332, of George Thiel).

II.

Associate counsel for the State of Mississippi, in their brief, have extracted from the testimony of Dr. William C. Stubbs, State geologist of the State of Louisiana, on the subject of the geological origin of the peninsula of Saint Bernard and the Louisiana marshes, and have attempted by *garbling* that testimony, to now make it appear that Dr. Stubbs said that the territory composing the disputed area in the parish of Saint Bernard was made up of islands which had been built by the winds and waves of the sea, instead of by alluvium deposited by the Mississippi river, through Bayous Terre aux Bœufs and La Loutre, and that the insular formation of certain portions of the Louisiana marshes, (or islands, so-called by Mississippi), has never formed part

of the peninsula of Saint Bernard but were distinct creations formed by the winds and waves of the sea, and not by alluvium. We will proceed to show that the whole of Dr. Stubbs' testimony on this point is directly to the contrary.

Dr. Stubbs' testimony appears in the record at pages 332 to 355. He testified that the whole of the territory forming the parish of Saint Bernard was built up by the deposit of alluvium brought down by the Mississippi river, through the bayous which we have just mentioned. On page 334 he says, in reference to these two bayous:

"All the marsh lands that we now have along the banks of the Bayou Terre aux Bœuf that are being cultivated came from the deposit of this stream or bayou that ran through that country, and in fact the whole of Saint Bernard parish has been built up by that agency, the bayous coming from the Mississippi river."

By further reference to Dr. Stubbs' testimony, it will be seen that he has identified sample No. 1 as a sample of soil taken from Isle à Pitre and characteristic of the entire alluvial formation of that area; he has also identified sample No. 2 as characteristic of the chain of sand islands, forming the southern limits of Mississippi sound, lying south of the State of Mississippi, and east of the parish of Saint Bernard and the territory in dispute. It will thus be seen that Dr. Stubbs has thus far plainly established that the parish of Saint Bernard consists of alluvial deposits and not of sand washed up by the winds and waves of the sea. Having thus testified in regard to the formation of the peninsula of Saint Bernard, he then goes on to testify in regard to the sea-sand islands, east of Saint Bernard, not in dispute in this case, and south of the Mississippi coast; and he refers at length (Record, bottom of page 338) to islands south of Louisiana, on around to Texas and Mexico, as being of sea-sand formation, created by the waves of the sea, and similar to the string of islands lying south of the coast of Mississippi and east of the parish of Saint Bernard.

Vhen Dr. Stubbs, therefore, used the expression (Record, , 345): "These on the coast of Louisiana have not been off; they have been formed by the waves and winds of Gulf," he referred to the sand islands, south of Louisiana, lar in character to those south of the State of Mississippi, to islands that form no part of the parish of Saint Ber- d, and no part of the disputed area. Yet associate coun- or Mississippi have endeavored, in their brief (pages 33, 35, and 49), to make it appear that Dr. Stubbs referred ie disputed area in the parish of Saint Bernard, as being nds which had "not been cut off," and as having been rmed by the waves and winds of the Gulf."

s showing the correctness of our contention in this re- t and as clearly showing the garbling of this evidence, vill take up and consider the testimony of Dr. Stubbs n the point where he was taken in hand on cross-ex- nation by Mr. Taylor, one of the associate counsel of the e of Mississippi (Record, page 344):

Cross-examination by Mr. TAYLOR:

Q. You are familiar, are you not, with the geography of archipelago of islands lying off the east coast of Saint nard parish and the south coast of Mississippi?

A. Yes, sir.

Q. Is it not a fact that in many portions of the world, n many coasts, there are archipelagoes of islands; is not one of the common features in geography and not un- l feature, the archipelago of islands along the coast? for nce such an archipelago that lies off the coast of Alaska. you familiar with that?

A. Not very much there, but I know what you mean.

Q. It is a very simple phenomenon of history, that there archipelago of islands lying off the coast?

A. I will answer by stating I have already said that e are just such a string of islands lying from the mouth ie Mississippi river around to Mexico."

will be here noted that Dr. Stubbs at this point refers is testimony (bottom of page 338) where he speaks of

the sea-sand islands west of the Mississippi river, along the Louisiana coast, and along the Texas coast down to Mexico. Mr. Taylor then follows with the next question.

"Q. And is it not a fact that there is an archipelago of islands along the coast of Cuba known as the——"

It is to be noted at this point that Dr. Stubbs had, at the top of page 338, discussed the formation of the peninsula of Florida and the island of Cuba, and had designated them as of alluvial formation, built up by the Gulf stream. It will be noted also that the reference to Cuba would provoke a discussion of islands of *alluvial* formation as contradistinguished from islands of *sea-sand* formation. Therefore, Dr. Stubbs, in answer to this last question of Mr. Taylor, concluding that Mr. Taylor had theretofore been speaking of islands of sea-sand formation and was then changing to another subject, said, when interrogated in regard to the island of Cuba:

"A. You have gone into another thing."

Mr. Taylor thereupon stated to the witness:

"Q. You can just omit that"—

indicating that he did not intend to discuss islands of alluvial formation, and that he was referring to the islands of sea-sand formation, forming the southern boundary of Mississippi sound and east of the disputed territory, upon which Dr. Stubbs understood Mr. Taylor had been examining him, as shown by his original question.

Following up the same line of thought that he had in mind, that Mr. Taylor, by reference to Cuba, intended to change from a discussion of sea-sand islands to alluvial islands, Dr. Stubbs then answered, when told to omit the discussion:

"A. These are all alluvum origin"—

erring to Cuba and Florida. Thereupon Mr. Taylor said:

Q. We won't go into that"—

icating that he did not want to discuss islands of alluvial nation, and followed this remark, with the remaining part he question:

But that is a very common phenomenon in the geog- hy of the world, an archipelago or string of islands lying the coast?"

o which Dr. Stubbs replied.

A. Yes, sir."

hereupon Mr. Taylor asked the question:

Q. Is it not a very familiar matter in the study of geol-, the causes by which these archipelagoes are formed; process by which islands have been cut off from the nland?"

r. Stubbs thereupon replied to this question, considering concluding, as instructed by Mr. Taylor, that he should discuss islands of *alluvial* formation but should confine answer entirely to islands of *sea-sand* formation, as fol-s:

A. Sometimes, and at others not. These on the coast of isiana have not been cut off; they have been formed by waves and winds of the Gulf."

r. Stubbs, there intending in his reference to the coast ouisiana, the islands lying south of Louisiana, and west he Mississippi river, which he had mentioned at the top age 345, in answer to a previous question, which islands, e had previously stated, were of the same sea-sand and e formation as those like Cat island, Horn island, Ship nd, Petit Bois, and Dauphin islands, making up the n of islands, forming the southern boundary of Missis-

sippi sound and lying immediately eastward of the parish of Saint Bernard.

It will thus be seen that there is a studied attempt, on the part of associate counsel for Mississippi, to apply the testimony of Dr. Stubbs, in regard to the sand islands to the eastward of the peninsula of Saint Bernard, to the hummocks of land forming part of the peninsula of Saint Bernard, when it is perfectly evident that his testimony was directly to the contrary, in testifying that the parish of Saint Bernard was composed entirely of alluvium and not of sand created by the waves and winds of the sea.

III.

Associate counsel for Mississippi, in reference to the testimony of Major B. M. Harrod (Brief, pages 35, 36), laid great stress upon his statement that the peninsula of Saint Bernard was, at no time, a solid peninsula, but that spaces of water, or lakes, had been left in process of geological formation by alluvium, and that these water spaces had been subsequently enlarged by subsidence. It has never been the contention of the State of Louisiana that the peninsula of Saint Bernard was of an absolutely solid land formation, free and devoid of any water spaces, because that would be contrary to the very geological theory of its creation, which required water spaces through which the sediment would be carried, that would be used in the building up of the peninsula. It is therefore to be naturally supposed, as stated by Major Harrod, that there would be water spaces and lakes throughout the area, but that fact would not necessarily affect its general original peninsular formation as contended for by the State of Louisiana, just as the presence of the everglades in the Florida peninsula would not make the Florida peninsula any less a peninsula. The contention of the State of Louisiana is: that the coast line extending from Malheureux point to Isle à Pitre,

is and always has been a distinct coast line; that it is a natural extension of the peninsula of Saint Bernard, and has always existed and today still exists as a distinct coast line, though the peninsular formation, south of that coast line, has been more or less broken up, by the effect of subsidence, and the meteorological causes discussed in the Louisiana brief and set forth fully in the record. But that despite all of this process of continuing disintegration, the peninsula was more distinct as such one hundred years ago and that Congress regarded the peninsula of Saint Bernard, at the time, as a peninsula, and the coast line, between the points heretofore mentioned, as being part of the coast of the State of Louisiana, and the line from which the three-league distance was to be calculated, in determining what islands belonged to that State.

In the brief filed by the attorney general and assistant attorney general of the State of Mississippi, the fact of subsidence and disintegration in the Saint Bernard peninsula, which has been so clearly demonstrated by the evidence in the record, and by careful arithmetical calculations and investigations conducted by the engineering department of the United States Government, has been ridiculed and the statement has been made on page 41 of their brief that:

"If it has subsided four feet a century it must of necessity have stood up originally some forty feet above the sea level."

This deduction of the attorney general of Mississippi is an absurdity on its face, because of the fact that the alluvium, with which this peninsula was built up, was necessarily carried there by the waters of the Bayous Terre aux Bœufs and La Loutre, as long as there were no levees in existence, and these streams were connected with the Mississippi river, and the lands formed could never be higher than the surface level of the waters which made these lands by the deposit of their suspended alluvium. We have shown how the subsidence naturally occurred through the loose

nature of the matter deposited by its own weight, and that this subsidence was annually compensated by the sediment brought with each overflow of high water of the Mississippi river, and that these lands were therefore kept at about tide level so long as there were no levees; and that when the levee system was built in the year 1750 and the compensation by deposit ceased, then the only compensating element was the decay of vegetation which, in turn, offset the subsidence and has kept those lands at about tide level, where they were able to maintain themselves above the surface of the water, and at no time has there been, except on the line extending from Malheureux point to Isle à Pitre, any great elevation above the surface level of the water.

IV.

The burden of the complaint in both briefs, filed by the State of Mississippi, is along the line of suggesting to the court that it would be a great injustice to the State of Mississippi if the area in dispute were given to the State of Louisiana, because it would seriously affect the commerce of the State of Mississippi, and reduce her sea front. An examination of the map will show that the sea front of the State of Mississippi is not reduced one foot by the adoption of the line contended for by the State of Louisiana, although Mississippi complains that her sea front would be reduced one-half or two-thirds and thereby her whole commerce along that Gulf coast interfered with. As a matter of fact, the awarding of this territory to Louisiana would not affect the commerce of the State of Mississippi in the slightest degree, because these waters of Mississippi sound are navigable waters and Mississippi vessels would continue to navigate them, but would be prohibited only from taking oysters from the territory claimed by Louisiana, so that the question reduces itself merely to a matter of determining to which State shall be given an area that is valuable alone because of its

ster-producing properties and as having no effect upon e commerce or the sea front of the State of Mississippi.

V.

DEEDS OF THE LAKE BORGNE BASIN LEVEE BOARD.

It is passing strange that the associate counsel for Mississpi should hark back to the cold trail of a matter which is distinctly explained and exploded in the testimony in e record. On page 72 of their brief, speaking of certain eds granted by the Lake Borgne Basin Levee District comssioners, to private individuals, of land in the disputed ea, they call particular attention to the clause in these eds as follows:

"And further that should the said title be subsequently clared void the said board shall not reimburse to the purser any sum whatever" (Record, page 1088, document . 59).

And the associate counsel add:

"A more emphatic declaration could hardly have been ade of the flimsiness of the pretended claim of complainant der the act in question."

And on page 75 counsel again say:

"This aspect of the case is not worthy of serious consideran save so far as it goes to show that the authorities of uisiana, by seeking to acquire color of title to the islands question, by an appeal to the swamp and overflowed land s were convinced that that State possessed no title to them, der the act of April 6, 1812, admitting her into the nion."

The attempt is here made to show that the levee board, agent of the State, was doubtful of its own title, and the ior title of the State, to those very lands. The transparent lacy of this contention becomes perfectly evident when

we refer to the record on this point. In connection with the testimony of Mr. W. K. M. Dukate, one of these deeds from the levee board was offered in evidence, and on page 386 of the record (bottom) associate counsel for Mississippi asked:

"Q. I noticed from your deed that you bought two sections of land, sections 26 and section 21, and also four islands for which the State of Louisiana gave you a quitclaim; did it expressly provide that she did not warrant the title to the land, and for all of which you paid $63.75. That is correct.

"A. I believe in the main it is."

It was intimated that the levee board was unwilling to warrant the title to the land because of a defective title, or because it was thought that the State of Mississippi might have some claim or title to these lands. It therefore became necessary to account for and explain the want of warranty in these deeds by the levee board, when as a matter of fact, the State of Louisiana had, between the years 1853 and 1894, issued thirty separate patents to land in the disputed area to private individuals, without the exclusion of warranty in the several patents. On page 781, Mr. John Dymond, Jr., who was placed upon the stand and sworn as a witness, testified as follows:

"A. I am attorney of the Oyster Commission of Louisiana and also of the board of commissioners for the Lake Borgne Levee Basin district. I am attorney for several other levee districts in the parish of Plaquemines, and if you desire me to give them in detail I will be glad to do so.

"Q. It has been noticed that in these deeds from the Lake Borgne Basin Levee district—that is the proper name, is it not?

"A. Board of commissioners for the Lake Borgne Basin Levee district.

"Q. That there is an exclusion of warranty in these deeds. Will you please state how that exclusion came to be placed and for what reason, in these various deeds?

"A. When the board of commissioners for the Lake Borgne Basin Levee district was created, under section 11 of

t 14 of 1892, authorizing the creation of that levee district take charge of the protection of the parish of Saint Bernard, and a portion of the parish of Plaquemines, from overw by the high waters of the Mississippi river, the legislare authorized the register of the State land office to transfer that levee board all unsold State lands that were within e territorial limits of that district. For the purpose of ising funds with which to construct levees, in carrying out e objects and purposes of the act, I was consulted *as* (by) e board as its attorney, as to whether or not there should any warranty clause put in these deeds and I advised the ard not to put any warranty clause in the deeds because, as department of the State government, the board was not in a sition to warrant its deeds to these lands, as the proceeds of e of these lands were used in constructing levees and were erefore converted into other form which would not be available or on hand, for meeting any warranty obligations of a ntract of sale, and that any purchaser would have relief by plying to the legislature, in case there was any difficulty to warranty, and it would be the safest plan and would less likely to embarrass the board if that policy was proded with and the board acted on my advice."

And again on page 783 the same witness said:

"Q. In the preparations of these acts of sale from the Lake rgne Levee board, or, rather the board of commissioners the Lake Borgne Basin Levee district, was the idea upperst in your mind, or did you consider it at all, at the time, excluding warranty, that the State of Louisiana had a initive (*defective*) title to this property?

A. No, sir. No, sir. As the attorney of the board I conered that the State of Louisiana had a perfect title to the perty, and the idea of there being any uncertainty in the e never at any time affected me in my conclusions or in advice.

Q. Then, it was an entirely different reason that you d than any defect in the title of the State or of the levee rd holding from the State, that prompted you in giving advice you did?

A. Yes, sir."

On cross-examination in regard to this very same matter, the same witness testified on page 783:

"Q. Does the act of the legislature to which you refer limit the title to a release; does it prohibit a warranty being given to these lands?

"A. No, sir. It vests full authority in the levee board to determine the price and conditions under which the land shall be sold.

"Q. It does not undertake to say whether it shall warrant the title or not?

"A. No, sir.

"Q. And that act was passed when?

"A. In 1892; it was act 14 of the legislature of the State of Louisiana for that year.

"Q. Of course that was before there was any suspicion of this controversy?

"A. Yes, sir."

As stated by Mr. Dymond, in his testimony upon this subject, it is evident that he felt that, in the event it should subsequently develop that the State of Louisiana, before its transfer of these lands to that levee board, had previously patented any of the lands to individuals, or if the United States Government had, prior to the swamp-land grants of 1849–1850, patented any of these lands to private individuals, then the Lake Borgne Basin Levee board would not be in a position to warrant the deeds, or to reimburse the money received, because the said funds, after being covered into the State treasury, would have been used for the purpose of building the levees of the district, under the terms of the swamp-land grants, and such funds would not then be available for any purpose of warranty or reimbursement.

VI.

Outside of these attempts to twist and correct the evidence, so as to endeavor to maintain a weak case, the counsel for Mississippi have, in our opinion, advanced several proposi-

ions of mingled law and fact which we believe to be utterly untenable.

In our original brief on page 45 we quoted authorities upon the maxim "*Qui prior est in tempore potior in jure*," authorities to show that the maxim would apply to Louisiana's title to the peninsula of Saint Bernard and the islands, in dispute here, because she acquired them under the act admitting her into the Union on April 6, 1812, and the claim of Mississippi did not originate until December 10, 1817, nearly six years afterwards. We now add to the authorities here cited the following: In the Opinions of the Attorneys General, volume IX, page 254, on a question submitted as to certain swamp and overflowed lands surveyed, selected, and granted to the State of Arkansas by the act of Congress, September 28, 1850, we find the following:

"On the 9th of February, 1853, Congress made another grant to the States of Arkansas and Missouri to aid in the construction of a railroad, and under this grant a part of the land previously granted to the State of Arkansas under the denomination of swamp lands, was included, and is now claimed by the railroad. The question upon which you ask my advice requires a comparison of two laws and the acts done under them so as to ascertain which of these is the better title. Does the State take it under the first grant or was that grant so imperfect that the subsequent disposition of it by Congress passes the right to the later grantee? Where there is a conflict between two titles derived from the same source, either of which would be good if the other were out of the way, the elder must always prevail; *prior tempore est potior in jure*.

"This difficulty, therefore (*is*), solved, if the mere grant, as you call it, gave the State a right to the land from the day of its date. That it did so there can be no doubt. * * * The subsequent grants by Congress to the State for the use of the railroad could not have been intended to take away from the State the rights previously vested in her for other purposes. * * * The State, therefore, has the oldest and the most definite title and its lands were accurately located and their boundaries particularly defined agreeably to the act of

Congress before the same thing was done by the other claimants. The oldest title, the most definite, and the first location will surely give her priority and preference over another grantee subsequent in title, less definite in the terms of the grant and later in location."

Attorney General J. S. Black to Hon. Jacob Thompson, Secretary of the Interior, November 10, 1858.

An ingenious attempt has been made by the counsel for the State of Mississippi to do away with the priority of the grant of this territory to Louisiana before that to Mississippi, by building up a theory that Congress had in view a division of the coast along the gulf of Mexico so as to equalize the water frontage of Alabama, Mississippi, and Louisiana. In order to carry out this theory, reference is made to the southern boundary line of Mississippi, as fixed in the act of December 10, 1817, and the act of March 2, 1819, fixing the southern boundary line of the State of Alabama, in both of which acts islands within six leagues of the shore were granted. The effort is then made to construe these two later acts with the act admitting Louisiana, and to evolve an intention of Congress to limit and control the boundary of Louisiana by the subsequent acts. This is attempted to be done by applying the principle that acts *in paria materi* are to be construed and interpreted together, as expressing the true intent of the law-making power. We do not dispute the proposition that, in the proper interpretation and construction of a law, the intention of the law-maker should be arrived at when there is any obscurity or ambiguity in the letter of the law. This is a maxim of the civil as well as a principle of the common law: "*Scire leges non hoc est verba earum tenere, sed vim ac potestatem*," or, as rendered by Coke-Littleton, 78, "The intendment of law; the true meaning, the correct understanding or intention of the law; a presumption or inference made by the court." In this cause we firmly insist that the principle has no application to the act admitting Louisiana into the Union, because the acts

admitting Mississippi and Louisiana into the Union are not on the same subject-matter, and are therefore not statutes *in pari materia*, because they relate to two entirely different States and two entirely different objects.

"Statutes are *in pari materia* which relate to the same person or thing or to the same class of persons or things, and the phrase is applicable to public statutes or general laws made *at different times and in reference to the same subject. The word 'par' is not to be confounded with the term 'similis;' it is used in opposition to it, as in the expression 'magis pares sunt quam similes,' implying not likeness merely but identity.*"
English and American Encyclopedia of Law, second edition, vol. 26, pp. 621–22. (Italics are our own.)

"*Where Meaning Clear Resort to Other Statutes Generally Improper.*

"*It has been said that the doctrine that statutes in pari materia are to be taken together and construed as one act is resorted to only in cases of doubt, and it is never applicable where a statute is plain and unambiguous;* but clearly this statement is too sweeping, for a resort to other statutes may be necessary to determine the legislative intent in case of a repugnancy between the statutes, or may be used to strengthen conclusions founded on the language of the statutes" (*ibid.*, 623).

Now there is no other statute resorted to in the attempt to explain the repugnancy between the two acts of Congress in regard to the boundaries of Louisiana and Mississippi. The doctrine held in the text that the word "*par* must not be confounded with the term *similis*. It is used in opposition to it as in the expression '*magis pares sunt quam similes*,' intimating not likeness merely, but identity. It is a phrase applicable to general laws or public statutes made at different times in reference to the same subject," is taken from 9 Conn., p. 469, in a case where it was sought to maintain the right of subscribers to stock to withdraw their subscriptions and moneys, after six months' notice, from a particular bank (the Eagle) when there was no such

proviso or clause in its charter, because in the charters of other banks there was such a proviso and clause, and it was argued that the charters of all the banks of the State were *in pari materia*. So in 45 Ala., 535, it was said, quoting from Smith's Comm., page 751, section 636:

"It has been justly said that an argument drawn from a mere similitude of words which are used in relation to a subject entirely different would be a sophism too palpable to need serious reply (7 How., 122, 494)."

In 9th Barb. (N. Y.), 169, the Connecticut case was quoted and the doctrine endorsed, as also 1st Kent, 463, and Lord Mansfield in 1st Douglass, 30, both of which are cited by our opponents in their brief on the subject of "*in pari materia*," but the case only applies the doctrine to "a code of statutes relating to one subject, was governed by one spirit and policy, and was intended to be consistent and harmonious in its several parts and provisions (1 Kent's Comm., 463–464; Smith's Comm., 639)." The same application is made in 59 Barb., 202, in regard to wills and testaments. The court said:

"The design is to carry out the intentions of the laws, and it is a rule that a code of statutes relating to one subject was intended by the legislature to be consistent and harmonious in all its parts and provisions."

So in 7 How. Prac., N. Y., 245, the court said, referring to the Connecticut case:

"Possibly the learned chief justice was a little inaccurate in saying that the word '*par*' denoted identity, but the legal maxim uses it in that sense, and it must be applied accordingly. Now, are the subjects of the two enactments which I am considering identical?"

and decided that they were not. So in 59 Vt., 46, the same doctrine was maintained.

By referring back to the opinion of Attorney General Black, from which we have already quoted, it will be seen

hat in that case where there were two grants from the Jnited States, both of which covered a portion of the terri-ory or swamp lands in dispute, instead of holding that the ater statute would modify or control the earlier grant, At-orney General Black sustained the doctrine that the earlier grant would not be interfered with by the later grant, and such s the case in the cause at bar. The truth to our mind is that his theory of *pari materia* is a mere pretext by which an at-empt is made to reconcile two seemingly conflicting acts of Congress, when the true conclusion to be drawn would seem o be that Congress overlooked the prior grant to Louisiana vhen she made the southern boundary of Mississippi in con-lict with the prior grant. And this ignorance and oversight, f it be such, is not to be wondered at when we consider that a large portion of the Louisiana territory, acquired in 1803, vas almost *terra incognita* to the balance of the people in the Jnited States, having been so recently acquired and being o remote from the National Capital, as well as from the ther States of the Union, for we must bear in mind that, t the time Louisiana and Mississippi were admitted into he Union, steam navigation, on either inland rivers or on ea, was practically unknown, and these districts of our ountry could only be reached by weeks or even months of ravel. Besides this, when Louisiana was admitted into the Jnion by the act of April 6, 1812, the territory, now com-osing the coast counties of Mississippi, that is, below the 31st degree of north latitude, was not a part of the Mississippi erritory, but was in dispute between the United States and Spain, and therefore, when Congress admitted Louisiana into he Union, it could have had no prospective idea that the oundaries fixed for Louisiana could in any way interfere with any future legislation on the admission of new States. The theory, therefore, of any preconcerted design in regard o the water front of Mississippi, when Louisiana was ad-nitted, is entirely unfounded, without any basis and is ntterly fallacious.

VII.

In our former brief the deep-water channel theory was discussed by us only as an alternative, or confirmatory of what we had already said in regard to the boundary of Louisiana, as laid down in the act of Congress. We contended that the principle of the *thalweg* would apply to the arms of the sea, gulfs, sounds, bays, and other similar waters lying between two nations or States and quoted from the various authorities on the subject. In the brief of the associate counsel for Mississippi the point is attempted to be made that this *thalweg* or deep-channel theory is only applicable to interior rivers and is not applicable to sea waters whether of the open sea or arms of the sea. In the quotations which we made from the various authorities on international law, we showed that the reason of the adoption of the *thalweg*, or deep-water theory, to interior rivers was that it was deemed equitable and just that each of the riparian proprietors should have equal facility and advantage in reaching its shore for purposes of commerce.

Halleck, volume 1, chapter 6, page 146, says:

"Where a navigable river forms the boundary of coterminous States the middle of the channel, the *filum aquæ* or *thalweg* is generally taken as the line of their separation, *the presumption of law being that the right of navigation is common to them both.*"

So Sir Shirston Baker, page 68, No. 23, says:

"Where a navigable river forms the boundary of coterminous States the middle of the channel, the *filum aquæ* or *thalweg* is generally taken as the line of their separation, *the presumption of law being that the right of navigation is common to them both.*"

Edward Creecy says, on page 221, No. 230:

"Where a navigable river forms the boundary of coterminous States the middle of the navigable channel, the

lweg, is generally taken as the line of their separation, *the sumption of navigation is given to them both.*"

Indeed, all of the authorities, most of which we have quoted our former brief, give as a reason why the *thalweg* or deep annel, is given as the boundary in rivers, that justice would quire that each riparian proprietor should have the best eans of access, and navigation, to her bank or shore of the er.

We can therefore see no reason, in logic or common sense, y the same rule should not apply to the arms of the sea, ether they be straits, sounds, gulfs, bays, or other portions the sea, and your honors will find in our original brief t Halleck, in No. 25, page 145 of his work on International w, says:

"In such a case, whether the dividing water belongs enely to one State or the boundary is the middle or *thalweg*, ch party gains or loses according as the increase or deease is upon its side. The same rule applies to the gradual noval or formation of islands in the rivers or lakes which vide the sides OR IN THE SEA within the territorial limits the *ligne de respect* of a State bordering upon the ocean."

So Sir Shirston Baker in his "First Steps in International aw" says on page 68, No. 25:

"In such a case, whether the dividing water belongs enely to one State, or the boundary is the middle or *thalweg*, ch party gains or loses according as the increase or deease is upon its side. The same rule applies to the gradl removal or formation of islands in a river or lake which vides States, OR WITHIN THE SEA, within the territorial limits *ligne de respect* of a State bordering upon the ocean. *oreover a State has a certain right of pre-emption to lands rmed adjacent* to its coast, EVEN OUTSIDE OF THIS LINE OF SPECT." (Italics and capitals are our own.)

Puffendorf is quoted by Sir Travers Twiss in his "Law of ations" in paragraph 2, section 174, page 251: "Puffendorf the same effect says 'that GULFS AND CHANNELS OR ARMS

OF THE SEA, are according to the regular course, supposed to belong to the people with whose lands they are encompassed," and Sir Travers Twiss adds :

" But in case the opposite sides of a *bay or strait are inhabited by different nations*, each nation has the right to go to the central line, drawn at low-water mark "—

thus applying the old rule to bays or straits, that the boundary line should be through the middle of the bay or straits, which are parts of the sea, and in the case at bar a a part of the gulf of Mexico.

So Rivier in his " Programme de Droit de Gens," etc., says in section 14, page 46 :

" The frontiers, p. 462 frontier mountains ; actual line, rivers ; the frontier can be on one of the banks (as below in section 13) if it is the bed of the river, it is according to recent treaties, generally the *thalweg*, that is to say the deepest line according to which the thread of the water directs itself. Frontiers in the lakes, IN THE SEA " thus making the *thalweg* theory applicable to arms of the sea. (Capitals are our own.)

So De Martens in his " Droit de Gens " says, No. 39, page 134 :

" That each of the two nations is mistress of the river and the islands which are situated in the middle of the river. * * * In navigable rivers it is the current of the river which is commonly had in view in agreeing to take the middle of the boundary. * * * WHAT WE HAVE JUST SAID IN REGARD TO RIVERS AND LAKES IS EQUALLY APPLICABLE TO THE STRAITS OR GULFS OF THE SEA, especially those which do not exceed the ordinary width of rivers or double the distance that a cannon can carry."

So Pradier Fodéré, in his " Traité de Droit International," etc., says in second volume, page 202 :

" THE LAKES FORMED IN THE IMMEDIATE NEIGHBORHOOD OF THE HIGH SEA.—If the maritime water which bathes the coast is considered to belong to the riparian States *there is still greater reason that the waters which touch the sea should be*

the same, that is to say, if the lakes form in the immediate neighborhood of the sea. These lakes ought to be considered as belonging to the State or to the States in whose territory they lie, under the same conditions that the enclosed seas are all reputed as such, *and as they are generally in communication with or connected with the sea they ought* TO BE CONSIDERED UNDER THE SAME RULES AS INTERNATIONAL RIVERS." (Italics and capitals are our own.)

It will be noted that Fodéré, speaking of lakes, uses the word in the French sense, and applies it to arms of the sea, for he says that they are in communication and connected with the sea, just as Lake Borgne is in this case.

Thus we have shown that these six eminent writers on international law, viz., Halleck, Baker, Twiss, Rivier, De Martens, and Pradier Fodéré, all apply the thalweg theory to rivers, and equally to arms, bays and gulfs of the sea, and in our original brief we have shown on pages 91 *et seq.* that the King of the Netherlands, as arbitrator on our northeastern boundary, applied it to the bays of Fundy and Chaleurs, that Emperor William applied it to the San Juan de Fuca straits, and that the Alaskan boundary arbitration applied it to the Portland canal. Counsel for Mississippi admitted in argument that the Portland canal was an arm of the sea from two and a half to five miles in width, and in Devoe Manufacturing Co., 108 U. S., 401, this honorable court applied the rule to the bay of New York which in some places is ten miles wide. Why then should not the same rule be applied to this narrow strip of water on Lake Borgne and Mississippi sound, where it is only eight or nine miles wide, and why should the inhabitants of Louisiana, if Louisiana was a foreign state or nation, be deprived of that deep-water channel, and be prevented from shipping their lumber, pine products, fruit and other products out to foreign ports through that channel, into the sea or gulf of Mexico.

Mr. Taylor claimed in his oral argument, that this principle of international law, in regard to the thalweg, would not

apply in this case, as it did not apply to other bodies of waters than rivers or lakes. This point we have already argued in this brief, and confidently believe that we have shown that it would apply. He said further that even if the principle would apply to arms of the sea, or the sea, in general cases, it could not apply here, because where there was a special convention or provision, that international law rules would not apply at all in any respect; and that as the act of Congress had laid down a specific boundary, which he called a *land or coast boundary*, in this case, the general principles of international law would not apply. His error consists in saying that there is any land boundary laid down in the act of Congress in the disputed territory. On the contrary it is a *water* boundary, in the words "thence to the gulf of Mexico" and the question here at issue is where is the boundary line in this sheet of water, and therefore it is necessary to resort to the principles of international law to fix where in this Gulf, or its arms, the line should run.

Against all of these authorities which we have collated, counsel for Mississippi neither cite nor quote any authority to the contrary except that, on page 18 of the brief of associate counsel, they say:

"While admitting the application of the doctrine Lord Chief Justice Alverstone was careful to limit it. In replying to Mr. Taylor he said: 'The doctrine of the thalweg applies, but I am bound to say I do not think that even David Dudley Field himself—and Dudley Field was a very great authority, meant to say what you put upon him, because he refers to Bluntschli, *who is there dealing with rivers.*'"

This passing remark of Lord Chief Justice Alverstone, sitting upon the board of arbitration, without argument and without prior and particular research on the question as to the application of the *thalweg*, or deep channel, theory to arms of the sea is the only authority that our opponents have advanced in opposition to the authorities which we have already quoted. It was not necessary, perhaps, for the pur-

ose of the argument before that arbitration commission, to rgue the proposition in regard to arms of the sea or the pen sea, but it is probable that, had the chief justice been onfronted with the authorities which we have now adduced, nd the question properly presented and argued, that he ould have been of the opinion that the principle did apply s well to arms of the sea, sounds, bays, gulfs, and inlets, as does to interior rivers.

And in order to oppose the thalweg or deep channel heory, Mississippi now changes base, and calls the Mississippi sound and Lake Borgne the open sea.

It says in the following paragraphs of its cross-bill (Record, page 85, paragraph VII):

"That the State of Louisiana claims title and sovereignty ver some of the islands belonging to the State of Mississippi by virtue of certain alleged action of certain officers f the United States Government and local officers of the tate of Louisiana, recited in the original bill of complaint erein; your orator charges that said claim to said islands nd territory is not well founded because of the matters erein set forth and because said islands and territory have ot been susceptible to actual use and occupation and because the said claim is in violation of sec. 3, art. IV of the onstitution of the United States prohibiting the transfer f any part of the territory of one State to another adjaent State without the consent of the legislatures of the two tates and of the Congress. However, if this honorable court hould, for any cause or reason, adjudge said islands and erritory approved by the aforesaid officials to the State of ouisiana to belong to said State because of such transfers hen your orator prays that the claim and title of Louisiana hereto be restricted to the real lands or islands so lost to the tate of Mississippi, and be in no case permitted to affect ny lands under the waters, or any of the public oyster eefs thereunder. Your orator alleges and charges that she as exercised sovereignty and jurisdiction over said waters ithin eighteen miles of her shore aforesaid, and that her itizens have enjoyed the same for all lawful purposes since er admission into the Union; that, by her public statutes, odified by authority of her legislature in 1857, she declared

in terms what had hitherto been in fact the southern or water boundaries of her coast counties in art. 2, sec. 2, page 50, Code of 1857; as follows * * * 'and the counties bordering on the gulf of Mexico—to-wit: Jackson, Harrison and Hancock—shall, respectively, have and possess jurisdiction and extend to the southern boundary of the State, within the space embraced, by extending their boundary lines which strike *the gulf of Mexico*, or the inlets thereto, on a continuous direct course *to the southern boundary of the State, including all islands that may lay within the limits thus defined.*'

(Italics ours.)

"By which legislation above referred to, and all other legislation by the Congress and the said State of Mississippi, the '*Mississippi sound*' *was recognized as a body of water, six leagues wide, wholly within the State of Mississippi, from Lake Borgne to the Alabama line, separate and distinct from 'the gulf of Mexico.'*"

Record, page 87, cross-bill, art. IX.

"Your orater alleges and charges that all of the Mississippi territory between Pearl river and the Alabama line was organized on December 14, 1812, into two counties, known as Hancock and Jackson, and that on February 5, 1841, the county of Harrison was organized between the bay of St. Louis and the bay of Biloxi by the segregation of parts of Hancock and Jackson counties. Your orator shows that in an official codification of the statute laws of the State of Mississippi the southern boundaries of said three coast counties are described as follows: Section 44 of the Revised Code of Mississippi of 1880 as to Hancock county says: '* * * thence along the middle of said bay of St. Louis, southwardly to its entrance, thence due south to the southern boundary of the State of Mississippi, *in the gulf of Mexico;* thence westwardly, with said boundary, including all islands within six leagues of the *shores of the gulf of Mexico and Lake Borgne*, to the most eastern junction of Pearl river, and *Lake Borgne*, and to the east mouth of Pearl river; thence up said river, by the middle thereof, to the point of beginning.' (Italics ours.)

"Section 45 of the Code above mentioned describes the southern boundary of Harrison county to the middle of the

bay of Biloxi, and proceeds as follows: '* * * thence along the middle of the said bay of Biloxi to its entrance, at the east end of Deer island; thence due south to the southern boundary of the State of Mississippi; *on the gulf of Mexico;* thence westwardly, along said boundary, to a point from which a line due north strikes the middle of the bay of St. Louis; thence due north to the entrance of said bay including all the islands within six leagues *of the shore of the gulf of Mexico.*' (Italics ours.)

"Section 50 of the Code aforesaid, as to the east and southern boundary line of Jackson county, reads: '* * * thence east, on the line between townships one and two, south, to the State boundary between Alabama and Mississippi; thence southerly, on said boundary *to the gulf of Mexico;* thence westwardly with said boundary to the center of range 9, west; thence north *with section lines* to the beginning.'" (Italics ours.)

"Your orator alleges and shows that in an official codification of her statute laws, taking effect Nov. 1, 1892, and by sections 368, 369 and 374 of said Code, the boundaries of said counties are the same as given in the Code of 1880 above mentioned. Your orator now alleges and charges that the lines, constituting the southern boundaries of the counties aforesaid, in the waters of the gulf of Mexico, are and have been since the formation of Hancock and Jackson counties on Dec. 14, 1812, the consistently and uninterruptedly recognized, fixed, and established, southern boundary of the Mississippi Territory and of the State of Mississippi, up to the time of the controversy referred to in the original bill in this cause of January, 1901, and out of which this litigation grew. That during all of this time the government of the Mississippi Territory and that of the State of Mississippi has exercised all and complete *jurisdiction and sovereignty over the waters in the 'Mississippi sound' as a part of the counties aforesaid.* Your orator shows that the said Mississippi authorities have recognized the 'Mississippi sound' as a part of the Territory of Mississippi, and that her township and section lines are as well established in the waters of the 'Mississippi sound' as indicated by the county boundary aforesaid, as upon the lands within said Territory. That the fishermen of all kinds have been taking fish and oysters in said 'Mississippi sound' during all of this long period, and have been governed, as well as all others using those waters, by the laws and juris-

dictions of the Mississippi Territory and the State of Mississippi and the local authorities in said coast counties. And, your orator alleges and charges the truth to be, that there has never been any adverse claim known to her by the State of Louisiana with reference to the exercise of jurisdiction and sovereignty over those waters until the aforesaid controversy out of which this litigation arose in January, 1901.

"Your orator further shows that this said line was also recognized by the supreme court, and by the lower courts of Mississippi, and a judicial interpretation given by the said courts to the acts of Congress admitting Mississippi in the recent case of Leinhard *et al. v.* Harrison County, decided by our supreme court, January 12, 1903 (not yet reported), in which controversy the issue was as to the center of the said county, and measurements from the eighteen-mile limit in the water were held to have been correctly made."

It will be seen from these extracts from the cross-bill of the respondent, State of Mississippi, that it was claimed that "the Mississippi sound was recognized as a body of water six leagues wide wholly within the State of Mississippi from Lake Borgne to the Alabama line, separate and distinct from the gulf of Mexico." That portion of the answer was framed for the purpose of showing that the boundary line of Louisiana in the clause "to the gulf of Mexico; thence bounded by said gulf to the place of beginning, including all islands within three leagues of the coast," did not mean that the line should run eastward from the mouth of Pearl river through the gulf of Mexico, but, as respondent claimed, that the gulf of Mexico there mentioned meant the gulf of Mexico south of the parish of Saint Bernard, the open gulf, and therefore that the boundary line of Louisiana should run due south towards the open Gulf, south of the peninsula. This position was assumed in order to bolster up the claim of Mississippi to the islands east of a line drawn south from the mouth of the East Pearl river, as well as that portion of the parish of Saint Bernard which it bisected. Indeed, this contention was carried out by the Mississippi map offered in

evidence, called "Mississippi A;" but now, in order to defeat the adoption of the deep-channel or *thalweg* theory, as applied to arms of the sea, opposite counsel now claim that the sea waters, up to the mouth of the East Pearl river, are the gulf of Mexico and the open sea, and, as such, they claim that the deep-water channel or *thalweg* theory will not apply to those waters, as they are a part of the open sea. On pages 17 and 18 of their brief, associate counsel for Mississippi say:

"The moment the sea is reached or a body of water which is a part of the sea, the rule is at an end. So it is beyond all doubt that the rule invoked by complainant as to the flow of the mid-channel or thalweg of the River Iberville (now known as Manchac) to the sea through Lakes Maurepas, Pontchartrain and the Rigolets, expires by its own limitation when such mid-channel reaches Lake Borgne, which, in contemplation of the rule, is the open sea, a part of the waters of the gulf of Mexico. Certainly it was so regarded in the act of April 6, 1812, admitting Louisiana, whose terms are: 'Thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico. The attempt to extend the rule to the estuaries of the river into the open sea, that is into the open waters of the gulf of Mexico, cannot be supported either by reason or authority."

So also on page 19:

"Such a recognition cannot, of course, give countenance to the idea that the doctrine can be extended, *beyond the mouth of an estuary or an arm of the sea*, into the open sea itself, where there are no banks between which channels can flow. The attempt made here by complainant, to extend the doctrine to a channel in the open sea is without precedent or reason to support."

So, in the brief of the attorney general and the assistant attorney general, on page 21, they say:

"The mouth of Pontchartrain was the eastern extremity on that line of the island of New Orleans. That lake was regarded as emptying into the gulf of Mexico at that point."

And so again, on page 22:

"In all these descriptions Pontchartrain opens into the Gulf."

And so again, on page 28:

"Nothing is mentioned between Pontchartrain and the Gulf, although there are two routes some distance apart, and nine or ten miles long, Chef Menteur, and the Rigolets, from Pontchartrain to the Gulf. The map taken for a guide, if any, showed an open, easy connection between Pontchartrain and the next waters, which required no description."

And again, on page 29:

"Again no map can be elected which does not make Pontchartrain open easily into the Gulf. The description stops at the mouth of Pontchartrain and calls those waters the gulf of Mexico."

And again, on page 31:

"In the second place, Ellicott allows a large, free opening from Lake Pontchartrain to the open sea. It does not show the Rigolets, but places the waters of the Gulf next after Pontchartrain going east."

Again, on page 32:

"And if under any view of the case, our conclusion above stated should not be accepted by the court, there remains only an alternative, to wit: the conclusion that the framers of the act used Ellicott's map for a guide. That is the only map which ignores Lake Borgne and the Rigolets, gives Pontchartrain a wide opening into the waters immediately east, and calls these waters the gulf of Mexico; and is the only one which combines all these said peculiar features with a doubtful connection of the Mississippi with Maurepas."

Now it becomes evident that, having abandoned their original pretext, contained in their answer, that the gulf of Mexico, alluded to in the boundary of Louisiana, is not that

part of the gulf of Mexico which is at the mouth of the East Pearl river, and of which Mississippi sound is a part, for the sole purpose of defeating the application of the deep-water channel or *thalweg* theory, and having now admitted that the gulf of Mexico alluded to in the boundary of Louisiana, as being next to the mouth of East Pearl river, is the gulf of Mexico, the open sea through which the boundary runs, they thus admit that the boundary should run through the gulf of Mexico eastward through Lake Borgne and Mississippi sound or what they now call the open sea.

This strip of water, part of Lake Borgne and Mississippi sound, is not an open sea, as contended by associate counsel for Mississippi, but a very shallow arm of the sea, so shallow as to be almost, as the associate counsel of Mississippi described it, "*as only knee deep at tip toe and only eight miles wide*," that is, outside of the deep-water channel. While this is somewhat exaggerated, yet the depth of water throughout this whole body of water is about five feet, on the average, and the channel from ten to twelve feet in depth and less than a quarter of a mile in width.

This, *ex necessitate*, compels the abandonment of their former theory, and their red-line map, extending the Louisiana and Mississippi boundary due south for eighteen miles, from the mouth of the East Pearl river, falls to the ground and is out of the case. Thus this iridescent, school-boy soap-bubble is punctured and collapses by their own admissions and arguments, and figures no longer in the case.

VIII.

Counsel for the State of Mississippi have evidently been much impressed with the argument made by the State of Louisiana that her title to the lands, which the latter claims to belong to her, as a part of the territory of Saint Bernard, has been recognized by the Land Department of the General Government, for they have made an attempt to over-

throw the strength of the position which Louisiana claims she occupies by reason of the recognition thus referred to, by contending, in their brief, that the *lands* composing the parish of Saint Bernard, and which the State of Louisiana acquired from the General Government under the swamp-land act of March 2, 1849, were not lands intended to be disposed of under the terms of that act of the Congress of the United States. The argument is made that the Secretary of the Interior exceeded his authority, and lacked jurisdiction over the subject-matter, when he recognized Louisiana's title to these lands in the parish of Saint Bernard, under the swamp-land act of 1849, by issuing to Louisiana patents to the same. We confess that we are at a loss to understand the argument, thus made, that the Secretary of the Interior and the other officers of the Land Department at the Federal capital, had no jurisdiction in respect to the conveyance to the State of Louisiana of the lands to which she was entitled under the swamp-land act of 1849, as it was made the duty of the Department of the Interior to have all lands of a "swampy and overflowed" character surveyed, subdivided into townships, ranges and sections, and when selected by the State to patent the same to the latter. We repeat, therefore, that we are at a loss to undestand wherein the Land Department of the General Government lacked jurisdiction to carry out the terms of the act of Congress of March 2, 1849. The reason for an attempt being made to show a want of jurisdiction in the Department of the Interior, in respect to these lands, is found in the fact that if jurisdiction be conceded, counsel for the State of Mississippi find themselves confronted by a long line of authorities which hold that the action of the Federal Land Department concerning the character of the lands which it undertakes to dispose of, is conclusive. When the State of Louisiana acquired from the General Government the lands of a "swampy and overflowed" character under the swamp-

land act of 1849, and which composed the parish of Saint Bernard, she derived an indefeasible title from the General Government which, by the various acts of transfer represented by patents issued, the Land Department recognized the State of Louisiana to be entitled to under that act. The Department of the Interior had jurisdiction in the matter, and when it declared, by the issuance of patents, that the State of Louisiana was entitled to what is now the parish of Saint Bernard under the terms of the swamp-land act of March 2, 1849, that department went on record as declaring that that area was lands of a "swampy and overflowed character," and its decision in that matter was conclusive. In Heath *vs.* Wallace, 138 U. S., page 573, this court held that:

"The question whether or not lands returned as subject to periodical overflow 'are swamp and overflowed lands' is a question of fact properly determinable by the Land Department, whose decisions, on matters of fact, within its jurisdiction, are, in the absence of fraud or imposition, conclusive and binding on the courts of the country, and not subject to review here."

And at page 585 this court said:

"It is settled by an unbroken line of decisions by this court in land jurisprudence that the decisions of that department upon matters of fact within its jurisdiction, are, in the absence of fraud or imposition, conclusive and binding upon the courts of the country." (Citing Johnson *vs.* Towsley, 13 Wall., 72; Smelting Company *vs.* Kent, 104 U. S., 636; Steel *vs.* Smelting Company, 106 U. S., 447; United States *vs.* Minor, 114 U. S., 233.)

The court made further announcement that:

"We are of the opinion, therefore, that the decision of the Land Department on the question of the actual physical character of certain lands is not subject to review by the courts." (See also Barden *vs.* Northern Pacific R. R., 154 U. S., pp. 329–330; Shaw *vs.* Kellogg, 170 U. S., 340–343; United States *vs.* Northern Pacific R. R. Co., 177 U. S., 435.)

It has also been held that—

"A decision by the register of the local land office that a particular tract is desert land, so as to be subject to purchase under the desert land act of March 3, 1877, is not reviewable by the courts, in the absence of fraud" (85 Fed. Rep., p. 333).

In that case, at page 336, it is said, after referring to the evidence submitted to the Land Department in respect to the character of certain land:

"It was upon this evidence that the Land Office Department determined that this tract of land was subject to entry under the desert land act. This was in the nature of an adjudication by the proper department of the Government; and without a direct impeachment for fraud of this determination by the department the ascertainment is final and conclusive upon the courts."

Again, in United States *vs.* Budd, 144 U. S., at page 167, this court said:

"But after all, the question is not so much one of law for the courts after the issue of patent, as of fact, in the first instance, for the determination of the land officers. The courts do not revise their determination upon a mere question of fact. In the absence of fraud or some other element to invoke the jurisdiction and powers of a court of equity, the determination of the land officers as to the fact whether the given contract is fit for cultivation, is conclusive."

In French *vs.* Fyan, *et al.*, 93 U. S., 169, it was held that:

"The act of September 28, 1850 (9 Stats., 519) granting swamp lands, makes it the duty of the Secretary of the Interior to identify them, make lists thereof, and cause patents to be issued therefore. Held that a patent so issued cannot be impeached in an action at law, by showing that the land which it conveys was not in fact swamp and overflowed land."

The case of Scott *vs.* Lockey Ind. Co., *et al.*, 60 Fed. Rep., p. 36, absolutely disposes of the argument of op-

posite counsel that no title passed to the land given to the State at the time the Department of the Interior caused patents to be issued to the State of Louisiana, for it was there said :

" In the case of French *v.* Fyan, 93 U. S., 169, the Supreme Court held that the Land Department had the right to determine whether or not land was swamp land. This case should be distinguished from a case where land is absolutely reserved from entry and sale, such as land included in the military reservations. Then there is no jurisdiction in the Land Department to make a sale or conveyance of the same. But when an application is made to enter a certain piece of land, which is not specially reserved from sale by a definite description, and the application is made to enter it as agricultural land, then the Land Department must, of a necessity, determine whether or not it is agricultural land, etc."

While on this same subject, associate counsel for the State of Mississippi make the singular argument, found at page 75 of their brief, when referring to the claim of the State of Louisiana that her title to the lands in Saint Bernard had been recognized by the Land Department at Washington, that " this aspect of the case is not worthy of serious consideration, save so far as it goes to show that the authorities of Louisiana by seeking to acquire color of title to the islands in question by an appeal to the swamp and overflowed land acts were convinced that that State possessed no title to them under the act of April 6, 1812, admitting her into the Union."

This is the most singular argument that we find, among the many strange and peculiar ones, urged in the brief prepared by associate counsel for defendant. The attempt is made, in using the language just quoted, to have it appear that the State of Louisiana, by applying to the General Land Department at Washington for the lands composing the parish of Saint Bernard, under the terms of the swamp land act of 1849, had practically admitted that these lands had not previously been included within the boundary line

of Louisiana, and that, by making application to the Land Department for these lands, she had recognized that she had no right to claim them as being within her boundary under the act of April 6, 1812. Louisiana has at no time claimed that she had *title* to these land until after they had been patented to her under the terms of the swamp land act of 1849, her whole contention being that the same were included within the boundary limits fixed by the act of Congress, admitting her into the Union in 1812. All of these lands, which were of a swampy and overflowed character, had been reserved to the General Government by the enabling act of the Congress of the United States, approved February 20, 1811, entitled:

"An act to enable the people of the Territory of Orleans to form a constitution and State government and for the admission of such State into the Union on an equal footing with the original States, and for other purposes."

By an examination of section 3 of that act, this court will find that it was expressly declared by the Congress of the United States that the people inhabiting all that territory or country ceded under the name of Louisiana by the treaty made at Paris on the 30th day of April, 1803, should, as a condition precedent to their being admitted into the Union as a State, "agree and declare that they forever disclaim all right or title to the *waste and unappropriated* lands lying within the said territory, and that the same shall be and remain at the sole and entire disposal of the United States."

IX.

In his oral argument before this honorable court, Dr. Taylor, the able international jurisconsult, laid down the proposition of international law that the deep-water sailing channel line, through *Mississippi sound*, could not be adopted as the true boundary between the two States in those waters, because such waters were the open sea or gulf of Mexico, or

the high seas; and that if the navies of France and England were to engage in battle there, that no complaint could be made by the Secretary of State of the United States Government because the rights of a neutral government would not have been violated. He makes this statement and yet, in the same breath, says these waters belong to the State of Mississippi, because they are wholly within the domains of that State, a conclusion that would be absolutely at variance with the first proposition. Now the truth is that these waters are wholly within the United States, and belong part to Louisiana and part to Mississippi; that they are inland waters, an inclosed arm of the sea; and the navies of foreign countries could not engage in battle there because there is no opening from this body of water, this Mississippi sound, into the gulf of Mexico, that is six miles wide; and therefore being an estuary, or inland arm of the sea, wholly within the United States, all rules of international law do apply in the fixing of a water boundary such as this, where there is any doubt or confusion in the boundaries given in the acts of Congress creating the two States. The openings above referred to are those between Cat island and Isle à Pitre; between Cat and Ship islands; between Ship and Horn islands; between Horn and Petit Bois islands; between Petit Bois and Dauphin islands and between Dauphin island and the mainland on the west coast of Mobile bay in Alabama. Not one of these openings into the gulf of Mexico or sea is six miles wide, thus making the waters of Mississippi sound, inland waters, an arm of the sea, entirely within the United States.

X.

The attention of the court is called to the fact that the State of Louisiana has United States Government title to Grand or Half Moon island, and Isle à Pitre, islands at different points and immediately to the south of this deep-

water sailing channel boundary, while the State of Mississippi has United States Government title to Cat island and Saint Joseph island, islands at different points immediately to the mouth of this deep-water sailing channel boundary, thus indicating that the two States recognize it in fact as the true boundary.

XI.

The assistant counsel for Mississippi Mr. Flowers, the assistant attorney general of Mississippi attempts in his oral argument as well as in his brief to show, that the Louisiana purchase did not convey any land or territory east of the Mississippi, other than the island of Orleans. The fallacy of this argument is transparent.

There are four distinct reasons why his theory of the Louisiana purchase not including any territory east of the island of Orleans cannot prevail:

1st. If it be true, that the Mississippi line extends to the Lake of the Mounds, as the 6 league limit, that part of Saint Bernard parish lying south of that point, would belong to no State at all.

2d. If it be true, then Louisiana would have no boundary on the gulf of Mexico to the northeast as the act of Congress provides, but its boundary here would be a land boundary adjoining Mississippi's line at the Lake of the Mounds.

3d. It would utterly negative Mr. Jefferson's memoranda, on which Congress is presumed to have acted, that Saint Bernard extended 18 leagues or 54 miles to the eastward from the Mississippi river.

4th. That his theory would negative the American claim that the Louisiana purchase extended along the coast as far as Mobile, and the Perdido river, which claim is supported in 2d Peters, 253, in an able opinion by Marshall, C. J., which

repudiates the present theory of the attorney general of Mississippi.

XII.

The counsel for Mississippi have vainly attempted to reconcile and explain away the clash, conflict, and repugnancy between the acts admitting Louisiana and Mississippi into the Union, in so far as the adjacent islands are concerned. We have shown already that their theories are baseless. But there is one and only one way of reconciling the difference, and that is if we assume that Congress when it passed the Mississippi act was fully conversant with the topography and geography of this portion of the country, it did not intend to include in the grant of the islands within six leagues of the Mississippi shore in 1817, the islands already granted to Louisiana in 1812, but the islands it intended to grant to Mississippi were only those east of the Saint Bernard peninsula, such as Cat, Ship, Horn and Petit Bois islands. This is the only theory which can make the action of Congress consistent in the two acts, on the presumption that it was fully advised of what it was doing.

XIII.—Prescription and Acquiescence.

On pages 23, 24, and 25 of the brief of the attorney general and assistant attorney general of Mississippi there appear citations from the testimony of a formidable array of witnesses who swear that they had always heard and understood from their forebears that the territory in dispute here belonged to Mississippi. Of these twenty-four (24) witnesses fifteen are oyster fishermen who acknowledge that they are engaged in the business of fishing oysters from the disputed territory, and are therefore interested in retaining their livelihood in the Louisiana marshes. These are Clements, the two Fountains, Moran, Tiblier, Lanius, Williams, Anglada, Matthieu, Ryan, the two Beaugezes, Ladner,

Eleuterius, and Lizana. Besides their evident controlling interest in testifying as they did, the frailty of fishermen's testimony has almost become a proverb. Indeed the denial of the Saviour by St. Peter, has been by some attributed to his falling back into his old habit as a fisherman. Of the other witnesses N. Desporte is a dealer in oysters taken from the disputed territory, and Ernest Desporte is his brother. Frear is also a similar dealer; Lizana is an oyster inspector, thus making nineteen of the twenty-four witnesses directly interested in coloring their testimony to suit their interests. And a close inspection of their evidence will show that nearly all of it is given in a stereotyped manner. Of the testimony of the other five witnesses, it is plain that the loss of the right to fish oysters from this territory would materially affect the interests which they possess in the town of Biloxi, which relies in large part on its canning industry and oyster trade for its prosperity. *Per contra*, Governor Heard of Louisiana testified on page 91, Record, that Mr. McDonald, the mayor or ex-mayor of Pass Christian, Mississippi, pointed out to him, Governor Heard, the deep-water channel as the boundary line between Louisiana and Mississippi. Again Mr. E. E. O'Brien, a witness for respondent, mayor of the town of Bay St. Louis, Hancock county, Miss., the county immediately north of the disputed territory, says on page 1661 of the record that the territory has always been called the Louisiana marsh, "but I know since my boyhood I never have known of the place or ever heard of it as anything else except the Louisiana marsh. Q. Was it not the common expression among all of the fishermen, and the people generally that that territory is the Louisiana marsh? A. I have always heard it so mentioned."

And on page 1663:

"Q. Did you understand by that that it belongs to the State of Louisiana, because it is called Louisiana marsh? A. Well my impression would be that way if it is called Louisi-

ana marsh, there must be some reason for giving it that name. Probably they thought it was a portion of Louisiana and extended it on that way to keep it up."

So again Mr. Samuel F. Heaslip, who testifies that he lived in Pass Christian, Mississippi, from the time he was three years old, that is from 1851 to 1866, and again from about 1874 to 1896, that he was at one time quartermaster general of Mississippi, justice of the peace and mayor of the town of Pass Christian:

"Well I have always known it and heard it spoken of as the Louisiana marshes. * * * I never heard them spoken of or referred to except simply as the Louisiana marshes."

He was asked:

"Q. You have heard the fishermen along that coast speak of the territory. A. I would not confine it to the fishermen alone that I heard refer to it."

He says that he visited it from the time he was a boy of 8 or 9 years, and has visited it "I suppose a couple of hundred times or more" (Record, pages 841, 842).

Captain Cowand (page 553), a Mississippian by birth, 65 years of age and partly resident in Mississippi, says:

"In this area here, what is called the Louisiana marshes."

This testimony is confirmed by ten witnesses for Louisiana mentioned on page 111 of our original brief, all of whom have been frequent visitors during the summer on the Mississippi gulf coast—John M. Parker, Alex. Brewster, Emile J. O'Brien, Thomas J. Barr, Associate Justice F. A. Monroe of the supreme court of Louisiana, Capt. Steve Maloche, Judge Lawrence O'Donnell, Oswald Ogden, Dr. Joseph T. Scott, Louis H. Fairchild, Mr. E. H. Farrar and Louis Cucullu, president of People's bank, all gentlemen of the highest respectability and standing, and who have no interest direct or indirect in this controversy.

XIV.

The True Character of the Area in Dispute.

The fact that both sides admit that the area in dispute has been called the Louisiana *marshes* since time immemorial shows that it had this indeterminate character and that it was never regarded as an archipelago of islands. It was only the eastern extremity of this marshy peninsula that had an individual name, that is Isle à Pitre. The small divided sections of the *marshes*, other than Isle à Pitre had no individuality. Quite to the contrary were the conditions existing in regard to the chain of islands forming the southern limits of Mississippi sound, such as Dauphin, Petit Bois, Horn, Ship, and Cat islands, which were distinctly named and appear so designated on the earliest maps of this region. This is but natural because in the very earliest history of this section of the country one of the first settlements was made on Dauphin island, also known from an incident in the early history there as *Massacre island.* Travel to the westward, towards New Orleans, was then made by the inside route, inside of this string of the above-named islands, and New Orleans was reached by the back way through Lake Borgne by Bayou Bienvenu and through Lake Pontchartrain by Bayou St. John. To the people that traveled that route these white sea-sand islands with their pine trees were distinct and well known while the marshes, west of Cat island were given no individuality except to designate them by this generic name.

The impression that assistant counsel for Mississippi try to create in the mind of the court, on page 45 of their brief, that Petit pass, Raccoon island, Little Raccoon island, Crooked island, Mud Cross island, Pirate Point island, Nigger island, Dead Man's island, Shell island, Brush island, Mink island, Wild Goose island, Elephant Point island, Sundown island and Door Point island *were as well known in the past as Cat*

island is absolutely without warrant in the record and the idea is nothing but the creature of their fertile imagination, an imagination that has been even strained in its creative faculty in a desperate effort to bolster up a desperate case. The truth is that prior to the survey made in 1846 by the United States, all the maps show the area to be a part of the *peninsula* of St. Bernard. These bodies of land had no separate identity prior to that date. The official map of Saint Bernard parish is made up from these United States records, and according to that map, in this broad expanse of marshes, but few parts are given individual names, to-wit: Preachers isle, Fly Town island, Turtle or Pen island, and Martin island.

Where then did associate counsel for Mississippi get the names of these islands, which names appear on their map Mississippi Exhibit "A"?

The answer is readily forthcoming—the information did not come from tradition brought down by the testimony of witnesses nor dug up from the past in ancient maps. The information came from the map of the area made in the year 1898, just four years before the institution of this suit, which map was made by Lieutenant Swift and Dr. Moore of the United States Fish Commission, who were in the disputed area on an oyster investigation in February, 1898, and in making their map gave the names of these islands as they were then known in the year 1898. This is shown clearly and conclusively by a comparison of the map Mississippi "A" (Record, page 88) with the Fish Commission map (Record, p. 6, diagram No. 4), and in transferring the names they have even made the mistake of calling *Mud Grass island* Mud *Cross* island. This island appears a little to the left and below the center of the disputed area in the marsh proper as shown on these maps. The names of the bodies of water given on map Mississippi "A" follow the names given on the Fish Commission map made in the year 1898 and are names entirely

different from those given on the United States surveys For instance, a body of water is called " False Month Bay " and " Nine Mile Bay " on the two former maps and the same body of water is called Bay Boudreau on the United States map (Record, page 1047, f 43, plat of T. 12 S., R. 18 E., " Lakes of Bay Boudreau ") and on the Saint Bernard official map (Brief, page 106) " Bay Boudreau."

Before the Fish Commission survey of 1898, such islands as Racoon island, Little Racoon island, Crooked island, Mud Grass island, Nigger island, Dead Man's island, Shell island, Brush island, Mink island, Wild Goose island, Elephant Point island, Sundown island and Door Point island, of those mentioned by Mississippi's counsel and which are in truth mere *marsh hummocks* had not attained the dignity of enjoying individual names.

The very first *island* mentioned by counsel for Mississippi is *Petit Pass island.* Let us see what tradition shows in regard to this island which lies just off Malhereux point on map Mississippi "A," at the middle of the extreme left of this map. It will be noted that it is separated from the main body of the marsh by the strait of water called " Le Petit Pass," and must have come into existence as an island when the strait Le Petit pass was made. Mr. A. S. Cowand, a Mississippian by birth, testified (Record, page 547) to a conversation he had had, in the year 1858, with a man who then was, and whose father before him had been, the light-house keeper at *Cat island.* They were discussing the changes that had occurred in the marshes.

Mr. Cowand was asked :

" Q. What was the tradition in regard to this Petit pass ? "

And answered as follows, referring to his conversation with the Cat Island light-house keeper :

"A. Well, as I was telling you, we were speaking about how the islands were being washed away and disappearing and we were speaking about that country, Half Moon island

especially because I had been there to Half Moon island just before that; he said, Well *I recollect when there was no cut through Petit pass at all, it was the main land all through there.*"

In other words, here is a witness who testifies to a conversation with this light-house keeper within whose lifetime this Petit Pass island came into existence by being separated from the main body of the marsh land. How absurd therefore does the idea prove itself that the Congress of the United States had these marsh islands in mind when it created the State of Mississippi.

XV.

We understand that associate counsel for Mississippi made the statement in oral argument that it was a matter of frequent occurrence for steamboats to go through the marshes. We can hardly credit that they were fully informed of the evidence in the record, if we are correct in understanding them to make this statement.

The only man that ever took a steamboat through a part of the Louisiana marsh, so far as the record shows, was Mr. John Walker, a Mississippi witness, who testified as follows on direct examination:

"Q. Do you know anything about this country that we call the Louisiana marshes?

"A. I know the coast only. I don't know anything about the inside. Not through the marshes, but I am familiar with the coast line.

Q. Are you familiar with the line from Malheureux point to Isle à Pitre?

"A. Yes sir, all the way around from the mouth of the Mississippi river, and from the passes of the river all the way around to Lake Maurepas, *excepting as I say that I have never been in the marsh, except that I have been through Three Mile bayou,* and *once* in the entrance of Nine Mile bayou from the eastward.

"Q. What craft did you have in going through Three Mile bayou?

"A. I had a small steamboat.

"Q. How much did she draw?

"A. Well she only drew about four feet, but I found seven feet of water in there.

"Q. You found seven feet of water where?

"A. *In the entrance.*" (Italics ours.)

Record, page 1271.

And again this witness says (pages 1296 and 1297 of record):

"Q. I understood you to say awhile ago that you had perhaps made two hundred trips between the mouth of Pearl river and Chandeleur sound?

"A. Yes sir. In the 27 years I was there.

"Q. And out of these 200 trips it was only on that one occasion that you went through there?"

Counsel by the word "*there*" was referring to the Louisiana marshes.

The witness then answered:

"A. Only one occasion.

"Q. Through the Louisiana marshes by this route that you have just described?

"A. Yes sir.

"Q. You never went before?

"A. No sir.

"Q. And you have never been through there since?

"A. No sir.

"Q. This route that you have described certainly was not an ordinary route was it. The customary route for people to take?

"A. I was a licensed pilot at the time I was taken through there. It was a route I had never seen or known, and knew nothing about."

The route here referred to was into the Louisiana marshes through Three-mile bayou. The record teems with evidence that Nine-mile bayou claimed by Mississippi to be

Louisiana's eastern boundary was even less well known by Mississippians. To say therefore that steamboats plied through the marshes is an absurdity.

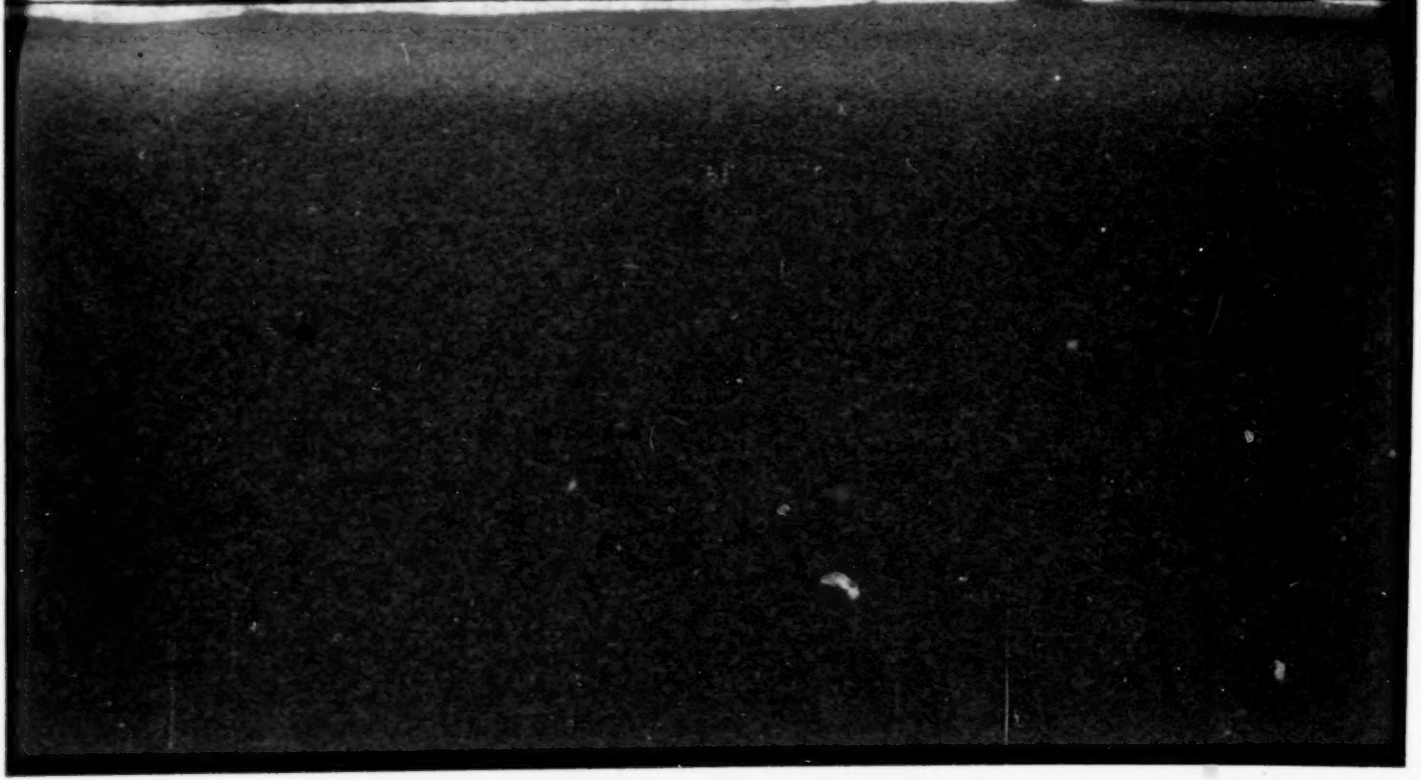
XVI.

We think that after a careful examination of the record in this case, your honors must inevitably come to the conclusion, that Mississippi's claim to the territory in dispute, is of very recent origin. The record teems with evidence that in bygone years the whole Mississippi coast was fringed with valuable oyster reefs and natural beds from the Pearl river to the Alabama line; that although the State of Mississippi passed in 1843 and 1857, and at other dates, some legislation for the protection of its oysters, it was desultory and inefficient and that even these laws were not enforced; that there were no laws to prevent fishing these beds during the spawning season, that is no closed season; no laws to compel culling the young oysters off of the adult oysters; no law to prevent scooping and dredging; that in spite of these inroads which nearly exhausted them, yet the fecundity of the oyster prevented the entire destruction and annihilation of these Mississippi oyster beds. This was until the year 1880, when the first oyster cannery was established on her coast, and it was only after that date, when numerous other large canneries were established, that the enormous demands for oysters for these canneries led to the utter annihilation and destruction of her own oyster beds. It was then in the eighties that the Mississippi fishermen, having exhausted their own oyster beds, invaded the Louisiana territory here in dispute to get their supply of oysters for the Mississippi canneries. The enormous demand which was created by the needs of these canneries, and oyster dealers is well shown by the testimony of one of these canners, a Mississippi witness (Heidenheim, pages 1707 and 1708) when he states that the oyster industries of the Mississippi coast amount to a business of one hundred millions of dollars ($100,000,000). That this Mississippi claim to this disputed territory did not

arise until after this great demand of oysters for the Mississippi canneries is shown by the testimony of some of Mississippi's own witnesses. One of them, L. Fovard (p. 1481, Record), having mentioned places in the disputed territory was asked: "Q. How long has it been your understanding that these places you have mentioned are in the State of Mississippi? A. *About twelve years.*" The italics are our own and show that this witness never had heard of Mississippi's claim until about 1892 although he had for several years before been fishing in the disputed territory. On page 1499 of the record Champlin, a Mississippi witness, testifies that he never heard the matter discussed until 1888. Another Mississippi witness (Bosarge, Record, page 1520), who had been an oyster fisherman for thirty years, says:

"Q. How did you come to know about Mississippi claiming six leagues or 18 miles south of the Mississippi shore? A. When this law came up in 1893, I think it was. Q. You never knew anything about it until 1893? A. No, sir, I never knew anything about the 18 miles until then."

So another Mississippi witness, Cavatochotch (Record, page 1541), testifies that Louisiana and Saint Bernard parish claimed the territory for twenty years back. So McCaleb, another Mississippi witness (on page 1552), testifies that he heard the territory called generally the Louisiana marsh long before this controversy arose. So another Mississippi witness, Patenotte (Record, page 1577), says that it was only in 1903 that he heard of Mississippi's claim to this disputed territory. We might cite and quote from almost any number of Mississippi witnesses' testimony to the same effect, but do not care to burden this brief further with citations and quotations. As to the waste and annihilation of the oyster reefs and beds of Mississippi, we specially invite the attention of the court to Captain Cowand's testimony. Captain Cowand is a skilled oyster culturist, who has devoted his life to the business of the oyster industry and has written a great deal on the subject. He was born on this coast, and lived there all his life, until



quite recently when he moved to Louisiana. His knowledge of the disputed area is probably more profound than that of any witness who testified on either side. On page 559 he (witness) gives an account of how the Mississippi oyster beds were destroyed by dredging and wastefulness between 1885 and 1890, and he says on page 560, speaking of the Mississippi fishermen: "When the oysters in Mississippi sound got so scarce they commenced going over there" (to the disputed territory), and he acknowledges that he was at that time one of the Mississippi "pirates." "That was about 1886 and 1887." (See particularly on this page a description of how the Mississippi oyster reefs were destroyed.) On page 561 of the record he says that he is financially interested on Mississippi's side, because if these Mississippi fishermen were allowed to ruin the Louisiana natural oyster fisheries in this disputed territory, as they had already ruined the Mississippi fisheries, it would benefit him as it would make oysters scarcer, and he could get better prices for his own product from his cultivated beds.

We, therefore, respectfully submit that the present claim of Mississippi is an afterthought, trumped up, to take from Louisiana valuable oyster territory, after her own citizens had ruined and annihilated her own fisheries by wanton wastefulness, and if these Mississippi natural oyster beds and reefs had been properly protected by Mississippi, she would have had now all the oysters she needed within two or three miles of her own coast, and would not have been compelled to go from Biloxi to this disputed area about thirty miles, and Mississippi would never have made her present preposterous claim to Louisiana's territory.

All of which is respectfully submitted.

WALTER GUION,
Attorney General of Louisiana.

Supreme Court of the United States.

OCTOBER TERM, 1905.

IN EQUITY.

No. 11, Original.

STATE OF LOUISIANA, COMPLAINANT,

vs.

STATE OF MISSISSIPPI, DEFENDANT.

OPPOSITION OF THE STATE OF LOUISIANA TO AMEND THE FINAL DECREE AS TO COSTS.

Now comes the State of Louisiana, through Walter Guion, Attorney-General of said State, and F. C. Zacharie and John Dymond, Jr., Associate Counsel, original complainant in this cause and defendant in this motion, and with leave of this Honorable Court, now files the following opposition to the amendment of the decree of this Honorable Court, dated April 23, A. D. 1906, which motion seeks to amend the judgment so "that the costs of this suit be borne equally by the complainant and defendant."

Complainant and opponent in this motion sets forth the following reasons for said opposition. The question involved herein is one of mingled fact and law.

I.

The citation by movers in the motion from Vol. 2 Daniels' Ch. P. & P., page 1165, has no application to the question at issue here, but refers to costs in boundary questions between private individuals and only lays down the rule in such private litigation that "where, however, it does not appear to have been owing to any default, either in the plaintiff or defendant, that the lands have been mixed or confounded, the Court will direct the costs to be borne by plaintiff and defendant equally; though the interest of one party is more inconsiderable than the interest of the other," authorities cited in note, Norris vs. Lanier, 3 Atk. 82. It is apparent that it has no application to the case at bar. On a preceding page (1376) the same author while stating "the giving of costs in equity is entirely discretionary," further states, "all that is meant by this *dictum*, that the giving of costs in equity is entirely discretionary, is, that the Court is not, like the ordinary courts, held inflexibly to the rule of giving the costs of the suit to the successful party; but it will, in awarding costs, take into consideration the circumstances of the particular case before it, or the situation or conduct of the parties, and exercise its discretion with reference to those points." He further says that costs are not regarded as a penalty or punishment, "but as a necessary consequence of a party having created litigation in which he has failed."

It is alleged in said motion that the bill in this cause "was filed to carry out an agreement to prosecute a friendly suit in this Court for the settlement of the boundary in question." Opponents distinctly submit that that suit is not a friendly suit as alleged by movers in this motion. Although on page 15 of the record the *quasi*-commission and committee on the part of Mississippi suggested that "it is apparent that the only hope of settlement is a friendly suit in the Supreme Court of the United States and we respectfully suggest that course," yet the State

of Mississippi through its duly authorized officers claimed that any such agreement was without authority, and repudiated it on the part of the State of Mississippi.

The suit was no sooner filed, than the State of Mississippi, Defendant, filed a demurrer to the jurisdiction of this Honorable Court, and resisted the trial of the cause, and in said demurrer they set forth, as appears on page 67 of the record,

"Ninth. Because it appeared from the face of said bill of complaint that the acts therein complained of are not the acts of the State of Mississippi in its sovereign or corporate capacity, nor acts of any of her officers, committed by her authority, but the acts of certain individual persons engaged in the oyster and fish trade, against whom relief is sought and who are not made parties herein.

"Tenth. Because it appears upon the face of said bill that the State of Mississippi, or any officer of said State authorized by law to act for and on her behalf, has not in any manner whatsoever denied or controverted the boundary line of the State of Louisiana in the waters to the south of the State of Mississippi and to the southeast of the State of Louisiana."

And in the course of the examination of Governor Vardaman of the State of Mississippi, record page 1798, he stated that neither the Governor of the State nor the commission pretending to act on behalf of the State of Mississippi had any authority to enter into any agreement in regard to the subject matter. And on page 1800, he distinctly denies that the former Governor, A. H. Longino, had any authority to appoint the commission which suggested this suit. And on page 1806, he again denied that any such action was binding upon the State of Mississippi. We cannot find on page 14 of the opinion of this Honorable Court as cited by the movers in this motion, nor anywhere else in the opinion of the Court, any declaration that this was a friendly or amicable suit, but on the contrary, as we have already shown, it was anything but a friendly

or amicable suit and the bringing of it was stubbornly resisted by the State of Mississippi, Defendant, in its demurrer.

II.

It is contended by movers in this motion that "it is a firmly settled rule of this Court that in boundary questions between states, the costs are to be equally divided." This proposition opponents especially deny except when applied to the expenses of the commission to be hereafter appointed for the establishment of the marks and bounds, so as to indicate the boundary. To this effect only will the principle of the division of the costs apply. Nor do the authorities cited by movers in this motion bear out the contention set up by them except in a few cases where the peculiar circumstances developed in the case, led to a decree for a division of the costs. But these circumstances were such as to differentiate the cases widely from the case at bar.

The general rule is stated in Couch vs. Millard, 41 Hun. (N. Y.) 212. "It was the rule of the Civil Law that *victis victori in expensis condemnatus est*, and this is the general rule adopted in the Court of Chancery as well as in courts of Law, at least to the extent of throwing it upon the failing party to show the existence of circumstances to displace the *prima facie* claim to costs given by success of the party who prevails."

This is the rule adopted by the courts of Louisiana under the Civil Law: "In an action of boundary, the costs should be equally divided between the parties unless there is proof of demand on one side and refusal on the other to settle the boundary amicably." Tircuit vs. Pelanne, 14 La. Ann. 215. As was the fact in the case at bar in which Louisiana made every attempt to settle the dispute amicably and Mississippi refused so to do.

"Where defendant in an action to fix a boundary, denies the

necessity of the action, costs follow the judgment for plaintiff." Gaude vs. Williams, 47 La. Ann. 1325; 17 So. Rep. 844.

In 7 How. 661, cited by movers in rule, the costs were divided between the States of Iowa and Missouri equally, but the facts were peculiar. The controversy seems to have grown out of an ambiguity in the acts of Congress as to whether the rapids described in the act were the rapids in the river Des Moines or the Mississippi River, although the Act of Congress spoke of the rapids in the river Des Moines, and the Court decided that there were no rapids in the river Des Moines and went behind the Act of Congress and established the boundary line at the old Indian boundary. The controversy thus proceeded out of a misdescription in the Act of Congress and it was therefore only just and equitable that the costs should be divided, neither State being in fault as to its construction of a doubtful clause in the Act of Congress.

In Missouri vs. Iowa, 160 U. S. 688, a division of costs was decreed, that is, the costs of the commissioners "incident to the marking and establishment of this line shall be paid by the States of Missouri and Iowa equally." This principle, we admit as applicable to the costs of a commission hereafter to be appointed in the case at bar for the establishment of the line by metes and bounds.

In Nebraska vs. Iowa, 143 U. S. 370, the Court decreed that "the costs of this suit will be divided between the two States, because the matter involved is one of those governmental questions in which each party has a real and vital, and yet not a litigious interest." This was a case of avulsion, and seems to have been a suit by amicable consent to settle a doubtful question of boundary. The case at bar is not a governmental question, that is, it is not a question whether Louisiana shall exercise jurisdiction over the territory, but is of a litigious character as your Honors say on page 15 of the opinion, "and that controversy involved to each State pecuniary values

of magnitude, as is shown by the evidence on both sides." Thus this cause does not alone consist of governmental exercise over the territory in dispute, but embraces a large pecuniary value, and is therefore a litigitious case.

In Missouri vs. Iowa, 165 U. S. 144, the decree was one confirming a report of commissioners and the costs of the commissioners in establishing the marks, metes, and bounds of the boundary line, were equally divided between the two States.

Tennessee vs. Virginia, 190 U. S. 64, was one confirming the report of commissioners in fixing the boundary line between the two States, but nothing is said about which State or both States should pay the costs of the commission, although it is to be presumed that, as in similar cases, the costs were to be divided between the two States.

Encyclopaedia of Pl. & Pr., Vol. 5, page 186: "*Prima facie*, the prevailing party in cases in equity, as at law, is entitled to receive costs, and it is desirable to depart as little as possible from the rules of law on this subject; but the unsuccessful party may show circumstances to defeat this right," and authorities cited in note 5. It seems to us that the Statutes of the United States cover fully this question.

U. S. Revised Statutes, 2d Ed. 1878, Section 983, page 184: "The bill of fees of the clerk, marshal, and attorney, and the amount paid printers and witnesses and lawful fees for exemplifications and copies of papers necessarily obtained for use on trials whereby law costs are recoverable in favor of the prevailing party, shall be taxed by a judge or clerk of the court, and be included in and form a portion of a judgment or decree against the losing party. Such tax bills shall be filed with the papers in the cause." Act 26 of February 1853, Chap. 80, Section 3, Vol. 10, page 168. The Liverpool Packet, 2nd S. P. R. 37; Lyell vs. Miller, 6 McC. 432.

U. S. Statutes at Large, Chap. 105, page 344: "There shall be taxed against the losing party in each and every cause pend-

ing in the Supreme Court of the United States and the Court of Claims of the United States, the cost of printing the record in such case, which shall be collected, except when the judgment is against the United States, by the clerk of said Courts respectively, and paid into the Treasury of the United States, but this shall only apply to records printed after the first of October next." This act was passed in 1877.

III.

Movers in this motion base their application partly for relief and for a division of the costs on another ground "because the Court has decreed to complainant only a fractional portion of the relief prayed. The final decree denies to complainant an area of water territory claimed many times larger than the land area unsuccessfully claimed by the Defendant." With all due respect to opposing counsel, we cannot appreciate how the fact that the Court does not continue the line of boundary of Louisiana through Cat Island Sound as far south as the channel between the Chandeleur Islands and the mainland, can affect at all the question of costs, inasmuch as the State of Mississippi can have no interest whatsoever in that portion of the decree because the southern boundary of Mississippi is nearly forty miles distant from the Chandeleur Sound, and the controversy which was at issue here only pertained to and included the question of the islands lying between the main coast of Louisiana, that is, the Parish of St. Bernard, and the southern shore and boundary of the State of Mississippi; and to all intents and purposes, the judgment of this Honorable Court has settled and decided all the contentions advanced by the State of Louisiana.

We therefore submit that the motion herein made by the State of Mississippi to divide the costs should be denied, and

that the decree of this Honorable Court should stand as rendered on April 23, 1906.

That decree awarded to Louisiana all of the costs in this litigation and is now final, and the application for a rehearing having been denied, it is, in our opinion, too late to attack as this motion does, a portion of the decree. If such an attack could be made upon the decree for costs, it should have been made in the application for a rehearing or by an application to this Honorable Court to amend the judgment of this Honorable Court in regard to costs.

All of which is respectfully submitted,

WALTER GUION,

Attorney-General of the State of Louisiana.

F. C. ZACHARIE,

JOHN DYMOND, JR., *Associate Counsel.*

vs.

STATE OF MISSISSIPPI, DEFENDANT.

Application for Leave to Demur.

Supreme Court of the United States.

OCTOBER TERM, 1902.

No. 12, Original.

STATE OF LOUISIANA, COMPLAINANT,

versus

STATE OF MISSISSIPPI, DEFENDANT.

Application for Leave to Demur.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States:

Your petitioner, the State of Mississippi, one of the United States of America, by A. H. Longino, Governor, and Monroe McClurg, Attorney General, humbly prays leave to file the sworn demurrer herewith presented, to the bill of complaint in the above entitled cause.

It is humbly represented that in the bill of complaint filed in this court upon the *ex parte* application of the Governor and Attorney General of said State of Louisiana without notice, it is alleged that, because of the matters and things therein set forth, there is a dispute between

the said State of Louisiana and the State of Mississippi as to the boundary line between said States in the waters to the south of the said State of Mississippi, and the southeast of said State of Louisiana; the prayer of said bill is as follows:

> "And after due proceedings may it please your Honors to adjudge and decree that the boundary line dividing the States of Louisiana and Mississippi, in the waters between the said States to the south of the State of Mississippi, and to the southeast of the State of Louisiana is the deep water channel, commencing at the most southern junction of the eastern mouth of Pearl River with Lake Borgne, thence by the deep water channel through Lake Borgne, north of Half Moon Island through Mississippi Sound, north of Isle a'Pitre through Cat Island Pass Channel, southwest of Cat Island through Chandeleur Island Sound, northeast of the Chandeleur Islands to the Gulf of Mexico, as is delineated on the original map submitted by the Louisiana Boundary Commission to the Mississippi Boundary Commission, and now made part of this bill marked Exhibit "E," that the said deep water channel be located throughout its course and permanently buoyed at the joint expense of the two States, that the State of Mississippi and its citizens be perpetually enjoined from disputing the sovereignty and ownership of the State of Louisiana in the said land and water territory south and west of said boundary line, and your orator prays that she may be allowed her costs in this cause expended, and that she may have all such other further and general and equitable relief as the nature of the case may require."

All of which will appear by reference to the said bill of complaint on file with this Honorable Court.

Your petitioner, the State of Mississippi, by her Governor and Attorney General aforesaid, humbly submits to your Honors that, because of the insufficiency and fatal defects of the said bill of complaint indicated by the aforesaid demurrer, even if all of the material and well pleaded allegations of the said bill should be confessed, the said

bill would be ,nevertheless, dismissed on the hearing and that in such case the rule of procedure in this honorable court is to sustain a demurrer and dismiss the bill of complaint.

Kansas v. Colorado, 185 U. S., 126 (145).

Louisiana v. Texas, 176 U. S., 1 (13 et. seq.).

It is humbly submitted that by the most casual examination of the said bill of complaint it will be observed that the boundary line between said States is definitely and permanently fixed by law, at three leagues from the Louisiana coast, and at six leagues from the Mississippi shore, and farther, that there is nothing in said bill contained showing a controversy between said States justiciable in this court.

Wherefore, your petitioner humbly prays leave to file her said demurrer and that a day may be fixed by your Honors for the hearing of the same. And as in duty bound your petitioner will ever pray.

MONROE McCLURG,
Attorney General of Mississippi.

DEMURRER.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The demurrer of the State of Mississippi, defendant, above named, by A. H. Longino, Governor, and Monroe McClurg, Attorney General, of said State of Mississippi, to the bill of complaint of the State of Lousiana by William W. Heard, Governor, and Walter Guion, Attorney General, of said State of Louisiana.

The defendant, the State of Mississippi, by protestation, not confessing or acknowledging all or any of the matters and things in the said complainant's bill to be true in such manner and form as the same are set forth and alleged, demurs thereto and for cause of demurrer shows:

First. Because it doth not sufficiently appear in and by the said bill of complaint that the same was filed or is being prosecuted by the authority of the State of Louisiana, or by the authority of any law whatsoever. The said Governor and Attorney General hath no authority in law to proceed in this matter of their own motion.

Second. This court has no jurisdiction of this cause, because it appears from the face of the bill that the matters complained of do not constitute, within the meaning of the Constitution of the United States, a controversy between the States of Louisiana and Mississippi as to their boundary line, in the waters to the south of the State of Mississippi, and to the southeast of the State of Louisiana.

Third. Because it appears from the face of the bill that the boundary line between said States in the waters to the south of the State of Mississippi, and to the southeast of the State of Louisiana are clearly, definitely and permanintly fixed by the several Acts of Congress referred to and pleaded by the complainant in her said bill admitting the Said States into the Union; that of Louisiana at three leagues from the coast, that of Mississippi at six leagues from her shore; that it is impossible for said lines to conflict upon either land or water.

Fourth. It appears from the face of said bill that the complainant, the State of Louisiana, has not attemped to mark and define by buoys, or otherwise, her boundary line in the waters to the south of the State of Mississippi and to the southeast of the State of Louisiana.

Fifth. Because it appears upon the face of said bill that the action of the Governors of said States in appointing so called commissioners to determine the water boundary line between the said States, and the alleged action and recommendation of the so called commissioners, or of any of them, was without authority of law as to fixing the boundary line between said States and in no wise binding upon either of said States in their sovereign or corporate

capacity, and it clearly appears that it was not so intended. Jurisdiction cannot be conferred by consent.

Sixth. Because said bill shows upon its face that this suit is in reality for, and on behalf of, certain individuals who reside in the State of Louisiana engaged in taking oysters and fish along the coast of said States, and that although the suit is attempted to be prosecuted for and in the name of the State of Louisiana, said State is in fact loaning its name to said individuals, and is only a nominal party to said suit' that the real parties in interest are the said private individuals and persons residing in said State and interested in the oyster and fish trade.

Seventh. Because it appears from the face of said bill that the Governor and Attorney General of the State of Louisiana are seeking to maintain in the sovereign right of said State, this suit for the redress of the supposed wrongs of certain private citizens of said State, namely, those engaged in the oyster and fish trade, while under the Constitution of the United States and the laws enacted thereunder said State possesses no such sovereignty as empowers her to bring an original suit in this court for such purpose.

Eighth. Because it appears upon the face of said bill that no property rights of the State of Louisiana are in any manner affected by the matters alleged in the said bill; nor is there any such property right involved in this suit as would give to this court original jurisdiction of this cause.

Ninth. Because it appears from the face of said bill of complaint that the acts therein complained of are not the acts of the State of Mississippi in its sovereign or corporate capacity, nor acts of any of her officers, committed by her authority, but the acts of certain individual persons engaged in the oyster and fish trade, against whom relief is sought and who are not made parties herein.

Tenth. Because it appears upon the face of said bill that the State of Mississippi, nor any officer of said State

authorized by law to act for and on her behalf, has not in any manner whatsoever denied or controverted the boundary line of the State of Louisiana in the waters to the south of the State of Mississippi and to the southeast of the State of Louisiana.

Eleventh. Because it clearly appears from the face of the said bill of complaint that its purpose is to extend, vary and change, by judicial procedure, the boundary lines between said States in the waters to the south of the State of Mississippi, differently from where they were clearly and permanently fixed by the several Acts of Congress referred to and pleaded in the said bill admitting said States into the Union.

Twelfth. Because it appears upon the face of said bill of complaint that the alleged confusion as to the boundary line between the said States in the waters to the south of the State of Mississippi, and to the southeast of the State of Louisiana, and the alleged threat of an armed conflict between the civil officers of the Parish of St. Bernard, in the State of Louisiana, and of the County of Harrison, in the State of Mississippi, is but a conclusion of the pleader, the facts producing such confusion and threat not being set out in the bill as required by law.

Wherefore, and for divers other good causes of demurrer in the said bill, this defendant demurs thereto and humbly demands the judgment of this court whether she shall be compelled to make any further or other answer to the said bill, and prays to be hence dismissed with her costs and charges in the matter most wrongfully sustained.

MONROE McCLURG,
Attorney General of Mississippi.

THE STATE OF MISSISSIPPI, }
HINDS COUNTY. }

Personally appeared before me the undersigned Clerk of the Supreme Court of the State of Mississippi, A. H. Longino, the Governor of said State, and Monroe McClurg, the Attorney General of said State, representing the said State of Mississippi, defendant, in the above entitled cause, and say that the foregoing demurrer is not interposed for delay and that the same is true in point of fact.

Sworn to and subscribed before me this the 8th day of January, 1903.

A. H. LONGINO, GOVERNOR.
MONROE McCLURG,
ATTORNEY GENERAL.

{ SEAL }

E. W. BROWN,
Clerk of the Supreme Court af Mississippi.

I hereby certify that in my opinion the foregoing demurrer is well founded in point of law.

MONROE McCLURG,
Attorney General of Mississippi.

STATE OF MISSISSIPPI, DEFENDANT.

MOTION.

To the Honorable Chief Justice, and the Honorable Associate Justices:

The State of Mississippi, Defendant, by Andrew H. Longino, Governor, and William Williams, Attorney General, humbly shows as follows, to-wit:

That the State of Louisiana filed her complaint against the State of Mississippi, in this Honorable Court, on the 27th day of October, 1902, praying a decree defining and marking the lines dividing said states in the waters of the Gulf of Mexico; that subpoena was issued, made returnable the 12th day of January, 1903, at which date the State of Mississippi appeared by Monroe McClurg, her then Attorney General, and demurred to the said complaint; that afterwards, to-wit: on the ——day of March, 1903, said demurrer was disallowed and overruled by this Honorable Court, and the State of Mississippi required to answer to the October Term, 1903.

The State of Mississippi herewith humbly presents her answer to said bill of complaint and, according to the usual practice in such cases, accompanies her said answer by a cross-bill making the State of Louisiana defendant thereto. She humbly prays that her said answer and cross-bill may be filed, and that subpoena may be allowed to issue out of this Honorable Court, directed to the Honorable William W. Heard, Governor of the State of Louisiana, and the Honorable Walter Guion, Attorney General of said State, commanding them to appear and answer said cross-bill, upon a day to be named by this Honorable Court.

STATE OF LOUISIANA
v.
STATE OF MISSISSPIPI.

Answer and Cross-Bill.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The answer of the State of Mississippi, one of the United States of America, by Andrew H. Longino, Governor, and William Williams, Attorney General, by leave of this Honorable Court, to the bill of complaint exhibited against said State of Mississippi by the Honorable William W. Heard, Governor, upon the information of Hon. Walter Guion, Attorney General, for and on behalf of the State of Louisiana, also one of the United States of America.

This defendant now and at all times hereafter saving to herself all, and all manner of benefit of exception or otherwise that can or may be had or taken to the many errors, uncertainties and imperfections in the said bill contained, for answer thereto, or to so much thereof as this defendant is advised is material or necessary for her to make answer to, answering says:

I.

To the first paragraph of said bill defendant says that she admits that the State of Louisiana was admitted into the Union by virtue of Chapter 50 of the United States Statues at Large as stated in the Bill of Complaint.

II.

Answering the second paragraph defendant denies that according to the description given in the Act of Congress aforesaid that the said Act meant that it was necessary to reach the Gulf of Mexico through the Rigolets into Lake Borgne, and thence by the deep water channel through the upper corner of Lake Borgne, and to follow said channel, north of Half Moon Island, through the Mississippi Sound to the north of Isle a Pitre through the Cat Island Channel Southwest of Cat Island into the Gulf of Mexico, or that it was intended by said Act that the line above referred to should constitute the eastern boundary line of the State of Louisiana; and defendant denies the correctness of Diagram No. 1, filed as a part of the bill of complaint, but on the contrary thereof defendant alleges that the true intent and purport of said Act of Congress admitting the State of Louisiana into the Union as to the above mentioned line, was and is as stated in the Cross-bill herewith filed.

III.

Answering the third paragraph of said bill of complaint defendant admits that certain territory was added to the State of Louisiana as therein stated.

IV.

Answering the fourth paragraph of the bill of complaint, this defendant denies that the legislation therein referred to had the effect claimed in said paragraph of said bill respecting the boundary line of the State of Louisiana; and she specifically denies that the deep water channel

through the upper corner of Lake Borgne north of Half Moon Island, eastward through the deep water channel along the Mississippi Sound until it reaches the Cat Island Channel north of Isle a Pitre, and southwest of Cat Island, whence, passing through Chandeleur Sound, northeast of Chandeleur Island, it enters the Gulf of Mexico, and runs south around the delta of the Mississippi River, constitutes the true boundary line. And defendant denies the correctness of Diagram No. 2, filed as a part of the bill, but on the contrary thereof charges and alleges that the effect of the legislation aforesaid was to fix the line between said states southward out of the mouth of Pearl River as set forth in the cross-bill herewith filed.

V.

Answering the fifth paragraph of said bill, defendant denies the correctness of the claim of complainant as stated in said bill, but admits that eastward of the line between said states and that point stated in the cross-bill aforesaid, is the State of Mississippi, and that said State of Mississippi was admitted into the Union of the United States by an Act of Congress approved March 1st, 1817, as stated in the bill creating the western part of the then Mississippi Territory into a state and that said state was and is bounded as stated in said Act of Congress.

VI.

Answering the sixth paragraph of the bill, this defendant denies that the said Act of Congress admitting the State of Mississippi into the Union intended that the southern boundary line of said state should be as stated in said bill of complaint, but defendant charges and alleges the true southern boundary line of said State of Mississippi was and is as stated in the cross-bill herewith filed.

VII.

Answering the seventh paragraph of said bill, defendant admits that the west end of Petit Bois Island, all of

Horn Island, all of Ship Island, all of Cat Island and the small islands north of these were intended to be a part of the State of Mississippi, but defendant denies that they are the only islands that belong to the said state and she denies the correctness of Diagram No. 3, filed as a part of the bill.

VIII.

Answering the eighth paragraph of said bill, defendant denies that it was or is contemplated by the Acts of Congress of 1812, aforesaid, creating the State of Louisiana, that all of the other islands except those named in the last paragraph to be south and west of the boundary line between said states described in the bill, were intended to be embraced in the State of Louisiana; and defendant charges and alleges that said line between said states is as stated in the cross-bill.

IX.

The ninth, tenth, eleventh and twelfth paragraphs of the bill are confessed. The thirteenth paragraph of the bill is admitted to be substantially correct so far as this defendant has information or believes the facts to be with reference to the location of the natural oyster reefs shown by the Fish Hawk's map, marked Diagram No. 4 to the bill of complaint, but defendant denies that said reefs are in the waters of St. Bernard Parish, in the State of Louisiana, but on the contrary thereof, are within the waters of the State of Mississippi as set forth and stated in the cross-bill.

X.

Answering the fourteenth paragraph of the bill of complainant, defendant denies the correctness of diagram No. 5, filed as a part of the bill of complaint, and she denies the correctness of the statement in said bill that the true line between the two states in the waters thereof is shown by

said diagram, but on the contrary thereof she again alleges and charges that the true line fixed by the Acts of Congress admitting the said two states into the Union is as stated in the cross-bill.

XI.

Answering the fifteenth paragraph, defendant admits that the line between said states, in the waters aforesaid, has never been marked in any manner by either state; she admits that the deep water channel out of the mouth of Pearl River through the upper corner of Lake Borgne and on into the Gulf, as stated in the bill, has been marked by buoys by and under the direction of the United States Government for navigation and commercial purposes, but she denies that said marking of said deep water channel was ever intended to fix in any manner whatsoever any part of the boundary line between said states.

XII.

Answering the sixteenth paragraph, defendant denies upon her belief that confusion has resulted in the State of Louisiana, or that a great public demand has arisen in that State, for a marked boundary line between that State and the State of Mississippi in the waters aforesaid, but she respectfully insists that if such condition actually existed in said state, it was first the duty of said state to mark, or undertake to mark, the true line dividing it from the State of Mississippi. And defendant, upon her belief, denies that any fisherman or other citizens of the State of Mississippi have violated the laws of Louisiana by fishing in her waters.

XIII.

Answering the seventeenth, eighteenth, nineteenth, twentieth, twenty-first, twenty-second and twenty-third paragraphs of the bill, this defendant admits that proceedings were had similar to those copied into said bill, but

defendant denies the allegations of the bill to the effect that there was any crisis or threatening armed conflict between the officers of Louisiana and those of Mississippi, or that there was any controversy between the two states as contemplated by Article 3, Section 2 of the Constitution of the United States, and this defendant now expressly denies, that the matters and things set forth in the said sections of the bill, last above referred to, constitutes a controversy between the two states within the meaning of the Constitution, and defendant denies that there has ever been such controversy between the two states as to give this court jurisdiction of an original bill to settle the same. And defendant expressly denies the charges found in the second clause, on page 9 of said bill, to the effect that the "Marsh Lands" therein referred to are not islands, but alleges that they are small islands distinctly marked in said waters, and she denies that the people of Mississippi have ever shown a disposition to unlawfully invade the territory of Louisiana, and alleges that they have in fact not done so. Defendant says further that it was never intended by the Governors of said states, respectively, or by the so called Commissioners, appointed by them, as mentioned in the bill of complaint, that said Commissioners should undertake to settle or fix the boundary line between said states in said waters, but only to make a peaceable adjustment of an unimportant dispute by an insignificant number of fish and oyster takers of the two states in the said waters. And defendant denies that the State of Louisiana had exhausted, before the filing of her said bill of complaint, all means whereby the said boundary might be established amicably except for the suggestion made by the so-called Commissioners appointed by the Governor of Mississippi, and she denies that the recommendation of the said Mississippi Commissioners, that a friendly suit in the Supreme Court of the United States be instituted to settle the alleged controversy was sufficient to create a controversy between the two states within the meaning of the constitution of the United States, or to give this court original jurisdiction.

XIV.

Responding to the twenty-fourth paragraph of the bill, the State of Mississippi specificaly denies that the line claimed by the State of Louisiana, to-wit: A line beginning at the most southern junction of the channel of the east branch of the Pearl River with Lake Borgne thence eastward following the deep water channel to the north of Half Moon Island, through the Mississippi Sound Channel, Cat Island Pass, northeast of Isle a Pitre into the Gulf of Mexico, there divides the waters between the two states, or agrees with, or is in accord with the Acts of Congress aforesaid, creating, respectively, the State of Louisiana and the State of Mississippi, as shown by Diagram No. 5 filed with the bill, or in any other manner; and defendant expressly denies the charge contained in the bill, to the effect that any other boundary than the deep water channel as therein described would cause the line in the waters of the two states to conflict and overlap, but on the contrary thereof, defendant charges and alleges, as aforesaid, that the true boundary between the two states in the waters aforesaid, is as stated in the cross-bill herewith filed.

XV.

Answering the twenty-fifth paragraph of the bill, defendant denies the correctness of the construction placed by complainant in her said bill upon the word "westwardly" in describing the southern boundary of the Mississippi line as set forth in said paragraph of said bill of complaint, and she denies that the complainant has, in said paragraph or in said bill, correctly interpreted the intention of Congress as expressed in the Act creating the State of Mississippi with reference to said southern boundary line of said state, and she denies that Congress ever intended, by said Act, that the southern boundary line of the State of Mississippi should be a line drawn from the six league water limit between the States of Alabama and Mississippi in a direct course to the most eastern mouth of Pearl

River, but on the contrary thereof, defendant shows, alleges and charges that it was the purpose and intention of Congress, as clearly shown and expressed in the Act admitting Mississippi into the Union, that her southern boundary line should extend from the six league water limit between said state and Alabama with the meanderings of the shore line to a point six leagues to the southward of the most eastern, or most southern, mouth of Pearl River, and then if such line should, at any point touch the lawful boundary of Louisiana as fixed by the several Acts of Congress, admitting that State into the Union, there would be no lap or conflict, but the Mississippi line would stop at, and follow said Louisiana line. Your defendant alleges and charges the truth to be that a line drawn as contended by the complainant in her said bill from the six league water limit between Alabama and Mississippi, in a direct course to the most eastern mouth of Pearl River, would, in fact, cut off a part of the mainland of Mississippi in Hancock county opposite the Saint Joseph Light House, and defendant reiterates her declaration that the true southern line of said State is as stated in the cross-bill.

XVI.

Defendant admits that the Mississippi line running parallel with the southern shore of Mississippi at a distance of six leagues from the shore line, and following the meandering of the shore at all points between the mouth of Pearl River and the Alabama line would include Grassy, Half Moon, Round, Le Petit Pass Islands and Isle a Pitre, all of which named islands and all other islands within said six league water reach belong, not to the State of Louisiana, but to the State of Mississippi; that the State of Mississippi does not claim and never has claimed any part of the mainland of the State of Louisiana, as shown by Diagram No. 6, filed with the bill, the accuracy and correctness of which diagram she denies, or that she has in any other manner ever made such claim; and she denies

that a line drawn in the waters aforesaid, at three leagues from the high tide marked on the true mainland of the "Coast" of the State of Louisiana, would include the islands last above named; and she alleges and charges that if a line so drawn three leagues from the Louisiana mainland would embrace said islands still they do not belong to the State of Louisiana since such is not the true boundary line between the states of Louisiana and Mississippi, but the said true line is that described in the cross-bill filed herewith.

XVII.

Answering further, and to the twenty-sixth paragraph of complainant's bill, defendant denies that the marsh territory claimed by the State of Mississippi is part of the mainland of the State of Louisiana; she admits that said marsh islands, except the islands named in said paragraph, have been known and called, since time immemorial as the "Louisiana Marshes," even before the State of Louisiana was admitted into the Union, and before the United States acquired the said territory and while the southern portion of Mississippi also was a part of French territory, all known as Louisiana; and she denies that said fact has any significant bearing upon the location of the line between said states or as to the ownership of said states to, or sovereignty over the territory known as the "Louisiana Marshes," no more so than that the parishes of Louisiana north of the River Iberville, known as the "Florida Parishes" would, because of that appellation, entitle the State of Florida to the possession of, and sovereignty over those parishes. And, defendant says if it be true as stated in the twenty-sixth paragraph of the bill that any of the marsh territory rightfully belonging to the State of Mississippi under the Act of Congress admitting her into the Union, have been approved by the General Land Office to the State of Louisiana, such acts by the ministerial offices of the Government had no binding

force or effect as against the State of Mississippi, because such action on the part of said mere ministerial officers by a department of the government, and on the part of the State of Louisiana in accepting said land, would not transfer the title of the State of Mississippi to said lands or her sovereign right to own and exercise jurisdiction over them because it would be a violation of Sec. 3, of Art. IV of the Constitution of the United States, prohibiting the taking of the territory belonging to one State, without the consent of the Legislatures of the states concerned, as well as of the Congress, and defendant alleges and charges that she has exercised jurisdiction and sovereignty over said territory mentioned in said twenty-sixth paragraph of the bill, since she was admitted into the Union.

XVIII.

Responding to the twenty-seventh paragraph of the bill of complaint, defendant denies that any part of the territory claimed by the State of Mississippi is in fact part of the mainland of the State of Louisiana, or that any of said islands referred to in said paragraph claimed by Mississippi are within the nine mile limit of distance from the coast of the State of Louisiana, as contemplated by the Acts of Congress admitting that State into the Union, and she denies that said islands belong to the State of Louisiana by virtue of the second provision of the Act of Congress admitting Louisiana into the Union as stated in said paragraph.

XIX.

Answering the twenty-eighth paragraph of the bill, defendant denies the correctness of complainant's statement that where contiguous states or countries are separated by water, that the channel of the waters dividing said states, constitutes a boundary line, and defendant specifically denies that such rule is applicable to this case; and she denies that there is anything in that portion of her Constitution of 1890, copied into the bill of complaint,

binding her to recognize the channel line insisted upon by the complainant in the instant case.

XX

Answering further, and to the twenty-ninth paragraph of the bill, defendant admits that none of the marsh territory claimed by the State of Mississippi in this matter have ever been assessed on the tax rolls of said state or that any taxes have ever been paid to her on said territory, but she denies that such failure confers any right to the State of Louisiana to said territory; and, she says, that while it may be true that the lands described in said paragraph in said bill have been attempted to be confirmed to the State of Louisiana by the Land Department of the United States Government as belonging to and forming a part of the State of Louisiana, she denies, nevertheless, that these facts have the effect of divesting the title and sovereignty of the State of Mississippi to and over said territory, or to invest the State of Louisiana therewith, and she denies that the people of said two states, especially the people of the State of Mississippi, have recognized the territory mentioned and described in said paragraphs as belonging to the State of Louisiana. Defendant says that while it may be true that the lands composing Half Moon Island and Isle a Pitre and the other territory mentioned in said paragraph have been dealt with as stated in said paragraph, the defendant, nevertheless, insists that her title to and sovereignty over said islands are protected by Sec. 3 of Art. IV. of the Constitution of the United States.

Defendant denies that all parts of the said territory have been assessed by the State of Louisiana, but says that on the contrary only small and separate parts and straggling portions of same have been so assessed by that state. Defendant says that, except as to a small portion of Isle a Pitre, in the whole expanse of this territory there is not a single human habitation, nor is there any animal life thereon, nor can any such be thereon. That it is a

low-lying archipelago of irregular islands, sometimes entirely covered by the high tide and at all times soft and boggy, and to walk upon them is at almost all times impracticable, and no actual occupancy of any kind has ever been had of the said territory except by the boats of fishermen, and this has heretofore been almost exclusively by citizens of Mississippi, and such occupants have always insisted, without serious question heretofore, that all this territory belonged to the State of Mississippi, and defendant expressly states and charges that the alleged dealings with the said territory by the Land Office of the United States, and by the State of Louisiana, were not only without the consent or acquiescence of the State of Mississippi, but wholly without her knowledge.

XXI.

Answering the thirtieth paragraph of said bill, defendant denies the statement therein that all constituted authorities competent to create, adopt or consider the boundary line between the said states in the waters thereof have declared the said line to be as stated in said paragraph, namely: The deep Water Channel running from the most southern junction of the eastern mouth of Pearl River through Lake Borgne, north of Half Moon Island, through Mississippi Sound, north of Isle a Pitre, southwest of Cat Island, through Cat Island Pass, through Chandeleur Sound, northwest of Chandeleur Islands to the Gulf of Mexico, to be the true water boundary between said states, but she alleges and charges again that the true boundary is as alleged in the cross-bill filed herewith.

XXII.

This defendant now states, alleges and charges that in addition to the foregoing specific denials, she denies generally all of the allegations of the bill of complaint adverse to the matters and claims set up in this answer, and

she calls upon the complainant to sustain the allegations of her bill of complaint, if any she can, by strict proof.

Wherefore this defendant having fully answered, confessed, traversed and avoided or denied all the matters in the said bill of complaint material to be answered according to her best knowledge and belief, humbly prays this Honorable Court that the said complainant's bill may be dismissed, and that the defendant have and recover her reasonable costs.

CROSS-BILL.

For cross-complaint and for affirmative relief your orator, the State of Mississippi shows to the Honorable Chief Justice and the Honorable Associate Justices of the Supreme Court of the United States:

I.

That the southern boundary line of the State of Mississippi was certainly and indisputably fixed and designated by Sec. 2, Chapter 23, of the Acts of the Congress of the United States creating said state and approved March 1, 1817, found in Vol. 3, p. 348, of the Statutes at Large as follows:

"*And be it further enacted,* That the said state shall consist of all the territory included within the following boundaries, to-wit: Beginning on the River Mississippi at the point where the southern boundary line of the state of Tennessee strikes the same, thence east along the said boundary line to the Tennessee River, thence up the same to the mouth of Bear Creek, thence by a direct line to the northwest corner of the county of Washington, thence due south to the Gulf of Mexico, thence westwardly, including all the islands within six leagues of the shore, to the most eastern junction of Pearl River with Lake Borgne, thence up said river to the thirty-first degree of

north latitude, thence west along the said degree of latitude to the Mississippi River, thence up the same to the beginning."

II.

Your orator alleges and charges that the purpose and intention of Congress as manifested by said section of the said Act above quoted was to give the State of Mississippi all lands under the waters south of her well defined shore line to the distance of six leagues from said shore at every point between the Alabama line and the most eastern junction of Pearl River with Lake Borgne, including all islands within said limit, and to give to said State of Mississippi sovereignty thereof, and that by virtue of the said Act all territory within said limits, not being a part of the mainland of the State of Louisiana, became, was and is a part of the territory of the State of Mississippi.

III.

Your orator alleges and charges that while the boundary line from the mouth of Pearl River to the Gulf of Mexico is not attempted to be defined and none was established by the Acts mentioned in the Bill of Complaint creating and enlarging the State of Louisiana, yet said boundary line is accurately designated, and defined for the first time and established as and for the permanent southern boundary line of the State of Mississippi by Sec. 2, Chapter 23, of the Acts of Congress approved March 1, 1817, above referred to and quoted, and your orator charges and alleges that said line by the said Act established is the real true southern boundary line of said state in said waters, and that said boundary line begins at a point six leagues due south of that point on the shore where the Alabama and Mississippi line enters the Gulf of Mexico, and runs *westwardly with the meanderings of the said shore* six leagues always therefrom until the said line reaches and touches the real mainland of Louisiana, which real mainland and the first touch thereof, your orator charges, in

the line of high tide thereon about two miles due west of the "Indian Mound" and "Lake of the Mound," (See Chart 192), and thence in an almost due northward direction along and on said high tide mark of the Louisiana mainland to Mississippi Sound at or near Nine Mile Bayou (Chart 190) and thence further along said mainland at the high tide mark westwardly to that point due south of the middle of the most southern or eastern junction of Pearl River with Lake Borgne (Chart 191), and thence from said point due north to the said Pearl River, including all islands and the land under the waters within the said limits, without regard to the name, character or size of said islands, and your orator here now again alleges and charges that the said line so drawn will include no part of the mainland of Louisiana nor any islands or waters that she is lawfully entitled to. Your orator begs leave to refer to Coast Charts Nos. 19, (June 1900), 190, (June 1900), 192, (Sept. 1899), and 191, (June 1900), prepared and promulgated to the public by the United States Coast and Geodetic Survey, Washington, D. C., Henry S. Prichett, Superintendent, for all descriptions herein referred to, the size and character of which Charts make it impracticable to file them as exhibits to this answer and cross-bill, but your orator will file in due time proper copies thereof, now being made, as diagrams Nos. 1, 2, 3 and 4 and made parts hereof.

IV.

That the Acts of 1812 of the Congress, creating the State of Louisiana and otherwise probably correctly defining her boundary line fails, as is conceded by the said state in her original bill filed in this cause, to describe the water line from the most eastern mouth of Pearl River to the Gulf of Mexico; that in order to supply that part of the line between the two points aforesaid, and to make her water boundary line complete, the said complainant, in her said original bill, proposes without authority in law to

follow the deep water channel from the mouth of Pearl river to the Gulf of Mexico, that is, as far south as that point in the sea where the waters of Chandeleur Sound merge into the waters of the Gulf of Mexico.

V.

That the said Act creating the State of Mississippi was only the organization of a state government in the western part of the Mississippi Territory as such Territory had theretofore existed; that the southern part of the Territory of Mississippi was added thereto by an Act of Congress approved May 14, 1812, passed by the same Congress that created the State of Louisiana and within one month of the date of said Acts creating and admitting the State of Louisiana into the Union. The said Act of Congress making the aforesaid addition to the Mississippi Territory is as follows:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That all that portion of territory lying east of Pearl River, west of the Perdido, and south of the thirty-first degree of latitude, be, and the same is hereby annexed to the Mississippi territory; to be governed by the laws now in force therein, or which may hereafter be enacted, and the law and ordinances of the United States, relative thereto, in like manner as if the same had originally formed a part of said territory; and until otherwise provided by law, the inhabitants of the said district hereby annexed to the Mississippi territory, shall be entitled to one representative in the general assemby thereof." U. S. St. at L., Vol. 2, p. 734.

VI.

Your orator humbly shows that the Congress of the UnitedStates,in the enactment of both the statutes relating to the southern part of Mississippi Territory, that is, the Act last above cited, creating that addition to the Missis-

sippi Territory and that creating and admitting into the Union, the State of Mississippi, both of said Acts being subsequent to the passage of the Act creating and admitting into the Union the State of Louisiana, recognized the fact that the boundary line of the State of Louisiana embraced no island in the waters to the east of said state and to the south of the Mississippi mainland, or shore, and within six leagues of the Mississippi shore; that the said Louisiana Acts are not in conflict with the aforesaid Mississippi Acts, the boundaries of Louisiana only embracing such islands, as clearly shown by said Acts creating and admitting her, as were within the Gulf of Mexico and also within three leagues of her Gulf coast, that is to say, within the Gulf of Mexico proper and to the south of said State of Louisiana as contemplated by Congress; that the said line from the mouth of Pearl river to the Gulf of Mexico dividing the territory of Mississippi from the State of Louisiana was never defined until the passage of the Act creating the State of Mississippi, when, *for the first time*, the southern boundary of the Mississippi Territory, the western part of which was, by said Act, made the State of Mississippi, was accurately defined and established as herein stated; that the line above described and defined by the said Mississippi Acts, includes no islands which are within three leagues of the Louisiana mainland and also in the Gulf of Mexico as the limits of the Gulf of Mexico are defined by the said state in her original bill herein.

VI.

Your orator shows that the State of Louisana claims title and sovereignty over some of the islands belonging to the State of Mississippi by virtue of certain alleged action of certain officers of the United States Government and local officers of the State of Louisiana, recited in the original Bill of Complaint herein; your orator charges that said claim to said islands and territory is not well

founded because of the matters herein set forth and because said islands and territory have not been susceptible to actual use and occupation and because said claim is in violation of Sec. 3 Art. IV of the Constitution of the United States prohibiting the transfer of any part of the territory of one state to another adjacent state without the consent of the legislature of the two states, and of the Congress. However, if this Honorable Court shou'd, for any cause or reason, adjudge said islands and territory approved by the aforesaid officials to the State of Louisiana to belong to said state because of such transfers, then your orator prays that the claim and title of Louisiana thereto be restricted to the real lands or islands so lost to the State of Mississippi, and be in no case permitted to affect any lands under the waters, or any of the public oyster reefs thereunder. Your orator alleges and charges that she has exercised sovereignty and jurisdiction over said waters within eighteen miles of her shore aforesaid, and that her citizens have enjoyed the same for all lawful purposes since her admission into the Union; that by her public statutes codified by authority of her legislature in 1857, she declared in terms what had hitherto been in fact the southern or water boundaries of her coast counties in Art. 2, Sec 2, Page 50, Code of 1857; as follows: "* * * and the counties bordering on the Gulf of Mexico—towit: Jackson, Harrison and Hancock—shall, respectively, have and possess jurisdiction and extend to the southern boundary of the State within the space embraced by extending their boundary lines which strike *the Gulf of Mexico*, or the inlets thereto, on a continuous direct course *to the southern boundary of the State, including all islands that may lie within the limits thus defined*".

(Italics ours.)

By which legislation above referred to, and all other legislation by the Congress and the said State of Mississippi, the "Mississippi Sound" was recognized as a body of water, six leagues wide, wholly within the State of Mis-

sissippi, from Lake Borgne to the Alabama line, separate and distinct from "the Gulf of Mexico."

VIII.

That the Congress of the United States, in the early history of the Republic, in dealing with the Gulf Coast or shore and carving states out of the Louisiana purchase, was not perfectly familiar with said coast or shore line, and, as is shown by the several Acts of Congress, creating the Gulf States, respectively, treated the said Gulf coast or shore as a line running generally from east to west, and the said states were intended to be formed and bounded, and, in the contemplation of Congress, were in fact so formed and bounded, as to give to each state jurisdiction over the waters adjacent to its shore or coast for a certain specified distance southward from its mainland line; that it was not intended to give to any state jurisdiction over waters adjacent to and immediately south and in front of any state or territory. But your orator alleges that the deep water channel line contended for by complainant, as indicated by the maps and diagrams filed with the original bill, would take nearly all of the Hancock county water front, much of the Harrison county water front, and possibly some of the Jackson county water front over all of which Mississippi has exercised jurisdiction and sovereignty since she was admitted into the Union.

IX.

Your orator alleges and charges that all of the Mississippi territory between Pearl River and the Alabama line was organized on December 14, 1812, into two counties known as Hancock and Jackson, and that on February 5, 1841 the county of Harrison was organized between the Bay of St. Louis and the Bay of Biloxi by the segregation of parts of Hancock and Jackson counties. Your orator shows that in an official codification of the statute laws of the State of Mississippi the southern boundaries of said three coast counties are described as fol-

lows: Section 44 of the Revised Code of Mississippi of 1880 as to Hancock county says: " * * * thence along the middle of said Bay of St. Louis, southwardly to its entrance, thence due South to the southern boundary of the State of Mississippi, *in the Gulf of Mexico;* thence westwardly, with said boundary, including all islands within six leagues of the *shores of the Gulf of Mexico and Lake Borgne,* to the most eastern junction of Pearl River, and *Lake Borgne,* and to the east mouth of Pearl River; thence up said river, by the middle thereof, to the point of beginning." (Italics ours.)

Section 45 of the code above mentioned describes the southern boundary of Harrison county to the middle of the Bay of Biloxi, and proceeds as follows: " * * * thence along the middle of the said Bay of Biloxi to its entrance, at the east end of Deer Island; thence due south to the southern boundary of the State of Mississippi; *on the Gulf of Mexico;* thence westwardly, along said boundary to a point from which a line due north strikes the middle of the Bay of St. Louis; thence due north to the entrance of said Bay, including all the islands within six leagues *of the shore of the Gulf of Mexico.*" (Italics ours.)

Section 50 of the code aforesaid, as to the east and southern boundary line of Jackson county reads: " * * * thence east, on the line between townships one and two, south, to the state boundary between Alabama and Mississippi; thence southerly, on said boundary, *to the Gulf of Mexico;* thence westwardly with said boundary to the center of range 9, west; thence north *with section lines* to the beginning." (Italics ours.)

Your orator alleges and shows that in an official codification of her statute laws, taking effect Nov. 1, 1892, and by sections 368, 369 and 374 of said code, the boundaries of said counties are the same as given in the Code of 1880 above mentioned. Your orator now alleges and charges that the lines constituting the southern boundaries of the counties aforesaid, in the waters of the Gulf of Mexico,

are and have been since the formation of Hancock and Jackson Counties on Dec. 14, 1812, the consistently and uninterruptedly recognized, fixed and established southern boundary of the Mississippi Territory and of the State of Mississippi up to the time of the controversy referred to in the original bill in this cause of January, 1901, and out of which this litigation grew. That during all of this time the government of the Mississippi Territory and that of the State of Mississippi has exercised full and complete jurisdiction and sovereignty over the waters in the "Mississippi Sound" as a part of the three counties aforesaid. Your orator shows that the said Mississippi authorities have recognized the "Mississippi Sound" as a part of the territory of Mississippi, and that her township and section lines are as well established in the waters of the "Mississippi Sound" as indicated by the county boundary aforesaid, as upon the lands within said territory. That the fishermen of all kinds have been taking fish and oysters in said "Mississippi Sound" during all of this long period, and have been governed, as well as all others using those waters, by the laws and jurisdictions of the Mississippi Territory and the State of Mississippi and the local authorities in said coast counties. And, your orator alleges and charges the truth to be, that there has never been any adverse claim known to her by the State of Louisiana with reference to the exercise of jurisdiction and sovereignty over those waters until the aforesaid controversy out of which this litigation arose in January, 1901.

Your orator further shows that this said line was also recognized by the Supreme Court, and by the lower courts of Mississippi, and a judicial interpretation given by the said courts to the Act of Congress admitting Mississippi in the recent case of *Leinhard et al. v. Harrison County*, decided by our Supreme Court, January 12, 1903, (not yet reported), in which controversy the issue was as to the center of the said county and measurements from the eighteen mile limit in the water were held to have been correctly made.

IX.

Wherefore, your orator, to the end that she may obtain the relief to which she is justly entitled in the premises, prays the Court and Your Honors to grant to her your writ of subpoena, directed to the said State of Louisiana, and to William W. Heard, Governor of the said State of Louisiana, and to Walter Guion, Attorney General of the State of Louisiana, commanding and requiring them and each of them, on a day certain, to appear herein and answer, not under oath, an answer under oath being hereby expressly waived, to the several allegations in this cross-bill contained.

And upon final hearing may it please your Honors to adjudge and decree that the boundary line dividing the States of Mississippi and Louisiana is the line which, beginning at a point six leagues due south of that point on the shore where the Alabama and Mississippi line enters the Gulf of Mexico, runs westwardly with the meanderings of the shore six leagues always therefrom until said line reaches and touches the real mainland of Louisiana about two miles due west of the Indian Mound" and "Lake of the Mound," and thence in an almost due northward direction along and on the high tide mark of the said Louisiana mainland to Mississippi Sound at or near Nine Mile Bayou, and thence further along said mainland at the high tide mark westwardly to that point due south of the middle of the most southern, or eastern junction of Pearl River with Lake Borgne, and thence from said point due north to the said Pearl River; that the said line be located and permanently bouyed at the joint expense of the two states; that the full title and sovereignty over all the islands and the land under the waters north and east of the said line so established be decreed and adjudged to be in the State of Mississippi, and that the State of Louisiana and her citizens be perpetually enjoined from disputing such title and sovereignty of the State of Mississippi therein, and your orator humbly prays for such other and further relief, preliminary and final, as to the Court may seem meet and proper, and which the facts of the case may require, and for costs of suit.

No. 12, Original.

STATE OF LOUISIANA v. STATE OF MISSISSIPPI.	Answer and Cross-Bill.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The answer of the State of Mississippi, one of the United States of America, by Andrew H. Longino, Governor, and William Williams, Attorney General, by leave of this Honorable Court, to the bill of complaint exhibited against said State of Mississippi by the Honorable William W. Heard, Governor, upon the information of Hon. Walter Guion, Attorney General, for and on behalf of the State of Louisiana, also one of the United States of America.

This defendant now and at all times hereafter saving to herself all, and all manner of benefit of exception or otherwise that can or may be had or taken to the many errors, uncertainties and imperfections in the said bill contained, for answer thereto, or to so much thereof as this defendant is advised is material or necessary for her to make answer to, answering says:

I.

To the first paragraph of said bill defendant says that she admits that the State of Louisiana was admitted into the Union by virtue of Chapter 50 of the United States Statues at Large as stated in the Bill of Complaint.

II.

Answering the second paragraph defendant denies that according to the description given in the Act of Congress aforesaid that the said Act meant that it was necessary to reach the Gulf of Mexico through the Rigolets into Lake Borgne, and thence by the deep water channel through the upper corner of Lake Borgne, and to follow said channel, north of Half Moon Island, through the Mississippi Sound to the north of Isle a Pitre through the Cat Island Channel Southwest of Cat Island into the Gulf of Mexico, or that it was intended by said Act that the line above referred to should constitute the eastern boundary line of the State of Louisiana; and defendant denies the correctness of Diagram No. 1, filed as a part of the bill of complaint, but on the contrary thereof defendant alleges that the true intent and purport of said Act of Congress admitting the State of Louisiana into the Union as to the above mentioned line, was and is as stated in the Cross-bill herewith filed.

III.

Answering the third paragraph of said bill of complaint defendant admits that certain territory was added to the State of Louisiana as therein stated.

IV.

Answering the fourth paragraph of the bill of complaint, this defendant denies that the legislation therein referred to had the effect claimed in said paragraph of said bill respecting the boundary line of the State of Louisiana; and she specifically denies that the deep water channel

through the upper corner of Lake Borgne north of Half Moon Island, eastward through the deep water channel along the Mississippi Sound until it reaches the Cat Island Channel north of Isle a Pitre, and southwest of Cat Island, whence, passing through Chandeleur Sound, northeast of Chandeleur Island, it enters the Gulf of Mexico, and runs south around the delta of the Mississippi River, constitutes the true boundary line. And defendant denies the correctness of Diagram No. 2, filed as a part of the bill, but on the contrary thereof charges and alleges that the effect of the legislation aforesaid was to fix the line between said states southward out of the mouth of Pearl River as set forth in the cross-bill herewith filed.

V.

Answering the fifth paragraph of said bill, defendant denies the correctness of the claim of complainant as stated in said bill, but admits that eastward of the line between said states and that point stated in the cross-bill aforesaid, is the State of Mississippi, and that said State of Mississippi was admitted into the Union of the United States by an Act of Congress approved March 1st, 1817, as stated in the bill creating the western part of the then Mississippi Territory into a state and that said state was and is bounded as stated in said Act of Congress.

VI.

Answering the sixth paragraph of the bill, this defendant denies that the said Act of Congress admitting the State of Mississippi into the Union intended that the southern boundary line of said state should be as stated in said bill of complaint, but defendant charges and alleges the true southern boundary line of said State of Mississippi was and is as stated in the cross-bill herewith filed.

VII.

Answering the seventh paragraph of said bill, defendant admits that the west end of Petit Bois Island, all of

Horn Island, all of Ship Island, all of Cat Island and the small islands north of these were intended to be a part of the State of Mississippi, but defendant denies that they are the only islands that belong to the said state and she denies the correctness of Diagram No. 3, filed as a part of the bill.

VIII.

Answering the eighth paragraph of said bill, defendant denies that it was or is contemplated by the Acts of Congress of 1812, aforesaid, creating the State of Louisiana, that all of the other islands except those named in the last paragraph to be south and west of the boundary line between said states described in the bill, were intended to be embraced in the State of Louisiana; and defendant charges and alleges that said line between said states is as stated in the cross-bill.

IX.

The ninth, tenth, eleventh and twelfth paragraphs of the bill are confessed. The thirteenth paragraph of the bill is admitted to be substantially correct so far as this defendant has information or believes the facts to be with reference to the location of the natural oyster reefs shown by the Fish Hawk's map, marked Diagram No. 4 to the bill of complaint, but defendant denies that said reefs are in the waters of St. Bernard Parish, in the State of Louisiana, but on the contrary thereof, are within the waters of the State of Mississippi as set forth and stated in the cross-bill.

X.

Answering the fourteenth paragraph of the bill of complainant, defendant denies the correctness of diagram No. 5, filed as a part of the bill of complaint, and she denies the correctness of the statement in said bill that the true line between the two states in the waters thereof is shown by

said diagram, but on the contrary thereof she again alleges and charges that the true line fixed by the Acts of Congress admitting the said two states into the Union is as stated in the cross-bill.

XI.

Answering the fifteenth paragraph, defendant admits that the line between said states, in the waters aforesaid, has never been marked in any manner by either state; she admits that the deep water channel out of the mouth of Pearl River through the upper corner of Lake Borgne and on into the Gulf, as stated in the bill, has been marked by buoys by and under the direction of the United States Government for navigation and commercial purposes, but she denies that said marking of said deep water channel was ever intended to fix in any manner whatsoever any part of the boundary line between said states.

XII.

Answering the sixteenth paragraph, defendant denies upon her belief that confusion has resulted in the State of Louisiana, or that a great public demand has arisen in that State, for a marked boundary line between that State and the State of Mississippi in the waters aforesaid, but she respectfully insists that if such condition actually existed in said state, it was first the duty of said state to mark, or undertake to mark, the true line dividing it from the State of Mississippi. And defendant, upon her belief, denies that any fisherman or other citizens of the State of Mississippi have violated the laws of Louisiana by fishing in her waters.

XIII.

Answering the seventeenth, eighteenth, nineteenth, twentieth, twenty-first, twenty-second and twenty-third paragraphs of the bill, this defendant admits that proceedings were had similar to those copied into said bill, but

defendant denies the allegations of the bill to the effect that there was any crisis or threatening armed conflict between the officers of Louisiana and those of Mississippi, or that there was any controversy between the two states as contemplated by Article 3, Section 2 of the Constitution of the United States, and this defendant now expressly denies, that the matters and things set forth in the said sections of the bill, last above referred to, constitutes a controversy between the two states within the meaning of the Constitution, and defendant denies that there has ever been such controversy between the two states as to give this court jurisdiction of an original bill to settle the same. And defendant expressly denies the charges found in the second clause, on page 9 of said bill, to the effect that the "Marsh Lands" therein referred to are not islands, but alleges that they are smallislands distinctly marked in said waters, and she denies that the people of Mississippi have ever shown a disposition to unlawfully invade the territory of Louisiana, and alleges that they have in fact not done so. Defendant says further that it was never intended by the Governors of said states, respectively, or by the so called Commissioners, appointed by them, as mentioned in the bill of complaint, that said Commissioners should undertake to settle or fix the boundary line between said states in said waters, but only to make a peaceable adjustment of an unimportant dispute by an insignificant number of fish and oyster takers of the two states in the said waters. And defendant denies that the State of Louisiana had exhausted, before the filing of her said bill of complaint, all means whereby the said boundary might be established amicably except for the suggestion made by the so-called Commissioners appointed by the Governor of Mississippi, and she denies that the recommendation of the said Mississippi Commissioners, that a friendly suit in the Supreme Court of the United States be instituted to settle the alleged controversy was sufficient to create a controversy between the two states within the meaning of the constitution of the United States, or to give this court original jurisdiction.

XIV.

Responding to the twenty-fourth paragraph of the bill, the State of Mississippi specificaly denies that the line claimed by the State of Louisiana, to-wit: A line beginning at the most southern junction of the channel of the east branch of the Pearl River with Lake Borgne thence eastward following the deep water channel to the north of Half Moon Island, through the Mississippi Sound Channel, Cat Island Pass, northeast of Isle a Pitre into the Gulf of Mexico, there divides the waters between the two states, or agrees with, or is in accord with the Acts of Congress aforesaid, creating, respectively, the State of Louisiana and the State of Mississippi, as shown by Diagram No. 5 filed with the bill, or in any other manner; and defendant expressly denies the charge contained in the bill, to the effect that any other boundary than the deep water channel as therein described would cause the line in the waters of the two states to conflict and overlap, but on the contrary thereof, defendant charges and alleges, as aforesaid, that the true boundary between the two states in the waters aforesaid, is as stated in the cross-bill herewith filed.

XV.

Answering the twenty-fifth paragraph of the bill, defendant denies the correctness of the construction placed by complainant in her said bill upon the word "westwardly" in describing the southern boundary of the Mississippi line as set forth in said paragraph of said bill of complaint, and she denies that the complainant has, in said paragraph or in said bill, correctly interpreted the intention of Congress as expressed in the Act creating the State of Mississippi with reference to said southern boundary line of said state, and she denies that Congress ever intended, by said Act, that the southern boundary line of the State of Mississippi should be a line drawn from the six league water limit between the States of Alabama and Mississippi in a direct course to the most eastern mouth of Pearl

River, but on the contrary thereof, defendant shows, alleges and charges that it was the purpose and intention of Congress, as clearly shown and expressed in the Act admitting Mississippi into the Union, that her southern boundary line should extend from the six league water limit between said state and Alabama with the meanderings of the shore line to a point six leagues to the southward of the most eastern, or most southern, mouth of Pearl River, and then if such line should, at any point touch the lawful boundary of Louisiana as fixed by the several Acts of Congress, admitting that State into the Union, there would be no lap or conflict, but the Mississippi line would stop at, and follow said Louisiana line. Your defendant alleges and charges the truth to be that a line drawn as contended by the complainant in her said bill from the six league water limit between Alabama and Mississippi, in a direct course to the most eastern mouth of Pearl River, would, in fact, cut off a part of the mainland of Mississippi in Hancock county opposite the Saint Joseph Light House, and defendant reiterates her declaration that the true southern line of said State is as stated in the cross-bill.

XVI.

Defendant admits that the Mississippi line running parallel with the southern shore of Mississippi at a distance of six leagues from the shore line, and following the meandering of the shore at all points between the mouth of Pearl River and the Alabama line would include Grassy, Half Moon, Round, Le Petit Pass Islands and Isle a Pitre, all of which named islands and all other islands within said six league water reach belong, not to the State of Louisiana, but to the State of Mississippi; that the State of Mississippi does not claim and never has claimed any part of the mainland of the State of Louisiana, as shown by Diagram No. 6, filed with the bill, the accuracy and correctness of which diagram she denies, or that she has in any other manner ever made such claim; and she denies

that a line drawn in the waters aforesaid, at three leagues from the high tide marked on the true mainland of the "Coast" of the State of Louisiana, would include the islands last above named; and she alleges and charges that if a line so drawn three leagues from the Louisiana mainland would embrace said islands still they do not belong to the State of Louisiana since such is not the true boundary line between the states of Louisiana and Mississippi, but the said true line is that described in the cross-bill filed herewith.

XVII.

Answering further, and to the twenty-sixth paragraph of complainant's bill, defendant denies that the marsh territory claimed by the State of Mississippi is part of the mainland of the State of Louisiana; she admits that said marsh islands, except the islands named in said paragraph, have been known and called, since time immemorial as the "Louisiana Marshes," even before the State of Louisiana was admitted into the Union, and before the United States acquired the said territory and while the southern portion of Mississippi also was a part of French territory, all known as Louisiana; and she denies that said fact has any significant bearing upon the location of the line between said states or as to the ownership of said states to, or sovereignty over the territory known as the "Louisiana Marshes," no more so than that the parishes of Louisiana north of the River Iberville, known as the "Florida Parishes" would, because of that appellation, entitle the State of Florida to the possession of, and sovereignty over those parishes. And, defendant says if it be true as stated in the twenty-sixth paragraph of the bill that any of the marsh territory rightfully belonging to the State of Mississippi under the Act of Congress admitting her into the Union, have been approved by the General Land Office to the State of Louisiana, such acts by the ministerial offices of the Government had no binding

force or effect as against the State of Mississippi, because such action on the part of said mere ministerial officers by a department of the government, and on the part of the State of Louisiana in accepting said land, would not transfer the title of the State of Mississippi to said lands or her sovereign right to own and exercise jurisdiction over them because it would be a violation of Sec. 3, of Art. IV of the Constitution of the United States, prohibiting the taking of the territory belonging to one State, without the consent of the Legislatures of the states concerned, as well as of the Congress, and defendant alleges and charges that she has exercised jurisdiction and sovereignty over said territory mentioned in said twenty-sixth paragraph of the bill, since she was admitted into the Union.

XVIII.

Responding to the twenty-seventh paragraph of the bill of complaint, defendant denies that any part of the territory claimed by the State of Mississippi is in fact part of the mainland of the State of Louisiana, or that any of said islands referred to in said paragraph claimed by Mississippi are within the nine mile limit of distance from the coast of the State of Louisiana, as contemplated by the Acts of Congress admitting that State into the Union, and she denies that said islands belong to the State of Louisiana by virtue of the second provision of the Act of Congress admitting Louisiana into the Union as stated in said paragraph.

XIX.

Answering the twenty-eighth paragraph of the bill, defendant denies the correctness of complainant's statement that where contiguous states or countries are separated by water, that the channel of the waters dividing said states, constitutes a boundary line, and defendant specifically denies that such rule is applicable to this case; and she denies that there is anything in that portion of her Constitution of 1890, copied into the bill of complaint,

binding her to recognize the channel line insisted upon by the complainant in the instant case.

XX.

Answering further, and to the twenty-ninth paragraph of the bill, defendant admits that none of the marsh territory claimed by the State of Mississippi in this matter have ever been assessed on the tax rolls of said state or that any taxes have ever been paid to her on said territory, but she denies that such failure confers any right to the State of Louisiana to said territory; and, she says, that while it may be true that the lands described in said paragraph in said bill have been attempted to be confirmed to the State of Louisiana by the Land Department of the United States Government as belonging to and forming a part of the State of Louisiana, she denies, nevertheless, that these facts have the effect of divesting the title and sovereignty of the State of Mississippi to and over said territory, or to invest the State of Louisiana therewith, and she denies that the people of said two states, especially the people of the State of Mississippi, have recognized the territory mentioned and described in said paragraphs as belonging to the State of Louisiana. Defendant says that while it may be true that the lands composing Half Moon Island and Isle a Pitre and the other territory mentioned in said paragraph have been dealt with as stated in said paragraph, the defendant, nevertheless, insists that her title to and sovereignty over said islands are protected by Sec. 3 of Art. IV. of the Constitution of the United States.

Defendant denies that all parts of the said territory have been assessed by the State of Louisiana, but says that on the contrary only small and separate parts and straggling portions of same have been so assessed by that state. Defendant says that, except as to a small portion of Isle a Pitre, in the whole expanse of this territory there is not a single human habitation, nor is there any animal life thereon, nor can any such be thereon. That it is a

low-lying archipelago of irregular islands, sometimes entirely covered by the high tide and at all times soft and boggy, and to walk upon them is at almost all times impracticable, and no actual occupancy of any kind has ever been had of the said territory except by the boats of fishermen, and this has heretofore been almost exclusively by citizens of Mississippi, and such occupants have always insisted, without serious question heretofore, that all this territory belonged to the State of Mississippi, and defendant expressly states and charges that the alleged dealings with the said territory by the Land Office of the United States, and by the State of Louisiana, were not only without the consent or acquiescence of the State of Mississippi, but wholly without her knowledge.

XXI.

Answering the thirtieth paragraph of said bill, defendant denies the statement therein that all constituted authorities competent to create, adopt or consider the boundary line between the said states in the waters thereof have declared the said line to be as stated in said paragraph, namely: The deep Water Channel running from the most southern junction of the eastern mouth of Pearl River through Lake Borgne, north of Half Moon Island, through Mississippi Sound, north of Isle a Pitre, southwest of Cat Island, through Cat Island Pass, through Chandeleur Sound, northwest of Chandeleur Islands to the Gulf of Mexico, to be the true water boundary between said states, but she alleges and charges again that the true boundary is as alleged in the cross-bill filed herewith.

XXII.

This defendant now states, alleges and charges that in addition to the foregoing specific denials, she denies generally all of the allegations of the bill of complaint adverse to the matters and claims set up in this answer, and

she calls upon the complainant to sustain the allegations of her bill of complaint, if any she can, by strict proof.

Wherefore this defendant having fully answered, confessed, traversed and avoided or denied all the matters in the said bill of complaint material to be answered according to her best knowledge and belief, humbly prays this Honorable Court that the said complainant's bill may be dismissed, and that the defendant have and recover her reasonable costs.

CROSS-BILL.

For cross-complaint and for affirmative relief your orator, the State of Mississippi shows to the Honorable Chief Justice and the Honorable Associate Justices of the Supreme Court of the United States:

I.

That the southern boundary line of the State of Mississippi was certainly and indisputably fixed and designated by Sec. 2, Chapter 23, of the Acts of the Congress of the United States creating said state and approved March 1, 1817, found in Vol. 3, p. 348, of the Statutes at Large as follows:

"*And be it further enacted,* That the said state shall consist of all the territory included within the following boundaries, to-wit: Beginning on the River Mississippi at the point where the southern boundary line of the state of Tennessee strikes the same, thence east along the said boundary line to the Tennessee River, thence up the same to the mouth of Bear Creek, thence by a direct line to the northwest corner of the county of Washington, thence due south to the Gulf of Mexico, thence westwardly, including all the islands within six leagues of the shore, to the most eastern junction of Pearl River with Lake Borgne, thence up said river to the thirty-first degree of

north latitude, thence west along the said degree of latitude to the Mississippi River, thence up the same to the beginning."

II.

Your orator alleges and charges that the purpose and intention of Congress as manifested by said section of the said Act above quoted was to give the State of Mississippi all lands under the waters south of her well defined shore line to the distance of six leagues from said shore at every point between the Alabama line and the most eastern junction of Pearl River with Lake Borgne, including all islands within said limit, and to give to said State of Mississippi sovereignty thereof, and that by virtue of the said Act all territory within said limits, not being a part of the mainland of the State of Louisiana, became, was and is a part of the territory of the State of Mississippi.

III.

Your orator alleges and charges that while the boundary line from the mouth of Pearl River to the Gulf of Mexico is not attempted to be defined and none was established by the Acts mentioned in the Bill of Complaint creating and enlarging the State of Louisiana, yet said boundary line is accurately designated, and defined for the first time and established as and for the permanent southern boundary line of the State of Mississippi by Sec. 2, Chapter 23, of the Acts of Congress approved March 1, 1817, above referred to and quoted, and your orator charges and alleges that said line by the said Act established is the real true southern boundary line of said state in said waters, and that said boundary line begins at a point six leagues due south of that point on the shore where the Alabama and Mississippi line enters the Gulf of Mexico, and runs *westwardly with the meanderings of the said shore* six leagues always therefrom until the said line reaches and touches the real mainland of Louisiana, which real mainland and the first touch thereof, your orator charges, in

the line of high tide thereon about two miles due west of the "Indian Mound" and "Lake of the Mound," (See Chart 192), and thence in an almost due northward direction along and on said high tide mark of the Louisiana mainland to Mississippi Sound at or near Nine Mile Bayou (Chart 190) and thence further along said mainland at the high tide mark westwardly to that point due south of the middle of the most southern or eastern junction of Pearl River with Lake Borgne (Chart 191), and thence from said point due north to the said Pearl River, including all islands and the land under the waters within the said limits, without regard to the name, character or size of said islands, and your orator here now again alleges and charges that the said line so drawn will include no part of the mainland of Louisiana nor any islands or waters that she is lawfully entitled to. Your orator begs leave to refer to Coast Charts Nos. 19, (June 1900), 190, (June 1900), 192, (Sept. 1899), and 191, (June 1900), prepared and promulgated to the public by the United States Coast and Geodetic Survey, Washington, D. C., Henry S. Prichett, Superintendent, for all descriptions herein referred to, the size and character of which Charts make it impracticable to file them as exhibits to this answer and cross-bill, but your orator will file in due time proper copies thereof, now being made, as diagrams Nos. 1, 2, 3 and 4 and made parts hereof.

IV.

That the Acts of 1812 of the Congress, creating the State of Louisiana and otherwise probably correctly defining her boundary line fails, as is conceded by the said state in her original bill filed in this cause, to describe the water line from the most eastern mouth of Pearl River to the Gulf of Mexico; that in order to supply that part of the line between the two points aforesaid, and to make her water boundary line complete, the said complainant, in her said original bill, proposes without authority in law to

follow the deep water channel from the mouth of Pearl river to the Gulf of Mexico, that is, as far south as that point in the sea where the waters of Chandeleur Sound merge into the waters of the Gulf of Mexico.

V.

That the said Act creating the State of Mississippi was only the organization of a state government in the western part of the Mississippi Territory as such Territory had theretofore existed; that the southern part of the Territory of Mississippi was added thereto by an Act of Congress approved May 14, 1812, passed by the same Congress that created the State of Louisiana and within one month of the date of said Acts creating and admitting the State of Louisiana into the Union. The said Act of Congress making the aforesaid addition to the Mississippi Territory is as follows:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That all that portion of territory lying east of Pearl River, west of the Perdido, and south of the thirty-first degree of latitude, be, and the same is hereby annexed to the Mississippi territory; to be governed by the laws now in force therein, or which may hereafter be enacted, and the law and ordinances of the United States, relative thereto, in like manner as if the same had originally formed a part of said territory; and until otherwise provided by law, the inhabitants of the said district hereby annexed to the Mississippi territory, shall be entitled to one representative in the general assemby thereof." U. S. St. at L., Vol. 2, p. 734.

VI.

Your orator humbly shows that the Congress of the UnitedStates,in the enactment of both the statutes relating to the southern part of Mississippi Territory, that is, the Act last above cited, creating that addition to the Missis-

sippi Territory and that creating and admitting into the Union, the State of Mississippi, both of said Acts being subsequent to the passage of the Act creating and admitting into the Union the State of Louisiana, recognized the fact that the boundary line of the State of Louisiana embraced no island in the waters to the east of said state and to the south of the Mississippi mainland, or shore, and within six leagues of the Mississippi shore; that the said Louisiana Acts are not in conflict with the aforesaid Mississippi Acts, the boundaries of Louisiana only embracing such islands, as clearly shown by said Acts creating and admitting her, as were within the Gulf of Mexico and also within three leagues of her Gulf coast, that is to say, within the Gulf of Mexico proper and to the south of said State of Louisiana as contemplated by Congress; that the said line from the mouth of Pearl river to the Gulf of Mexico dividing the territory of Mississippi from the State of Louisiana was never defined until the passage of the Act creating the State of Mississippi, when, *for the first time*, the southern boundary of the Mississippi Territory, the western part of which was, by said Act, made the State of Mississippi, was accurately defined and established as herein stated; that the line above described and defined by the said Mississippi Acts, includes no islands which are within three leagues of the Louisiana mainland and also in the Gulf of Mexico as the limits of the Gulf of Mexico are defined by the said state in her original bill herein.

VII.

Your orator shows that the State of Louisana claims title and sovereignty over some of the islands belonging to the State of Mississippi by virtue of certain alleged action of certain officers of the United States Government and local officers of the State of Louisiana, recited in the original Bill of Complaint herein; your orator charges that said claim to said islands and territory is not well

founded because of the matters herein set forth and because said islands and territory have not been susceptible to actual use and occupation and because said claim is in violation of Sec. 3 Art. IV of the Constitution of the United States prohibiting the transfer of any part of the territory of one state to another adjacent state without the consent of the legislature of the two states, and of the Congress. However, if this Honorable Court should, for any cause or reason, adjudge said islands and territory approved by the aforesaid officials to the State of Louisiana to belong to said state because of such transfers, then your orator prays that the claim and title of Louisiana thereto be restricted to the real lands or islands so lost to the State of Mississippi, and be in no case permitted to affect any lands under the waters, or any of the public oyster reefs thereunder. Your orator alleges and charges that she has exercised sovereignty and jurisdiction over said waters within eighteen miles of her shore aforesaid, and that her citizens have enjoyed the same for all lawful purposes since her admission into the Union; that by her public statutes codified by authority of her legislature in 1857, she declared in terms what had hitherto been in fact the southern or water boundaries of her coast counties in Art. 2, Sec 2, Page 50, Code of 1857; as follows: "* * * and the counties bordering on the Gulf of Mexico—towit: Jackson, Harrison and Hancock—shall, respectively, have and possess jurisdiction and extend to the southern boundary of the State within the space embraced by extending their boundary lines which strike *the Gulf of Mexico*, or the inlets thereto, on a continuous direct course *to the southern boundary of the State, including all islands that may lie within the limits thus defined*".

(Italics ours.)

By which legislation above referred to, and all other legislation by the Congress and the said State of Mississippi, the "Mississippi Sound" was recognized as a body of water, six leagues wide, wholly within the State of Mis-

sissippi, from Lake Borgne to the Alabama line, separate and distinct from "the Gulf of Mexico."

VIII.

That the Congress of the United States, in the early history of the Republic, in dealing with the Gulf Coast or shore and carving states out of the Louisiana purchase, was not perfectly familiar with said coast or shore line, and, as is shown by the several Acts of Congress, creating the Gulf States, respectively, treated the said Gulf coast or shore as a line running generally from east to west, and the said states were intended to be formed and bounded, and, in the contemplation of Congress, were in fact so formed and bounded, as to give to each state jurisdiction over the waters adjacent to its shore or coast for a certain specified distance southward from its mainland line; that it was not intended to give to any state jurisdiction over waters adjacent to and immediately south and in front of any other state or territory. But your orator alleges that the deep water channel line contended for by complainant, as indicated by the maps and diagrams filed with the original bill, would take nearly all of the Hancock county water front, much of the Harrison county water front, and possibly some of the Jackson county water front over all of which Mississippi has exercised jurisdiction and sovereignty since she was admitted into the Union.

IX.

Your orator alleges and charges that all of the Mississippi territory between Pearl River and the Alabama line was organized on December 14, 1812, into two counties known as Hancock and Jackson, and that on February 5, 1841 the county of Harrison was organized between the Bay of St. Louis and the Bay of Biloxi by the segregation of parts of Hancock and Jackson counties. Your orator shows that in an official codification of the statute laws of the State of Mississippi the southern boundaries of said three coast counties are described as fol-

lows: Section 44 of the Revised Code of Mississippi of 1880 as to Hancock county says: " * * * thence along the middle of said Bay of St. Louis, southwardly to its entrance, thence due South to the southern boundary of the State of Mississippi, *in the Gulf of Mexico;* thence westwardly, with said boundary, including all islands within six leagues of the *shores of the Gulf of Mexico and Lake Borgne,* to the most eastern junction of Pearl River, and *Lake Borgne,* and to the east mouth of Pearl River; thence up said river, by the middle thereof, to the point of beginning." (Italics ours.)

Section 45 of the code above mentioned describes the southern boundary of Harrison county to the middle of the Bay of Biloxi, and proceeds as follows: " * * * thence along the middle of the said Bay of Biloxi to its entrance, at the east end of Deer Island; thence due south to the southern boundary of the State of Mississippi; *on the Gulf of Mexico;* thence westwardly, along said boundary to a point from which a line due north strikes the middle of the Bay of St. Louis; thence due north to the entrance of said Bay, including all the islands within six leagues *of the shore of the Gulf of Mexico.*" (Italics ours.)

Section 50 of the code aforesaid, as to the east and southern boundary line of Jackson county reads: " * * * thence east, on the line between townships one and two, south, to the state boundary between Alabama and Mississippi; thence southerly, on said boundary, *to the Gulf of Mexico;* thence westwardly with said boundary to the center of range 9, west; thence north *with section lines* to the beginning." (Italics ours.)

Your orator alleges and shows that in an official codification of her statute laws, taking effect Nov. 1, 1892, and by sections 368, 369 and 374 of said code, the boundaries of said counties are the same as given in the Code of 1880 above mentioned. Your orator now alleges and charges that the lines constituting the southern boundaries of the counties aforesaid, in the waters of the Gulf of Mexico,

are and have been since the formation of Hancock and Jackson Counties on Dec. 14, 1812, the consistently and uninterruptedly recognized, fixed and established southern boundary of the Mississippi Territory and of the State of Mississippi up to the time of the controversy referred to in the original bill in this cause of January, 1901, and out of which this litigation grew. That during all of this time the government of the Mississippi Territory and that of the State of Mississippi has exercised full and complete jurisdiction and sovereignty over the waters in the "Mississippi Sound" as a part of the three counties aforesaid. Your orator shows that the said Mississippi authorities have recognized the "Mississippi Sound" as a part of the territory of Mississippi, and that her township and section lines are as well established in the waters of the "Mississippi Sound" as indicated by the county boundary aforesaid, as upon the lands within said territory. That the fishermen of all kinds have been taking fish and oysters in said "Mississippi Sound" during all of this long period, and have been governed, as well as all others using those waters, by the laws and jurisdictions of the Mississippi Territory and the State of Mississippi and the local authorities in said coast counties. And, your orator alleges and charges the truth to be, that there has never been any adverse claim known to her by the State of Louisiana with reference to the exercise of jurisdiction and sovereignty over those waters until the aforesaid controversy out of which this litigation arose in January, 1901.

Your orator further shows that this said line was also recognized by the Supreme Court, and by the lower courts of Mississippi, and a judicial interpretation given by the said courts to the Act of Congress admitting Mississippi in the recent case of *Leinhard et al, v. Harrison County*, decided by our Supreme Court, January 12, 1903, (not yet reported), in which controversy the issue was as to the center of the said county and measurements from the eighteen mile limit in the water were held to have been correctly made.

IX.

Wherefore, your orator, to the end that she may obtain the relief to which she is justly entitled in the premises, prays the Court and Your Honors to grant to her your writ of subpoena, directed to the said State of Louisiana, and to William W. Heard, Governor of the said State of Louisiana, and to Walter Guion, Attorney General of the State of Louisiana, commanding and requiring them and each of them, on a day certain, to appear herein and answer, not under oath, an answer under oath being hereby expressly waived, to the several allegations in this cross-bill contained.

And upon final hearing may it please your Honors to adjudge and decree that the boundary line dividing the States of Mississippi and Louisiana is the line which. beginning, at a point six leagues due south of that point on the shore where the Alabama and Mississippi line enters the Gulf of Mexico, runs westwardly with the meanderings of the shore six leagues always therefrom until said line reaches and touches the real mainland of Louisiana about two miles due west of the Indian Mound" and "Lake of the Mound," and thence in an almost due northward direction along and on the high tide mark of the said Louisiana mainland to Mississippi Sound at or near Nine Mile Bayou, and thence further along said mainland at the high tide mark westwardly to that point due south of the middle of the most southern, or eastern junction of Pearl River with Lake Borgne, and thence from said point due north to the said Pearl River; that the said line be located and permanently bouyed at the joint expense of the two states; that the full title and sovereignty over all the islands and the land under the waters north and east of the said line so established be decreed and adjudged to be in the State of Mississippi, and that the State of Louisiana and her citizens be perpetually enjoined from disputing such title and sovereignty of the State of Mississippi therein, and your orator humbly prays for such other and further relief, preliminary and final, as to the Court may seem meet and proper, and which the facts of the case may require, and for costs of suit.

MONROE MCCLURG,
DODDS & GRIFFITH,
HANNIS TAYLOR,
Of Counsel.

WILLIAM WILLIAMS,
Attorney General of Mississippi.

THE STATE OF MISSISSIPPI,
HINDS COUNTY.

Personally came and appeared before me the undersigned authority in and for said county and state, Andrew H. Longino, who on oath states that he is the Governor of the State of Mississippi; that he has read the foregoing answer and cross-bill and knows the contents thereof, and that the matters and things therein contained and alleged are true as therein alleged and stated to the best of his information and belief.

ANDREW H. LONGINO.

Sworn to and subscribed before me this 7th day of October, A. D. 1903.

GEO. C. MEYERS,
CLERK OF SUPREME COURT

Supreme Court of the United States

OCTOBER TERM, 1902.

No. 12, Original.

STATE OF LOUISIANA, COMPLAINANT,

versus

STATE OF MISSISSIPPI, DEFENDANT.

BRIEF FOR MISSISSIPPI ON HER DEMURRER TO THE BILL OF COMPLAINT.

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

We first humbly invite this honorable court to decide whether the governor and attorney general of a State may, of their motion, determine that there is within the contemplation of the Constitution of the United States a controversy between two States and whether they may independently of legislative action bring a suit to settle the same.

Article III, section 2, Constitution of the United States, reads as follows:

> "The judicial power shall extend to all cases, in law and equity, arising under this Constitution, the laws of the United States, and treaties made, or which

> shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to *controversies between two or more States;* between a State and citizens of another State; between citizens of different States; between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens or subjects."

That this honorable court has jurisdiction over controversies between two States is not questioned. Our first contention is that it must clearly appear from the complaint that there is a "controversy" within the meaning of the Constitution or this court will not take jurisdiction of the cause. The procedure, so far as a defendant State is concerned, has been long since settled. Service of process upon her governor and attorney general requires her to appear.

New Jersey v. New York, 5 Peters, 284.

The primary inquiry being as to whether there is a "controversy," we respectfully insist that the governor and attorney general alone have no authority to determine that there is one. A controversy between two coterminous States as to the location of the boundary line dividing them is, at first, a political question for determination by the political department of the State government, the legislature. It is in no sense an executive act within the scope of the governor's duties or powers. It is not within the duty or power of the attorney general, who belongs to the judicial department.

If we should be mistaken in our contention that the governor and attorney general, of their own motion, have not the power to bring a suit of this character, then we most respectfully insist that in this cause they have misjudged the facts; that the matters contained in the bill of complaint are not sufficient in law to warrant the bringing of the complaint. As we understand it, they rely upon act No.

65 of the legislature of 1884, of Louisiana, for their authority. It is as follows:

No. 65.

AN ACT

To empower the attorney general to institute and prosecute suits without security or advance costs and without bond.

SECTION 1. *Be it enacted by the General Assembly of the State of Louisiana*, That the attorney general be, and he is hereby authorized and empowered, to institute and prosecute any and all suits he may deem necessary for the protection of the interests and rights of the State; and no court of this State, nor officer thereof, shall demand of the State, or the attorney general, any security for costs, or any advance costs; but all costs for which the State may become liable shall be paid by the attorney general out of the proper appropriation therefor. That in any and all cases where bond is required by law in legal proceedings, the State and the attorney general shall be dispensed from giving such bond.

We respectfully submit that this act is local to Louisiana and defensive of the interests of that State, and does not carry the power to provoke litigation with a coterminous State respecting boundary lines.

Mississippi Law.

Turning now to Mississippi, we find first that there is no statute or other law by which she has consented to be sued in a case like this. Section 4248 of the Code of 1890, the only one bearing upon this question, is as follows:

4248. When the State May Be Sued.—Any person having a claim against the State of Mississippi, after demand made of the auditor of public accounts therefor, and his refusal to issue a warrant on the

treasurer in payment of such claim, may, where it is not otherwise provided, bring suit therefor against the State, in the court having jurisdiction of the subject-matter which holds its sessions at the seat of government; and if there be no such court at the seat of government, such suit may be instituted in such court in the county in which the seat of government may be.

See also—

Dinkins v. The State, 77 Miss., 874.
Hall v. The State, 79 Miss., 38.
Beens v. Arkansas, 61 U. S. [20 How.], 521.

Of course we will not be understood as contending that a State may defeat an action like this by refusing to be sued. We believe that in those cases where she may be sued in this honorable court, by reason of being a member of the Union, she has, nevertheless, the right to humbly demand a strict observance of the laws of the land and the usual practice of this court. The evils that would follow a rule permitting the governor and attorney general of a State to bring suits of this character at their option are obvious.

The importance of the foregoing contention is emphasized by the fact that, so far as Mississippi is concerned, she could neither bring nor defend such a suit without an appropriation by the legislature providing for the expenses of the suit.

In the State *ex rel.* J. W. Barron, district attorney, *v.* W. Q. Cole, auditor Mississippi, December 1, 1902, the supreme court of Mississippi, passing directly upon the question of paying money out of the State treasury without legislative appropriation, said:

"Now, as already said, no salary or other obligation of the State, can be lawfully paid, except out of an appropriation therefor by the legislature definitely fixing the maximum sum which may be drawn on that account. And, although, there are in the code several provisions directing the auditor to issue warrants, he cannot lawfully issue any except to pay out of an appropriation therefor fixing definitely

the maximum sum which may be drawn, and also not continuing beyond six months after the meeting of the legislature at its next session. It seems to us perfectly clear that the auditor rightly refused to issue his warrant in this case, and the judgment of the circuit court is, therefore, affirmed."

The constitution of Mississippi, 1890, reads as follows:

> "SEC. 4. The legislature shall have power to consent to the acquisition of additional territory by the State, and to make the same a part thereof; *and the legislature may settle disputed boundaries between this State and its coterminous States whenever such disputes arise.*"

The authority of a State to settle her boundary disputes independently of constitutional grant will not now be questioned. But the above section gives strength to our contention for what we conceive to be the correct principle. Most of the reported cases show that these suits have been brought and defended by express legislative action.

> *Rhode Island v. Massachusetts*, 12 Peters, 657; same case, 4 How., U. S., 592.
>
> *Missouri v. Iowa*, 160 U. S., 688; same case, 7 How., U. S., 661.

In those cases in which it does not appear by the official report that the complaint is as to State-line controversies [not controversies respecting executive or judicial matters] we presume that the legislature authorized the suit. The importance of such authority cannot be better illustrated than in the instant case, to wit:

Your honors will notice that the governors of these two States undertook, without express authority of any law, to appoint a joint commission to mark the boundary. Had that commission adopted a line, without legislative con-

firmation, it would have been child's play. After that commission failed to agree and before the institution of this suit, as this honorable court will take judicial knowledge, the legislature of both States have held regular constitutional sessions without noticing this alleged controversy. In his message to the legislature of Mississippi, January, 1902, House Journal 1902, p. 140, Governor Longino said:

"Mississippi Boundary Commission."

> "On February 9, 1901, I appointed the following-named gentlemen as commissioners to confer with a like commission appointed by the governor of Louisiana to consider the water boundary line between the two States, and arrange for the easy location and identification of the same by a proper system of buoys, to wit:
>
> Hon. J. I. Ford, Scranton, Miss.
> Hon. E. J. Bowers, Bay St. Louis, Miss.
> A. Keller, Bay St. Louis, Miss.
> Hon. W. A. White, Biloxi, Miss.
> Hon. H. T. Howard, Biloxi, Miss.
>
> "This commission met at Biloxi and elected H. T. Howard chairman and J. I. Ford, secretary. Their report, which is transmitted to you, will acquaint you with the whole matter, and from which you will find that they suggest a friendly suit in the Supreme Court of the United States as the best method to fix a true boundary between the two States.
>
> "I submit the matter for such legislation, as in your judgment, is best."

The legislature took no notice of it. So far as we are informed, the governor of Louisiana did not call the attention of the legislature of that State to the subject at all. Certainly there was no State-line legislation by that State.

As to Construction of Acts of Congress Creating the Two States.

We respectfully submit that when Louisiana was admitted there was no such thing as the "Mississippi sound," probably no "Lake Borgne."

Reading the statutes mentioned in the bill, it seems impossible to escape the conclusion that "the Gulf of Mexico" was at that time all of the great waters out of the "rigolets" and the mouth of Pearl river. From Pearl river westward to the Sabine meant for Louisiana to mark from the high tide on her mainland "coast" three leagues seaward, and in so measuring to follow the meanderings of her high-tide mainland mark. If, perchance, the Mississippi six-league line measured from her well-defined "shore" touched Louisiana's three-league line, it necessarily halted and followed it until the waters widened, as above stated. Hence, we insist there is no possibility of a legal conflict in the two lines. Of course, your honors will quickly observe and appreciate the fact that there is no reference to any "deep-water channel" out of Lake Borgne, through the Mississippi sound into what we now call the Gulf proper. It is confidently believed that this court will not undertake to so amend the acts of Congress mentioned. Congress itself could not do this without the consent of the States. It is not pretended in the bill that the deep-water channel is now where it was nearly a century ago. It will not do to subject State-line boundaries to the shifting changes of the Gulf or of the Sound. The maps show that what is known as "Lake Borgne" ends where what is now known as the "Mississippi sound" begins. In 1812 it was all the "Gulf of Mexico."

So it is, it cannot be said with legal accuracy that the effect of the several statutes mentioned in the bill was to follow the "deep-water channel" into the Gulf of Mexico. We submit that it is not the law to follow deep-water channels generally, and in no case in salt waters or waters similar to the Gulf of Mexico.

D. & D. Bridge Co. v. County of Dubuque, 55 Iowa, 558.

And we submit it is perfectly clear that Congress had no intention of giving to either State a single island by name. The purpose was to embrace all islands with the league limits.

This honorable court is familiar with the rules of construction of statutes. The intent of Congress at the time of passing these laws of 1812 and 1817 is readily gathered from the context of the acts, and will be accordingly interpreted, construed, and declared by this court.

In article II of the constitution of Florida, 1868, part 1, Poor's Charters and Constitutions, p. 348, all of these expressions are used: "*to the* Atlantic ocean;" "*five leagues from the mainland;*" "*five leagues from the shore.*" So in the charter of Georgia of 1732, *ib.*, p. 373, "*to the south seas*" and "*from the sea.*" So in the Gulf boundaries of Louisiana and Mississippi the first touch of the great waters was "*the Gulf of Mexico.*" And thus it is in the large water boundaries of all of the old charters, treaties, and constitutions.

The original line must stand, notwithstanding changes in channels or water-courses.

Indiana v. Kentucky, 136 U. S., 479.
Missouri v. Kentucky, 11 Wall., 395.
Cassill v. Kentucky, 40 Ark., 506.
Missouri v. Iowa, 7 How., 660.
U. S. v. Texas, 162 U. S., p. 1.

"Where land is bounded by a common-law navigable stream, *i. e.*, in which the tide ebbs and flows, the boundary is the high-water mark on the shores."

I. A. and E. E. of Law, 1st ed., p. 504.
Canal Courses v. People, 5 Wendall, 423.
Wheeler v. Spinola, 54 N. Y., 377.
East Haven v. Hemingway, 7 Conn., 186.
Niles v. Patch, 13 Gray, 254.
Stewart v. Fitch, 30 N. J. S., 20.
Middleton v. Pritchard, 4 Ill., 520.

"The same rule applies to land bounded by the sea, or by arms of the sea. The boundary is the high-water mark."

Stores v. Freeman, 6 Mass., 435; S. C., 4 Am. Dec., 155.
Commonwealth v. Rothbury, 9 Gray [Mass.], 492.
Pollard v. Hogan, 3 How. [U. S.], 230.
Goodlittle v. Kibbs, 9 How., 477.
Hodges v. Bookeby, 48 Me., 71.
Cortelyon v. Van Brandt, 2 Johns., 362.
Ledyard v. Tenrick, 36 Brab., 125.
Mecklers v. Chapman, 40 Conn., 382.
Dona v. Jackson Sh. Wharf, 31 Cal., 170.

Where a patent confirming a Mexican grant describes the land as follows: "Beginning on the seashore at station number 13 of the Ballona ranches," the plot of the survey annexed to the patent representing this common corner of the two ranches as commencing on the seashore, it is to be construed that the land is, at that point, bounded by the sea in ordinary high-water mark.

Jones v. Martin et al., 35 F., 348.
See also *Obleniss v. Worth*, 67 F., 303.

In *Coleman v. San. Water Co.*, 75 F., 520, it is held that a Mexican land grant of land bordering "to the west on the sea, included only the lands above high-water mark, and did not cover the tide lands." A boundary on the "sea" means the same thing as on the "seashore."

37 Cal., 432, and *U. S. v. Pacheco*, 2 Wall., 587, followed.

There is no occasion here to invoke rules of construction—the simple interpretation of the acts defining the boundaries of the two States is sufficient. Counsel concedes that these acts are definite and certain. (See sec. 14 of original bill.)

It is beyond question the duty of courts in construing

statutes to give effect to the intent of the law-making power in every legitimate way; but first of all, in the words and language employed, and if the words are free from ambiguity and doubt, and express plainly, clearly, and distinctly the sense of the framers of the instrument, there is no occasion to resort to other means of interpretation. It is not allowable to interpret what has no need of interpretation.

Sutherland on Statutory Construction, sec. 237 (1891).
Stimpson, Am. Stat. Law, sec. 1020 *et seq.*

When the meaning of a statute is clear, and its provisions are susceptible of but one interpretation, that sense must be accepted as the law.

Sutherland on Statutory Construction, sec. 238.

The complainant here cannot protest against the rule which requires that the words of the statute be followed if clear and unambiguous, for that is a rule enacted into statute in that State.

"Spirit and text.—When a law is clear and free from all ambiguity, the letter of it is not to be disregarded under the pretext of pursuing its spirit."

Article 13, *La. Code*, 1900.

"Laws *in pari materia*, or upon the same subject-matter must be construed with reference to each other; what is clear in one statute may be called in aid to explain what is doubtful in another."

Article 17, *La. Code*, 1900.

These are but general rules of construction made statute law of the State of Louisiana. Adopting these rules of construction and applying them, together with section of complainant's bill, to the acts of Congress, in this case, complainant finds itself in the following category:

1. This court is asked to adjudge what is a boundary line where, complainant concedes, it is already plainly defined by the acts of Congress.

2. This court is asked to give a construction to the act defining the boundaries of the State of Mississippi that will give it a meaning not apparent on its face, and at the same time complainant is contending that the act is plain and definite.

3. This court is shown an act defining the southern boundary line of the State of Mississippi, and which seems to give the said State sixteen hundred and twenty square miles, more or less, of territory south of the mainland, and, while conceding the act plain and definite, asks this court to give it a construction which would cut this water territory half in two.

4. While admitting there is no occasion for construction, at the same time, in the same pleading, complainant is attempting to construe the act defining the Louisiana boundary by showing what the legislature meant to be the line from Lake Borgne to the Gulf when this line is clearly not defined by the said act.

5. While admitting that the line has been clearly defined by the acts of Congress, complainant does not show that she has attempted to mark nor that she has been prevented from marking nor that Mississippi has kept her from marking it.

6. That complainant comes into this court asking that something be done for her which, as far as pleadings show, she can do for herself, and which it is her privilege and duty to do, and which it appears she knows how to do.

7. And complainant is contending that the act creating the State of Mississippi does not mean what it appears to

mean, and at the same time protesting that its meaning is clear as written.

8. That the act defining the boundary of Louisiana is also plain as written, and at the same time the act is attempted to be construed.

Complainant is met in this argument by her own statutory law. She admits the Mississippi act is plain. In her attempt to draw a line from Lake Borgne to the Gulf to complete the boundary of Louisiana, she concedes that the Louisiana act is not plain. If it were plain, there would be no necessity for the labored *deep-channel* argument. Hence, that which is plain must prevail. "What is clear in one statute may be called in aid to explain what is doubtful in another."

If the Mississippi act is plain, it renders the Louisiana act plain, where, before, it was doubtful. If the Louisiana line from the mouth of Pearl river to the Gulf of Mexico was never plainly defined before, it was clearly defined when the Mississippi act was passed. What is plainly expressed in the Mississippi act must stand; it cannot yield to simple construction.

We submit with great confidence that the third assignment for cause of demurrer must settle this cause. There is no uncertainty of description in the statute admitting Mississippi as to her Gulf boundary. It is unquestionably six leagues from every part of her shore between Pearl river and the Alabama line. "Westwardly" from the Alabama line was not, as is contended by counsel, intended to draw a line from a point six leagues from the shore at the Alabama line directly to the mouth of Pearl river; but it was intended to draw that line from that point with meanderings of the shore line. In case of bays or other arms of the Gulf the line measures six leagues from the well-known junction between bay and Gulf. Your honors

will not fail to notice that the act admitting Mississippi, page 4 of the bill, does not say *from a point six leagues from the shore to the mouth of Pearl river.* The language is "thence south to the Gulf of Mexico; thence westwardly, including all islands within six leagues of the shore, to the most southern junction of Pearl river with Lake Borgne." It cannot be seriously questioned, we submit, that Mississippi's water territory is six leagues from the shore at the mouth of Pearl river, the same as at the Alabama line, unless it should in such reach touch the previously established line of Louisiana, in which instance her line would give way to and follow that of Louisiana until the waters gave her the full six leagues without interfering with Louisiana's three.

Counsel's argument is suicidal. The act of April 7, 1812, enlarging the territory of Louisiana, conditioned upon the express consent of that State, reads from "Lakes Maurepas and Ponchartrain *to the eastern mouth of Pearl river.*" No provision for the three leagues on her coasts between the lake outlets and the Pearl "to the Gulf of Mexico" is cut out by the amended boundary. Nor does the bill of complaint allege that Louisiana even consented to accept this important change in her limits as that act provided.

This suit cannot be maintained for the benefit of individuals. Nor has Louisiana, as a State, any property rights involved.

The State is not sovereign as to its citizens or as to another State and is under no obligation to collect the debts of its citizens or to otherwise redress their private wrongs. The State cannot loan its name to its citizens or sue in their behalf.

New Hampshire v. Louisiana, 108 U. S., 91.
Louisiana v. Texas, 176 U. S., p. 1.

Notwithstanding the comprehensive words of the Constitution, the mere fact that a State is the plaintiff is not a conclusive test that the controversy is one in which this court is authorized to grant relief against another State or her citizens.

Wisconsin v. Pelican Ins. Co., 127 U. S., 287.

No State can be sued either in its own courts or those of any other State or nation without its consent, and States can only be sued in *proper* cases in this court by reason of their agreement in the Constitution that the judicial power of the United States shall extend to all cases arising under the Constitution and laws.

United States v. Texas, 143 U. S., 646.

The controversies existing at the time of the adoption of the Constitution were the cause and origin of extending the judicial power of the United States to controversies between the States, and the only purpose of such constitutional provision was to provide a tribunal for settlement of such controversies as to boundaries and other like controversies.

United States v. Texas, 143 U. S., 639.

It was not the intention of the States in adopting the Constitution to give their consent to be sued whenever a dispute arises between citizens of different States in regard to commerce or any property right affecting such citizens.

Hans v. Louisiana, 134 U. S., 15.

So, we most respectfully insist that the section of the Federal Constitution above quoted in its reference to controversies between States means States in their sovereign and corporate capacity, and not in a sense that administrative officers are the embodiment of such powers, in questions purely of boundary lines.

Finally.

We most respectfully submit unto your honors that Louisiana should cleanse her hands and purge her conscience by attempting, at least, to mark her lines before provoking Mississippi into this controversy. The dignity of the State, we think, demands that she should not complain of her sister until she frees herself of all blame, especially since it is made clear by her bill of complaint that she is, because of her "marshes" and long sweeps at shallow waters, uncertain as to the exact location of her "coast." The "Fish Hawk's" map is convincing on this proposition. Before invoking equity at the hands of this august tribunal, she ought to be free from fault. She alleges at paragraph 15, page 6, of her complaint, that the line has never been marked. She notes the marks of the channel by the United States Coast Survey; but that was unquestionably for purposes of navigation. Therefore we earnestly contend that when the bill shows upon its face a well-defined "shore" for Mississippi and a clear statement of her six-league water limit, with an uncertain "coast" for herself, her complaint ought not to be tolerated until she has undertaken to remove the cause by marking her line.

That Mississippi *permits* the dredging of oysters in that State, while Louisiana *forbids*, as stated in the tenth and eleventh paragraphs of the bill, is, in point of law, no more cause for complaint of the location of the line than if one State *permitted* the carrying of concealed weapons and the other *forbade* it. The offender in the one instance the same as in the other is amenable alone to the State whose laws he has violated. Each State is sovereign as to its own affairs, especially so as to matters of police regulation. The plea of "not guilty" extends to the venue of the crime as well as to the *corpus delicti*. Not a single prosecution or any other judicial determination of a conflict is alleged; not a

warrant issued; not an arrest made; not one act by either State in its sovereign or corporate capacity charged. It simply *is, as positively shown upon the face of the bill, fishermen of Mississippi fishing or dredging in what they believe to be Mississippi waters;* that is the gist of this case, and that is the whole case. Where, when, how, what the cause of an armed conflict between the county peace officers of the two States? The answer is as silent as an echoless tomb.

The governors of these States never intended more than *to quiet the fishermen.* It is next to absurd to suppose that by the proceedings copied into the bill, pages 7 to 14, the chief executive of either State undertook to establish and fix the boundary in the waters of the Gulf. Wholly without authority, save as simple peace measures, the so-called commissions were appointed, and wholly without legal effect was the recommendation for "*a friendly suit in the Supreme Court of the United States.*" The legislature, as before stated, declined to notice the recommendation. Quickly enough did Louisiana act upon the suggestion. But it remains, nevertheless, that this honorable court will not suffer the trouble shifted to its determination by consent of the parties. Ever watchful of questions of jurisdiction, it will not, as we think, suffer such imposition.

There can be no reasonable contention as to the plain and unambigious language of the acts of Congress admitting these two States and defining their water limits. The lines stand where those acts fixed them notwithstanding local constitutions and statutes. There has never been any purpose by Mississippi to cede to Louisiana any of her possessions, nor had the General Land Office Commissioner or any other administrative officers of the Federal Government any power to take away from her and give to Louisiana any of her territory. We do not understand that any claim has been or will be made by Mississippi to any of the mainland of Louisiana, but whatever *islands* that are within six leagues of her shore at any point belong to her and she should have

them. It is immaterial to the present contention that landowners on Half Moon island, or Isle a' Pitre, deraign their titles through the State of Louisiana.

In Virginia *v.* West Virginia, 11 Wall., 39, the counties of Jefferson and Berkeley, formerly belonging to the old State, were adjudged to the new one. (See, also, Tyler's Law of Boundaries (1876), pages 242–'3.)

Summary.

That there is no controversy shown within the contemplation of the Constitution.

That the law itself fixes the lines.

That Louisiana has no standing in this court until she undertakes to mark her own boundary.

That the governor cannot appoint commissions to fix boundary lines.

That a scramble over oyster beds by the fishermen of two States does not constitute a controversy between those States.

That the governor and attorney general of a State have no authority in law to lend the name of the State to a few fishermen to settle their quarrels.

That the property rights of Louisiana, as a corporate State, are not involved.

That Mississippi, in her corporate capacity, has done nothing to provoke this suit.

That Mississippi, in her corporate capacity, has not denied the pretended claims of Louisiana. She pursues the even tenor of her way.

That Louisiana seeks to change the law fixing her water boundary.

That the bill of complaint shows no conflict in fact between the authorities of the two States.

That the bill makes no case.

In conclusion, we beg to submit that the liberal practice in this court respecting suits of this character has not been

overlooked in filing the demurrer or in this argument. But it has appeared to us to be so plain that Mississippi has been unjustly drawn into this contention that *the law* ought to relieve her rather than put her to the great trouble and expense of answering the complaint of Louisiana and filing her cross-bill and proving its allegations. It occurs to us that there is not a well-pleaded fact in the bill that the demurrer does not meet, and we humbly pray the court to relieve the State of further trouble with this premature and wholly insufficient bill.

But after all if Mississippi should be mistaken in her position, then we ask the court to allow her to set up the same matters in her answer and cross-bill and a chance to prove them. This we understand to be the rule announced in Colorado *v.* Kansas, 185 U. S., 126.

We humbly submit that the demurrer ought to be sustained.

WILLIAM WILLIAMS,
Attorney General of Mississippi.

MONROE MCCLURG,
Of Counsel.

N. B.—This cause was, by the court, set for March 2d. Counsel have filed an agreement to submit it on briefs with consent that the court allow counsel for Louisiana 20 days thereafter in which to file their brief.

THE STATE OF LOUISIANA, *Complainant,*

vs.

THE STATE OF MISSISSIPPI, *Defendant.*

BRIEF OF THE ARGUMENT FOR THE DEFENDANT.

I.

Acts of Congress Upon Whose Construction this Case Depends.

During the period beginning with 1812 and ending with 1819 the Congress of the United States carved out of those portions of the public domain known as the Louisiana Purchase and the Mississippi Territory the States of Louisiana, Mississippi and Alabama, whose continuous sea-front extends from the west line of Florida to the mouth of the Sabine river, a distance, by the general trend of the coast, of about 623 statute miles, Alabama possessing about 52, Mississippi about 71, and Louisiana about 500 statute miles. When the acts in question are read consecutively there can be no escape from the conclusion that they were enacted as parts of a common design, of a common purpose which they

were the means of carrying into effect, so far as the deliniation of the continuous sea-front described above is concerned. The State of Louisiana was admitted into the Union by the Act of Congress (Stat. at L., Vol. 2, p. 701) approved April 6, 1812, in the preamble of which the boundaries of said State are described as follows: "Whereas, the representatives of the people of all that part of the territory or country ceded under the name of Louisiana, by the treaty made at Paris on the 30th day of April, 1803, between the United States and France and contained within the following limits, that is to say: Beginning at the mouth of the River Sabine, thence by a line drawn along the middle of said river, including all islands to the 32d degree of north latitude; thence along the said parallel of latitude to the Mississippi River; thence down the said river to the River Iberville (or Bayou Manchac), and from thence along the middle of said river and Lake Maurepas and Pontchartrain to the Gulf of Mexico; thence bounded *by said gulf to the place of beginning, including all islands within* THREE *leagues of the* COAST." By the Act of Congress (Stat. at L., Vol. 3, p. 348), approved March 1, 1817, the inhabitants of the western part of the then Mississippi Territory were authorized to form for themselves a State constitution, and to be admitted into the Union with the following boundaries: "Beginning at the River Mississippi at a point where the southern boundary line of the State of Tennessee strikes the same; thence along the said boundary line to the Tennessee river; thence up the same to the mouth of Bear Creek; thence by a direct line to the northwest corner of the county of Washington (Alabama); thence due south to the Gulf of

Mexico; *thence westwardly, including all islands within* SIX *leagues of the* SHORE *to the most southern junction of Pearl River with Lake Borgne;* thence up said river to the 31st degree of north latitude; thence west along said degree of latitude to the Mississippi River; thence up the same to the beginning." The State of Alabama was admitted into the Union by the Act of Congress (Stat. at L., Vol. 3, p. 489), approved March 2, 1819, which provides "That said State shall consist of all the territory included within the following boundaries, to wit: Beginning at the point where the thirty-first degree of north latitude intersects the Perdido River; thence, east, to the western boundary line of the State of Georgia; thence, along said line to the southern boundary line of the State of Tennessee; thence, west, along said boundary line to the Tennessee River; thence, up the same to the mouth of Bear Creek; thence, by a direct line, to the northwest corner of Washington county; thence, due south, to the Gulf of Mexico; *thence, eastwardly, including all islands within* SIX *leagues of the* SHORE, *to the Perdido River;* and thence, up the same to the beginning." The acts defining the boundaries of Mississippi and Alabama are in almost identical terms, so far as the sea-front is concerned; and their deviation from the terms of the Act defining the sea-front of Louisiana is represented by the use of the word "*shore*" for "*coast*" (convertible terms), and by the phrase, "all islands within *six* leagues of the *shore*" instead of the phrase, used in the Louisiana Act, of "all islands within *three* leagues of the *coast.*" The controversy embodied in this case has arisen out of a conflict of view as to the manner in which the line defining the sea-front of Mississippi on the

south should be adjusted to the line defining the sea-front of Louisiana on the east, and northeast, at a point opposite the most eastern mouth of Pearl River, *where one side of an archipelago of islands lies near the mainland of Louisiana.*

II.

The Foregoing Acts Must be Construed in Pari Materia.

The problems which the Court will be called upon to solve in this case grow out of an apparent conflict or repugnancy between the statutes in question, when applied to the exceptional conformation of the territory, whose boundaries are to be defined. In order to overcome that difficulty it will be absolutely necessary for the Court to apply that all-important rule of construction which provides that, "In arriving at the intent of the legislature in enacting a statute, not only must the whole statute and every part of it be considered, but where there are several statutes *in pari materia*, they are all, whether referred to or not, to be taken together and one part compared with another in the construction of any material provision." Enc. of Law (2d ed.), Vol. 26, p. 620. In *Alexander* v. *Alexandria*, 5 Cranch, p. 8, this Court, speaking through Marshall, C. J., said: "Without deciding this question as depending merely on the original law, it is to be observed that acts *in pari materia* are to be construed together as forming one act. If in a subsequent clause of the same act provisions are introduced which show the sense in which the legislature employed doubtful phrases previously used, that sense is to be adopted in construing those phrases. Consequently, *if a subsequent act on the same subject*

affords complete demonstration of the legislative sense of its language, the rule which has been stated, requiring that the subsequent should be incorporated into the foregoing act, is a direction to the courts in expounding the provisions of the law." In that case an act of 1779 was construed in the light of an act passed seventeen years thereafter. In *Patterson* v. *Winn*, 11 Wheat., 386, it was said: "The land law of Georgia is comprised under several statutes, passed at different periods, varying and modifying the system occasionally, as policy required. But all being *in pari materia*, are to be looked to as one statute, in explaining their meaning and import." In *Pollard* v. *Kibbe*, 14 Pet., 366, it was said: "But if the construction of the act of the 26th of May, 1824, is doubtful, as it is admitted to be, the act of the 2d of July, 1836, is entitled to great weight in aiding to remove that doubt. * * * There is a proviso declaring that this act shall not interfere with or affect the claims of third persons. But giving to this proviso its full force and effect, the enacting clause is a legislative construction of the act of 1824, and locates the patent thereby to be issued upon the lot now in question. *They are acts in pari materia, and are to be construed together, and in such a manner, if the language will reasonably admit of it, as to permit both acts to stand together and remain in full force.* IT IS NOT TO BE PRESUMED THAT CONGRESS WOULD GRANT OR EVEN SIMPLY RELEASE THE RIGHT OF THE UNITED STATES TO LAND CONFESSEDLY BEFORE GRANTED. This would only be holding out inducements to litigation." In *United States* v. *Freeman*, 3 How., 563, it was said: "The correct rule of interpretation is,

that if divers statutes relate to the same thing, they ought all to be taken into consideration in construing any one of them, and it is an established rule of law, that all acts *in pari materia* are to be taken together, as if they were one law. (Dong., 30; 2 Tenn. Rep., 387, 586; 4 Maul & Setw., 210.) *If a thing contained in a subsequent statute be within the reason of a former statute, it shall be taken to be within the meaning of that statute* (*Lord Raym.*, 1028); *and if it can be gathered from a subsequent statute in pari materia, what meaning the legislature attached to the words of a former statute, they will amount to a legislative declaration of its meaning, and will govern the construction of the first statute.* (*Morris* v. *Mellin*, 6 Barn & Cress., 454; 7 Barn & Cress., 99.) Wherever the words of a statute are doubtful or obscure, the intention of the legislature is to be resorted to, in order to find the meaning of the words. (*Winbish* v. *Tuibois*, Plowd., 57.) A thing which is within the intention of the makers of a statute is as much within the statute as if it were within the latter. * * * This Court has repeatedly, in effect, acted upon the rule, and there may be found, in the reports of its decisions, cases under it like the cases which have been cited from the reports of the English courts. In 4 Dall., 14, '*The intention of the legislature, when discovered, must prevail, any rule of construction declared by previous acts to the contrary notwithstanding.*'" That principle was expressly confirmed in *Cope* v. *Cope*, 137 U.S., 687, wherein it was said: "These several acts of Congress, dealing as they do with the same subject-matter, should be construed not only as expressing the intention of Congress at the

dates the several acts were passed, *but the later acts should also be regarded as legislative interpretations of the prior ones. United States* v. *Freeman*, 3 How., 556, 564; *Stockdale* v. *Atlantic Ins. Co.*, 20 Wall., 323." In *Converse* v. *United States*, 21 How., 463, it was said: "It is obvious, therefore, that in order to carry into execution the intention of the legislative department of the Government, these various laws on the same subject-matter must be taken together and construed in connection with each other. And we should defeat instead of carrying into execution the will of the law-making power, if we selected one or two of these acts, and founded our judgment upon the language they contain, without comparing and considering them in association with other laws passed upon the same subject." In *United States* v. *Walker*, 22 How., 299, it was said: "All of these additional compensation acts are *in pari materia* with the several acts prescribing the sources of emolument, and the whole must be construed together. When they are so considered, there is no such repugnancy as is supposed by the defendant." In *Ryan* v. *Carter*, 93 U. S., 78, it was said: "There is no known rule of law requiring the court to interpret this proviso *according to the literal import of the words employed when the evident intention of the legislature is different.* It may be that the words taken in their usual sense, would exclude the case of Dodier; but if it can be gathered, from a view of the whole law, and others *in pari materia*, that they were not used in that sense, and they admit of another meaning in harmony with the general scope of the statute, it will be adopted as the declaration of the will of Congress on

the subject. * * * If there were any doubt remaining about the correctness of this construction, it would be removed by a consideration of the act of 1807, which is *in pari materia*. Congress passed various laws, from time to time, respecting the claims to lands in the Territories of Orleans and Louisiana. These laws were modified as policy required; but they constitute one land system, are all *in pari materia*, and to be looked to as one statute in explaining their meaning." In *Vane* v. *Newcombe*, 132 U. S., 220, it was said: "It is a rule of interpretation recognized by the Supreme Court of Indiana, in *Stout* v. *Grant County*, 107 Ind., 343, 348, that 'in cases of doubt or uncertainty, acts *in pari materia*, passed either before or after, and whether repeated or still in force, may be referred to in order to discern the intent of the legislature in the use of particular terms, or in the enactment of particular provisions; and, within the reason of the same rule, contemporaneous legislation, not precisely *in pari materia*, may be referred to for the same purpose.'"

Thus it has been settled by the rules of construction which this Court has prescribed for itself in ascertaining the intention of Congress, that "in cases of doubt or uncertainty," or apparent conflict or repugnancy, it will, (1) construe all of the acts relating to the same subject-matter together, and in such a manner, if their language will reasonably admit of it, as to permit them all to stand together and remain in full force; (2) that "if a subsequent act on the same subject affords complete demonstration of the legislative sense of its language, the rule which has been stated, requiring that *the subsequent should be incorpo-*

rated into the foregoing act, is a direction to the courts in expounding the provisions of the law"; (3) that "if a thing contained in a subsequent statute be within the reason of a former statute, it shall be taken to be within the meaning of that statute; and if it can be gathered from a subsequent statute *in pari materia*, what meaning the legislature attached to the words of a former statute, *they will amount to a legislative declaration of its meaning, and will govern the construction of the first statute*"; (4) that acts of Congress, dealing "with the same subject-matter, should be construed not only as expressing the intention of Congress at the dates the several acts were passed, but the later acts should also be regarded as legislative interpretations of the prior ones"; (5) that "*it is not to be presumed that Congress would grant or even simply release the right of the United States to land confessedly before granted. This would be only holding out inducements to litigation.*" When a series of acts relating to one subject-matter are thus construed together, as a connected whole, *the Court must presume that the entire will of Congress is not expressed until the last word of the last act is uttered.* The completed intent of the legislature as embodied in the subsequent act or acts is then "incorporated into the foregoing act," and thus becomes "a direction to the courts in expounding" its meaning. It thus follows with the certainty of mathematical demonstration that he who takes under the first act takes nothing more than Congress *intended to grant*, after such intent has been drawn from the provisions of all the subsequent acts *in pari materia*, because, in the words of Marshall, C. J., the pro-

visions of the subsequent act must be "incorporated into the foregoing act." Under that rule of construction it is logically and legally impossible for the party who claims under the first act to contend that he is divested of a vested right by the ascertainment of the real intent of the legislature from subsequent acts, for the simple and conclusive reason that the judicial ascertainment is that what he is pleased to call a vested right was never vested in him at all. In the present case Louisiana cannot set up even a moral claim of that character because, as will appear hereafter, she has never until very recently exercised any real sovereignty over the area in question; and because the parties to whom she has attempted to convey certain parts of it through her agent, the Lake Borgne Basin Levee District, cannot pretend to be *bona fide* purchasers, as they were notified of the infirmity of the title of their grantor in quit claim deeds that recite upon their face "that should the said title be subsequently declared void, the said board shall not reimburse to the purchaser any sum whatever."

III.

A Construction to be Avoided Which Will "Produce Inequality and Injustice."

In connection with the foregoing the Court must apply the equally important rule which declares "that, where a particular construction of a statute will occasion great inconvenience *or produce inequality and injustice*, that view is to be avoided if another and more reasonable interpretation is present in the statute. *Bate Refrigerating Co.* v. *Sulzberger*, 157 U. S., 37; *Wilson* v. *Rousseau*, 4 How., 646, 680; *Bloomer* v. *McQuewan*, 14 How., 539, 553; *Blake* v.

National Banks, 23 Wall., 307, 320; *United States* v. *Kirby*, 7 Wall., 482, 486." *Knowlton* v. *Moore*, 178 U. S., p. 77. In *United States* v. *Kirby*, 7 Wall., 482, the court said: "All laws shoud receive a sensible construction. General terms should be so limited in their application as not to lead *to injustice, oppression, or absurd consequence.* It will always, therefore, be presumed that the legislature intended *exceptions to its language*, which would avoid results of this character. *The reason of the law, in such cases, should prevail over its letter.*"

In order to understand the controlling reason, the dominant idea underlying the three acts in question considered as one connected whole, the Court must take into consideration the physical conformation and relative extent of the sea-front, which they attempted to apportion, as equally as possible, among the States of Louisiana, Mississippi, and Alabama. It is well settled that courts will take judicial notice of the prominent geographical facts and features of the country. "It has been very justly observed at the bar that the court is bound to take notice of public facts and geographical positions." The Apolion, 9 Wheat., 362. "We are supposed to know judicially the principal features of the geography of our country, and as a part of it, what streams are public navigable waters of the United States." The Montello, 11 Wall., 411. A court will also take judicial notice of the positions of islands off the coast of a State. *State* v. *Wagner*, 61 Me., 178. The Court has therefore complete judicial knowledge of the geography of the sea-front in question, and of the positions of the islands adjacent thereto, to whose partition

the three related acts must be applied. When, in the light of that geographical knowledge, the court perceives that to the States of Mississippi and Alabama were given, *in identical language*, all islands within *six* leagues of the shore," and to Louisiana "all islands within *three* leagues of the coast," the conclusion is irresistible that the wider zone of islands given to the States first named was intended to compensate for the fact that *the latter has more than four times as long a sea-front as both combined.* Everything indicates the intention of Congress to give to each of the three States in question the islands directly in front of it; and to the first two a zone of islands twice as wide as that given to the latter for the reason stated. The rule of construction which provides that statutes shall be so construed that they shall not "produce inequality and injustice" is based upon the assumption that legislatures always intend by their acts to establish equality and justice. In this case full justice and equality could not be accorded either to Mississippi or Alabama, even by the grant of the wider zones of islands, because of the far more extended sea-front of Louisiana. In view of that fact the Court cannot countenance the contention of that State which demands that the acts in question shall be so construed as to give to her not only all islands adjacent to her hundreds of miles of sea-front on the south, but all those on the east *which extend at least half-way across the only sea-front of Mississippi.* Against that grossly unequal and unjust contention the State last named simply claims "all islands within six leagues of the shore to the most southern junction of Pearl River with Lake Borgne," as the act of Congress

provided. The Court should thus keep constantly in mind the fact that it cannot support the contention of Louisiana without sustaining the gross inequality and injustice which would result from giving to that State, in addition to the islands on her vast southern sea-front, islands on the east which extend half-way across the only sea-front of Mississippi. If complainant should attempt to contend that there is no such doubt and uncertainty involved in the construction of the acts in question as will justify the application of the rule of *in pari materia*, defendant can answer through the mouth of Mr. Edgar H. Farrar, the leader of the New Orleans bar, who, in testifying in behalf of complainant, has said: "I very much doubt whether the Congress, individually or collectively, even the drafters of this act, had, at that time, any definite geographical knowledge of this locality, and that the act was drawn with their usual carelessness which characterizes the drafting of all important legislation in American legislative bodies, and that these acts were not referred to the topographical authorities of the United States for examination, and that they went, as most of our legislation, by happy-go-lucky guesswork. That is the history, in my judgment, of the conflict between these two States. Because of the ignorance of the men who drew those acts." If Mr. Farrar is correct in his surmise as to the cause of the conflict in question, that is the greater reason why this Court, by an application of the scientific rules of construction to these acts considered as one connected whole, should work out a result which will prevent inequality and injustice.

The existence of an apparent conflict or repugnancy

between the acts in question complainant admits, when in Par. 24, she avers that the elimination of her fanciful theory of a deep water channel boundary "*would cause the limits of the two States to conflict and overlap.*" Complainant, by copying into the record a quotation from Mr. William Darby, surveyor, map-maker and historian of that State (1806–1817), has emphasized the doubt as to what the statutes admitting the States in question mean. The statement is also important in that Mr. Darby recognized the application of the doctrine of *in pari materia* to this very contention. He said:

> "The islands of Malheureux, Marrianne and Cat island, are included in the bounds assigned to both the States of Louisiana and Mississippi. There must have been some oversight in framing the respective acts, which marked the possessions of each State." Rec. p. 1140.

The conflicting claims of the States as to possession, sovereignty and jurisdiction, supported by the testimony of many witnesses, as well as conflicting laws, history, and geography, certainly raise such a doubt as to call for the application of the doctrine contended for by defendant.

IV.

A hopeless attempt to extend the rule of international law as to river boundaries, beyond the estuaries of the river, to the open waters of the Gulf of Mexico.

In her bill of complaint Louisiana has based her inequitable and unjust claim upon a rule of international law concerning river boundaries, which can have no possible application to this case. In paragraph 2, the allegations are:

"That according to the foregoing description, the eastern boundary of the State of Louisiana was formed by the Mississippi River, beginning at the northeast corner of said State and extending south to the junction of the said river with the River Iberville (now known as Bayou Manchac), and thence extending eastwardly through the lower end of the Amite River, through the middle of Lake Maurepas, Pass Manchac, and Lake Pontchartrain, and in order to reach the Gulf of Mexico its only course was through the Rigolets, into Lake Borgne, *and thence by the deep water channel* through the upper corner of Lake Borgne, following *said channel*, north of Half Moon Island, through Mississippi Sound to the north of Isle à Pitre, through the Cat Island *channel*, southwest of Cat Island, into the Gulf of Mexico." In paragraph 28 the allegations are: "Your orator further avers that where contiguous states or countries are separated by water, it is, and always has been, the *custom* to regard the *channel* as establishing the boundary line of such states, and that the State of Mississippi has itself recognized this principle in the description of its territorial limits as found in the second article of its own constitution adopted November, 1890." [Reference is thus made to a "*custom*." Counsel have not ventured to state that there is or ever was such a *rule* of international law.] In the prayer of the bill (p. 19) the statement is "that the boundary line dividing the States of Louisiana and Mississippi, in the waters between the said States to the south of the State of Mississippi, and to the southeast of the State of Louisiana is *the deep water channel*." Thus an attempt has been made to incorporate into the statutes in question a rule of inter-

national law which, if applicable, *would entirely change the water boundary of Louisiana as expressly defined by Congress in the act of April 6, 1812, admitting her as a State.*

There is a well defined international rule which provides that where there is more than one channel *in a* RIVER *dividing conterminous states*, the deepest channel is the mid-channel or thalweg for the purposes of territorial demarcation. According to Grotius: "A river that separates two empires is not to be considered barely as water, but as water confined within such and such banks and running in such and such channel." De Jure Belli ac Pacis, II, c. 3, Sec. 17. According to Vattel: "If, of two nations inhabiting the opposite banks of the river, *neither party can prove that they themselves, or those whose right they inherit, were the first settlers in those tracts*, it is to be supposed that both nations came there at the same time, since neither of them can give any reason for claiming the preference; and in this case the dominion of each will extend to the middle of the river." *Droit des Gens*, Bk. 1, c. XXII, Sec. 26. *The Court will here observe that this general rule has no application to a case governed by a special rule established by convention, or by a special right based on prior possession.* Sir Travers Twiss has well said that "Grotius and Vattel speak of the *middle of the river* as the line of demarcation between two jurisdictions, but modern publicists and statesmen prefer the more accurate and more equitable boundary of the *mid-channel*. If there be more than one channel of a river, the deepest channel is the mid-channel for the purposes of territorial demarcation; and the boundary line will be the line drawn along the surface of the stream corresponding to the line of

the deepest depression of its bed. * * * The islands on either side of the mid-channel are regarded as appendages to either bank." After thus stating the general rule, *in the absence of convention or special circumstances*, the same author says: "Such is the general law, but by treaty the mid-channel may be made the water boundary, yet all the islands in the river belong to one power." Hall says that where the boundary "follows a river, *and it is not proved that either of the riparian states possess a good title to the whole bed*, their territories are separated by a line running down the middle, except where the stream is navigable, in which case the center of the deepest channel, or, as it is usually called, the thalweg is taken as the boundary." Int. Law, p. 127. Halleck says: "But where the river not only separates the conterminous states, but also their territorial jurisdictions, the thalweg, or middle channel, forms the line of separation *through the bays and estuaries through which the waters of the river flow into the sea*. As a general rule this line runs through the middle of the deepest channel, *although it may divide the river and its estuaries into very unequal parts*." Int. law (Baker ed.), Vol. 1, p. 171. It thus appears that the rule in question is confined to the *mid-channel or thalweg of rivers*, or to a mid-channel which forms the line of separation through the bays and estuaries *through which the waters of the river flow into the sea*. The moment the sea is reached, or a body of water which is a part of the sea, the rule is at end. So it is beyond all doubt that the rule invoked by complainant as to the flow of the mid-channel or thalweg of the River Iberville (now known as Manchac) to the sea through Lakes Maurepas, Pontchartrain and the Rigolets,

expires by its own limitation when such mid-channel reaches Lake Borgne which, in contemplation of the rule, is the open sea, a part of the waters of the Gulf of Mexico. Certainly it was so regarded in the act of April 6, 1812, admitting Louisiana whose terms are: "thence along the middle of said river and Lakes Maurepas and Pontchartrain to the Gulf of Mexico." The attempt to extend the rule beyond the estuaries of the river into the open sea, that is, into the open waters of the Gulf of Mexico, cannot be supported either by reason or authority. Not by reason, because the wide expanse of water, unconfined between banks, utterly fails to serve as a boundary; not by authority, because there is no precedent for such an extension of the rule in any work on international law.

The attempt made by counsel for the United States, in the Alaskan Boundary Case, to apply the doctrine of the thalweg to the narrow and sharply defined channels in the long and river-like fjord "arm of the sea," or estuary known as "Portland Canal" was in perfect harmony with the foregoing authorities. That attempt rested upon the proposition that "Portland Canal" was as much an estuary as if a river system flowed into it; that because this long and narrow arm of the sea, with its rocky and abrupt shores, was in form like a river, that it came within the reason of the rule which applies the doctrine of the thalweg to the channels of rivers. While admitting the application of the doctrine Lord Chief Justice Alverstone was careful to limit it. In replying to Mr. Taylor, he said: "The doctrine of the thalweg applies, but I am bound to say I do not think that even David Dudley Field himself—and Dudley Field

was a very great authority—meant to say what you put upon him, because he refers to Bluntschli, *who is there dealing with rivers.*" The application of the doctrine to the channels of Portland Canal was recognized only because that canal was in physical structure like a river with narrow channels and rocky and abrupt shores. Such a recognition cannot, of course, give countenance to the idea that the doctrine can be extended, *beyond the mouth of an estuary or an arm of the sea*, into the open sea itself where there are no banks between which channels can flow. The attempt made here by complainant to extend the doctrine to a channel in the open sea is without precedent or reason to support.

Whenever it is necessary for two contiguous states to run a water boundary through an archipelago of islands off their coasts it is only possible to do so *by convention*, as international law provides no rule upon the subject. For that reason Great Britain and the United States, in the famous treaty of 1846, stipulated that the line between them should be continued westward along the forty-ninth parallel of north latitude "to the middle of the channel which separates the continent from Vancouver's Island, and thence southerly, through the middle of said channel and of Fuca's Straits to the Pacific Ocean." After prolonged and bitter controversy the Emperor of Germany was called upon, as arbitrator, to decide "whether the boundary line which, according to the Treaty of Washington of June 15, 1846, after being carried westward along the forty-ninth parallel of northern latitude to the middle of the channel which separates the continent from Vancouver's Island is thence to

be drawn southerly through the middle of the said named channel and of the Fuca Straits to the Pacific Ocean, should be drawn through the Rosario Channel as the Government of Her Britannic Majesty claims, or through the Haro Channel as the Government of the United States claims." In the exhaustive discussion embodied in the very able arguments presented by the opposing governments in that case *there was no pretense of the existence of any such general rule of international law or "custom" as complainant claims in this case.* Only the conventional rule laid down in the treaty was contended for by either side, and its construction was the only subject of the award. In the reply of the United States to the British case special emphasis was laid upon the "Worthlessness of the middle channel" as a boundary, because it was "so narrow that it cannot be seen until you are quite near." See Papers Relating to the Treaty of Washington, Vol. V. But the absence of such an international rule as to a *water* boundary is not of the slightest importance here, because it could not be applied even if it existed, for the simple and conclusive reason that Congress saw fit, in the act admitting Louisiana as a State, to establish for her a *land* boundary instead. From the junction of the Rigolets with Lake Borgne to the mouth of the Sabine river the boundary of Louisiana is the "*coast.*" The vital words of the act are: "including all islands within three leagues of the *coast.*" Congress thus established a definite land boundary for that State and not a shadowy and uncertain water boundary as claimed in the bill. A special rule having been thus established by competent authority, a general rule, even if such a one existed, could

not be invoked. General rules of international law are never applied under such circumstances.

V.

Distinction Between the Coast Line of Physical Geography for the Purposes of Boundary and the Political Coast Line for the Purposes of Jurisdiction.

Physical geography simply reproduces the actual coast lines of maritime states, as they are defined by nature at the point of contact of the sea with the land. The following description of the coast of Maine, from an eminent geographical authority, may be taken as an apt illustration: "On the Atlantic coast, Maine presents an interrupted succession of peninsulas, islands and bays; and all these bays are the mouths of rivers—outlets of valleys having their origin far in the interior. Nothing similar is seen on all the territory of the Union. One must come to Norway or go to the extreme point of South America to find so long a part of the coast—400 *kilometers in a straight line* from the southwest to the northeast—so deeply cut up that we measure on it more than 4,000 *kilometers of contact with the sea.*" See Maine, in *Nouveau Dictionnaire de Géographie Universelle*, Saint Martin, Vol. III, p. 559. The actual coast

line of Maine, as known to physical geography, following, as it does, the sinuosities defined by the contact of the sea with the land, is about 4,000 kilometers, while the political coast line, superimposed upon it by operation of international law, is vastly shorter by reason of the fact that the artificial and imaginary line cuts across the heads of bays and inlets. The natural coast line, as known to physical geography, exists primarily for the purposes of boundary. The artificial coast line, as known to international law, exists only for the purposes of jurisdiction. That obvious distinction is well illustrated by Rivier in his *Principes du Droit des Gens*. Speaking of "*La mer littorale*," he says: "The name territorial sea is applied to all the seas or portions of the sea which belong to the territory: to the littoral sea, to the interior sea, in the various acceptations of the word, to gulfs and straits. It is the general and juridical term (*le terme général et juridique*), while the others are rather physical or geographical (*physiques ou géographiques*). The term, littoral sea, has the advantage of a special meaning. They say also jurisdictional sea, after one of the elements of the juridical situation of that part of the sea. The principle that the littoral sea forms a part of the territory is justified by the necessities of the preservation and security of the state, from the point of view, military, sanitary, fiscal, as well as the point of view of the interests of industry, specially of the right of fishing. The result is, for the coast and for *terra firma*, the littoral sea has the character of an accessory (*le caractère d'un accessoire*), and it cannot be taken independently of the coast (*indépendamment de la côte*)." Speaking

of "*Les Frontieres*," the same author says: "I have spoken already of the frontier on the sea, and of that on the land. There exists also special limits for the wants of administration, because the geographical and political frontier (*la frontière politique et géographique*) do not always answer in a sufficient manner." Vol. 1, pp. 145–146, 170. The distinction thus so clearly drawn between a geographical and political frontier is too obvious to require further illustration. If the geographical frontier happens to be on the sea or ocean, it is known as the *coast*, the point of contact between the sea-water and the land, upon which the political frontier is superimposed as an accessory that cannot be taken independently of the coast (*et qu'on ne saurait l'acquérir indépendamment de la côte*). That dependent and accessorial frontier created by international law, solely for the purposes of jurisdiction, is annexed *only to the outer coast* of a maritime state, which it shortens by cutting across the heads of bays and inlets, thus following what is called the general trend of the coast. The artificial and invisible coast line thus created by international law for the purposes of jurisdiction only, which, following the general trend of the coast, cuts across the heads of bays and inlets is not involved in this case in any form. We are only concerned with the inner coast line of physical geography, the point of contact between the sea-water and the mainland the line inside of the islands from which Congress has seen fit to measure zones of *three* leagues and *six* leagues. This obvious demonstration has been gone through with in order to add another reason to the argument made already against the fanciful theory of a deep water channel in the open

waters of the Gulf of Mexico, as a boundary between the States in question. If such a water boundary could be established at all, it would necessarily sweep around outside of the islands, beyond the political coast line (three miles seaward from low-water mark), that exists for the purposes of jurisdiction. Thus for the first time in the history of international law, we would have *the interior domestic boundary between two states fixed outside of the political coast line*, fencing off the federal commonwealth to which such states belong, from other nations. Such are the confusions and conflicts, which the application of false theories inevitably bring about.

If such a thing were legally possible, the great injustice that would be done Mississippi by declaring the "deep water channel," the real boundary and awarding to Louisiana dominion, sovereignty and jurisdiction over the waters and islands to the south of that line is demonstrated by the fact that this line hugs the Mississippi shore clear across Hancock County and across a large portion of Harrison County. Six miles eastward from the mouth of Pearl river, it is "within a few hundred yards" from the Mississippi shore. The following is copied from the testimony of Mr. George Dunbar, a very intelligent witness, largely interested in the territory in dispute, and put upon the stand by the complainant. On cross-examination (p. 317):—

> "Q. You said something about the proximity of that channel to the Mississippi shore between the mouth of Pearl River and Saint Joseph's lighthouse; does not that channel pass closely to the Mississippi shore?

"A. Yes, sir; right there.

"Q. Within a few hundred yards of it?

"A. Yes, sir; that is the nearest point that it touches.

"Q. How far is that point to the most eastern mouth of Pearl River?

"A. I should judge—I am not going to give you anything exact about that.

"Q. I don't ask you that; I ask for your best judgment.

"A. I should judge about six miles."

He goes on to give distances from points on the Mississippi shore southward to this line as follows: Point Clear is ½ of a mile (p. 430).

Gulf View about 4 miles (pp. 317–318), (nautical).

Waveland " 6 " " " "

Bay St. Louis " 5 " " " "

Pass Christian " 8 " (pp. 318–319) "

Mississippi City " 15 " " " "

Biloxi " 18 " (pp. 319 and 430) "

The deep water channel is less than 18 miles at every point from the Mississippi shore west of Biloxi lighthouse, or from the western end of Ship Island, which is forty miles east of the mouth of Pearl River.

Another more striking illustration of this injustice to Mississippi lies in the claim of sovereignty and jurisdiction three leagues from the northern and eastern outer shore of these islands. Three leagues north of Malheureux Point strikes the Mississippi shore, at or near the most eastern mouth of Pearl River. Three leagues from the north-eastern end of Isle à Pitre almost touches Ship Island, and reaches within a quarter of a mile of the artificial channel

dredged to the depth of 23 feet from Gulf Port to Ship Island, and leaves but a small margin of shallow water thence westward next to the Mississippi shore.

Three leagues from Grand Pass, and from Nine Mile Bayou, it actually reaches the Mississippi shore near Pass Christian. Either measurement leaves Mississippi practically no sea-front west of Ship Island.

See map No. 7, and sketch No. 2, Vol. 1, p. 1006.

It may be readily perceived what a disastrous effect it would have upon Mississippi should either of the above claims be fixed as the true boundary.

VI.

Meaning of "Coast" and "Shore" as Convertible Technical Terms.

With the fanciful theory of a deep water channel boundary eliminated from the case, it will be possible to consider without embarrassment the real issues involved in the construction of the acts in question. Both in their popular and technical senses "coast" and "shore" are identical and convertible terms. As defined in the Century Dictionary, "coast" is "2. The exterior line, limit, or border of a country; boundary; bound; * * * 3 (*a*) The side, edge, or margin of land next to the sea; the seashore * * * (*b*) The boundary line formed by the sea; the coast line." As defined by the same authority, "shore" is "1. The *coast* or land adjacent to a considerable body of water, as an ocean or sea, or a lake or river; the edge or margin of the land; * * * 2. In law, the space between ordinary highwater mark and low-water mark; foreshore." The fol-

lowing is contained in the Am. and Eng. Enc. of Law (2d ed.) Vol. IV, p. 818: "VII. WATERS AS BOUNDARIES. 1. Seashore, estuaries, tidal rivers—a. In general. High water-mark of the civil law was the water line as high up as the greatest winter flood tide rose. By the common law it is the line of ordinary high tide between the springs and neaps. Low water-mark—The shore. Low water-mark is the line of ordinary low tides. The space intervening between the high and low water-mark is the shore." By the same authority, "'coast' is defined to be the seaboard of a country." Vol. VI, p. 171. In *United States* v. *Pacheco*, 2 Wall., 587, this Court said: "By the common law, the shore of the sea, and, of course, of arms of the sea, is the land between ordinary high and low water-mark, the land over which the daily tides ebb and flow. When, therefore, the sea or a bay is named as a boundary, the line of ordinary high water-mark is always intended where the common law prevails. 3 Kent Com., 427. And there is nothing in the language of the decree which requires the adoption of any other rule in the present case. If reference be had to the rule of the civil law, because the bay is given as a boundary in the grant from the Mexican Government, the result will be equally against the position of the appellants." "*In a statute which requires* MEASUREMENT *from the coast*, the coast is the point of contact of the *mainland* with the sea; and when a bay intervenes the point of contact of the bay with the mainland is to be considered coast." Farnham on Waters and Water Rights, Vol. II, p. 1463, citing *Hamilton* v. *Manieff*, 11 Texas, 718. "What is shore.—The tract of land designated as shore,

which may be a parcel of a manor but is *prima facie* in the crown, is that strip lying along tide water over which the tide flows between the line of ordinary high tide and the line of lowest tide." Ibid., Vol. I, p. 227. It is thus beyond question that "coast" and "shore" are convertible technical terms; and that "In a statute which requires measurement from the coast, the coast is the point of contact of the *mainland* with the sea." That simple and obvious rule solves at once the first problem with which the Court is called upon to deal. The decisive word in the statute of April 6, 1812, defining the water boundary of Louisiana from the junction of the Rigolets with Lake Borgne to the mouth of the Sabine river is *coast*, "including all islands within three leagues of the *coast*." Here the statute requires a measurement from the coast, "the point of contact of the mainland with the sea," because Louisiana takes under the grant all islands within three leagues of the coast. How could this Court possibly find the power to wipe out that plain and specific special provision, and substitute in its place a general rule of international law, having no application to the subject-matter, which would prescribe a deep water channel in the open sea instead of the "coast" as a boundary? The decisive word in the statutes admitting Mississippi and Alabama is "*shore*." In the former the phrase is, "thence westwardly, including all islands within six leagues of the *shore* to the most southern junction of Pearl river with Lake Borgue"; in the latter, "thence eastwardly including all islands within six leagues of the *shore* to the Perdido river." It is confidently contended that when the three acts are construed *in pari materia*, as one connected

whole—*a method of construction which necessarily assumes contemporaneous enactment*—it must be held, in order to prevent "inequality and injustice," (1) that it was the intention of Congress to give to each state the islands directly in front of it on its southern seaboard, within the limits specified in each act; (2) that in marking out these limits the measurements shall be made from the "coast" or "shore," that is, from the point of contact of the mainland with the sea. If, in working out that result, a conflict should arise between that clause in the Mississippi Act which provides that that state shall have "all islands within six leagues of the *shore* to the most southern junction of Pearl river with Lake Borgne" and the claim of Louisiana to all islands within three leagues of her eastern *coast*, the claim of Mississippi should prevail under the rule laid down in *United States* v. *Kirby*, 7 Wall., 482, which declares that "All laws should receive a sensible construction. General terms should be so limited in their application as not to lead to injustice, oppression, or absurd consequence. It will always, therefore, be presumed *that the legislature intended exceptions to its language, which would avoid results of this character*. The reason of the law, in such cases, should prevail over its letter." As the cardinal purpose of the three acts taken as one connected scheme was manifestly to give to each State the islands directly in front of it to the south, there should be such a construction as will uphold that purpose. Only in that way can "injustice, oppression, or absurd consequence" be avoided. The Court has the right to presume "that the legislature intended exceptions to its language which would avoid results of this character." In

any event, the lion's share must remain to Louisiana, because she would still possess a total sea-front of at least five hundred miles as against seventy-one miles for Mississippi. The effort of Congress was to prevent as far as possible that inequality by giving to Mississippi "all islands within six leagues of the shore to the most southern junction of Pearl River with Lake Borgne." Certainly if there is a repugnance which construction must reconcile, it should be in favor of the effort made by Congress to compensate Mississippi, as far as possible, for the inequality which the nature of the case made inevitable. It will be hard indeed if Mississippi is to have one-half of her narrow southern sea-front cut off by islands belonging to a neighbor far more fortunate, in that respect, than herself.

VII.

What is an Island? Geographical form and not geological origin the criterion.

The construction just contended for will not touch in any way the mainland of Louisiana. It may take away some of the islands within three leagues of her eastern and northeastern coast because of the dominant intention of Congress that each State should possess all islands on its southern sea-front within the limits defined. Certainly it is far more just and equal for construction to harmonize repugnancy by preserving *the cardinal purpose* of the statutes through a sacrifice of *the incidental* than the contrary. In any event, it is all important for the Court to determine where the mainland of Louisiana ends and where the islands on her eastern coast begin, a subject upon which complainant

has been ominously silent. From its judicial knowledge of matters of art and science the Court knows that geographers divide islands into two classes: *first*, Oceanic islands, situated far from any continent; *second*, continental islands, which do not as a rule lie far from continental shores, "from which they are usually separated by shallow seas. * * * Continental islands, as a rule, show community of flora and fauna with the neighboring land." The International Geography, p. 62. It is a fundamental principle with geographers, in the classification of land forms, to determine the character of an island solely by reference to its form, regardless of its geological origin. "From the geographical point of view land forms are best considered, in their larger aspects at least, from the point of view of form alone, *without reference to their geological history.*" Ibid., p. 48. This authority has been cited in view of the attempt made by complainant to maintain, as if it were a matter of importance, that because there is an identity between the soils of some of the islands in question and the mainland, it must be assumed that, at some remote period in the past, they were united. Even a piece of the soil from the Isle à Pitre has been presented here as an exhibit in support of that contention. (See record, p. 346). That the fact thus set up has not the slightest practical or legal value, if true, has been demonstrated by one of complainant's leading witnesses, Dr. Wm. C. Stubbs, who says: "I am engaged in work for the State of Louisiana, first as professor in the State University, second, as director of the Experimental Station, and third, as director of the Geological Survey." This expert, who was offered by complainant as such, when

asked whether the geographical character of an island is affected at all by its geological origin said:

"Q. And we come out in a bay to one of those islands and find it at eight or ten miles from the mainland, and you, as a geologist, take some of the soil and then go to the mainland and take some of the soil and find the soils identical—would that be any the less an island, if it was ten miles away from the mainland entirely surrounded by water, because it was formed in that geological process?

"A. No, sir.

"Q. It would not affect its geographical character?

"A. No, sir; an island is a body of land entirely surrounded by water, *it is immaterial how it is made.*

"Q. The fact of its geological formation has got nothing to do with its geographical character?

"A. No, sir. * * *

"Q. So, is it not true when it comes to determining from the standpoint of a geographer that an island is a body of land surrounded by water, the fact of its geological origin has got nothing to do with its geographical character?

"A. Yes, sir; that is true.

"Q. Now, as I understand you, your opinion is, that this sample No. 1, which the testimony tends to show came from the Isle à Pitre, you say looking at that as a geologist examining the qualities of it, your conclusion is that that is part of the general deposit that has been made by the Mississippi River out in that direction during the same period or epoch, as to which geologists will state no time?

"A. We won't state any length of time. But the geological time in which that was deposited is to-day, it is the present age.

"Q. But that present age, as I understand, may embrace a period of five millior. years?

"A. We don't know.

"Q. It may be five million years?
"A. Yes, sir." Record, Vol. 1, pp. 332, 346.

VIII.

No Basis Whatever for the Contention That the Islands in Question Were Ever a Part of the Mainland of Louisiana.

The net result of the testimony on this point given by the geological expert offered by complainant is this: During an indefinite period of time, possibly five millions of years, an alluvial deposit has been made by the Mississippi river in a shallow sea, out of which these islands have arisen, and such geological origin has nothing whatever to do with their geographical character as islands within historic times. And here the fact should be emphasized that this expert never attempted to say, that, at any time, such islands were ever a part of the mainland. Upon the contrary he says: "These [islands] on the *coast of Louisiana have not been cut off; they have been formed by the waves and winds of the Gulf.*" Record, Vol. 1, p. 345. Nothing could more completely overturn the theory that such islands—formed by the winds and waves of the Gulf out of the shifting alluvial deposits of a great river in a shallow sea—were once a part of the main land. It is hard to over-estimate the importance of this statement in view of the method employed by complainant's counsel to explain the geological process through which the archipelago of islands on the east coast of that State was formed. Dr. Stubbs has taken great pains to state that the alluvium from the Mississippi River "is easily transported by water, by virtue of the fact that its physical size is very minute, consisting mainly of clay and silt, it is easily transported

by water; in other words, it is very nearly of the same specific gravity as water, and hence it is very difficult to settle it." Record, p. 354. When this sediment carried in solution in the fresh water reaches salt water it is precipitated. "It (the salt water) has a chemical effect in precipitating it." B. M. Harrod, p. 126. Dr. Stubbs says: "For instance, the peninsula of Florida has been built up by the Gulf Stream, carrying the sediment from the Mississippi as it turns the coast of Florida and goes up and touches it and Cuba; it is deposited there and it is building up Cuba, so that geologically speaking some of these days Florida and Cuba will be united, but that is a very slow growth." p. 338. In view of that statement the attention of the witness was called to the geological process through which archipelagoes of islands along the coasts of certain countries have been formed by being cut off from the mainland, notably the archipelago near the coast of Alaska which was so cut off from the mainland by submergence. See International Geography, p. 667.

After admitting in general terms that the Alaskan archipelago was formed in that way, Dr. Stubbs emphatically denied, while being interrogated as to "this archipelago of islands lying off the east coast of Saint Bernard Parish, and the south coast of Mississippi," that any such process had been at work on the coast of Louisiana.

> "Q. Is it not a very familiar matter in the study of geology, the causes by which these archipelagoes are formed; the process by which such islands have been cut off from the mainland?
>
> "A. Sometimes, and at others not. *These on the coast of Louisiana have not been cut off; they*

have been formed by the waves and winds of the Gulf." Record, pp. 344-345.

Any other conclusion would be in positive conflict with his theory of the process through which the sediment or alluvium of the Mississippi is moved by the currents and deposited in the Gulf in land formations. At p. 334, he says:

"A. Your question means this, that prior to the levee system what influence did these bayous have on the surrounding country as they went to the sea?

"Q. Yes.

"A. They had, in a small way, the same effect that the Mississippi river had upon its surrounding country in overflows, they deposited a great deal of sediment that was being carried to the sea, and help to build up that section of the country. All the marshlands that we now have along the banks of bayou Terre aux Bœuf that are being cultivated came from the deposit of this stream or bayou that ran through that country, and in fact the whole of Saint Bernard Parish has been built up by that agency, the bayous coming from the Mississippi river."

Vitally important testimony of Major B. M. Harrod:

There is nothing whatever, either from the geological or historical point of view, to give color to the theory that the islands in question were ever a part of the mainland of Louisiana, *as one solid mass*, which has been broken up into islands since 1810, by subsidence, or by the action of storms and tides. Major B. M. Harrod, the eminent civil engineer offered by complainant, has made a lucid statement on that subject that should be conclusive:

"Q. The counsel for Louisiana have spoken of

the Saint Bernard archipelago. Is there an archipelago in that neighborhood, in the neighborhood of Saint Bernard Parish?

"A. Well, I have not heard the expression before. There is an area of land which is pretty well cut up by bodies of water, lakes, and bayous, which I have attributed to tidal movements and subsidence.

"Q. Well, do you believe that since the years 1812, or 1817, the conformations of those islands have been materially changed either by an action of tidal waters or subsidences, or by any other agencies? And we mean by those islands in this question those nearest and adjoining Saint Bernard—the mainland of Saint Bernard Parish.

"A. I could not give any answer about the time, since 1817, or 1819. I believe that peninsula was formed by the river deposits being placed out in a shallow sea, that had tidal movements and *instead of forming a solid peninsula* it left these open areas through it for the tidal movement *in and out of Lake Borgne and Lake Pontchartrain, and that those lakes or spaces of water have been enlarged since their formation, by subsidence. That is my opinion about the formation of that peninsula; that water areas were left there* WHEN IT WAS ORIGINALLY FORMED *and have been subsequently enlarged by subsidence.*

"Q. How long do you think this process has been going on; how many years?

"A. *For centuries I have no doubt.*" Record, p. 135.

Major Harrod thus settles against complainant the most vital fact in the case, which is that the islands in question were formed in a shallow sea by the deposit therein of the river alluvium which never constituted a solid mass as a part of the mainland. His words are: "the river deposits being placed out in a shallow sea that had tidal move-

ments AND INSTEAD OF FORMING A SOLID PENINSULA *it left these open areas through it for the tidal movement* in and out of Lake Borgne and Lake Pontchartrain and that *those lakes or spaces of water* have been enlarged since their formation, by subsidence." The fact that Major Harrod improperly calls the archipelago of islands thus formed a "peninsula" is of no importance whatever, as he admits that "a solid peninsula" was never formed. Upon the contrary a group of islands was formed surrounded by water subject to "the tidal movement in and out of Lake Borgne and Lake Pontchartrain, and that those lakes or spaces of water have been enlarged since their formation by subsidence." He insists "that water areas were left there when it was *originally formed* and have been subsequently enlarged by subsidence." Thus complainant's two experts, Dr. Stubbs and Major Harrod, agree in the self-evident conclusion that, even from the standpoint of geology, the islands in question *were islands from the very beginning*, and were never a part of the mainland of Louisiana. With that decisive fact clearly established a mass of irrelevant testimony, as to subsidence, and storm action subsequent to 1812, passes out of the case. And so nothing is left to complainant, in this regard, except the claim that these coast islands are composed of the same soil as the mainland, a matter which has no legal significance whatever. An island is no less an island because it is so composed. Due importance should also be attached to Major Harrod's statement that the geological process through which these islands were formed has been going on "*for centuries*." He declined to give color to the idea that any material change had taken

place in their conformation since 1817, or 1818. The testimony of Mr. Baylor of the Coast and Geodetic Survey, had already put that contention beyond question.

No stronger confirmation can be given of the fact that the islands in question constitute an archipelago, and that they are not a part of a peninsula, than the following statement by the United States Fish Commission, in a report of the cruise of the "Fish Hawk" made in February 1898, in response to a request, by resolution, of the legislature of Louisiana, for an investigation of the oyster industry in the region in question. That part of the report devoted to a "general description of the region," contains the following: "*The land constitutes* A LOW-LYING ARCHIPELAGO OF IRREGULAR ISLANDS, *separated from one another by shallow bays, muddy lagoons, and tortuous bayous, the area of the water being somewhat greater than that of the land.* The bayous are of two classes, rather broad, short, deep passes, like Nine-Mile bayou, Three-Mile bayou, and Deep Pass, which serve as the main avenues of tidal flow to and from the interior bays [as stated by Major Harrod], and long narrow water-courses, which characteristically run lengthwise of the islands, as is seen in the case of Door Point bayou, Dead Man bayou. The bayous of the first class generally have a depth of from 18 to 42 feet, those of the second class from 5 to 12 feet, and all are more or less obstructed by bars across their mouths." Record, p. 2037

IX.

o Material Changes in the Conformation of the Islands since 1812.

The testimony makes it perfectly clear that there has n no material changes in the general conformation or ation of the islands in question since the year 1812. ch minor changes as have taken place have simply lened or narrowed a bayou here and there, or reduced the re line of an island not exceeding anywhere 300 or 400 . Dr. Stubbs has put forward a theory of the general sidence of this entire territory at the rate of about four to the century. That theory is expounded by him as ows:

"Q. The subsidence of the surface that we have been talking about is going on with the bottom of the Mississippi Sound at the same rate is it not?

"A. Yes, sir.

"Q. Being above the water makes no difference?

"A. No, sir.

"Q. The subsidence of the land under the water is at the same rate as the subsidence of the land above the water?

"A. Yes, sir." Record 354.

The practical result of this theory is that the subsidence, if it takes place, works no material change in the eral physical aspects of the region. That is fully adced by Dr. Stubbs in the following questions and ans:

"Q. Look at this map and examine it and see the general geographical formation along this coast

from Nine Mile bayou eastward to the Isle à Pitre, and then southward through Nine Mile bayou to Lake of the Mound; have you reason to believe that since 1812 there has been any material change in the general physical and geographical aspects of that region?

"A. I would say so, yes; for this reason, I would say that this has undergone the same subsidence as the remaining part of the Mississippi coast, and that many points that were formerly islands are now submerged.

"Q. Have you any reason to believe that any general change in the physical and geographical aspect of the area to which I have referred has taken place except such as would result from that subsidence?

"A. I do not know of any other.

"Q. Except the inference that you draw from the general operation of that subsidence? then—

"A. That is all.

"Q. You know of no reason to suppose there has been any general change of appearance in the physical aspect of the region I have indicated from 1812 down to this date?

"A. *That is right.*" Record, p. 349.

J. B. Baylor, another witness, offered by complainant, who for many years has been connected with the Coast and Geodetic Survey, and who in 1893 made a survey of this particular part of the coast, taking the data for his answer from a prior one made in the 50's, says:

"Q. Did you take any steps by trigonometrical methods to locate any of these points which had been established by the prior survey made in this locality?

"A. Yes, sir; I took angles and examined that marsh to try and find them.

"Q. Do you know or have you any data to show how far back from the coast line these stones were placed at the time they were originally located by the surveyors that were then doing this work?

"A. You mean the coast line between Malheureux Point and Isle à Pitre?

"Q. Yes, sir.

"A. Yes, sir; their stations were fully examined, giving their distance from the shore line, I had that description with me.

"Q. Did you determine by any trigonometrical method where this point should be in any one instance?

"A. I determined within a few yards or feet, something like that.

"Q. How did that point compare as to its distance from the shore line, with the records which you had showing the original distance from that point to the shore line?

"A. Well, as a rule there has been no very marked change in the last fifty years.

"Q. Has there been any change?

"A. Yes, sir; there have been changes; in some places the shore has washed away, but to no great extent.

"Q. What would you call a great change?

"A. I believe a great change would be say 300 or 400 feet.

"Q. What is the maximum change that you noticed in these points established by you?

"A. Well, I did not go into that question very closely; but I should not think, I could safely say, I did not find any change of over 300 feet in 50 years.

"Q. Would that apply to the coast line generally, from Malheureux Point to Isle à Pitre?

"A. Yes, sir, generally; there may be instances where it washed away more than that; but, as a general proposition, my work showed conclu-

> sively to my mind, that there has been no marked change in regard to the washing away of that coast in 50 years. We have accurate work on trigonometrical methods running back to about 1848; most of those points were established in 1855 that I examined there." Record, pp. 415-416.

Thus the complainant has established by a competent expert that it is certain from the scientific data in possession of the Coast Survey and from a recent survey made by him, "*that there has been no marked change in regard to the washing away of that coast in 50 years.*" The data to which he refers reaches back to 1848, a point of time only thirty-six years subsequent to the admission of Louisiana as a State. Can it be presumed that any marked change took place by the washing away of the coast during that thirty-six years in view of the scientific demonstration that no marked change from that cause has taken place since then? This aspect of complainant's case has perished at the hands of her own witnesses. A specially hard blow at the subsidence theory has been delivered by complainant's witness, Charles Marshall, Superintendent of the New Orleans and Mobile division of the Louisville and Nashville railroad, who says: "Q. And I understand you to state, in your direct examination, that you are of the belief that these marshlands over which your road runs are increasing in height rather than subsiding. A. Yes, sir; I stated that I did not know anything about the general or geological theory of subsidence; that my personal belief was that by accretion the ground was getting firmer. Q. And that belief is based on your observation during the last 20 years of that section? A. Yes, sir; 18 years. Q. And that

applies to the marshland east and west of Pearl River? A. West of Pearl River. Q. You think those marshes are firmer than they were in 1886? A. I think so." Record, p. 691.

X.

What Must be the Character of the Land Composing an Island?

"An island is a body of land surrounded by water." Enc. of Law, Vol. XVII, p. 530. The elements involved are: (1) the land composing the island, which must be of a certain character; (2) the water severing it from the mainland, which must be of a certain character. A body of land continually covered by water is not an island. It was held in *Weber* v. *The Pere Marquette Boom Co.*, 62 Mich., p. 626, that a submerged fen is not an island. The court, in that case, said: "No land has ever been seen above the water within the territory described in the plaintiff's declaration in this case." An island does not, however, lose its character as such although "at high tide it is almost covered by water." Such was the vital question in *De Guyer* v. *Banning*, 167 U. S., 723, in which an action of ejectment, according to the statement made by this court, was brought "to recover the possession of a certain island, known as Mormon Island, in the inner bay of San Pedro, California. At mean high tide the island has an area of less than 1 acre; at mean low tide, about 18.88 acres. The area of the bay, including the island, is 1,100.59 acres." Banning, the defendant and purchaser of the island, testified: "This tract of land known as Mormon Island is an island; at about half tide, it is an island, and is now an

island at low water; at low water it is only partially surrounded by water; at low water it would not be surrounded by water; at mean tide there would be about 2 feet of water around it; at high tide it is almost all covered with water. * * * A very small portion of the island is above ordinary high water. At mean tide, I don't think there is an acre above water." Upon that state of facts it was held that "an island within the exterior limits of a bay and almost covered at high tide is not included in a patent for a private land claim." As the title to Mormon Island was the subject of the suit, no conclusion could be rendered without a determination, upon the proof before the court, as to its character as such. It was held to be no less an island, because at high tide it was almost covered by water. That an island does not lose its character as such by erosion or submergence was settled in *Widdicome* v. *Rosemiller* (Circuit Court W. D. Missouri, C. D., October 21, 1902), 118 Fed. Rep. 295: "Island No. 24 in the Missouri River, within the present State of Missouri, was surveyed by the United States in 1820, and then contained about 50 acres. Subsequently during floods, it was submerged, and a portion of the surface was washed away; but on the subsidence of the waters a portion of it re-appeared and at no time was it washed away to the level of the bed of the river; a channel remained between the island and the west bank of the river. * * * Held, that the title of the United States to the island was not lost by the erosion or submergence, and that, by its conveyance after it re-appeared on the reliction of the waters, plaintiff took title thereto with the additions made by alluvion and accretion." The facts

in this record, drawn largely from complainant's witnesses, show beyond all question that the archipelago fringing the east coast of Louisiana is composed of islands which are such in the full geographical and legal sense of that term. As complainant contends the soil of these islands is identical with that of the mainland, and under all normal conditions they are above water. Each of the larger ones has an individual character and a name of its own. To all inhabitants of that vicinity, no matter whether they dwell in one State or the other, Isle à Pitre, Petit Pass, Racoon Island, Little Racoon Island, Crooked Island, Mud Cross Island, Pirate Point Island, Nigger Island, Dead Man's Island, Shell Island, Brush Island, Mink Island, Wild Goose Island, Elephant Point Island, Sundown Islands, Door Point Island, and others, are as well known as Cat Island, or Half Moon Island. By these names they have been known as islands from time immemorial. That they are distinct bodies of land surrounded by navigable tide water is as indisputable as any other fact in the physical environment of that region. As illustrations of that statement the following particulars will be given of the nature of the soil of these islands and of their capacity to be made the seats of human habitations. Alfred Joseph Monier, a witness for complainant, testifies that in January, 1904, he walked from Malheureux Point to Isle à Pitre in company with George Thiel, who rowed a boat along the water's edge to carry him across Nine Mile Bayou and other waters, dividing the islands from each other.

"Q. Did you have any difficulty in walking along this shore line?

"A. None at all.

"Q. What was the character of the shore line as you went along?

"A. The shore line was hard.

"Q. Was it above water?

"A. Yes, sir.

"Q. What did you do when you came to Blind Pass?

"A. Well, the one that was with me pulling the skiff crossed me over.

"Q. Did you get out of the skiff again when you got to the other side of Blind Pass?

"A. Yes, sir.

"Q. Did you have any trouble in walking along the shore line?

"A. No, sir; no trouble at all.

"Q. About how much above the water was the shore line?

"A. About a foot and a half to two feet. * * *

"Q. Could you have driven a buggy on any part of that shore line?

"A. Yes, sir. * * *

"Q. Could you have driven it the whole way, a horse and buggy?

"A. Not the whole way, because they had those bayous to cross. * * *

"Q. Did you get your feet wet walking along there?

"A. No, sir.

"Q. You went dry shod?

"A. Yes, sir. * * *

"Q. Do you undertake to tell the Commissioner that that sort of a trip could be made at any time during the year?

"A. Yes, sir.

"Q. And that there is no difficulty about it all?

"A. No, sir; there is not.

"Q. There is no tall grass or anything to interfere with you?

"A. Very few places they have tall grass.

"Q. Do you mean to say that is the character of the islands across to the south of you? Could you have made that trip anywhere across those islands from Malheureux Point to the east end of Isle à Pitre the same as you made it along the water's edge?

"A. Yes, sir.

"Q. What houses did you find along that route, habitations that people lived in?

"A. Well, I did not find but one house that people live in.

"Q. Where was that?

"A. Couldn't tell you the name of the bayou.

"Q. It was by Three Mile bayou was it not? Is it not true that that is the only house you say on that trip?

"A. At Three Mile bayou there is one house, but nobody lives in it." Record, pp. 325–327.

George Thiel, another witness for complainant, who was the companion on this trip of Monier, testifies:

"Q. What purpose did you go there for?

"A. I was sent over there for the purpose of pulling a boat along the lake and Monier was to walk the marsh, and I pulled the boat along and while I went along I would get off from time to time and go ashore and walk the marsh a piece to find out whether it was solid and it was solid, the best marsh I ever went in, *you can carry cattle there and turn them loose and they would be very well off*, that is one of the best marshes I ever traveled on and I have been on many marshes, but that is the best I ever traveled on.

"Q. Did you follow along with the skiff all the way from Malheureux Point to Isle à Pitre?

"A. Yes, sir.

"Q. Did you see Alfred Joseph Monier walking along there?

"A. Yes, sir; I saw him walk every step of it.

"Q. Did you see him walk that whole distance?

"A. Yes, sir.

"Q. What did you do when he came to a bayou or anything like that?

"A. Then I pulled him to the shore, I carried him across the bayou, then he would get out on the other side and walk again, and I would row into the lake and go to pulling again. * * *

"Q. You have had some experience in trembling prairies?

"A. Yes, sir.

"Q. Was that a trembling prairie?

"A. No, sir; it was perfectly solid, there was no trembling prairie about that. * * * A. I didn't find anything of the kind there, but I suppose if they would go there and plant it it would grow such as cotton that can stand salt water, rice, cane." Record, pp. 330–331.

The Court should bear in mind that these two witnesses were specially delegated by complainant to make a careful examination of the lands on these islands with a view to testifying in this case. Monier says:

"Q. That trip was made to prepare you to testify in this case, was it not?

"A. Yes, sir.

"Q. And so it was with your companion?

"A. Yes, sir.

"Q. The time was selected by others for your start?

"A. Yes, sir.

"Q. And you were paid for the trip?

"A. Yes, sir." Record, pp. 329–330.

Under these conditions complainant is estopped to deny the physical character of the soil on these islands as

described by her own witnesses. The mistaken theory upon which complainant acted in offering this proof was that the geographical character of an island can be affected by its geological origin, and no doubt by the idea that these islands were once a solid body of mainland since broken up. Both assumptions have been proven to be entirely untenable, the last by complainant's expert, Dr. Stubbs, who, speaking as a geologist, said that these islands were not cut off from the mainland.

> "Q. Is it not a very familiar matter in the study of geology, the causes by which these archipelagoes are formed; the process by which such islands have been cut off from the mainland?
>
> "A. Sometimes, and at others not. *These on the coast of Louisiana have not been cut off; they have been formed by the waves and winds of the Gulf.*" Record, p. 345.

Complainant's witness, Louis Cucullu, president of the Peoples' Bank, of New Orleans, who says he knows well the territory in question, testifies as follows: "A. Like I tell you, on the shore, all along the shore of Lake Borgne and the Gulf, *those marshes are always above water*, and it takes a high tide to cover most of those marshes."

XI.

What Must be the Character of the Water Surrounding an Island—Test of Navigability.

It is necessary that a strip, not necessarily a wide strip, of navigable water should separate an island from the mainland. In *Dumphry* v. *Williams*, 2 Pugsley (N. B.), 350, it was said: "so far as appeared, the island in dispute existed as a separate and distinct island, long before Currie

got possession of the Flat Island; and at that time, and until recently, there was a channel between the two islands about one or two rods in width, navigable for canoes, at low water in summer." In *King* v. *Young*, 76 Me., it was held that a mussel-bed was not an island because no navigable water flowed between it and the shore at low tide. An island must be surrounded not only by water but by navigable water. "A stream which has sufficient depth and width to float vessels, boats, or other water craft used in the transportation of freight or passengers, or both including rafts of lumber is navigable." *American River Water Co.* v. *Amsden*, 6 Cal., 443. "Tide water navigated for pleasure is navigable water, although the craft on it have never been used for the purposes of trade or agriculture." *Atty. Gen.* v. *Woods*, 108 Mass., 436. See also *Grand Rapids* v. *Powers*, 89 Mich., 94; *Bamprey* v. *State*, 52 Minn., 181. "All tide water is *prima facie* public and navigable, *the burden of proof is on the person alleging the contrary.*" Farnham on Waters, Vol. 1, p. 125, citing *Sullivan* v. *Spotswood*, 82 Ala., 163. See also *Dumas* v *Garnett*, 32 Flor., p. 73. There is nothing in the evidence to give color to the idea that the islands in question are submerged islands. Upon the contrary it clearly appears from the proof offered by complainant, that they are composed of firm soil elevated generally from a foot and a half to two feet, and some at 3 to 4 above the tide, upon which a man can walk dry shod even in the most rainy month of the year; that even a buggy can be driven conveniently along their shores; that there are some houses upon them; that certain plants, such as rice, cotton, and

cane could be grown upon them; that they are swept by water only in storms or during extraordinary tides. Such being the uncontradicted testimony of complainant's own witnesses, specially prepared to testify on that subject, it only remains to be proven that such islands are surrounded by *navigable* water. Complainant's witnesses have with equal emphasis, settled that fact. Mr. Baylor of the Geological Survey, who has critically examined the entire area, says:

> "Q. What is the usual definition given by geographers to an island. What is an island from the standpoint of physical geography?
>
> "A. An island is a body of land surrounded by water.
>
> "Q. Well, now, let us begin from Nine Mile Bayou and take the piece of land that is bounded on the west by Nine Mile Bayou and on the east by Three Mile Bayou and on the north by Mississippi Sound and on the south by Nine Mile Bay. Under the ordinary definition of physical geography, isn't that an island, a piece of land surrounded by water?
>
> "A. Yes, sir; that is an island.
>
> "Q. Isn't it a piece of land surrounded by water? Can't a craft sail all around that piece of land—a craft of moderate draft?
>
> "A. Well, a craft can sail all around a good deal of that portion of Louisiana.
>
> "Q. I ask you this particular question: can a craft sail all around this piece of land, a craft of moderate draft, this piece of land I have named?
>
> "A. Yes, sir; moderate draft.
>
> "Q. Let us go to the next piece of land, bounded on the west by Three Mile Bayou and on the east by Johnson Bay and the neck of water connecting it with Mississippi Sound, on the north by Mississippi Sound, and on the south by the

body of water around Nigger Point; is that a body of land surrounded by water around which a craft of moderate draft can sail?

"A. Yes, sir.

"Q. Now, let us take the next piece bounded on the east by Turkey Bayou, bounded on the north by Mississippi Sound, bounded on the west by Johnson Bay and the bayou connecting Johnson Bay with Mississippi Sound; isn't that a body of land surrounded by water around which a craft of moderate draft can sail?

"A. Yes, sir.

"Q. Now, let us take the next piece bounded on the west by Turkey Bayou, on the north by Mississippi Sound, on the east by Grand Pass and the bayou connecting Grand Pass with Karako Bay; isn't that a body of land surrounded by water around which a craft of moderate draft can sail?

"A. I want to look at this chart here. Yes, that is true; a craft of moderate draft can sail around that body of land.

"Q. Let us take the next one, Isle à Pitre, isn't that a body of land surrounded by water around which a craft of moderate draft can sail?

"A. Yes, sir.

"Q. So, then, is it not true that what you have spoken of as the coast line between Nine Mile Bayou on the west and Isle à Pitre on the east, is it not composed of a string of islands such as you have described, bodies of land surrounded by water around which a craft of moderate draft can sail?

"A. You expect me to give you my honest frank opinion?

"Q. Yes.

"A. *I think it is*, but no more than a great deal of the Mississippi delta.

"Q. That you see is purely argument. That may be so; they can argue you that. But I am just trying to get at the facts.

"A. *They are certainly bodies of land around which vessels of moderate draft can sail.*" Record, pp. 421, 422.

Capt. Alfred C. Ruiz, deputy inspector of the La. Oyster Com., in charge of its patrol boat "Majestic," of a draft of 3½ feet with ballast, admitted that he can navigate the waters around these islands with only a little difficulty in that boat.

"Q. What is the average depth of the water inside of the Louisiana marshes?

"A. Taking the average it would be about 2½ to 3 feet. * * *

"Q. How much water does the "Majestic" draw?

"A. Three feet and a half, with ballast

"Q. She has been going through these marshes as you have testified?

"A. With high tide. I have to take my chances to go, and then I am dragging, I can't use my centerboard."

But the fact remains that a boat of that draft can go. In some places of course the channels are very deep. The same witness says:

"Q. Has that Nine Mile bayou a deep channel?

"A. Very deep." Record, pp. 307–308.

Complainant's witness Charles Sanger, who has navigated among these islands, in the interior waters, as far as Lake of the Mound, says:

"Q. Ever sailed through these interior waters?

"A. Once.

"Q. Once?

"A. At Treasure Bay I know we went through there in ordinary tide.

"Q. Show me your course, how you travelled, where you went into it and where you went out

that one time? Where did you go in, through what?

"A. We went in through Nine Mile bayou, then we went through.

"Q. Bay Bordeaux, then into Treasure Bay, then where did you go?

"A. I think somewhere up in here, that is where we stopped. (Witness here pointed out on the map before him the Lake of the Mound.) By Mr. Zacharie:

"Q. Do you mean to say you went into the Lake of the Mound?

"A. Somewhere up in here.

"Q. Somewhere near Lake of the Mound?

"A. Yes, sir.

"Q. Did you go out there with your boat?

"A. Yes, sir.

"Q. Did you come out the same route?

"A. Yes, sir."

The navigable character of the water as far as Lake of the Mound was thus clearly established. Record, pp. 264–65.

Capt. A. S. Cowaon, who has been familiar with the region in question, "for half a century," says:

"Q. Is it not true that any time during your knowldege of that coast that water craft of light draft could pass southward through any of these water courses?

"A. Yes, sir; they could always go southward through them.

"Q. How far south?

"A. Vessels drawing three feet of water came down as far as Morgan Harbor, that is about 24 miles down in the marsh, that is about southwest from the entrance of Three Mile Bayou, it don't show on this map at all, it is way south of Drum

Bay; mind you; I am speaking of common tide. In a northwester they couldn't go through at all."

John Walker, a steamboat-man since 1855, says: "Q. What craft did you have in going through Three Mile Bayou? A. I had a small steamboat. (1867). Q. How much did she draw? A. Well, she only drew about four feet, *but I found seven feet of water there.* Q. You found seven feet of water where? A. In the entrance. Q. You say that you went through Three Mile Bayou? A. Three Mile Bayou. Q. Where did you go, Captain? A. From Chandeleur into Lake Borgne. Q. From Chandeleur Sound through Three Mile Bayou into Lake Borgne? A. Yes, sir. Q. With a steamer drawing four feet? A. Yes, sir; she was a steamer." Record, p. 1271. And here reference must again be made to the report of the United States Fish Commission, as to the result of the cruise of the "Fish Hawk." In describing the navigable character of the water by which the "low-lying archipelago of islands" is surrounded, that report states: "The bays, with the exception of several of those opening into Chandeleur Sound, communicate with the outer water by narrow mouths. Their floors are comparatively level and, with one or two exceptions, are composed principally of soft mud, with scattered patches of hard mud and sand, usually so small in area as to be negligible in plotting and soundings. *The depth of water is generally from 3 to 6 feet although in some of the bays, particularly those to the eastward, there are channels through which a considerably greater depth can be carried.*" Record, p. 2037.

XII.

Worthlessness of Maps in Boundary Controversies.

The business of a cartographer, or map-maker, is to describe land forms, not to settle titles of particular sovereignties to particular parts of the earth's surface. The value of every map depends upon two factors: first, the completeness of the data out of which it is constructed; second, the skill of the cartographer in working such data into an harmonious whole. Early maps, which are necessarily based upon incomplete data, are almost invariably misleading guides. For that reason, international jurists generally regard such maps as of little or no value in boundary controversies. The great English jurist, Sir Travers Twiss, in speaking of the uselessness of maps in the investigation of boundary questions, has even regretted that they are ever appealed to at all. He says: "Maps, however, are but pictorial representations of supposed territorial limits, the evidence of which must be sought for elsewhere. There may be cases, it is true, where maps may be evidence; when, for instance, it has been specially provided that a particular map, such as 'Melish's Map of North America,' shall be the basis of a convention; but it is to be regretted that maps of unsurveyed districts should ever have been introduced into diplomatic discussions, where limits conformable to convenient physical outlines, such as headlands or water-courses, are really sought for, and are understood to be the subject of negotiation. The pictorial features of the country which, in such cases, have been frequently assumed as the basis of negotiation, have not unusually

caused greater embarrassment to both parties in the subsequent attempt to reconcile them with the natural features, than the original question in dispute, to which they were supposed to have furnished a solution." The Oregon Question, p. 228. As an illustration of "the general futility of the argument from maps in the case of disputed territory," the author refers to a letter written during the Oregon dispute, by Mr. Buchanan, while President of the United States, to Mr. Pakenham, the then British Minister at Washington, in which the former says: "Even British geographers have not doubted our title to the territory in dispute. There is a large and splendid globe now in the Department of State, recently received from London, and published by Maltby and Co., manufacturers and publishers to 'The Society for the Diffusion of Useful Knowledge,' which assigns this territory to the United States." Sir Travers adds: "The history, however, of this globe is rather curious. It was ordered of Mr. Malby (not Maltby), for the Department of State, at Washington, before Mr. Everett quitted his post of Minister of the United States in this country. It no doubt deserves the commendation bestowed upon it by Mr. Buchanan, for Mr. Malby manufactures excellent globes, but the globe sent to Washington was not made from the plates used on the globes published under the sanction of 'The Society for the Diffusion of Useful Knowledge,' though this is not said by way of disparagement to it. The Society, in its maps, has carried the boundary line west of the Rocky Mountains, along the 49th parallel to the Columbia River, and thence along that river to the sea; but in its globes the line is not

marked beyond the Rocky Mountains. *Mr. Malby, knowing that the globe ordered of him was intended for the Department of State, at Washington, was led to suppose that it would be more satisfactorily completed, as it was an American order, if he coloured in, for it is not engraved, the boundary line proposed by the Commissioners of the United States. The author would apologize for discussing so trifling a circumstance had not the authorities of the United States considered the fact of sufficient importance to ground a serious argument upon it.*" Preface, pp. VII, VIII. In "Greenhow's History of Oregon and California," note "F" at p. 437, this pungent statement occurs: "These discrepancies should not excite surprise, for maps and books of geography, which are most frequently consulted in relation to boundaries, are or rather have been, the very worst authorities on such subjects; *as they are ordinarily made by persons wholly unacquainted with political affairs.*" In *United States* v. *Texas*, 162 U. S., 1, this Court has recognized the general rule of international law as stated by Sir Travers Twiss, that when a particular map is referred to in a treaty or compact, it is to be given the same effect as if it had been expressly made a part of such treaty or compact. In that case it was said: "If, as asserted by the State, this case should be determined upon the basis that the 100th meridian is where the Melish map located it, and not where it is in fact, this Court may well decline to recognize a claim attended with such grave consequences as those suggested by the answer, unless it be clearly established. * * * But are we justified, upon any fair interpretation of the treaty, in assuming that the parties regarded that map as absolutely

correct, in all respects, and not to be departed from in any particular or under any circumstances? * * * We have said that the treaty itself, upon a reasonable interpretation of its provisions, left it open to the contracting parties, through commissioners and surveyors, to fix the lines with precision, and, therefore, to show, by competent evidence, where the true 100th meridian was located." It thus appears that this court will not permit an inaccurate map to be accepted as a guide in the settlement of a boundary controversy, even when it is made a part of the convention or compact into which the parties have entered.

No one of the mass of maps, ancient and modern, offered in this case comes within the special exception discussed above, for the reason that *the acts to be construed make no reference to any map whatsoever*. Thus the whole mass falls under the general interdict pronounced by Sir Travers Twiss and Mr. Greenhow against the use of maps in boundary controversies, "as they are ordinarily made by persons wholly unacquainted with political affairs." When the entire inadequacy and inaccuracy of the earlier maps offered in this case are considered, it is easy to understand how such maps "have not unusually caused greater embarrassment to both parties in the subsequent attempt to reconcile them with the natural features, than the original question in dispute, to which they were supposed to have furnished a solution." The reason for that condition of things here is easy of explanation. Until very recently the islands within this disputed territory were of no value; they were an unexplored, unsurveyed, and uninhabited expanse, in which neither State took any special interest. It is not

therefore strange that the early cartographers were without data upon which to construct maps of the archipelago in question especially when we find on the Darby map (No. 20 and 20a), as late as 1816, the statement that the disputed territory "has never been surveyed N. E. of Bayou Terre aux Bœufs; the coast and interior remain, but imperfectly known. The surface is flat and but little elevated above the level of the sea." And yet it must be said to the honor of the early cartographers of this section that they were careful to declare, *on the face of their maps*, that they had no adequate data as to the topography of the region in dispute. For instance on the Dutch map (No. 9 and 9a), of 1766, which has for legend "*De Uitloop van de Rivier Mississippi,*" a line is drawn around the area occupied by the archipelago in question, and then at the side is printed, "*Ondiepte met verscheide kleine eilanden die weinig of niet bekend zyn*" (*Shallow water with many small islands which are little known.*) In the same way on the English map of 1775 (No. 10 and 10a), published by Thomas Jeffreys, Geographer to Her Majesty, and describing "The coast of West Florida and Louisiana," is printed in the same way at the side of the region in dispute—"*Shallow water with many small islands, but very little known.*" Again, on a map of the same date, taken from the same atlas of 1775 (No. 11 and 11a), describing the "Course of the Mississippi river from the Balise to Fort Chartres," as drawn on an expedition to the Illinois in the latter end of the year 1765, by Lieut. Ross of the 34th regiment, is printed in the same way, at the side of the region in dispute—"*Shallow water covered by many small islands which are but little*

known." Again, on the English copy of the Dutch map made by Isaac Tirion in 1766 (No. 12), first published in a periodical called the "London Magazine" and representing the course of "the River Mississippi from the sea to Bayagoulas," is printed in the same way, by the side of the line inclosing the area occupied by the archipelago,—"*Shallow water with many small islands very little known.*" The absurd inaccuracy of all these early maps in the location of even so prominent a feature as Lake Borgne is a cogent illustration of the fact that the term, "very little known," should have been applied to the larger bodies of water as well as to the more important divisions of the land. In juxtaposition with the foregoing statements, which appear in almost identical form upon the four maps described above, should be printed the confirmatory statement of complainant's witness, the eminent engineer, Major B. M. Harrod, who in describing the geological origin of the archipelago in question has said: "The river deposits being placed out *in a shallow sea* that had tidal movements and instead of forming a solid peninsula it left these open areas through it for the tidal movement in and out of Lake Borgne and Lake Pontchartrain and that those lakes or spaces of water have been enlarged since their formation, by subsidence." And so the testimony of the geologist that the islands in question were formed in "*a shallow sea*" is confirmed by the earlier cartographers who find "*Shallow water* with many small islands, which are little known," or "*Shallow water* covered by many small islands which are but little known." Thus geology and geography join hands in contributing a series of interlinked facts which no

ingenuity can be clever enough to break, no criticism sharp enough to sever—facts which declare that, from the very beginning, the islands in question, *formed as such in a shallow sea*, were never a part of the mainland of Louisiana.

If a few careless or ignorant cartographers, prior to a survey of these islands, have described the area occupied by them as a peninsula, the mistake, so common in the map-making of unexplored regions, is of no importance whatever. The fact is that no accurate or reliable maps of this region were ever made until the data for them were collected by the experts sent out by our Coast and Geodetic Survey. When upon such data accurate maps were at last constructed the fact that the region in question was occupied *by an archipelago of islands*, clearly and distinctly defined, was put beyond all questions. The larger islands such as Petit Pass Island, Racoon Islands, Little Racoon Island, Wild Goose Island, Deadman's Island, Mud Cross Islands, Crooked Islands, Mink Island, Shell Island, Brush Island, Door Point Island, Sundown Island, Pirate Island, Nigger Point Island, Elephant Point Island, Isle à Pitre, Martin Island, Mitchell Islands, and the larger bodies of water surrounding them, such as Nine Mile Bayou, Three Mile Bayou, South Bayou, Johnson's Bayou, Turkey Bayou, Drum Bayou, Grand Pass Bayou, Pierre, Elephant Bayou, Creole Gap, Jack Williams Bayou, Greque Bayou, Picnic Bayou, South West Pass, Door Point Bayou, Dead Man's Bayou, Oyster Bay, Bay Brodeau, Kirchunbs Bay, Cranetown Bay, India Mound Bay, and False Mouth Bayou are as well known in the geography of the region in question, *and are as distinctly named and defined on the maps describing*

it, as any other islands or bodies of water in that part of the world. How is it possible to maintain that this long list of islands, each with its well established geographical name and each surrounded by navigable tide water, in which craft of considerable size can sail, constitute a part of the mainland of Louisiana? Why should they ever have been designated as islands, by those best acquainted with them, if they are not such?

As heretofore pointed out, in connection with the testimony of Mr. Baylor, the Coast and Geodetic Survey "have accurate work on *trigonometrical methods* running back to about 1848," a date within 36 years of the admission of the State of Louisiana. That work puts beyond all question the fact that no material changes in the general physical aspects of the region have taken place since that time. When asked, "Has there been any change?" Mr. Baylor answered: "Yes, sir, there have been changes; in some places the shore has washed away, but to no great extent. Q. What would you call a great change? I believe a great change would be 300 or 400 feet. Q. What is the maximum change that you noticed in these points established by you? Well, I did not go into that question very closely; but I should not think, *I could safely say I did not find any change of over 300 feet* in 50 years." p. 416. If minute scientific investigation has thus established the fact that no material changes have taken place since 1848, there is certainly nothing in the evidence to justify the idea that any material changes have taken place in the character of the islands as such since 1812. The grotesque and unplausible theory that the archipelago

of islands, as it exists to-day, was formed, since 1812, out of the mainland of Louisiana by subsidence and the action of storms and tides is really too fanciful for serious discussion. It is unplausible for four reasons: first, because the geological origin of these islands as described by the experts produced by complainant crushes such a theory, Prof. Stubbs maintaining that the islands in question "have not been cut off; they have been formed by the waves and winds of the Gulf," and Major Harrod maintaining that they are the result of "the river deposits being placed out in a shallow sea that had tidal movements. * * * that water areas were left there when it was *originally formed*"; second, because the early cartographers recognized and noted the fact that the area in question was occupied by a body of small and unknown islands in shallow water; third, because the scientific investigations of the Coast and Geodetic Survey have settled the fact that no material changes in the general aspects of the territory in dispute have taken place in recent times; fourth, because the testimony of the geological experts demonstrates that if any such radical changes as complainant contends for ever took place, such changes must have been the work of hundreds, if not thousands of years of gradual transformation. In the light of the present controversy as to the title of the disputed territory between two sovereignties, it is hardly necessary to add that any mistake as to the merits of the legal questions involved made by recent cartographers, even by Col. Hardee, cannot be of the slightest importance. As Mr. Greenhow has well said such maps "are ordinarily

made by persons wholly unacquainted with political affairs." Mr. Edward H. Nall, the Land Commissioner, of Mississippi, in speaking upon the subject of the Hardee Map, said: "I don't believe any man has ever made a map of Mississippi or Louisiana that knew any more about the dividing line that is now in contention than we do about the burial place of Moses."

Mr. William Beer, of the Howard Memorial Library, of New Orleans, who furnished most of the maps put in evidence by complainant, and who was several times recalled, *on cross-examination* admitted their glaring imperfections and inconsistencies in no uncertain terms. For instance when asked (Record, p. 617), "I want to ask you to do us the kindness to examine the map of B. Lafon, 1806, and tell us what islands you find on that map within six leagues of the Mississippi shore. Let us begin at the mouth of Pearl River and travel eastward." He answered, "We have to begin by discussing, or by stating that this map is not necessarily correct. You are asking me now about a special distance which I can measure correctly. Now, it may so happen that that was not truly at that distance. This Lafon map is Lafon's presentation of the coast at that time. All I can say is that on Lafon's map as measured by the scale given on it, there are certain islands within six leagues, that is all I can say." Again when asked (Record, p. 793), "You had something to say this morning and heretofore, with reference to coloring. I will ask you in view of your qualifications, as an expert on these maps and on all other matters with reference to which you have qualified yourself, whether you give any

special significance to the geographers or map-makers, with reference to coloring of outlying islands?" He answered, "very little indeed." Any attempt made by any cartographer, since 1812, to determine by coloring to which sovereignty the area in question belongs, amounts to nothing more than a guess upon his part as to the manner in which this court will determine the issues involved here. As a general rule wherever a cartographer has made more than one map, he has guessed on both sides of the question. Even more frivolous is the claim that the archipelago in question must be considered a part of the mainland of Louisiana, because the area occupied by it is embraced within the region known since time immemorial as the "Louisiana Marshes," even before the State of Louisiana was admitted into the Union, and before the United States acquired the said territory, and while the southern part of Mississippi was also a part of the French territory known as Louisiana. If by virtue of that vague and general appelation, Louisiana can claim the area in question, then Florida can with equal right claim possession and sovereignty over the parishes of that State north of the River Iberville, because they are known as "Florida parishes."

XIII.

Practical Application of a Rule of Construction That Removes All Conflict Between the Acts in Question by Giving Effect to Every Provision of the Respective Grants.

There is nothing, even in complainant's evidence, to raise a doubt that the Congresses that defined the boundaries of Louisiana, Mississippi, and Alabama, saw the mainland of the first named separated from the islands in

question, just as we see that separation to-day; and the most conclusive evidence of the truth of that statement is to be found in the provision that Mississippi should possess all islands within *six leagues* (practically 18 miles), of her coast. If what defendant claims as islands were not such when her boundaries were defined, *at least one-half of the grant of islands to her has no subject-matter upon which to operate.* Congress might just as well have limited the grant to islands within *three leagues* of the Mississippi coast, if there were no islands beyond that limit. The fact that Congress attempted to grant to Mississippi all islands within eighteen miles of her coast is conclusive evidence *that that body considered the islands in question as such, and that they had not been previously granted to Louisiana.* Here the court should apply the rule laid down in Pollard *v.* Kibbe, 14 Pet., 366: "*It is not to be presumed that Congress would grant or even simply release the right of the United States to land confessedly before granted.*" The act of 1817, is an affirmative declaration by Congress that at its date the islands in question were such, and that they had never been previously granted to Louisiana. That Congress actually attempted to grant the islands to Mississippi the bill admits when, in par. 24, it avers that the elimination of the deep water channel theory "would cause the limits of the two States to *conflict and overlap.*" If Congress did not attempt to make the grant in question to Mississippi an overlapping would be impossible. And, if the islands in question are not such then the grant to Mississippi, beyond the nine-mile limit, must perish for want of subject-matter. *Thus the entire attempt made by Congress to com-*

pensate Mississippi for her narrow sea-front by giving her a zone of islands twice as wide as that granted to Louisiana would come to naught, because, forsooth, there were no islands within such wider zone upon which the grant could operate. Apart from reasons given already such a construction will be rejected under the rule that directs every court to strive to give effect to all the words of a grant *ut res magis valeat quam pereat.* In the construction of statutes as in the construction of deeds the cardinal rule is to effectuate, if possible, the entire intention of the grantor, and in ascertaining that intention regard must be had to the situation and the relative position of the parties, and the objects which they had in view. *Saunders* v. *Saunders*, 20 Ala., 710; *Strong* v. *Gregory*, 19 Ala., 146. No better statement of the rule can be found than the following: "In the construction of statutes one part must be construed by another; to collect the legislative intention the whole must be inspected. The Stafford Justices, Brock-R., 162, *and recourse may be had for this purpose to a proviso which has been repealed by a subsequent act. Bk. of Savings* v. *Collector*, 3 Wall., 495. Statutes are to be interpreted so as to give effect to all the words therein, if such interpretation be reasonable, and be neither repugnant to the provisions, nor inconsistent with the objects of the statute. *U. S.* v. *Bassett*, 2 Story R., 389. * * * *It is not to be presumed, that the legislature intended that any part of a statute should be without its proper meaning, force or effect.*" Potter's Dwarris on Stat. and Const., p. 188, note 8. The moment the court determines that the acts in question are *in pari materia*, then, under the rule laid down in *Alexander* v.

Alexandria, they "are to be construed together as forming one act." When that point is reached, "It is not to be presumed that the legislature intended that any part of a statute should be without its proper meaning, force, or effect." The grant to Mississippi of all islands within eighteen miles of her coast thus becomes, in contemplation of law, simply a *subsequent clause* in the act of 1812, admitting Louisiana. Nothing then remains but application of the following rule as defined in *Alexander* v. *Alexandria:* "If in a subsequent clause of the same act provisions are introduced which show the sense in which the legislature employed doubtful phrases previously used that sense is be adopted in constructing those phrases. Consequently, *if a subsequent act on the same subject* affords complete demonstration of the legislative sense of its own language the rule which has been stated, requiring that the subsequent should be incorporated into the foregoing act, is a direction to the courts in expounding the provisions of the law." Effect can thus be given to every part of the grant made by Congress to the two States in question, and all conflicts avoided, by the application of a settled rule of construction which directs courts, under such circumstances, to qualify the general terms first used in a statute by subsequent exceptions in modification of them. Thus Louisiana would take all islands within *three leagues* of her coast, *excepting such as are within six leagues of the coast of Mississippi.* If the grant made to Louisiana by the act of 1812, and that made to Mississippi by the act of 1817, were contained in a single statute, the grant to the former, appearing in the first section of such statute, and

the grant to the latter appearing in a subsequent section, would the court for a moment hesitate to limit the general terms of the first grant by the special terms of the second? Under the authorities, the fact that these grants are contained in separate statutes *in pari materia*, is a matter of no legal significance whatever.

XIV.

Louisiana's Claim of Title Under the Swamp and Overflowed Land Act of March 2, 1849.

By an act approved March 2, 1849, entitled "An Act to Aid the State of Louisiana in Draining the Swamp Lands Therein," it was provided that "to aid the State of Louisiana in constructing the necessary levees and drains to reclaim the swamp and overflowed lands therein, the whole of those swamp and overflowed lands, which may be found or are found unfit for cultivation, shall be, and the same are hereby granted to that State." There is nothing in the act to give color to the idea suggested in par. 29, of the bill by the following unjustifiable statement: "The Congress of the United States, as well as the various departments of the United States Government, having authority in the premises, have themselves *recognized the boundary line contended for by the State of Louisiana*, by reason of the fact that the United States Government has *confirmed* to the State of Louisiana the lands composing Half Moon Island, etc." So far from there being the slightest foundation of truth for that suggestion the fact is that the act in question undertook to give to complainant as a donation certain lands which, *by her application for them, she admitted belonged, not to her, but to the United States.* The very improper

use of the word "confirmed" in this connection, as evidence of the recognition by the United States of the claim of complainant to the boundary in question, is too manifest to require argument, however much it may justify condemnation. Complainant can claim no benefit under the foregoing act, unless she can demonstrate, (1) that the United States was possessed of title to the territory in question on March 2, 1849; (2) that such act had or was intended to have application to these island lands which were not of the character contemplated in it. And yet despite the fact that the United States had, nearly forty years before, made an express grant of these islands to the State of Mississippi; and despite the fact that the lands composing them was neither "swamp nor overflowed" within the meaning of the act, complainant unlawfully attempted to acquire color of title to the same by making a pretended selection under the terms of said act. Under a misapprehension as to his authority in the premises, and while acting beyond the limits of his jurisdiction, the Secretary of the Interior undertook to approve such selections, and under and by virtue of such approval complainant claims title to said lands. After issuing a few patents to several individuals, such patents purporting to convey title to the Isle à Pitre, and after creating the Lake Borgne Basin Levee District by the act of 1892, complainant patented to said Board the residue, constituting the bulk of said lands. Since that time said Board has been going through the form of selling said lands at a nominal price (12½ cents per acre), to persons desiring them for fishing and oyster purposes, under deeds expressly excluding warranty in the following

terms written upon the face of said deeds: "It is distinctly understood by the parties hereto that the Board of Commissioners for the Lake Borgne Basin Levee District, through their said president, transfer, assign, and set over, only those rights and interests which the said Board now have in and to the aforesaid lands, giving hereby simply a quit claim, and making and giving no warranty whatsoever; *and further, that should the said title be subsequently declared void, the said Board shall not reimburse to the purchaser any sum whatever.*" Record, p. 1088; Doc. No. 59. A more emphatic declaration could hardly have been made of the flimsiness of the pretended claim of complainant under the act in question—a claim whose invalidity will be demonstrated on three distinct grounds, either of which is conclusive against it.

In the first place if defendant's contention is sound that the islands in question were conveyed to her by an express grant upon her admission to the Union in 1817, then the subsequent Act of March 2, 1849, purporting to donate certain swamp and overflowed lands to complainant can have no possible operation for the simple reason that the United States had, at the date of said act, neither title nor interest. Grants made by a legislature are not warranties; and if the thing granted was not in the grantor at the time of the grant, no estate passes to her grantee. *Rice* v. *Minn. & N. W. R. R. Co.*, 1 Black, 358; *Polk* v. *Wendal*, 9 Cranch, 87. If that be true, then the *ex parte* proceeding of the Secretary of the Interior in 1852, was simply null and void as an attempt to take away a part of the domain of a State without the consent of its legis-

lature. Art. IV, Sec. 3, of the Const. In *Stone* v. *United States*, 2 Wall., 525, involving the validity of acts of the Secretary of the Interior under like circumstances, it was held that where land claimed never was within the tract alloted to the Delaware Indians, but was within the limits of a reservation legally made by the President for military purposes, the patents issued therefor were void because the Secretary exceeded his authority. In the second place, the act in question could not be applied to the lands of which these islands were composed, because they were not "swamp and overflowed lands," within its meaning, nor in any way connected with the levee system it was designed to promote. It was long ago settled that lands subject "to periodical overflow" are not "swamp and overflowed," that term applying only "to those lands which are overflowed and will remain so without reclamation or drainage." The phrase "subject to periodical overflow" has reference to a condition, which may or may not exist, and which when it does exist is of a temporary character. *Heath* v. *Wallace*, 138 U. S., 573. In that case it was firmly settled that lands described as "subject to periodical overflow" cannot be certified as "swamp lands." Complainant's own evidence puts the fact beyond question that, under normal conditions, the islands in dispute are never under water; only during storms or phenomenal tides does the water sweep over them. The well known expedition of Monier and Thiel was made, at complainant's instance, to demonstrate that fact; and complainant's witness Louis Cucullu, a member of the City Council of New Orleans and President of the People's Bank of that city, who

has known the region in dispute from infancy,' was careful to say (Record, p. 977); "all along the shore of Lake Borgne and the Gulf, *those marshes are always above water*, and it takes a high tide to cover most of those marshes." Theil said: "I don't say it don't, *it overflows sometimes*, in storms it will be overflowed like anywhere else." On her own evidence complainant can only claim that the islands are "subject to periodical overflow," and that settles the fact that they were never within the purview of the act in question—the term *swamp* having no possible application to lands of the character of those composing these islands. If an appeal be made to the doctrine that decisions of the Secretary of the Interior upon matters of fact, *within his jurisdiction*, are, in the absence of fraud or imposition, conclusive (*Heath* v. *Wallace*, 188 U. S., p. 573), the answer is that in this case he was entirely *without jurisdiction*, as the title to the lands in question had long before been vested in the State of Mississippi, by a definite and specific grant from the United States, a grant made of the islands as such regardless of the character of the lands that composed them. In the third place, the Secretary of the Interior was entirely without jurisdiction, because the clear and definite purpose of the act in question was "to aid the State of Louisiana in constructing the necessary levees and drains to reclaim the swamp and overflowed lands therein." Thus by this and subsequent acts of a like character a certain class of lands situated in the States adjacent to the banks of the Mississippi River were given for the building of levees and drains for the purpose of their reclamation. The lands in dispute were not only

not of the class known as "swamp and overflowed," but they were in a district apart to which the levee system could not be extended, and to which it had no application. The subject-matter was not, therefore, drawn, either by the letter or spirit of the Swamp and Overflow Land Acts, within the Secretary of the Interior's jurisdiction. It is not, therefore, strange, under such circumstances, that ordinary prudence should have prompted the Board of Commissioners for the Lake Borgne Basin Levee District to declare on the face of their quit-claim deeds, "that should the said title be subsequently declared void, the said Board shall not reimburse to the purchaser any sum whatever." This aspect of the case is not worthy of serious consideration save so far as it goes to show that the authorities of Louisiana, by seeking to acquire color of title to the islands in question, by an appeal to the Swamp and Overflowed Land Acts, were convinced that that State possessed no title to them, under the act of April 6th, 1812, admitting her into the Union. If these islands did pass to Mississippi, under the act of 1817, admitting her into the Union, of course she could not be divested of title to them under a proceeding to which she was not a party had before a ministerial officer.

The Claim of Acquiescence.

No part of the case stated by complainant is more vague and shadowy than that in which the claim of acquiescence is embodied, if such a claim, upon the allegations of the bill, can be said to have been made at all. If the

pleadings actually present it, it can only be inferred from the following statements which contain all that has been alleged concerning it: "Your orator further avers that where contiguous states or countries are separated by water it is, and always has been the *custom* to regard the *channel* as establishing the boundary line of such states, and that the State of Mississippi has itself recognized this principle in the description of its territorial limits as found in the second article of its own constitution, adopted November, 1890, in the following words (par. 28th), * * * 29th. Your orator avers that as heretofore stated the Congress of the United States, as well as the various departments of the United States Government, having authority in the premises have themselves recognized the boundary line contended for by the State of Louisiana, by reason of the fact that the United States Government has confirmed to the State of Louisiana, the lands composing Half Moon Island, which is just south of the deep water channel, and which is composed of section 36, etc. * * * in the aforesaid land district, and parts of which are claimed by the State of Mississippi under its right angle line to belong to the State of Mississippi, have in fact been also confirmed to the State of Louisiana, by the United States Government, and are recognized as belonging to and forming part of the State of Louisiana by the said United States Government *and have always heretofore been so recognized by the people of the said two States.*" Defendant's counsel trust that they have successfully demonstrated two propositions: first, that the fanciful theory that international law can extend the deepest channel of a river, generally known as the thalweg,

beyond its estuaries into the open waters of the sea is entirely unsupported either by reason or authority; second, that the pretension that a State can win a recognition from the Government of the United States of its view of a boundary controversy by obtaining from such Government, *through an illegal proceeding admitting its entire lack of title*, an invalid donation of certain lands as swamp and overflowed, which were not such, is too destitute even of plausibility to justify its presentation here. If that demonstration has been successful, then nothing remains of complainant's claim of acquiescence except the general and concluding allegation: "and have always heretofore been so recognized by the people of the said two States." In defining the elements, which constitute acquiescence in a boundary controversy between States, this Court, in *Indiana* v. *Kentucky*, 136, N. S., 479, has said: "Such acquiescence in the assertion of authority by the State of Kentucky, such omission to take steps to assert her present claim by the State of Indiana, can only be regarded as a recognition of the right of Kentucky too plain to be overcome, except by the clearest and most unquestioned proof. It is a principle of public law universally recognized, that long acquiescence in the possession of territory and in the exercise of dominion and sovereignty over it, is conclusive of the nation's title and rightful authority. In the case of *Rhode Island* v. *Massachusetts*, 45 How., 591, 639, this Court, speaking of the long possession of Massachusetts, and the delays in alleging any mistake in the action of the commissioners of the Colonies, said: 'Surely this connected with the lapse of time, must remove all doubts

as to the right of the respondent under the agreements of 1711 and 1718.' " In that case this court held, in 1841, that the time necessary to operate as a bar in equity is fixed at twenty years; but where two political communities are concerned, *and the boundary in question was in a wild, unsettled country*, such a rule of limitation would not apply 15 Pet., 233. It is not pretended that in the "wild, and unsettled country" involved herein, complainant has ever exercised actual physical sovereignty and jurisdiction; and nothing is more notable in the testimony offered in her behalf that the absence of proof of acts which might be held to constitute a constructive exercise of sovereignty and jurisdiction. So far as the coast is concerned from the Rigolets eastward, the State of Louisiana has never asserted sovereignty or jurisdiction, by legislative act or otherwise, from her admission into the Union down to about 1900. The origin of complainant's claim to rights in that locality is thus stated in the bill: "9th. Now your orator avers that there has developed in *recent years* in the waters south of the State of Mississippi, and east of the southern portion of the State of Louisiana a considerable growth of oysters, and an industry of large proportions, in the handling of the said bivalves, either in their fresh or in a canned condition, has resulted therefrom; 10th. That the State of Mississippi has, by legislative enactments, regulated the oyster industry in the waters of said State, and *permits* the dredging of oysters on the natural oyster reefs in waters of the said State, as will more fully appear from the statutes of said State to which reference is made; 11th. That the State of Louisiana has by legislative enactments regulated

the oyster industry in the said State of Louisiana, and *prohibits* the dredging of oysters on the natural reefs in the waters of said State, as will more fully appear from the statutes of said State to which reference is made. 12th. That the provisions of the laws of the said two States differ considerably in many other respects." The acts of the respective States thus referred to show that said difference has resulted from a conflict between an act passed by the legislature of Mississippi *in 1896*, and an act passed by the legislature of Louisiana *in 1902*. Nothing can more clearly illustrate how very recent has been the assertion of sovereignty and jurisdiction upon the part of Louisiana in the area above described.

The assertion of sovereignty and jurisdiction upon the part of Mississippi over the entire region in dispute should be dated from its annexation to the Mississippi Territory, by the act of Congress approved May 14, 1812 (U. S. Stat. at L., Vol. 11, p. 734), just one month after the admission of Louisiana into the Union. That act provides "That all that portion of territory lying east of Pearl River, west of the Perdido, and south of the thirty-first degree of latitude, be, and the same is hereby annexed to the Mississippi Territory; to be governed by the laws now in force therein, or which may hereafter be enacted." On August 1st, 1812, the Governor of the Mississippi Territory under the authority of said act erected the area so annexed into a county known as the County of Mobile, from which a representative was to be elected to the territorial legislature. On December 14th, 1812, that legislature carved out of the said county of Mobile, the counties of Jackson and

Hancock, and in 1841, the legislature of Mississippi created out of parts of said counties the county of Harrison. As early as 1821, John Baker and Martin Hogan were convicted and sentenced to death in the Superior Court of Hancock County "for robbery committed *in the Gulf of Mexico, within the boundary of this State*"; and the Legislature of Mississippi, in an act passed in November of that year, awarded to John Quavre $200 "for having detected and delivered to justice, John Baker and Martin Hogan, for a robbery committed *in the Gulf of Mexico, within this State.*" Record, p. 2131. On the 29th of October, 1886, an inquest was held by the authorities of Harrison County upon the body of John Kennedy, who was drowned south of the Cat Island Channel, and whose body was found in Creole Gap, which is one of the interior waters of the Isle à Pitre. Record, pp. 1897–1904. In 1893, F. P. Lizana, constable and deputy sheriff of Harrison County, appointed by the Board of Supervisors to see that licenses were obeyed for fishing oysters, and to see that oysters were properly culled—his office being called "oyster inspector," it being his duty to exercise his functions within "18 miles. Supposed to be six leagues from the shore"—arrested John Bowen "between Grand Pass and Sundown Island, but more towards Grand Pass," for violating the oyster laws of Mississippi. Record, pp. 1509, 1510. That he was so arrested at that place Bowen admits. p. 1501. In 1830, the legislature of Mississippi enacted "That the south boundaries of the counties of Hancock and Jackson be, and they are hereby, extended to the south boundary of this State" (Record, p. 2118); and in 1842, said legislature

enacted, "That the county of Harrison shall be bounded on the south by the southern boundary of the State of Mississippi." Record, p. 1889. In 1839, the Mississippi Legislature passed an act providing for a survey of the "whole sea coast on the southern boundary of this State." Record, p. 2120. In 1842, said legislature requested Congress to make a "sufficient appropriation for the erection of a light-house on St. Joseph's, sometimes called Half Moon Island, situated in Lake Borgne, and lying between the mouth of Pearl River and the Bay of St. Louis" (Record, p. 2124); and at the same session said legislature consented that the United States "purchase a site on St. Joseph's, or Half Moon Island, for the purpose of erecting a light-house thereon" (Record, p. 2105). In 1843, said legislature began to protect the oyster industry by the passage of "An act to prevent the destruction of oysters in the waters of the State of Mississippi." Record, p. 1956. In 1856, said legislature passed a law entitled "An act for the preservation of game and oysters in this State, which act gives to the board of police of the three coast counties full jurisdiction to protect and preserve oysters and game within said counties. Record, p. 1958. In 1857, said Legislature enacted that "the counties bordering on the Gulf of Mexico—to wit: Jackson, Harrison, and Hancock—shall, respectively have and possess jurisdiction and extend to the southern boundary of the State within the space embraced by extending their boundary lines which strike *the Gulf of Mexico*, or the inlets thereto, on a continuous direct course to the southern boundary of the State, including all islands that may lie within the limits thus defined."

The substance of that act was embodied in the Rev. Statutes of said State of 1871, 1880, and 1892. Record, pp. 86–87. It has been settled by this Court that "Within what are recognized by the law of nations as the territorial limits of states, a state can define its boundaries on the sea and the boundaries of its counties. Massachusetts can include Buzzard's Bay, the headlands of which are less than two marine leagues apart, within the limits of its counties." *Manchester* v. *Massachusetts*, 139 U. S., 240. In the exercise of that right Mississippi did, by affirmative legislation of the most specific character, redefine in 1857, the boundaries of her three coast counties in such a manner as to include with greater minuteness of description than ever before, every foot of the territory in dispute. Her jurisdiction and sovereignty thus affirmatively asserted has ever since been maintained. And laws of like tenor and effect were passed in the years 1871, 1880, 1884, 1886, 1888, 1890, 1892, 1896, and 1902. Record, pp. 1960–1979. It has been held by this Court in *Indiana* v. *Kentucky*, 136 U. S., 479, that the enactment of legislation by a State for the assertion of its sovereignty and jurisdiction, and the taking of judicial action for the same purpose, is such affirmative action as should be taken to that end. Or, as this Court has expressed it, "Whilst on the part of Indiana there was a want of affirmative action in the assertion of her present claim and a general acquiesce in the claim of Kentucky, there was affirmative action on the part of Kentucky in the assertion of her rights, as we have seen by the law, declaring the boundaries of her counties on the Ohio River, passed in January, 1810; there was action

taken in the courts of the United States, and of the State by parties claiming under her, or her grantor, and there was also action by her officers in the assertion of her authority over the land; all of which tends to support the claim of rightful jurisdiction." When tested by that standard it appears that Mississippi, from her territorial days down to the present time, has been diligently asserting her rights of sovereignty and jurisdiction over the region now in dispute by all available means, legislative, executive, and judicial, while, on the other hand, it appears that Louisiana has done practically nothing, either by legislation or by the action of her judicial authority, to assert her sovereignty and jurisdiction prior to the enactment, as alleged in her bill, "*in recent years*," of certain laws for the regulation of "the oyster industry in the waters of said State." It may be worthy of mention here that Mississippi has also asserted her sovereignty and jurisdiction over the area in question, by ordinances adopted by her three coast counties regulating the taking of fish and oysters within the waters of said counties as heretofore defined, and in the ordinances of the boards of health of said counties, and in her pilot and harbor laws, co-extensive in point of time, with other legislation discussed above. Record, pp. 1905–2018.

The testimony as to the belief and claim of Mississippians that the possession, sovereignty, and jurisdiction of their State extends six leagues from her shore, covering all the territory in dispute, is absolutely overwhelming. It is based upon the actual judicial exercise of authority as demonstrated by the Baker and Hogan robbery cases

of 1821, by the Kennedy inquest of 1886, by the enforcement of the oyster laws, and by other acts of said State, as in the arrest of Bowen near Sundown Island, as well as by the unmolested enjoyment of the territory by thousands of fishermen for more than fifty years. Indeed it may be stated with certainty that at least sixty of the seventy-seven witnesses called by Mississippi sustain this statement. In that number are included governors, judges, district attorneys, sheriffs, clerks, mayors, justices of the peace, constables, and all classes of citizens along the coast from capitalists to the poorest tongmen. An illustration of the firm belief in the claim to such rights may be found in the following extract from the testimony of H. Heidenheim, Rec., p. 1692: "In 1885 our company organized a factory here (canning, at Biloxi), and we conferred with counsel in Jackson, Mississippi, and Gen. Joseph Davis, who was our counsel here, and before we invested money in that corporation as business people, it was necessary to be governed by intelligent legal advice, and we were advised at that time that the Mississippi boundary line was as it reads in that statute and as it was made by Congress, otherwise we would never have come here with this question hanging over us, with a doubt of getting it settled right and investing $75,000, or $100,000." At p. 1707, he says: "Well now, to give you some idea what the loss would be; when I came here Biloxi (18½ years ago) had 1,200 population, and to-day she has 7,500, or 8,000. The other places on the sea shore have equally grown directly or indirectly by this industry. The industry is in its infancy and in my opinion if we consider time, depreciation of real

estate, and other commercial conditions that now exist, that would be disturbed in the present and future that I could safely say the losses would be over $100,000,000.00, in the space of not over 25 years. * * * that is if you exclude that territory, that is the loss that would result." p. 1708. The following is the testimony upon this subject of complainant's witness, Wm. K. M. Dukate, manufacturer of canned products, as drawn from him on cross-examination. "Q. I want to ask you first, this question, whether you and other persons interested in the oyster and fishing industry from Biloxi and other points on the Mississippi shore, have regarded the sovereignty and jurisdiction of the State of Mississippi as extending 18 miles from her shore as indicated by the red lines on this map, and if so how long you have regarded the rights of the people of Mississippi and the jurisdiction and sovereignty of Mississippi to that extent? A. *We have always regarded the boundary of the State of Mississippi as reaching six leagues, or 18 miles from the shore, including all islands as indicated by the boundaries as mentioned in the Code of Mississippi.* Q. And so regarding that limit, have you, and other Mississippians exercised the rights granted under the laws of that State within the territory indicated on the map as belonging to that State? A. I believe that we have. Whenever the question has been brought up. I will state, however, that there has been never any molestation on the part of either State until I think the past two or three years." Record, p. 376. No more conclusive answer can be given to the pretension set up in the bill that the line as claimed therein has "always heretofore

been so recognized by the people of the said two States," than that embodied in the replies of Mr. Ducate, while testifying in complainant's behalf, and in those of many witnesses for the defendant.

XVI.

Summary.

If the arguments contained in the two preceding sections have demonstrated, first, that complainant derived no title to the region in dispute from invalid proceedings under a swamp land act, having no application to lands not of that character, and which, at its date, did not belong to the United States; second, that so far from defendant ever having acquiesced in the claim asserted by the bill, she has continually contested it through all the agencies of government, legislative, executive and judicial—then the Court has before it, *unembarrassed by subsequent events*, the merits of the original controversy as they arise upon the face of the acts now presented for interpretation. As the burden is upon complainant to make out her case as stated in the bill the fact cannot be lost sight of that the foundations of it are, first, the *contention of law* that a water boundary is defined by international law between the two States in the open waters of the Gulf of Mexico, because as complainant says, "it is, and always has been, the *custom* to regard the *channel* as establishing the boundary line of such States"; second, *the contention of fact* that the islands in question were in 1812, a part of her mainland. If, as defendant confidently claims, both foundations have

entirely given way, in what attitude does the case now stand before the court? Certainly upon the issues presented by defendant's cross-bill, which prays for affirmative relief upon the case made by it. Apprehending that result, no doubt, complainant has taken the precaution to state her case in the alternative, as follows: "27th. * * * *but if your honors should feel that any part of this disputed area was* ISLANDS *by reason of the presence of shallow water, then* AS ISLANDS *they are within the nine-mile limit of distance from the shore line of the State of Louisiana, and therefore belong to and form part of the State of Louisiana by that second prevision of the act of Congress, giving Louisiana all islands within three leagues of its shore line.*" In par. 24, complainant had alleged "that any other boundary than the *deep water channel* as aforesaid would cause the limits of the two States to *conflict and overlap.*" In no possible aspect of the case can the Court listen to the suggestion made by complainant in her answer to the cross-bill in the following terms: "Repliant further, especially and particularly denies that the limits of the State of Louisiana are to be defined and determined from the 'mainland' of said State, as claimed by respondent, but are to be defined, determined, and delimited from the islands, as the 'coast' of the State of Louisiana." The only merit in this suggestion is contained in the admissions that the "islands" exist as such separate and apart from the "coast." Assuming that the deep water channel theory has perished and passed out of the case as an impossible expedient, then the real and only issue that remains is this: Will this Court, construing the conflicting acts, *in pari materia*, so reconcile

them as to carry out the cardinal purpose of Congress, which evidently was to do equity and justice between these States, by giving to each the islands directly in front of it, and at the same time prevent any *overlapping*. To Mississippi was given all islands within *six leagues of her sea-front*, as some compensation for the great inequality arising out of the possession by Louisiana, of a coast line nearly six times as long as her own. Because of that advantage Louisiana was only given islands within *three leagues of her coast*. The effort of Congress thus to do something like equity and justice will be entirely broken down, if this Court so construes the acts in question as to give to Louisiana islands on her eastern coast, which extend about one-half of the way across the narrow sea-front of Mississippi. This argument must therefore end as it began with the contention "that, where a particular construction of a statute will occasion great inconvenience *or produce inequality and injustice*, that view is to be avoided if another and more reasonable interpretation is present in the statute." *Knowlton* v. *Moore*, 178 U. S., p. 77. The moment the Court determines that the acts in question are *in pari materia*, it follows, as a matter of law, that they "are to be construed together as forming one act. If in a subsequent clause of the same act provisions are introduced which show the sense in which the legislature employed doubtful phrases previously used, that sense is to be adopted in construing those phrases. *Consequently, if a subsequent act on the same subject* [passed seventeen years after the first], *affords complete demonstration of the legislative sense of its own language, the rule which has been*

stated, requiring that the subsequent should be incorporated in the foregoing act, is a direction to the courts in expounding the provisions of the law." Marshall, C. J., in *Alexander* v. *Alexandria*, 5 Cranch, p. 8. If in obedience to that rule, here defined and never questioned, this Court will simply "incorporate" the provisions as to boundaries contained in "the subsequent" act of 1817, into the provisions on the same subject contained in "the foregoing act," of 1812, all conflict will be removed by the recognition of the grant in favor of Mississippi [*thence westwardly, including all islands within six leagues of the shore to the most southern junction of Pearl River with Lake Borgne*], as *a limitation* upon the general terms of the prior act. Such a method of construction so firmly applied in *Alexander* v. *Alexandria*, was confirmed in *United States* v. *Kirby*, 7 Wall., 482, wherein it was said: "All laws should receive a sensible construction. General terms should be so *limited* in their application as not to lead to injustice, oppression, or absurd consequence. It will always, therefore, be presumed that the Legislature intended *exceptions* to its language, which would avoid results of this character. The reason of the law, in such cases should prevail over its letter." The court is thus authorized to give effect to the reason of the two statutes construed together as one law, by simply holding that the "general terms" of the first are to "be so limited in their application as not to lead to injustice, oppression, or absurd consequence," which would result if they were permitted to annul or abridge the grant to Mississippi, in the second of "all islands within six leagues of the shore to the most southern junction of Pearl River

with Lake Borgne." Complainant's bill clearly admits, a matter of law, that it was the intention of Congress give that area to Mississippi, when it says that the elimin tion of the deep water channel theory "*would cause t limits of the two States to conflict and overlap.*" Par. 2 The ultimate question, therefore, is this: How can th Court give effect to the grant to Mississippi, so as not cause "the limits of the two States to conflict and ove lap?" The adoption of the construction contended f would render impossible all conflict and overlapping, a would leave Louisiana, with her mainland untouched, full possession of her southern and eastern coast line wi all islands within three leagues thereof, excepting only t small group within six leagues of the narrow sea-front Mississippi. The only objection which Louisiana urges, can urge, against this rule of construction is that her a is prior in date, an objection which loses all legal signi cance the moment the *in pari materia* method is adopte for the conclusive reason that that method *eliminates d dates* by providing that all acts "are to be construe together as forming one act." By that method provisio of subsequent statutes are "incorporated into the for going act," and become a part of it, *just as if they were incorporated at its enactment.* Otherwise the method wou have no efficacy whatever. Under that method of co struction the court must presume that when it enacted t statute of 1812, Congress *intended* that its *general ter be limited by the special provisions of the statute of* 181 Therefore it cannot be said that the subsequent act impa the grant made in the preceding because, in legal conte

plation, *no such prior grant was ever made*, Congress never having had such an intention.

HANNIS TAYLOR,
MONROE McCLURG,
Counsel for Defendant.

IN THE SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1905.

No. 11, ORIGINAL.

STATE OF LOUISIANA, COMPLAINANT,

VERSUS

STATE OF MISSISSIPPI, DEFENDANT.

BRIEF FOR THE DEFENDANT AND CROSS-COMPLAINANT.

To the Honorable, the Chief Justice and the Associate Justices of the Supreme Court of the United States.

For a statement of the facts of this case the court is referred to the brief filed for the State of Mississippi by associate counsel.

Under Section 3 of article IV of the Federal Constitution, the Congress alone has authority to create states and fix their boundaries. In the exercise of this authority the Congress passed the Acts of 1812 and 1817 creating the States of Louisiana and Mississippi. These two said Acts are supposed to contain a description of the boundaries of the two States; it is to them we have to look for correct answers to the questions raised in this controversy. Everything is valuable in this investigation only in so far as it may aid in the ascertainment of the truth from these two statutes.

And not only is the authority of Congress in creating states and fixing their original boundaries exclusive, but boundaries cannot be changed, in view of this same section of the Constitution, without the consent of the Congress. Even the Legislatures of the states by joint, deliberate action, cannot change

boundary lines without the concurrence of the Congress. The Union retains this power over its members for reasons which are obvious.

Hence, the Department of the Interior through the Land Office, cannot determine boundaries between two states by confirming lands to the one state or the other. That the Land Office, in the year 1852, approved certain lands in the disputed territory to Louisiana is not a fact to be taken into consideration here, unless, in some way, it may throw light upon the meaning of the said Acts of 1812 and 1817.

Nor can it affect the issue here that numerous map-makers have drawn their lines so as to place this disputed territory within the limits of one or the other of these two States. Map-makers and cartographers have no authority to fix or change state boundaries. They can only depict their individual conclusions as to where a line really is.

In the same category are the offered opinions of various persons as to the correct location of the boundary line in the waters between the two States, whether such opinions aree ntertained by witnesses for Louisiana or Mississippi. Such persons, having opinions, cannot supplant nor supersede the Congress in its high function of state-making. They cannot, by taking thought, add a cubit to the domain of any state, nor can they by any sort of mental exertion take anything from the declarations of the Congress as to where and how a line shall be drawn.

Proof of the exercise of jurisdiction by the governments of the two States over the disputed territory is pertinent only in so far as it may appear that such exercise of jurisdiction is connected with or grew out of the accepted meaning of the laws when they were passed. So far, the exercise of such jurisdiction may be regarded as a continued expression of what was at the time well understood. The two governments could not agree upon a change and make it effective. They could not change the boundaries by encroachment on the part of the one State and concession on the part of the other. What they could not do by a solemn compact, they could not do by indirection or by inaction resulting from ignorance or mere supineness.

The same test of relevancy must be applied to the offered

proof of long possession by citizens of one of the two States. Neither the citizens of the States, nor the States themselves, can locate or change the line between them. If their occupation is of such long standing and was begun under such circumstances as to make it referable to the well understood contemporaneous meaning of the said statutes then this testimony is of value. But the doctrine of prescription cannot be utilized in this controversy. The law may presume that long possession was preceded by a valid grant from the party attacking the right of possession. But such presumption cannot be invoked against one of the States interested in this controversy when the grant which would have to be presumed is of the kind which the State could not have made originally. Neither State will be presumed to have done something which it had no power to do. This contention is not in conflict with any expression of this court in state boundary adjudications. In Missouri v. Iowa, ——————U. S., 12 L. ed., 658, consideration was given to long possession by one party and acquiescence for the same period by the other, but Iowa was treated as the successor of the United States, and the prescriptive rights, if any, had arisen when the interested parties were the State of Missouri and the United States, parties who could make and accept grants. In State of Indiana v. State of Kentucky, 136 U. S., 479, 34 L. ed., 329, the court considered the fact that Kentucky had, since her creation, exercised jurisdiction over Green River Island, yet the fact was used for the purpose of showing the original line, that is, the meaning of the terms used in the Act of Congress creating the State of Kentucky, and in the cession by Virginia to the United States of the territory out of which Indiana was formed. The long possession was not regarded as having changed the original line, nor as having established a line not intended by the Virginia grant or the Act of Congress, but it was considered as proof of the original intention and of the ancient boundary. The same is true of the holding of this court in State of Virginia v. State of Tenenssee, 148 U. S., 503, 37 L. ed., 537, 544, in which case the court gave effect to an agreement of long standing between the two States on the ground that such agreement was conclusive of the correctness of that particular location of the line. "The line so established takes effect, not as an alienation of territory, but as a definition of the true and ancient boundary."

The boundary line between these two States in the waters between them is now what it was in 1817. It has not been changed by the United States Land Office; by the Legislatures of the two States; by the map-makers and cartographers; by the historians and civil engineers; by the speculations of geologists; by the resolutions of boundary commissions; by agreements between boards of oyster commissioners; by the civil authorities of the two States; by the acts of the citizens of the two States who have taken possession of part of the territory in dispute; nor has it been changed by the action of the winds and waves. It was firmly established by the Congress, the only power having such original authority; it could not be changed but with the concurrence of that same power. The boundary of Louisiana in the waters of the Gulf in 1812 is the boundary now.

"In looking at transactions so remote, we must, as far as practicable, view things as they were seen and understood at the time they transpired. There is no other test of truth and justice, which applies to the variable conditions of all human concerns." *Rhode Island v. Massachusetts*, 4 *How.*, 591, 11 *L. ed.*, 1116. "Her (Kentucky's) dominion and jurisdiction continue as they existed at the time she was admitted into the Union, unaffected by the action of the forces of nature upon the course of the river. The question then becomes one of fact: Did the waters of the Ohio pass between Green River Island and the mainland of Indiana when Kentucky became a State and her boundaries were established?" *State of Indiana v. State of Kentucky supra.* The single purpose of this inquiry is to find out what the Congress intended; what has been done since 1812 and 1817, or what has happened since those dates, is of value to the extent that it aids in the discovery of this truth. And in the consideration of the question, What did the Congress intend? the court will try to view the territory in dispute as it was seen by the lawmaking body in 1812. It will be necessary to know what information that body had before it—what history, what maps, what general or official information. All such information possessed by an intelligent public, available to the Congress at the time, a part of the history of the country, would be considered by this court even if no proof of it had been offered here. *Lewis' Sutherland on Statutory Construction* (*2nd ed.*) *Sec.* 462, *and authorities cited in note* 65.

We apprehend that this court, in pursuit of the inquiry as to what was intended by the authors of the statutes, and in applying the statutes to the situation as it appeared to the Congress in 1812, will give little weight to the concessions, if any, in the pleadings, made by counsel for these States, since the line as declared by the Congress in these Acts could not be changed by any concession, agreement or mistake on the part of the counsel for the two parties litigant. And we assume, too, that if the prayer of neither bill nor cross-bill should be granted, this court will construe the laws involved, apply them to the facts as they may now appear to have existed in 1812, and give specific directions by which the line may be marked, as was done in Missouri v. Iowa, 7 How., 660, 12 L. ed., 861. It is a case in which the parties cannot speak finally as to their rights, hence their counsel could waive no substantial rights nor bind them by any blunder or concession.

The foregoing preliminary suggestions are intended to indicate our idea of the importance of section 3, article IV of the Constitution in defining clearly the real issue before the court, and of its value as an alembic to separate the good from the bad in this record. Starting here we know we have started right.

We will assume, too, for the purpose of this presentation, that there is occasion to invoke rules of construction. The two statutes are not readily reconciled. The presence of these parties in court demonstrates that fact. An effort, at a glance, to say to whom an island within six leagues of the Mississippi and within three leagues of the Louisiana coast belongs, will make the difficulty prominent. It is impossible to give Louisiana the islands within three leagues of her eastern mainland, and at the same time give Mississippi those within six leagues of her mainland, as the eastern mainland of Louisiana is defined by either party hereto. It is impossible to give effect in detail to the contentions of both States, although both parties stand upon these statutes. It is an occasion for the court to restore order between the two enactments and apply them so as to accomplish the great pervading purpose of Congress despite the appearance of physical details unknown to the lawmaking body.

Looking forward from the safe and sound position that, from the judicial standpoint, the sole object of this litigation is to ascertain what the Congress intended in the enactment of the statutes erecting the two States, we direct the court's attention to one large rule of statutory construction which, in our judgment, is of controlling importance here. We select the statement of the rule made by Sutherland: "The presumption is that the law-maker has a definite purpose in every enactment, and has adopted and formulated the subsidiary provisions in harmony with that purpose; that these are needful to accomplish it; and that if they have the intended effect, they will, at least, conduce to effectuate it. * * * * This intention affords a key to the sense and scope of minor provisions. From this assumption proceeds the general rule that the cardinal purpose or intent of the whole Act shall control, and that all the parts be interpreted as subsidiary and harmonious." This rule is of such frequent use as to be generally applied without being stated.

In the case at bar the general purpose of the enactments is large and clear. Whatever doubt may arise from a consideration of isolated parts are resolvable by reference to the general intent. The country was a waste; it had not been surveyed nor settled; only its continental outline was known; the meanders of the shore line, the location and extent of bays and lakes and other arms of the sea were not known; the authors of the statutes could not be accurate and consistent in detail; but the general object and the controlling intention may be known, and inaccuracies of detail will be dealt with by this court so as to make every part of the laws contribute to the success of the larger plan. It is this familiar rule of construction we especially invoke to harmonize and give effect to the Acts of 1812 and 1817. Chief Justice Marshall recognized its peculiar value as applied to controversies of this kind when he said "in great questions which concern the boundaries of states, where great natural boundaries are established in general terms, with a view to public convenience, and the avoidance of controversy, we think the great object, where it can be distinctly perceived, ought not to be defeated by those technical perplexities which may sometimes influence contracts between individuals." Handly v. Anthony, 5 Wheat., 374, 5 L. ed. 113.

II.

The General Purpose of the Authors of the Acts of 1812 and 1817.

A majority of the members of the two Congresses that passed these laws were from states facing on the Atlantic. They all knew the value to a state of a frontage on the water. They could not look at a map of the original thirteen states without observing that they had been so laid off as to give to each its front door opening upon the sea. They knew the value of navigable waters, and of the wealth in and under the waters; they knew the value of ports and harbors, and the expediency of giving each state jurisdiction over the water adjacent to its land territory. They knew how sovereignties have universally contended for the shores of great waters. Engaged in state-making, in dividing a continent, they will be presumed to have kept this large object in view. "It is assuredly the incumbent duty of the General Government to make such a partition of its territories on the waters of the Mississippi, as will combine with local advantages a due regard to national policy. These essential objects cannot, in the opinion of your committee, be secured without a suitable division of the seacoast, acquired by the purchase of Louisiana." *Report of Committee of House of Representatives, on proposed admission of Mississippi Territory, in December,* 1811. *Am. St. Papers* (*Miscellaneous*) *Vol.* 21, p. 163. And in fact one of the strong arguments used by the people of West Florida, in their application to be annexed to the Mississippi Territory, of date November 20, 1811, in compliance with which application West Florida was annexed to said Territory, was that "by the addition the Mississippi Territory will derive the advantage of an extensive sea coast, of which she will otherwise be deprived." R. p. 2003. If this court had read neither of the Acts creating the two States, but had been informed of the general outline of the territory to be divided up into states, we submit that you would expect to find that Congress was moved by the considerations of expediency and right so universally recognized and that it erected states and fixed their boundaries so as to give to each a fair portion of the advantages derivable from a frontage on the open sea and jurisdiction over adjacent waters for a certain distance in front of the land territory. A glance at a map convinces one that, in a general way, the authors of these statutes

were moved by these large considerations. Alabama is 290 miles north and south, with about 40 miles of sea coast. Mississippi is 325 miles north and south with 72 miles of water front on the Mississippi Sound. Louisiana is about 230 miles, at its greatest length north and south, and claims more than 500 miles of water front.

In section VIII of the cross-bill filed by Mississippi in this cause appears the following:

"That the Congress of the United States, in the early history of the Republic, in dealing with the Gulf coast or shore and carving states out of the Louisiana purchase, was not perfectly familiar with said coast or shore line, and, as is shown by the several Acts of Congress, creating the Gulf States, respectively, treated the said Gulf coast or shore as a line running generally from east to west, and the said states were intended to be formed and bounded, and, in the contemplation of Congress, were in fact so formed and bounded, as to give to each state jurisdiction over the waters adjacent to its shore or coast for a certain specified distance southward from its mainland line; that it was not intended to give any state jurisdiction over waters adjacent to and immediately south and in front of any other state or territory."

This allegation needs no proof. It only attributes to the members of Congress the simple virtue of fairness, and an acquaintance with the natural laws of convenience and right. *Vattel's Law of Nations p.* 125 *et seq.* It assumes that the members of that body desired to do right; that they intended to give the people of one state no abnormal share of benefits universally esteemed to be of great value. It takes for granted that the Congress intended to do the sensible and natural thing; that it did not intend to embarrass one state or territory by giving jurisdiction over waters which regularly belonged to it and as a matter of convenience and expediency should belong to it, to another state. To say they did not intend thus to divide up the sea-front among the several states is equivalent to saying that the members of that body did not take into consideration the advantages to be derived to any state from a frontage on the open sea. But it is a matter of history that it was proposed to divide the territory embracing what is now Alabama and Mis-

sissippi by a line running east and west. The line was at last run north and south so as to make both states extend to the sea. In the effort to provide this open sea-front for Alabama and Mississippi, the Congress stretched them out so as to overcome the numerous bays and the Mississippi sound and give them their outlook upon the Gulf—a door opening into the wide world. The usual three miles from the mainland was not sufficient. This would have dropped their line within the Sound still hedged in by islands and still without a view of the high seas. The lines were drawn so as to reach out to the Gulf proper and embrace the intervening islands.

The Congress knew something of the recession of the mainland north of Mississippi sound from the Gulf line running from east to west and tried to save to the two States their ocean frontage by giving them six leagues from the shore. It was not necessary to extend the Mississippi line this far south if the only purpose was to embrace the small islands between the Gulf and mainland north and east of the present Cat Island Channel, because these islands are only about half way between the mainland and the 6-league limit. It seems to have been the large purpose to give these states jurisdiction over the same ocean domain as they would have had if the mainland extended to the line of islands. It was intended that these States, Alabama and Mississippi, should lose none of the usual open sea territory by reason of the presence of Mississippi sound and the bays. This Sound and the bays were not treated as the open sea. Mississippi sound is, on an average about three leagues wide from north to south. Mississippi's rightful and intended ocean territory should measure three leagues from about the southern shore of Mississippi sound, which line now coincides with the line drawn three leagues from the shore of the mainland. These said Gulf States were created looking southward; they face south. The Congress did not know that a part of the mainland of the Island of New Orleans extended quite as far east as it really did and does. The west shore of what is now called Nine Mile bayou was thought to be on the same meridian with the most eastern mouth of Pearl river. The said river was thought to be on the line of the most eastern mainland boundary of the Island of New Orleans and of the mainland of the new State of Louisiana. The line of the eastern Gulf boundary of the new

State of Louisiana was intended to be the line of the eastern boundary of the addition made north of Lake Borgne. It was not thought, of course, that an island could be within six leagues of the north shore of Mississippi sound east of Pearl river, south of the mainland, and at the same time within three leagues of the coast of the State of Louisiana, referred to in the Act creating the latter State.

If the court should find that we are correct in our position that it was the pervading and controlling purpose of the authors of these statutes to create and bound these States so as to give to each the advantage of property in and jurisdiction over the waters immediately south and in front of the mainland, then the large plan of the Congress can be executed without friction and with certainty. All the parts of the two statutes may be made to harmonize and every detail will be permitted to make its contribution to effectuate the general purpose. *It needs only to do, with perfect and exact information, what the Congress in* 1812 *undertook to do with crude and false information.* It needs only to do now what the Congress tried to do then; to apply the Acts to the modern situation so as to achieve the original purpose; to construe the laws so their purpose will not fail, although they were based upon misinformation.

But this large purpose of the lawmakers is thwarted by any construction of the Acts which cuts down the water front of Mississippi to two-thirds of the coast line, and reduces her water territory by at least one-third, and, to the same extent, unequally and abnormally increases the water territory of Louisiana, and gives to Louisiana an extent of water front far greater than was contemplated. It will be presumed that the Congress intended to make no such unequal division of these great advantages.

III.

In pursuit of our inquiry as to what Congress intended, we will ascertain, as far as possible, what material the lawmakers were dealing with. What information did the members of Congress have before them in 1812? What information as to the

now disputed territory was available in 1817? How far does the discovery of the extent and character of that information aid in the solution of the problems in hand? Do the two Acts of Congress, considered in the light of the information then accessible, show the presence of the overruling purpose to divide the Louisiana Purchase into states in such a way as to give to each state jurisdiction over the high seas immediately south and in front of its mainland?

In the large problem this record presents to the court there is one known quantity, to-wit: *the shore line of Mississippi.* That line is known with certainty. There are no conflicting contentions as to the point on the mainland, "due south" of of the "northwest corner of the County of Washington," nor as to the point of the "most eastern junction of Pearl river with Lake Borgne." Between these two points, along the mainland, is the shore line of Mississippi, all the islands within six leagues of which were, under the Act of 1817, to belong to that State. No nice distinction is necessary to be made between the words coast and shore. A few yards north or south of any line claimed as the shore line between these two points would not give rise to any controversy. The line runs east and west. It was known in 1817, as it is today, and there has never been the slightest uncertainty as to the point of either extremity. This suit was not filed for the purpose of ascertaining it more definitely. No proof has been taken to establish any point of it. Nor is it questioned by counsel for Louisiana that this is the line from which measurements are to be made to determine whether a given island is within the limits of the State of Mississippi. It is only contended that much territory within the calls of the Act of 1817 was given to Louisiana by the Act of 1812. The real question as to any island in dispute is not whether it is embraced within the description of Mississippi's boundaries in these waters, but whether it had already been made a part of the State of Louisiana.

There is, therefore, no occasion to construe the two Acts of Congress to determine what shore line was meant by the provision in the Mississippi Act: "thence westwardly, including all islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne." We may safely assume, for whatever purpose the fact may be used in this argument,

that the line within six leagues of which Mississippi was to have all islands is an established line.

And then it follows that every island within six leagues of this established line in 1817 which had not been previously made a part of Louisiana, belongs to Mississippi. In other words, if there is any limitation upon the plain meaning of the provisions of the Mississippi Act it is to be found in the Louisiana Act. The question is not What is Mississippi? but What is Louisiana? As stated by witness Hodgkins (R. p. 480), the Mississippi Act, standing alone, is plain except in that it requires a decision as to what are islands. We are not to determine what Mississippi should have under her Act, for that is manifest, but how much, if any, of the territory embraced within the calls of her Act does she lose to Louisiana. Mississippi contends that her Act gives her all islands within six leagues of any part of her shore; her adversary contends that she is not entitled to those within six leagues of the western part of her shore line, nor to any which may happen to be south or west of the deep water channel extending from the Rigolets to the Gulf.

Then since the meaning of the Act of 1817 is plain on its face; since it is easy to determine whether a given island is embraced within Mississippi's defined boundaries, there is no necessity to consider that Act here. Attention must be addressed to the Louisiana Act; that is the law to be construed. And in the examination of that enactment we certainly expect to find that it does not conflict with the Act of 1817. Since the latter Act plainly gives Mississippi all the islands within six leagues of an established shore line, the Louisiana Act will, if possible, be so construed as to allow to Mississippi all such islands. Every part of both Acts must stand.

Again, since we know the general purpose of the Congress in the two enactments, and know the shore referred to in the 1817 law, this court will expect to find for Louisiana a coast line—the "coast" referred to in the 1812 Act—having its location so far from the Mississippi shore line that an island cannot be within three leagues of it and at the same time within six leagues of the established Mississippi line. Because the lawmakers intended no conflict. The coast line of Louisiana within three

leagues of which all islands were to belong to that State, was, in the eyes of the lawmakers, so located that no such island could be within six leagues of the Mississippi shore.

Our purpose now, therefore, is to locate the Louisiana "coast" referred to in the Act of 1812. From the said Act of 1812, it appears that the State of Louisiana was to be erected out of "part of the territory or country ceded under the name of Louisiana by the treaty made at Paris on the 30th day of April, 1803." Nothing was intended to be embraced in the new State of Louisiana which was not understood at that time to have been ceded to the United States by France in 1803. It will hardly be contended even by counsel for Louisiana that it was the purpose to make the new State of Louisiana embrace any territory which was not agreed by all to have been ceded by the treaty of 1803. "The territory or country ceded under the name of Louisiana" was the territory which France and Spain and the United States agreed upon as being embraced in the said treaty. It was the "Louisiana" claimed by France in 1803 and referred to by President Jefferson in his message to Congress hereinafter discussed. The new State of Louisiana as created under the said Act of April 6th was to embrace no part of West Florida and no part of that country north of the Lakes or otherwise described by President Jefferson in his said message as being probably a part of the territory ceded by Spain to France in 1801 and by France to the United States in 1803. No doubtful territory was intended to be embraced within the limits of the original State of Louisiana. There was discussion and hesitation when it was proposed by the Act of April 14th, eight days later, to add to the State of Louisiana the territory between the Mississippi and the Pearl and south of the 31st parallel. It was suggested that this addition should not be made and this territory should not be included in any state until the title of the Federal Government was quieted, because it was said no state could settle the matter with a foreign nation. R. p. 1034.

Besides it clearly appears from the history of the controversy between Spain and the United States that at the time the treaty of 1803 was made it was not dreamed that the United States would get West Florida with the Louisiana Purchase. In 1812

the controversy was still on as charged by counsel for Louisiana in their replication. R. p. 95.

So it appears that not only must the territory forming the new State be within the boundaries as defined particularly by the said Act, but such territory must also have been a "part of the territory or country ceded under the name of Louisiana, by the treaty made at Paris on the 30th day of April, 1803." If the particular definition of the boundaries east of the Mississippi is doubtful then we may consider the other description and ascertain what part of the country called Louisiana in the treaty of Paris was located on the east bank of the Mississippi. For this purpose it is necessary to go back prior to 1763. Up to that date, for more than half a century, France had owned all the country in that part of the world. She owned what was afterwards West Florida and Louisiana. She necessarily owned the territory now in dispute between these two States. On that date, the boundaries between the French and British possessions was established along the middle of the Mississippi River down to the Iberville, "and from thence, by a line drawn along the middle of this river and the Lakes Maurepas and Pontchartrain, to the sea." This line was intended to give to Great Britain everything "on the left side of the River Mississippi, except the town of New Orleans and the island on which it is situated," which said island was to remain to France. R. p. 1010. This boundary line from Mississippi eastward through Iberville and the Lakes is the one adopted in the Act of 1812 and is the one which from 1763 to 1812 formed the boundary of Louisiana east of the Mississippi. It will be noted that it is not an accurate description. The line from the Mississippi eastward was only intended to cut off the Island of New Orleans. This description when it was used by the Congress of 1812 had been treated for fifty years as *one which carried nothing on the east side of the Mississippi except the town of New Orleans and the island on which it stands.* Louisiana embraced nothing on the east side of Mississippi but this island. There were no islands depending upon the Island of New Orleans. There is no mention in history of any island which passed with a cession of the Island of New Orleans. This description is the one adopted in the Act of February 20, 1811, authorizing the people of the territory of Orleans to form a constitution and state government. R. p. 1018. This

description was supposed to embrace the territory of Orleans.

History furnishes us further evidence that "Island of New Orleans" conveyed a distinct and familiar idea. The new State of Louisiana was intended to face south on the Gulf. It was intended to embrace nothing on the left bank of the Mississippi except the city of New Orleans and the island on which it stands. The description of the line from the Mississippi east is precisely that which had been used to embrace the said island. The long southern coast line which Congress intended to give to that state was not the coast of this island but the coast of the mainland.

President Jefferson in 1803 undertook "to consolidate the information respecting the present State of Louisiana, furnished to the Executive by several individuals among the best informed upon that subject." He describes the eastern boundary line of the Island of New Orleans, from the Mississippi to the Gulf "thence through the middle of that (Iberville) River, and the Lakes Maurepas and Pontchartrain to the sea." Again, he says, "the parish of Iberville then commences, and is bounded on the east side by the river of the same name, which, though dry a great part of the year, yet, when the Mississippi is raised, it communicates with the Lakes Maurepas and Pontchartrain, and through them with the sea, and thus forms what is called the Island of New Orleans. Except on the point just below the Iberville the country from New Orleans is settled the whole way along the river, and presents a scene of uninterrupted plantations in sight of each other, whose fronts to the Mississippi are all cleared and occupy on that river from 5 to 25 acres with a depth of 40, so that a plantation of 5 acres in front contains 200." And again, he says, "By recurring to the maps and examining the position of Louisiana, it will appear that the lower part projects considerably into the sea. It has in all probability been formed by the sediment brought down by the current and deposited on a flat coast. There is therefore on the east side but a very narrow slip along the bank of the river, from the sea to the Iberville."

Andrew Ellicott had the same idea about the Island of New Orleans, as shown by his map filed in this cause.

"The English had acquired the cession of Florida and all Louisiana east of the Mississippi, whose course became common

to the two nations, French and English. The former, however, preserved the isle of New-Orleans, formed by Iberville River and the lakes. * * * * The city is on the island which bears its name, 32 leagues from the mouth of the river, and one league from a narrow channel running to Lake Pontchartrain, which connects with the Gulf." *Memoir of the present State of Louisiana by Chevalier de Champigny, translated by B. F. French.*

But it would seem to be necessary only to call the court's attention to the historical fact that since the first settlements along the coasts of West Florida and Louisiana the Island of New Orleans has been known by that name. The idea which Champigny, Ellicott and President Jefferson had about it is that which the public had and which was in the mind of the authors of the Act of 1812. It was regarded as a distinct island on the east side of the River and extending not farther east than the mouth of Lake Pontchartrain at the Gulf. It was considered a narrow strip of land. The picture of it made by Bowen on his map of 1764 and especially that made by Ellicott show it as a narrow strip of land extending east to a line running north and south through the mouth of Pearl river. If the members of Congress had gone into the books all the information available would have shown them that this island extended only as far east as the Pearl river line. In the treaty of 1763 among the three nations the line between the French and English possessions in that part of the world was described as drawn along the middle of the Iberville River and the Lakes Maurepas and Pontchartrain to the sea and then it was provided that France ceded everything to Great Britain on the left side of the River Mississippi "except the town of New Orleans, and the island on which it is situated, which shall remain to France." In the letter to M. d'Abbadie, Director General and Commandant of Louisiana for France, from the King, that officer was directed to turn over to the King of Spain the French possessions in America, and he referred to the City of New Orleans *and the island on which it stands*, and he was directed to deliver to the King of Spain nothing on the east side of the River except the city of New Orleans and the island on which it stands. R. p. 1980. In a letter to James Madison in 1803, Albert Gallatin said, "The possession of West Florida, even without *New Orleans Island*, is extremely important and if it can be obtained, it ought expressly to include all the islands

within twenty leagues, or such distance as to include those which are marked on the map." R. p. 1984. In a letter to Mr. Cevallos by Messrs. Monroe and Pinckney in 1805, the *Island of New Orleans* is referred to as a division familiar to all. R. p. 1988.

The territory erected into the State of Louisiana was mainly west of the River. The Gulf coast available at that time was that from the mouth of the Mississippi west. Nothing on the east side of the river formed a part of the old Louisiana and of the Territory of Orleans except this island. It was not intended that the Island of New Orleans and all the other islands within three leagues of the eastern coast of that island should be embraced in the new State. No other islands bleonged to the United States at that time. The framers of the law knew nothing of any other island; and if they had considered the question they would at once have decided that there was but one island on the left bank of the Mississippi to be embraced in the new State. They expressly adopted the historical description of this island with the same meaning which had been given it for the fifty years previous.

The presence of the idea of the distinct, segregated character of the Island of New Orleans at the framing of the Act of 1812 explains the action of the same body of men, twenty-two days later, in extending the boundaries of the Mississippi Territory so as to include all the islands within six leagues of the mainland. *It was not contemplated that Louisiana would get any islands east of the Island of New Orleans.* This conclusion must be true because under no theory of the case, in the light of no information then available, could the islands within six leagues of the mainland of the Mississippi Territory have been added to it without taking territory close up to the Island of New Orleans. While the said island was thought of as a narrow strip running along the east bank of the Mississippi, yet it was thought to extend as far east as the line running north and south through the eastern mouth of the Pearl. Immediately on the east side of the Pearl Mississippi Territory began. Under the said Act of May 14, 1812, an island within six leagues of the mouth of the Pearl belonged to the Mississippi Territory. It is idle to contend that Congress committed so great a blunder as to provide for measurements from both sides of the right angle, to the east from the Louisiana side, to the south from the Mississippi side. The con-

clusion is inevitable that the lawmakers thought a line could run south six leagues from the eastern bank of the Pearl and not touch Louisiana territory.

The present State of Louisiana, like the Territory of Orleans, and like the Louisiana purchased from France in 1803, *and that ceded to Spain and delivered to her in* 1763 *by France, includes nothing east of the Mississippi and south of the Iberville except the city of New Orleans and the island on which it is situated.* All the remaining territory was West Florida, was added to the Mississippi Territory May 14, 1812, and made part of the State of Mississippi in 1817. The Island of New Orleans was the only available territory in that quarter.

The description of the line from the River Mississippi eastward was used and is to be understood with its historical meaning —with the meaning it had in 1763, in 1803, in 1811, that is, since 1763. The city of New Orleans happens to be on the left bank; it was the only considerable town in the entire territory; it was the seat of government for the territory, and was the center of trade and travel. Every cession of the territory was carefully framed so as to save their city to the people of Louisiana. In general, the River was the eastern boundary, but enough east of the River was always embraced to carry the city along with the country on the right bank. Reference to article VII of the Treaty of Paris of 1763 shows the soundness of this contention. "And for this purpose the Most Christian King cedes to His Britanic Majesty, and guarantees to him, the entire possession of the river and part of Mobile, and all that he possesses or should have possessed, on the left bank of the River Mississippi, with the exception of New Orleans and the island whereon that city stands, which are to remain subject to France." *Only enough east of the river was attached to the west side to carry the city.* This line was never changed. It is the line adopted the same year by King George in defining the boundaries of West Florida. It is consecrated by time. And in determining this line between France and England in 1763 there could have been no difference of opinion as to whom an island belonged. It all belonged to England with the exception of one island, namely, the one on which the city of New Orleans was situated. This much was carved out of the east side territory and constituted the single

exception to the general provision that the Mississippi river should be the boundary. In 1812, on April 6th, the United States (or Spain, her predecessor) stood where Great Britain stood on February 10, 1763. She claimed as territory all east of the Mississippi with the single exception of a single island, to-wit: the island on which the city of New Orleans is situated, that having been made a part of the newly erected State of Louisiana. The State of Mississippi has succeeded to the claims and rights of the United States in this same territory. What England might have claimed in 1763 and the Federal Government in 1812, Mississippi is entitled to now.

That the description of the line eastward from the Mississippi river as used in the Act of Congress and in the preamble to the constitution of the State of Louisiana is to be taken with its historical meaning—as a description for the Island of New Orleans—is capable of further proof. The public had a definite idea of the "Island of New Orleans." The court's attention is called to the numerous references and the familiarity with which such references are made. No writer paused to explain what he meant by "Island of New Orleans." The Congress itself called it by this name with no other description. R. p. 1868. The Land Office continually made use of it in naming the land district "east of the River Mississippi and island of New Orleans." And this court in its discussion of the conflicting claims of Spain and the United States, after the Louisiana purchase, to the lands between the Mississippi and the Pearl and south of the 31st parallel, refers continually to the island and recognizes the historical meaning to be given the said description. *Foster et al. vs. Neilson*, 2 *Peters*, 300. In fact, it would seem that the preceding general description contained in the Act of April 6, 1812, would place beyond the pale of discussion the position that the particular description must be given its historical meaning. The said general description is "part of the territory or country ceded under the name of Louisiana, by the Treaty made at Paris on the 30th day of April, 1803." The "Louisiana" of the Treaty of Paris of 1803 embraced nothing east of the River except the said island, hence nothing more could possibly have been made a part of the new State. The description is to be read just as if it contained the additional provision: "but nothing on the left bank of the River Mississippi is to be embraced in the State of Louisiana except the

city of New Orleans and the island on which it is situated." For the line east of the Mississippi described in the said Act of 1812 is the historical and ancient boundary of the said island on which the city of New Orleans stands.

And again, this ancient boundary was, by another Act, recognized by the same Congress that erected the State of Louisiana. The said line was twice declared in 1763: by the treaty made in that year defining the line between France and Great Britain in that part of the world, and by the proclamation of King George defining the boundaries of his province of West Florida. And this said 1763 line was twice declared by the Congress of 1812, and in the same terms used in 1763. The island of New Orleans was still treated as an exception, a reservation, a point of departure from the general description,— the one thing on the left bank of the River attached to the right bank. This reservation or exception was made in the words of France used in 1763; West Florida was added to the Mississippi Territory,—the West Florida described by King George in 1763. The West Florida of 1763 was described as follows: "bounded to the southward by the Gulf of Mexico, including all islands within six leagues of the coast from the River Appalachicola to Lake Pontchartrain." This coast line embraced what is now Alabama and Mississippi. From that time West Florida was a well-known province and was always called by that name. In the Treaty of Versailles of December 3, 1783, it was ceded to Spain with no other description than "West Florida." In the treaty of 1819 between Spain and the United States the province was ceded under the same name with the additional description "the adjacent islands dependent on said province, * * * * are included." R. p. 1878. See the frequent mention of the province in the correspondence between Spain, France and the United States relative to the eastern limits of the Louisiana purchase not mentioned in Foster et al vs. Neilson: Madison to Livingston, (1801), R. p. 1982; Gallatin to Madison (1803), R. p. 1983; Madison to Monroe (1803), R. p. 1984; Instructions addressed to Monroe and Pinckney (1804), R. p. 1989; Monroe to Talleyrand (1804), R. p. 1993; Talleyrand to Gen. Armstrong (1804), R. p. 1995; Monroe and Pinckney to Cevallos, (1805), R. p. 1998; Madison to Monroe (1805), R. p. 2002; Minister of Spain to Secretary of State (1815), R. p. 2005; Monroe to Minister

of Spain (1816), R. p. 2006; Minister of Spain to Secretary of State (1816), R. p. 2007; Secretary of State to Minister of Spain (1816), R. p. 2008; Don José Pizarro to Mr. Erving (1817), R. p. 2011; Don Luis to Secretary of State (1818), R. p. 2014. And in the petition to Congress by the people of West Florida to be annexed to the Mississippi Territory (1811) it was assumed that everybody knew that province. The West Florida mentioned in these letters, the one known to history, is the province whose boundaries were defined by the King of England Oct. 7, 1763. And it was this same territory that was added to the Mississippi Territory at the instance of the inhabitants of West Florida by the Act of May 14, 1812. That the island territory of West Florida was clearly intended to be added by the said Act, is apparent when it is observed that no further addition was ever made to the Territory and five years later when Mississippi was created out of the western half of the Mississippi Territory its water line was made to follow the south line of West Florida. If West Florida, in 1763, was so framed as to embrace what is now disputed territory, the State of Mississippi embraces it.

This position may be further strengthened by an examination of the descriptive words used in the Proclamation of the British King in 1763 and those used in the Treaty of Paris of that year, and in the Treaty of Paris of 1803, in the Act of February 20, 1811, and in that of April 6, 1812. West Florida included "all islands within six leagues of the coast from the River Appalachicola to Lake Ponchartrain." R. p. 1979. The mouth of Pontchartrain was the eastern extremity, on that line, of the island of New Orleans. That lake was regarded as emptying into the Gulf of Mexico at that point. No islands were considered as being attached to that island. The coast line of West Florida extended westward to the island of New Orleans, and the eastern water line of that island was supposed to run south from the mouth of Pontchartrain, and of the mouth of the Pearl, the mouth of Pontchartrain and of the Pearl being at the same point. The West Florida description necessarily included islands (if any there were) along the eastern water line of the said island of New Orleans; it included every island within the 6-league limit except the Island of New Orleans itself however close such other islands might lie to that on which the city of New Orleans stands. The King of England had the right to do this since France had

reserved nothing east of the River except that one island. And the said treaties and the Acts of 1811 and 1812 use terms which clearly indicate that the mouth of Pontchartrain marked the eastern extremity, on that line, of the island of New Orleans. In all these descriptions Pontchartrain opens into the Gulf. Proceeding eastward from the Mississippi with the line, the authors of the treaties and laws stopped when they carried the description to the mouth of Pontchartrain. Thence eastward the country was known as West Florida; the line extending from the River to that point cut off the island. South of that line was the island of New Orleans, the one island going with the west bank of the River. Think of Spain while in possession of Louisiana after 1763 attempting to claim anything east of the Mississippi except the city and Island of New Orleans! How would Great Britain, in 1765, have entertained a contention on the part of Spain that the latter government owned the islands off the coast of the Island of New Orleans? The claim of Louisiana as against Mississippi can be no stronger nor better than such a claim by Spain in 1765.

That part of the coast line of West Florida from the most eastern junction of Pearl River with Lake Borgne to Pontchartrain now belongs to Louisiana. The selection of the Pearl for the eastern boundary of Louisiana was doubtless influenced to some extent by the discovery that the island of New Orleans extended that far eastward as shown by Ellicott's map hereinafter discussed.

The testimony taken by Mississippi to prove that this historical meaning is the one which tradition says was the contemporaneous understanding of the laws creating the States is of considerable weight. Witnesses for Mississippi many of them testifying as to information received fifty years ago say they heard it from "the old people" or "the old-timers" or "the old settlers" that all the islands claimed now by Louisiana and being within the 6-league limit are within the limits of Mississippi. They all say they have heard from these old people that Mississippi included every island within eighteen miles south of her coast. This is valuable testimony,—especially in view of the fact that no witness (with one or two exceptions) has said that it was ever considered by the old people to be a part of Louis-

iana. Louisiana did not attempt to show what tradition says as to her limits. She permits the proof of tradition offered in support of Mississippi's claim to stand unchallenged, to be accepted by this court at its face value. As far as this record shows, tradition tells but one story about it. B. R. Clements, a boatman, 74 years old, fished among these islands as early as 1851. He says: "it has always been my impression and all the boatmen's impression that Pearl river was the dividing line between Louisiana and Mississippi running due south." R. p. 1206. Cross-examined as to whether the line south from the Pearl is straight he said: "Well, Judge, that way we haphazard that. We say Pearl river runs due south. It might run southeast, or east southeast or somewhere around there. We never mentioned anything of that kind, but the supposition was among the boatmen (1851 to 1862) that this was the boundary line between the two States." Asked, "And that was the prevailing idea among the fishermen, you say?" he answered, "Yes, sir." And "That the line was due south 18 miles from Pearl river?" he answered, "Yes, sir." R. p. 1216. John Walker, a boatman, 71 years old, was asked: "Could you say whether or not the deep water channel line has ever been regarded as the dividing line between Louisiana and Mississippi?" He answered: "I never heard of it until this controversy arose between the two States. I always heard and always considered that the boundary line was due south from Pearl river 18 miles. I always did so consider it and always heard it spoken of in that way until this lawsuit." R. p. 1270. This witness says, too, that while he lived in New Orleans (1867), he and others thought that the jurisdiction of Mississippi extended to the mouth of the River, which idea was doubtless a remnant of the old understanding that Louisiana had nothing east of the River except the one island on which the city of New Orleans stands. R. p. 1274. Frank Fountain, 70 years old, an oysterman, on being asked about the line said he knew nothing only what the old people told him. "Q. What did the old people say? A. They said that the line was 18 miles south of Pearl river mouth. I don't know it though. I cannot prove it. Q. How old were you then? A. About ten years old." R. p. 1308. This witness says he heard it from old people as early as 1844. J. B. Fountain, 67 years old, testified: "Q. Where did you hear that the line was,

Captain? A. I have always heard that the line was 18 miles south of Pearl river. That is what I have always heard. Q. Have you regarded it as being 18 miles south all your life? A. No, sir, that is what I have heard, but I am not certain about it. Q. How have you regarded it? A. All the old settlers used to tell me that that was the limit." R. p. 1314. J. B. Mozan, 68 years old, born and raised on the coast and travelled these waters when he was ten years old, says his father told him 60 years ago that the Mississippi line ran south 18 miles from the mouth of the Pearl. His father lived there all his life and would be about 90 years old if now living. He says, too, that the people along the coast always understood it as his father explained it to him. R. p. 1341. Eugene Tiblier, Frenchman, 63 years old, raised on the coast, his father having lived there before him, says that he has always been told that the line runs south 18 miles from the mouth of the Pearl. His father would be 93 years old if now living. R. p. 1352. Richard Lanus, 57 years old, had always heard the same tradition as to the line. R. p. 1376. Charles Williams swears to the same thing. R. p. 1397. Peter Anglada, 40 years old, born and reared on the coast says: "My old father told me that the dividing line was Pearl river and that it runs 18 miles south, as I always thought that." His father would be 76 years old if living. R. pp. 1421, 1423. Wilmer Mathieu, 43 years, said "I considered the line and I have always heard that the line was 18 miles south of Pearl river." R. pp. 1435, 1438. U. Desports testifies to the same understanding "that the line was due south 18 miles from Pearl river." R. p. 1452. Earnest Desports, 51 years old, swears to the same general understanding. R. p. 1457. His grandfather came to the coast in 1825. T. R. Friar had lived at Ocean Springs 50 years and had "always heard that Pearl river was the line and from there running south." R. p. 1462. A. Ryan, 59 years old, commenced oyster fishing about 1870. He says, too, "I have always heard it said you know that the lines run south from the river straight out." R. p. 1466. He says he speaks entirely from what he has heard. A. Beaugez, 45 years old, lived on Cat Island eleven years. Always heard that Isle a'Pitre is in Mississippi and that the boundary line runs south from mouth of the Pearl. R. pp. 1469, 1470. J. B. Beaugez, 48 years old, said: "I have heard a good many times that the line ran from east Pearl river south • • • •

about 17 or 18 miles. That is what I have heard • • • • ever since I was a little boy. I have always heard my folks say so. That is, the old people." R. p. 1473. E. Ladnier, 37 years old, said: "I always heard that the line run due south from the mouth of Pearl river • • • • 18 miles." He said this is the tradition. R. p. 1475. F. P. Lizana, 45 years old, had heard his father say that these islands within six leagues of the coast are in Mississippi. His grandfather was a Spaniard and his father would be 89 years old if now living. R. pp. 1512, 1513. Capt. S. R. Thompson, 65 years old, born on the coast immediately north of the disputed area, boatman since 1867, said: "Well, the dividing line between the two States has always been understood with me and most of the captains that I talked with to be eastern Pearl river. The line followed this river while it flowed in its banks, and after it left its banks and emptied into the lake we thought the line extended due south 18 miles." R. p. 1524. K. L. Thornton, 49 years old, lived on the coast of Hancock county for the last 40 years. He says: "Well, as far as I can understand from hearsay and otherwise they have all claimed that the southern boundary is 18 miles from the shore, though it was not definitely located at any particular point. That is, I have never heard them speak of any particular islands or particular marshes or coast or anything else as being the southern boundary, but we have always spoken of it as being 18 miles from the shore." R. p. 1545. He says, again: "My recollection was from hearsay when I first came down to the coast as a child," and that "this was the general acceptation amongst the fishermen and people along here." He says, too, that he thinks all those people from whom he heard it 40 years ago are dead. Fred Eleuterius says the general understanding has always been, as far as he knows, that the line runs 18 miles south of the mouth of Pearl river. R. p. 1575. Cross-examined: "Where did you derive your information about the southern boundary of Mississippi being 18 miles south of the mainland? A. It was hearsay. Asking older men than myself about it. The boatmen." R. p. 1577. To the same effect is the testimony of Capt. George McCaughan, a seaman, 63 years old, born and reared on the coast. R. p. 1612. J. A. Breath, 58 years old, always understood that the line runs 18 miles south out of the mouth of Pearl river. R. p. 1645. Pascal Luzzi, born in Rome,

1855, came to this coast 1872. He says when he was among these marsh islands within six leagues of the Mississippi shore he always understood he was in Mississippi. "The old time people told us that we were in the State of Mississippi." R. p. 1652. He says they told him that 30 years ago.

It will be noted that we have quoted those witnesses who had the idea that the Pearl river extended is the line. This is as strong proof of the existence of a tradition as could well be offered. The "old settlers," the "old people" and the "old time people" from whom these witnesses received their information were contemporaries of the authors of the Acts of 1812 and 1817. Their impressions were made at the time of the publication of the laws and the creation of the States. What the public thought at that time, it is safe to assume, is what the Congress intended. The said proof is overwhelming.

And the said tradition, being in perfect accord with the historical account, the two—tradition and history—support each other. They speak the same truth. The conclusions we have drawn from the history of the lines were known to the public of 1812 and 1817, and have been transmitted from father to son, to the third and fourth generation.

No witness for either side says that any tradition gives these marsh islands to Louisiana. As we have already suggested, it does not appear that the people of that section ever thought of claiming them for Louisiana except in so far as such claim may be shown by the application made to the land department under the Swamp Land Act, and this transaction was probably known to no more than a dozen people. It stands to reason that the settlers knew of the limited extent of Louisiana east of the Mississippi—that nothing on the left bank of the River belonged to her except the one island. This understanding and the Pearl river boundary idea have been in the same minds all these years and they belong together.

The island of New Orleans, well defined, segregated, set apart, the only territory of the ancient and modern Louisiana east of the River—this *one-island* idea, could not live in the same mind with another idea that the islands along the coast of this single island belong to it and go with it. But it could be entertained

along with the general understanding that the ancient West Florida and the modern Mississippi includes everything except the one island reserved to Louisiana. "New Orleans and the island on which that city stands." These are the words of history and of tradition.

This truth could not be ignored by counsel for Louisiana in their pleadings and proof. Its presence with them at every stage of the proceedings is manifested by this record. They do not claim Isle a'Pitre or any marsh island because it is within the 3-league limit. They contend that it is a part of the original island of New Orleans, a part of what they now call mainland. They undertake to show that these marsh islands have been formed in recent years by the forces of nature. Why go to this trouble if they are entitled, under the Act of 1812, to the islands within three leagues of the coast of the island of New Orleans? Why depend upon the wind and waves if the Act creating the State gives to it these islands within the 3-league limit? This laborious effort on the part of counsel for Louisiana is a recognition of the truth of history that Louisiana was given but one island east of the River, and of the necessary conclusion that in order to place these islands in Louisiana in 1902 it must be made to appear that they were not islands in 1812, but were part of the *one-island* which their State received on the left bank of the River. Louisiana was made to extend across the River only to take in one island: they must therefore prove that these islands in dispute are fragments of the said one island. In this way alone can the historical description used in the Act of 1812 be made to contain them.

This same one-island idea has been entertained too by the Legislature of Louisiana and by the civil authorities of that State until the development of the oyster industry in this section. The Legislature has never defined the boundaries of the parish of St. Bernard so as to embrace these marsh islands; nor had the boundaries of the older parish of Plaquemines ever been made to surround them. Counsel were expressly requested by counsel for Mississippi to produce such legislation, but it was not produced. We infer that there is no such Louisiana statute. The legislature of Mississippi however, as early as 1857, extended the boundaries of our coast counties so as to make them embrace these islands. Nor does it appear that the civil authorities of Louisiana

ever exercised jurisdiction or claimed jurisdiction in this disputed area until a few years ago. The people of Louisiana have consistently confined their claims as citizens of that State to the *one island*. The single exception is the claiming of this island territory at the United States Land Office in 1852. And to save the territory to Louisiana it has been undertaken to weld the parts together and claim the entire territory as one island.

Suppose the Congress did not use the historical description of the line from the Mississippi eastward, but traced the line on a map and selected the description from the map on which the line was traced. We are entirely willing to take up and examine this suggestion. If the authors of the Act of April 6, 1812, did take the description of the said line from a map we will be permitted to assume that they used the names found on the map. The description to be examined is "thence along the middle of said River (Iberville) and Lakes Maurepas and Pontchartrain to the Gulf of Mexico." It is evident that if any map was depended upon it was one which ignored the Amite River and represented the Iberville as connecting the Mississippi with Maurepas. No map need apply for the distinction which does not possess this peculiarity. No mention is made of the Amite although on modern maps, and on a majority of the old maps it forms the larger part of the connection between the Mississippi and Maurepas, the Iberville flowing into it. When the second Act of April 14th was framed, the Amite was recognized in describing precisely the same line from the same extremity. And in the second place, it appears that no mention is made of the Rigolets in the said Act of April 6th, "Thence along the middle of said River and Lakes Maurepas and Pontchartrain to the Gulf of Mexico." Nothing is mentioned between Pontchartrain and the Gulf, although there are two routes some distance apart and nine or ten miles long, Chef Menteur and the Rigolets, from Pontchartrain to the Gulf. The map taken for a guide, if any, showed an open easy connection between Pontchartrain and the next waters which required no description. And in the third place, no map can be considered as a probability which called the waters into which Pontchartrain opened "Lake Borgne." Neither Louisiana Act mentions Lake Borgne. The line traced and described did not pass through Lake Borgne else it would

have been described. Again, no map can be elected which does not make Pontchartrain open easily into the Gulf. The description stops at the mouth of Pontchartrain and calls those waters the Gulf of Mexico. Let us see whether there was then extant any map which can stand the test of a trial under the Act itself. It does not appear that the maps of this section were numerous, hence it ought not to be a difficult matter to select the eligible.

Of course, we will discuss here those maps only which were in print in 1812, and which might have been examined by the authors of the Act of April 6th. And the court is asked to consider them, not for their inherent worth—for no two agree and all are wrong—but because they deal with this territory and furnished the only information pertaining to the same then available. For the purpose of this immediate inquiry, they are to be treated as primary evidence, not of the shape of the land pictured thereon, but of the character of the information which was then accessible to the members of Congress. They are as valuable for what they omit as for what they contain.

Bowen's map of 1764 represents the island of New Orleans as extending eastward as far as the Pearl, connects the Mississippi and Maurepas by the use of the Iberville, has a large open mouth for Pontchartrain into the waters next east, makes no mention of Lake Borgne, and opens Pontchartrain into the Gulf. This map might have been referred to since its description of the line is the same as that used in the Act. It was published in an atlas and was very likely at hand.

Bellin's map of 1764 pictures a solid island cut off by a channel extending nearly south from the southern part of Lake Borgne to the Gulf. It shows numerous arms of the sea and also places Lake Borgne between Pontchartrain and the Gulf. It does not represent the open sea as being immediately east of Pontchartrain. If the lawmakers had been looking at this map they would have found it necessary to describe the boundary much farther east than the mouth of Lake Borgne before reaching the Gulf. It is easy to conclude that they did not have this old map before them.

Tirion's map of 1766 does not show the Iberville or the Amite; it does not show the broad open exit from Pontchartrain into the open sea; it shows at least three mouths of Pearl River.

It represents a channel from Pontchartrain to the next waters east and calls it Pass à Guyon.

Jeffery's map of 1775 shows a narrow channel from Lake Pontchartrain to the next waters east and names it Passe à Guyon. The same criticism may be made of Lieutenant Ross' map of the same date. Besides, the said Ross map plainly marks the Iberville as connecting the Mississippi with Lake Maurepas. His map is but a copy of that made by Jefferys. And the map of 1766 taken from the London Magazine is but a copy of Tirion's map.

Lafon's map of 1806 is the one to which counsel for the State of Louisiana have given especial attention in the taking of testimony. We apprehend that this is the map which they will insist was taken for a guide when the Act of 1812 was framed. But it cannot stand to be tried by the Act itself. It clearly marks the Amite as forming the larger part of the connection between the Mississippi and Maurepas, while the original Act creating the State of Louisiana does not mention the Amite at all as forming a part of this channel. The Lafon map plainly marks the Rigolets, but there is no mention of the Rigolets in the Act of 1812. Lafon places Lake Borgne and other waters between Pontchartrain and the open sea. If the framers of this statute had been looking at Lafon's map they would not have failed to mark the line from the mouth of the Rigolets to the Gulf.

All the above named maps, Lafon's and Bowen's excepted, were made by foreigners. It is more probable that the Congress, if using any, looked to the map or maps made by persons living in this country. The contest would seem to lie between Lafon's, Bowen's, and one other map, made by Andrew Ellicott, a then recent map. An examination of these two maps, Ellicott's and Lafon's, in the presence of the Act of 1812, renders a decision easy and certain as to which of these two maps, if either, was taken for a guide.

Andrew Ellicott's Journal of his explorations and surveys had recently been published, and was official. He had been into this territory and published his journal and map as being based upon first hand information. He was paid by Congress to do the work; he made actual surveys. This journal and map were immediately at hand and we would expect to find that the mem-

bers of Congress, having special confidence in their own representative and employe, looked to Ellicott's map and journal for their information. Let us try his map by the Act of 1812 and determine whether the use of terms in those Acts and the peculiarity of the descriptions were likely taken from this map. In the first place, it will be noted that Ellicott's map gives no name to the channel from Lake Maurepas to the junction of the Iberville and the Amite. One cannot look at his map and decide whether the channel from the junction of these two rivers to Maurepas is the Amite or the Iberville. The original Act of April 6, 1812, calls it the Iberville, the Act of eight days later calls the part east of the junction the Amite. In the second place Ellicott allows a large, free opening from Lake Pontchartrain to the open sea. It does not show the Rigolets, but places the waters of the Gulf next after Pontchartrain going east. In the third place, Ellicott does not represent Lake Borgne at all and does not place any body of water between Pontchartrain and the Gulf. In the fourth place, Ellicott shows two mouths of Pearl River and shows them too immediately at the mouth of Pontchartrain, so close that there is no necessity for a description of the line connecting the eastern mouth with Lake Pontchartrain. The feature of this map which, to our mind, makes it reasonably certain that it was before the makers of the law at the time the description of the boundary of the original State of Louisiana was being described, is that the Gulf of Mexico is represented as being in direct close connection with Lake Pontchartrain. The description contained in the said original Act covers the entire distance from the mouth of Pontchartrain to the Sabine River with "thence bounded by the Gulf of Mexico." If the lawmakers had their eyes on a picture it was one which brought Pontchartrain and the Gulf together, one which showed no route to be defined from the mouth of Pontchartrain to the waters of the Gulf.

We may, therefore, with safety infer that the authors of the said Act of April 6th, used the description of the line from the Mississippi eastward as it was found in the several treaties concerning that territory with its historical meaning since there was then in existence no map which employed the same description for the line as that used in the said Act. The said maps make a stronghold of the position to which we had already been con-

ducted by history and tradition. We respectfully submit that the said position is invincible.

And if, under any view of the case, our conclusion above stated should not be accepted by the court, there remains only an alternative, to-wit: the conclusion that the framers of the Acts used Ellicott's map for a guide. That is the only map which ignores Lake Borgne and the Rigolets, gives Pontchartrain a wide opening into the waters immediately east and calls these waters the Gulf of Mexico; and is the only one which combines all these said peculiar features with a doubtful connection of the Mississippi with Maurepas.

But we are willing to accept either alternative—we are willing to stand upon the conclusion that the historical description was used, or that Ellicott's map was before the lawmakers. We have already demonstrated our readiness to accept the description with its historical meaning. And it will appear that Ellicott's map presents the several historical and traditional ideas for which we are contending: the Pearl River line extended south along the eastern water line of the island of New Orleans; the isolated, well-defined island on which the city of New Orleans stands. This map presents the picture which was in the mind of the authors of the Act. It is true to history though not strictly true to the facts. The island of New Orleans is set apart. The lawmakers looking at this map might still have employed the historical description.

Our conclusion is that the State of Louisiana was intended to embrace no territory east of the Mississippi except the island on which the city of New Orleans stands, this conclusion being based upon the following facts:

1. The description of the territory on the east bank of the River, used in the Act creating the State, is the one whose meaning was established; it is the ancient description for the island of New Orleans.

2. The same Congress that passed the said Act added all the other islands to the Mississippi Territory in the annexation of West Florida east of the Pearl to the said territory, the said province of West Florida including all islands within six leagues of the coast.

3. The Congress of 1817 erected the State of Mississippi in the western part of this territory and adopted, as a matter of course, the West Florida lines.

4. History represented the island of New Orleans as a narrow strip along the east bank of the River with its north and south line on the east side as an extension of the east Pearl river line, thus making apparent the impossibility of allowing to West Florida, or Mississippi Territory, or the State of Mississippi islands within six leagues of the eastern bank of the Pearl if any island had previously been attached to the said island of New Orleans.

5. Tradition, proved by satisfactory evidence, says that the east Pearl river line extended is the line understood generally at the time the States were formed. And no tradition says the territory was ever considered to be in Louisiana.

6. Louisiana has always confined her jurisdiction to the island of New Orleans in these waters, her Legislature having never extended the boundaries of any parish around it and her civil authorities having never exercised jurisdiction over it. The only claim ever made to it consisted in an application to the United States Land Office under the Swamp Land Act of 1850 and the subsequent sale and taxation of the land. And it does not appear that any Mississippian ever heard of this.

7. The only map in existence at the time which can with reason be insisted upon as having been taken for a guide by the authors of the said Act, shows the island of New Orleans segregated, well defined, its eastern water line an extension of east Pearl river, and with the islands southwes' of Cat Island close up to the Mississippi shore.

IV.

But what signifies the conclusion that the historical description of the island of New Orlea s was used and that nothing east of the Mississippi was to be in Louisiana except the said island, when the said conclusion is viewed in the light of the large purpose which we have been insisting controlled the authors of the laws? It restores order and prevents a conflict between the enactments. The two great truths of history fit the two States together firmly and wisely and vindicate the justice and

clearness of vision of the Congress. Louisiana had nothing on the east of the River but the one island; her coast line with its dependent islands was and is on the south; the coast line from which measurements were intended to be made—to ascertain which this investigation was instituted—runs generally east and west; the islands within the 3-league limit which Louisiana was to have were and are "'immediately south and in front of her mainland," not on her east line, at her side door, on the coast of her island of New Orleans, in front of and south of Mississippi. It enables every part of both Acts to stand. It makes each detail to contribute its part in the accomplishment of the single purpose. It relieves the necessity of an operation upon the Mississippi Act to make it appear not to mean what it says. It locates a coast line for Louisiana, the one intended, from which measurements may be made to determine her ownership of islands, and at the same time leaves undiminished the well-known shore line of Mississippi unequivocally defined by her Act within six leagues of which she is to have all islands.

V.

In the foregoing argument we have assumed that the island on which New Orleans stands has the same shape and extent that it had in 1812 or 1763. Of course, if that island extended as far eastward as Isle a'Pitre in 1812 and the area now in dispute was part of a continuous body of solid land, part of that island, Louisiana is entitled to it. She gets whatever was then the island of New Orleans, however great its extent. If the lawmakers were mistaken as to the extent, at that time, of the said Island, and its east line was at Isle a'Pitre and not at Nine Mile bayou south of the eastern mouth of the Pearl, the Isle a'Pitre line should still be adopted. If the islands for which we are contending have been formed since the States were created we concede them to Louisiana.

We have already demonstrated, however, that the lawmakers thought this territory was composed of islands. They thought the east line of the island of New Orleans was south from the eastern mouth of the Pearl. We apprehend, therefore, that if there was in 1812 a channel on the line south from Pearl river separating the mainland of New Orleans island from the marsh

territory, this line will be accepted although there might be room for difference of opinion as to whether the bodies of land, at that time, were properly called islands, and although it might further appear that the said marshes originally formed a part of the said large island. The Congress considered them islands.

We will now proceed to inquire whether the evidence proves that these islands have been formed since 1812. Testimony is offered as to subsidence; as to storms; as to particular changes.

It will be observed that the consensus of opinion among geologists is that all this peninsula was formed by the Mississippi river from its deposits. No geologist guesses at the age of this river; no one of them speculates upon the time during which it has been making deposits in these waters. All the land south of Maurepas and Pontchartrain was doubtless constructed from these deposits. Since this disputed area was created, the river has built more than a hundred miles of banks with thousands of acres of land. This has required so many thousand years that the most daring geologist will not under take to fix the limit of time. And although this land was formed so far back in the history of the world; and although we find it now broken up into well-defined islands, yet counsel for Louisiana insist that this court should conclude that it has been so broken up within the last century. Can such remote and doubtful facts be proved by mere speculation, itself indefinite and doubtful? Or by the hearsay of map-makers? The burden certainly is upon Louisiana to prove that these islands were, in 1763 and 1812, a part of the Island of New Orleans.

The testimony of Maj. B. M. Harrod, a member of the Isthmian Canal Commission, is eminently fair. He says lines have been run from Baton Rouge down into the Parish of St. Bernard, but the changes were not perceptible. While it is generally believed that the subsidence is going on it has never been discovered by instruments. He knew the country before 1850, but has noted no change within this disputed area. Asked, "Well, do you believe that since the years 1812 and 1817 the conformations of those islands have been materially changed either by action of tidal waters or subsidences or by any other agencies, and we mean by those islands in this question those nearest and adjoining Saint Bernard—the mainland of Saint

Bernard parish?" He answered, "I could not give any answer about the time, since 1817 or 1818. I believe that peninsula was formed by the river deposits being placed out in a shallow sea that had tidal movements and instead of forming a solid peninsula it left these open areas through it for the tidal movements in and out of Lake Borgne and Lake Pontchartrain and that those lakes or spaces of water have been enlarged since their formation, by subsidence. That is my opinion about the formation of that peninsula; that water areas were left there when it was originally formed and have subsequently enlarged by subsidence." And then he said the process has been going on "For centuries I have no doubt." R. p. 135. Capt. Thomas Summerall noted changes at Creole Gap and at the mouth of Three Mile Bayou made by the 1893 storm. R. p. 243. Capt. J. D. Railey says Three Mile bayou was only about 100 feet at mouth when he first knew it and now it is three times that. R. p. 250. Also noted changes between 1869 and 1889 at Point Comfort and Martin Island. Says Three Mile bayou was so called in 1869. Always 2 1-2 feet of water through Three Mile bayou south at very low tide, and 4 feet at high tide. Says the general body of the island area is now just as it was in 1869. R. p. 259. Charles Sanger testifies as to changes within the last 10 years. R. p. 260. To the same effect is the testimony of William Dillard. R. p. 266. Says Nine Mile bayou is 30 to 40 feet deep in one place. R. p. 277. Capt. Alfred C. Ruiz made trips down Nine Mile bayou in 1874. R. p. 294. Round island has disappeared since 1876, and there have been changes along Nine Mile bayou. R. p. 295. Nine Mile bayou has a very deep channel. Has gone through the marshes with the Majestic drawing 3 1-2 feet of water. Alfred Monier, in January, 1904, walked from Malheureux Point to Isle a'Pitre, being carried across the bays and bayous by George Thiel. It is a hard coast line, and about 50 miles long. Shore from 1 1-2 to 2 feet above sea level. Had no high tides. R. p. 326. William C. Stubbs, professor of agriculture in Louisiana State University, 58 years old, says the whole Mississippi Delta was formed by deposits; that Maurepas and Pontchartrain are fragments of the Gulf; that Louisiana belongs to the recent or present geological period, and that this *period may cover five thousand or five million years.* Says it is the opinion of geologists that the Mississippi Delta on the Gulf

sinks at the rate of four feet a century; that the area now in dispute sinks less perhaps; that the bed of the Mississippi Sound, the land under water, subsides at the same rate with that above water, and says he is certain there have been changes within the last hundred years, but could not call them great changes. R. p. 332. John McGraw, a purchaser of lands in disputed area from Louisiana says St. Joseph island has disappeared. Knows of changes at Creole Gap, Three Mile bayou and Grand Pass. He and other witnesses speak of a tradition as to how Creole Gap was formed. (But, it will be noted, there is no tradition which tells of the creation of any other pass or bayou along from Petite Pass to Isle a'Pitre or of the mainland of New Orleans island ever including this territory.) R. p. 409. J. B. Baylor, connected with United States Coast and Geodetic Survey since 1873. First survey by United States in the 50's. Made surveys on Mississippi coast and outlying islands in 1903 and found there had been no marked change along the line from Malheureux Point to Isle a'Pitre in last 50 years. "As a general proposition my work showed conclusively to my mind that there has been no marked change in regard to the washing away of that coast in 50 years." R. p. 416. Says the original topographic and hydrographic sheets made 50 years ago are on file in the archives of the Coast Survey and that a re-survey would show precisely what changes have taken place within the last 50 years in the widening of bayous between Malheureux Point and Isle a'Pitre. R. p. 434. William C. Hodgkins, an assistant in the Coast and Geodetic Survey, with which department he has been connected since 1871, says the Land Office surveys are shown by topographical maps, and that a survey of country south of Lake Borgne and the Sound was made in 1845. R. p. 483. James Wilkinson, 48 years old, ex-district attorney for parishes of St. Bernard and Plaquemines, testifies in a general way about the agencies at work to sink the whole of the Louisiana country. R. p. 525. Joseph C. Gilmore owns a part of Isle a'Pitre and was on the island as early as 1881. Has never noted any material change. R. p. 541. Capt. A. S. Cowand, 65 years old, says he knows every bay and pass in the disputed territory, having been in it frequently since 1853. He camped on Half Moon island in 1857. Then there were several islands known as Malheureux "on the corner of Petite Pass, on the Lake Borgne side." R. p. 545. These islands have disap-

peared. In the marsh you frequently find more than 20 feet of water. There have been changes at Nine Mile bayou, it being about double its width in 1853 and 1857; Three Mile bayou has widened 150 feet in the same time. Heard the lighthouse keeper say, in 1858, that he remembered when Petite pass was made. Noticed that shell banks at Johnson bayou, Turkey bayou and Grand Pass have disappeared. Creole Gap has been formed since 1857. Has noticed changes at Sundown island, Brush island, Martin island, Elephant pass; every island in the marsh has decreased in size. Says Lafon's map of 1806 comes nearer to showing the territory as he first knew it than Mississippi Exhibit A. He does not recall any bayou similar to that marked "B. Guillemard" on the Lafon map. R. p. 561. His father settled in this section in 1832, and he told witness of the tradition that the early French settlers named Isle au Pied from the discovery of a great many tracks on it. R. p. 566. Has known all these passes and bayous running south from Mississippi sound since 1857 and they were well-defined water courses when he first knew them. Knew these islands in 1857 and believes they were smaller then than in 1812. Fished oysters in the marshes in the 50's. Can trace on map No. 17 the route he followed in 1857. Mississippi Sound, Lake Borgne and the bays had the same names in 1833 when his father settled here that they have now. He is of the opinion that the territory contained much more land and much less water in 1812 than it contains now. R. p. 597. C. Donovan, civil engineer, 53 years old, for 25 1-2 years employed to inspect the work done by Eads on the jetties. Says the subsidence of the land necessitated a change of the plane of reference by which the depth of the jetties was determined. Thinks the subsidence in the country around Port Eads amounted to 1.54 feet in 25 years, and that there was no change in the Gulf level. R. p. 646. Ernest Cucullu, 69 years old, born in New Orleans, lived in St. Bernard parish all his life. Went through Nine Mile bayou in 1846, but no farther into the marsh; is not certain, but thinks there was more land there in 1846 than is shown now by map 17; Nine Mile bayou was 500 feet wide at mouth when he first saw it, and was a deep bayou. R. pp. 670, 671. Charles Marshall, superintendent, Louisville and Nashville railroad, says the marsh traversed by his road is becoming higher and firmer. R. pp. 691, 692. Hugh C. Smith, civil engineer, 45

years old, employed in 1895 to make a map of St. Bernard parish, the said map being No. 52. He made this map without new surveys, relying mainly upon the surveys by Powell and Richardson, made in 1843, '44, and '45.

The testimony mentioned in detail above was offered to prove subsidence and particular changes. But the proof of changes is strikingly uniform in that the witnesses tell of the same changes—the principal being at St. Joseph island, Three Mile bayou, and Creole gap. They all know about these three and some of them tell of a few others. Such testimony goes only to prove conclusively that no general change has been going on and only such particular ones as occur wherever bodies of land and water rub together. The general change is in theory only. The fact that these three prominent ones are remembered by all indicates that they are the only noticeable ones and that they stand out prominently.

The proof offered as to particular changes certainly does not prove that these islands did not exist in the same general shape and size two hundred years ago. The testimony may be sufficient to raise a doubt as to whether they were islands one thousand years ago, but it certainly falls far short of proving it with such certainty as to justify an assumption of the fact. There is no tradition as to the formation of Nine Mile bayou. It was a large water course in 1843, deep and nearly a quarter of a mile wide. See Louisiana Document No. 43, R. p. 1047 f. The same surveys of 1843, '44, and '45, show Three Mile bayou with the prominence it has on the latest maps. See R. p. 1047 b. In fact, counsel for Louisiana have offered opinions of witnesses to prove subsidence and particular changes, and at the same time have offered reliable facts which prove conclusively that there have been no material changes. Hugh C. Smith prepared his map of St. Bernard parish in 1896 and used data collected by Powell and Richardson 50 years before. He made no new surveys. He had at that time no such information as to great changes due to storms or subsidence as, in his judgment, called for a new survey or rendered the map of 1846 inaccurate and unreliable. The police jury of St. Bernard took the same view of it. They knew of no phenomena at work among the marsh islands which likely had changed the face of the country. They accepted Smith's map based upon surveys and topographical maps made 50 years

before. And this court needs only to compare the township plats prepared by Richardson and Powell in 1843, '44, and '45, with the latest maps of this territory to be convinced that within the last 60 years there have been no noticeable changes in the topography of this disputed area. Mr. Baylor said that the information collected in 1855 by the Coast and Geodetic Survey could be had and that from this information it could be determined in detail and to a certainty what changes have taken place. This information was not furnished. This witness made surveys and established lines in 1903 along the southern line of Mississippi sound, and he says he is certain there had been no material change within the previous 50 years. This testimony is definite and reliable, as are also the township plats prepared by the Land Office of the United States in 1846. This, too, although great storms have visited this section within the last 50 or 60 years, especially in 1893.

The theory of subsidence as bearing upon the question we are here considering is wholly unreasonable. It is the opinion of geologists that the Mississippi river is responsible for the formation of all this island territory west of Cat Island; that all of said land area was formed from deposits made by the waters of the said river; that the said land territory was built up by the bayous that ran from the River and especially Bayou Terre Boeuf, which divided as it extended eastward and formed Bayou la Loutre and Bayou Terre Boeuf. It is their theory that these marsh islands were formed from deposits made by these two bayous. R. p. 334. But their waters left the River *at a point 50 miles or more southwest of this area in dispute.* R. p. 337. The point at which these bayous enter the Gulf is represented now as it has been during the entire period covered by the history of the country. It is perhaps 25 miles from Isle a'Pitre to either of these bayous at the nearest point. To influence the formation of land in the neighborhood of Grand Pass these bayous would, of necessity, have flowed northeast for 20 or 25 miles. But their course as they approach the sea is southward, and their general course is southward. The truth is, in applying their theory to the conditions, these bayous are the only streams counsel can make use of, these being the nearest ones to the territory for whose existence they desire to account. And the attempt to use these bayous 25 miles southwest to reconcile the theory with the facts

only demonstrates, not the unsoundness of the general theory, but the futility of any effort to point out and give a name to the very agency employed by the Mississippi River in making the deposits in the vicinity of Three Mile bayou, Nine Mile Bayou and Grand Pass. These deposits were made by a prehistoric stream. It did its work and disappeared. No trace of it is left. This was evidently before the country south of New Orleans was constructed. The river builds south, east and west; it does not build north. The general tendency of the water in that section is southward. This territory in dispute is on the same parallel with the city of New Orleans, which is about 100 miles from the mouth of the river. It is older than the territory southwest through which Bayou la Loutre runs. We are certainly safe in saying that it is 1000 years old. Since it was formed and the River passed on in its encroachment upon the Gulf, no deposits have been made and no agency has been at work to supply what has been lost by subsidence. If it has subsided four feet a century it must of necessity have stood up originally some 40 feet above the sea level.

We respectfully submit that the proof of subsidence in theory cannot stand when viewed in the light of the facts themselves. The subsidence is going on at the mouth of the river, in the books, and in the minds of witnesses. The enormous height to which the oldest territory in that section must have been constructed *by deposits* to enable it to hold its head above the water after the subsidence of centuries—this suggestion kills the theory. If the people of Louisiana believed in it, lands would decrease in value and inhabitants would flee for their lives. The country would all sink except that about the mouth of the River. *In the course of time the mouth of the River would be an island far out in the Gulf.* The only way to save the Delta country would be to tear down the levees and permit the deposits to continue. No such catastrophe is contemplated. The theorists do not fear their theories. Their experience reassures them. The theory may be correct, the figures only may be wrong. The change may be going on, but it is too slow to be taken into consideration in deciding issues between modern states. In order to reach the conclusion that the said islands have been formed within the last hundred years, it will be necessary therefore for the court to decide that much more powerful agencies were at work prior to

1845 than have been operating since that date. For it distinctly appears, independently of theories and speculations, that since 1845 there have been no such changes as to require at this time any material corrections in a map made on the former date. We think the testimony as to storms is to be given no consideration. There have always been storms on the high seas. They are not phenomena peculiar to the last century. They were operating in this territory when it was being built up and when it was easy to break through and tear down, and they very likely reserved the paths for their winds and waves when they yielded up the original ocean domain, as suggested by Maj. B. M. Harrod. R. p. 135. It has not been attempted to prove any change as having occurred prior to 1845. And since we had a survey in that year and another in 1903 by disinterested and competent men, no uncertain testimony need be considered. The results of the two surveys will be depended upon. The fact remains that this territory was broken up into islands when the first survey was made 60 years ago, and nothing has happened to call for a change of the maps made from the said first survey.

Numerous witnesses were produced by Mississippi to prove that there have been no changes among these marsh islands within the life of men now living, except those prominent ones described by witnesses for Louisiana. B. R. Clements said there has been a great change at Grand Pass since he first saw it in the 50's. He went all through the marshes in the 50's with a boat drawing from 2 to 3 feet of water. R. p. 1228. William Gorenflo has been acquainted with this territory since 1858; went through Grand Pass in 1869 with vessel drawing 5 feet; has observed no material changes in coast line from Malheureux Point to Isle a'Pitre. R. p. 1235. He says it is more than nine miles from Nine Mile bayou westward to the habitable part of the mainland of Louisiana. R. p. 1246. I. C. Morrison has known the marsh since 1868. The bayous are about the same now as they were then. R. p. 1284. John Walker went from Chandeleur Sound through Three Mile bayou in 1868 with boat drawing 4 feet and found no less than 7 feet anywhere. Has noted no changes along line from Malheureux Point to Isle a'Pitre. R. p. 1272. James Tapper saw Grand Pass in 1867, and again in 1903. Noted no material difference. R. p. 1323. John Goodier says there have

been no great changes since he first knew the territory in 1876. R. p. 1360. To the same effect is the testimony of Richard Lanus. R. p. 1371. Mr. Martinez, 60 years old, lived 25 years in St. Bernard parish, says he has noticed no changes since 1867, only bayous widened a little at the mouths. R. p. 1387. See also testimony of Charles Williams, R. p. 1398; J. S. Wentzell, R. p. 1407; J. M. Ritch, R. p. 1412; Peter Anglada, R. p. 1421; Clement Cox, R. p. 1429; Wilmer Mathieu, R. p. 1436; T. R. Friar, R. p. 1462; A. Beaugez, R. p. 1470; E. Ladnier, R. p. 1475; S. R. Thompson, R. p. 1526; Mike Lanius, R. p. 1564; Pascal Luzzi, R. p. 1650. These witnesses offered by Mississippi and those for Louisiana have observed the same prominent changes. There has evidently been no revolution in this territory within the memory of men now living. Instead of establishing the contention that there have been subsidence and washing away to such an extent as to break up a solid peninsula into islands since the two States were formed, the evidence for both sides only serves to prove beyond cavil that during the last 60 years the general outline of the territory and of its parts has remained the same.

But in their effort to prove that when these States were erected there was a solid penisula embracing all these marsh islands, counsel for Louisiana produce a great many maps which picture continuous marsh land from the island of New Orleans extending across the territory now occupied by numerous islands.

We now proceed to consider these maps in their character as hearsay, the character in which, as evidence, they were condemned by this court in Missouri vs. Kentucky, 78 U. S. 395, 20 L. ed. 116, 121. And they will be examined at this time not as proof of the boundary line between these States as shown by the coloring of islands as belonging to the one State or the other, but to discover their value as proof of change. If mapmakers, from 1800 to 1845, represented this territory as part of a peninsula extending northeastwardly between Lake Borgne and the Gulf, what weight is to be given to their representations in passing upon the question as to whether, in 1812, this disputed area was composed of marsh islands and water?

In the first place, it will be remembered that no survey was ever made of this disputed area or of any of the territory west of it and north of Bayou Terre Boeuf prior to 1843. Darby

writes on his map of 1816 that this territory is little known, and Darby lived in Louisiana, it appears. His unknown land covered the entire area north and east of the said bayou. See Louisiana map No. 20. It follows that the maps of this section as evidence, hardly rise to the dignity of hearsay. They do not tell the story of witnesses who, themselves, knew the truth, but they represent the guesses made by their respective authors, or the guesses of others adopted by their respective authors.

Bellin's map, 1764, (No. 8), shows solid land or a large island immediately southwest from Cat Island, cut off by a large water course from Lake Borgne to the Gulf. He does not pretend to have had first hand information.

Tirion's map, 1766, (No. 9), like Bellin's is a creature of the imagination, and is so grotesquely inaccurate as to furnish no basis for any conclusion. One cannot tell whether the peninsula is the one we now know as forming the east shore of Lake Borne or was intended to cover the space now occupied by these islands.

Jeffry's map, 1775, (No. 10), is not hearsay. It only represents his idea of the shape of the territory. The same is true of that prepared by Lieutenant Ross, map No. 11. No. 12 is a copy of No. 9, made in 1766.

The earliest map offered in evidence which comes near to presenting, in general outline, the contention of opposing counsel, is that made by Maj. Pussin, 1830, (map No. 13). William Beer says (R. p. 218), that Pussin came to America to report to the French government upon internal improvements. It does not appear that he was ever in this locality. He represents continuous solid land as covering part of the marsh island area, but the incorrectness of his representation is shown by the township plats of Powell and Richardson based on surveys made 13 years later. And it will be observed that the records show but one storm (1837) which appears to have reached this territory between 1830 and 1843. R. p. 1038.

The superficiality of maps and the unreliability of map-makers are forcibly demonstrated by a comparison of map No. 15, made in 1854, published in Lange's Atlas of North America. with the topographical maps made by the Land Office in 1846, The said map No. 15 shows this peninsula as continuous

solid land nine years after actual surveys had been made and published showing it broken up into islands.

Lafon's map of 1806, (No. 19), presents this territory as forming a solid peninsula, but the glaring imperfections of it show that he knew nothing of the details. He has a bayou, Guillemard, running northeast through his peninsula from Lake Borgne. Darby's map, however, of ten years later shows no trace of this bayou; nor does that of Melish of 1816-1818, map No. 57.

It will be noted that these men knew of Lake Borgne and had to give it an eastern shore, and this shore had to be a peninsula. As they broaden that lake at its northern end they swing the said peninsula to the east out of the way. It is really the peninsula we now know as extending northward between Lake Borgne and Nine Mile bayou. This criticism may be made especially of the maps just mentioned and of Melish's map of 1820 (No. 22), Mitchell's map of 1834 (No. 24), Graham and Tanner's, 1834, (No. 25), H. S. Tanner's, 1837, (No. 26), and La Tourrette's of 1839 (No. 27). All these maps are in hopeless conflict with the facts as disclosed by Powell and Richardson in 1843, '44, and '45. It is impossible to believe that the long peninsula shown on these maps was suddenly broken up into islands immediately before the survey in the 40's. And if we find that the map-makers of the years immediately prior to the said survey were altogether wrong, why should we be compelled to accept what the earlier ones say? Is it more likely that Lafon, Darby and Melish were right in 1806 and 1816 than that Melish, Tanner, La Tourrette and Mitchell were right from 1820 to 1843?

The truth is, land was plentiful in those days. Grants were made extending from ocean to ocean. It was only the best that was carefully explored. There was more of the best than could be claimed or settled. This waste country received no special attention. Andrew Ellicott is the only map-maker who, we are certain, was ever in the territory itself. He showed the continuous land of the Island of New Orleans as ending about Nine Mile bayou, or nearly due south from Pearl river, as Bowen had in 1764, and as Cary's Atlas presented it in 1814.

This peninsula forming the east shore of Lake Borgne is a marsh now just as it was a century ago. There is not a planta-

tion on it. The plantations extend but about fifteen miles from the river. R. p. 679. Nearly all the old maps show a prominent bayou running through it and connecting with Lake Borgne and Black bay. It is called by some of them Bayou Chersonese and by others Bayou Guillemard; and those that call it Bayou Chersonese name the connection with Lake Borgne Guillemard. No definite trace of this bayou remains on modern maps. If the peninsula through which these old maps extend this bayou were only pulled westward nearer to the mouth of the Pearl it would fairly represent the continuous land as it now appears.

But the fact remains that as far back as our definite information extends this area consists of islands and water. If these maps were approximately correct when published then the change was revolutionary in its nature. On the other hand, if we assume that there has been no revolution, no unusual disturbance, and that geological changes have been permitted to pursue their usual plodding way, then these maps made prior to 1843 were wrong when published; because if the progress of the waters in reclaiming what was lost ages ago was no more rapid prior to 1843 than it has been since that date then it has been centuries since there was continuous land from the Mississippi to a point three miles southwest from Cat Island. If the slow advancement of the water upon the land scarcely has made itself perceptible since 1843, may we not measure back another 60 years and conclude that the difference between a modern map and a correct one of 1783 would be barely observable? The court is asked to believe that this was continuous land prior to 1843, because map-makers who personally knew nothing of the country took it upon themselves to picture it that way. This, too, in the face of the positive proof as to the rapidity with which changes are in progress in this same territory.

And our conclusion that since no such changes as need to be noted on maps have occurred within the last 60 years, therefore no great change in the relative extent and locations of land and water occurred during the 60 years immediately prior to 1843, is further strengthened by the consideration that the encroachment of the water upon the land was necessarily much more rapid after it was well begun than before. After a channel has once been made across the land it rapidly widens and deepens The difficulty is in making the beginning. It is illustrated by

the rapid widening of Creole gap after the passage was cut through. Now, the surveys begun in 1843 show the water-ways then well established throughout this area. The islands and waters have retained their relative shapes and sizes, for the purposes of map-making since that date. It is the veriest speculation to name any period of time within which there were no islands nor bayous in this territory.

IV.

If our conclusions should be accepted by the court there will then remain no difficulties. The islands within six leagues of every part of the shore line of Mississippi will be given her, those "immediately south and in front of her mainland;" and Louisiana will receive those immediately south and in front of her mainland. The two Acts will stand side by side; the intention of the lawmakers will be executed. Such construction of the statutes will allow the presumption that the authors of the 1817 Act took into consideration the 1812 Act, and will avoid the absurd conclusion that the Congress gave to Mississippi territory which had been formerly given to Louisiana, and the unjust conclusion that it was intended to give to Louisiana an unequal and unjust share of the advantages of a seashore. Both conclusions will be avoided if possible. "Nothing is better settled than that statutes should receive a sensible construction, such as will effectuate the legislative intention, and, if possible, so as to avoid an unjust or an absurd conclusion." Lau Ow Bew vs. United States, 144 U. S., 47, 36 L. ed., 340.

It will be observed, too, that the question of jurisdiction over this disputed area is of much greater consequence to Mississippi than to Louisiana. It is from 20 to 40 miles from the settled portion of Louisiana, and inconvenient to reach from that State. It is immediately in front of Mississippi's front door. The whole coast of the latter State is habitable, and has had settlements on it since 1701. Almost the entire coast is divided up into residence lots like city property, and, in fact, it will be a city from the one extremity to the other within a very few years. R. p. 1744. The territory is almost in sight of the Mississippi shore and can be reached by sailing directly across the sound. If the deep water channel should be declared by the court the dividing line, this thickly settled, richest portion

of Mississippi would, for a great part of its length, lose all the advantages of a sea front. This loss would be added to Louisiana's extensive coast line and Mississippi would be cut down to perhaps 50 miles.

In fact, as far as Louisiana is concerned, the question involved is one of property and not of jurisdiction. Her interests would be promoted by the establishment of the line for which she is contending only to the extent of the value of the territory as property. Her inhabitants are far away from it. It is not necessary that she have jurisdiction over it for the protection of their health and peace and enterprises. The record shows that Mississippi has exercised civil jurisdiction over it all these years, embraced it in her counties in 1857, and that it was never noticed by Louisiana except to ask for it as property at the hands of the Land Office of the United States, and, when its *property value* was enhanced by the development of the oyster industry to undertake to have her claim confirmed by this court. The proceedings leading up to the institution of this suit indicate that it is the *property in*, and not the *jurisdiction over* this territory which is really the aim of this litigation.

On the other hand, the convenience and welfare of a great and prosperous part of Mississippi are placed in jeopardy. It is an attack upon the sovereignty of this State. It seeks to take away her jurisdiction over the waters close up to her mainland and take it out of her power to protect the health and quiet of her people without great and unusual expense. The property question is of relatively small importance to Mississippi. It is the question of sovereignty with which we are mainly concerned.

As shown by the township plats of 1846, Nine Mile bayou was, 60 years ago, a very deep channel and at least a quarter of a mile wide. This was large enough to be used as a boundary between great states. It flowed south into a large bay, and from there to the 6-league limit the waters were broad. R. p. 1047f. This is the line for which we contend. It coincides with the historical and traditional line running south out of Pearl river; it is the eastern limit of the old Island of New Orleans. And we respectfully submit that its adoption by this court will completely reconcile the two enactments, will declare the truth of history, and ac-

complish the success of the large plan intended to be executed by the Congress of 1812. History, tradition, convenience and right ask for this consummation.

Respectfully submitted,

Joe Williams
Attorney General of Mississippi

J. H. Howard
Assistant Attorney General of Mississippi

THE STATE OF LOUISIANA, *Complainant,*

v.

THE STATE OF MISSISSIPPI, *Defendant.*

SUPPLEMENTAL BRIEF FOR THE DEFENDANT.

I.

THE DEEP WATER CHANNEL THEORY.

Counsel for Louisiana earnestly and correctly insist that Lake Borgne is the open sea, and was so regarded by Congress in the Act of 1812, admitting that State. Their words are: "As a matter of fact the waters of Mississippi sound were considered as the sea or as forming part of the sea and gulf of Mexico at that time. We have already shown that Mississippi sound and Lake Borgne are salt water bodies of water *and true parts of the sea or gulf.*" First brief, p. 150. See also p. 69, where that contention is supported by unanswerable authorities. Our opponents miss the mark because they refuse to understand

the meaning of the term "an arm of the sea," as contra-distinguished from the open sea itself. Lake Pontchartrain is an "arm of the sea," because it is within the jaws of the land. That part of the open sea or Gulf of Mexico, known as Lake Borgne is not an "arm of the sea," because it is outside of the jaws of the land. The one and only ground upon which our opponents claim that the doctrine of the thalweg can be applied to the waters in question is that, while it is not applicable to the open sea, it is applicable to an "arm of the sea." When cast in the form of a syllogism their argument is this: Apart from rivers, the doctrine of the thalweg is applicable only to an "arm of the sea"; the waters to which Louisiana wishes to apply it are not an "arm of the sea," but the open sea, "true parts of the sea or gulf"; therefore the Court should apply the doctrine to the open sea. Such a pitiful *non sequitur* is not to be wondered at in view of the fact that no case has ever occurred in the international law of the world wherein the doctrine of the thalweg, *which dies at the point where a river or its estuaries join the open sea*, has ever been extended beyond that point. This fanciful and impossible theory of a channel without banks or current in the open sea as a boundary between maritime states was the invention of W. C. Hodgkins, a civil engineer, who first stated it in his report of January 30, 1901 (see Record, pp. 999–1003), *as a surveyor's expedient* for solving a practical difficulty, regardless of the fact that such expedient is entirely beyond the pale of legality. Manifestly this invention of Hodgkins was put forth here simply as a *ballon d'essai*, as it embodied the only theory upon which

the Complainant could undertake to claim the *entire territory* in dispute. That claim constitutes the first and leading aspect upon which her bill is based. Anticipating its collapse, she stated her case in the alternative as to *a part* of the territory, thus claiming that, in any event, Louisiana must recover those islands which are within nine miles of her eastern coast. The alternative prayer is: "but if your honors should feel that any part of this disputed area was islands by reason of the presence of shallow water, *then as islands they are within the nine mile limit of distance from the* SHORE LINE *of the State of* Louisiana [an admission that she has a shore line], and therefore belong to and form part of the State of Louisiana by that second provision of the act of Congress, giving Louisiana all islands *within three leagues of its* SHORE LINE." Since the collapse of the deep water channel theory only the alternative case as to *a part* of the territory remains for consideration; and that cannot prevail, if this Court applies to the conflicting statutes the *in pari materia* rule as heretofore defined and applied here.

II

The Doctrine of in pari materia.

That doctrine is just as applicable in a case of *conflict and repugnancy* as it is in a case of *doubt and uncertainty*. These two substantive grounds for its application are of equal dignity. When it is applied because of conflict and repugnancy, *it is not of the slightest legal importance*, that one or both of the conflicting statutes should be plain and unambiguous upon its face for the simple and conclusive

reason that it is the repugnancy and not the obscurity that then justifies the application of the rule. Such is the settled law as stated in the Am. and Eng. Enc. of Law, Vol. 26, p. 623, 2d ed. "It has been said that the doctrine that statutes *in pari materia* are to be taken together and construed as one act is resorted to only in cases of doubt and that it is never applicable *where a statute is plain and unambiguous;* but clearly this statement is too sweeping, for a resort to other statutes may be necessary to determine the legislative intent *in case of repugnancy between the statutes*, or may be used to strengthen conclusions on the language of the statute." A striking illustration occurs in the case of *McFarland* v. *State Bank*, 4 Ark., 416, wherein the court was called upon to construe a general statute, fixing a rate of interest which conflicted, in the absence of construction, with a special statute fixing a rate of interest in certain cases, *each statute being entirely unambiguous upon its face.* The court applied the *in pari materia* rule and removed the conflict, by holding that one act should have a general application outside of the special domain to which the other was applied, the course which we contend should be followed here. In *Robinson* v. *Tuttle*, 37 N. H., 248, it was held that "It is also proper to consider the whole of a statute, the provisions of the old law, *other laws relating to the same subject-matter*, and the probable purpose of the legislature, in order to ascertain the meaning of any particular section, *even when the words are unambiguous.*" It is not of the slightest legal importance that the statute of 1812 is plain and unambiguous upon its face, if it is "repugnant" to that of 1817,

when parts of both must of necessity be applied to the same subject-matter. Complainant avers in her bill that the repugnancy exists when she says that the elimination of her deep water channel theory (Record, p. 15), "would cause the limits of the two States to conflict and overlap." That admission is amplified in her brief (p. 65), by the following explanation as to the drafting of the act of 1817: "the oversight consists not 'in framing the respective acts' for the admission of the two States, but in the drafting of the Mississippi act, more than five years after the Louisiana act, *and embracing in the Mississippi act, islands which had already been granted to Louisiana.*" It is thus twice confessed that Congress in the act of 1817, *attempted to convey the islands in question to Mississippi.* The defense is that the will of Congress as thus expressed cannot be executed for the reason that, by the prior act of 1812, the identical islands embraced in the second act were conveyed to Louisiana. The acts thus conflict and interpenetrate when applied *to identically the same subject-matter.* "Statutes are *in pari materia* which relate to the same person or thing or to the same class of persons or things, *and the phrase is applicable to public statutes or general laws made at different times and in reference to the same subject.*" Enc. of Law, Vol. 26, p. 621, 2d ed. How is it possible to deny that the conflicting statutes are *in pari materia*,—"laws made at different times and in reference to the same subject"; how is it possible to deny that they are repugnant to each other, *when Complainant twice avers that fact?* In our humble judgment no more urgent or ideal case for the application of the rule has ever been presented here. The

rule is simply a means to an end. It is the means by which the court is enabled to extract the *entire intention* of Congress, and not a *part of it*, from a series of acts upon the same subject. Not until the last word of the last act in the series has been examined can a court be in a position to make an intelligent exposition of the legislative will in its entirety. When thus armed with the larger knowledge the court should strive to work out two results.

In the first place, as stated in *Knowlton* v. *Moore*, 178 U. S., p. 77, "where a particular construction of a statute will occasion inconvenience *or produce inequality and injustice*, that view is to be avoided if another and more reasonable interpretation is present in the statute." What is the actual situation presented here. Alabama is in possession of all the islands on her southern and only sea-front. Louisiana is possessed of two distinct sea-fronts. First of her southern sea-front, extending east and west about 360 miles from the mouth of the Sabine river to that of the Mississippi; second of her eastern sea-front, extending about 263 miles north and south from the mouth of the river last named to that of the Pearl river. Under those conditions the proposition is to take away from Mississippi a group of islands extending half-way across her narrow *southern* sea-front, in order that they may be annexed to the *eastern coast* of Louisiana. Can it be for a moment denied that such a result would be a gross injustice, so far as Mississippi is concerned, when the fact is remembered *that she would then stand forth as the only State on the Gulf of Mexico with her southern sea-front obstructed by islands belonging to a sister State?* It is admitted that Congress

did what it could in the a[illegible] of 1817, to prevent such an injustice. Should not this Court assert its full judicial power to sustain Congress in that effort? Louisiana admits in her original brief (p. 162), that "It is not to be presumed that the Congress of the United States intended to make a conflict of boundaries when there is a possible construction of the acts of Congress which would reconcile the apparent inconsistencies." Thus it is admitted that the entire solution properly depends upon the right of this Court to *construe* the conflicting statutes. What is its paramount duty in such a case? In *Handly* v. *Anthony*, 5 Wheat., 374, this Court speaking through Marshall, C. J., said: "In great questions which concern the boundaries of states, where great natural boundaries are established *in general terms*, with a view to public convenience, and the avoidance of controversy, we think *the great object*, where it can be distinctly perceived, ought not to be defeated by those technical perplexities which may sometimes influence contracts between individuals." Can any fair mind doubt that "the great object" of Congress in defining the sea-fronts of the States bordering on the Gulf of Mexico was to give to each the islands directly in front of it on the south? *Will it be even suggested that Congress ever intended to obstruct one-half of the narrow southern sea-front of Mississippi, by giving a string of islands there situated 36 miles long to a sister State possessed of a sea-board more than eight times as long?* Upon the contrary Complainant admits that by the act of 1817, Congress did all it could to give the islands in front of the sea-coast of Mississippi to that State. Will this court by its decree scar the map

of the Union for all time by defeating the just will of Congress as thus expressed? If *Handly* v. *Anthony* is to be regarded, "the great object" should not be defeated by "technical perplexities." The Court should not be asked by Complainant to quibble over the contention that the terms of the second act are as general as those of the first. No matter whether they are or not under the rule of *in pari materia*, the Court has a perfect right (as heretofore pointed out in our original brief, pp. 66–70), to hold before its eyes "the great object," and then accomplish it by limiting the general terms of the first act by the particular terms of the second, *if Congress so intended when the two acts are taken as a whole.* The "technical perplexities" in such a case should not be permitted to defeat "the great object."

In the second place, the court cannot ignore the rule which provides that "Statutes are to be interpreted so as to give effect to all the words therein, if such interpretation be reasonable; and be neither repugnant to the provisions, nor inconsistent with the object of the statute. *U. S.* v. *Bassett*, 2 Story R., 389. * * * It is not to be presumed, *that the legislature intended that any part of a statute should be without its proper meaning, force,* or effect." Potter's Dwarris on Statutes, p. 188, note 8. In *Pollard* v. *Kibbe*, 14 Pet., 366, where the issue was identical,—one party striving to defeat a grant made by Congress on the ground that that body had conveyed the same land by a prior grant,—it was held that "*It is not to be presumed that Congress would grant or even simply release the right of the United States to land confessedly before granted. This*

would only be holding out inducements to litigation." The Court must presume that the United States possessed the title at the date of the last grant, and the burden is upon the party who sets up the contrary. If this Court declines to give effect to that part of the act of 1817, which grants to Mississippi "all islands within six leagues of the shore to the most southern junction of Pearl river with Lake Borgne," she will be deprived of Isle à Pitre, Petit Pass Island, Racoon Island, Crooked Island, Mud-cross Island, Pirate Point Island, Nigger Island, Dead Man's Island, Shell Island, Brush Island, Mink Island, Wild Goose Island, Elephant Point Island, Sundown Island, Door Point Island, Martin Island, and Mitchell Islands; in a word, of all islands within eighteen miles of her coast except a very few within a comparatively short distance thereof, such as Cat Island, Ship Island, and Horn Island. Excepting these three or four, a decree in favor of Louisiana will sweep the board and vest in her a chain of islands extending for 36 miles across the face of the narrow sea-front of Mississippi. *So far as we can ascertain the sea-front of no State in the entire Union is obstructed by islands belonging to a sister State.* Why should Mississippi alone wear such a badge of servitude to a neighbor who possesses a sea-front more than eight times as long as her own? Is this court prepared to decree that Congress intended to make such a grossly unjust award in favor of one State as against another, while dividing the common heritage? What the clearly expressed will of Congress was in the act of 1817, even Complainant admits. Against its enforcement she only contends that the *general terms* of the act of 1812 should be *so construed here* as to

include the islands embraced in the second grant. If, in the light of the legislative declaration of intention in the second act, the court ascertains that Congress *did not intend to commit this gross injustice when the first act was passed*, the entire difficulty vanishes,—the grant claimed by Louisiana under the first act was never made.

III.

Those Who Claim Under Grants from Louisiana not in the Category of Bona Fide Purchasers.

The only plea which, as a matter of equity and good conscience, could be set up against the application of the foregoing rules of construction is that those who hold under grants from Louisiana are entitled to the protection due to *bona fide* purchasers. "*Purchasers under quit claim deed.* As a general rule the grantee in a quit claim deed is not accorded the favored position of a *bona fide* purchaser, for the reason that the deed purports to convey only whatever title the grantor may have, *and thus the terms of the deed itself afford constructive notice of any defects or equities by which the title may be impaired.*' * * * '*Grantee in quit claim deed not protected.* The rule and its qualifications will be fully discussed in another part of this title." *Am. and Eng. Enc. of Law*, Vol. 23, p. 477, and note 4. It is well settled that grants made by the legislature of a State are not warranties; and if the thing granted was not in the grantor at the time of the grant, no estate passes to the grantee. *Rice* v. *Minn. & N. W. R. R. Co.*, 1 Black, 358; *Polk* v. *Wendal*, 9 Cranch, 87. With a full knowledge of the infirmities of her title, *and of the approaching*

litigation in this matter, Louisiana was careful that her agent, the Lake Borgne Basin Levee District, should not involve her in liability through sales, at nominal prices, of this land. That board therefore inscribed the following upon the face of its quit claim deeds: "It is distinctly understood by the parties hereto that the Board of Commissioners for the Lake Borgne Basin Levee District, through their said president, transfer, assign, and set over, only those rights and interests which the said Board now have in and to the aforesaid lands, giving thereby simply a quit claim, and making and giving no warranty whatsoever; *and further, that should the said title be subsequently declared void, the said Board shall not reimburse to the purchaser any sum whatever.*" Record, p. 1088. Of course, the illegal attempt to cut out that solemn and significant declaration against the title of Complainant from the body of her quit claim deeds by the parol explanation of one of the counsel in the case will be ignored. If such a result could be accomplished by verbal explanations given under such circumstances written instruments would be worthless indeed. The testimony shows that not a single grantee—all for nominal sums—under these quit claim deeds has ever made an improvement on the land. Not a house, nor a barn, nor a fence has ever been constructed. No settlements have been made on the land for the reason that fishing privileges alone were the objects of the purchase. Thus neither injustice nor hardship would come to any private individual through a recognition of the title of Mississippi.

IV.

No Basis Whatever for the Contention That the Islands in Question Were Ever a Part of the Mainland of Louisiana.

We do not understand Complainant's counsel to contend that the islands in question do not constitute a well defined archipelago distinct from the mainland, *at the present time*. All the rest of the world so considers and describes them. The only accurate maps ever made of the region are those of the Coast Survey, upon every one of which the archipelago is as clearly defined as any other in the world. The people who live in the vicinity have always considered them as such, giving to each its own name as an island. Isle à Pitre and Racoon Island are as well known as islands in that part of the world, as Cat Island or Ship Island. Complainant's witnesses have described them as bodies of firm land standing "about a foot and a half to two feet" (Monier) "above the water," along whose shores a buggy can be driven, or a traveler pass dryshod "at any time during the year." It is not questioned that the waters surrounding them are navigable for steamboats. From the Report of the Fish Commission, upon the cruise of the "Fish Hawk," it appears that "the depth of water is generally from 3 to 6 feet, although in some of the bays, particularly those to the eastward, there are channels through which a considerably greater depth can be carried." Record, p. 2037. It never occurred to the scientific men who made that report to doubt that the islands are such. They say in their description of

the physiography of the region: "The land constitutes *a low-lying archipelago of irregular islands*, separated from one another by shallow bays, muddy lagoons, and tortuous bayous, *the area of water being somewhat greater than that of the land*,"—a statement sharply at variance with the idea that the region is occupied by a peninsula. Admitting as they must that the archipelago now exists entirely distinct from the mainland, counsel for Complainant have taken up the burden that admission puts upon them to prove *that the archipelago did not exist as such in* 1812. A crushing blow was given to that contention when they offered in evidence the map of Saint Bernard (No. 52), made by H. C. Smith. In 1843–'44–'45 the first government survey of this region was made by Powell and Richardson, and the results recorded in the township plats which appear in the record, pp. 1047*a* to 1047*m*, inclusive. An examination of those plats will show conclusively to the Court that at those dates, but little more than 30 years after the admission of Louisiana, the islands composing the archipelago existed just as at the present time, with the contour or shore line of the mainland defined as at the present time. H. C. Smith, the maker of the Saint Bernard map (No. 52), admits in his testimony that he accepted the surveys made by Powell and Richardson as the correct data, despite the fact that more than fifty years had elapsed since it was gathered. To quote his own words: "Q. The township plats, or maps, you refer to, are taken from this map No. 52? A. No, sir. Q. Are they not parts of this map? A. Yes, sir; but this map No. 52 was taken from the township plats. Q. Those plats show, purport to show,

exactly what this map No. 52 shows? A. Yes, sir." Record, p. 736. In connection with this testimony we beg the court to read the testimony of J. B. Baylor, quoted in our original brief (pp. 40–42), from which it appears that the surveys made by the Coast Survey "by trigonometrical methods" demonstrate that no material changes have taken place on that coast in fifty years. Mr. Baylor's summing up was in these words: "As a general proposition, my work showed conclusively to my mind, that there has been no marked change in regard to the washing away of that coast in 50 years. We have accurate work on trigonometrical methods running back to about 1848." It having thus been demonstrated beyond all question by Complainant's own witnesses, speaking from the most reliable scientific data available, that there has been no material change in the geography of the region in question since 1843—a period of 62 years to the present time,—it remains for them to prove if they can, *upon a theoretical basis*, that the marvellous transformation they dream of took place during the 31 years that intervened between 1812 and 1843. The causes to which such a transformation is attributed are threefold—subsidence, storms and musk-rats! The two scientific experts upon whom Complainant relied for the demonstration are Major B. M. Harrod, of the Panama Canal Commission, an eminent civil engineer, and Dr. Stubbs, eminent as a geologist specially familiar with the Gulf Coast region. Both concur in the conclusion that the islands were formed as such in the waters of a shallow sea. As Major Harrod expressed it they were "formed by the river deposits being placed out in a shallow

sea, that had tidal movements and *instead of forming a solid peninsula* it left these open areas through it for the tidal movement in and out of Lake Borgne and Lake Pontchartrain, and that those lakes or spaces of water have been enlarged since their formation, by subsidence. That is my opinion about the formation of that peninsula; that water areas were left *when it was originally formed* and have since been enlarged by subsidence. Q. How long do you think this process has been going on; how many years? A. *For centuries* I have no doubt." When the effort was made to pin him down to modern times he said: "*I could not give any answer about the time, since* 1817 *or* 1819." Record, p. 135. The essence of Major Harrod's scientific opinion when stripped of awkward verbiage, is that as the river deposits were placed in a shallow sea with tidal movements, such movements prevented the formation of a "solid peninsula," and insured instead the formation *from the beginning* of the islands with water areas between them. It is not pretended that Major Harrod said one thing while he was trying to say another. That compliment was reserved for Dr. Stubbs who gave the *coup de grace* to that part of Complainant's case when he said: "These [islands] on the coast of Louisiana have not been *cut off*, they have been formed by the waves and winds of the Gulf." Record, pp. 344–345. Just a moment before, his cross-examination had begun with this question: "You are familiar, are you not, with the geography of this archipelago of islands lying off the east coast of Saint Bernard parish and the southeast coast of Mississippi? A. Yes, sir." On page 3 of their last brief counsel for

Louisiana have made this ill-tempered and entirely unfounded statement: "Associate counsel for the State of Mississippi, in their brief, have extracted from the testimony of Dr. William C. Stubbs, State Geologist of the State of Louisiana, on the subject of the geological origin of the peninsula of Saint Bernard and the Louisiana marshes, and have attempted by *garbling* that testimony, to now make it appear that Dr. Stubbs said that the territory composing the disputed area in the parish of Saint Bernard was made up of islands, which had been built up by the winds and waves of the sea, instead of by alluvium deposited by the Mississippi river, through Bayous Terre aux Bœufs and La Loutre, and that the insular formation of certain portions of the Louisiana marshes (or islands, so-called by Mississippi), has never formed part of the peninsula of Saint Bernard, but were distinct creations formed by the winds and waves of the sea, and not by alluvium." The very contrary is the fact, as counsel for Mississippi claim, and have always claimed that Dr. Stubbs intended to say that the islands in question were formed "by the waves and winds of the Gulf," *out of the* alluvium deposited by the Mississippi river, thus agreeing in substance with Major Harrod who says they were "formed by the river deposits being placed out in a shallow sea, that had tidal movements." There is no difference between us as to the *material* out of which the islands were formed; the difference is as to the *process* of formation, Complainant claiming that the alluvium was first consolidated as a part of the mainland, and then broken up or "cut off" by subsidence and storm-action, Defendant claiming that the alluvium as it was

deposited in the shallow sea was formed by the winds and waves into islands *from the beginning*, according to the view of Major Harrod. The mortal blow given by Dr. Stubbs to this part of Complainant's case was by his declaration that the islands were formed *according to the theory of Defendant*, and that they were not "cut off" from the mainland as claimed by Complainant. Under such trying circumstances our opponents are striving to save themselves by showing that Dr. Stubbs was not responding to the question with which his cross-examination had just opened ["Q. You are familiar, are you not, with the geography of this archipelago of islands lying off the east coast of Saint Bernard Parish and the south coast of Mississippi? A. Yes, sir"], but that he was really speaking of some other islands not involved in the case, on the south coast of Louisiana, as to which he had been fully questioned some time before. It is strange, indeed, if such a mistake was made as to this, the most vital question of fact in the case, by Complainant's most important witness, with her learned and acute counsel present, that no attempt was made to correct it at the time when the witness was accessible. The charge that Defendant's counsel are "*garbling* that testimony," because they read it as it appears in the record, must be pardoned as an outcry of pain suffered by our friends on the other side, when their main prop, Dr. Stubbs, extinguished their pet theory by inflicting upon it "the unkindest cut of all." But it is unnecessary for us to depend upon the testimony or admission of any one witness in a mass of evidence which demonstrates beyond any possibility of doubt that the

archipelago in question existed in 1812, just as it exists to-day. Dr. Stubbs positively declined to admit that any of the changes to which he had alluded had taken place in historic times. Speaking of the sample of mud taken from Isle à Pitre he said: "We won't state any length of time. But the geological time in which that was deposited is to-day, it is the present age. Q. But that present age, as I understand, may embrace a period of five million years? A. We don't know. Q. It may be five million years? A. Yes, sir. Q. That was in the process of formation? A. Yes, sir. * * * Q. You know of no reason to suppose there has been any general change of appearance in the physical aspect of the region I have indicated from 1812 down to this date? A. *That is right.*" Record, pp. 346, 349. The assumption that a radical transformation took place in the geography of this region between 1812 and 1843, *through the slow and imperceptible processes of nature* is a pure chimera, as untenable from a geological point of view as the so-called deep water channel theory is from the standpoint of international law.

V.

An Imaginary Coast Line.

On a par with the foregoing is the assumption that in 1812, the chain of islands that extends from Nine Mile Bayou to Isle à Pitre constituted a part of the mainland of Louisiana, with a well defined coast line. The witness upon whom Complainant mainly relied to uphold that theory is J. B. Baylor, the Coast Survey expert who, upon cross-examination, admitted the present existence of every

island in the chain. His examination on that subject thus began: "Q. What is the usual definition given by geographers to an island? What is an island from the standpoint of physical geography? A. An island is a body of land surrounded by water. Q. Well, now, let us begin from Nine Mile Bayou and take the piece of land that is bounded on the west by Nine Mile Bayou and on the east by Three Mile Bayou and on the north by Mississippi Sound and on the south by Nine Mile Bay. Under the ordinary definition of physical geography, isn't that an island, a piece of land surrounded by water? A. Yes, sir; that is an island." And so he described one after the other in the entire chain, concluding as to all, with this statement: "*They are certainly bodies of land around which vessels of moderate draft can sail.*" Record, pp. 421, 422. In his testimony heretofore quoted he says that, after an examination of the whole coast "by trigonometrical methods," and upon the data of the Coast Survey, extending back to 1848, he can aver "that there has been no marked change in regard to the washing away of that coast in 50 years." It is, therefore, positively settled that the islands existed as far back as 1848, just as they exist to-day. The burden then is upon Complainant to prove the marvellous transformation claimed during the 36 years intervening between 1812 and 1848. There is not a particle of evidence in the record even tending to prove such a grotesque assumption. Complainant has nothing whatever to rely upon in this regard, except the theory that silent and imperceptible changes have been going on in this region during, as Dr. Stubbs says, the last

five million years. *There is absolutely no proof in the record that any material changes have taken place in historic times, much less since* 1812. If Harrod and Stubbs are to be believed the islands in question existed as such from the beginning, and were never a part of the mainland. These particular islands are directly in the track of "the tidal movement in and out of Lake Borgne and Lake Pontchartrain," which Harrod says prevented the formation of a peninsula. An unbroken coast line at the point claimed would have obstructed that tidal movement.

VI.

Claim of Title Under the Swamp Land Act of 1849.

No part of Complainant's case is so easily disposed of as the claim resting on certain proceedings taken before the Secretary of the Interior in 1852, under the act of 1849, entitled, "An act to aid the State of Louisiana in draining the swamp lands *therein*." The act declares upon its face that it relates only to certain lands within the boundaries of that State. As one of the Justices remarked during the argument, swamp lands situated in one State could not possibly be given to another. If Mississippi has any case here at all, it is by virtue of the grant made to her of certain islands by the act of 1817. If that act ever had any operation at all, if it ever vested in Mississippi the whole or any part of the territory in dispute, such whole or part was at once included within her boundaries. It is therefore axiomatic that proceedings taken before a ministerial officer in 1852, under an act which did not attempt to dispose of lands beyond the

boundaries of Louisiana, could not divest Mississippi of title to lands which had been included in her boundaries since 1817. As to such lands the action of the Secretary was of course *coram non judice*. In *Stone* v. *United States*, 2 Wall., 525, involving the validity of acts of the Secretary of the Interior under like circumstances, it was held that where lands claimed *were never within the limits of a reservation* legally made by the President for military purposes, the patents issued therefor were void because the Secretary exceeded his authority. If an appeal be made to the doctrine that decisions of the Secretary of the Interior upon matters of fact are conclusive, the short answer is that that doctrine only applies to matters of fact *within his jurisdiction*. "The decisions of the Land Department upon matters of fact *within its jurisdiction* are in the absence of fraud or imposition, conclusive and binding on the courts of the country." Head note to *Heath* v. *Wallace*, 138 U. S., 573, Co-op. ed., 1064. It will not be pretended that the Secretary had jurisdiction over lands within the boundaries of Mississippi since 1817, under an act passed in 1849, granting certain lands within the boundaries of Louisiana, at that date, to that State. The moment that Mississippi makes good her claim of title to the whole or a part of the disputed territory, under the grant made to her in the act of 1817, all proceedings as to the whole or part embraced within her boundaries, taken by the Secretary of the Interior under an act that limited his jurisdiction to lands within the boundaries of Louisiana, fall to the ground. With a clear knowledge of that fact before it, and with this litigation approaching,

the Lake Borgne Basin Levee District did well to write upon the face of its quit claim deeds, "and further, that should the said title be subsequently declared void, the said Board shall not reimburse to the purchaser any sum whatever."

VII.

The Question of Acquiescence.

It is folly to contend that upon the facts in this record there is any proof even tending to show any acquiescence upon the part of Mississippi in the possession of the disputed territory by Louisiana, or in her exercise of dominion and sovereignty over it, that will give title to the latter, by acquiescence, under the principles of international law. Mississippi emphatically denies that she has ever for one moment acquiesced in any claim asserted by Louisiana either of sovereignty or jurisdiction; that the proof shows that her exercise of sovereignty and jurisdiction over the disputed area—*a "wild and unsettled country"*—has been much more marked and continuous than that of her opponent. There is no excuse for the statement contained in the original brief for Complainant, p. 98, that Mississippi has acquiesced "for nearly one hundred years in Louisiana's ownership of the disputed territory." The record bears abundant testimony to the fact that, from time immemorial up to about the year 1900, the people of either State enjoyed the unmolested privilege of taking fish and oysters in the disputed territory, its only product. The State of Louisiana cannot claim to have exercised exclusive dominion because of the full proof of the long common use. The enabling act passed

by the Congress on the 20th of February, 1811, required as a condition precedent to her admission.

> "That said convention shall provide by ordinance, irrevocable without the consent of the United States, that the people inhabiting the said territory, do agree and declare, that they forever disclaim all right or title to the waste and unappropriated lands lying within the said territory, and that the same shall be and remain at the sole and entire disposition of the United States."

This condition was accepted by Louisiana. Before 1852, a trespass upon these lands or any question involving the title thereto would have been cognizable in the United States courts only. During the forty years that the State claimed these waste lands, to April 2d, 1895, when she attempted to transfer them to the Lake Borgne Basin Levee Board, she made only 30 sales, or upon an average of less than one a year, the principal ones being of Isle à Pitre. From said transfer in 1895 to the bringing of this suit, only *four* sales are shown by said Board, and these to oyster canners at 12½ cents per acre, wholly without warranty of title or promise of the return of the purchase money if the title failed. So, there is nothing shown which would have put Mississippi on notice of necessity to assert her rights or confess them to Louisiana. The sales have been of the *waters*, rather than of *land*, to secure oyster grounds.

The acquiescence contended for by Complainant is not to be established by those rules which determine *public policy*, as the argument of counsel seems to indicate. Statutes, court decisions, and the lawful acts of public

officers fix the public policy of the State or federal government with reference to any particular subject, but the only way to deprive a State of her territory is prescribed by the Constitution—the consent of the legislatures of the States and of the Congress. If the General Land Office, the Geological Department, the Coast and Geodetic Survey, and the Fish Commission of the Federal Government, combined with the Oyster Commission of the litigant States, had solemnly agreed by express words that the disputed territory was in the one State or the other, it would be folly to urge here that by reason thereof the question was thus settled. The acquiescence contemplated must come within the rules indicated in *Rhode Island* v. *Massachusetts; Virginia* v. *Tennessee*. We insist generally, and especially upon the subject of acquiescence, that the approval of these lands by the Secretary of the Interior in 1852, was a mere ministerial act and void because these marsh lands could not be drained or levied and were not within the contemplation of the act of 1849, special to Louisiana, nor the "Arkansas Act," of 1852; and because the lands in dispute had previously (1817), been expressly granted to the State of Mississippi. It is shown that the proceeds of sale were to be applied to the levees of the Mississippi river and not to the levying or draining of these islands on the eastern coast of Louisiana.

When a request was made by the Coast and Geodetic Survey for "records" bearing upon the State boundary, the answer was a legal opinion from Assistant Hodgkin, not a lawyer, but a civil engineer. However much counsel insist, this court will not be misled as to this or as to the

report from the "Fish Hawk" deputation that followed the suggestion of Louisiana gentlemen as to what was the parish of St. Bernard.

The statement in the brief, p. 122, that Mississippi "*though her State Land Commissioner admitted that she had no title to the lands,*" is incorrect. The record discloses no such statement, and if it did, it would be demurrable. Mr. Nall said that these lands were not shown upon his books. It cannot possibly escape the attention of the Court that the only material value of the territory is, as it has always been, in water products and that Mississippi has since 1843, protected her interests by legislation, and latterly she has collected her revenues therefrom by licenses from boats and tong-men, instead of assessments upon the worthless lands.

Judicial jurisdiction on the part of Mississippi is shown by authentic records from 1821, when the Legislature made the award to John Quavre, and the Kennedy inquest of 1886, and the arrest made by officer Lizanna near Sundown Island, while that shown by Louisiana is of the vaguest hearsay. The absolute assertion of right by legislative action on the part of Mississippi is shown in the cross-bill, and by documents exhibited with the testimony.

VIII.

The State of Louisiana Embraces But One Island East of the River.

We here expressly direct the Court's attention to the fact that counsel for Louisiana in their oral argument and in their supplemental brief, have cautiously declined to

meet the proposition that the present State of Louisiana includes nothing east of the Mississippi river except "the city of New Orleans and the island on which it stands." Congress had this information fresh in mind. See abridgment of Debates of Congress, vol. III, p. 9 *et seq.;* if vol. IV, pp. 253-264. The acts of 1812 fixing Louisiana's boundaries and that adding West Florida to the Mississippi Territory were framed while the discussion between the United States on the one side and France and Spain on the other was at its height. The Congress knew the boundaries of the real *Louisiana* of 1803. The authors of the acts of 1812 knew that the conceded boundary line of Louisiana east of the Mississippi was that which was adopted in the 1811 enabling act and in the act of April 6, 1812. They knew this line had always been expressly explained as cutting off one island, the Island of New Orleans. They knew all the remaining islands were left on the east bank and that all such remaining islands were available for territory-making. They added them to the Mississippi territory at the same sitting of Congress. This information which the authors of the laws possessed told them that the three-league limit provision in the Louisiana act could not operate to the eastward,—that under other provisions *in the same act* it could not begin to operate until the Island of New Orleans was passed; that the islands upon which the three-league limit provision was to operate were those off the 400 miles of southern mainland coast line of the new State, and not those along the coast of the Island of New Orleans.

Counsel for Louisiana have, in fact, admitted the correctness of our statement of facts just made herein. We ask the Court to note the following:

On page 53 of their original brief counsel for Louisiana say:

> "The adoption by the Congress of the United States, in the creation of the State of Louisiana, of the line extending down the Mississippi river to the river Iberville and thence through the middle of Lakes Maurepas and Pontchartrain to the sea, as one of the boundaries of that State, was not a new line established for the first time, but was in fact an affirmation and recognition of an ancient line long since established."

It is true they add that this ancient line "in its extension to the open sea must follow the deep-water channel that we have been discussing." But in making this additional statement they overlook the fact which they have conceded on page 150 of their brief that, for the purposes of this historical description used by Congress, Lake Borgne was the "sea" or the "Gulf of Mexico"; and they also ignore the explanation of this historical description made when the said line was first established in 1763. That explanation is found in section VII of the Treaty of Paris of 1763. R., p. 1864. See also instructions given by the French King to M. d'Abbadie. R., p. 1980.

It will be noted that the territory here directed to be turned over to Spain was that which was declared by the Treaty of 1763, to be separated from the English possessions east of the river by the line described as running along the Iberville river, from the Lakes Maurepas and Pontchartrain to the sea. This line cut off this one island east of the Mississippi.

Counsel for Louisiana say that the ancient description was not itself complete and that it needed to be defined from the mouth of the Pontchartrain to the open sea, and that the only way for it to go was and is by the deep-water sailing channel. But, as above shown, this contention ignores the explanation of the description. It cut off the one island, the one on which the city stands. Why not look for the limits of this one island reserved to save the city? Is there no way to bound an island except by following a deep-water channel? Is not Nine Mile Bayou more than a quarter of a mile wide and from 5 to 35 feet deep, large enough to form the boundary of an island which has been reserved to carry a city?

And again, on page 57 of said original brief, counsel for Louisiana say:

> "Congress regarded the lands to the east, that were south of the Mississippi territory and which form the disputed area of to-day, as part of the original island of New Orleans referred to in the original treaties and included in its treaty with France of April 30, 1803, and these were given to the Territory of Orleans, and *her southeastern boundary was the original southeastern boundary of the island of Orleans.*"

And the Court will recall that Attorney-General Guion, in his oral argument, stated in answer to a question from the bench, that the present State of Louisiana embraces only what was contained in the old territory of Orleans.

Then counsel for the two States are agreed upon the following propositions:

1. The description of the line from the Mississippi eastward used in the act of April 6, 1812, must be given its historical meaning.

2. The present State of Louisiana embraces only what was contained in the Territory of Orleans.

3. The Territory of Orleans embraced nothing on the east side of the river except the island of New Orleans, the southeastern boundary of the said Territory of Orleans being the original southeastern boundary of the Island of New Orleans.

Since we are agreed that the historical description was used and that it cut off only one island east of the river and that the southeastern boundary of this *one island* was the boundary of the Orleans Territory and necessarily of the present State of Louisiana, why not make up the issue here and determine the boundaries of this one island? Why go on a hunt for a deep-water channel? What has that to do with the boundaries of this one island? How can counsel for Louisiana contend for the islands within three leagues of the eastern shore of this one island while they are admitting that they get but this one island under their historical description?

In their supplemental brief counsel do say that it has been attempted to show "that the Louisiana purchase did not convey any land or territory east of the Mississippi other than the Island of Orleans." But we have made no such contention. This statement is only an evasion. We have never contended that the Louisiana purchase included nothing east of the river except the Island of New Orleans, but that the real conceded bounda-

ries of the Louisiana purchase in 1803, embraced nothing but this one island. There was other doubtful territory which this Court held, in deference to the construction placed upon the 1803 treaty by other departments of the government, to have been ceded to the United States by that same treaty. And counsel agree with us when they say on page 57 of their original brief that the "Congress intended to include in the Territory of Orleans not only what had constituted the Island of Orleans on the left or east bank of the Mississippi river, and referred to in the original treaties, but also further additional lands *west* of said river"; and again on the same page they say the southeastern boundary of the Territory of Orleans "was the original southeastern boundary of the Island of Orleans."

After thus stating our proposition on page 38 of the supplemental brief, counsel say "there are four distinct reasons why this theory of the Louisiana purchase not including any territory east of the Island of New Orleans cannot prevail." We will examine the four reasons offered by counsel for Louisiana to see whether they show unsoundness in our proposition that *the territory of New Orleans and the present State of Louisiana included and now embraces nothing except part of the territory admitted by France to have been ceded to the United States under the name of Louisiana, that is, nothing east of the river except the Island of New Orleans.*

They say:

> "1st. If it be true, that the Mississippi line extends to the Lake of the Mounds,

> as the six-league limit, that part of Saint Bernard parish lying south of that point, would belong to no State at all." Page 38 of supplemental brief.

It is difficult to see the alleged conclusiveness of this reason. If the statutes were not written so as to embrace all the territory owned by the United States such other territory still belongs to the Federal Government. The Chandeleur Islands furnish an instance. They do not belong to Mississippi nor to Louisiana. Certain map-makers of recent years have attempted by the use of coloring material to give them to Louisiana. But they are not claimed to have ever been part of the mainland of Louisiana or of the Island of New Orleans, nor are they within three leagues of the most eastern coast line claimed by Louisiana. They belong to the United States, as, strictly speaking, do all islands off the coast of the Island of New Orleans not within six leagues of the Mississippi coast. There may be a deep-water channel running north of them, but this does not give them to Louisiana. Congress mentioned no deep-water channel, and it was never heard of, prior to the report made by W. C. Hodgkins. Louisiana is endeavoring to have a line declared which will not only take from Mississippi the islands given her by the Congress, but will also take in the other outlying islands which were embraced within the limits of neither State, but which are still the territory of the United States.

The next reason given on the same page is:

> "2d. If it be true, then Louisiana would have no boundary on the Gulf of Mexico to the northeast as the act of Congress provides,

> but its boundary here would be a land boundary adjoining Mississippi's line at the Lake of the Mounds."

But does this water area in dispute lose its character as part of the Gulf of Mexico because of the presence of the islands? If Lake Borgne is part of the Gulf is not Bay Boudreau a part of it too? The line we ask this Court to declare and establish as the eastern boundary of the Island of New Orleans runs through Nine Mile Bayou a short distance till it reaches the broad waters of Bay Boudreau or False Mouth Bay, and from there to the six-league limit there is a broad, prominent, natural boundary. It is all the Gulf. The tide ebbs and flows through it. Louisiana would still have her water boundary, her Gulf boundary, all the way. There may be islands which the line would cross in running eastward, but this would be for a short distance only. Besides, it is left to this Court to dispose of islands which may be crossed by the line.

Another reason offered is:

> "3d. It would utterly negative Mr. Jefferson's memoranda, on which Congress is presumed to have acted, that Saint Bernard extended 18 leagues, or 54 miles to the eastward from the Mississippi river."

Mr. Jefferson's memoranda referred to is that quoted on page 41 of the original brief for Louisiana in which the settlement of the Poblacion de St. Bernardo is described. Counsel are fully aware that the old St. Bernard settlement of 1804, *did not extend as far eastward as Nine Mile Bayou*, and that the peninsula between Nine Mile Bayou and Lake

Borgne was a part of the parish of Plaquemine before it was made a part of St. Bernard. It also appears that Mr. Jefferson measured the sinuous line of Bayou Terre aux Bœuf, or he was plainly mistaken in the distance, for it will be noted that he says it travels eastward 18 leagues and then, afterwards, falls into Lake Borgne and the sea. Now it is not 18 leagues from the Mississippi to the point where this Bayou divides, nor is it 18 leagues to the point where it falls into Lake Borgne. It is not 18 leagues to the point where one division of it falls into the sea. *We know the very points referred to by Mr. Jefferson, and know he was mistaken in his estimates of the distances.* He said it was 18 leagues from the Mississippi to the point where Bayou Terre aux Bœuf divides itself into two branches. *We know the precise point* where it divides and know it to be not 18 leagues nor one-half that distance. See other quotations from this same document of Mr. Jefferson on page 15 of the brief by the Attorney-General and Assistant Attorney-General of Mississippi.

And the Court is here again referred to the historical diagrams appearing on pages 1032 and 1033, of the record, the same having been offered in evidence by Louisiana, and that on page 1032, having been reproduced on page 36 of original brief for Louisiana. And especially is the attention of the Court asked to Ellicott's map, since his is the one most likely used by the authors of the laws. The feature common to Ellicott's map and these historical diagrams is that they show the eastern boundary of the Island of New Orleans precisely where we find it to-day, in perfect consonance with the Congressional idea as

manifested by the legislation involved herein, and in perfect accord with tradition.

The final reason offered is:

> "4th. That his theory would negative the American claim that the Louisiana purchase extended along the coast as far as Mobile and the Perdido river, which claim is supported in 2d Peters, 253, in an able opinion by Marshall, C. J., which repudiates the present theory of the Attorney-General of Mississippi."

This also is an answer to an argument which we have never dreamed of making. In that same opinion Chief Justice Marshall recognized the historical meaning attached to the description of the line from the Mississippi eastward through Iberville river and Lakes Maurepas and Pontchartrain to the sea. R., p. 1880. This line was the boundary, on the east side of the river, of the province of Louisiana, which France admitted to have sold to the United States in 1803. It marked the boundary of the province whose title in the United States was perfect. We claimed West Florida, but our title was not quieted until 1819. This line cut off only the one island east of the river. Our title was perfect to this island only. No territory was organized into the State of Louisiana by the original act of April 6, except that to which we had a perfect title. In their original brief, on page 57, counsel concur in this statement when they say that the Territory of Orleans embraced the one island east of the river, and that the southeastern boundary of the Territory of Orleans was the southeastern boundary of the Island of New Orleans.

The limits of the Island of New Orleans.

1. We have referred the Court to Mr. Jefferson's statement that it was a narrow strip along the east bank of the river.

2. We have called attention to Ellicott's map, which shows the eastern boundary of this island as being on a north and south line with the eastern branch of Pearl river. And Ellicott's map, we have shown, is the one to which reference was made for information respecting this territory.

3. We have shown by overwhelming proof that tradition tells but one story about the location of the line and that story is that it runs south out of the eastern branch of the Pearl 18 miles.

4. This tradition has been preserved along the Mississippi coast only. There is no Louisiana tradition respecting it.

5. This tradition has been shown mainly by fishermen and boatmen, they being the only people who have ever had occasion to inquire or to learn.

6. The diagrams picturing the historical idea of this island have been offered by Louisiana and indorsed by her counsel. These diagrams are in perfect harmony with tradition, with Mr. Jefferson's statement, with Ellicott's presentation, *and with the facts as they now exist.*

7. History demonstrates the fact that this island was thought to begin about the mouth of Pontchartrain, that being understood to coincide with the mouth of the Pearl. West Florida embraced all the islands within six leagues of the shore westward *to the mouth of Pontchartrain.* This

gave that province every island east of the Mississippi and within six leagues of the shore, excepting the island of New Orleans. West Florida embraced islands close up to the Island of New Orleans. If they were in West Florida they are now in Mississippi.

8. The Island of New Orleans was added to the west bank of the river only because the city stood on it. The city was the principal object aimed at. The island was carried with it only because it was the location of the city. It will be observed that the explanation of the description in the Treaty of 1763, is "the town of New Orleans and the island whereon it stands." The town is mentioned as the principal item of the stipulation; the island is carried because it holds the city.

9. We find to-day that this island extends only to Nine Mile Bayou, and this eastern boundary is almost directly on the line extended from the mouth of Pearl river south. We find here a large natural boundary coinciding with the historical line, with Ellicott's line shown on his map, and with the line of tradition.

10. We find too that this great natural boundary existed in 1843, as it is seen to-day. We compare a map of 1903 with one of 1843, and find no change in the face of the country. We have this positive proof of the rapidity with which changes are in progress in that section. We find that it has been severely tried during this 60 years by storms, but no perceptible change has occurred.

11. Since our large natural boundary Nine Mile Bayou existed in 1843 as it does to-day, as an extension of the Pearl river line south, we may with perfect safety

assume that it so existed in 1812, in 1803, in 1763. If no perceptible change has occurred in 60 years, who can say how long the alleged process at work in this section would require to show results?

12. And, more powerful still, the line for which we contend as the eastern boundary of the Island of New Orleans, the Pearl river line extended, is the one intended by the Congress. The framers of the Act of 1817 treated West Florida and the Mississippi Territory as including everything immediately south of the coast line extending eastward from the most eastern branch of the Pearl. They knew that Louisiana extended across the Mississippi only to take in one island, and that all the rest of the islands were still available. The description found in the Act of 1817 would never have been used if the Island of New Orleans had been regarded as extending around in front of the Mississippi Territory, or if it had been considered that Louisiana embraced the islands eastward and within three leagues of the mainland of her island on the east bank of the Mississippi. To say the authors of the 1817 law regarded the Louisiana act as having the meaning which Complainant is now attempting to give it is to charge them with ignorance and criminal carelessness.

13. The adoption of this line, the extension of the Pearl river line south through Nine Mile Bayou, as the eastern boundary of the Island of New Orleans, removes the conflict by precluding the operation, in the same territory, of the six-league limit provision of the Mississippi act, and of the three-league limit provision of the Louisiana law.

14. The adoption of this side line will give full effect to the six-league limit provision in the Mississippi act, which calls for measurements from a well-defined shore line, thus permitting that which is certain to prevail.

15. Convenience and expediency ask for the same line. See the memorial of the people of West Florida to be added to the Mississippi territory, on page 2003 of the record. This disputed area is foreign to Louisiana. It is from 15 to 35 miles from the settled portion of St. Bernard parish, and perhaps 45 miles from the courthouse of that parish—and it has never been embraced within the limits of that parish by any act of the Legislature. It is in front of and within a few miles of the most thickly settled and prosperous part of Mississippi.

16. Nothing shown by this record can reasonably be urged against the adoption of the Pearl river line extended through Nine Mile Bayou, as the eastern boundary of the Island of New Orleans, except the various maps which have pictured this disputed area as a solid peninsula. Will map-makers be permitted, for the purposes of this litigation, to obliterate the broad bodies of water which these islands surround, and weld the entire territory together and form a solid peninsula? The change has not been in the physical conditions, but in the information concerning these conditions.

17. This Court is now called upon to define for the first time the eastern boundary of the Island of New Orleans The necessity has just arisen. The disputed area is *wild land*. There can be no actual *occupancy of it*. It has been open to the world except during the last four years. The

conflict has occurred within that time. As soon as it was known that Louisiana claimed it a protest arose from Mississippi and a dispute between the citizens of the two States. At the meeting of the citizens of the two States in New Orleans in 1901, at the instance of the two governors, when the Representatives of Louisiana suggested their deep-water channel line, the spontaneous expression of the Representatives of Mississippi was "this is a novel contention." R., p. 25. They had never heard of it before.

18. And we submit that since it is *wild land;* since the occasion has just arisen to mark the boundary; since there has been no pretence of a line marked on the earth, up to which the two States have claimed; since no property rights of any consequence have existed; since the Pearl river line extended will restore perfect order and attribute to the Congress full information as to the history of the section; and since Louisiana has made no sufficient proof of change in the face of the said area, *therefore this Court will pass upon the issues involved and construe the two laws with reference to the physical conditions and the truth of history just as if the original bill herein had been filed in* 1818 *instead of in* 1902, *and apply them without reference to anything which has occurred since* 1817.

IX.

Summary.

During the argument one of the Justices propounded this question: Suppose (1) that Louisiana fails to maintain her contention as to the deep-water channel theory; and

(2) that Mississippi fails to maintain her contention as to the application of the doctrine of *in pari materia*, how will the case then stand before the Court. Assuming that the archipelago existed in 1812, as it does to-day, the deep-water channel theory is the only basis of the first aspect of Complainant's bill, the only basis upon which she can claim *the entire territory* in dispute. As stated heretofore, in anticipation of the collapse of the deep-water channel theory, she drafted her bill in the alternative, the alternative prayer reading as follows: "But if your honors should feel that any part of this disputed area was *islands* by reason of the presence of shallow water, then *as islands* they are within the nine-mile limit of distance *from the shore line of the State of Louisiana*, and therefore belong to and form part of the State of Louisiana by that second provision of the act of Congress giving Louisiana *all islands within three leagues of its shore line.*" With the collapse of the deep-water channel theory, and with the failure of Complainant to prove, *the burden being upon her*, that the archipelago did not exist in 1812 as it does to-day, nothing remains except the second aspect of her bill in which she prays that if the Court finds that the islands do exist she shall be given such of them as "are within the nine-mile limit of distance from the shore line of Louisiana." If we are correct in assuming that only the second aspect of the bill now remains for consideration, this Court could not go beyond its prayer, *even if Mississippi withdrew all defense in order that a decree pro confeesso might be entered against her.* The second aspect of the bill is based upon an admission that all the islands outside of the nine-

mile limit belong to Mississippi. On the other hand, Mississippi claims the entire territory in dispute upon two clearly defined bases: First, by virtue of the doctrine of *in pari materia* which, if applied as we contend it should be, removes all obstacles to the execution of the grant contained in the act of 1817 whereby Congress conveyed to Defendant "all islands within *six leagues of the shore* to the most southern junction of Pearl river with Lake Borgne"; second, by virtue of the contention that, regardless of the doctrine of *in pari materia*, no obstacle stands in the way of the execution of that grant, because it does not take away from Louisiana any territory vested in her by the act of 1812,—that act never having attempted to convey to her anything east of the Mississippi except the Island of New Orleans. The essence of the second contention is that Congress never intended to convey to Louisiana any islands east of the Island of New Orleans, all such islands being embraced within the boundaries of West Florida. As both contentions have been fully presented heretofore, they need not be restated here. Mississippi contends with respectful and confident earnestness that no application of the law can be made to the facts of this case, either upon a practical or scientific basis, which will take from her any of the islands situated within the eighteen-mile limit from her shore, so clearly and distinctly defined in the act of 1817. It should never be for a moment forgotten (1) that Louisiana frankly admits that Congress attempted to convey to Mississippi the islands in question by that act; (2) that the intention of Congress thus admitted should not be defeated by a construction holding that that

body intended in the act of 1812 to vest in Louisiana a long chain of islands extending half way across the sea-front of Mississippi, when the Court knows judicially that such an injustice has never been inflicted by Congress upon any other State in the entire Union. But if the Court in its wisdom shall reject that contention, then we assume it to be certain that it will not decree to Louisiana more of the islands in dispute than are prayed for in the second and only remaining aspect of her bill. To repeat the language of that prayer, the islands "*within the nine-mile limit of distance from the shore line of the State of Louisiana.*" The last phrase removes all excuse for the idea that Louisiana has not a "shore line" like any other State. Congress said she had when it gave her "all islands within three leagues of the *coast.*" "In a statute which requires measurement from *the coast* the coast is the point of contact of the *mainland* with the sea; and when a bay intervenes the point of contact of the bay with the *mainland* is to be considered coast." Farnham on Waters and Water Rights, Vol. II, p. 1463, citing *Hamilton* v. *Manieff*, 11 Texas, 718. Unless Louisiana has *a mainland coast* how could islands lie within three leagues of it? The point of contact of the sea with the edges of outlying islands is not the "coast" as known either to municipal or international law, except when the marine league is to be measured; it is never so considered when domestic boundaries are involved. The red line on the map No. 59, herewith submitted for the convenience of the Court, defines the coast or shore line from which Louisiana prays that the nine-mile limit shall be measured. It states the

matter in as favorable a light as it can be put for her. The undisputed proof is that the waters are navigable from Nine Mile Bayou at one end of that shore line to the Lake of the Mound at the other. Charles Sanger says: "We went in through Nine Mile Bayou, then we went through— Q. Bay Bordeaux, then into Treasure Bay, then where did you go? A. I think somewhere up in here, that is where we stopped. (Witness here pointed out on the map before him the Lake of the Mound.) By Mr. Zacharie: Q. Do you mean to say you went into the Lake of the Mound? A. Somewhere up in here. Q. Somewhere near Lake of the Mound? A. Yes, sir. Q. Did you go out there with your boat? A. Yes, sir. Q. Did you come out the same route? A. Yes, sir." Record, pp. 264–265. This uncontested proof as to the navigable character of the water along the shore line from Nine Mile Bayou to the Lake of the Mound is confirmed by the report of the cruise of the "Fish Hawk" which states as to all these interior waters: "The depth of water is generally from 3 to 6 feet, although in some of the bays, particularly those to the eastward, there are channels through which a considerably greater depth can be carried." With its judicial knowledge of the geography of the entire coast, even of the position of the islands near to it (*State* v. *Wager*, 61 Me., 178), supplemented by the uncontested parol proof as to the navigable character of the water, the Court should, with the aid of the maps, find no difficulty whatever in adjudicating that the red line marked on map No. 59 herewith submitted is the eastern shore line of Louisiana in the region where it is important to define it.

The Coast Survey expert, W. C. Hodgkins, upon whose skill Complainant so confidently relies, has traced the mainland coast line of Louisiana at this point in substantial accordance with the red line on map No. 59. In Record, p. 481, he says: "As requested by counsel for the State of Mississippi I have indicated on a copy of map No. 7, by a red line from the point marked *B* on the shore of Lake Borgne to the point marked *C* northwest of Point Chico, what appears to be the physical coast line on this portion." There is no conflicting testimony on that point.

All of which is respectfully submitted.

Supreme Court of the United States.

OCTOBER TERM, 1905.

IN EQUITY.

No. 11, Original.

THE STATE OF LOUISIANA, *Complainant,*

v.

THE STATE OF MISSISSIPPI, *Defendant.*

PETITION FOR REHEARING.

The said Defendant comes now and respectfully petitions this Honorable Court for a rehearing of said cause for the following reasons, to wit:

I.

Because the Court erred in holding that the Defendant has lost her constitutional right to assert what she claims to be the true boundary in question by reason of a supposed *acquiescence* upon her part *during a long period of years* in a particular boundary supposed to have been defined and asserted during that period by Complainant. With the greatest respect we will undertake to demonstrate that no question of acquiescence, as that doctrine is defined by law, is presented in this case either by the pleadings

or proof. The specific and only declared purpose of the bill as defined in its prayer is the "practical location" of a boundary line running its entire length through certain waters, and "commencing at the most southern junction of the eastern mouth of Pearl River with Lake Borgne, thence by a deep water channel through Lake Borgne, north of Half Moon Island through Mississippi sound, north of Isle à Pitre, through Cat Island Pass channel, southwest of Cat Island, through Chandeleur Island sound, northeast of the Chandeleur Islands, to the Gulf of Mexico, as is indicated on the original map submitted by the Louisiana Boundary Commission to the Mississippi Boundary Commission and now made part of this bill, marked Exhibit E." There is no pretense in the bill that such a line has ever had a "*practical location*"; the primary purpose of the bill is to give it a "practical location" by having it "permanently buoyed at the joint expense of both States." Complainant does not claim that any one ever heard of such a line until it was first suggested as a practical expedient for settling the controversy between the States by a civil engineer, Mr. W. C. Hodgkins, in a report made by him on the subject January 30, 1901. See Record, pp. 999–1003. The Court will there find the following: "Department of Commerce and Labor, Washington, D. C., March 18, 1904. I hereby certify that the annexed is a true copy of the original report of January 30, 1901, and the accompanying sketches, submitted by Mr. W. C. Hodgkins, assistant, Coast and Geodetic Survey, on the boundary line between the States of Mississippi and Louisiana in the waters bordering upon

the Gulf of Mexico. Andrew Braid, assistant in charge of office of Coast and Geodetic Survey." Then follows four printed pages in which Mr. Hodgkins, after demonstrating that it is practically impossible for anybody to say where the boundary in question is located, concludes as follows: "From all the information at hand, therefore, *it would appear* that the boundary between the States *probably takes the course indicated on the final tracing*, i. e., north of the Malheureux Islands, and thence through the Cat Island channel to the Gulf of Mexico." The Court is mistaken in supposing (p. 29) that Hodgkins ever pretended to know where the boundary actually is; he only undertook to make a guarded statement as to *a probability*. Never until his report was made in January, 1901, did any one ever hear of this line, the invention of Mr. Hodgkins, *in which the State of Mississippi is now supposed to have acquiesced during a very long period of years*. The line as thus invented and proposed by Mr. Hodgkins was at once seized upon by the Louisiana Boundary Commission, which submitted it, at a conference held in the city of New Orleans, March 26, 1901, to the Mississippi Boundary Commission *as Louisiana's claim* as to what the boundary line between the States should be. As the record shows, p. 25, that claim was defined at the conference in question upon the identical map, Exhibit E, now annexed to the bill of complaint. From the minutes of the conference the following appears: "This view of the matter having been presented a general discussion followed during which the members of the Mississippi Boundary Commission admitted that the view was *a novel*

one to them, they being unable to pass upon it at the moment and requesting further time." After reflection the Mississippi Boundary Commission replied to the Louisiana Boundary Commission as follows: "The difference between the line marked by your honorable body [that is, the Hodgkins line] and that which we conceive is the true boundary is so great that we have no hope of being able to reconcile them, and therefore deem it useless to submit any counter line or proposition. The Mississippi Commission considers as islands considerable territory which the Louisiana Commission claim as mainland, and the difference over this question of fact appears to us to be past reconciling." See Record, pp. 24–26. It thus appears *from documents exhibited by Complainant* that on the first and only occasion that the proposed boundary line, *and the only boundary line in question in this case*, was ever submitted to the State of Mississippi or to any of her citizens, it was received as "a novel" thing of which they had never heard, and rejected as a proposition not debateable. It is therefore certain that if there has ever been any acquiescence upon the part of either State in a boundary line it has taken place since January 30, 1901 (the bill was filed in October, 1902), when Mr. Hodgkins attempted to indicate what it "probably" should be. There is no pretense in the pleadings or evidence that prior to his tracings any one had ever attempted to indicate even upon a map the position of said line, much less to give it "practical location." It is elementary and fundamental that the doctrine of acquiescence can never be applied for the purpose of estab-

lishing a boundary that has never had "practical location" by being actually marked and established by some kind of visible physical monuments, because, in the language of the books, there must be "an acquiescence *in such a line* for a time long enough to bar a right of entry under the statute of limitations." See Am. and Eng. Enc. of Law, Vol. 4, pp. 863–64, and authorities cited. That great array of cases recognizes throughout that there must be *an actual marking or designation of the line on the territory over which it extends by visible physical means*, before either party can be held to have accepted it by acquiescence, because acquiescence implies an *active assent* to a known and visible line. In drawing the distinction between laches and acquiescence a distinguished author says: "While the words laches and acquiescence are often used as similar in meaning the distinction in their import is both great and important. Laches imports a merely *passive*, while acquiescence implies *active assent*." Wood on Limitations, § 62. It is impossible for men or States to accept or acquiesce in a given line as a boundary without knowing where it is. Unless it has had, as all the authorities assert, a "practical location," a "marking upon the ground," the doctrine of acquiescence can not be employed as a means of confirming it. That universally accepted principle is the basis of the judgment of this Court in *Indiana* v. *Kentucky*, 136 U. S. 479, in which the claim of Kentucky was sustained because Indiana had acquiesced, during a long period of time, in a boundary line asserted by Kentucky and definitely marked on the earth. In the words of the Court: "Our conclusion

is, that the waters of the Ohio River, when Kentucky became a State, flowed in a channel north of the track known as Green River Island, and that the jurisdiction of Kentucky at that time extended, and ever since has extended, to what was then low-water mark on the north side of that channel, *and the boundary between Kentucky and Indiana must run on that line, as nearly as it can now be ascertained, after the channel has been filled.*" The conclusion thus reached was that for seventy years Indiana had acquiesced *in a definite line marked upon the earth* by natural monuments which all the world could see and understand, and "the boundary between Kentucky and Indiana must run on that line," etc. In *Virginia* v. *Tennessee*, 148 U. S. 503, 528, in which the foregoing case is quoted, this Court has said: "Independently of any effect due to the compact as such, a boundary line between states or provinces, as between private persons, *which has been run out, located, and marked upon the earth, and afterwards recognized and acquiesced in by the parties for a long course of years*, is conclusive, even if it be ascertained that it varies somewhat from the courses given in the original grant, and the line so established takes effect, not as an alienation of territory, but as a definition of the true and ancient boundary. Lord Hardwick, in *Penn* v. *Lord Baltimore*, 1 Ves. Sr. 444, 448; *Boyd* v. *Graves*, 4 Wheat. 513; *Rhode Island* v. *Massachusetts*, 12 Pet. 657, 734; *United States* v. *Stone*, 2 Wall. 525, 537; *Kellogg* v. *Smith*, 7 Cush. 375, 382; *Chenery* v. *Waltham*, 8 Cush. 327; Hunt, Boundaries (3d ed.) 306." *Boyd's Lessee* v. *Graves* was the case of an agreement, by parol, between two proprietors

of adjoining lands to employ a surveyor to run the dividing line between them, and that it should be thus ascertained and settled, which was executed *and the line accordingly run and marked on a plat by the surveyor, in their presence, as the boundary.* On that state of facts this Court declared that "*The possession subsequently held,* and the acts of the parties evidenced by their respective sales of parcels of the land held by each, under his patent, *bounding on the agreed line,* amount to a full and complete recognition of it." In *Rhode Island* v. *Massachusetts,* p. 733, this Court thus stated the precise issue: "One asking us to annul, the other to enforce the agreements; one averring continual claim, the other setting up the quiet, unmolested possession for more than a century, *in strict conformity to, and by the line in the agreements.* * * * *The locality of that line is matter of fact,* and, when ascertained, separates the territory of one from the other, for neither State can have any right beyond its territorial boundary." In applying the doctrine of acquiescence in *Stone* v. *United States,* this Court said: "This survey was made in the presence of the agent of the Delawares. It marked the usual quantity of about three miles square, as appurtenant to the post and necessary for its use and subsistence, making the lines thereof the boundary of the grant to the Delawares, with the concurrence and consent of the agent of the nation. *It was made in the year 1830, and since that time both parties have held possession and claimed up to the lines then established by the survey.*" No case can be found in which this Court has ever applied the doctrine of acquiescence to a boundary controversy between States or in-

dividuals unless it clearly appeared that *a definite boundary line* had first "been run out, located, and marked upon the earth, and afterwards recognized and acquiesced in by the parties for a long course of years." For that reason it is impossible to apply the doctrine to the settlement of the boundary in question here. *The affirmative case* made upon the face of the bill precludes the possibility of such a thing because it appears from the bill that the line in question was never invented until January 30, 1901, and that when it was presented for the first and only time to the representatives of Mississippi they received it as "a novel" thing of which they had never heard before, and rejected it as unworthy of discussion. The bill does not claim that prior to the Hodgkins invention anybody had ever attempted to define the line in question and Mr. Hodgkins himself admits that the subject was so difficult that he could only attempt to say that the line "probably takes the course indicated." Because the line has never had "practical location" the bill was filed with that end in view. In the face of the facts as thus presented by Complainant's pleadings and proof how can it be held *that Mississippi acquiesced during a long period of time in a line never proposed until 1901*, never given "practical location" at any time, and rejected by her as a novel thing unworthy of consideration on the only occasion upon which it was ever presented for her assent. We respectfully submit that the application to the facts of this case of the doctrine of acquiescence in the face of the admissions by Complainant that she has never asserted any definite boundary line through the land and water area in question, that she

never even claimed *such a line on paper* until March, 1901; that such a line has never been given "practical location" by being marked on the earth or buoyed on the water,—overturns every previous definition of the doctrine of acquiescence heretofore made by this Court. Our contention is that this part of the judgment is abstract because neither the pleadings nor proof present conditions to which the doctrine in question can possibly be applied.

It is true that the record contains a mass of conflicting testimony offered by each State to prove the assertion upon its part of sovereignty and jurisdiction over portions of the area in dispute during a long period of time. If that mass of conflicting testimony is to have any legal effect at all it must be considered simply as proof of *prescription*, a doctrine which can not be confused with the doctrine of acquiescence, as they rest upon entirely distinct foundations. As we have demonstrated already the doctrine of acquiescence can never be invoked except as a means of confirming a boundary definitely marked off and defined by physical monuments, *prior to the beginning of the acts of acquiescence.* As that doctrine can not be applied here, the only remaining question is this: Has Louisiana established a title to this vast area, occupied in the main by water, through prescription, as that doctrine is defined in the law of nations, which has never attempted to say how long the quiet and adverse possession must continue in order to vest title? This Court has never indicated that it is possible for any State of this Union to gain territory from another State upon any such basis. Even if such a principle existed there never was a case in which there

could be less justification for its application, as there is no proof of the exercise of any visible and actual possession upon the part of either State over a domain without a single human habitation. We confidently contend that so far as constructive possession is concerned the weight of the testimony is decidedly in favor of Mississippi. So far as the water territory is concerned, through which the bill proposes to run the Hodgkins line, the proof clearly shows that it has been in the unmolested enjoyment of thousands of Mississippi fishermen for more than fifty years. It may be stated with certainty that at least sixty out of the seventy-seven witnesses called by Mississippi sustain that statement, including governors, judges, district attorneys, sheriffs, clerks, mayors, justices of the peace, and all classes of citizens along the coast from capitalists down to the poorest tong-men. We do not know how seriously to discuss the proposition that, upon the vague and conflicting proof as to constructive possession of the territory in question, Louisiana has title by prescription. We do not believe the Court intends even to consider such a proposition. In its opinion it has made no intimation that it intends to apply *the doctrine of prescription.* It is evident, however, that the result of the proof as to *prescription* has induced it erroneously to conclude that there has been *acquiescence* upon the part of Mississippi. As an illustration.—The Court says (p. 30): "The record contains much evidence of the exercise by Louisiana of jurisdiction over the territory in dispute, and of the general recognition of it by Mississippi as belonging to Louisiana." Even if that is granted such proof can only be considered as proof of *prescription* for the

simple and conclusive reason that as no definite boundary was ever defined or marked the doctrine of acquiescence is not involved. In reaching the conclusion that Mississippi has, during a long period of years, actually and affirmatively acquiesced in a definite boundary clearly marked and asserted by Louisiana *before the supposed acts of acquiescence began*, the actual condition of the record has evidently been lost sight of, the bill failing to allege or the proof to show that Louisiana ever claimed or asserted a definite line through the region in question prior to 1901. It is therefore impossible that Mississippi could have acquiesced during a long period of time in a line never even traced on a map, much less given a "practical location." We pray that the Court will re-hear us so that we may remove the manifest misapprehension as to the facts involved in this branch of the case.

II.

Because that part of the judgment which applies the doctrine of the thalweg or mid-channel to the waters of Mississippi sound upon the theory that such waters are *territorial waters*, and not the open sea as declared by the Department of State, whose rule on that subject the Court must follow, is based largely upon *an erroneous conclusion of law as to the character of such waters*, contained in the cross-bill of Defendant, and quoted by the Court in its opinion at p. 26. The erroneous conclusion of law thus embodied in the cross-bill early in the litigation was not subsequently removed by amendment because as the legal character and situation of the waters of Mississippi sound, a prominent feature in the geography of the country, are

a part of the Court's judicial knowledge, such knowledge is so conclusive as to be entirely unaffected by any contrary averment of the pleader or by any conflicting evidence that might be offered on the subject. Am. Enc. of Law, Vol. 17, pp. 902–3, and authorities cited. And even if the matter in question were not a subject of judicial knowledge, certainly no erroneous conclusion of a pleader as to a well-settled rule of international law can convert a part of the open sea into that kind of territorial water technically known as "an arm of the sea." It is an elementary rule of pleading, at law and in equity, that "A party is not concluded by an erroneous averment of law in his pleadings. The rule of estoppel by averment of a fact has no force as to a statement of the law to be applied to a certain state of facts. *A mistaken assumption of what the law is* will not be presumed to have misled the opposite party." 39 Am. Dig. Cent. ed. 1203; *Union Bk.* v. *Bush*, 36 N. Y. 631; Bac. Abr. "Pleas," 322. We therefore respectfully contend that the Court must settle upon its merits, and in the light of its judicial knowledge, the vital question involved in this case, which is this: Are the waters to which the Court proposes to apply the doctrine of the thalweg or mid-channel as now defined by it *territorial waters of the United States* or a part of the open sea? We bow to the judgment of the Court that the doctrine of the mid-channel may be lawfully extended beyond rivers to "an arm of the sea" dividing States from each other. It is axiomatic and elementary that "an arm of the sea" is necessarily *territorial water*, water so inclosed between headlands or promontories as to fence or mark it off from the open sea. The moment such

a body of water ceases to be *territorial* that moment it ceases to be what is technically known as "an arm of the sea." No publicist, no theorist, no advocate, either here or elsewhere, has ever ventured to claim that the doctrine of the thalweg can be applied to the waters of the open sea as contradistinguished from the territorial waters embraced in what is known as "an arm of the sea."

Our respectful and earnest contention now is, (1) that only the political department of this Government can determine what are the territorial waters of the United States; (2) that the judicial department must follow the rule of the executive in that respect; (3) that the waters of Mississippi sound to which the Court now proposes to apply the doctrine of the thalweg, *and which it recognizes as territorial waters*, are declared by the Department of State to be the open sea and as such beyond the territorial limits of the United States. If we are correct in that contention, now presented for the first time in that aspect, it is a contradiction in terms to speak of the Court defining a boundary beyond the limits of territorial waters, for the simple and conclusive reason that the jurisdiction of the Court ends at the point where the open sea begins. In order to present this view of the case more vividly to the Court we will quote from the prayer of the bill: "And after due proceedings may it please your honors to adjudge and decree that the boundary line dividing the States of Louisiana and Mississippi, in the waters between the said States to the south of the State of Mississippi, and to the southeast of the State of Louisiana is the deep water channel, commencing at the most southern junction of the eastern mouth of Pearl River

with Lake Borgne, thence by the deep water channel through Lake Borgne, north of Half Moon Island through Mississippi sound, north of Isle à Pitre, through Cat Island Pass channel, southwest of Cat Island, through Chandeleur Island sound, *northeast of the Chandeleur Islands to the Gulf of Mexico*, as is delineated on the original map submitted by the Louisiana Boundary Commission to the Mississippi Boundary Commission and now made part of this bill marked Exhibit E; that the said deep water channel be located throughout its course and permanently buoyed at the joint expense of the two States; *that the State of Mississippi and its citizens be perpetually enjoined from disputing the sovereignty and ownership of the State of Louisiana in the said land and water territory south and west of said boundary line.*" If the Court will examine the red line on said map marked Exhibit E (printed in the record opposite page 8) which defines exactly the area of territorial water claimed by Louisiana, and which she prays the Court to decree to her by virtue of the so-called deep water channel theory, it will see that her claim is extended to a point southeast of Breton Island, which point is located in the open waters of the Gulf of Mexico, certainly *eighty miles from the southern coast of Mississippi and about forty-five miles from the mainland coast of Louisiana.* The prayer is "that the State of Mississippi and its citizens be perpetually enjoined from disputing the sovereignty and ownership of the State of Louisiana *in the said land and water territory south and west of said boundary line.*" Thus the startling claim is made by Louisiana to the entire group of the Chandeleur Islands, now owned and occupied by the United States and situated nearly if not quite twenty-five miles from her

eastern coast as defined by this Court, with all the vast expanse of waters embraced within a line sweeping around to the east of said group. If the prayer of the bill is granted the result will be that an area of the open waters of the Gulf of Mexico, *at least fourteen hundred square miles in extent*, which, under the settled rule of our Department of State constitutes the ocean, the property of all mankind, will be fenced off and inclosed as a part of the territory of Louisiana. There can be no possible mistake as to the extent of the claim as the specific prayer of the bill is that "the said *land and water territory* south and west of said boundary line" be decreed to the State of Louisiana. If the Court will follow the proposed boundary as defined by the red line marked on the map in question, it will see that it sweeps to the east of the Chandeleur group and Breton Island, thence around the mouths of the Mississippi and along the southern coast of the State to the mouth of the Sabine River. A State boundary must of necessity be *continuous;* it can not break off in mid-ocean and disappear. The bill does not attempt to avoid that issue; the continuous line is boldly drawn to the east of the Chandeleur group, and this Court is asked to decree that all of the waters west of that line up to the eastern shore of Louisiana be decreed to that State *as territorial waters*, including of course the Chandeleur Islands and Breton Island. If the deep-water channel theory is to prevail Louisiana can claim no less because only in that way can she set up a continuous boundary. If the Court sustains this claim and decrees that all waters to the south and west of the red line as defined on the map in question are the territorial waters of

Louisiana what will be the effect on the territorial limits of the United States? The answer is easy. According to the elementary rule of international law the outer edge of the territorial waters of Louisiana must be fringed by the marine league, whose outer edge marks the beginning of the open sea. Thus the southern maritime boundary of the United States in those waters will, *by a decree of this Court*, be extended into the open waters of the Gulf of Mexico many miles to the south and east of the national boundary line as now fixed and recognized by the political department. In a word a vast expanse of water which that department now recognizes as the open sea, upon which hostile fleets may encounter outside of our national boundaries, will be converted into territorial waters of Louisiana. We respectfully urge that there should be further discussion and consideration of this vitally important aspect of the case, for two reasons: first, because of the inevitable conflict that must arise between the judicial and political departments of the Government as to the national boundaries in the waters in question if the draft of the final decree now offered is enrolled; second, because the question of the exclusive right of the political department to determine what are and what are not the territorial waters of the United States has not heretofore been discussed in any form by counsel on either side of this case. Our excuse, if one be needed, for a failure to go into that subject heretofore is that we confidently believed that the Court would hold that the doctrine of the thalweg could not be extended beyond rivers to that kind of territorial water technically designated as "an arm of the sea." After the intimations made on that subject during

the oral argument we did not suppose that the doctrine of the mid-channel would receive serious consideration.

The right to fix national boundaries necessarily carries with it the right to define what are and what are not territorial waters. The political department possesses the exclusive right to make such definitions, which must be accepted as final by the judiciary. Peaceful intercourse between nations requires that each State should define its boundaries by land and sea. Under our Constitution national boundaries are defined by political and not by judicial action, and the courts follow the decision of that department of government which makes the definition. Hence the formula that the "Judiciary takes executive view as to national boundaries." Wharton, Int. Law. Dig. Vol. I, § 22, citing *Foster* v. *Neilson*, 2 Pet. 253; *Garcia* v. *Lee*, 12 *id.* 511; *Williams* v. *Suffolk Ins. Co.* 13 *id.* 415; *U. S.* v. *Reynes*, 9 How. 127. No State can possibly define its boundaries without determining what are its territorial waters as contradistinguished from the waters of the open sea, because only in that way can the place of the marine league be fixed. International law therefore concedes to each State the right to define within certain limits its territorial waters. In the exercise of that right our Department of State has followed two distinct policies. The earlier policy has been thus defined by Kent: "Considering the great extent of the line of the American coasts, we have a right to claim for fiscal and defensive regulations a liberal extension of maritime jurisdiction; and it would not be unreasonable, as I apprehend, to assume for domestic purposes connected with our safety and welfare the control of waters on our coasts, though included within

lines stretching from quite distant headlands,—as, for instance, from Cape Ann to Cape Cod, and from Nantucket to Montauk Point, and from that point to the capes of the Delaware, and from the South Cape of Florida to the Mississippi." Comm. I, 30. As such extravagant claims were in conflict with the principles of modern international law they were abandoned at an early day in favor of the generally accepted rule as thus stated by Hall: "In any case the custom of regarding a line three miles from land as defining the boundary of marginal territorial waters is so far fixed that a State must be supposed to accept it in the absence of express notice that a larger extent is claimed." p. 160. We have only claimed "a larger extent" in the case of certain land-locked bays inclosed within headlands. The following is an accurate and complete statement of the rule of our Department of State as recognized for more than half a century: "The position of this Department has uniformly been that the sovereignty of the shore does not, so far as territorial authority is concerned, extend beyond three miles from low-water mark, and that the seaward boundary of this zone of territorial waters follows the coast of the mainland, extending where there are islands so as to place round such islands the same belt. *This necessarily excludes the position that the seaward boundary is to be drawn from headland to headland, and makes it follow closely at a distance of three miles, the boundary of the shore of the continent or of adjacent islands belonging to the continental sovereign.*" Mr. Bayard, Sec. of State, to Mr. Manning, Sec. of Treasury, May 28, 1886; Wharton, Int. Law Dig. Vol. I, § 32. Under that rule it is impossible to run any

line from headland to headland so as to make the open waters of Mississippi sound to which the mid-channel doctrine has been applied *territorial water.* If the extremity of the Isle à Pitre should be taken as one headland it would be necessary to reach over the vast expanse of water between that point and Alabama port at the mouth of Mobile Bay before anything even resembling another headland could be found. Such a rule, as once stated by Kent, has been a dead and repudiated doctrine for more than sixty years. *The United States now claims no indentations of its coast such as Mississippi sound as territorial waters.* The fact that a few islands miles from the shore are situated in front of such an indentation can not possibly convert it into an arm of the sea. *No such principle is recognized either by our Department of State or by international law.* A territorial character is given only to such *interior waters* as Delaware and Chesapeake Bays, Mobile Bay and Lake Ponchartrain, which are really "included by promontories or headlands within its territories." See Moore, Int. Arb. Vol. I, 744; Lawrence's Wheaton, 2d ed. p. 320. It was so manifest, so uncontrovertible, under the existing rule of our State Department, that such an indentation in the coast as Mississippi sound (uninclosed by anything that can by possibility be called "promontories or headlands") is *the open sea*, and not territorial water, that counsel for Louisiana urgently insisted upon that fact, until they perceived its crushing effect upon the thalweg theory. In their original brief they say: "As a matter of fact the waters of Mississippi sound were considered as the sea or as forming part of the sea and Gulf of Mexico at that time. We have already

shown (p. 69) that Mississippi sound and Lake Borgne are salt-water bodies of water *and true parts of the sea or gulf.* Congress in its description so regarded these bodies of water, for in its boundary description it carried its line from the middle of Lakes Maurepas and Pontchartrain *immediately* [the italics are theirs] to the Gulf of Mexico, thus indicating that it considered that to be the next body of water to be reached in the extension of the southern boundary of Louisiana around to the westward until it reached the Texas line." An amplification of that sound and unanswerable statement of the law as laid down by our State Department is to be found on p. 69, where the following occurs: "The meaning of the word 'sea' in the treaty of peace of 1783, between the United States and Great Britain defining the boundaries of the United States, was given by the American claim, and acquiesced in by the British as follows: 'The term "sea" in its general sense embraced the whole body of salt waters. Its great subdivisions were designated by the names Atlantic Ocean, Pacific Ocean, etc. *Each of them generically embraced all the bays, gulfs and inlets formed by the indentures of its shores or by adjacent islands.*' (Moore's International Arbitration, Vol. 1, p. 102); and the Bay of Fundy, the Gulf of St. Lawrence and the Bay of Chaleurs were considered parts of the sea (*ibid.* pp. 114, 158, and note 3)." No criticism can be sharp enough to destroy that definition of the open sea as contradistinguished from territorial waters, a definition through which counsel for Complainant triumphantly declare "that Mississippi sound and Lake Borgne are salt-water bodies of water, *and true parts of the sea or gulf.*" And yet in the face of that admission, deliberately made

by Complainant's counsel and supported by unanswerable authorities, the Court says (p. 24): "Mississippi's mainland borders on Mississippi sound. This is an enclosed arm of the sea, wholly within the United States, and formed by a chain of large islands, extending westward from Mobile, Alabama, to Cat Island." We earnestly insist that that view is a manifest error because it conflicts sharply with the rule of our State Department which declares Mississippi sound *and all like indentations of the coast* to be open sea and not territorial water. If the Court holds to the view it has expressed in this regard the result must be a clearly defined conflict between the judicial and political departments as to a subject *within the exclusive domain of the latter.* The State Department can not bow to the new rule as thus announced by the Court without an abandonment of the entire basis upon which the character of the territorial waters of the United States is now determined. If, as counsel for Louisiana contend, and as we contend, Mississippi sound is a part of the open sea, then it follows as the night the day that the doctrine of the thalweg can not be extended to the waters of Mississippi sound, because no publicist, no theorist, no advocate ever has ventured to suggest that *that doctrine can be applied to the waters of the open sea.* The extreme claim is that it may be extended beyond rivers to "an arm of the sea," that is to a body of *territorial water* so cut off from the main body of the sea as to be within the limits of one or more States, a body of water with banks like a river. It is axiomatic that "an arm of the sea" must be territorial water for the conclusive reason that the moment it ceases to be such it becomes a part of the open sea

itself. Counsel for Louisiana have only asked the Court so to enlarge the doctrine of the thalweg as to permit its application to that kind of *territorial water* between two States which is known as "an arm of the sea." And in this they have been perfectly consistent because their bill alleges and its prayer states *that every portion of the water through which the Court is asked to extend the mid-channel is territorial water.* The prayer is that Louisiana be decreed "the said land and *water territory* south and west of said boundary line." Her counsel perfectly understand that even in the enlarged form in which this Court has accepted the mid-channel doctrine it dies the moment it passes the limits of territorial waters ; it can not be applied to the open sea. Therefore the solution of this part of the case is perfectly simple the moment that the fact is accepted that the only territorial waters in the United States are those recognized by the political department of the government as such, *and that Mississippi sound is not so recognized.* There are no mysteries in this problem susceptible as it of exact demonstration. If the Court will fix its eyes upon that *long undulating indentation* in the coast of the Gulf of Mexico known as Mississippi sound, it will see the only waters with which we have to deal in this case because that part of the Gulf known as Lake Borgne ends just at the point where the so-called mid-channel begins. Even if that were not so we have the solemn declaration of Complainant's counsel, never retracted, "that Mississippi sound and Lake Borgne are salt-water bodies of water and true parts of the sea or gulf." But the inquiry need not be extended beyond that section of the Gulf known as Mississippi sound. If that sound is not "an arm of the

sea," if it is not fenced off from the main body of the Gulf by headlands or promontories, if its waters are not territorial waters, then it is the open sea to which, even under the widest possible definition, the doctrine of the mid-channel can not be extended. That is true for a very simple reason. A mid-channel is a channel midway between the banks of a river or the banks or shores of an arm of the sea. The moment banks of every kind disappear, as they do when an attempt is made to apply the doctrine to the open sea, the phrase "mid-channel" loses all meaning, it becomes a mere solecism. No possible ingenuity can construct an argument upon the theory that Mississippi sound is cut off from the main body of the Gulf by promontories or headlands because nothing in their likeness exists. The sound is simply a long indentation of the coast such as our Department of State declares to be the open sea and not territorial water. The only territorial water here is that within the three-mile zone which follows: "closely at a distance of three miles the boundary of the shore of the continent or of adjacent islands belonging to the continental sovereign," as Secretary Bayard has so clearly stated it. If the Court will follow on the map the line of the proposed mid-channel it will see that the moment it crosses the three-mile zone annexed to the shore at the mouth of Pearl River, it passes at once beyond the limits of the United States into waters which our Department of State declares to be the open sea, a domain into which the writs of this Court can not run. As an object-lesson let us take the so-called mid-channel at the point at which the bill proposes to extend it "*northeast of the Chandeleur Islands to the Gulf of Mexico, as*

is delineated on the original map," etc. At that point it is distant at least twenty-two miles from the southern coast of Mississippi and at least twenty miles east of the eastern coast of Louisiana as now fixed by this Court, *and last and most of all it is at least seventeen miles beyond the territorial limits of the United States as defined by our Department of State.* Certainly it will be admitted that that part of the waters of the Gulf of Mexico is miles beyond the water area which the Court has called "an enclosed arm of the sea." Even if that view were sound it would not help the matter, *because the proposed mid-channel must run for many miles beyond the limits which the Court gives to Mississippi sound as territorial water.* And yet this Court is seriously asked to run its writs out to that point in the open sea in order "that the State of Mississippi and its citizens be perpetually enjoined from disputing the sovereignty and ownership of the State of Louisiana in the said land and water territory south and west of said boundary line." The enormity of this claim will become still more startling if the Court will fix its eyes upon that great body of water, upon which the navies of the world could assemble, bounded on the west by the eastern coast of Louisiana and on the east by that crescent shaped chain of islands known as the Chandeleur and Errol Islands. Despite the fact that the political department proclaims to all nations that hostile fleets may there encounter outside of the three-mile zone fringing the coast, Louisiana prays that that entire expanse of water be withdrawn from the common use of mankind; that it be made a closed sea within her territorial limits; and "that the State of Mississippi and its citizens be perpetually enjoined

from disputing the sovereignty and ownership of the State of Louisiana in the said land and water territory south and west of said boundary line." If the Court will estimate on the map the superficial area of water "south and west of said boundary line," which Louisiana proposes to appropriate, it will find that such area embraces *at least fourteen hundred square miles of open sea* beyond the national limits of the United States as defined by the political department. If the Court doubts the reality of what seems to be impossible, it has only to read the clear and explicit provisions of the draft of the proposed final decree which Complainant's counsel have already presented for enrollment. Through the terms of that proposed decree Louisiana is asking this Court to confirm to her, *as territorial waters*, every foot south and west of a line to be extended "through the northeast corner of Lake Borgne, north of Half Moon or Grand Island, thence east and south through Mississippi sound, through South pass between Cat Island and Isle à Pitre, through Chandeleur sound, *northeast of the Chandeleur Islands into the Gulf of Mexico, all as shown on the map Exhibit E made part of Complainant's bill of complaint.*" On that map the proposed line which is to define the territorial limits of Louisiana is boldly drawn around the entire group known as Chandeleur and Errol Islands, the acknowledged property of the United States, and now in its use and occupation as such. When counsel for Complainant presented to us the proposed draft of a final decree for approval we asked him what would become of the title of the United States to the Chandeleur group after its enrollment. His reply was that the group would

still belong to the United States, *but would be inclosed within the limits of Louisiana.* Within this vast area of open sea which is to be thus inclosed for the exclusive benefit of a single State this Court is asked, by the terms of the proposed draft, perpetually to enjoin the State of Mississippi, "its officers and citizens from disputing the sovereignty and ownership of Louisiana in the said land and water territory." Such a startling and unprecedented claim, which would project the limits of Louisiana out into the ocean many miles beyond the limits of the United States as now fixed, is the necessary corollary of the proposed mid-channel or rather mid-ocean theory. Its reckless extravagance will we believe, in the end, destroy it. Nothing can more pointedly illustrate that extravagance than the proposal to inclose within the territorial limits of Louisiana the Chandeleur Islands, the undisputed property of the United States, now in its use and occupation as a reservation. That group standing apart from the continent in the ocean, and surrounded of course by a three-mile zone of its own, was acquired from France, through the Louisiana Purchase, by the United States, which never pretended to convey it to Louisiana under the act of 1812 admitting her into the Union. On the contrary the Government of the United States expressly reserved the group for its own purposes. And yet without this grotesque contention that the territorial limits of Louisiana shall be so enlarged as to inclose this group, it is impossible to maintain the deep-water channel theory, which can not exist unless such a channel can be extended in its entire course, *through territorial waters*, "northeast of the Chandeleur Islands to the Gulf of Mexico."

In the light of such a proposal who can fail to see that the dominant and ultimate motive of this suit upon the part of Louisiana, is the appropriation, by the aid of the process of this Court, of a section of the open waters of the Gulf of Mexico one-third larger than the State of Rhode Island, in order that a vast trust or monopoly may be established therein for the exclusive benefit of the individuals and corporations engaged, with millions of capital, in her great and growing fish and oyster industry. As this Court has held in *Smith* v. *Maryland*, 18 How. 71, that a State can grant to its own citizens exclusive use of lands covered by water, for raising oysters, and may prohibit, under a penalty, their use for such purpose by citizens of other States, Louisiana can quickly complete this vast and unlawful design by legislation of her own, if by the aid of this Court she can succeed in inclosing within her territorial limits the part of the open sea in question. The taking away from Mississippi of the comparatively unimportant islands for which we are now battling is but a small matter to the real promoters of the scheme now laid bare by the presentation of the draft of the proposed final decree. The backbone of course of this unlawful enterprise in the interest of a giant monopoly is the mid-channel theory, without which it can not for a moment exist, as the act of 1812 defining the boundaries of Louisiana contains nothing that can give even color to such a claim. When this Court sternly rebukes as it surely will this unprecedented attempt to pervert its powers to a grossly illegal purpose, *the specific case* as made by the bill will fall to the ground. We earnestly suggest

that when that point is reached, the Court should not proceed in a case of this magnitude to consider what other measure of relief may be granted under the general prayer, without rehearing counsel as to the new questions which will then arise. If the Court adheres to its conclusion (p. 30) "that Complainant is entitled to the relief sought," then it must grant the special prayer of the bill as embodied in the draft of the final decree which proposes to inclose at least fourteen hundred square miles of open sea, including the Chandeleur and Errol Islands, within the territorial limits of Louisiana. In that new aspect of the case the question whether or no Mississippi sound is an arm of the sea becomes comparatively unimportant. The larger question thus presented is this: Can this Court undertake to decree to a single State that vast area of open sea, lying between the Chandeleur and Errol groups and the eastern coast of Louisiana, *as territorial water?* Upon so grave and far-reaching a question, involving the interests of all the Gulf States, as well as large political and property interests of the United States, it would seem that there should be some argument. The Court can neither accept nor reject the proposed draft of a final decree without passing upon that larger question which has not, as yet, been argued at all.

III.

A VITAL PRINCIPLE OVERLOOKED.

If the Court shall graciously grant to us a rehearing upon certain questions in this case we will not attempt

to renew the contention that those parts of the acts of 1812 and 1817 which define the southern and eastern boundaries of the States in question should be construed *in pari materia*. We accept as final that part of the judgment which declares that as the act defining the boundaries of Louisiana is prior in point of time to her must pass every foot of territory which a fair and lawful construction of that act conveys. It can not be claimed that that act is not in the usual form or that it is in any respect incomplete. It is unambiguous on its face and it employs the technical terms by which land and sea boundaries are usually defined. In the light of those facts we renew the vitally important contention, *which seems to have been entirely overlooked by the court*, that *a general rule* of international law, such as that involved in the doctrine of the mid-channel, can never be applied when the subject matter is regulated by *a special* or *conventional rule*. As will appear from the following authorities that rule of international law is fundamental: Grotius, De Jure Belli ac Pacis, II, C. 3; Bluntschli, XV, 2; Marteus, *Precis*, Sec. 119, p. 320; Calvo, *Droit Int.* I, Sec. 19, p. 109; Phillimore, Int. Law, I, pp. 44–45 (2d ed. London); Twiss, Law of Nations, I, pp. 130–131; Lawrence's Wheat. p. 28; Halleck, Int. Law, I (Baker ed.), p. 50; Lorimer, Ins. of Int. Law, I, p. 43. The obvious reason of the rule is embodied by Grotius in an illustration directly in point. He says that while in a doubtful case the ownership of territories on either side of a river is determined by the middle of the channel, it may be that the sole right to the entire river may belong to the terri-

tory on one side when for instance "*this sole right may have been so settled by treaty.*" That is to say, when the parcies themselves have established a special and conventional rule to regulate the particular case, that special rule can not be abrogated by the general rule of international law that would be applied if the special rule did not exist. When the States entered into the Union it was through a constitutional compact which authorizes Congress to define by special or conventional rules their boundaries. Therefore when such a conventional rule embodied in an act of Congress regulates the particular subject matter, it is impossible to annul it and put it aside by the suggestion that there is a general rule of international law that must supplant it. By invoking the doctrine of the mid-channel in this case Louisiana is simply striving to interpolate into the act defining her boundaries a general rule whose application will entirely change her boundary on the sea *as Congress has defined it.* From the junction of the Rigolets with Lake Borgne to the mouth of the Sabine River the boundary of Louisiana is the "*coast.*" The vital words of the act are: "including all islands within three leagues of the *coast.*" Congress thus used a technical term perfectly understood in international law which establishes a definite *land boundary* for that State and not a shadowy and uncertain water boundary to be worked out through the application of the general rule embodied in the doctrine of the thalweg. If that general rule is applied it simply annihilates the special rule Congress has established by fixing the eastern boundary of Louisiana miles away from the *coast* which Congress declared should be the boundary.

We respectfully submit that the Court falls into a manifest error when it says (p. 20): "The eastern boundary thus described is *a water boundary*, and, in extending this water boundary to the open sea or Gulf of Mexico, we think it included the Rigolets and the deep water sailing channel line to get around to the eastward." Upon the contrary the act expressly declares the eastern boundary to be *a land boundary* which is the "*coast.*" There is no allusion in the act to a "sailing channel line"; *there are no words from which it can possibly be inferred.* If the rights of Louisiana rest upon the terms of the act admitting her how can those terms be varied by the injection into the act of a general rule of international law in direct conflict with them? If we can only succeed in drawing the attention of the court to this simple yet vital principle, not adequately presented, we admit, in the original brief, we feel confident that the vexing, unnecessary and uncertain doctrine of the thalweg will be entirely eliminated for two reasons: In settling boundaries between States the court must apply international law, which rejects the doctrine of the thalweg, in this case, first, because, *as a general rule*, it can not annul and set aside *the special rule* which the common sovereign of both States has laid down as to the boundary in question; second, because the waters to which Complainant is striving to apply the doctrine are not territorial waters, international law recognizing its application only to waters of that character. The court should therefore entirely reject this abstraction, invoked for a dangerous and unlawful purpose, and settle the boundaries of Louisiana by a construction of the act of

Congress upon which her prior rights alone depend, an act whose clear, scientific and comprehensive terms only become difficult of application when the attempt is made to change them by the interpolation of an unsettled international rule in direct conflict with them. We say in direct conflict with them because the eastern boundary of Louisiana is fixed by the special terms of the act of 1812 in one place, while by the mid-channel theory it is fixed in quite another. The moment the Court resolves entirely to reject this mid-channel theory as inapplicable, that moment it will clear the ground for a simple solution of the real questions involved in the case, and at the same time break the back of the audacious attempt now being made to inclose *upon the medieval plan* 1,400 square miles of open sea, beyond the national limits, as a private preserve for the exclusive use of a giant trust or monopoly.

IV.

Boundaries of Louisiana as defined by the act of April 6th, 1812.

If the Court concludes to reject the thalweg theory as inapplicable to this case we will pass at once beyond the conflicting theories of publicists as to an unsettled international rule to the firm and settled ground of statute law. Is it likely that Congress in enacting the law of 1812 intended to make the definition of the eastern boundary of Louisiana depend, not upon the terms of the statute, but upon an unsettled rule of international law more in dispute then than now. If Congress intended that the terms of the acts admitting the States in question should govern, the Court has only to deal with two technical

terms, "coast" and "shore," which are, by an array of unassailable authority, declared to be synonymous. In the act admitting Louisiana the word "coast" is used; in the acts admitting Mississippi and Alabama the word "shore" is used. We repeat the authorities cited on pp. 26–30 of our original brief, which demonstrate that "coast" and "shore" are convertible technical terms and as such entirely synonymous. It is settled that "*In a statute which requires measurement from the coast* the coast is the point of contact of the *mainland* with the sea; and when a bay intervenes the point of contact of *the bay with the mainland* is to be considered the coast." Farnham on Waters and Water Rights, Vol. II, p. 1463, citing *Hamilton v. Manieff*, 11 Texas, 718. In our humble judgment there are but two pertinent and legitimate inquiries to be made in this case: (1) What is the point of contact of the mainland of Louisiana with the sea, on the east, and what islands are within *nine miles* of that point of contact; (2) What is the point of contact of the mainland of Mississippi with the sea, on the south, and what islands are within *eighteen miles* of that point of contact. If there is a conflict the terms of the grant to Louisiana must first be satisfied, the remainder of the islands passing to Mississippi under the subsequent grant. By our relinquishment of the *in pari materia* doctrine all claim to the entire territory in dispute is given up. The only contention now is that the islands outside of the nine-mile limit measured from *the true mainland* of Louisiana belong to Mississippi under the terms of the act of 1817. Our earnest prayer is that the Court will listen to us with patience, and with its mental sensibilities

unruffled, while we attempt to demonstrate, with the greatest possible respect, that it has made a grave mistake in determining what is the point of contact of the real mainland of Louisiana with the sea. In other words that the Court has erroneously held that a certain archipelago of islands off the east coast of the peninsula of St. Bernard is a part of the mainland of that peninsula. Certain it is that Louisiana has a mainland coast in the usual acceptation of that term. Her bill is framed upon the theory that, if the mid-channel doctrine fails, she may recover the islands within nine miles of her eastern mainland coast. Her alternative case is this: "But if your honors should feel that any part of this disputed area *was islands* by reason of the presence of shallow water, then *as islands* they are within the nine-mile limit of distance from the shore line of the State of Louisiana and therefore belong to and form a part of the State of Louisiana by that second provision of the act of Congress giving Louisiana *all islands within three leagues of its shore line.*" Whether or no a certain piece of land is an island *is a legal conclusion* which should be drawn through the scientific application of certain recognized rules to a given condition of fact. Physical geography as a science has certain rules by which it determines whether or no a given piece of land is an island; the law as a science has certain rules by which it determines whether or no a given piece of land is an island. When the separate application of each set of rules to the facts of a given case results in the conclusion that the piece of land in question is an island, why should there be further controversy?

Let us first apply to the facts of this case which, in this regard, are not seriously disputed by either side, the rules of physical geography, beginning with the trite definition of an island as "a tract of land surrounded by water." After the geographer has gathered his data, he expresses his conclusion upon the face of his map whether or no a given piece of land is an island or mainland. The testimony shows that no maps of this region, worthy of the name, were ever made until the necessary data was first gathered by our Coast and Geodetic Survey. Nearly all of the early maps indicating the archipelago of islands in question as mainland declare upon their faces that the region was then unexplored; that there was then no data available from which the cartographer could determine whether the region was occupied by islands or not. Not until our Coast Survey explored the region and gathered the necessary data were any maps ever made which are of any value as to the point in question here. The fact should certainly be persuasive, if not convincing, that every map, every chart ever issued by our Coast Survey, clearly describes the archipelago of islands in question as such; and the same may be said of every other map of the region, with anything like complete details, issued since the materials gathered by the Coast Survey have been available. Such maps may differ in assigning the islands to one State or the other, *but upon all the islands are described as such.* When Mr. Baylor, the Coast Survey expert, who has devoted much time to a survey of this region, was asked whether, according to the standards of physical geography, the area in question was occupied by islands,

he answered yes, adding, "*They are certainly bodies of land around which vessels of moderate draft can sail.*" What kind of testimony could be more conclusive on this point than that of an experienced civil engineer and map maker who says he surveyed the entire coast "by trigonometrical methods." From another branch of the Federal Government whose duty it became to examine the region in question in order to ascertain, among other things, its geography, the expert testimony is equally explicit and convincing. In 1898 the General Assembly of Louisiana, by a concurrent resolution, requested the United States Fish Commission to make a careful exploration of the entire oyster region and industry, in order that an exhaustive report might be made upon the subject. With that end in view an expedition was sent out in the *Fish Hawk* composed of scientific men whose report was drawn by Dr. H. F. Moore, as printed in the record. See Vol. II, pp. 2033–2054. A survey of the territory was a part of the work because Dr. Moore says: "Contrary to expectations, it was found that the topography in general had not undergone many important changes since the survey upon which the Coast Survey charts were based, and the several points could be identified and located with sufficient accuracy to suit the purposes of *the reconnaissance.*" After that had been completed the report was made which begins with a "General description of the region." Upon that subject its words are: "*The land constitutes a low-lying archipelago of irregular islands separated from one another by shallow bays, muddy lagoons, and tortuous bayous, the area of the water being somewhat greater than that of the land.* The bayous are of two classes, rather broad, short, deep passes, like

Nine-mile Bayou, Three-mile Bayou, and Deep pass, which serve as the main avenues of tidal flow to and from the interior bays, and long narrow water courses which characteristically run lengthwise of the islands, as is seen in the cases of Door Point Bayou, Dead Man Bayou, etc. The bayous of the first class have generally a depth of from 18 to 42 feet, those of the second class from 5 to 12 feet, and all are more or less obstructed by bars across their mouths." Here we have the concurrence of two expert geographers, representing different branches of the Government, who, after minute surveys of the region by scientific methods, conclude that what we call islands are such in the full geographical sense. In making his report Dr. Moore expressly declares that "The land constitutes a low-lying archipelago of irregular islands separated from one another by shallow bays, muddy lagoons and tortuous bays, the area of the water being somewhat greater than the land." Fortifying and confirming this expert testimony from scientific men is the immemorial voice of the people of the community who for generations have been navigating the waters of this archipelago by sail and steam. Is it likely that the inhabitants of the region have been deceived while sailing and steaming around bodies of land surrounded by water which they have named Isle à Pitre, Petit Pass Island, Crooked Island, Mud-cross Island, Pirate Point Island, Nigger Island, Dead Man's Island, Shell Island, Brush Island, Mink Island, Wild Goose Island, Elephant Point Island, Sundown Island, Door Point Island, Martin Island and Mitchell Islands. Through these names, each one of which embodies a local tradition, the people of the com-

munity have been declaring to the world for generations that the islands in question which they have named as such, circumnavigated as such, are indeed islands. The bed-rock of English law is the voice of the local community; it is that and only that the jury system embodies. Why should the Court be inclined to set it aside in this case, confirmed as it is by the uncontradicted testimony of the experts who have so carefully explored the topography of the region.

Let us next apply the more exact and technical standards by which the law determines whether or no a piece of land surrounded by water is an island. From that standpoint the land must be of a particular character; a submerged fen, a body of land continually covered by water is not an island. The authorities heretofore cited (original brief, pp. 43–44), prove however that an island does not lose its character as such, although "at high tide it is almost covered by water," neither does it lose its character through erosion or submergence. That the lands composing the islands in question are firm lands standing at all seasons above water, upon which a traveler can at all seasons walk dry shod, is put beyond controversy by Complainant's own witnesses, Monier and Thiel, who were sent on a special mission to ascertain the facts in this regard. Monier says that he had no difficulty in walking along the shores of these islands; that "the shore line was hard," and high above the water. When asked, "About how much above water was the shore line?" he answered, "About a foot and a half to two feet." When asked, "Could you have driven a buggy to any part of that shore line?" he answered, "Yes, sir." When asked, "Do you undertake to tell the commissioner

that that sort of a trip could be made at any time during the year?" he answered, "Yes, sir. Q. And that there is no difficulty about it all? A. No, sir; there is not." Thiel, the companion of Monier, who confirms him in every particular, when asked "was that a trembling prairie?" answered, "No, sir; it was perfectly solid, there was no trembling prairie about that." Thus it appears from the uncontradicted testimony of complainant's own witnesses that the firm character of the land composing these islands, and its elevation above the water at all seasons, satisfy every legal requirement in that regard. As to the character of the water surrounding these islands it may be said that the law requires that a strip, it may be a very narrow strip, of *navigable water*, must separate an island from the mainland. An island must be surrounded not only by water but by navigable water. "All tide water is *prima facie* public and navigable, the burden is on the person alleging the contrary." Farnham on Waters, Vol. I, p. 125, citing *Sullivan* v. *Spotswood*, 82 Ala. 163. While there is no negative proof that the tide waters in question are not navigable, there is affirmative proof that the waters surrounding these islands are easily navigable for a steamer drawing four feet. See original brief, p. 55. According to the report of the Fish Commission "the depth of water is generally from 3 to 6 feet although in some of the bays, particularly those to the eastward, there are channels through which a considerably greater depth can be carried." Thus it appears that when the character of the islands in question is tested not only by the standards of physical geography but by the more exacting rules of strict law they are found to be such in the full

legal as well as geographical sense. No importance can be attached to the fact that the material composing the islands is alluvium, and that they were formed as a part of the same general geological process by which the mainland was formed. It can not be said that what the Fish Commission calls "a low-lying archipelago of irregular islands" is not such because its geological origin is the same as that of the mainland. Certainly from the standpoint of physical geography that position is entirely untenable. In the classification of land forms it is a fundamental principle with geographers to determine the character of an island solely by reference to its form, regardless of its geological origin. Such is the conclusion of the highest authority perhaps, on the subject. "From the geographical point of view land forms are best considered, in their larger aspects at least, from the point of view of form alone *without reference to their geological history.*" The International Geography, p. 62. When the matter is tested by legal standards it is difficult to understand how the geological origin of an island can be material, as the law deals with the form alone. For instance the archipelago of islands lying off the coast of Alaska represents, as the geologists tell us, the result of the disintegration of the mainland through glacial action. Will any one contend that that fact makes them any less islands in the geographical and legal sense of that term? But if the geological origin of the islands is to be taken into account the Court should certainly give due weight to the testimony of Complainant's witnesses, Stubbs and Harrod, both of whom admit that they were *formed as islands* in the waters of a shallow sea; that they were not cut off

from the mainland. Against the irresistible conclusion that the islands in question are such,—a conclusion supported by all the tests which the rules of law, of geography, of geology recognize,—the Court in its opinion has opposed this, *and only this:* "Certainly there are in the body of the Louisiana marches or St. Bernard peninsula portions of sea marsh which might technically be called islands, because they are land entirely surrounded by water, *but they are not true islands.* They are rather, as the Commissioner of the General Land Office wrote the Mississippi Land Commissioner in 1904, 'in fact, hummocks of land surrounded by the marsh and swamp in said township'" (p. 22). There is nothing to show that this Land Commissioner ever saw the region in question, and if his description of it was ever intended to apply to the "low-lying archipelago of irregular islands" surveyed and mapped by the Fish Commission, it is simply a caricature in conflict with all the evidence in the record. Contrast for instance his description of the soil with that given by *Complainant's witnesses*, Monier and Thiel, who swear that it stands "about a foot and a half to two feet" above the water, and that it is possible to drive a buggy on any part of the shore line at any season of the year. Then contrast his statement as to "hummocks of land *surrounded by the marsh and swamp*," with the uncontested fact, of which the Court has judicial knowledge, that the pieces of land in question are *surrounded by navigable tide water from 4 to 24 feet in depth.* But why should there be controversy as to the character of these islands when "Louisiana admits that there are some islands in the disputed area, *namely Grassy, Half Moon or Grand, Le Petit pass, an unnamed island and Isle à*

Pitre, all of which are between the deep-water channel on the north and the main coast line of the St. Bernard peninsula on the south; and contends *that these islands* were previously given to her, Louisiana, by the act of Congress creating her a State, April 6, 1812, nearly six years prior to Mississippi's creation as a State, and that her title thereto is better than that of the State of Mississippi." See Louisiana's original brief, making this admission, at p. 140. If Isle à Pitre and Petit Pass islands are such, *in the true legal sense*, as Complainant's counsel, with an intimate personal knowledge of them, declare them to be, we respectfully ask upon what basis can the Court declare that "they are not true islands." If the islands named are such, then the remainder are, as the proof is that they are all identical in character. Complainant's counsel admit and claim that Isle à Pitre, Petit Pass Island, Grassy Island and Grand Island *were regarded by Congress as true islands and conveyed as such to Louisiana.* We have demonstrated that they are true islands by every test which the law of the land recognizes. The conclusion of law thus involved in the character of the islands is the most vital question in Mississippi's case. We therefore respectfully invoke for her the right to have that vital question settled by the application of the only rules which the law of the land recognizes. Only in that way can she be guaranteed due process of law in the plainest sense of that term. We earnestly pray to be reheard on this branch of case.

There is, however, another reason more potent still why the Court should accept the fact that the islands in question are such in the legal sense. *They have been declared to be such by the Congress of the United States.* The rule is elementary

that "Statutes are to be interpreted so as to give effect to all the words therein. * * * It is not to be presumed that the legislature intended that any part of a statute should be *without its proper meaning, force or effect.*" Potter's Dwarris on Stat. and Const. p. 188, note 8. It is not to be presumed that Congress attempted to grant to Mississippi "all islands within six leagues of the shore to the most southern junction of Pearl River with Lake Borgne," *if there are no islands within that zone upon which the grant can operate.* The Court must find, if it can, a subject-matter upon which the grant can operate. The whole problem is solved, so far as a subject-matter is concerned, the moment the Court accepts the "low-lying archipelago of irregular islands" as such because they are in exactly the right place, almost exactly opposite the junction of Pearl River with Lake Borgne. That Congress regarded these islands as such and attempted to grant them as such to Mississippi has been frankly admitted by counsel for Complainant in their original brief, p. 65. In explaining the circumstances attending the drafting of the act of 1817 they say: "This calls attention to the error, if error it be, of Congress, and the oversight consists not 'in framing the respective acts' for the admission of the two States, but in the drafting of the Mississippi act, more than five years after the Louisiana act, and embracing in the Mississippi act, *islands which had already been granted to Louisiana.*" Here is a *second* admission that Congress regarded these islands as such, and attempted to grant them as such to Mississippi. Because that view is so plain the alternative prayer of the bill is that, in the event the mid-channel theory fails, the Court will confirm to Louisiana the islands

within three leagues of her eastern shore line. Her counsel correctly state that the only mistake made by Congress was in attempting to give to Mississippi islands which had been previously granted to Louisiana. *If that be true then Congress certainly dealt with the islands as such.* In that event the Court will hold that all such islands as are within nine miles of the eastern mainland coast of Louisiana passed to her under her prior grant, while the remainder east of that limit should pass to Mississippi as Congress intended. If the Court shall recognize the archipelago of islands as such there can be no difficulty as to what is the eastern mainland coast of Louisiana, because the Coast Survey expert, W. C. Hodgkins, one of Complainant's most trusted witnesses, has traced the eastern mainland coast line of Louisiana in substantial accord with the red line indicating the same on map No. 59 submitted with our original brief. We earnestly suggest that the highest principles of equity should prompt the Court to reach the conclusion just indicated, as the islands that would thus pass to Mississippi *are of the greatest value to her because they lie at her very threshold*, directly across her narrow sea front, while they *are comparatively valueless to Louisiana*, because so far removed from her centres of population as to be almost entirely severed from the main body of the State. In *Knowlton* v. *Moore*, 178 U. S. p. 77, this Court has said: "That, where a particular construction of a statute will occasion great inconvenience *or produce inequality and injustice*, that view is to be avoided if another and more reasonable interpretation is present in the statute." In *Handly* v. *Anthony*, 5 Wheat. 374, this Court speaking through Marshall, C. J., has said: "In great questions

which concern the boundaries of States, where great natural boundaries are established in general terms, *with a view to public convenience, and the avoidance of controversy*, we think *the great object*, where it can be distinctly perceived, ought not to be defeated by those technical perplexities which may sometimes influence contracts between individuals." Under that large enunciation the Court has the right and it is its duty to shape its judgment in such a case "with a view to public convenience and the avoidance of controversy," after it has ascertained "*the great object*" to be attained. Will any one deny that the great object to be attained was such a just and equitable distribution of the Gulf coast line between these States as would give to each a fair and convenient proportion of it? Can the Court lose sight of the fact that of that coast line Louisiana possesses about 623 statute miles while Mississippi possesses only about 71? And here we respectfully suggest that it is neither reasonable nor logical for the Court to assume that Congress had no intention of diminishing that inequality when it gave to Mississippi "all islands within *six* leagues of the shore to the most southern junction of Pearl River with Lake Borgne," instead of within *three* leagues. It can not be assumed that Congress spoke without thought, or that it did vain and meaningless things, or that it had no understanding as to future conditions. Why should the Court be inclined to believe that Congress intended in this case to grant to Louisiana islands lying across the sea front of Mississippi when the map of the Union, of which the Court has judicial knowledge, proves to it *that no such injustice has ever been done in the case of any other*

State? If the Court, in the light of these high considerations of equality which is equity, would recognize the "low-lying archipelago of irregular islands" to be what all modern cartographers declare them to be, and would then confirm all that lie within nine miles of the true mainland coast of Louisiana to that State and the remainder to Mississippi, it could erect upon the boundary ever to divide these States a monument to that kind of large-minded justice which ever imparts moral dignity to the exercise of supreme authority. Thus bitter strife would be hushed and a genuine and cordial understanding reestablished through such a construction of the acts of 1812 and 1817 as would give to each a subject-matter upon which all of their respective provisions could operate. Will not the possibility of attaining such a result induce the Court to rehear us, however briefly, *upon the particular questions indicated herein?*

We, the undersigned members of the bar of this Court, humbly conceive that by reason of the matters herein indicated, it is proper that this cause should be reheard by this Court if it shall see fit so to order, and they therefore respectfully certify accordingly.

HANNIS TAYLOR,
MONROE MCCLURG,
Of Counsel.

WILLIAM WILLIAMS,
Attorney-General of Mississippi.

OFFICE OF THE CLERK

Supreme Court of the United States.

OCTOBER TERM, 1905.

IN EQUITY.

No. 11 *Original.*

THE STATE OF LOUISIANA, *Complainant.*

v.

THE STATE OF MISSISSIPPI, *Defendant.*

Supplement to Petition for Rehearing.

We pray the Court to accept the following as a supplement to the Petition for Rehearing heretofore filed. In that petition we have cited the cases in which this Court has held, almost from its organization, that it is the exclusive province of the political department to define the national boundaries of the United States, and that the judiciary must accept the determination of the political department in that regard. As the right to determine what are and what are not territorial waters is an integral and necessary part of the right to define natural boundaries, the political department has from the beginning exercised the right to declare what are the territorial waters of the United States. We therefore respectfully

submit that this Court has no jurisdiction to determine, as an original question, whether or no Mississippi Sound is territorial water. The only real inquiry is this: Has it that character under the rules and definitions of the political department? We therefore beg leave to lay before the Court as a part of our petition the views on that subject of two distinguished jurists better qualified perhaps by experience than any other persons to declare what is the rule on this subject as recognized by the political department. We refer to the Hon. William L. Penfield, for so many years the trusted legal adviser of our Department of State, and General George B. Davis, the eminent writer upon international law, now a delegate to the Hague Conference, and the chief law adviser of the War Department, in which he holds the office of Judge-Advocate General. The following explains itself:

"WASHINGTON, D. C., *March* 31, 1906.

"Gen. GEORGE B. DAVIS,

"*Judge-Advocate General,*

"*Washington, D. C.*

"DEAR GENERAL: In the case of Louisiana against Mississippi, now pending in the Supreme Court of the United States, the defendant contends that the long indentation in the coast of the Gulf of Mexico known as Mississippi Sound is the open sea and not that kind of territorial water technically known in international law as 'an arm of the sea.' Familiar as you are with the rules by which the political department of the Government

determines the character of such territorial water, will you be good enough to say whether, under those rules as you understand them, Mississippi Sound is the open sea or that kind of territorial water generally known as an arm of the sea. Under the rule of the political department as you understand it, can the fact that certain islands, such as Cat Island, Ship Island and Horn Island are situated in the sea in front of the indentation known as Mississippi Sound, convert it into 'an enclosed arm of the sea.' Under the rule of the political department, where does the three mile zone run along the shore of what is known as Mississippi Sound?

"With great respect.

"Yours very truly,

"HANNIS TAYLOR,

"*Of Counsel for Mississippi.*"

"WAR DEPARTMENT,

"OFFICE OF THE JUDGE-ADVOCATE GENERAL,

"WASHINGTON, *March* 31, 1906.

"MY DEAR SIR: I beg to acknowledge the receipt of your favor of the 31st instant, in which you say that in the case of Louisiana *vs.* Mississippi, which is now in the Supreme Court of the United States, the defendant contends that the long indentation of the coast of the Gulf of Mexico, known as Mississippi Sound, is an open sea, and is not that kind of territorial water which is technically known in international law as 'an arm of the sea.'

"An expression of opinion is desired as to whether,

under the rules of international law as I understand them, Mississippi Sound is a part of the open sea, or that kind of territorial water which is generally known as an arm of the sea. In other words, can the fact that certain islands, such as Cat Island, Ship Island, and Horn Island, which are situated in the Gulf in front of the indentation known as Mississippi Sound, convert it into an enclosed arm of the sea?

"Mississippi Sound is a body of water lying between Mobile Bay to the east, and Lakes Borgne and Ponchartrain to the west. Mobile Bay and Lakes Borgne and Ponchartrain seem to be bodies of water falling clearly within the definition of arms of the sea, but I am not aware of any rule of international law under which the strip of water running east and west that lies between them can be regarded as, in any sense, an enclosed arm of the sea. It is not an enclosed, or nearly enclosed body of water like the Chesapeake, Delaware and Mobile Bays, or Lakes Borgne and Ponchartrain, but is clearly a portion of the large body of water known as the Gulf of Mexico, which constitutes a portion of the high seas.

"As the islands which you mention *lie considerably beyond a marine league in distance from the coast*, they could not, in my opinion, operate to so include the water lying between them and the mainland within the designation of an arm of the sea as that term is understood in international law.

"Under the rule established by the political departments of the Government, it is my opinion that the strip

of marginal sea extends along the shore of Mississippi Sound for a distance of three miles from the mainland; and I remain,

"Very respectfully,

"GEO. B. DAVIS,

"*Judge-Advocate General.*

"Hon. HANNIS TAYLOR,

"*Washington, D. C.*"

"I concur in the view of Gen. Davis on the facts stated.

"W. L. PENFIELD."

In the light of the foregoing we desire to call the attention of the court, with special emphasis, to the distances between the mainland coast of Mississippi and the four large islands—Cat Island, Ship Island, Horn Island and Petit Bois Island, the only islands lying in front of the indentation of the coast known as Mississippi Sound. The first is distant about nine miles, the second about twelve, the third and fourth, about nine. It thus appears that each is far beyond the three-mile zone which is appendant, as the jurists quoted above insist, *to the mainland coast*. We confidently insist that no island can be said to be adjacent or appendant to the coast when it is miles beyond the limits of the three-mile zone which fringes such coast. In the case of the Anna, 5 Robinson, Admiralty 373, there is nothing to indicate that the mud islands at the mouth of the Mississippi were outside of the three-mile limit. On the contrary the language of Lord Stowell clearly indicates that they *were within it*. He speaks of "little mud islands composed of earth and trees drifted down the river, *which form a kind of portico to the mainland*. * * * They are the natural *appendages of*

the coast on which they border, and from which, indeed, they are formed. Their elements are derived immediately from the territory and on the principle of alluvium and increment." In referring to this case Hall, p. 626, speaks of the "capture which took place *within the mouths of the Mississippi*." It is impossible to establish a parallel between these little mud islands, which were a part of the shore and formed out of it, and such large and distinct islands as Cat, Ship, Horn and Petit Bois, which stand out in the sea from nine to twelve miles from the shore. How can the court regard these islands, so far beyond the three mile zone, as "appendages of the coast."

It thus appears that these eminent and experienced jurists, practically familiar with the rules of the political department in this regard, concur with each other, and with the counsel for Louisiana in the conclusion "that Mississippi Sound and Lake Borgne are salt water bodies of water *and true parts of the sea or gulf*." In view of that fact and the further fact that this Court *has so far heard no argument whatever as to the contention that the rule on this subject as defined by the political department is binding upon the Court*, we pray that your honors will give us a hearing upon this, the most vital point in the case. We respectfully repeat the certificate of counsel annexed to the original petition.

WILLIAM WILLIAMS,
Attorney-General of Mississippi.

THE STATE OF LOUISIANA, COMPLAINANT,

v.

THE STATE OF MISSISSIPPI, DEFENDANT.

MOTION TO AMEND THE FINAL DECREE AS TO COSTS.

Comes now the defendant and shows to the court: That by the final decree made in this case, and dated April 23, 1906, it was decreed, among other things, "that the costs of this suit be borne by the State of Mississippi." The defendant now moves the Court that said provision in the final decree be so amended as to read "that the costs of this suit be borne equally by the complainant and defendant," for the following reasons:

First, because the bill shows upon its face that it was filed to carry out an agreement to prosecute a friendly suit in this Court for the settlement of the boundary in question. Such a proceeding was suggested by complainant to the defendant in the following language: "It is apparent that the only hope of settlement is a friendly

suit in the Supreme Court of the United States and we respectfully suggest this course.'' Record, p. 15.

The court in its opinion has recognized the fact that the suit is a friendly suit for the settlement of a boundary. See p. 14. As the suit has been thus prosecuted, as a friendly suit, for the equal benefit of both parties, we submit that the costs should be equally divided according to the general rule of the English Court of Chancery in boundary cases. See Daniell's Ch., Pl. and Pr., vol. II, p. 1165

Second, because it is the firmly settled rule of this Court that, in boundary cases between States, the costs are to be equally divided. See Iowa *v.* Missouri, 7 How., 661; Nebraska *v.* Iowa, 143 U. S., 359; Indiana *v.* Kentucky, 163 U. S., 520; Missouri *v.* Iowa, 165 U. S., 270; Tennessee *v.* Virginia, 190 U. S., 64. In Nebraska *v.* Iowa, this Court said: "The costs of this suit will be divided between the two States, because the matter involved is one of those governmental questions in which each party has a real and vital, and yet not a litigeous interest.''

Third, because the Court has decreed to complainant only a fractional portion of the relief prayed. The final decree denies to complainant an area of water territory, claimed many times larger than the land area unsuccessfully claimed by the defendant.

Respectfully submitted.

WILLIAM WILLIAMS,
Attorney-General of Mississippi.

HANNIS TAYLOR,

THE STATE OF LOUISIANA, COMPLAINANT.

v.

THE STATE OF MISSISSIPPI, DEFENDANT.

GENTLEMEN: Please take notice that the defendant in this case will, on the 14th day of May, 1906, at twelve o'clock, noon, on said day, at the opening of said court, or as soon thereafter as counsel can be heard, at the Supreme Court Room, in the city of Washington, District of Columbia, in open court, move this Court to amend the final decree rendered herein as will more particularly appear in the motion hereto annexed.

WILLIAM WILLIAMS,
Attorney-General of the State of Mississippi.

HANNIS TAYLOR,
MONROE MCCLURG,
Of Counsel.

To Walter Guion, Attorney General of the State of Louisiana, Baton Rouge; John Dymond, Jr., Francis C. Zacharie, New Orleans, La.

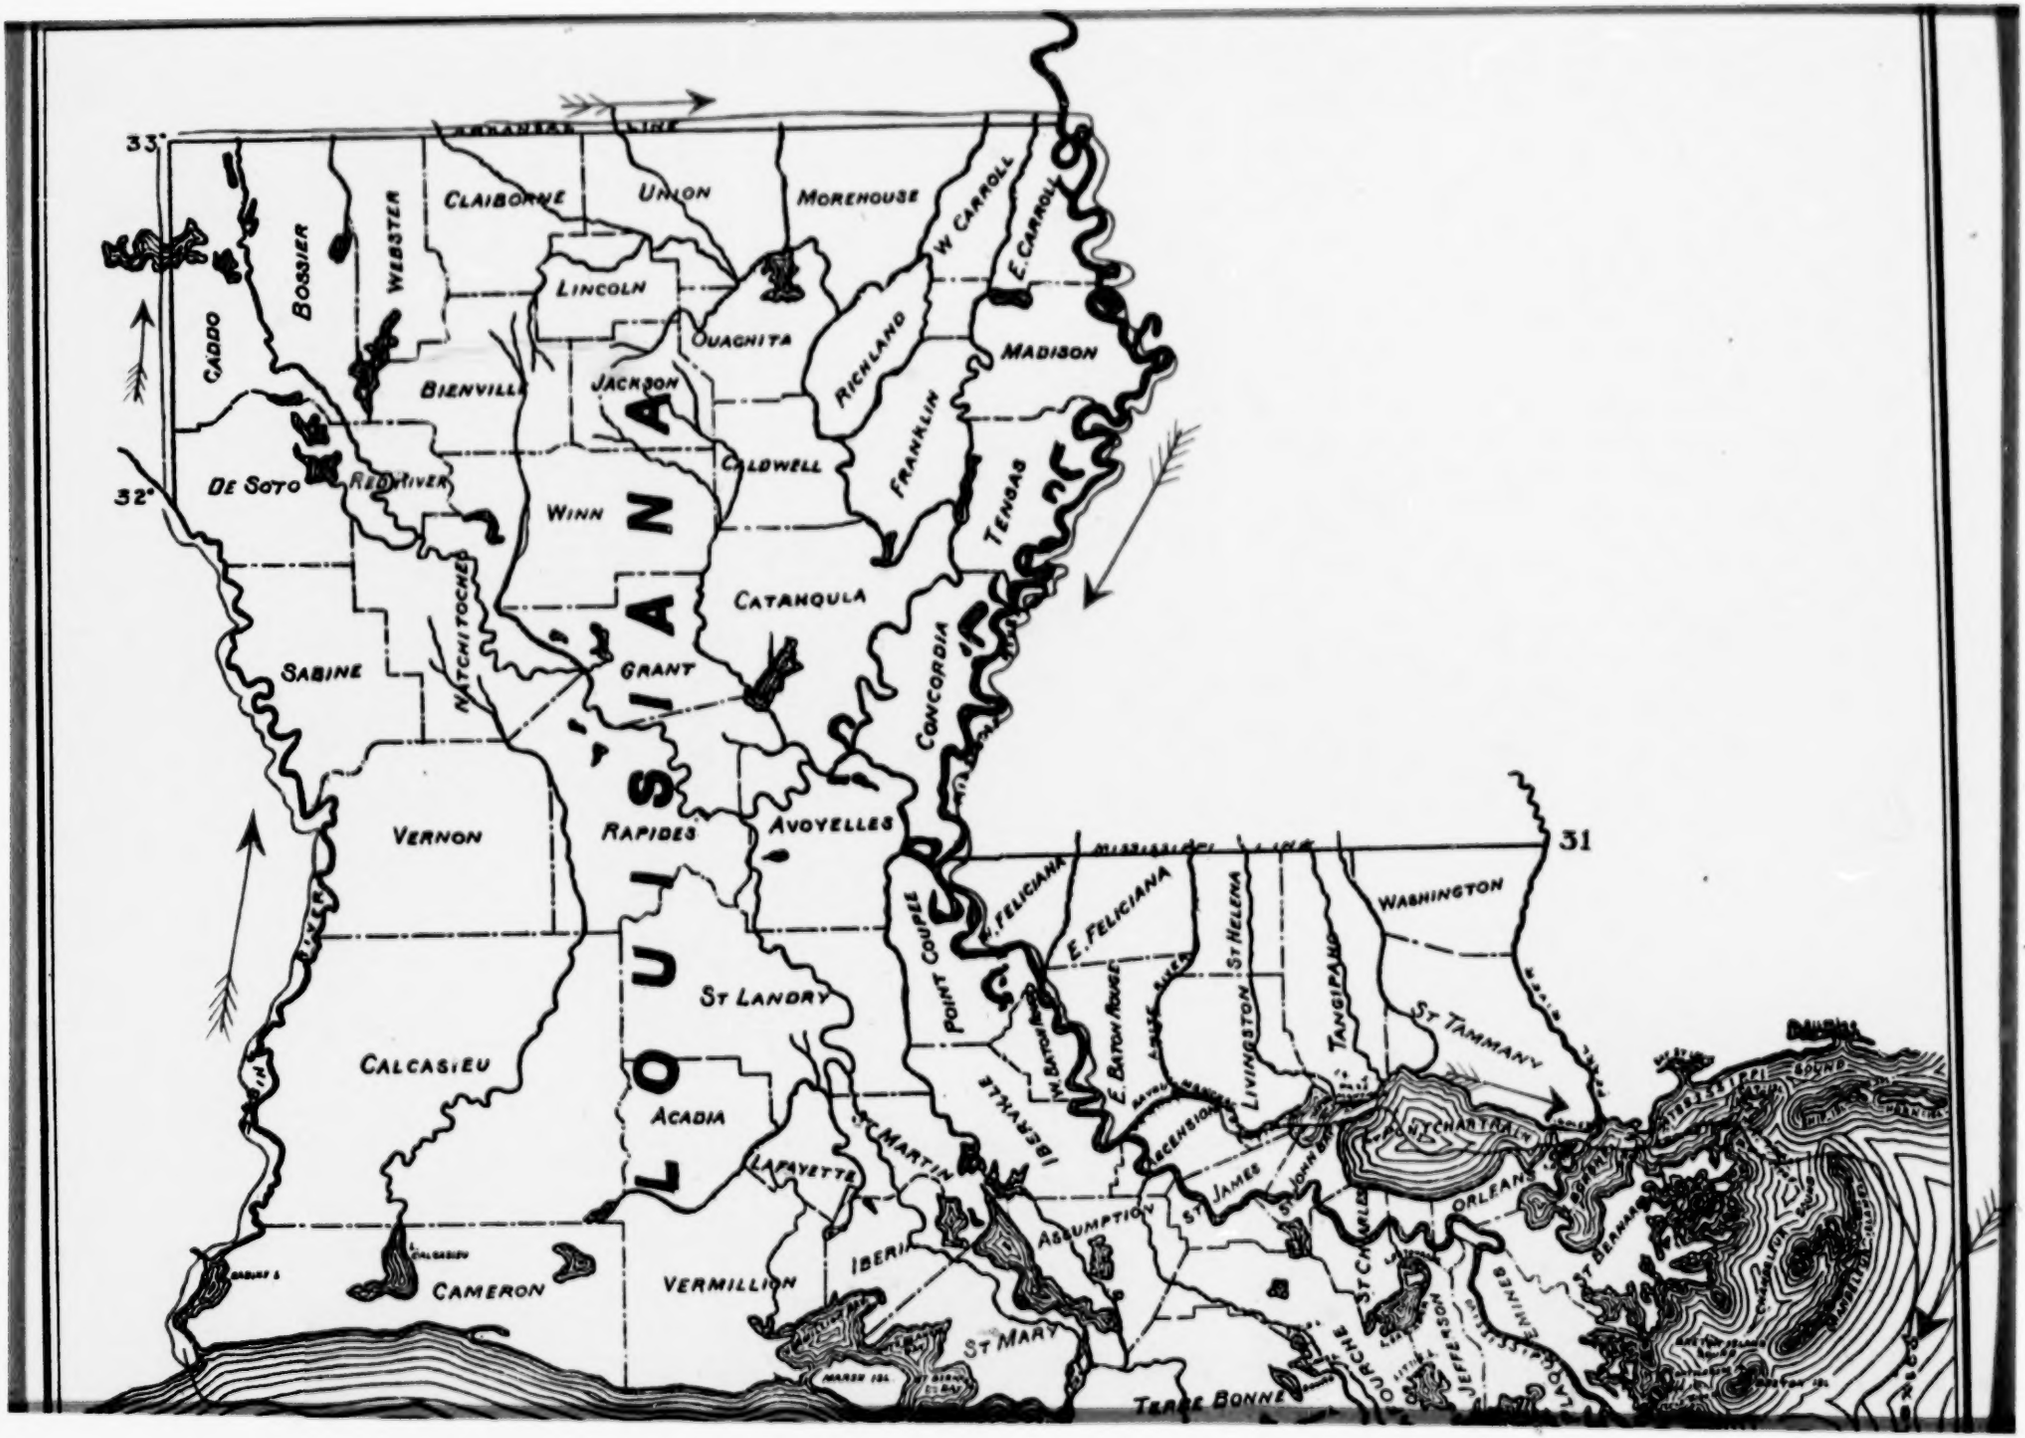
Supreme Court of the United States.

No. 11, Original.—October Term, 1905.

State of Louisiana, Complainant,
vs.
State of Mississippi. } In Equity.

[March 5, 1906.]

The State of Louisiana by leave of court filed her bill against the State of Mississippi, October 27, 1902, to obtain a decree determining a boundary line between the two States and requiring the State of Mississippi to recognize and observe the line so determined.



The bill alleged:

"1st. That the State of Louisiana was admitted into the Union of the United States of America by the act of Congress, found in chapter 50 of the United States Statutes at Large, volume 2, page 701, approved April 6th, 1812, and therein the boundaries of the said State of Louisiana, in the preamble of said act, were described as follows:—

'Whereas, the representatives of the people of all that part of the territory or country ceded under the name of Louisiana, by the treaty made at Paris on the 30th day of April, 1803, between the United States and France contained within the following limits, that is to say: Beginning at the mouth of the River Sabine, thence by a line drawn along the middle of said river, including all islands to the 32d degree of latitude; thence due north to the northernmost part of the 33d degree of north latitude; thence along the said parallel of latitude to the Mississippi River; thence down the said river to the River Iberville, and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the Gulf of Mexico; thence bounded by said gulf to the place of beginning, including all islands within three leagues of the coast,' etc.

"2nd. That according to the foregoing description, the eastern boundary of the State of Louisiana was formed by the Mississippi River, beginning at the northeast corner of said State and extending south to the junction of the said river, with the River Iberville (now known as Bayou Manchac) and thence extending eastwardly through the lower end of the Amite River, through the middle of Lake Maurepas, Pass Manchac, and Lake Pontchartrain, and in order to reach the Gulf of Mexico its only course was through the Rigolets, into Lake Borgne, and thence by the deep water channel through the upper corner of Lake Borgne, following said channel, north of Half Moon Island, through Mississippi Sound to to the north of Isle à Pitre, through the Cat Island channel, southwest of Cat Island, into the Gulf of Mexico, which said eastern boundary of the State of Louisiana is more fully shown on diagram No. 1, made part of this bill;

DIAGRAM NO. 1.

"3rd. That by the act of Congress, found in the United States Statutes at Large, vol. 2, p. 708, chapter 57, approved April 14th, 1812, additional territory was added to the then existing State of Louisiana, which additional territory was described in the following language:—

'Beginning at the junction of the River Iberville with the Mississippi River; thence along the middle of the Iberville and of the River Amite and Lakes Maurepas and Pontchartrain to the eastern mouth of Pearl River; thence up the eastern branch of the Pearl River to the 31st degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said river to the place of beginning, shall become and form a part of the State of Louisiana;'

"4th. That the effect of this legislation, as to the eastern boundary of the State of Louisiana, was to retain the Mississippi River as the original eastern boundary, as far south as the 31st degree of north latitude. The change then moved the eastern boundary eastward along the 31st degree of north latitude to the Pearl River, whence it then ran south down the said river, through its eastern branch, till it entered the northern corner of Lake Borgne, where the State's eastern boundary then joined and followed the boundary line originally fixed in the act of April 6th, 1812, and followed, as heretofore stated, the deep water channel through the upper corner of Lake Borgne, north of Half Moon Island, eastward through the deep water channel along the Mississippi Sound till it reached the Cat Island channel north of Isle à Pitre, and southwest of Cat Island, whence passing through Chandeleur Sound, northeast of Chandeleur Islands, it entered the Gulf of Mexico, and ran south around the delta of the Mississippi River and then north and westward to the point where the Sabine River enters the Gulf of Mexico, as will be more fully seen from the diagram No. 2, made part of this bill;

DIAGRAM NO. 2.

"5th. That the territory lying adjacent to, and to the eastward of the State of Louisiana is the State of Mississippi, which latter State was admitted into the Union of the United States of America by the act of Congress, found in the United States Statutes at Large, volume 3, chapter 23, page 348, approved March 1st, 1817, whereby the inhabitants of the western part of the then Mississippi Territory were authorized to form for themselves a State constitution and to be admitted into the Union, the boundaries of the then to be created State being described as follows:—

'Beginning at the River Mississippi at a point where the southern boundary line with the State of Tennessee strikes the same; thence along the said boundary line to the Tennessee River; thence up the same to the mouth of Bear Creek; thence by a direct line to the northwest corner of the county of Washington (Alabama); thence due south to the Gulf of Mexico; thence westwardly, including all islands within six leagues of the shore to the most southern junction of Pearl River with Lake Borgne; thence up said river to the 31st degree of north latitude; thence west along said degree of latitude to the Mississippi River; thence up the same to the beginning;'

"6th. That by the said act, Congress intended that the southern boundary line of the State of Mississippi, beginning at the point dividing it from the State of Alabama, should run westwardly till it joined the Louisiana eastern boundary line, and that in doing so, the said southern boundary would in effect start westward from a point eighteen miles south of the coast line, and include in its westwardly direction the western end of Petit Bois Island, all of Horn Island, Ship Island and Cat Island, and the smaller islands north of these, those islands being the ones contemplated in the act of Congress, as being within eighteen miles of the southern coast line of Mississippi, and that the said southern boundary of Mississippi, extending in its westwardly direction through the Gulf of Mexico, would gradually approach the coast line, and meet the eastern boundary line of Louisiana, just as the said eastern boundary line of Louisiana emerges from the Cat Island channel into the Gulf of Mexico, and thence follow and become the same as the Louisiana boundary line extending westwardly to the south of Cat Island, through Mississippi Sound to the north of Half Moon or Grand Island to the most southern junction of the east branch of Pearl River with Lake Borgne, being identical with the Louisiana eastern boundary, and thence extending up the channel of Pearl River;

"7th. That the islands included between the shore line and the southern boundary of the State of Mississippi are the islands heretofore described, viz: the western end of Petit Bois Island, with all of Horn Island, Ship Island and Cat Island, and the small islands north of them, those islands being large, and well known to Congress at the time of the passage of the act, all of which islands and the southern boundary of the State of Mississippi will more fully appear from the diagram No. 3, made a part of this bill;

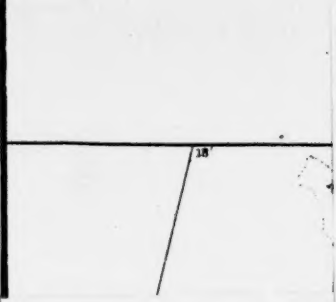
DIAGRAM NO. 3.

"8th. That the islands contemplated in the act of Congress of 1812, creating the State of Louisiana, and intended to be embraced within the State of Louisiana, as provided by the clause, 'Thence bounded by the said Gulf to the place of beginning, including all islands within three leagues of the coast,' were all of the other islands, except those heretofore named as going to the State of Mississippi, as all other islands, and all other mainland, are south and west of the boundary line thus passing from Pearl River through the deep water channels in Lake Borgne, and Mississippi Sound, through the deep water channel, southwest of Cat Island to the eastward of the Chandeleur Islands, and thence south, taking in the delta of the Mississippi River, and extending westward along the Gulf coast, including all islands along the coast, to the Sabine River, where the State of Louisiana is thence bounded on the westward by the State of Texas, all of which will more fully appear from diagram No. 2, heretofore referred to;

"9th. Now your orator avers that there has developed in recent years in the waters south of the State of Mississippi and east of the southern portion of the State of Louisiana a considerable growth of oysters, and an industry of large proportions, in the handling of the said bivalves, either in their fresh or in a canned condition, has resulted therefrom;



"10th. That the State of Mississippi has, by legislative enactments, regulated the oyster industry in the waters of said State, and permits the dredging of oysters on the natural oyster reefs in waters of the said State, as will more fully appear from the statutes of said State to which reference is made;

"11th. That the State of Lousiana has by legislative enactments regulated the oyster industry in the said State of Louisiana, and prohibits the dredging of oysters on the natural reefs in the waters of said State, as will more fully appear from the statutes of said State to which reference is made;

"12th. That the provisions of the laws of the said two States differ considerably in many other respects.

"13th. That the existence and location of the natural oyster reefs in the waters of the parish of St. Bernard in the State of Louisiana which adjoins the State of Mississippi is shown by the map made from a reconnaissance by the United States Fish Commission steamer 'Fish Hawk,' in February, 1898, as will more fully appear from diagram No. 4, now made part of this bill;

[Diagram No. 4.]

FOLD OUT IS TOO LARGE TO BE FILMED

"14th. N
States in th
gress creati
the diagran
the acts of
which diag

1. Now your orator avers that the boundary line dividing the two
the waters thereof has been clearly defined by the acts of Con-
eating the States of Louisiana and Mississippi, as will be seen from
ram No. 5, made up from the boundary descriptions taken from
of Congress creating the said States of Louisiana and Mississippi,
iagram is also made part of this bill;

[Diagram No. 5.]

"15th. That the said boundary line in the waters between said States has never been designated by buoys or marks of any kind by either State, nor designated in any manner, except by the United States Government in so far as it has buoyed the deep water channel, extending from the mouth of the Pearl River through the upper corner of Lake Borgne north of Half Moon Island, eastward to the Cat Island Pass, north of Isle à Pitre, and southwest of Cat Island, which buoys were placed by the Coast Survey of the United States Government;

"16th. That owing to the differences in the laws of the States of Louisiana and Mississippi, regulating the oyster industry of the respective States, the said statutes providing penalties for the violation thereof, much confusion has resulted and a great public demand has arisen in Louisiana to definitely mark the boundary line dividing the two States in the waters thereof; that citizens of the State of Mississippi, in violation of the laws of the State of Louisiana, have been fishing oysters with dredges on the natural reefs in the waters of the State of Louisiana, said fishermen claiming that they were in the waters of the State of Mississippi and consequently not violating the laws of the State of Louisiana."

The bill then set forth that "to avoid an armed conflict between the sheriff and officers of the Parish of St. Bernard in the State of Louisiana, and the sheriff and officers of the county of Harrison in the State of Mississippi," a meeting of citizens of Louisiana was called by the Governor of that State, which met in New Orleans, and resulted in the appointment by the Governor of commissioners on the part of Louisiana "to consider the determination of the water boundary line between the two States, and arrange for its easy location and identification by a proper system of buoys," and the request that the Governor of Mississippi appoint like commissioners on the part of that State, which appointment was made.

The joint commission met and considered the subject, and subsequently the Mississippi commission reported its inability to agree with the Louisiana commission, stating, among other things, "It is apparent that the only hope of settlement is a friendly suit in the Supreme Court of the United States, and we respectfully suggest that course."

The bill continued:

"24th. That the eastern water boundary line as claimed by your orator, viz: a line beginning at the most southern junction of the channel of the east branch of the Pearl River with Lake Borgne and thence eastward following the deep water channel to the north of Half Moon Island, through the Mississippi Sound channel, to Cat Island pass, northeast of Isle à Pitre into the Gulf of Mexico, thereby dividing the waters between the two States, agrees, and is in accord, with the acts of Congress creating respectively the State of Louisiana and the State of Mississippi as already shown by diagram No. 5; that any other boundary than the deep water channel as aforesaid would cause the limits of the two States to conflict and overlap, and that it is not to be presumed that the Congress of the United States intended to, or would establish, in its description, a boundary for the State of Mississippi, conflicting with the already existing Louisiana eastern boundary, when there is a construction of the wording of the

two acts, in fact the only construction that suggests itself, that shows a boundary readily ascertained, harmonizing with the words of the acts as they now read, and clearly defining the limits of the two States in the waters between them.

"25th. Your orator further avers that the use of the word 'westwardly' in the description of the southern boundary of the State of Mississippi, as that southern boundary line extends westwardly from the Alabama State line to the Louisiana eastern boundary line, shows that it was not the intention of Congress to have it run direct or due west throughout the whole course, and that it was evidently the intention of Congress, in giving to the State of Mississippi the islands north of that westwardly drawn line, that the eighteen-mile limit shall gradually decrease as it approached the Louisiana line on the east till it met and followed it to its source. If the Mississippi line ran parallel to the southern coast of Mississippi, at a distance of eighteen miles from such coast line following the meander of the coast, and thence joined at right angles a line emerging from the mouth of Pearl River, such line would not only include Grassy, Half Moon, Round, Le Petit Pass Islands and Isle à Pitre, already belonging to Louisiana as being within nine miles or three leagues of the Louisiana shore line, but such line would also include part of the mainland of the State of Louisiana as will be seen from the following diagram (No. 6) made a part of this bill and it certainly could not have been the intention of Congress to take away from the State of Louisiana any islands or mainland already belonging to it and to give them to the State of Mississippi, as such a proceeding, without the consent of the legislature of the State of Louisiana, would be a violation of sec. 3 of art. IV of the Constitution of the United States.

"26th. Your orator avers that the marsh lands claimed by the State of Mississippi to be islands are in truth, with the exception of the Isle à Pitre, Grassy, Half Moon, Round and Le Petit Pass Islands, low lying marsh lands forming part of the mainland of the State of Louisiana; that said swamp or marsh lands and islands have been known as and called since time immemorial 'the Louisiana marshes;' that they were approved to the State of Louisiana by the Commissioner of the General Land Office on May 6, 1852, as will appear from a certified copy of said record of approval from the United States Land Office made a part of this bill, marked Exhibit (G,) and where not since sold by the State of Louisiana to private purchasers have always stood on the books of the register of the Louisiana State land office as State lands, to be offered for sale, until recently transferred by the State of Louisiana to the board of commissioners for the Lake Borgne basin levee district by the provisions of act No. 14 of the legislature of the State of Louisiana for the year 1892, for the purpose of enabling the said levee board, by the proceeds of sale of said lands to secure the funds to aid in the building of levees in that levee district, to protect the lands from overflow.

"27th. That parts of said disputed territory claimed by the State of Mississippi to be islands within eighteen miles of its shore line are in fact part of the mainland of the State of Louisiana, and therefore belong to and form part of said State of Louisiana, but if your honors should feel that any part of this disputed area was islands by reason of the presence of shallow water, then as islands they are within the nine mile limit of distance from the shore line of the State of Louisiana and therefore belong to

and form part of the State of Louisiana by that second provision of the act of Congress giving Louisiana all islands within three leagues of its shore line.

"28th. Your orator further avers that where contiguous States or countries are separated by water it is, and always has been, the custom to regard the channel as establishing the boundary line of such States, and that the State of Mississippi has itself recognized this principle in the description of its territorial limits as found in the second article of its own constitution adopted November, 1890, in the following words:

* * * * * *

"29th. Your orator avers that as heretofore stated the Congress of the United States, as well as the various departments of the United States Government having authority in the premises, have themselves recognized the boundary line contended for by the State of Louisiana by reason of the fact that the United States Government has confirmed to the State of Louisiana the lands composing Half Moon Island which is just south of the deep water channel," [by sections and townships as set forth,] and also "the lands forming what is commonly known as Isle à Pitre," [by sections and townships as stated,] all of them "recognized as belonging to and forming part of the State of Louisiana by the said United States Government and have always heretofore been so recognized by the people of the said two States; that the lands forming the Isle à Pitre were sold by the State of Louisiana," &c., &c.; "and said lands have been assessed on the assessment rolls of the parish of St. Bernard, State of Louisiana, and taxes thereon have been paid to the State of Louisiana for the past 35 years, and said lands have never been assessed on the rolls of, nor have any taxes ever been paid to, the State of Mississippi and that this is the case with all other lands and islands now claimed by the State of Mississippi, but which in truth and fact belong to the State of Louisiana."

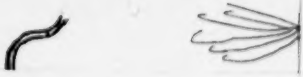
"30th. Your orator therefore further avers that all constituted authorities competent to create, adopt or consider the said boundary line have declared the water boundary line claimed by the State of Louisiana, viz: the deep water channel running from the most southern junction of the eastern mouth of Pearl River, through Lake Borgne, north of Half Moon Island, through Mississippi Sound, north of Isle à Pitre and southwest of Cat Island, through Cat Island pass, through Chandeleur Sound northeast of Chandeleur Islands, to the Gulf of Mexico, to be the true water boundary between the said States."

The bill prayed that it be adjudged and decreed "that the boundary line dividing the States of Louisiana and Mississippi, in the waters between the said States to the south of the State of Mississippi and to the southeast of the State of Louisiana is the deep-water channel, commencing at the most southern junction of the eastern mouth of Pearl River with Lake Borgne, thence by the deep-water channel through Lake Borgne, north of Half Moon Island, through Mississippi Sound, north of Isle à Pitre, through Cat Island Pass Channel, southwest of Cat Island, through Chandeleur Island Sound, northeast of the Chandeleur Islands, to the Gulf of Mexico, as is delineated on the original map submitted by the Louisiana Boundary Commission to the Mississippi Boundary Com-

mission and now made part of this bill, marked Exhibit 'E;' that the said deep-water channel be located throughout its course and permanently buoyed at the joint expense of the two States; that the State of Mississippi and its citizens be perpetually enjoined from disputing the sovereignty and ownership of the State of Louisiana in the said land and water territory south and west of said boundary line," and for costs and general relief.

[Exhibit "E" is not reproduced in the printed record, but is to be found in the Louisiana Atlas of Maps, p. 60. It consists of Coast Survey Charts Nos. 189, 190 and 191, showing the coast from Mobile to Lakes Borgne and Pontchartrain, with boundary lines added in red ink. The maps given in this statement are sufficient to supply the lack of this particular exhibit.]

The State of Mississippi, by leave, filed a demurrer to the bill, which was by stipulation submitted to the consideration of the court on printed arguments, and was subsequently overruled.



Thereupon the State of Mississippi on leave filed her answer and cross bill.

The State denied articulately nearly every material allegation of the bill and therefore the accuracy of the diagrams or maps attached thereto, and asserted the true boundary to be as set forth in her cross bill. And while she admitted "that the deep water channel out of the mouth of Pearl River through the upper course of Lake Borgne and on into the Gulf, as stated in the bill, has been marked by buoys by and under the direction of the United States Government for navigation and commercial purposes," she denied "that said marking of the deep water channel was ever intended to fix in any manner whatsoever any part of the boundary line between said States," and further denied "the correctness of complainant's statement that where contiguous States or countries are separated by water, the channel of the waters dividing said States constitutes a boundary line, and defendant specifically denies that such rule is applicable to this case."

The cross bill averred that the southern boundary line of the State of Mississippi was fixed by the act of Congress, approved March 1, 1817, 3 Stat. 348, c. 23, § 2.

That by that act Mississippi was given "all lands under the waters south of her well-defined shore line to the distance of six leagues from said shore at every point between the Alabama line and the most eastern junction of Pearl River with Lake Borgne, including all islands within said limit," and "all territory within said limits, not being a part of the mainland of the State of Louisiana, became, was and is a part of the territory of the State of Mississippi."

That the acts of 1812, creating the State of Louisiana, failed "to describe the water line from the most eastern mouth of Pearl River to the

FOLD OUT IS TOO LARGE TO BE FILMED

[illegible] of the matters herein set forth and because said islands and terri-

Gulf of Mexico," and hence Louisiana proposed, "without authority in law to follow the deep water channel from the mouth of Pearl River to the Gulf of Mexico, that is, as far south as that point in the sea where the waters of Chandeleur Sound merge into the waters of the Gulf of Mexico."

That the act creating the State of Mississippi was the organization of a State government in the western part of Mississippi Territory; that the southern part of the territory of Mississippi was added thereto by an act of Congress approved May 14, 1812, which provided: "That all that portion of territory lying east of Pearl River, west of the Perdido, and south of the thirty-first degree of latitude, be, and the same is hereby annexed to the Mississippi Territory; to be governed by the laws now in force therein, or which may be hereafter enacted, and the law and ordinances of the United States, relative thereto, in like manner as if the same had originally formed a part of said Territory; and until otherwise provided by law, the inhabitants of the said district hereby annexed to the Mississippi Territory, shall be entitled to one representative in the General Assembly thereof." 2 Stat. 734.

That this act and the act admitting the State of Mississippi "recognized the fact that the boundary line of the State of Louisiana embraced no island in the waters to the east of said State and to the south of the Mississippi mainland, or shore, and within six leagues of the Mississippi shore; that the said Louisiana acts are not in conflict with the aforesaid Mississippi acts, the boundaries of Louisiana only embracing such islands, as clearly shown by said acts creating and admitting her, as were within the Gulf of Mexico and also within three leagues of her gulf coast, that is to say, within the Gulf of Mexico proper and to the south of said State of Louisiana as contemplated by Congress; that the said line from the mouth of Pearl River to the Gulf of Mexico dividing the Territory of Mississippi from the State of Louisiana was never defined until the passage of the act creating the State of Mississippi, when, for the first time, the southern boundary of the Mississippi Territory, the western part of which was, by said act, made the State of Mississippi, was accurately defined and established as herein stated; that the line above described and defined by the said Mississippi acts, includes no islands which are within three leagues of the Louisiana mainland and also in the Gulf of Mexico as the limits of the Gulf of Mexico are defined by the said State in her original bill herein."

That the State of Louisiana "claims title and sovereignty over some of the islands belonging to the State of Mississippi by virtue of certain alleged action of certain officers of the United States Government and local officers of the State of Louisiana," but the claim "is not well founded because of the matters herein set forth and because said islands and terri-

tory have not been susceptible to actual use and occupation and because said claim is in violation of sec. 3, art. IV, of the Constitution of the United States . . ." But if the court should adjudge said islands and territory approved by the aforesaid officials to the State of Louisiana to belong to said State, then Cross-Complainant prayed that the claim of title of Louisiana thereto "be restricted to the real lands or islands so lost to the State of Mississippi, and be in no case permitted to affect any lands under the waters, or any of the public oyster reefs thereunder."

It was then alleged that Mississippi had "exercised sovereignty and jurisdiction over said waters within eighteen miles of her shore aforesaid," and that by her statutes as codified in 1857 had asserted such jurisdiction. And that by the legislation of Congress and the State, the "'Mississippi Sound' was recognized as a body of water, six leagues wide, wholly within the State of Mississippi, from Lake Borgne to the Alabama line, separate and distinct from 'the Gulf of Mexico.'"

The cross bill further averred that Congress "in the early history of the Republic, in dealing with the Gulf coast or shore," was not perfectly familiar with the line, and by several acts "creating the Gulf States, respectively, treated the said Gulf coast or shore as a line running generally from east to west," and said States were, in the contemplation of Congress, "so formed and bounded as to give to each State jurisdiction over the waters adjacent to its shore or coast for a certain specified distance southward from its mainland line; that it was not intended to give to any State jurisdiction over waters adjacent to and immediately south and in front of any other State or Territory." But that the deep water channel line contended for by Louisiana would take nearly all of the Hancock County water front, much of that of Harrison County, and possibly some of that of Jackson County, over all which Mississippi had exercised jurisdiction since her admission.

Reference was then made to the organization of Hancock and Jackson Counties in December, 1812, and of Harrison County in 1841; and to certain sections of the Revised Code of Mississippi of 1880 and a codification of 1892, making a general reference to islands within six leagues of the Mississippi shore; and it was charged that during all this time the government of the Mississippi Territory and that of the State of Mississippi had exercised full and complete jurisdiction and sovereignty over the waters in the "Mississippi Sound" as a part of the three counties aforesaid.

The prayer was that it be decreed "that the boundary line dividing the States of Mississippi and Louisiana is the line which, beginning at a point six leagues due south of that point on the shore where the Alabama and Mississippi line enters the Gulf of Mexico, runs westwardly with the meanderings of the shore six leagues always therefrom until said line

ches and touches the real mainland of Louisiana about two miles d[illegible]
t of the 'Indian mound' and 'Lake of the Mound,' and thence in an
ost due northward direction along and on the high tide mark of the
Louisiana mainland to Mississippi Sound at or near Nine Mile Bayou,
thence further along said mainland at the high tide mark westwardly
hat point due south of the middle of the most southern, or eastern
ction of Pearl River with Lake Borgne, and thence from said point
north to the said Pearl River; that the said line be located and per-
nently buoyed at the joint expense of the two States; that the full title
sovereignty over all the islands and the land under the waters north
east of the said line so established be decreed and adjudged to be in
State of Mississippi, and that the State of Louisiana and her citizens
erpetually enjoined from disputing such title and sovereignty of the
e of Mississippi therein," and for costs and general relief.

The following "Exhibit Map" was attached:

[Map.]

FOLD OUT IS TOO LARGE TO BE FILMED

The State of Louisiana filed replication, and also an answer to the cross bill, the allegations of which were in substance denied.

As to the act of May 14, 1812, the State said that it could not and did not change the boundaries of Louisiana, and, that, in fact, the southern portion of the Mississippi Territory as claimed was not then in possession of the United States, and did not extend south of the thirty-first degree of north latitude; that February 12, 1813, an act was passed "authorizing the President of the United States to take possession of a tract of country lying south of the Mississippi Territory and west of the river Perdido," but that this was not published until 1818; nor were the resolution of January 15 and act of March 3, 1811, on the relations of the United States to Spain, published until after April 20, 1818. 3 Stat. 471.

The cause being at issue, much evidence, documentary and otherwise, was taken, and the case was argued October 10, 11 and 12.

Mr. Chief Justice FULLER delivered the opinion of the Court:

The demurrer was overruled because the court was of opinion that the bill presented a *prima facie* case of justiciable controversy between the State of Louisiana and the State of Mississippi as to the boundary line between them, and we are clear that the proofs establish the existence of such a controversy as to fully sustain our jurisdiction.

It is apparent that the enforcement of the oyster legislation of the two States led to a conflict between the authorities of both, which involved a dispute as to the true boundary line.

In 1886 the State of Louisiana passed an act vesting the power to control the oyster industry in the hands of the officials of the parishes of the State in their several localities, along general lines laid down in the law. Laws La. 1886, Act No. 106. This was followed by the acts of 1892 (No. 110), 1896 (No. 121), and 1900 (No. 159). By the act of 1896 non-resident oyster fishermen were prohibited from fishing oysters in Louisiana waters, and the dredging of oysters was also prohibited, in this particular differing from the laws of Mississippi, which permitted it. By a concurrent resolution of 1900 a Legislative Commission was created to investigate and report on the oyster industry of the State.

In January, 1898, the parochial authorities of the Parish of St. Bernard equipped and sent out an official expedition to exclude from the oyster waters of the parish any non-resident oyster fishermen who might be found fishing therein. Non-resident Mississippi oystermen were found fishing oysters there, and they were notified that they must stop fishing and move out of those waters. These Mississippians then complained to the Mississippi authorities and a conference ensued between representatives of the Parish of St. Bernard and the county of Hancock. In January, 1901, at the instance of the

Louisiana Legislative Commission appointed under the act of 1900, and of committees appointed from the police juries of the Louisiana parishes of St. Bernard and Plaquemines, a meeting of the State officials of Louisiana was held in New Orleans to consider the subject of the dispute with the State of Mississippi, and the invasion by non-residents of the Louisiana oyster waters. This meeting resulted in the appointment by the Governor of Louisiana of a commission of five members, and an official communication from the Governor of Louisiana addressed to the Governor of Mississippi requesting the latter to appoint a similar commission to see if it were possible to effect an amicable settlement of the dispute between the two States. This Mississippi commission was accordingly appointed, and the two commissions held a joint conference in New Orleans in March, 1901. Louisiana presented at the conference a map showing the Louisiana contention as to the boundary, which is the map attached to the bill and marked Exhibit E. The Mississippi commission reported that it was impossible to effect an amicable extrajudicial settlement of the dispute, and that the only hope of settlement was a friendly suit in the Supreme Court of the United States. This report was submitted by the Mississippi commission to the Governor of Mississippi and was transmitted to the legislature of that State. At this session the State of Mississippi passed a new law controlling her oyster waters and oyster industry. (Laws 1902, c. 58.) This act created a State oyster commission, vested with entire control of the Mississippi oyster industry. It took the control of the industry out of the hands of the coast county authorities and centralized it in this State department, which was authorized to establish a system of patrol of the Mississippi oyster waters and to maintain patrol boats to sustain the oyster laws in her territory. In July, 1902, the State of Louisiana followed the example of the State of Mississippi and adopted an act, (Acts 1902, No. 153,) creating a State oyster commission of Louisiana as a State department vested with full control of the oyster industry of Louisiana, and authorized to establish patrol boats and maintain an armed patrol on the Louisiana oyster waters to protect her rights in the oyster industry therein. In view of the danger of an armed conflict, the Oyster Commissions of both States, in September, 1902, adopted a joint resolution establishing a neutral territory between the two States "pending the final decision by the Supreme Court of the United States in the boundary suit to be instituted," to remain a common fishing ground. This *modus vivendi* did not include all of the disputed territory, but the waters of Mississippi Sound between the deep water channel and the north shore line of the Louisiana marshes were embraced by it.

In the following October this bill was filed. Louisiana appeared through her Governor and her Attorney-General, and the action of the Governor

in instituting the suit was subsequently approved, ratified and confirmed by the legislature.

The facts that the act of Congress admitting the State of Louisiana gave that State all islands within three leagues or nine miles of her coast, and that the subsequent act of Congress admitting the State of Mississippi purported to give that State all islands within six leagues or eighteen miles of her shore, and that some islands within nine miles of the Louisiana coast were also within eighteen miles of the Mississippi shore, furnished the basis for a boundary controversy, although, in our judgment, the apparent inconsistency is reconcilable, as hereinafter explained. And that controversy involved to each State pecuniary values of magnitude, as is shown by the evidence on both sides. We think that there existed between the two States, in their sovereign capacity as States, a controversy affecting the boundary line separating them in the locality in question of a character to justify the exercise of our original jurisdiction within the rules laid down in *Missouri* v. *Illinois*, *ante*, p. ; Id. 180 U. S. 208; *Pennsylvania* v. *Wheeling Bridge Company*, 13 How. 589; *Louisiana* v. *Texas*, 176 U. S. 1; *Kansas* v. *Colorado*, 185 U. S. 25.

2. The State of Louisiana was admitted into the Union by the act of Congress approved April 6, 1812, (2 Stat. 701, c. 50,) which commenced as follows:

"*Whereas*, the representatives of the people of all that part of the territory or country ceded under the name of 'Louisiana' by the treaty at Paris on the thirtieth day of April, one thousand eight hundred and three, between the United States and France, contained within the following limits, that is to say: Beginning at the mouth of the River Sabine; thence by a line drawn along the middle of said river, including all islands, to the thirty-second degree of latitude; thence due north to the northernmost part of the thirty-third degree of north latitude; thence along said parallel of latitude to the River Mississippi; thence down the said river to the River Iberville; and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the Gulf of Mexico; thence bounded by the said Gulf to the place of beginning, including all islands within three leagues of the coast; . . ."

Map or diagram No 1, given in the opening statement, shows the limits as thus defined.

By an act of Congress approved April 14, 1812, (2 Stat. 708, c. 57,) additional territory was added to the State of Louisiana, described thus:

"All that tract of country comprehended within the following bounds, to wit: Beginning at the junction of the Iberville with the River Mississippi; thence along the middle of the Iberville, the Amite River and the Lakes Maurepas and Pontchartrain to the eastern mouth of Pearl River; thence up the said eastern branch of Pearl River to the thirty-first degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said river to the place of beginning, shall become and form part of the said State of Louisiana, and be subject to the

constitution and laws thereof in the same manner and for all intents and purposes, as if it had been included within the original boundaries of the said State."

This added territory is shown on map or diagram No. 2. The eastern boundary of Louisiana was thereby moved eastward from the Mississippi to Pearl River, and Louisiana was given the country south of the thirty-first degree of north latitude, and north of the boundary formed by the River Iberville, the middle of Lakes Maurepas and Pontchartrain and the Rigolets.

The River Iberville is called on this map Bayou Manchac, and is still known by that name. The Rigolets is a gut connecting the waters of Lakes Pontchartrain and Borgne, both of which are bodies of salt water and were originally arms of the sea. In order to reach the open waters of the Gulf of Mexico from the middle of Lakes Maurepas and Pontchartrain the line ran through the Rigolets into Lake Borgne, and after the addition to the State by the act of April 14, 1812, the eastern boundary line of Louisiana entered Lake Borgne to the south by Pearl River as well as the Rigolets. To get from Lake Borgne into the open water of the Gulf of Mexico beyond Chandeleur Islands and around to the eastern boundary of Louisiana, it was necessary, as Louisiana contends, to follow the deep water channel north of Half Moon or Grand Island, through Mississippi Sound, and thence by the pass between Cat Island and Isle à Pitre, north of the Chandeleur Islands, into the open Gulf. Many maps are given in the record, some made at dates long prior to the admission of Louisiana as a State, some at that time, and some within a few years thereafter, and all show the St. Bernard peninsula to be geographically a true part of the State of Louisiana, or of an area of country that was to form the State, and that the said peninsula projected itself as a well-defined arm of land out into the waters of the Gulf, branching off as a projection from the main body of land composing the State, and forming a part of it. We observe that on many of these early maps the term "peninsula" is applied to this projection, and that designation is sufficiently accurate for the purpose of description.

November 14, 1803, President Jefferson sent a communication to Congress, in which, among other things, he said:

"The object of the following pages is to consolidate the information respecting the present State of Louisiana, furnished to the Executive by several individuals among the best informed on the subject.

"Of the province of Louisiana no general map, sufficiently correct to be depended upon, has been published, nor has any been yet procured from a private source. It is, indeed probable that surveys have never been made upon so extensive a scale as to afford the means of laying down the various regions of a country which in some of its parts appears to have been but imperfectly explored. . . .

"St. Bernardo.

"On the east side of the Mississippi, about five leagues below New Orleans, and at the head of the English Bend, is a settlement known by the name of the Poblacion de St. Bernardo, or the Terre au Bœufs, extending on both sides of a creek or drain, whose head is contiguous to the Mississippi, and which flowing eastward, after a course of eighteen leagues, and dividing itself into two branches, falls into the sea and Lake Borgne. This settlement consists of two parishes, almost all the inhabitants of which are Spaniards from the Canaries, who content themselves with raising fowls, corn and garden stuff for the market at New Orleans. The lands cannot be cultivated to any great distance from the banks of the creek, on account of the vicinity of the marsh behind them, but the place is susceptible of great improvement, and of affording another communication to small craft of from eight to ten feet draught, between the sea and the Mississippi."

"Country from Plaquemines to the sea, and effect of the hurricanes:

"From Plaquemines to the sea is twelve or thirteen leagues. The country is low, swampy, chiefly covered with reeds, and having little or no timber, and no settlement whatever. It may be necessary to mention here, that the whole lower part of the country, from the English Turn downwards, is subject to overflowing in hurricanes, either by the recoiling of the river, or reflux from the sea on each side; and, on more than one occasion, it has been covered from the depth of two to ten feet, according to the descent of the river, whereby many lives were lost, horses and cattle swept away, and a scene of destruction laid. The last calamity of this kind happened in 1794, but fortunately they are not frequent. In the preceding year the engineer who superintended the erection of the fort at Plaquemines was drowned in his house near the fort, and the workmen and garrison escaped only by taking refuge on an elevated spot in the fort, on which there were notwithstanding two or three feet of water. These hurricanes have generally been felt in the month of August. Their greatest fury lasts about twelve hours. They commence in the southeast, veer about to all the points of the compass, are felt most severely below, and seldom extend more than a few leagues above New Orleans. In their whole course they are marked with ruin and desolation. Until that of 1793, there had been none felt from the year 1780."

This communication was, of course, before Congress when the act of 1812, admitting Louisiana, was approved, and the peninsula was clearly recognized as forming part of the Parish of St. Bernard, as was its marshy character and that of the adjoining parish.

By the act of Congress, approved March 1, 1817, (3 Stat. 348, c. 23,) the inhabitants of the western part of the then Mississippi Territory were authorized to form for themselves a State constitution and to be admitted into the Union with the following boundaries: "Beginning on the River Mississippi at the point where the southern boundary line of the State of Tennessee strikes the same; thence east along the said boundary line to the Tennessee River; thence up the same to the mouth of Bear Creek; thence by a direct line to the northwest corner of the county of Washing-

ton; thence due south to the Gulf of Mexico; thence westwardly, including all the islands within six leagues of the shore, to the most eastern junction of Pearl River with Lake Borgne; thence up said river to the thirty-first degree of north latitude; thence west along the said degree of latitude to the Mississippi River; thence up the same to the beginning."

The people in convention, August 15, 1817, formed a constitution and State government, (approved subsequently by popular vote,) and the State was admitted by resolution December 10, 1817. (3 Stat. 472.)

The State of Alabama was admitted by the act of March 2, 1819, (3 Stat. 489, c. 47,) which provided: "That the said State shall consist of all the territory included within the following boundaries, to wit: Beginning at the point where the thirty-first degree of north latitude intersects the Perdido River; thence, east, to the western boundary line of the State of Georgia; thence along said line, to the southern boundary line of the State of Tennessee; thence, west, along said boundary line, to the Tennessee River; thence, up the same, to the mouth of Bear Creek; thence, by a direct line, to the northwest corner of Washington County; thence, due south, to the Gulf of Mexico; thence, eastwardly, including all the islands within six leagues of the shore, to the Perdido River; and thence, up the same to the beginning."

The islands, marsh or otherwise, claimed by Louisiana in this case were all within three leagues of her coast. The act admitting Mississippi was passed five years after the Louisiana act, yet Mississippi claims thereunder the disputed territory, as being islands within eighteen miles of her shore. If it were true that this repugnancy between the two acts existed, it is enough to say that Congress, after the admission of Louisiana, could not take away any portion of that State and give it to the State of Mississippi. The rule, *Qui prior est tempore, potior in jure*, applied, and Section three of Article IV of the Constitution does not permit the claims of any particular State to be prejudiced by the exercise of the power of Congress therein conferred.

But it is said that the act admitting Louisiana, the act admitting Mississippi, and the act admitting Alabama must be construed as *in pari materia*; and, being so construed, that Congress must be held to have had in view in the three acts a division of the coast along the Gulf of Mexico so as to equalize the water frontage of Mississippi, Louisiana, and Alabama.

We do not regard these acts as *in pari materia* in any proper sense. They provided for the admission of three separate States, and the subject of each was not only not identical with, but not even similar to, that of the others. They did not form part of a homogeneous whole, of a common system, so as to allow a claimant under the later act to successfully contend that it changed the earlier act by construction or effected such change because declaratory of the meaning of the prior act.

And assuming for the sake of argument that the Louisiana and Mississippi acts were irreconcilably inconsistent, but remembering that when Louisiana was admitted into the Union, the territory now composing the coast counties of Mississippi, that is, below the thirty-first degree of north latitude, was not actually a part of the Mississippi Territory but was in dispute between the United States and Spain, the theory of any preconcerted design in regard to the water front of the two States is too unreasonable to be entertained.

In the treaty of peace between England, France and Spain of February 10, 1716, Article VII, on the subject of the boundary line separating the dominions of England and France in the New World, provided: "That for the future the confines between the dominions of His Britannic Majesty and those of His Most Christian Majesty in that part of the world shall be fixed irrevocably by a line drawn along the River Mississippi from its source to the River Iberville, and from thence by a line drawn along the middle of this river and the Lakes Maurepas and Pontchartrain to the sea." According to this treaty England retained the port of Mobile and its river and everything east of the Rigolets. The Island of Orleans, formed by the River Iberville, Lakes Maurepas and Pontchartrain, the Rigolets, the Gulf of Mexico and the Mississippi River, remained the property of France. In the treaty of February 10, 1763, practically the same language is used in describing the boundary line separating the British from the French territory, and by the twentieth article the cession to England of Florida by Spain and all that Spain possessed on the continent of North America was provided for. By the treaty of September 3, 1783, between England and Spain, England retroceded East and West Florida to Spain. By the treaty of St. Ildefonso of October 1, 1800, Spain ceded to France "the colony or province of Louisiana with the same extent that it now has in the hands of Spain, and that it had when France possessed it, and such as it should be after the treaties subsequently entered into between Spain and other States." April 30, 1803, France ceded to the United States "the colony or province of Louisiana," using the same description as used by Spain in ceding the territory to her, and stating in Article II "In the cession made in the preceding article are included the adjacent islands belonging to Louisiana . . ."

There is nothing in any of these transfers to raise a doubt that the peninsula of St. Bernard was part of the Island of Orleans and that this Island of Orleans was in fact formed by the extension to the sea of the boundary line coming down through the middle of Lakes Maurepas and Pontchartrain and so finding its way to the sea by the deep water channel.

March 26, 1804, an act of Congress was approved, dividing the country acquired as Louisiana from France into two parts, providing:

"That all that portion of the country ceded by France to the United States under the name of Louisiana, which lies south of the Mississippi Territory and of an east and west line to commence on the Mississippi River at the thirty-third degree of north latitude, and to extend west to the western boundary of said cession, shall constitute a Territory of the United States under the name of the Territory of Orleans, the government whereof shall be organized and administered as follows:

* * * * * *

"SECTION 12. The residue of the Province of Louisiana ceded to the United States, shall be called the District of Louisiana, the government whereof shall be organized and administered as follows: . . . ."

Congress manifestly regarded the lands to the east, that were south of the Mississippi Territory, and which form the disputed area of to-day, as part of the original Island of Orleans, included in the treaty of April 30, 1803; and these were given to the Territory of Orleans, whose southeastern boundary was the original southeastern boundary of the Island of Orleans. At that date the Mississippi Territory did not extend south of the thirty-first degree of north latitude and its domain did not reach the shore of Mississippi Sound, so-called.

February 20, 1811, (2 Stat. 641, c. 21,) an act of Congress was approved "to enable the people of the Territory of Orleans to form a constitution and State government, and for the admission of such State into the Union on an equal footing with the original States and for other purposes." The description of the limits was as follows: "Beginning at the mouth of the River Sabine, thence, by a line to be drawn along the middle of said river, including all islands, to the thirty-second degree of latitude, thence due north to the northernmost part of the thirty-third degree of north latitude, thence along said parallel of latitude to the River Mississippi, thence down the said river to the River Iberville, and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the Gulf of Mexico, thence, bounded by said gulf, to the place of beginning, including all islands within three leagues of the coast, etc., etc."

The eastern boundary thus described is a water boundary, and, in extending this water boundary to the open sea or Gulf of Mexico, we think it included the Rigolets and the deep water sailing channel line to get around to the westward. A little over one year later Louisiana was created a State by the act of Congress of April 6, 1812, with this identical eastern boundary line; and the addition of territory by the act of April 14, 1812, did not affect the deep water sailing channel line as a boundary.

April 7, 1798, (1 Stat. 549, c. 28,) an act was approved "for an amicable settlement of limits with the State of Georgia, and authorizing the organization of a government in the Mississippi Territory," which read in part: "That all that tract of country bounded on the west by the Missis

sippi; on the north by a line to be drawn due east from the mouth of the Yassous to the Chatahouchee River; on the east by the River Chatahouchee; and on the south by the thirty-first degree of north latitude, shall be, and hereby is constituted one district, to be called the Mississippi Territory." This was in conformity with the treaty between Spain and the United States of October 27, 1795. Maps of that date, and subsequently, show that the admitted rights of the United States did not at the time extend south of the thirty-first degree of north latitude at that point.

By an act of January 15, 1811, the President of the United States was authorized, among other things, in the event that any foreign government attempted to occupy the same, to take possession of the country lying east of the River Perdido, and south of the State of Georgia and the Mississippi Territory. The River Perdido is in the State of Alabama, east of the State of Mississippi, and flows into the Gulf of Mexico between Mobile Bay in Alabama and Pensacola Bay in Florida. A few days later, and on March 3, 1811, an act of Congress was approved, providing that the act of January 15, 1811, and this act, should not be published until the end of the next session of Congress, unless with the consent of the President.

By resolution approved January 15, 1811, it was specifically declared that the United States could not without serious inquietude see any part of the territory adjoining the southern border of the United States pass into the hands of any foreign power, "and that a due regard to their own safety compels them to provide, under certain contingencies, for the temporary occupation of the said territory." 3 Stat. 471.

May 14, 1812, an act of Congress was passed, (2 Stat. 734, c. 84,) to enlarge the boundaries of the Mississippi Territory, which used the following language: "That all that portion of the territory lying east of Pearl River, west of the Perdido, and south of the thirty-first degree of latitude, be, and the same is hereby annexed to the Mississippi Territory," etc. The country described was not at the time in the possession of the United States, and on February 12, 1813, Congress passed an act "authorizing the President of the United States to take possession of the tract of country lying south of the Mississippi Territory and west of the River Perdido," which act referred to the tract as "not now in the possession of the United States." 3 Stat. 472. But it was not until the enabling act in respect of Mississippi, approved March 1, 1817, that the language was used: "Thence due south to the Gulf of Mexico; thence, westward, including all the islands within six leagues of the shore, to the most eastern junction of Pearl River and Lake Borgne," etc.

The claim of Mississippi is that the disputed area is composed of islands, and as those islands are within eighteen miles of her shore, that they were given to her by the act of March 1, and the resolution of

December 10, 1817. It is true there are some islands in that area, such as Grassy, Half Moon, Petit Pass and Isle à Pitre, all of which are between the deep water channel on the north and the main coast line of St. Bernard peninsula on the south.

The contention of Louisiana is that these islands were previously given to her by the act of April 6, 1812, more than five years prior to the admission of Mississippi, and that her title thereto, even if the acts were in conflict, is superior to that of the State of Mississippi; and she also contends that the islands belong to her because they are south of the deep water sailing channel line, which she submits is the true boundary line between the two States. Mississippi denies that the peninsula of St. Bernard and the Louisiana Marshes constitute a peninsula in the true sense of the word, but insists that they constitute an archipelago of islands. Certainly there are in the body of the Louisiana Marshes or St. Bernard peninsula portions of sea marsh which might technically be called islands, because they are land entirely surrounded by water, but they are not true islands. They are rather, as the Commissioner of the General Land Office wrote the Mississippi land commissioner in 1904, "in fact, hummocks of land surrounded by the marsh and swamp in said townships. . . ."

And when the Louisiana act used the words: "thence bounded by the said gulf to the place of beginning, including all islands within three leagues of the coast," the coast referred to is the whole coast of the State, and the peninsula of St. Bernard formed an integral part of it. Lake Borgne and Mississippi Sound are bodies of salt water and as such parts of the sea or gulf, and as the coast of Louisiana began along the north shore of the peninsula, it is not to be supposed that the islands referred to by Congress in the Louisiana Act were solely those islands to the south of that State.

The contention of Mississippi is based upon an assumed inconsistency between the Louisiana and the Mississippi acts, but we think upon a true interpretation, in the light of the facts, that no such inconsistency can be imputed. The maps show that there is a chain, not of alluvial but of sea sand islands running from the west shore of Mobile Bay in the State of Alabama, westward, to and inclusive of Cat Island in the State of Mississippi. This chain forms the southern boundary of Mississippi Sound and the islands are all relatively the same distance from the shore of the States of Mississippi and of Alabama. They, beginning at the eastern end, are Dauphin, Petit Bois, Horn, Ship and Cat Islands, and there are some other islands lying within this chain. If Congress referred to these islands as being thus within six leagues of the shore, when the act creating the State of Mississippi was passed, it follows that there would be no conflict with prior existing boundaries of the State of Louisiana, particularly if the deep water sailing channel line be taken

as the correct boundary between the States. And when Congress created a separate territorial government for the eastern part of Mississippi Territory and called it Alabama, by the act of March 3, 1817, it used the same language concerning the western and southern boundary of the territory: "thence due south to the Gulf of Mexico, thence eastwardly, including all islands within six leagues of the shore to the River Perdido and thence up same to the beginning." It seems obvious to us that it was to this chain of islands that Congress referred when it admitted Mississippi into the Union, and that it had no intention whatsoever of giving Mississippi any claim of ownership in the sea marsh islands, which had been previously granted to the State of Louisiana.

We are of opinion that the peninsula of St. Bernard in its entirety belongs to Louisiana; that the Louisiana Marshes at the eastern extremity thereof form part of the coast line of the State; and that the islands within nine miles of that coast are hers, except as restricted by the deep water sailing channel regarded as a boundary. Cat Island, for instance, is within the nine miles, but it is north of the deep water channel, is not alluvial, and is conceded by both States to belong to Mississippi.

3. That there is a deep water sailing channel line emerging from the mouth of Pearl River, and extending east between Lower Point Clear and Grand Island, is shown by the numerous maps, surveys and sketches in the record. It separates into two branches, one of them passing between Cat Island and Isle à Pitre.

Among the maps put in evidence by Louisiana is one prepared by George Gauld, M. A., for the British Admiralty in the year 1778, and, from the relative depths of water given, the existence of this same channel, extending out into the Gulf, southwest of Cat Island, is shown and is the same as noted on maps of subsequent years.

February 14, 1839, an act of the legislature of Mississippi was approved, providing for a survey of the Mississippi coast. The survey and report are given in full in the record, and the deep water channel above referred to is traceable in detail on the sketch. The channels indicated on this survey and on the United States Coast and Geodetic Survey map are the same channels. It may be noted, in passing, that the body of water now known as "Mississippi Sound," is not so designated on this sketch, and the first map which uses this name, to which our attention has been called, was issued in 1866.

Louisiana lies between the States of Mississippi to the east and Texas to the west. The southern portion of Louisiana is geologically of an alluvial formation, containing the delta of the Mississippi River. The peninsula of the Parish of St. Bernard is practically a part of this delta formation.

Mississippi's mainland borders on Mississippi Sound. This is an en closed arm of the sea, wholly within the United States, and formed by chain of large islands, extending westward from Mobile, Alabama, to Ca Island. The openings from this body of water into the Gulf are neithe of them six miles wide. Such openings occur between Cat Island and Isl à Pitre; between Cat and Ship Islands; between Ship and Horn Islands between Horn and Petit Bois Islands; between Petit Bois and Dauphi Islands; and between Dauphin Island and the mainland on the west coast o Mobile Bay. The maps show all this, and, among others, reference ma be made to Jeffrey's map of 1775, given in the record, and which i reduced form is reproduced from Jeffrey's Atlas of 1800 as the frontispiec of vol. II, Adams' History of the United States.

Now to repeat, the boundary of Louisiana separating her from the Stat of Mississippi to the east is the thread of the channel of the Mississipp River, and this extends south until it reaches the thirty-first degree o north latitude and then runs directly east along that degree until Pear River is reached; thence south along the channel of that river to Lak Borgne. Pearl River flows into Lake Borgne, Lake Borgne into Missis sippi Sound and Mississippi Sound into the open Gulf of Mexico through among other outlets, South Pass, separating Cat Island from Isle à Pitre

If the doctrine of the thalweg is applicable, the correct boundary lin separating Louisiana from Mississippi in these waters is the deep wate channel.

The term "thalweg" is commonly used by writers on international la in definition of water boundaries between States, meaning the middle o deepest or most navigable channel. And while often styled "fairway" o "midway" or "main channel," the word itself has been taken over int various languages. Thus in the treaty of Luneville, February 9, 1801 we find "le Thalweg de l'Adige," "le Thalweg du Rhin," and it is simi larly used in English treaties and decisions, and the books of publicists i every tongue.

In *Iowa* v. *Illinois*, 147 U. S. 1, the rule of the thalweg was stated an applied. The controversy between the States of Iowa and Illinois on th Mississippi River, which flowed between them, was as to the line whic separated "the jurisdiction of the two States for the purposes of taxatio and other purposes of government." Iowa contended that the boundar line was the middle of the main body of the river, without regard to th "steamboat channel" or deepest part of the stream. Illinois claimed tha its jurisdiction extended to the channel upon which commerce on the rive by steamboats or other vessels was usually conducted. This court hel that the true line in a navigable river between States is the middle of th main channel of the river.

Mr. Justice Field, delivering the opinion of the court, said:

"When a navigable river constitutes the boundary between two independent States, the line defining the point at which the jurisdiction of the two separates is well established to be the middle of the main channel of the stream. The interest of each State in the navigation of the river admits of no other line. The preservation by each of its equal right in the navigation of the stream is the subject of paramount interest. It is, therefore, laid down in all the recognized treatises on international law of modern times that the middle of the channel of the stream marks the true boundary between the adjoining States up to which each State will, on its side, exercise jurisdiction. In international law, therefore, and by the usage of European nations, the term 'middle of the stream,' as applied to a navigable river, is the same as the middle of the channel of such stream, and in that sense the terms are used in the treaty of peace between Great Britain, France, and Spain, concluded at Paris in 1763. By the language, 'a line drawn along the middle of the river Mississippi from its source to the river Iberville,' as there used, is meant along the middle of the channel of the river Mississippi."

This judgment related to navigable rivers. But we are of opinion that, on occasion, the principle of the thalweg is applicable, in respect of water boundaries, to sounds, bays, straits, gulfs, estuaries and other arms of the sea.

As to boundary lakes and landlocked seas, where there is no necessary track of navigation, the line of demarcation is drawn in the middle, and this is true of narrow straits separating the lands of two different States; but whenever there is a deep water sailing channel therein, it is thought by the publicists that the rule of the thalweg applies. Martens (F. de) vol. 1, (2d ed.) p. 134; Hall, § 38; Bluntschli, (5th ed.), §§ 298, 299; Oppenheim, vol. 1, pp. 254, 255.

Thus Martens writes: "What we have said in regard to rivers and lakes is equally applicable to the straits or gulfs of the sea, especially those which do not exceed the ordinary width of rivers or double the distance that a cannon can carry."

So Pradier Fodéré says (Vol. II, p. 202), that as to lakes, "in communication with or connected with the sea, they ought to be considered under the same rules as international rivers."

The same view is confirmed by decisions of this court and of many Arbitral tribunals.

In *Devoe Manufacturing Company*, 108 U. S. 401, the question at issue was in regard to the boundary line between New York and New Jersey under an agreement between the two States. The jurisdiction of the State of New Jersey was claimed "to extend down to the bay of New York, and to the channel midway of said bay," and this court sustained the claim. See *Hamburg-American Steamship Company* v. *Grube*, 196 U. S. 407.

In the San Juan Water Boundary controversy between the United States and Great Britain, Emperor William I gave the award in favor of

the United States, October 21, 1871, by deciding "that the boundary line between the territory of Her Britannic Majesty and the United States should be drawn through the Haro Channel;" and it is apparent that the decision was based on the deep channel theory as applicable to sounds and arms of the sea, such as the straits of San Juan de Fuca; indeed in a subsequent definition of the boundary, signed by the Secretary of State, the British Minister, and the British representative, the boundary line was said to be prolonged until "it reaches the center of the fairway of the Straits of San Juan de Fuca." The fairway was the equivalent of the thalweg.

Again, in fixing the boundary line of the Detroit River, under the sixth and seventh articles of the treaty of Ghent, the deep water channel was adopted, giving Belle Isle to the United States as lying north of that channel.

So in the Alaskan Boundary Case, the majority of the arbitration tribunal, made up of Baron Alverstone, Lord Chief Justice of England, Mr. Secretary Root, and Senators Lodge and Turner, held that the middle of the Portland Channel was the proper boundary line and included Wales Island, to the north of which the channel passed. This sustained the American contention in regard to the thalweg and the island lying south of it.

But counsel contend that the rule "as to the flow of the midchannel or thalweg of the River Iberville (now known as Manchac) through the east, through Lakes Maurepas and Pontchartrain expires by its own limitation when such midchannel reaches Lake Borgne, which in contemplation of the rule is the open sea, and part of the waters of the Gulf of Mexico." This contention is inconsistent, as matter of fact, with the allegation of the cross bill that "the Mississippi Sound was recognized as a body of water six leagues wide, wholly within the State of Mississippi from Lake Borgne to the Alabama line, separate and distinct from the Gulf of Mexico," and with Mississippi's Exhibit Map A presenting her claim, while the record shows that the strip of water, part of Lake Borgne and Mississippi Sound, is not an open sea but a very shallow arm of the sea, having outside of the deep water channel an inconsiderable depth.

The maritime belt is that part of the sea which, in contradistinction to the open sea, is under the sway of the riparian States, which can exclusively reserve the fishery within their respective maritime belts for their own citizens, whether fish, or pearls, or amber, or other products of the sea. See *Manchester* v. *Massachusetts*, 139 U. S. 240; *McCready* v. *Virginia*, 94 U. S. 391.

In *Manchester* v. *Massachusetts*, the court said: "We think it must be regarded as established that, as between nations, the minimum limit of the territorial jurisdiction of a nation over tide-waters is a marine league from its

coast; that bays wholly within its territory not exceeding two marine leagues in width at the mouth are within this limit; and that included in this territorial jurisdiction is the right of control over fisheries, whether the fish be migratory, free-swimming fish, or free moving fish, or fish attached to or embedded in the soil. The open sea within this limit is, of course, subject to the common right of navigation; and all governments, for the purpose of self protection in time of war or for the prevention of frauds on its revenue, exercise an authority beyond this limit."

Questions as to the breadth of the maritime belt or the extent of the sway of the riparian States require no special consideration here. The facts render such discussion unnecessary.

Islands formed by alluvion were held by Lord Stowell, in respect of certain mud islands at the mouth of the Mississippi, to be "natural appendages of the coast on which they border, and from which, indeed, they are formed." *The Anna*, (1805) 5 C. Rob. 373.

As to these particular waters, the observations of Mr. Hall, (4th ed.) p. 129, are in point: "Off the coast of Florida, among the Bahamas, along the shores of Cuba, and in the Pacific, are to be found groups of numerous islands and islets rising out of vast banks, which are covered with very shoal water, and either form a line more or less parallel with land or compose systems of their own, in both cases enclosing considerable sheets of water, which are sometimes also shoal and sometimes relatively deep. The entrance to these interior bays or lagoons may be wide in breadth of surface water, but it is narrow in navigable water."

He then states the specific case of the Archipiélago de los Canarios on the coast of Cuba, and says: "In cases of this sort the question whether the interior waters are, or are not, lakes enclosed within the territory, must always depend upon the depth upon the banks, and the width of the entrances. Each must be judged upon its own merits. But in the instance cited, there can be little doubt that the whole Archipiélago de los Canarios is a mere salt water lake, and that the boundary of the land of Cuba runs along the exterior edge of the bank."

In such circumstances as exist in the present case, we perceive no reason for declining to apply the rule of the thalweg in determining the boundary.

4. Moreover, it appears from the record that the various departments of the United States Government have recognized Louisiana's ownership of the disputed area; that Louisiana has always asserted it; and that Mississippi has repeatedly recognized it, and not until recently has disputed it.

The question is one of boundary, and this court has many times held that, as between the States of the Union, long acquiescence in the assertion of a particular boundary and the exercise of dominion and sovereignty over the territory within it, should be accepted as conclusive, whatever the international rule might be in respect of the acquisition by prescription of large tracts of country claimed by both. *Virginia* v. *Tennessee*, 148 U. S. 503;

Indiana v. *Kentucky*, 136 U. S. 479; *Missouri* v. *Kentucky*, 11 Wall. 395; *Rhode Island* v. *Massachusetts*, 4 How. 591.

The Louisiana Enabling Act of February 20, 1811, provided that all the waste and unappropriated lands in said State should be and remain the property of the United States Government. In the disputed area of to-day are included lands and waters located in various townships, all of which are enumerated in the southeastern land district of Louisiana, east of the Mississippi River. The lands in these townships were surveyed by the Government about the year 1842, all of them as being in and forming a part of the State of Louisiana. By the Swamp Land Grants of 1849 and 1850, the United States granted to certain States the swamp and overflowed lands within their respective limits, in order that these lands might be reclaimed, protected from overflow, and brought into use. Louisiana made application to the United States for the approval to her of these lands as being part of her territory and situated within her limits. They all lay south of the deep water channel and were all approved to the State of Louisiana May 6, 1852. They were then offered by the State through the register of the State land office for sale and many sales of them were made from time to time to individuals and patents issued therefor in various years from 1853 to 1894. In 1892, in furtherance of the better protection of the lands of the Parishes of St. Bernard and Plaquemines from overflow, the legislature of Louisiana adopted an act which created a Lake Borgne Basin Levee Commission, and provided a board of commissioners therefor as a department of the State government, and the register of the State land office was authorized to transfer all of the unsold lands to the board, which was done in April, 1895. The board was authorized by law to sell these lands and also to levy taxes to be used in establishing a protective levee system in the district. The board made sales of a considerable number of acres to different individuals from September 16, 1898, to March 7, 1902. Isle à Pitre was composed of certain enumerated sections of township ten, south of range twenty east, and these lands were approved to Louisiana by the Commissioner of the General Land Office of the United States May 6, 1852, as forming part of that State, and they were subsequently patented, sold and conveyed to various individuals, the chain of title extending from 1852, a period of over fifty years. The lands forming Isle à Pitre have been paying taxes to the State of Louisiana for years. Political and police control and jurisdiction by the Parish of St. Bernard officials were exercised over the disputed area, and many instances are given of police control and jurisdiction by Louisiana officials over this general territory. This territory consisted, as heretofore stated, of what was known as the Louisiana marshes, and it is admitted that they have immemorially been known by that name, though some of the witnesses for Mississippi said that they were also known as

Grand Marshes, admitting, however, that they were quite as frequently called the Louisiana Marshes.

Some other matters may properly be referred to as showing the general understanding of and acquiescence in the boundary asserted by Louisiana.

In January, 1901, the Superintendent of the Coast and Geodetic Survey was applied to by a member of the House of Representatives from Mississippi for information in regard to the boundary line between Louisiana and Mississippi in the present disputed area, and Hodgkins, an Assistant in the Department, a well-known expert in such matters, made a report January 30, 1901, which, after considering the subject in all its phases, showed that the correct boundary between the two States in the locality is the deep water sailing channel line contended for by Louisiana.

The United States Geological Survey published in the year 1900 a bulletin devoted to a discussion of the boundaries of the States and Territories, and giving a history of changes as they may have occurred. The third edition was published in 1904. Gannett's Boundaries, 58th Congress, 2d Session, H. R. Doc. 678.

In the opinion of that Bureau, Louisiana was originally bounded by the deep water channel, and is the owner of the area in dispute to-day, according to the report and the accompanying sketches.

In 1897, Louisiana requested the United States Commission of Fish and Fisheries to make an investigation and report upon certain technical matters in connection with the Oyster industry of that State, which investigation was made in February, 1898, by the United States Fish Commission steamer Fish Hawk. A map was made of the area investigated in St. Bernard Parish, and that map is given in the opening statement as Diagram No. 4. Louisiana's ownership was clearly recognized.

The General Land Office of the United States began as early as 1842 a detailed survey of the land forming the disputed area, of which township plats appear in the record. The survey gave the location of Marsh Island, Half Moon or Grand Island, an unnamed island, Petit Pass Island, and Isle à Pitre and the sections and townships comprised in these islands. They were all designated as being in the southeastern land district of Louisiana, east of the Mississippi River.

When, as we have said, Louisiana, in the year 1852, selected these and other lands within her State limits as enuring to her under the Swamp Land Grants, the General Land Office, on May 6, 1852, recognized the correctness of the claim to the lands and approved and patented them to her as a State. Mississippi also applied for the land enuring to her under the provisions of those grants, and received her swamp lands, but the State never selected and never had approved to her, as is shown by the books of the State Land Office of Mississippi, any of the lands in the disputed area of to-day; but it appeared that the State did have in her Land Office

books a record of the lands forming St. Joseph's Island, which lay immediately north of the deep water channel, and did not extend south of that channel.

The General Land Office of the United States in all of the maps it has caused to be made of Louisiana and Mississippi has been consistent in its recognition of the ownership by Louisiana of the disputed area. (See maps of Louisiana, 1879, 1886, 1887, 1896; and of Mississippi in 1890.)

As before stated, in 1839 an engineer and surveyor made a report and sketch of the coast of Mississippi under the authority of that State. This showed the territory lying south of the deep water channel in outline to be a peninsular formation. The report referred to Horn, Petit Bois, Cat and Ship Islands as belonging to Mississippi, all of which are east of the disputed territory; and the territory southwest of the deep water channel, or South Pass, was described as the Louisiana Marshes. The official maps of Mississippi recognized Louisiana's ownership of the disputed territory. The State map of October 26, 1866, which was approved by Governor Humphrey and also by Governor Alcorn, did this; and other maps, as the official map of Mississippi, published under an act of the legislature of that State on March 8, 1882; Rand McNally's sectional map of Mississippi, compiled from the records of the office of the Surveyor General of the Board of Immigration and Agriculture, Jackson, Mississippi; and the Railroad Commissioners' map of Mississippi gave like recognition. The only exception seems to be a map of the Railroad Commission, issued in 1904, two years after this suit was instituted, wherein on the eighteen-mile theory, Mississippi for the first time cartographically extended her claims into the St. Bernard, Louisiana, peninsula.

The record contains much evidence of the exercise by Louisiana of jurisdiction over the territory in dispute, and of the general recognition of it by Mississippi as belonging to Louisiana. Apparently Louisiana had exercised complete dominion over it from 1812 with the acquiescence of Mississippi, unless the fact that the latter made a general reference to islands within six leagues of her shore in her code of 1880 indicated otherwise. But the evidence fails to satisfy us that she attempted any physical possession or control until after 1900. The few instances referred to as showing that Mississippi asserted rights in the disputed area are of little weight and require no discussion.

Our conclusion is that complainant is entitled to the relief sought.

Decree accordingly.

Clerk Supreme Court, U. S.

Supreme Court of the United States.

No. 11, Original.—October Term, 1905.

State of Louisiana, Complainant,
vs.
State of Mississippi.
} In Equity.

[April 23, 1906.]

This cause came on to be heard on the pleadings and proofs and was argued by counsel. On consideration thereof it is found by the court that the State of Louisiana, complainant, is entitled to a decree recognizing and declaring the real, certain and true boundary south of the State of Mississippi and north of the southeast portion of the State of Louisiana, and separating the two States in the waters of Lake Borgne and Mississippi Sound, to be, and that it is, the deep water channel sailing line emerging from the most eastern mouth of Pearl River into Lake Borgne and extending through the northeast corner of Lake Borgne, north of Half Moon or Grand Island, thence east and south through Mississippi Sound, through South Pass between Cat Island and Isle au Pitre, to the Gulf of Mexico, as delineated on the following map, made up of the parts of charts Nos. 190 and 191 of the United States Coast and Geodetic Survey, embracing the particular locality:

And it is ordered, adjudged, and decreed accordingly.

It is further ordered, adjudged and decreed that the State of Mississippi, officers, agents and citizens, be and they are hereby enjoined and trained from disputing the sovereignty and ownership of the State of uisiana in the land and water territory south and west of said boundary e as laid down on the foregoing map.

And that the costs of this suit be borne by the State of Mississippi.

True copy.
